EGE 14TH INTERNATIONAL CONFERENCE ON SOCIAL SCIENCES
DECEMBER 23 - 29, 2025
IZMIR

NO : **AC- 14S - 2025. 438s– 3052**
Konu : Akademik Teşvik Uygunluk Belgesi 29/12/2025

İLGİLİ MAKAMA

Academy Global Conferences tarafından düzenlenen **Ege 14. Uluslararası Sosyal Bilimler Kongresi** 23-29 Aralık 2025 tarihlerinde Ege'de 44 farklı ülkeden akademisyenin katılımıyla gerçekleştirilmiştir. Kongre kapsamında sunulan 1391 bildirinin 684'ü Türkiye'den, 707'si ise farklı 43 ülkeden katılan akademisyenler tarafından sunulmuştur. Kongre, 16 Ocak 2020 Akademik Teşvik Ödeneği Yönetmeliğine getirilen "Tebliğlerin sunulduğu yurt içinde veya yurt dışındaki etkinliğin uluslararası olarak nitelendirilebilmesi için Türkiye dışında en az beş farklı ülkeden sözlü tebliğ sunan konuşmacının katılım sağlaması ve tebliğlerin yarıdan fazlasının Türkiye dışından katılımcılar tarafından sunulması esastır." değişikliğine uygun olarak düzenlenmiştir.

ÖNEMLİ AÇIKLAMA (Lütfen okuyunuz)

- ZOOM bağlantısı için yukarıda verilen bağlantıyı veya yine yukarıda verilen giriş bilgilerini kullanabilirsiniz.
- **Oturum içerisinde en KIDEMLİ olan moderator olarak seçilir. Moderatörün oturum düzenini gözetmesi, akademisyen adaylarını yönlendirmesi beklenmektedir.**
- Oturuma bağlanmadan önce Salon numaranızı adınızın önüne aşağıdaki gibi ekleyiniz. Bu sayede kongre açılışında beklemeden oturumlarınıza gönderilebileceksiniz. Ör. 5 Ahmet Ahmetoglu
- **Sunum süresi 10 dakikadır. Bu sürenin aşılmamasını moderatörler temin edecektir.**
- Sunum sonrası 5 dakikayı geçmeyen soru-cevap, tartışma süresi verilmektedir.
- **Sunumlar TÜRKÇE veya İNGİLİZCE yapılabilmektedir.**
- Kameralar, oturum süresince toplam % 70 oranında açık olmak zorundadır.
- **Sunum yapan katılımcının kamerası açık olmak zorundadır.**
- Sunum yapmak zorunludur. **Herhangi bir nedenle sunum yapmamış olan katılımcıya sertifika verilmesi ve çalışmasının yayınlanması sözkonusu olamaz.**
- Katılımcı, kendi oturumda, oturum bitene kadar bulunmak zorundadır.
- Katılımcıların kendi oturumları dışındaki oturumlara katılma zorunluluğu yoktur.
- ZOOM platformunun kapasite sınırı nedeniyle, DİNLEYİCİ, sadece kapasite izin verdiği sürece kabul edilebilmektedir.
- **SADECE ÇALIŞMADA YAZAR OLARAK GEÇEN KİŞİLER SUNUM YAPABİLİR !**

IMPORTANT, PLEASE READ CAREFULLY

- To be able to make a meeting online, login via https://zoom.us/join site, enter ID instead of "Meeting ID
- or Personal Link Name" and solidify the session.
- The Zoom application is free and no need to create an account.
- The Zoom application can be used without registration.
- The application works on tablets, phones and PCs.
- Speakers must be connected to the session **10 minutes before** the presentation time.
- All congress participants can connect live and listen to all sessions.
- During the session, your camera should be turned on **at least %70** of session period
- Moderator is responsible for the presentation and scientific discussion (question-answer) section of the session.

TECHNICAL INFORMATION

- Make sure your computer has a microphone and is working.
- You should be able to use screen sharing feature in Zoom.
- Attendance certificates will be sent to you as pdf at the end of the congress.
- Moderator is responsible for the presentation and scientific discussion (question-answer) section of the session.
- Before you login to Zoom please indicate your name surname and hall number,

MODERNİTEYE RAĞMEN GELENEKSEL AİLENİN SÜRDÜRÜLEBİLME İMKÂNI: SOSYOLOJİK VE FELSEFİ BİR ANALİZ

Doç. Dr. Eyüp KURT[1]

ÖZET

Bu çalışma, modernitenin bireycilik, kentleşme ve sekülerleşme gibi temel dinamikleri karşısında, tarihsel ve toplumsal bir kökene sahip olan geleneksel aile yapısının varlığını sürdürme imkânlarını, karşılaştığı meydan okumaları ve geçirdiği yapısal dönüşümleri derinlemesine incelemektedir. Araştırmanın temel amacı, modernitenin aile kurumu üzerindeki dönüştürücü ve çoğu zaman aşındırıcı etkilerini analiz etmek; buna mukabil ailenin bu meydan okumalara karşı geliştirdiği direnç mekanizmalarını ve adaptasyon stratejilerini ortaya koymaktır. Konunun önemi, ailenin toplumun temel taşı olma niteliğini tarih boyunca korurken, modernitenin getirdiği bireysel yalnızlaşma, kimlik krizleri ve manevi boşluklar karşısında bireyler için yeniden güvenli bir sığınak ve manevi bir referans noktası olarak değer kazanmasından kaynaklanmaktadır.

Sosyolojik bir perspektifle ve literatür taramasına dayalı kuramsal bir yöntemle yürütülen bu araştırma, modernleşme ile geleneksel ailenin kaçınılmaz bir çözülme ve yok oluş yaşadığı yönündeki determinist ve karamsar görüşü sorgulamaktadır. Elde edilen temel bulgular, ailenin pasif bir şekilde yok olmak yerine, modernite ile diyalektik bir ilişki içine girerek yapısal ve işlevsel bir dönüşüm geçirdiğini göstermektedir. Sanayileşme ile birlikte üretim birimi olma özelliğini büyük ölçüde yitiren aile; duygusal tatmin, psikolojik destek, kimlik inşası ve kültürel aktarım gibi yeni ve hayati işlevler üstlenerek önemini korumayı başarmıştır. Sonuç olarak, geleneksel ailenin mutlak bir yok oluşla karşı karşıya olmadığı; aksine modern değerlerle müzakere ederek kendini yeniden üreten, dinamik ve "yeni-geleneksel" formlar altında sürdürülebilir bir geleceğe sahip olduğu tespit edilmiştir. Bu bağlamda aile, geleneksel değerleri özü itibariyle kaybetmeden, moderniteyle birlikte dönüşerek varlığını devam ettiren canlı bir kurumdur.

Anahtar Kelimeler: Aile, Gelenek, Modernite, Dönüşüm, Kentleşme, Adaptasyon.

1. Giriş: Modernitenin Meydan Okuması ve Ailenin Direnci

Tarih sahnesine bireyselliği, araçsal akılcılığı ve süreklilik arz eden değişimi temel alan dönüştürücü bir güç olarak çıkan modernite, kendinden önceki tüm toplumsal yapıları, inanç sistemlerini ve kurumsal işleyişleri köklü bir sorgulamaya tabi tutmuştur. Bu devasa ontolojik ve sosyolojik sorgulamadan en çok etkilenen, en derin sarsıntıları yaşayan kurumların başında ise hiç şüphesiz toplumun temel taşı ve en kadim birimi olan aile gelmektedir. Yüzyıllar boyunca tarım toplumlarının durağan yapısında şekillenen, üretim ve tüketimin iç içe geçtiği,

[1] Doç. Dr., AKÜ, İlahiyat Fakültesi, İslam Tarihi ve Sanatları Bölümü, ekurt@aku.edu.tr, 0000-0002-0351-9575

hiyerarşinin ve kolektif bağların güçlü olduğu geleneksel aile; sanayi devrimi ve sonrasındaki süreçlerle birlikte büyük bir türbülansın içine girmiştir.

Sanayileşme süreciyle birlikte ailenin bir üretim birimi olma vasfını yitirmesi, kentleşme dalgasıyla geniş aile bağlarından koparak mekânsal olarak çekirdekleşmesi ve sekülerleşme rüzgarlarıyla manevi otoritesinin sarsılması, geleneksel aileyi modern dünyanın değerleriyle keskin bir karşıtlık içine sürüklemiştir. Bu yeni düzende, kolektif kimliğe, kuşaklararası hiyerarşiye ve yerleşik toplumsal cinsiyet rollerine dayanan geleneksel ailenin; modernitenin kutsadığı bireysel özgürlük, otonomi ve kendi kaderini tayin etme idealleri karşısında varlığını sürdüremeyeceği düşünülmüştür. Hatta birçok modernist kuramcı tarafından aile, zamanla işlevini yitirecek ve tarihin tozlu raflarına kalkacak arkaik bir kalıntı olarak görülmeye başlanmıştır.

Ancak, ailenin yok olacağını öngören bu determinist ve lineer tarih anlayışı, ailenin değerlerine olan sadakatini ve aynı zamanda değişen koşullara uyum sağlama yeteneğini, yani dinamik doğasını göz ardı etme hatasına düşmüştür. Çünkü geleneksel aile, sahip olduğu bu dinamik vasıfla, modernitenin yıkıcı meydan okumaları karşısında tamamen çözülmek bir yana, modernite ile sürekli bir müzakere ve pazarlık sürecine girmiştir. Bu süreçte kendi yapılarını dönüştürmüş, esnetmiş ve "yeni formlar" altında varlığını inatla devam ettirme yolunu seçmiştir. Gelinen noktada aile, geçirdiği büyük erozyona rağmen sadece biyolojik bir zorunluluk veya kan bağına dayalı bir yapı değil; modern bireyin sığınabileceği, duygusal tatmin ve psikolojik desteğin arandığı birincil ve vazgeçilmez bir kaynak haline gelmiştir.

Bu çalışma, modernite ile geleneksel aile arasındaki bu gerilimli ancak üretken diyalektik ilişkiyi incelemeyi amaçlamaktadır. Çalışmanın akışında ilk olarak geleneksel ailenin tanımı, kapsamı ve özellikle İslam ahlak felsefesindeki yeri ele alınacaktır. Akabinde, modernleşme süreçlerinin (kentleşme, sanayileşme, bireyselleşme, teknoloji vb.) geleneksel aile üzerindeki aşındırıcı etkileri detaylandırılacaktır. Son bölümde ise ailenin bu meydan okumalara karşı geliştirdiği direnç mekanizmaları, adaptasyon stratejileri ve geleceğe dair sürdürülebilirlik imkanları analiz edilecektir. Nihayetinde, "geleneksel" olarak kodlanan değerlerin modern hayatın karmaşası içinde nasıl ve ne ölçüde yaşatılabileceği sorusuna yanıt aranacaktır.

2. Geleneksel Ailenin Yapısı ve Felsefi Temelleri

2.1. Geleneksel Ailenin Sosyolojik Çerçevesi

Geleneksel aile, belirli bir coğrafya, kültür ve tarihsel bağlamda, nesilden nesile sözlü ve pratik yollarla aktarılan, yerleşik normlar ve değerler üzerine inşa edilmiş köklü bir aile modelidir. Modern çekirdek ailenin aksine, bu yapı genellikle daha geniş, hiyerarşik düzenin belirgin olduğu ve rollerin net çizgilerle ayrıldığı bir görünüme sahiptir.

Bu yapının en belirgin özelliklerinden biri "geniş aile" formudur. Çekirdek ailenin (anne, baba, çocuk) ötesinde; dede, nine, amca, teyze, hala gibi kan bağı olan diğer akrabaların da aynı çatı altında veya birbirine çok yakın mesafede, sürekli etkileşim halinde yaşaması esastır. "Birlikte yaşayan aile" olarak da adlandırılan bu modelde, otorite figürü genellikle ailenin en yaşlı

erkeğidir. Kararlar, bu otorite figürünün süzgecinden geçer, onun onayıyla meşruiyet kazanır. Yaşlılara hürmet ve otoriteye itaat, sadece bir görgü kuralı değil, aile içi hiyerarşinin ve düzenin temel direğidir.

Ekonomik açıdan bakıldığında geleneksel aile, modern ailenin aksine sadece bir tüketim birimi değil, aynı zamanda hayati bir "üretim birimi"dir. Özellikle tarım toplumlarında ve sanayi öncesi dönemlerde aile, ekonomik hayatın merkezidir. Tarlada ekimden hasada, hayvancılıktan süt ürünlerinin işlenmesine kadar tüm süreçler, ailenin kolektif emeğiyle yürütülür. Çocuklar, erken yaşlardan itibaren bu ekonomik çarkın bir parçası olur; tarlada, bahçede veya atölyede çalışarak hem meslek öğrenir hem de aile bütçesine katkı sağlarlar. Üretilen buğday, sebze veya hayvansal ürünler öncelikle ailenin kendi ihtiyacını karşılar, artan kısım ise takas veya satış yoluyla diğer ihtiyaçlara dönüştürülür. Bu "kendi kendine yetebilme" durumu, geleneksel aileyi dışsal ekonomik şoklara karşı daha dirençli ve bağımsız kılmıştır.

2.2. İslam Ahlak Felsefesinde Ailenin Yeri ve Önemi

Geleneksel aile kurumu yalnızca sosyoekonomik şartların ortaya çıkardığı işlevsel bir yapı değil, aynı zamanda derin felsefi ve dinî temellere dayanan köklü bir müessesedir. Klasik İslam ahlak felsefesi literatüründe aile, birey ile toplum ve devlet arasında köprü vazifesi gören, hiyerarşik bütünün vazgeçilmez bir halkası olarak konumlandırılır. Bu düşünce geleneğinde ahlaki ve toplumsal düzen, bireysel ahlaktan aile içi düzene ve oradan da toplumsal ve siyasal yönetime uzanan bütüncül bir yapı üzerine inşa edilmiştir. Bireyin kendi nefsini terbiye ederek kötü huylardan arınması ve erdemli bir kişilik inşa etmesi, aile düzeninin ahlaki temellerini oluşturur ve bu düzenin toplumsal alana taşınması ise sağlıklı bir devlet ve toplum yapısının ön şartı olarak görülür.

Kınalızâde Ali Efendi, Fârâbî ve Nasîrüddin Tûsî gibi klasik mütefekkirler, bireysel ahlak, aile düzeni ve siyasal yapının birbirinden bağımsız alanlar olmadığını, aksine birbirini tamamlayan ve besleyen unsurlar olduğunu ifade ederler. Bu çerçevede bireysel ahlak anlayışı, insan ruhunun arınmasını ve yetkinleşmesini hedefleyen bir tür ruhani tedavi olarak değerlendirilir. Kınalızâde'ye göre ahlak eğitimi çocukluk döneminde başlar ve insanın doğuştan sahip olduğu saf fıtratın doğru biçimde yönlendirilmesi ebeveynin asli sorumlulukları arasında yer alır. Çocuğa iyi davranışların kazandırılması ve bu davranışların kalıcı alışkanlıklar haline getirilmesi, yalnızca bireysel mutluluğun değil, aile ve toplum düzeninin de temelini oluşturur.

Aile yönetimini ifade eden anlayış ise ailenin sadece biyolojik bir birliktelik olarak değil, aynı zamanda ekonomik ve ahlaki bir düzen alanı olarak ele alınmasını sağlar. Bu yaklaşımda aile reisi, ailenin maddi ihtiyaçlarını karşılayan, bireylerini koruyan ve onları tehlikelerden sakınan sorumlu bir önder olarak tanımlanır. Ailenin idaresi, sadece geçimin teminiyle sınırlı olmayıp, aile bireyleri arasında uyumun sağlanması, ortak hedeflerin belirlenmesi ve elde edilen imkânların adaletli biçimde paylaşılması gibi temel ilkeleri kapsar. Fârâbî'nin aileyi yetkin olmayan toplulukların en küçüğü olarak nitelemesi, ailenin toplumun çekirdeği olduğu düşüncesini açıkça yansıtmaktadır.

Bu bakış açısına göre erdemli bireylerin oluşturduğu aileler, erdemli bir toplumsal yapının temelini teşkil ederken, aile yapısındaki ahlaki bozulma da kaçınılmaz biçimde toplumsal ve siyasal çözülmeyi beraberinde getirir. Bu nedenle aile, İslam düşüncesinde yalnızca bireysel hayatın değil, adaletli ve düzenli bir toplumun da kilit taşı olarak kabul edilmektedir. Günümüzde modernitenin dönüştürücü baskıları karşısında ailenin korunmasına yönelik çabalar, esasen bu derin tarihsel, felsefi ve ahlaki birikimin çağdaş koşullar altında yeniden hatırlanması ve sürekliliğinin sağlanması arzusunun bir yansımasıdır.

3. Geleneksel Aileyi Sarsan Modern Dinamikler

Geleneksel aile yapısı, yüzyıllar boyunca koruduğu istikrarı, modernitenin getirdiği çok boyutlu değişim dalgaları karşısında kaybetme riskiyle yüzleşmiştir. Sanayileşme, kentleşme, kadın hakları hareketleri, bireyselleşme ve teknolojik devrim; ailenin genetiğini değiştiren temel faktörlerdir.

3.1. Mekânsal ve İktisadi Kopuş: Kentleşme ve Sanayileşme

Modernleşmenin lokomotifi olan sanayileşme ve kentleşme, ailenin fiziksel ve ekonomik yapısını kökten değiştirmiştir. Tarım toplumunda geniş arazilerde, kolektif emekle var olan "geniş aile", sanayi toplumunun dar apartman dairelerine ve bireysel ücret sistemine uymamıştır. Kırdan kente göç, ailenin fiziksel olarak parçalanmasına ve çekirdek aileye (anne-baba-çocuk) indirgenmesine neden olmuştur. Şehir hayatının getirdiği konut sorunu, geniş ailenin bir arada yaşamasını imkânsız hale getirmiştir. Daha da önemlisi, üretimin evden fabrikaya taşınması, ailenin "üretim birimi" olma vasfını sona erdirmiştir. Artık aile, dışarıda kazanılan paranın harcandığı bir "tüketim birimi"ne dönüşmüştür. Bu durum, aile içindeki ekonomik bağımlılık ilişkilerini zayıflatmış, bireylerin (özellikle gençlerin) ekonomik özgürlüklerini kazanarak aile otoritesinden bağımsızlaşmalarının yolunu açmıştır.

3.2. Cinsiyet Rejiminin Değişimi: Kadının Toplumsal Rolü

Geleneksel ailenin ataerkil yapısını en çok sarsan faktör, kadının eğitim ve iş hayatına katılımıdır. Geleneksel yapıda "evin içi" ile sınırlandırılan kadın, moderniteyle birlikte kamusal alana çıkmış, eğitim almış ve ücretli işlerde çalışmaya başlamıştır. Kadının ekonomik bağımsızlığını kazanması, erkeğin "tek geçim sağlayıcı" ve "mutlak otorite" rolünü yıkmıştır. Artık kadınlar, aile içi kararlarda söz sahibi olmakta, eşitsiz ilişkilere itiraz edebilmekte ve mutsuz evlilikleri sonlandırma cesareti (boşanma) gösterebilmektedir. Bu durum, evlilik yaşının yükselmesine, çocuk sayısının azalmasına ve boşanma oranlarının artmasına neden olmuştur. Aile içi iş bölümü de değişmiş; çocuk bakımı ve ev işleri artık sadece kadının değil, erkeğin de sorumluluk alanı olarak tartışılmaya başlanmıştır.

3.3. "Biz"den "Ben"e Geçiş: Bireyselleşme

Modernitenin en güçlü ideolojik aygıtı olan bireyselleşme, ailenin kolektif ruhunu hedef almıştır. Geleneksel toplumda birey, kendini ailesi veya aşireti üzerinden tanımlarken ("falancanın oğlu/kızı"); modern toplumda kendi başarıları ve tercihleri üzerinden tanımlar.

Evlilik, meslek seçimi ve yaşam tarzı gibi hayati kararlar, artık ailenin onayıyla değil, bireyin kişisel tatmini ve mutluluğu ekseninde alınmaktadır. "Kutsal aile" veya "görev bilinci" yerini "bireysel mutluluk" arayışına bırakmıştır. Bu durum, ailenin birey üzerindeki denetimini zayıflatmış, kuşaklararası itaat kültürünü aşındırmış ve aile bağlarının gevşemesine yol açmıştır. Bireyler, ailevi yükümlülükleri (örneğin yaşlı bakımı) kendi kariyer ve özel hayatlarının önünde bir engel olarak görme eğilimine girebilmektedir.

3.4. Üretimden Tüketime Aile: Ekonomik Baskılar

Tüketim kültürü, aileyi bir arada tutan değerleri maddileştirmiştir. Aile, kendi kendine yeten bir yapıdan, her şeyi piyasadan satın alan bir yapıya evrilmiştir. Modern tüketim kalıpları, ihtiyaçları sınırsız hale getirmiş; en yeni teknolojiye, modaya veya lüks tatillere ulaşmak bir statü göstergesi olmuştur. Bu arzu nesnelerine ulaşmak için ebeveynlerin daha çok çalışması gerekmiş, bu da evde geçirilen kaliteli zamanı azaltmıştır. Akşam yemekleri, sohbetler yerini yorgunluğa ve ekran başındaki yalnızlığa bırakmıştır. Ekonomik stres ve borçlanma, aile içi çatışmaların ve boşanmaların en önemli sebeplerinden biri haline gelmiştir.

3.5. Dijitalleşen İletişim ve Yabancılaşma

Teknoloji, ailenin mekânsal sınırlarını kaldırmış ancak duygusal sınırlarını kalınlaştırmıştır. Akıllı telefonlar ve internet sayesinde uzaktaki akrabalarla iletişim kolaylaşsa da, aynı evin içindeki bireyler birbirine yabancılaşmıştır. Yemek masasında bile herkesin kendi ekranına baktığı, yüz yüze iletişimin azaldığı bir "sanal yalnızlık" ortamı oluşmuştur. Bilgi otoritesi değişmiştir; çocuklar artık hayatı büyüklerinden değil, internetten (Google, YouTube) öğrenmektedir. Bu durum, ebeveynin rehberlik rolünü zayıflatmış ve kuşaklararası değer aktarımında kopukluklara yol açmıştır. Ayrıca dijital oyunlar ve sosyal medya, çocukları ailenin ortak zamanından çalarak sanal odalara hapsetmiştir.

4. Direnç ve Uyum: Geleneksel Ailenin Sürdürülebilirlik Stratejileri

Modernitenin tüm bu aşındırıcı etkilerine rağmen, aile kurumu yok olmamış, aksine yeni savunma mekanizmaları geliştirerek hayatta kalmıştır. Sosyolojik veriler, ailenin pasif bir kurban değil, aktif bir özne olduğunu göstermektedir.

4.1. Dini ve Ahlaki Değerlerin Yeniden Yorumlanması

Ailenin manevi temellerini korumak için, dini değerlerin modern hayatın gerçekleriyle çatışan değil, ona rehberlik eden bir formatta sunulması stratejik bir öneme sahiptir. İslam'ın evliliğe atfettiği "huzur" (*sekine*) ve eşlerin birbirine "örtü" (*libas*) olması gibi metaforlar, modern bireyin aradığı duygusal güven ve psikolojik destek ihtiyacıyla örtüşmektedir. Bu strateji, dini kuralları katı dogmalar olarak değil; sadakat, merhamet, fedakârlık gibi evrensel erdemlerin pratik hayata yansıması olarak işler. Örneğin, Hazreti Peygamber'in aile hayatındaki şefkatli ve istişareye dayalı tutumu, modern ailenin demokratikleşme arayışına manevi bir model teşkil edebilir. Medya ve sanat yoluyla bu pozitif aile modellerinin görünür kılınması, toplumsal bilinci besleyebilir.

4.2. Kurumsal Destek: Aile Danışmanlığı Hizmetleri

Geleneksel ailenin "kol kırılır yen içinde kalır" anlayışı, modern sorunlar karşısında yetersiz kalmaktadır. Bu noktada profesyonel destek mekanizmaları devreye girmektedir. Aile ve Sosyal Hizmetler Bakanlığı ile Diyanet İşleri Başkanlığı'nın iş birliği, ailelere hem psikolojik hem de manevi danışmanlık sunan bütüncül bir model oluşturmaktadır. Aile danışmanlığına başvurmanın bir zayıflık değil, aileyi koruma iradesi olduğu algısının yerleşmesi gerekmektedir. Uzmanların hem modern psikolojiyi hem de toplumun kültürel/dini kodlarını bilmesi, çözümün kabul edilebilirliğini artırır. Bu "koruyucu aile hizmetleri", krizler büyümeden müdahale edilmesini sağlar.

4.3. Sosyal Politika: Teşvikler ve Yaptırımlar

Devletin aile kurumunu koruması anayasal bir sorumluluk olarak değerlendirilmelidir. Bu sorumluluk yalnızca aileyi söylemsel düzeyde yüceltmekle sınırlı kalmamalı, aynı zamanda çok boyutlu ve dengeli bir politika yaklaşımıyla somut uygulamalara dönüştürülmelidir. Bu çerçevede aileyi güçlendirmeye yönelik stratejilerin hem destekleyici hem de koruyucu bir eksende ele alınması zorunludur. Medya alanında sağlıklı iletişim kurabilen, çatışmalarını şiddetle değil diyalog, anlayış ve empati yoluyla çözebilen aile modellerinin teşvik edilmesi, toplumsal algının olumlu yönde şekillenmesine katkı sağlayacaktır. Böyle bir yaklaşım, aile içi ilişkilerde yapıcı tutumların normalleşmesine ve sorun çözme becerilerinin güçlenmesine imkân tanır. Bununla birlikte ailelerin dijital medya okuryazarlığı düzeylerinin artırılması, sosyal medyada sıklıkla sunulan kusursuz ve gerçeklikten kopuk aile temsillerinin yol açtığı baskılara karşı bilinç geliştirilmesini sağlar. Medya okuryazarlığına sahip aileler, bu tür içerikleri sorgulayabilir ve kendi yaşam pratiklerini değersizleştirmeden, gerçekçi ve sağlıklı bir aile algısını muhafaza edebilir.

Aile kurumunu korumaya yönelik politikaların ikinci boyutunu ise güçlü ve etkin yaptırımlar oluşturmaktadır. Aile içi şiddet, aile yapısına ve insan onuruna yönelmiş en ağır tehditlerden biri olup, hiçbir biçimde meşrulaştırılamaz. Bu nedenle hukuki düzenlemelerin caydırıcılığı büyük önem taşımaktadır. Şiddete maruz kalan bireylerin etkin biçimde korunması, hukuki süreçlerin hızlı ve adil bir şekilde işletilmesi ve şiddetin disiplin yöntemi olarak kabul edilemeyeceği bilincinin topluma yerleştirilmesi temel öncelikler arasında yer almalıdır. Aile içinde güvenliğin tesis edilmediği bir ortamda sağlıklı ilişkilerden söz etmek mümkün değildir. Dolayısıyla aileyi koruyan, bireyi güvence altına alan ve şiddetsiz bir yaşam kültürünü esas alan hukuki ve toplumsal düzenlemeler, güçlü ve sürdürülebilir bir aile yapısının vazgeçilmez koşulu olarak görülmelidir.

4.4. Yapısal Uyum: Çekirdek Ailede Geniş Aile Ruhu

Fiziksel olarak çekirdek aileye dönüşülse bile, geniş ailenin ruhu yaşatılabilir. Bu strateji, "mekânsal ayrılık, duygusal birliktelik" ilkesine dayanır. Aynı evde yaşanmasa bile, dede ve ninelerle düzenli görüşmeler, bayram buluşmaları, hastalıkta ve sağlıkta yardımlaşma pratikleri devam ettirilmelidir. Önemli kararlar alınırken büyüklerin tecrübesine başvurmak (*istişare*),

geleneksel saygı kültürünü modern hayata taşır. Bu sayede çekirdek aile, modernitenin yalnızlaştırıcı etkisinden kurtulur ve arkasında geniş bir ailenin manevi gücünü hisseder.

4.5. Dayanışma Ağlarının Güçlendirilmesi

Modern hayatın riskleri (işsizlik, boşanma, hastalık) karşısında aile, bireyin en önemli sosyal güvenlik ağıdır. Geleneksel ailenin en güçlü yönü olan dayanışma, modern zamanlarda da sürdürülmelidir. Maddi yardımlaşmanın ötesinde, duygusal dayanışma ön plandadır. Eşlerin birbirini dinlemesi, çocukların duygularının önemsenmesi ve akrabaların zor günlerde kenetlenmesi, aileyi bir "güvenli liman" yapar. Büyükanne ve büyükbabaların torun bakımına destek olması, hem çalışan ebeveynin yükünü hafifletir hem de kuşaklararası bağı güçlendirir.

4.6. Kuşaklararası İletişimin Canlı Tutulması

Kültürel mirasın aktarımı için kuşaklararası iletişim kanallarının açık tutulması şarttır. Büyüklerin hikayeleri, ailenin tarihini ve kimliğini oluşturur. Teknoloji, bu noktada bir fırsat olarak kullanılabilir. Farklı şehirlerdeki torunlarla yapılan görüntülü görüşmeler, aile WhatsApp grupları, dijital aile albümleri; mesafeleri kısaltarak bağları canlı tutar. Aile büyüklerinin anılarını kaydetmek, soyağacı oluşturmak gibi projeler, gençlerin kökleriyle bağ kurmasını sağlar. Bu iletişim, geçmişin bilgeliği ile geleceğin enerjisini birleştirir.

5. Sonuç

Bu çalışma, modernitenin sarsıcı etkilerine rağmen geleneksel ailenin yok olmadığını, aksine şaşırtıcı bir dirençle kendini yenilediğini ortaya koymuştur. Sanayileşme ve kentleşme ailenin dış kabuğunu (yapısını) değiştirmiş, onu üretim biriminden tüketim birimine, geniş aileden çekirdek aileye dönüştürmüştür. Ancak ailenin özü, yani insanlara sağladığı aidiyet, güven, sevgi ve manevi tatmin işlevi, modern dünyada daha da kıymetli hale gelmiştir.

Determinist "yok oluş" tezlerinin aksine, aile kurumu modernite ile diyalektik bir ilişki kurarak "evrim" geçirmiştir. Ortaya çıkan tablo, ne tamamen geçmişin kopyası olan katı geleneksel aile ne de köklerinden kopmuş atomize modern ailedir. Karşımızdaki yapı, geleneksel değerleri (dayanışma, saygı, sadakat) modern araçlarla (teknoloji, demokrasi, bireysel gelişim) harmanlayan "yeni-geleneksel" veya "melez" bir aile modelidir.

Bu yeni modelde, kadının gücü artmış, aile içi ilişkiler daha eşitlikçi bir zemine oturmuş, ancak ailenin kutsallığı ve birleştirici gücü korunmaya çalışılmıştır. Teknoloji, yüz yüze iletişimi tehdit etse de doğru kullanıldığında geniş aile bağlarını sürdürmenin bir aracı olabilmektedir.

Sonuç olarak, ailenin sürdürülebilirliği; fiziksel mekanlardan ziyade, zihinsel ve duygusal bağların gücüne bağlıdır. Dini ve ahlaki değerlerin çağa uygun yorumlanması, profesyonel destek mekanizmalarının işletilmesi ve kuşaklararası iletişimin koparılmaması; aileyi geleceğe taşıyacak temel sütunlardır. Hazreti Mevlana'nın pergel metaforunda olduğu gibi; bir ayağı sabit değerlerde (gelenek/maneviyat), diğer ayağı ise modern dünyanın gerçeklerinde dolaşan bir aile yapısı, hem bireysel huzurun hem de toplumsal bekânın teminatıdır.

KÜRESELLEŞME ÇAĞINDA AİLENİN VE EBEVEYNLİĞİN YAPISAL DÖNÜŞÜMÜ: TEHDİTLER, FIRSATLAR VE STRATEJİLER

Doç. Dr. Eyüp KURT[1]

ÖZET

Bu çalışma, 20. yüzyılın sonlarından itibaren ivme kazanan küreselleşme sürecinin, toplumun en temel yapı taşı olan aile kurumu ve ebeveynlik rolleri üzerindeki derin ve çok boyutlu etkilerini analiz etmeyi amaçlamaktadır. Çalışma, küreselleşmeyi sadece ekonomik bir entegrasyon olarak değil; teknolojik, kültürel ve normatif unsurların iç içe geçtiği karmaşık bir süreç olarak ele almaktadır. Sistematik literatür taraması ve disiplinlerarası bir perspektifle yürütülen bu inceleme, ebeveynliğin "topluluk temelli ve içgüdüsel" bir rolden; "bireyselleşmiş, uzman bilgisi gerektiren, kaygı yüklü ve profesyonel" bir projeye dönüşümünü mercek altına almaktadır. Bu dönüşüm sürecinde babalık rolünün evrimi, dijital ebeveynlik kavramının doğuşu, "paranoyak ebeveynlik" gibi yeni kaygı biçimleri ve ebeveynlerin geleneksel ile modern arasında geliştirdikleri "melez" stratejiler tartışılmaktadır. Sonuç olarak çalışma, ebeveynlerin bu küresel meydan okumalarla tek başlarına bırakılmaması gerektiğini savunarak, iş-yaşam dengesi, erişilebilir bakım hizmetleri ve ruh sağlığı desteklerini içeren bütüncül sosyal politika önerileri sunmaktadır.

Anahtar Kelimeler: Küreselleşme, Ebeveynlik Rolleri, Aile Sosyolojisi, Dijital Ebeveynlik, Babalık, Sosyal Politika.

1. Giriş: Küresel Bir Köyde Ebeveynlik Yapmak

Küreselleşme, sınırların eridiği, mesafelerin anlamını yitirdiği ve yerel olanın küresel olanla sürekli bir etkileşim halinde olduğu yeni bir dünya düzenini ifade etmektedir. Özellikle 20. yüzyılın son çeyreğinden itibaren toplumsal yapıları iktisadi, teknolojik ve kültürel boyutlarıyla derinden sarsan bu süreç, kaçınılmaz olarak toplumun nüvesi olan aileyi de dönüştürmektedir. Geleneksel değerlerin korunaklı limanından çıkan ebeveynler, küresel normların ve beklentilerin oluşturduğu açık denizde yeni rotalar çizmek zorunda kalmaktadır. Geleneksel ile modern, yerel ile küresel arasında sıkışan ebeveynler, bu ikilem içerisinde kendilerine özgü yeni roller ve sorumluluklar inşa etmeye çalışmaktadır.

[1] Doç. Dr., AKÜ, İlahiyat Fakültesi, İslam Tarihi ve Sanatları Bölümü, ekurt@aku.edu.tr, 0000-0002-0351-9575

Ortaya çıkan tablo, sadece ebeveynlerin bireysel tutumlarını değil, ailenin ontolojik yapısını da etkileyen çok katmanlı bir soruna işaret etmektedir. Literatürde genellikle kadınların iş gücüne katılımı veya dijitalleşme gibi tekil başlıklar altında incelenen bu dönüşüm, aslında birbirini tetikleyen faktörlerin karmaşık bir bileşkesidir. Bu çalışmanın temel motivasyonu, küreselleşmenin ebeveynlik üzerindeki etkilerini parçalı değil; iktisadi, teknolojik, kültürel ve normatif vektörlerin kesişim noktasında, bütüncül bir yaklaşımla ele almaktır. Çalışma, ebeveynlerin karşılaştığı zorlukları, geliştirdikleri başa çıkma stratejilerini (melez ebeveynlik, dijital okuryazarlık vb.) ve geleceğin aile yapısına dair öngörüleri teorik bir çerçeveye oturtmayı hedeflemektedir.

2. Kavramsal Çerçeve: Küreselleşme, Neoliberalizm Ve Bireyselleşme

Küreselleşme, dışsal bir güç olmanın ötesinde, bireylerin kimlik algılarını, değer yargılarını ve hayattan beklentilerini yeniden şekillendiren "hazmedilmiş bir çerçeve" olarak karşımıza çıkmaktadır. Akademik literatürde "dünyanın küresel bir köye dönüşmesi" veya "dünya bilincinin oluşması" olarak tanımlanan bu olgu, tek boyutlu değildir. Uluslararası kuruluşlardan sivil toplum örgütlerine, ulus devletlerden yerel yönetimlere kadar pek çok aktörün etkileşimiyle şekillenen bu süreç, aileyi doğrudan hedef alan üç temel sacayağı üzerine oturmaktadır.

2.1. İktisadi Dönüşüm ve Piyasa Hegemonyası

Küreselleşmenin en baskın veçhesi ekonomik boyutudur. Dünyanın tek bir pazar haline gelmesi, sermayenin, malların ve iş gücünün sınırlar ötesi akışkanlığı, aile ekonomisini doğrudan küresel dalgalanmalara açık hale getirmiştir. Küresel sermayenin kâr odaklı yapısı, yerel sınırları aşındırmakta ve çalışma koşullarında öngörülemezlik, işsizlik riski ve rekabet baskısı yaratmaktadır. Bu ekonomik belirsizlik ortamı, ailelerin gelecek planlarını, çocuk sahibi olma kararlarını ve ebeveynlik pratiklerini doğrudan etkilemektedir.

2.2. İletişim Devrimi ve Mekânın Sıkışması

1980 sonrası yaşanan iletişim devrimi, David Harvey'in "zaman ve mekân sıkışması" olarak kavramsallaştırdığı durumu doğurmuştur. Coğrafi sınırların anlamsızlaşması, toplumları birbirine bağımlı hale getirirken, ailenin kapalı devre iletişim yapısını da kırmıştır. Artık ebeveynler, evin içindeki tek bilgi kaynağı ve otorite figürü değildir. Aile üyeleri, teknolojik imkanlarla ebeveynlerinden daha hızlı ve çeşitli bilgiye erişebilmektedir. Bu durum,

hiyerarşinin tersine dönmesine, gençlerin teknolojik konularda ebeveynlerine rehberlik ettiği yeni bir dinamik oluşmasına yol açmıştır.

2.3. Kültürel Akışlar ve Neoliberal İdeoloji

Kitle iletişim araçları vasıtasıyla baskın kültürlerin (müzik, moda, yaşam tarzı) dünyanın en ücra köşelerine ulaşması, yerel örf ve adetlerin aşınmasına neden olmaktadır. Ebeveynler, çocuklarına kendi kültürel miraslarını aktarmaya çalışırken, aynı zamanda onları popüler kültürün ve tüketim toplumunun etkilerinden koruma çabası içine girmektedir.

Bu dönüşümün arka planındaki temel ideolojik güç ise neoliberalizmdir. Piyasa ekonomisini ve rekabeti önceleyen, devletin küçülmesini savunan bu ideoloji, bireysel başarıyı ve tüketimi mutluluğun kaynağı olarak sunmaktadır. Neoliberal anlayışta, kolektif değerlere dayalı geleneksel aile yapısı "irrasyonel" bulunarak zayıflatılmakta; bunun yerine rasyonel, özgürlükçü ve kendi çıkarlarını önceleyen "egoist birey" modeli teşvik edilmektedir. Bireylerin kendilerini aile veya cemaat üzerinden değil, şahsi başarıları üzerinden tanımlaması, toplumun atomize olmasına ve aile bağlarının, sadece ego tatmini sağladığı sürece sürdürülen gevşek ilişkilere dönüşmesine yol açmaktadır.

3. Ebeveynlik Stillerinin Evrimi

Küreselleşme süreci, çocuk yetiştirme tutumlarından aile içi hiyerarşiye kadar ebeveynlik stillerinde köklü bir paradigma değişimine neden olmuştur. Bu değişimi anlamak için geleneksel ve modern ebeveynlik tipolojilerini karşılaştırmalı olarak analiz etmek gerekmektedir.

3.1. Geleneksel Ebeveynlik: Otorite ve İtaat

Geleneksel aile yapısı, hiyerarşinin, itaatin ve kolektif kimliğin bireysel kimliğe üstünlüğünün esas olduğu bir modeldir. Bu modelde ebeveynler, toplumsal ve dini değerlerin temsilcisi olan mutlak otorite figürleridir. İletişim, ebeveynden çocuğa doğru tek yönlü bir emir-komuta zinciri şeklinde işler; çocuktan beklenen temel erdem sorgusuz itaattir. Çocuğun bireysel talep ve arzuları, ailenin genel çıkarları yanında ikincil plandadır ve disiplin genellikle ceza yoluyla sağlanır.

Geleneksel modelde cinsiyet rolleri katı çizgilerle ayrılmıştır. Baba, kamusal alanı ve otoriteyi temsil eder; eve ekmek getiren, ailenin dış dünya ile ilişkilerini yöneten, mesafeli ve duygularını belli etmeyen bir figürdür. Anne ise özel alana, yani ev içine aittir; çocuk bakımı ve ev işleri onun "doğal görevi" olarak görülür. Bu yapıda çocuk, ailenin soyunun devamı ve ebeveynlerin yaşlılık sigortası olması bakımından "faydacı" bir değere sahiptir. Bu faydacı bakış açısı nedeniyle, erkek çocuklar genellikle kız çocuklarına göre daha değerli algılanmaktadır.

3.2. Modern Ebeveynlik: Demokrasi ve Bireyselleşme

Kentleşme, eğitim seviyesinin yükselmesi ve modernleşme ile ortaya çıkan modern aile yapısı, demokratik tutumları ve karşılıklı saygıyı merkeze alır. Hiyerarşinin yerini diyaloğun aldığı bu modelde, çocukların aile içi kararlara katılımı teşvik edilir ve çocuğun özerkliği kutsal bir hak olarak kabul edilir. Çocuğa atfedilen değer, ekonomik faydadan (yaşlılıkta bakım) psikolojik tatmine (sevgi, kendini gerçekleştirme) evrilmiştir. Ebeveynlerin temel amacı, çocuğun potansiyelini en üst düzeye çıkarmak, onun mutlu ve bağımsız bir birey olmasını sağlamaktır.

Ancak bu birey merkezli yapı, aile üyeleri arasındaki "biz" bilincini zayıflatma ve potansiyel bir yabancılaşma riskini de beraberinde getirmektedir. Ebeveynlerin ve çocukların kendilerini tamamen özerk bireyler olarak algılaması, güven ve samimiyet bağlarının aşınmasına neden olabilmektedir.

3.3. Babalık Rolündeki Dramatik Dönüşüm

Geleneksel ve modern ebeveynlik arasındaki geçişin en somut göstergesi, babalık rolündeki değişimdir. Sadece ekonomik sağlayıcı olarak görülen mesafeli baba figürü, yerini "yeni nesil babalık" veya "ilgili babalık" kavramlarına bırakmaktadır. Kadınların iş gücüne katılımıyla birlikte babaların ev içi sorumlulukları artmış; çocuk bakımı, oyun oynama ve duygusal destek sağlama gibi alanlarda babalar daha görünür hale gelmiştir. Japonya'dan ABD'ye kadar yapılan araştırmalar, babaların çocuklarıyla daha yakın ilişkiler kurma eğiliminde olduğunu, ancak bu ilginin kültürel kodlara göre farklılaştığını göstermektedir. Babalık artık sadece bir otorite makamı değil, duygusal bir paylaşım alanı olarak yeniden tanımlanmaktadır.

4. Küreselleşmenin Dönüştürücü Vektörleri

Küreselleşme, soyut bir rüzgâr değil, gündelik hayatın pratiklerini değiştiren somut mekanizmalar bütünüdür. Bu mekanizmaları dört ana vektör üzerinden analiz etmek mümkündür:

4.1. Ekonomik Vektör: Kadın Emeğinin Dönüşümü ve Aile İçi Denge

Kadınların iş gücüne kitlesel katılımı, küreselleşmenin yarattığı en büyük sosyo-ekonomik depremlerden biridir. Kırsal alanda ücretsiz aile işçisi olan kadın, kentte maaşlı çalışan statüsüne geçerek ekonomik özgürlüğünü kazanmıştır. "Kocasının eline bakan" konumundan "hane bütçesine katkı sağlayan" konuma geçiş, erkeğin mutlak otoritesini sarsmış ve kadının karar alma mekanizmalarındaki gücünü artırmıştır.

Bu durum, ev içi iş bölümünü zorunlu bir değişime uğratmıştır. Geleneksel olarak anneye ait görülen çocuk bakımı ve ev işleri, teorik olarak paylaşılmaya başlansa da, pratik uygulamalar tam bir eşitliği yansıtmamaktadır. Araştırmalar, babaların ev işlerine katılımının "sorumluluğu paylaşmak"tan ziyade "eşine yardım etmek" düzeyinde kaldığını göstermektedir. Bu durum çalışan kadınlar için "çifte mesai" (işte çalışma + ev işleri) yükü oluşturmaktadır. Özellikle Türkiye gibi ülkelerde 0-5 yaş çocuk bakımının %86 oranında anneler tarafından üstlenilmesi ve kurumsal bakım hizmetlerinin (kreş vb.) yetersizliği (%2,8), kadınları kariyer ile annelik arasında sıkıştırmakta ve güvencesiz işlere itmektedir.

4.2. Teknolojik Vektör: Dijitalleşen Aile ve "Dijital Ebeveynlik"

İletişim teknolojilerindeki devrim, aileyi iki zıt yönde etkilemektedir: Uzaktakileri yakınlaştırırken, yakındakileri uzaklaştırmaktadır. Aynı çatı altındaki bireylerin ellerindeki cihazlarla meşgul olması, fiziksel birlikteliğe rağmen duygusal kopuşlara ve yabancılaşmaya neden olmaktadır.

Daha kritik bir değişim ise bilginin demokratikleşmesiyle yaşanmıştır. Geleneksel ebeveynler, çocuk yetiştirme bilgisini kendi büyüklerinden öğrenirken, modern ebeveynler internet sayesinde sınırsız bir bilgi havuzuna erişmektedir. Bu durum, ebeveynlik üzerindeki tekelin kırılmasına, ancak aynı zamanda çelişkili bilgiler arasında kalan ebeveynlerde yoğun bir "yetersizlik" ve "mükemmeliyetçilik" kaygısının doğmasına yol açmıştır.

Bu süreç, "Dijital Ebeveynlik" adında yeni bir rol doğurmuştur. Ebeveynler artık çocuklarını sadece sokaktaki tehlikelerden değil; siber zorbalık, uygunsuz içerik, veri gizliliği ihlali ve

teknoloji bağımlılığı gibi sanal tehditlerden de korumak zorundadır. Bu, ebeveynlerin teknolojik yetkinlik kazanmasını ve çocuklarının dijital kimliklerini de yönetmesini gerektiren ağır bir sorumluluktur.

4.3. Kültürel Vektör: Tüketim Kültürü ve "Acele Ettirilmiş Çocuk"

Küresel markalar ve pazarlama stratejileri, çocukları "geleceğin müşterisi" değil, "bugünün tüketicisi" olarak hedef almaktadır. "Tüketen çocuk" imgesi, reklamlar ve sosyal medya aracılığıyla sürekli bir arzu bombardımanına tutulmaktadır.

Bu durum çocukluk algısını kökten değiştirmiştir. David Elkind'in "acele ettirilmiş çocuk" kavramıyla ifade ettiği gibi; çocuklar artık doğada özgürce oynamak yerine, yetişkinlere has kariyer, başarı ve performans kaygılarını erkenden yüklenmektedir. Tabletler ve bilgisayar oyunları, sokağın yerini alırken; daha hırslı, maddi değerlere odaklı ve bencil bir çocuk tipi ortaya çıkmaktadır.

4.4. Normatif Vektör: Çocuk Hakları ve Otorite Krizleri

Birleşmiş Milletler Çocuk Haklarına Dair Sözleşme gibi uluslararası normların yaygınlaşması, çocuğun statüsünü "ebeveynin mülkü" olmaktan çıkarıp "hak sahibi birey" konumuna yükseltmiştir. "Çocuğun üstün yararı" ilkesi, ebeveynliği bir "bakım verme" işinden çıkarıp, çocuğun görüşlerine saygı duyma ve gelişimini destekleme yükümlülüğüne dönüştürmüştür.

Ancak bu küresel normlar, yerel kültürlerle çatışabilmektedir. Geleneksel kesimler, çocuk hakları söylemini ebeveyn otoritesini sarsan, hiyerarşiyi bozan ve çocuklara "isyan hakkı" veren bir tehdit olarak algılayabilmektedir. Bu durum, ebeveynleri modern yasalar ile geleneksel disiplin anlayışları arasında bir çatışmanın ortasında bırakmaktadır.

5. Ebeveynlik İkilemleri ve Başa Çıkma Stratejileri

Hızlı değişim, belirsizlik ve geleneksel destek ağlarının çöküşü, ebeveynleri "risk toplumu"nun kucağına itmiştir. Ebeveynler bu karmaşık ortamda hayatta kalabilmek için çeşitli stratejiler geliştirmektedir.

5.1. Risk Toplumunda "Paranoyak Ebeveynlik"

Ulrich Beck'in "risk toplumu" teorisine göre, modern dünyada riskler (terörizm, ekonomik kriz, dijital tehditler) öngörülemez hale gelmiştir. Geniş aile ve komşuluk gibi kolektif kalkanların erimesiyle, ebeveynler bu risklerle tek başına yüzleşmektedir. Geleneksel toplumda "köyün sorumluluğu" olan çocuk yetiştirme, artık tamamen çekirdek ailenin omuzlarındadır.

Bu yalnızlaşma ve artan tehdit algısı, Frank Furedi'nin "Paranoyak Ebeveynlik" dediği durumu yaratmıştır. Ebeveynler, çocuklarını her an başlarına bir şey gelebilecek kırılgan varlıklar olarak görerek aşırı korumacı ve kontrolcü bir tutum sergilemektedir. Çocuğun her adımını planlayan, sokağa yalnız bırakmayan ve başarısızlık yaşamasına izin vermeyen bu tutum; risk alamayan, problem çözme becerisi düşük ve dayanıksız bir nesil (helikopter ebeveynlik kurbanları) yetişmesine neden olmaktadır.

5.2. Bilinçli Bir Strateji Olarak Medya Okuryazarlığı

Ebeveynlerin dijital dünyanın barındırdığı riskler karşısında tercih etmeleri gereken yaklaşım yasaklayıcı olmak değil, bilinçli biçimde yönetici bir rol üstlenmektir. Dijital medya okuryazarlığı bu bağlamda ebeveynliğin temel beceri alanlarından biri haline gelmiştir ve bu beceri dijital içerikleri eleştirel biçimde değerlendirme, doğru ve güvenilir bilgiyi ayırt edebilme ve çevrim içi ortamlarda etik davranışlar sergileyebilme yetkinliklerini kapsar. Bilinçli teknoloji kullanımının sağlanabilmesi için ebeveynlerin çocuklarıyla birlikte net ve yaşa uygun sınırlar koymaları önemlidir ve bu sınırlar çocukların dijital araçlarla geçirdiği sürenin kontrol altına alınmasını hedeflemelidir. Teknolojiyi bütünüyle yasaklamak yerine, çocukları yaratıcı, eğitici ve gelişimlerini destekleyen alternatif içeriklere yönlendirmek ebeveynliğin rehberlik işlevini güçlendirmektedir. Dijital cihazların ev içinde denetimi kolaylaştıracak şekilde ortak alanlarda kullanılması, ebeveynlerin çocuklarını gözetim altında tutabilmelerini ve gerektiğinde müdahalede bulunabilmelerini mümkün kılmaktadır. Aile içi yüz yüze iletişimin korunabilmesi için yemek masası gibi ortak zaman ve mekânlarda teknolojiden arındırılmış alanlar oluşturulması, bağların güçlenmesine katkı sağlamaktadır. Ebeveynlerin kendi teknoloji kullanım alışkanlıklarını gözden geçirerek çocuklarına olumlu bir örnek teşkil etmeleri, sözel uyarıların ötesinde güçlü bir etki oluşturmaktadır. Teknolojinin çocuklar nezdinde aşırı değer kazanmasını engellemek adına dijital araçların ödül ya da ceza unsuru olarak kullanılmasından kaçınılması gerekmektedir. Tüm bu süreçlerde ebeveynlerin pasif bir izleyici konumunda kalmak yerine çocuklarının dijital deneyimlerine rehberlik eden, onlarla iletişim kuran ve gerekli yönlendirmeleri yapan aktif bir rol üstlenmeleri, bilinçli teknoloji kullanımının temelini oluşturmaktadır.

5.3. "Melez Ebeveynlik"

Küresel modernite (bireysellik, rekabet) ile yerel gelenek (bağlılık, itaat) arasındaki çatışma, ebeveynleri "Melez Ebeveynlik" modeline yöneltmektedir. Bu modelde ebeveynler, ne tamamen geleneksel ne de tamamen moderndir; her iki dünyanın "işe yarayan" kısımlarını birleştirme arayışındadır. Özellikle göçmen ailelerde belirgin olan bu strateji, çocuklara hem kültürel köklerini (kimlik) hem de küresel kanatlarını (bireysel yetkinlik) kazandırmayı hedefler. Ancak bu dengeyi tutturmak zordur ve sıklıkla kuşak çatışmalarına yol açabilmektedir. Çiğdem Kağıtçıbaşı'nın "ilişkisel özerklik" modeli, bu sentezin teorik zeminini oluşturur: Hem aileye duygusal olarak bağlı kalmak hem de özerk kararlar alabilmek mümkündür.

5.4. Gelişmişlik Düzeyine Göre Farklılaşan Sorunlar

Küreselleşmenin etkisi homojen değildir. Gelişmiş ülkelerde ebeveynler, "refah toplumu"nun getirdiği aşırı bireyselleşme, performans kaygısı ve psikolojik baskılarla mücadele ederken ; gelişmekte olan ülkelerde ebeveynlik, öncelikle yoksulluk, işsizlik ve temel ihtiyaçların karşılanması (ekonomik sağkalım) mücadelesidir. Gelişmekte olan ülkelerde küresel etkiler, yerel yapısal sorunlarla birleşerek daha travmatik sonuçlar doğurabilmektedir.

6. Gelecek Vizyonu ve Politika Önerileri

6.1. Ebeveynliğin Profesyonelleşmesi ve Yalnızlığı

Geleceğin dünyasında ebeveynlik, doğal bir süreç olmaktan çıkıp, öğrenilmesi gereken bir "profesyonel meslek" haline gelmiştir. Kitaplar, bloglar ve uzmanlardan sürekli "doğru ebeveynlik" tekniklerini öğrenme baskısı, ebeveynlerde tükenmişlik (burnout) yaratmaktadır. Destek ağlarının çökmesiyle yalnızlaşan ebeveynler, stres ve depresyon riski altındadır.

6.2. Ağ Toplumunda Rehber Ebeveynlik

Manuel Castells'in "ağ toplumu" kavramı çerçevesinde, geleceğin ebeveyni otoriter bir diktatör değil, karmaşık ağlar (dijital, sosyal) içinde çocuğuna yol gösteren bir "arabulucu" veya "kolaylaştırıcı" olmak zorundadır. İlişkisel özerklik modeli, çocuklara küresel dünyada uçmaları için kanatlar, savrulmamaları için ise kökler (kültürel kimlik) veren bir yaklaşım olarak öne çıkmaktadır.

6.3. Aileleri Güçlendirmek İçin Sosyal Politikalar

Ebeveynlerin karşı karşıya kaldıkları ağır sorumluluiyet yükünü tek başlarına taşımalarının beklenmesi gerçekçi değildir. Günümüz koşullarında ebeveynlik bireysel bir tercih ya da yalnızca aile içi bir görev olmaktan çıkmış ve kamusal boyutu olan toplumsal bir sorumluluk alanına dönüşmüştür. Bu nedenle devletlerin ve toplumun ebeveynliği kurumsal bir mesele olarak ele alması zorunlu hale gelmiştir. Ebeveynlerin güçlendirilmesi ancak bütüncül ve sürdürülebilir kamu politikalarıyla mümkün olabilir. Kadınların istihdama katılımını destekleyen ve ebeveynlik ile çalışma hayatı arasındaki gerilimi azaltan düzenlemeler bu sürecin temel unsurlarındandır. Erişilebilir ve nitelikli kreş hizmetlerinin yaygınlaştırılması ebeveynler üzerindeki bakım yükünü hafifletecek önemli bir adımdır. Bununla birlikte ebeveynlik izinlerinin süresinin uzatılması ve esnek çalışma modellerinin yasal güvence altına alınması iş yaşamı ile aile yaşamı arasındaki dengeyi güçlendirecektir.

Dijital dönüşümün ebeveynlik üzerindeki artan etkileri dikkate alındığında ebeveynlerin teknolojiye ilişkin bilgi ve farkındalık düzeylerinin artırılması da büyük önem taşımaktadır. Kamu kurumları ile sivil toplum kuruluşlarının iş birliği içinde yürüteceği dijital okuryazarlık programları sayesinde ebeveynler çocuklarını dijital risklerden koruma konusunda daha bilinçli hale gelebilecektir. Bu tür eğitimler, siber zorbalıkla mücadele, güvenli internet kullanımı ve yaşa uygun içerik farkındalığı gibi alanlarda ebeveynlerin rehberlik kapasitesini artıracaktır.

Ebeveynlik sürecinin giderek artan psikolojik yükü dikkate alındığında ruh sağlığı hizmetlerinin erişilebilirliği de temel bir gereklilik olarak ortaya çıkmaktadır. Ebeveyn tükenmişliğinin önlenmesi ve ebeveynlerin duygusal dayanıklılığının güçlendirilmesi için aile danışmanlık merkezlerinin yaygınlaştırılması ve psikolojik destek gruplarının kolay ulaşılabilir hale getirilmesi gerekmektedir. Böylece ebeveynler yalnız olmadıklarını hissedecek ve yaşadıkları zorluklarla daha sağlıklı biçimde başa çıkabileceklerdir.

Dijital dünyada çocukların karşı karşıya kaldığı riskler göz önünde bulundurulduğunda yasal düzenlemelerin güçlendirilmesi de kaçınılmazdır. Teknoloji şirketlerinin çocuk güvenliği konusundaki sorumluluklarının açık biçimde tanımlanması ve bu sorumlulukların etkin denetim mekanizmalarıyla desteklenmesi gerekmektedir. Çocuklara ait kişisel verilerin korunmasına yönelik yasal çerçevenin sıkılaştırılması hem ailelerin hem de çocukların dijital ortamda daha güvenli bir biçimde var olmalarını sağlayacaktır.

7. Sonuç

Küreselleşme, ebeveynlik rollerini geri dönülemez bir şekilde değiştirmiştir. İçgüdüsel ve topluluk destekli geleneksel model, yerini bilgi yoğun, bireyselleşmiş ve profesyonel bir ebeveynlik projesine bırakmıştır. İnternet çağı, ebeveynlere muazzam bir bilgi kaynağı sunarken, aynı zamanda "mükemmel ebeveynlik" miti yaratarak yetersizlik hissini ve kaygıyı körüklemiştir. Bireyselleşme ve kentleşme, geniş aileyi zayıflatarak ebeveynleri yalnızlaştırmış, bu da "paranoyak ebeveynlik" gibi aşırı korumacı refleksleri tetiklemiştir.

Ekonomik entegrasyon, kadınların konumunu güçlendirip babaları ev içine çekerken, tüketim kültürü ebeveynlik başarısını maddi göstergelere indirgemiştir. Ebeveynler bu kaos içinde, "melez ebeveynlik" gibi sentezlerle hem çocuklarını küresel rekabete hazırlamakta hem de kültürel kimliklerini korumaya çalışmaktadır.

Sonuç olarak, değişen dünyada ebeveynleri suçlamak veya onlardan insanüstü bir performans beklemek yerine; devletin, özel sektörün ve sivil toplumun iş birliğiyle aileyi destekleyen yapısal çözümler üretilmesi gerekmektedir. Ebeveynlerin güçlendirilmesi, sadece bugünün ailelerinin değil, toplumun geleceğinin de teminatıdır.

Özet
Bu çalışma, Osmanlı düşünce dünyasının önemli simalarından biri olan İdris-i Bitlisî'nin *Mirʾâtü'l-Cemâl* adlı eserinde insan-ı kâmil anlayışını tasavvufî ve kavramsal bir çerçevede incelemeyi amaçlamaktadır. Tasavvuf geleneğinde insan-ı kâmil, ilâhî isim ve sıfatların en yetkin biçimde tecelli ettiği varlık olarak kabul edilmiş; insanın ontolojik değeri, ahlâkî sorumluluğu ve mânevî kemâli bu kavram etrafında temellendirilmiştir. Bitlisî, *Mirʾâtü'l-Cemâl*'de insanı yalnızca yaratılışın nihai gayesi olarak değil, aynı zamanda ilâhî hakikatin aynası olarak konumlandırmakta; insan-ı kâmil kavramını kozmik düzen, tecellî nazariyesi ve aşk metafiziğiyle birlikte ele almaktadır. Çalışmada öncelikle insan-ı kâmil kavramının tasavvuf literatüründeki temel anlam çerçevesi ortaya konulmakta, ardından Bitlisî'nin bu kavrama yüklediği özgün anlamlar metin merkezli bir yaklaşımla analiz edilmektedir. *Mirʾâtü'l-Cemâl*'de insan-ı kâmil, seyr u sülûk sürecinde inşa edilen dinamik bir varlık tasavvuru olarak ele alınmakta; kalp, aşk, tecellî ve fenâ gibi temel tasavvufî kavramlarla irtibatlandırılmaktadır. Bu bağlamda çalışma, *Mirʾâtü'l-Cemâl*'de insan-ı kâmil anlayışının klasik tasavvuf düşüncesi içindeki yerini belirlemeyi ve Bitlisî'nin tasavvufî düşüncesine katkılarını ortaya koymayı hedeflemektedir.

Abstract
This study aims to examine the concept of the perfect human (*insān-i kāmil*) in Idris-i Bitlisi's *Mirʾāt al-Jamāl* within a Sufi and conceptual framework. In the Sufi tradition, the perfect human is regarded as the being in whom divine names and attributes are manifested most completely, and the ontological value, moral responsibility, and spiritual perfection of the human are grounded in this concept. In *Mirʾāt al-Jamāl*, Bitlisi positions the human not merely as the ultimate purpose of creation but also as a mirror reflecting divine truth, addressing the concept of the perfect human together with cosmic order, the theory of divine manifestation (*tajallī*), and the metaphysics of love. The study first outlines the basic conceptual framework of the perfect human in Sufi literature and then analyzes Bitlisi's original contributions through a text-centered approach. In this context, the study aims to determine the place of the perfect human concept in *Mirʾāt al-Jamāl* within classical Sufi thought and to reveal Bitlisi's contributions to Sufi intellectual history.

ÖZET

Bu çalışma, çağdaş İslam âlimlerinden Muhammed Emin Er'in fetva metodolojisini incelemeyi amaçlamaktadır. Araştırma, nitel yöntemle yürütülmüş olup Muhammed Emin Er'in seçilmiş fetvaları ve ilgili eserleri doküman analizi yöntemiyle ele alınmıştır. İncelenen fetvalar ve fetva metodolojisi belirli bir konuyla sınırlandırılmamıştır. Çalışmada, Emin Er'in fetva anlayışının dayandığı temel ilkeler, delil kullanma yöntemi ve klasik fıkıh mirasıyla kurduğu ilişki sistematik biçimde incelenmiştir.

Özellikle fetvalarında Kur'an ve Sünnet 'in belirleyici konumu, mezhep içi tutarlılığa verdiği önem ve Hanefî fıkhı çerçevesinde geliştirdiği yorum yaklaşımı üzerinde durulmuştur. Emin Er'in, klasik mezhep birikimini mutlak bir taklit anlayışıyla değil, usul ilkelerine bağlı kalarak değerlendirdiği ve bu birikimi güncel meselelerin çözümünde etkin biçimde kullandığı tespit edilmiştir. Bunun yanı sıra, modern dönemde ortaya çıkan yeni problemlere yönelik fetvalarında nassların lafzı kadar ruhunu da dikkate aldığı, maslahat ilkesini ve toplumun örf ve geleneklerini göz önünde bulunduran bütüncül bir yaklaşım benimsediği görülmektedir.

Çalışmada ayrıca, Muhammed Emin Er'in fetvalarında sıkça vurguladığı kolaylaştırma ilkesi ile bireysel ve toplumsal sorumluluk bilinci arasında kurduğu denge, örnek fetvalar üzerinden analiz edilmiştir. Bu bağlamda onun fetva anlayışının yalnızca hukuki değil, aynı zamanda ahlaki bir boyut taşıdığı ortaya konulmuştur. Sonuç olarak bu araştırma, Muhammed Emin Er'in fetva metodolojisinin klasik fıkıh mirası ile modern dönemin ihtiyaçları arasında denge kuran özgün bir yaklaşım sunduğunu ve bu yönüyle çağdaş fetva metodolojisi literatürüne önemli bir katkı sağladığını göstermektedir.

Anahtar Kelimeler: Muhammed Emin Er, Fetva, Fıkıh usulü, Metodoloji.

ABSTRACT

This study aims to examine the fatwa methodology of contemporary Islamic scholar Muhammed Emin Er. The research was conducted using qualitative methods, and selected fatwas and related works by Muhammed Emin Er were analyzed using document analysis. The fatwas and fatwa methodology examined were not limited to a specific topic. The study

systematically examined the fundamental principles underlying Emin Er's understanding of fatwa, his method of using evidence, and his relationship with the classical fiqh heritage.

Particular emphasis is placed on the decisive role of the Qur'an and Sunnah in Emin Er's fatwas, his commitment to intra-sectarian consistency, and his interpretative approach developed within the framework of Hanafi jurisprudence. The study demonstrates that Emin Er does not approach the classical Hanafi heritage through rigid imitation; rather, he engages with it by adhering to usul al-fiqh principles and employing it as a dynamic resource in addressing contemporary legal issues.

In addition, the research reveals that in responding to modern and emerging problems, Emin Er adopts a holistic fatwa approach that takes into account not only the textual sources but also their underlying spirit, the principle of maslahat (public interest), and the customs and traditions of society. The study also examines selected fatwas to illustrate how Emin Er balances the principle of facilitation (taysir) with a strong sense of individual and social responsibility. In this context, his fatwa methodology is shown to encompass not only legal reasoning but also a pronounced moral dimension.

Consequently, this study argues that Muhammed Emin Er's fatwa methodology offers an original and balanced approach that successfully integrates the classical fiqh tradition with the needs and challenges of the modern era. In doing so, it makes a significant contribution to the contemporary literature on fatwa methodology.

Keywords: Muhammed Emin Er, Fatwa, Principles of Islamic Jurisprudence, Methodology.

1. GİRİŞ

Fetva, İslam hukukunda bireylerin ve toplumların karşılaştıkları dini ya da hukuki konulara yönelik yol gösterici bir işlev icra eden temel bir müessesedir. Tarihsel süreç içerisinde fetva, yalnızca nasların aktarımıyla sınırlı kalmamış; zaman, mekân, örf ve toplumun ihtiyaçları dikkate alınarak gelişen dinamik bir yorum alanı halinde değerlendirilmiştir[1].

Modern çağda karşılaşılan sosyal, ekonomik veya bilimsel gelişmeler, fetva faaliyetinin daha sistematik, tutarlı ve metodolojik bir zeminde yürütülmesini zorunlu hale getirmektedir. Özellikle de biyoteknoloji, tıp, ekonomi ve toplumsal yapıdaki hızlı dönüşümler, klasik fıkıh literatürünün yeniden okunmasını ve çağdaş meselelerle ilişkilendirilmesini gerekli hale getirmiştir. Dolayısıyla da bu durum, günümüz alimlerinin fetva verme süreçlerinde benimsemiş olduğu yöntemlerin açıklanmasını ve incelenmesini önemli bir araştırma haline getirmiştir.

[1] Fatih Yücel, "Fetvanın Değişim Gerekçelerine Güncel Bir Bakış -Din İşleri Yüksek Kurulu Karar ve Fetvaları Örnekliği-" Diyanet İlmî Dergi 58 (2022): 1125.

Çağdaş din literatüründe oldukça önemli yere sahip olan fetvaların, kabul edilebilirlik, güncel sorunlara cevap verebilirlik, İslam hukukuna bağlılık gibi pek çok faktörle uyum içerisinde olması beklenmektedir. Aksi takdirde ilim ve toplumsal açıdan yaşanabilecek tutarsızlıkların fetvayı kabul edilebilirlikten çıkarabileceği ifade edilmiştir[2].

İslam hukukundan ayrışmadan güncel yaşam sorunlarına çözüm üretilmesi noktasında fetvaların son derece belirleyici ve yönlendirici bir rolü bulunmaktadır. Buna istinaden geçmişten günümüze kadar verilen fetvaların metodolojisi, toplum ve ilmi bakımdan kabul görme gereksinimi duymaktadır[3].

Bu noktada ise, çağdaş İslam âlimlerinden olan Muhammed Emin Er ve onun fetvalarının hem ilmi hem de toplumsal bakımdan kabul gördüğü ifade edilebilmektedir. Onun fetvalarında benimsemiş olduğu metodolojinin İslam ilminden ayrılmadan çağdaş şartlara uyum sağlaması ve karakteristik özellikleri bu noktada son derece belirleyici sayılmaktadır.

Bu çalışma, çağdaş İslam âlimlerinden Muhammed Emin Er'in fetva metodolojisini ele almayı amaçlamaktadır. Çalışma içerisinde Muhammed Emin Er'in fetvalarında dayandığı referanslar, benimsediği usul ilkeleri ve güncel konulara yaklaşım tarzı incelenecektir. Buna ek olarak, onun fetva anlayışının klasik fıkıh geleneği ve çağdaş meseleler arasında nasıl bir denge meydana getirdiği ortaya konulacaktır.

Fetva kavramı ve İslam Hukukundaki Yeri

Fetva, İslam hukukunda karşılaşılan dini, ahlaki ve hukuki konular hakkında, yetkin bir âlim /müctehid tarafından Kur'an, sünnet ve fıkhın temel kaynakları esas alınarak verilen açıklayıcı ve yol gösterici hükmü ifade etmektedir. Arapça 'da "feta" kökünden türetilmiş fetva kelimesi, "açıklamak, güçlükleri gidermek ve bir meseleye çözüm getirmek" anlamlarını taşımaktadır. Bu açıdan fetva, bireyin ya da toplumun yaşadığı sorunlar karşısında dini hükmün anlaşılmasını ve uygulanmasını kolaylaştırma (taysir) yönünde önem taşımaktadır[4].

Kolaylaştırma kavramı İslami açıdan taysir (اَلتَّيْسِيرُ) şeklinde ifade edilmektedir. Dinde aşırı zorluktan kaçınmak ve insanların güç yetirebileceği şekilde hüküm vermek şeklinde tanımlanmıştır. Muhammed Emin Er'in fetvalarında da esas aldığı ilkelerden birisi, zorlaştırmak değil kolaylaştırmaktır.

İslam hukukunda fetva, bağlayıcı bir yargı kararı niteliği taşımamaktadır. Kesin bir hükümden ziyade rehberlik eden bir niteliğe sahiptir. Fetva veren kişinin, sahip olduğu ilmi birikim ve usul bilgisi doğrultusunda, kendisine sorulan konuya dair en doğru cevabı vermeye çalışmaktadır. Dolayısıyla objektif bir yargı mekanizması söz konusu değildir[5].

Tarihsel süreçte fetva kavramı, İslam hukukunun dinamik bir yapıya sahip olduğunu ve değişen yaşam şartlarına uyum sağlama niteliğini gösteren bir mekanizma şeklinde anlaşılmıştır.

[2] Mustafa Öztürk, "Çağdaşlık ve Çağdaş Dönem Kur'an Yorumlarına Genel Bir Bakış", *İslamiyat* 7/4 2004, s. 72.
[3] Ali Bardakoğlu, "Fıkıh Çözüm mü Üretir, Sorun mu?". *Eskiyeni* 2014.
[4] Ömer Şerif Bilgin, Kur'an'da Yer Alan Hukuksal Amaçlar, Yüksek Lisans Tezi, Uludağ Üniversitesi, Sosyal Bilimler Enstitüsü, Temel İslam Bilimleri Anabilim Dalı, Bursa, 2007.
[5] Meryem Cihangir, İslam Hukukunda Adil Yargılama Esasları. Ankara: İKSAD Publishing House, 2024.

Toplumsal, kültürel veya ekonomik şartlardaki değişimlere paralel olarak; örf, maslahat, zaruret ve zaman faktörü gibi değişkenler de fetva süreçlerinde göz ardı edilmemiştir[6].

Maslahat (مصلحة) kavramı, İslam hukukunda; insanlara fayda sağlamak, zararı önlemek şeklinde tanımlanabilmektedir. Sözlük anlamı ise; "insanların din, can, akıl, nesil ve mal gibi temel değerlerini koruma altına alan ve onlar açısından sayfa sağlayan şeyler" şeklinde ifade edilmiştir.

Muhammed Emin Er, maslahat kavramını kabul etmekte beraber, ancak maslahat temelli fetvalara da temkinli yaklaşmaktadır. Bu durum ise bazı din araştırmacıları tarafından eleştirilmektedir. Eleştirilerin temelinde, çağdaş fıkıh düşünürlerinin maslahat kavramına merkezi bir araç olarak bakarken, Er'in sınırlandırıcı kayıtlar kapsamında ele alması durumu yatmaktadır[7].

Fetva, İslam hukuku açısından bireylerin dini sorumluluklarını yerine getirmesine yardımcı olmasının yanı sıra aynı zamanda hukuki düşüncenin gelişimine katkı sağlamıştır. Klasik fıkıh literatüründe yer alan fetva mecmuaları, farklı dönemlerde ortaya çıkan konuların ne şekilde ele alındığını göstermek açısından önemli referanslar arasında değerlendirilmektedir. Günümüzde dahi, modern çağın getirmiş olduğu yeni problemlere yönelik çözümlerin üretilmesi aşamasında İslam hukukunun güncelliğini koruması bakımından temel araç niteliği taşımaktadır[8].

İslam hukukuna uygun yaşama amacıyla başvurulan kaynaklardan birisi olan fetva, doğru metodoloji ve ilim kaynaklarıyla kabul edilebilir hale gelmektedir. İslam hukukuyla bağdaşmayan veya çağdaş sorunlara yanıt vermeyen bakış açılarının fetva niteliği bakımından zayıf kaldığı ifade edilebilmektedir. Bu nedenle fetvaların yalnızca tek bir perspektiften değil bütüncül ve çoklu bir perspektiften ele alınması beklenmektedir.

2. MUHAMMED EMİN ER'İN İLMİ VE FİKRİ ARKA PLANI

Muhammed Emin Er, çağdaş İslam düşüncesi ve fıkıh geleneği içerisinde, özellikle de fetva ve dini rehberlik alanındaki çalışmalarıyla tanınan bir âlimdir. Onun ilmi ve fikri arka planı, klasik İslam ilimleriyle modern dönemin sorunlarını birlikte değerlendiren bütüncül bir perspektif üzerine kurulmuştur[9]. Bu açıdan Muhammed Emin Er, geleneksel ilim mirasına bağlı kalarak çağdaş meseleleri ele alan bir ilim anlayışının temsilcisi olarak tanınmaktadır.

[6] Nuri Kahveci, "Sosyal Değişim Dinamiğinin İslam Hukukuna Etkisi (Peygamber ve Sahabe Dönemi)", Kahramanmaraş Sütçü İmam Üniversitesi İlahiyat Fakültesi Dergisi, 2005, s.45.
[7] Said Nuri Akgündüz, "Yirminci Yüzyılda İki Farklı Maslahat Yaklaşımı: Mustafa eş-Şelebî ve Ramazan el-Bûtî'nin Maslahat Anlayışlarının Karşılaştırılması", *Dergiabant* 1/1 (Haziran 2013), s. 43.
[8] Hüseyin İçen, Çağdaş Dönemde Fetva Faaliyeti: İslam Hukuku ve Toplum Bağlamında Dini Kurumlardan Örnekler, İslam Tetkikleri Dergisi, 2023, s.480.
[9] Mehmet C. Varol, Hasan Kâmil Yılmaz. Muhammed Emin Er'in Hayatı ve Tasavvufi Eserleri, Tasavvuf İlmi ve Akademik Araştırma Dergisi, 2021, s.73.

Özellikle de Hanefi fıkıh geleneği başta olmak üzere, diğer mezheplerin görüşlerini de karşılaştırmalı şekilde ele almış olması, metodolojik esnekliğini ve kapsayıcı yaklaşımını ortaya koymaktadır[10].

Muhammed Emin Er'in yaşadığı dönem, Osmanlı yönetiminden Cumhuriyet sistemine geçiş sürecinde gerçekleşen inkılapların yapıldığı bir dönemdir. Doğal olarak toplumsal açıdan bu dönemde köklü sosyal değişimlerin yaşandığı bilinmektedir[11]. Dönemde dini eğitim veren kurumlar olarak medreselerin bulunduğu ve ıslahatlar kapsamında onların da çağa ayak uydurması yönünde değişim gösterdiği ifade edilmiştir[12].

İlmi formasyonunun, Kur'an ilimleri, hadis, fıkıh gibi temel disiplinler üzerinde yoğunlaştığı ifade edilmektedir. Klasik fıkıh metinleri ve mezhep literatürüne yetkin bir şekilde hâkim olması, onun fetvalarının sağlam bir zemin üzerine inşa edilmesini sağlamıştır[13]. İlim ve fikir olarak kendisini oldukça verimli şekilde yetiştiren Er, İslam hukukunun temellerini doğru kaynaklardan edinerek, bunların yorumlanması aşamasında da kapsayıcı bir bakış açısı geliştirmiştir. Bu sayede "fetva" kavramında var olması gereken "çözüm üretebilme, cevap verebilme" niteliklerinin sağlanması mümkün olmuştur.

Muhammed Emin Er hem katı gelenekçilikten hem de ölçüsü olmayan yenilikçilik akımından uzak bir çizgide dengeyi yakalamayı başararak, bu anlayışı fetvalarına yansıtabilmiştir. Bu dengeyi sağlama yetkinliği nedeniyle sayılı çağdaş İslam alimlerinden sayılmaktadır. İslam hukukuna katı bir gelenekle bağlı kalmanın güncel yaşam koşullarında karşılaşılan problemlere çözüm getiremeyebileceğinin farkına varmıştır[14].

Muhammed Emin Er'in fikri dünyasında dikkat çeken ve öne çıkan unsurlardan birisi; nas merkezli düşünce ve maslahat eksenli değerlendirmeyi bir arada ele almasıdır. Dini hükümlerin belirlenmesinde Kur'an ve Sünneti temel kaynak noktası şeklinde kabul etmiş, aynı zamanda nasların güncel şartlardan bağımsız olarak değerlendirilmemesi gerektiğini ifade etmiştir[15].

Er'in fikirsel arka planında aşırıya kaçmama ve orta yolu bulma anlayışını benimsemek de yer edinmiştir. Fetva faaliyetlerinde kolaylaştırma, toplumsal yarar ve bireyin dini sorumluluğunu doğru biçimde yerine getirmesi gibi ilkeleri benimsemesi onun karakteristik özellikleri arasında bulunmaktadır. Fetvaların topluma aktarılmasında benimsenen metodolojinin son derece etki sahibi olduğu açıktır. Fetvaların ne şekilde veya nasıl bir metotla ifade edildiği, toplum tarafından anlaşılması bakımından kritik bir öneme sahiptir[16].

Genel olarak Emin Er'in ilmi ve fikri arka planı, klasik fıkıh mirası ve çağdaş problemlerin kesiştiği noktada bütüncül bir şekilde gelişim göstermiştir. Bu sayede Er'in fetva

[14] Tanju Toka, "İslam Hukuk Sisteminde Şerîat, Kanun ve Yasa (Casag) Kavramlarının Etkileşim ve Dönüşümü", *Gaziantep Üniversitesi Sosyal Bilimler Dergisi* 24/2 (2025), 544.
[15] Yusuf Şen, Son Osmanlı Alimi Muhammed Emin Er ve Fıkıh Anlayışı, *Bayburt Üniversitesi İlahiyat Fakültesi Dergisi,* 2021, s.135.
[16] Mehmet Çalgan, İslamda Toplumsal Sorumluluk Şuuru ve Günümüzde Toplum İçin Önemi, *Pamukkale Üniversitesi İlahiyat Fakültesi Dergisi*, 2015, s.28.

metodolojisine sağlam ve güncel bir bakış açısı kazandırmıştır. Bahsi geçen arka plan, Er tarafından verilen fetvaların ilmi ve toplumsal açıdan kabul görmesini sağlamıştır[17].

Muhammed Emin Er'in daha öncesinde vermiş olduğu ve boşanmış kadınlar hakkında dile getirdiği fetvalardan birisi;

"Boşanmış hür kadın, içinde bulunduğu evden çıkmaz. Zira Allah-ü Teala'nın 'Onları evlerinden çıkarmayın' ayeti gereğince bunu yapmaları haramdır. Eğer iddeti sona ermeden evden çıkmaya kalkışırsa eve geri dönmeye zorlanır.[18]" Şeklindedir.

Vermiş olduğu bu fetva, dönem şartları neticesinde tartışmalı olarak değerlendirilmiştir. Boşanmış bir kadının evden çıkması yönünde belirtmiş olduğu fetvanın, çağın şartlarına uyum sağlamadığı yönünde eleştiriler yöneltilmiştir.

Muhammed Emin Er'in fetvalarına yöneltilen diğer eleştirilerden birisi de ihtiyat ilkesini fetva üretiminde aşırı belirleyici kılmasıdır. Eleştirilere göre Er, şüpheli konularda ruhsat[19] yerine azimet[20] yönlü fetvaları tercih etmiştir. Dolayısıyla da fetvalar günlük yaşam pratiklerine mesafeli bir durumda kalabilmektedir.

3.MUHAMMED EMİN ER'İN FETVADA DAYANDIĞI KAYNAKLAR

Muhammed Emin Er'in fetvalarında esas aldığı kaynaklara olan hakimiyetinin son derece etkin olduğu bilinmektedir. Medreselerde eğitim aldığı süreçlerde okumuş olduğu ilimler ise; Tecvid, Tefsir, Fıkıh, Feraiz, Sarf, Nahv, İstiare, Münazara, Beyan, Kur'an-ı Kerim, Kelam şeklinde özetlenebilmektedir[21].

Emin Er'in eserlerinde de yer aldığı üzere en önemli meselelerin başında; iman sahiplerinin, ömürlerini dini ilimler gibi faydalı işlere harcaması gerektiği fetvası gelmektedir. Er, bu ifadesini *"Allah sizden iman edenleri yüceltir ve ilim verilenlere dereceler lütfeder[22]."* Ayetiyle açıklamıştır[23].

Muhammed Emin Er'in fetva metodolojisi klasik İslam hukukuna dayanan ve çağdaş problemlere cevap üretmeyi hedefleyen dengeli, bütüncül bir perspektife dayanmaktadır. Onun fetva anlayışı, Kur'an ve Sünneti temel referans noktası olarak kabul ederek, kaynakların yorumlanması aşamasında usul-i fıkıh ilkelerini, mezhep birikimini ve toplumsal şartları birlikte değerlendirmektedir[24].

[23] Er, *Din Güzel Ahlaktır*, s.11.
[24] Recep Aslan, "Muhammed Emin Er el-Mîrânî'nin (ö. 2013) *Fehmü'l-Fıkh fî Usûli'l-Fıkh* Risâlesi Çerçevesinde Hadis Usulü ile İlgili Konulara Yaklaşımı", *Şırnak Üniversitesi İlahiyat Fakültesi Dergisi* 9/21, 2018.

Muhammed Emin Er'in fetvalarında "naslara bağlılık" dikkat çekmektedir. Kur'an ayetleri ve sahih hadisler, hükümlerin belirlenmesinde asıl deliller olarak ele alınmaktadır. Bu açıdan onun yaklaşımı, klasik fıkıh geleneğinde benimsenen metodolojik çizgi ile uyum içerisindedir[25].

Fetvalarında daima kaynağın Allah'a ulaşıldığı takdirde kabul görülebilir olduğunu belirtmektedir. Katı ve ulaşılamaz fetvalar yerine iman edenleri iyiye yönlendirmeyi hedeflemiştir. Örneğin bir fetvasında

"*Seni Allah'a kavuşturacak olan amel-i salihlere daima sarıl. Gelip geçici fani şeylere meyletme. Allah'a ibâdet hususunda kimsenin dilinden ve kınamasından çekinme*[26]." İfadesini kullanmıştır.

Er'in fetvalarında esas alınan kaynaklar yalnızca aktarımlarla sınırlı değildir. Aynı zamanda onun metodolojisine yansıttığı bazı ilkeler de fetvalarını şekillendirmiştir. Er'in fetva anlayışının ayırt edici yönlerinden maslahat ve kolaylaştırma ilkeleri oldukça dikkat çekmektedir. Fetvalarında birey ya da toplumun karşılaşmış olduğu zorlukları dikkate alarak dinin temel ilkelerine aykırı olmama kaydıyla kolaylaştırıcı hükümleri aktarmaya önem vermektedir[27].

Müslümanlardan ona yöneltilen; "dinimizi yaşarken dikkat edilecek hususlar nedir?" sorusuna;

"Öncelikle sahih bir itikada sahip olunmalı. Sonra farzları yapınız, günahlardan sakınınız[28]*."* Şeklinde bir fetvayla cevap vermiştir.

Muhammed Emin Er, fetvalarında zaman, mekân ve gelenek faktörlerini dikkate alan bir yaklaşım benimsemektedir. Ona göre fetvalar, değişmeyen naslar ve değişen naslar çevresinde şekillenmeli ve aradaki dengeyi kurabilme yeteneğine sahip olmalıdır. Bu anlayış ise güncel fetva literatüründe ifade edilen "fetvanın değişebilirliği" ilkesinin pratikteki yansıması şeklinde açıklanabilmektedir[29].

Muhammed Emin Er, fetvanın değişebilirliğini kabul ederken, bunun kesin sınırlarla çevrili olduğunu da vurgulamaktadır. Bu sınırlar ise "şer'i sabitler" olarak ifade edilebilmektedir. Örneğin açık ve kesin nasslara dayanan hükümler değişmemektedir. Diğer bir deyişle, fetvanın değişebilirliği ifadesi, hükümlerin değişmesi anlamına gelmemektedir. Haram-helal sınırları gibi konuların da değişmeyeceği belirtilmiştir[30].

Sonuç olarak Muhammed Emin Er'in fetva metodolojisinde; kaynağını Kur'an-ı Kerim, sünnetler, sahih hadeslerden alan, aynı zamanda mezhep geleneğinden bağını koparmadan

çağdaş meselelere yönelik çözümler üreten bir anlayıştan söz edilebilmektedir. Çağdaş meselelere getirilen çözümlerin, kolaylaştırma, maslahat, toplumsal durum ilkelerini önceliğini görülmektedir[31].

3. SONUÇ VE DEĞERLENDİRME

İslam hukukunda yer alan ilkelerin yaşamda karşılaşılan sorunlara çözüm üretme noktasında işlevsellik kazandırılmasında fetvalar önemli bir konuma sahiptir. Müslümanların yaşam pratiklerinde karşılaştığı sorunların çözümlenmesinde İslam hukukuna göre çözüm arayışına girmesiyle fetvalara başvurduğu bilinmektedir.

Fetvaların metodolojisinde pek çok unsur belirleyici role sahipken, referans alınan kaynakların da fetvaların geçerliliğini belirlediği görülmektedir. Kur'an-ı Kerim'e, sahih hadislere, sünnetlere aykırı düşen fetvaların ilmi açıdan geçersiz sayıldığı ifade edilmiştir. Bu açıdan fetvalar ve âlimlerce benimsenmiş fetva metodolojilerinin oldukça önemli bir yeri bulunmaktadır.

Muhammed Emin Er, fetva metodolojisi ve fıkıh ilmini benimseme yönüyle öne çıkan çağdaş İslam âlimlerindendir. Dolayısıyla onun fetvalarında benimsemiş olduğu metodolojinin kendi birikimi ve ilkelerinden şekillendiği ifade edilebilmektedir. Genel açıdan onun fetvalarının, toplumsal ve ilim perspektifinden kabul gördüğü söylenebilmektedir. Katı olmayan ve çağa uyum sağlayan fetvalarının, İslam hukukundan ayrışmadan günümüze uyarlanabilmiş olması bütüncül bakış açısıyla mümkün hale gelmiştir.

Er'in fetvalarında dikkat çeken unsurların; maslahat, kolaylaştırma (taysir) ve İslam hukukuna bağlılık olduğu görülmektedir. Bu unsurların fetva metodolojisinin belirlenmesinde büyük bir etkisi bulunmaktadır. Dolayısıyla çağdaş meselelere çözüm arama aşamasında başvurulan fetva sahiplerinden birisi de Muhammed Emin Er olarak kabul görmektedir.

Bu çalışma, Muhammed Emin Er'in fetva metodolojisini klasik İslam hukuku çerçevesinde ve çağdaş konular bağlamında incelemeyi hedeflemiştir. Yapılan literatür taramasında, Er'in fetva anlayışının hem geleneksel fıkıh kaynaklarına bağlılık gösterdiğini hem de toplumsal ve çağdaş gerçeklikleri göz önünde bulundurarak dinamik bir yaklaşım benimsediğini ortaya koymuştur. Kur'an ve Sünneti temel kaynak olarak kabul eden Er, mezhep literatürünü karşılaştırmalı şekilde değerlendirerek fetvalarında esneklik ve bütüncül bir anlayış sağlamıştır.

Sonuç olarak Muhammed Emin Er'in fetva metodolojisi, klasik fıkıh geleneği ile modern çağdaki sorunlara yanıt verme kapasitesini buluşturan dengeli ve sistematik bir yaklaşım sunmaktadır. Söz konusu metodolojinin hem ilmi açıdan güvenilir hem de toplumsal bakımdan uygulanabilir bir fetva pratiğinin gelişmesine büyük bir katkıda bulunduğu söylenebilmektedir. Elde edilen verilerin İslam hukuku literatürüne katkıda bulunması hedeflenmiştir ve

GAZALİ'NİN MUCİZE KAVRAMI İLE CARL SCHMITT'İN İSTİSNA HALİNİN KARŞILAŞTIRILMASI

Arş. Gör, Merve YÜKSEL
Ondokuz Mayıs Üniversitesi,
merveyuksel@omu.edu.tr - 0009-0000-6510-7894

ÖZET

Gerek doğa yasalarının gerekse Tanrı'nın adetinin askıya alınması şeklinde olsun, mucize, felsefi tartışmalarda önemli bir yere sahip olmuş ve filozoflar tarafından tartışmaya değer bir tema olarak görülmüştür. Bu filozoflardan biri olan Gazali'nin (1058-1111) öğretisinde zorunlu bir neden-sonuç ilişkisi içinde gerçekleşiyormuş gibi görünen tüm olaylar aslında Tanrı'nın adeti gereği gerçekleşmektedir. Mucizenin gerçekleşmesi, Tanrı'nın, peygamberin nübüvvetini göstermek üzere adetini kesmesi ile mümkündür. Nitekim Tanrı'nın doğa yasalarını askıya alıp dilediği an dilediği şeyi yapması yahut yapmaması için hiçbir engel yoktur. Gazali böylece hem Tanrı'nın kudretini ve fiziksel aleme dilediği zaman müdahale etme özgürlüğünü korumakta hem de mucizeye alan açmaktadır. Gazali'den yaklaşık sekiz yüzyıl sonra mucizeyi istisna hali ile belirleyen Carl Schmitt'in (1888-1985) siyasi teorisinde egemenin tanımı, kriz anında vermiş olduğu karar ile şekillenmektedir. Schmitt'in böylesi bir kararla betimlediği egemen, Gazali'nin her şeye gücü yeten ve sınırsız müdahale hakkı olan Tanrı'sını hatırlatır bir biçimde, istisna haline karar verme yetisine sahip bir güç olarak karşımıza çıkmaktadır. Nitekim bu türden bir benzerlik, Schmitt'in siyasi teolojisinde de kaynağını bulmaktadır. Buna göre modern hukuka ait tüm kavramlar aslında teolojinin üstü örtülü kavramlarıdır ve böyle bir belirlenimde istisna hali, mucize halinin ta kendisidir. Mucize yahut istisna densin, her iki düşünür için de aynı içeriğe sahip kavramlar olarak karşımıza çıkmakta; her ikisi için de mucize, -Tanrı yahut egemen tarafından- bir "askıya alma" haline karşılık gelmektedir. İşte bu çalışmanın amacı, İslam düşünce dünyasında mucize kavramını güçlü bir tartışma konusu haline getirmiş olan Gazali'nin teistik bir bağlama oturan Tanrı-mucize anlayışı ile Batı düşünce dünyasında siyasal teoloji yaklaşımının güçlü temsilcilerinden biri olan Carl Schmitt'in daha seküler bir bağlama oturan egemen-istisna anlayışını ortaya koymak ve mucize kavramının iki farklı düşünsel gelenek içerisindeki izdüşümünü değerlendirmektir.

Anahtar kelimeler: Gazali, Carl Schmitt, Mucize, İstisna, Tanrı, Egemen, Nedensellik, Sekülerleşme.

A COMPARİSON OF GHAZALİ'S CONCEPT OF MİRACLE AND CARL SCHMİTT'S STATE OF EXCEPTİON

Res. Asst, Merve YÜKSEL
Ondokuz Mayıs University,
merveyuksel@omu.edu.tr - 0009-0000-6510-7894

ABSTRACT

Whether it involves the suspension of natural laws or divine custom, miracles have held an important place in philosophical debates and have been considered a theme worthy of discussion by philosophers. In the teachings of one such philosopher, Ghazali (1058-1111), all events that appear to occur within a necessary cause-and-effect relationship actually occur according to God's custom. Miracles are possible when God suspends His custom in order to demonstrate the prophet's prophethood. Indeed, there is no obstacle to God suspending the laws of nature and doing or not doing whatever he wills at any moment. Al-Ghazali thus preserves both God's power and His freedom to intervene in the physical world whenever he wills, while also making room for miracles. In Carl Schmitt's (1888-1985) political theory, which defines miracles as exceptional circumstances approximately eight centuries after Ghazali, the definition of sovereignty is shaped by the decisions made in times of crisis. The sovereign described by Schmitt through such a decision appears as a power with the ability to decide on the state of exception, reminiscent of Ghazali's God, who is all-powerful and has unlimited right of intervention. Indeed, this similarity finds its source in Schmitt's political theology. According to this, all concepts belonging to modern law are actually veiled concepts of theology, and in such a determination, the state of exception is the miracle itself. Whether called a miracle or an exception, these concepts appear with the same meaning for both thinkers; for both, a miracle corresponds to a state of "suspension" by God or the sovereign. The aim of this study is to present the concept of God-sovereign exception, which is rooted in a theistic context, as proposed by Carl Schmitt, one of the powerful representatives of the political theology approach in Western thought, alongside the concept of God-miracle, which has made the concept of miracle a subject of intense debate in the Islamic world of thought. -miracle understanding within a theistic context and Carl Schmitt's sovereign-exception understanding within a more secular context, one of the powerful representatives of the political theology approach in the Western world of thought, and to evaluate the projection of the concept of miracle within these two different intellectual traditions.

Keywords: Ghazali, Carl Schmitt, Miracle, Exception, God, Sovereign, Causality, Secularization.

FARABİ'NİN NEDENSELLİK ANLAYIŞINDA İLK NEDEN'İN YERİ

Arş. Gör., Merve YÜKSEL
Ondokuz Mayıs Üniversitesi,
merveyuksel@omu.edu.tr - 0009-0000-6510-7894

ÖZET

Tanrı'nın varlığı yahut mahiyeti problemi gerek din için gerekse felsefe için olsun, tarih boyunca üzerinde en sık durulan konulardan biri olmuştur. Aristotelesçi ve Yeni Platoncu unsurları ustaca sentezleyerek özgün ve bütüncül bir sistem geliştirmiş bir düşünür olan Farabi'nin sistemine bakıldığında, bu temanın oldukça sistematik yankıları kendini gösterir. Nitekim evrendeki her olgunun bir nedeninin bulunduğunu ve neden-sonuç ilişkisi içerisinde zorunlulukla işlediğini ileri süren Farabi, Aristoteles'in dört neden öğretisine kendi sistemi içerisinde önemli bir yer verir ve doğal dünyadaki olayları bu dört nedenin birleşimiyle açıklar. Yine o, var olanlar arasında sağlam hiyerarşik bir yapı betimleyerek var olanların varlık nedenini, sudur nazariyesi içinde açıklığa kavuşturur. Böyle bir yapıda evrende var olduğunu ileri sürdüğü nedenler zinciri sonsuza dek geriye gidemeyeceğinden bir İlk Neden'de, yani Tanrı'da son bulması zorunludur. Bu İlk Neden, yokluğu düşünülemeyen ve varlığı kendinde olan varlık olarak zorunlu varlıktır. Diğer tüm varlıklar ise mümkün varlıklar olarak var olmak için bir nedene muhtaçtırlar; onların varlıkları İlk Neden'e bağlıdır. Farabi'nin sudur nazariyesi, evrenin İlk Neden'den İlk Neden'in kendisini düşünmesi ve bilmesi sebebiyle zorunlu olarak taşmasını açıklar. Böylece Farabi'nin nedensellik anlayışı, yalnızca ontolojik bir açıklama olmayıp aynı zamanda epistemolojik bir anlayışı da ortaya koyar. Anlaşılmaktadır ki kelam ve felsefe arasında köklü bir ayrışmanın yaşandığı Orta çağ düşüncesinde Farabi, felsefi sisteminde nedensellik fikrine önemli bir rol yükler. Farabi'nin gerek dört neden ve sudur nazariyesi gerekse rastlantı, mucize gibi konularda ortaya koyduğu düşüncelere bakıldığında onun, var olanların varlık nedenine, yani İlk Neden olan Tanrı'ya biçtiği rol, oldukça önemli gibi görünür. Zira Farabi'nin sisteminden İlk Neden'i çekip aldığımızda onun sistemi köksüz kalır. Öyleyse filozofun sisteminde bu denli önemli bir yer işgal eden İlk Neden'in incelenmesi, önemli bir girişimdir. İşte bu çalışmanın amacı, Farabi'nin nedensellik anlayışında İlk Neden'in konumunu ve anlamını dört neden, sudur nazariyesi, zorunlu varlık ve mümkün varlıklar, birincil ve ikincil nedenler, mucize ve rastlantı gibi temalar bağlamında incelemektir.

Anahtar kelimeler: Farabi, Nedensellik, İlk Neden, Tanrı, Dört Neden, Sudur Nazariyesi, Rastlantı, Mucize.

THE PLACE OF THE FIRST CAUSE IN FARABI'S UNDERSTANDING OF CAUSALITY

Res. Asst, Merve YÜKSEL
Ondokuz Mayıs University,
merveyuksel@omu.edu.tr - 0009-0000-6510-7894

ABSTRACT

The problem of God's existence or nature has been one of the most frequently discussed topics throughout history, both in religion and philosophy. When we look at the system of al-Farabi, a thinker who developed an original and comprehensive system by skillfully synthesizing Aristotelian and Neoplatonic elements, the systematic echoes of this theme become apparent. Indeed, Farabi, who argued that every phenomenon in the universe has a cause and operates necessarily within a cause-and-effect relationship, gives Aristotle's doctrine of the four causes an important place within his own system and explains events in the natural world through the combination of these four causes. Again, by describing a solid hierarchical structure among existing things, he clarifies the reason for their existence within his theory of emanation. In such a structure, since the chain of causes he claims exists in the universe cannot go back infinitely, it must end in a First Cause, that is, God. This First Cause is a necessary being, a being whose non-existence is inconceivable and whose existence is self-contained. All other beings, as possible beings, require a cause for their existence; their existence is dependent on the First Cause. Farabi's theory of emanation explains that the universe necessarily emanates from the First Cause because the First Cause thinks and knows itself. Thus, Farabi's understanding of causality is not only an ontological explanation but also an epistemological one. It is understood that in medieval thought, where there was a fundamental divergence between theology and philosophy, Farabi assigned an important role to the idea of causality in his philosophical system. Looking at Farabi's ideas on the four causes and the theory of emanation, as well as on topics such as chance and miracles, the role he assigns to God, the First Cause, as the reason for the existence of beings, appears to be quite important. For if we remove the First Cause from Farabi's system, his system becomes rootless. Therefore, examining the First Cause, which occupies such an important place in the philosopher's system, is an important undertaking. The aim of this study is to examine the position and meaning of the First Cause in Farabi's understanding of causality in the context of themes such as the four causes, the theory of emanation, necessary and possible beings, primary and secondary causes, miracles, and chance.

Keywords: Farabi, Causality, First Cause, God, Four Causes, Theory of Emanation, Chance, Miracle.

Nakşî-Hâlidî Geleneğinde İlim ve Tasavvufun Bütünleşmesi Örneği Olarak Norşin

Yüksek Lisans Öğrencisi Büşra Bezci

Ankara Yıldırım Beyazıt Üniversitesi

0009-0006-1978-4732

Özet

İslâm düşünce geleneğinde ilim ve tasavvuf, insanın hem aklî hem de manevî yönünü inşa eden birbirini tamamlayıcı iki temel unsur olarak kabul edilmiştir. Ancak modern dönemde bilginin ahlâkî ve manevî bağlamından kopması, ilim ile tasavvuf arasındaki bu bütüncül ilişkinin zayıflamasına yol açmıştır. Bu çalışma, Nakşî-Hâlidî geleneğin Anadolu'daki önemli temsil merkezlerinden biri olan Norşin Dergâhı'nı, ilim ve tasavvuf sentezinin kurumsal ve işlevsel bir örneği olarak ele almaktadır.

Tezde, Şeyh Abdurrahman-ı Tâğî'nin öncülüğünde Norşin Dergâhı'nda şekillenen medrese–tekke bütünlüğü incelenmiş; zahirî ilimlerle tasavvufî terbiyenin aynı yapı içerisinde yürütüldüğü özgün bir eğitim ve irşad modeli ortaya konulmuştur. Bu modelde ilim, yalnızca teorik bilgi üretimiyle sınırlı kalmayıp ahlâkî sorumluluk ve manevî olgunlukla tamamlanmakta; tasavvuf ise ilmî temele dayandırılarak sahih bir istikamet kazanmaktadır.

Çalışma, ilim ve tasavvuf sentezinin bireysel manevî gelişimin ötesinde toplumsal düzen, ahlâkî süreklilik ve dinî meşruiyet açısından da belirleyici bir rol oynadığını göstermektedir. Bu bağlamda Norşin Dergâhı örneği, geçmişte uygulanmış tarihî bir yapı olmanın ötesinde, günümüz dünyasında bilgi–ahlâk–maneviyat ilişkisini yeniden düşünmeye imkân tanıyan güçlü bir referans sunmaktadır.

Anahtar Kelimeler: Nakşî-Hâlidî, Norşin, medrese, tekke, ilim–tasavvuf ilişkisi.

1.Giriş

İslâm düşünce geleneğinde ilim ve tasavvuf, insanın hem zihnî hem de manevî boyutunu inşa etmeyi hedefleyen bütüncül bir anlayışın iki temel unsuru olarak kabul edilmiştir. Klasik dönem âlimleri, bilgiyi yalnızca teorik bir birikim değil; ahlâkî olgunlaşma ve hikmete ulaşma sürecinin vazgeçilmez bir parçası olarak değerlendirmiştir. Bu bağlamda ilim, doğruyu bilmenin; tasavvuf ise bilinen hakikati içselleştirerek yaşamın merkezine yerleştirmenin yolu

olarak görülmüştür. Özellikle İmam Gazzâlî, ilim–amel–ihlâs ilişkisini merkeze alarak bilginin ancak ahlâkî bir yönelimle değer kazandığını vurgulamıştır.[1]

Ancak modern dönemde ilim ve tasavvuf arasındaki bu tarihsel bütünlüğün zayıfladığı görülmektedir. Günümüzde ilim, büyük ölçüde kurumsal ve akademik bir faaliyet alanına indirgenirken; tasavvuf, ilmî denetimden uzak bireysel maneviyat pratikleriyle özdeşleştirilebilmektedir. Bu ayrışma, dinî bilginin toplumsal rehberlik işlevini zayıflatmış; ilmî otorite ile manevî liderlik arasındaki dengeyi problemli hâle getirmiştir. Modernleşme süreciyle birlikte ortaya çıkan bu kopuş, dinî alanın parçalı bir yapıya bürünmesine yol açmıştır.[2]

Bu noktada, ilim ve tasavvufun tarihsel süreçte nasıl bir bütünlük içerisinde ele alındığını gösteren örnekler, günümüz dinî ve toplumsal sorunlarını anlamak açısından önemli bir referans alanı sunmaktadır. Osmanlı'nın son dönemlerinde etkili olan Nakşî-Hâlidî geleneği, ilimle tasavvufu sistematik biçimde bir arada yürütmesiyle dikkat çekmektedir. Bu gelenekte tasavvuf, ilmin alternatifi değil; onun ahlâkî ve toplumsal boyutunu tamamlayan bir unsur olarak konumlandırılmıştır.[3] Hâlidî meşrep, ilimsiz tasavvufu keyfîlik; tasavvufsuz ilmi ise kalpten yoksun bir bilgi olarak değerlendirmiştir.

Nakşî-Hâlidî geleneğin Anadolu'daki en belirgin temsil merkezlerinden biri olan Norşin, medrese ve tekke yapısının iç içe geçtiği özgün bir kurumsal model ortaya koymuştur. Norşin'de dinî eğitim, yalnızca bilgi aktarımına dayalı bir süreç olarak değil; ahlâk, irfan ve toplumsal sorumluluk bilinciyle desteklenen bütüncül bir terbiye anlayışı çerçevesinde şekillenmiştir. Medrese, tasavvufî rehberliğin ilmî meşruiyet zeminini oluştururken; tekke, ilmin toplumsal hayata nüfuz etmesini sağlayan bir irşad merkezi işlevi görmüştür.[4]

Bu bütünleşik yapı, Norşin'i yalnızca bölgesel bir dinî merkez olmaktan çıkarmış; ilmî otorite ile manevî rehberliğin aynı şahsiyette birleştiği bir temsil alanına dönüştürmüştür. Medrese–tekke ilişkisi, Norşin örneğinde çatışma değil, tamamlayıcılık esasına dayalı olarak işlemiş; bu durum hem dinî otoritenin meşruiyetini güçlendirmiş hem de toplumsal düzenin tesisinde etkili olmuştur. Osmanlı coğrafyasında medrese ve tekke ilişkisine dair genel çerçeve dikkate alındığında, Norşin'in bu yönüyle istisnaî bir örnek sunduğu görülmektedir.[5] Bu çalışma,

Norşin örneği üzerinden Nakşî-Hâlidî geleneğinde ilim ve tasavvuf bütünleşmesini analiz etmeyi ve bu tarihsel modelin günümüz dinî eğitim anlayışı, dinî otorite tartışmaları ve toplumsal barış arayışları açısından sunduğu imkânları ortaya koymayı amaçlamaktadır.

2. Kavramsal Çerçeve: Nakşî-Hâlidî Geleneğinde İlim ve Tasavvuf Sentezi

İslâm düşünce geleneğinde ilim, insanın yalnızca bilgi sahibi olmasını değil, aynı zamanda ahlâkî ve manevî bir olgunluğa yönelmesini hedefleyen temel bir kavram olarak değerlendirilmiştir. Klasik kaynaklarda ilim, insanı hakikate ulaştıran bir rehber olarak tanımlanırken, bu rehberliğin ancak amel ve ahlâk ile tamamlandığında anlam kazandığı vurgulanmıştır. Bu yaklaşım, bilginin zihinsel düzeyde kalmasını yeterli görmeyen ve onu hayatın merkezine yerleştiren bütüncül bir anlayışı yansıtmaktadır.[6]

Bu bağlamda ilim, İslâm düşüncesinde çoğunlukla zahirî ve bâtınî boyutlarıyla ele alınmıştır. Zahirî ilimler, dinin hukukî ve itikadî çerçevesini belirleyen disiplinleri kapsarken; bâtınî ilimler, insanın iç dünyasına yönelik ahlâkî ve manevî inşayı konu edinmiştir. Ancak bu ikili tasnif, iki alan arasında bir karşıtlık değil, tamamlayıcılık ilişkisini ifade etmektedir. Nitekim klasik âlimler, zahirî ilimlerden kopuk bir maneviyat anlayışını sapma olarak değerlendirmiştir.[7]

Tasavvuf, bu tamamlayıcılık ilişkisinin pratik boyutunu temsil eden bir disiplin olarak ortaya çıkmıştır. Sûfî düşüncede bilgi, yalnızca aklın kavradığı bir gerçeklik değil; kalbin tecrübe ettiği ve davranışa yansıttığı bir hakikat olarak ele alınmıştır. Bu nedenle tasavvuf literatüründe "ilm-i kâl" ile "ilm-i hâl" ayrımı yapılmış; hakikate ulaşmanın, bilmek ile yaşamak arasındaki uyumla mümkün olduğu ifade edilmiştir. Bu yaklaşım, tasavvufu ilme alternatif bir alan olmaktan çıkararak bilginin içselleştirilmesini sağlayan bir terbiye süreci olarak konumlandırmıştır.[8]

Bu bütüncül anlayış, özellikle Nakşibendî gelenekte belirgin bir sistematik kazanmıştır. Nakşibendîlik, tasavvufî eğitimi şeriat merkezli bir çerçevede ele alması ve "sünnete ittibâ" ilkesini merkeze yerleştirmesiyle dikkat çeker. Bu ilke, tasavvufî tecrübenin ilmî ve şer'î ölçülerle denetlenmesini sağlayarak bireysel maneviyatın keyfîliğe dönüşmesini engellemeyi

[6] İmam Gazzâlî, *İhyâ'ü 'Ulûmi'd-Dîn*, I, Kahire: Dârü'l-Hadîs, ts., s. 22–25.
[7] İbn Haldun, *Mukaddime*, çev. Zakir Kadiri Ugan, İstanbul: MEB Yay., 1989, s. 438–441.
[8] Abdülkerim Kuşeyrî, *er-Risâle*, Kahire: Dârü'l-Kütübi'l-İlmiyye, 2002, s. 32–36.

amaçlamaktadır. Böylece tasavvuf, ilmin karşısında konumlanan bir alan değil; onun ahlâkî ve toplumsal boyutunu tamamlayan bir yapı olarak anlaşılmıştır.[9]

Nakşî-Hâlidî geleneği ise bu yaklaşımı daha disiplinli ve kurumsal bir yapıya dönüştürmüştür. Hâlidîlikte ilim, tasavvufî rehberliğin vazgeçilmez bir şartı olarak kabul edilmiş; medrese eğitimi almamış kimselerin manevî otorite iddiasında bulunmaları eleştirilmiştir. Bu yönüyle Hâlidî geleneğin temel hedefi, tasavvufu ilmî meşruiyetle temellendirmek ve manevî rehberliği keyfî yorumlardan arındırmaktır.[10]

Bu çerçevede "ilim ve tasavvuf sentezi", iki alanın yalnızca yan yana var olması anlamına gelmemektedir. Aksine bu sentez, insanın aklî ve kalbî yönlerinin birlikte inşa edildiği bütüncül bir eğitim ve terbiye modelini ifade eder. İlim, doğruyu bilmenin zeminini oluştururken; tasavvuf, bu doğruluğun ahlâk ve davranış düzeyinde hayata geçirilmesini sağlar. Bu denge anlayışı, İslâm düşüncesinde gerçek kemalin vazgeçilmez şartı olarak görülmüştür.[11]

Modern dönemde ise ilim ve tasavvuf arasındaki bu tarihsel dengenin zayıfladığı, bilginin ahlâkî ve manevî boyutundan büyük ölçüde koparıldığı görülmektedir. Bu durum, dinî bilginin toplumsal rehberlik işlevini sınırlandırmış ve manevî otorite tartışmalarını daha görünür hâle getirmiştir. Dolayısıyla ilim ve tasavvuf sentezinin tarihsel örnekler üzerinden yeniden ele alınması, günümüz dinî ve toplumsal meseleleri açısından önemli bir referans alanı sunmaktadır.[12]

3. Norşin'de Medrese–Tekke Bütünleşmesi

Nakşî-Hâlidî geleneğin Anadolu'daki en belirgin temsil merkezlerinden biri olan Norşin, ilim ve tasavvufun kurumsal düzeyde bütünleştiği özgün bir yapı sunmaktadır. Norşin'de şekillenen dinî yapılanma, medrese ile tekkenin birbirinden ayrıştığı klasik ikili modelden farklı olarak, her iki yapının aynı dinî ve ahlâkî hedef doğrultusunda işlediği bütüncül bir anlayışı yansıtmaktadır. Bu yönüyle Norşin, Nakşî-Hâlidî geleneğin ilim–tasavvuf sentezinin somut biçimde gözlemlenebildiği tarihsel bir örnek niteliği taşımaktadır.[13]

Norşin'de medrese, yalnızca zahirî ilimlerin öğretildiği bir eğitim kurumu olarak değil, tasavvufî rehberliğin ilmî temelini oluşturan asli bir yapı olarak işlev görmüştür. Fıkıh, hadis

[9] Mustafa Kara, *Tasavvuf ve Tarikatlar Tarihi*, İstanbul: Dergâh Yay., 2016, s. 155–162.
[10] Kadir Özköse, *Mevlânâ Hâlid ve Tasavvufî Görüşleri*, İstanbul: İnsan Yay., 2004, s. 45–60.
[11] Seyyid Hüseyin Nasr, *İslâm'da Düşünce ve Hayat*, çev. S. Ayaz, İstanbul: İnsan Yay., 2010, s. 73–80.
[12] Şerif Mardin, *Din ve İdeoloji*, İstanbul: İletişim Yay., 2018, s. 183–190.
[13] Martin van Bruinessen, *Mullas, Sufis and Heretics: The Role of Religion in Kurdish Society*, Leiden: Brill, 2000, s. 170–180.

ve tefsir gibi şer‘î ilimler, manevî rehberliğin meşruiyet kaynağı olarak kabul edilmiş; ilmî yeterlilik, tasavvufî otoritenin vazgeçilmez bir şartı hâline gelmiştir. Bu anlayış, tasavvufun ilmî denetimden koparak keyfî bir maneviyat alanına dönüşmesini engelleyen temel unsurlardan biri olmuştur.[14]

Tekke ise bu ilmî birikimin ahlâk ve davranış düzeyinde hayata geçirildiği bir terbiye ve irşad mekânı olarak konumlanmıştır. Norşin’de tasavvuf, bireysel manevî deneyimle sınırlı kalmamış; ahlâkî olgunlaşma, sorumluluk bilinci ve toplumsal rehberlik ekseninde şekillenmiştir. Bu durum, ilmin yalnızca teorik bir bilgi alanı olmaktan çıkarak toplumsal hayatta karşılık bulan bir rehberlik aracına dönüşmesini sağlamıştır. Medrese–tekke bütünleşmesi sayesinde dinî bilgi, Norşin’de doğrudan toplumsal pratikle ilişkilendirilmiştir.[15]

Norşin’deki bu bütünleşik yapı, ilmî ve tasavvufî otoritenin çoğu zaman aynı şahsiyette birleşmesini mümkün kılmıştır. Medrese kökenli âlimlerin aynı zamanda tasavvufî rehberlik görevini üstlenmeleri, dinî otoritenin hem ilmî hem de ahlâkî temeller üzerinde inşa edilmesini sağlamıştır. Bu durum, âlim–şeyh ayrımının keskinleşmesini engellemiş; ilmî yeterliliğe dayanmayan manevî iddiaların meşruiyet kazanmasının önüne geçmiştir. Böylece Norşin, ilim ve tasavvuf arasında hiyerarşik bir ilişki yerine, tamamlayıcılığa dayalı bir model ortaya koymuştur.[16]

Medrese–tekke bütünleşmesinin Norşin’deki etkileri yalnızca eğitim alanıyla sınırlı kalmamıştır. Norşin Dergâhı, bölgesel ölçekte toplumsal sorunların çözümünde de etkin bir otorite alanı olarak işlev görmüştür. Aşiretler arası ihtilaflar, ailevî meseleler ve toplumsal düzeni tehdit eden anlaşmazlıklar, çoğu zaman Norşin’deki ilmî ve tasavvufî otoriteler aracılığıyla çözüme kavuşturulmuştur. Bu yönüyle Norşin, dinî bilginin toplumsal barışın tesisinde nasıl işlevsel bir rol üstlenebileceğini gösteren önemli bir merkez olarak öne çıkmaktadır.[17]

Norşin örneğinde görülen bu yapı, Nakşî-Hâlidî geleneğin genel ilkeleriyle de uyum içerisindedir. Hâlidî anlayışta tasavvuf, şer‘î ilimler temelinde yürütülen bir manevî terbiye süreci olarak kabul edilmiş; ilimsiz tasavvuf açık biçimde eleştirilmiştir. Norşin’de bu ilke, kurumsal düzeyde hayata geçirilmiş; medrese ve tekke aynı dinî-entelektüel yapının iki

[14] Kadir Özköse, *Mevlânâ Hâlid-i Bağdâdî ve Hâlidîlik,* İstanbul: İnsan Yayınları, 2004, s. 52–60.
[15]Mustafa Kara, *Metinlerle Osmanlılarda Tasavvuf ve Tarikatlar*, Bursa: Dergâh Yayınları, 2009, s. 210–225.
[16] Hamid Algar, “Hâlid el-Bağdâdî”, *Türkiye Diyanet Vakfı İslâm Ansiklopedisi*, c. 15, İstanbul: TDV Yayınları, 1997, s. 284–287.
[17] Ahmet Yaşar Ocak, *Osmanlı Toplumunda Zındıklar ve Mülhidler*, İstanbul: Tarih Vakfı Yayınları, 2013, s. 45–50.

tamamlayıcı unsuru hâline gelmiştir. Bu durum, Norşin'i yalnızca yerel bir dinî merkez olmaktan çıkararak, Hâlidî geleneğin ilim–tasavvuf sentezini temsil eden örnek bir model konumuna taşımıştır.[18]

Norşin'deki medrese–tekke bütünleşmesi, ilim ve tasavvufun birbirinden kopuk alanlar olmadığını; aksine dengeli ve kurumsal bir bütünlük içerisinde ele alındığında hem dinî otoriteyi güçlendirdiğini hem de toplumsal düzeni desteklediğini göstermektedir. Bu bütünleşme, Norşin'de yalnızca yapısal bir tercih değil, aynı zamanda dinî bilginin ahlâk ve toplumsal sorumlulukla birlikte yaşatıldığı bütüncül bir anlayışın ifadesidir.

4. İlim ve Tasavvuf Sentezinin Günümüze Katkısı

İslâm düşünce geleneğinde ilim ve tasavvuf, insanın hakikatle ilişkisini kuran iki ayrı alan olarak değil, aynı gayeye yönelen tamamlayıcı unsurlar olarak ele alınmıştır. Klasik kaynaklarda ilim, insanı doğru bilgiye ulaştıran bir rehber; tasavvuf ise bu bilginin ahlâk ve amel yoluyla içselleştirilmesini sağlayan bir terbiye süreci olarak değerlendirilmiştir. Bu anlayışta bilginin nihai değeri, insanın şahsiyetinde ve davranışlarında meydana getirdiği dönüşümle ölçülür. Nitekim İmam Gazzâlî, ilmin amelle desteklenmediği takdirde fayda üretmeyeceğini vurgulayarak ilim–ahlâk bütünlüğünü İslâm düşüncesinin merkezine yerleştirmiştir.[19]

Bu bütüncül yaklaşım, modern dönemde ilim ile tasavvufun birbirinden kopuk biçimde algılanmasıyla ortaya çıkan sorunların anlaşılması açısından da önemli bir referans sunmaktadır. Günümüzde dinî bilgi çoğu zaman teorik ve kurumsal bir çerçeveye hapsedilirken, manevî rehberlik ilmî denetimden uzak bireysel yönelimler şeklinde ortaya çıkabilmektedir. Oysa klasik İslâm geleneğinde ilim ve tasavvuf arasındaki denge, yalnızca bireysel kemalin değil, toplumsal düzenin korunmasının da temel unsurlarından biri olarak görülmüştür.

Norşin örneğinde somutlaşan ilim–tasavvuf sentezi, bu klasik yaklaşımın tarihsel bir yansıması olarak değerlendirilebilir. Medrese ve tekkenin birlikte işlediği bu yapı, dinî bilginin ahlâkî derinlikle desteklendiği ve toplumsal rehberlik fonksiyonu üstlendiği bir modeli temsil etmektedir. Bu yönüyle Norşin, ilim ve tasavvuf ilişkisinin günümüz açısından yeniden düşünülmesine imkân tanıyan önemli bir örnek sunmaktadır.

4.1. Dinî Otorite ve Meşruiyetin Yeniden İnşası

[18] Mustafa Kara, *Tasavvuf ve Tarikatlar Tarihi*, İstanbul: Dergâh Yayınları, 2016, s. 155–165.
[19] İmam Gazzâlî, *İhyâ'ü ʿUlûmi'd-Dîn*, I, Kahire: Dârü'l-Hadîs, ts., s. 22–30.

Klasik İslâm literatüründe dinî otorite, bilgi ve ahlâkın birleşimi üzerine kurulmuştur. Bu bağlamda ilmî yeterlilik, manevî rehberliğin vazgeçilmez bir şartı olarak kabul edilmiştir. İmam Gazzâlî, gerek *İhyâ*'da gerekse *el-Münkız mine'd-Dalâl*'de ilimden kopuk bir maneviyat anlayışının kişiyi yanıltabileceğini, amelden ve ihlâstan yoksun bir ilmin ise kibir ve yozlaşmaya yol açabileceğini ifade eder.[20] Bu yaklaşım, dinî otoritenin ancak ilim ve ahlâk birlikteliğiyle meşruiyet kazanabileceğini ortaya koymaktadır.

Norşin modelinde görülen ilmî temelli manevî rehberlik anlayışı, bu klasik ilkenin kurumsal bir tezahürüdür. Medrese kökenli âlimlerin aynı zamanda tasavvufî rehberlik görevini üstlenmeleri, dinî otoritenin hem ilmî hem de ahlâkî temeller üzerinde yükselmesini sağlamıştır. Bu durum, günümüzde sıkça tartışılan denetimsiz dinî otorite sorununa tarihsel bir perspektif sunmaktadır.

4.2. Din Eğitimi ve Şahsiyet Boyutu

Klasik İslâm eğitim anlayışında ilim, yalnızca zihni besleyen bir faaliyet değil, şahsiyeti inşa eden bir süreç olarak ele alınmıştır. Bu anlayışta bilgi, edep ve ahlâkla birlikte verilmediği sürece amacından sapma riski taşır. İbn Cemâa, eğitimle ilgili eserlerinde ilmin edep ve sorumluluk bilinciyle birlikte öğretilmesi gerektiğini vurgulamış; ilmin kişiyi ahlâkî olgunluğa ulaştırmadığı durumlarda fayda üretmeyeceğini belirtmiştir.[21]

Tasavvuf geleneği ise bu eğitimin ahlâkî boyutunu sistematik bir terbiye süreci hâline getirmiştir. Abdülkerîm Kuşeyrî, *er-Risâle*'sinde sûfî eğitiminin temel amacını, bilginin hâle dönüşmesi olarak tanımlar ve tasavvufun şeriatla irtibatını özellikle vurgular.[22] Norşin'deki medrese–tekke bütünleşmesi, bu klasik eğitim anlayışının kurumsal düzeyde hayata geçirilmiş bir örneği olarak değerlendirilebilir.

4.3. Toplumsal Rehberlik ve Düzen

İslâm düşüncesinde ilim ve tasavvuf, yalnızca bireysel kemali değil, toplumsal düzeni de ilgilendiren iki temel unsur olarak görülmüştür. Bu bağlamda dinî yapıların uzlaştırıcı ve düzenleyici bir rol üstlenmesi beklenmiştir. Norşin örneğinde görülen ilmî ve tasavvufî otoritenin birleşimi, dinî bilginin toplumsal barışın tesisinde nasıl işlevsel bir rol üstlenebileceğini göstermektedir.

---

[20] İmam Gazzâlî, *el-Münkız mine'd-Dalâl*, Beyrut: Dârü'l-Kütübi'l-İlmiyye, 2001, s. 55–60.
[21] İbn Cemâa, *Tezkiretü's-Sâmiʿ ve'l-Mutekellim*, Kahire: Dârü'l-Basâir, 2003, s. 63–70.
[22] Abdülkerîm Kuşeyrî, *er-Risâle el-Kuşeyriyye*, Kahire: Dârü'l-Maʿârif, ts., s. 32–40.

Bu yaklaşım, Osmanlı döneminde medrese ve tekke ilişkisine dair genel çerçeveyle de uyumludur. Medrese, dinî bilginin meşruiyet zeminini oluştururken; tekke, bu bilginin ahlâk ve toplumsal hayata yansımasını sağlamıştır. Norşin'de bu iki yapı arasındaki denge, klasik İslâm düşüncesinin toplumsal rehberlik anlayışını somutlaştıran bir model ortaya koymuştur.[23]

4.4. Günümüz İçin Anlamı

Norşin'de şekillenen ilim–tasavvuf sentezi, doğrudan birebir uygulanacak bir modelden ziyade, günümüz dinî yapılarına ilham verebilecek bir tecrübe olarak değerlendirilebilir. Bu tecrübe, dinî bilginin ahlâkî derinlikten koparıldığı ve manevî rehberliğin ilmî temelden uzaklaştığı çağdaş tartışmalar açısından önemli bir referans sunmaktadır. Norşin örneği, ilim ve tasavvufun dengeli biçimde bir araya geldiği yapılarda dinî otoritenin güçlendiğini ve toplumsal kabulün arttığını göstermektedir.

Sonuç

Bu çalışma, Nakşî-Hâlidî geleneğinde ilim ve tasavvuf ilişkisinin Norşin örneği üzerinden nasıl kurumsal bir bütünlük içinde ele alındığını ortaya koymayı amaçlamıştır. İnceleme sonucunda ulaşılan temel bulgu, ilim ve tasavvufun İslâm düşüncesinde birbirinden kopuk alanlar olmadığı; aksine insanın hem zihnî hem de ahlâkî yönünü inşa eden tamamlayıcı unsurlar olarak birlikte ele alındığıdır.

Norşin örneği, bu bütüncül anlayışın teorik bir ideal olmaktan çıkıp kurumsal ve toplumsal bir gerçeklik hâline geldiğini göstermektedir. Medrese ve tekkenin Norşin'de aynı dinî-entelektüel yapı içerisinde işlev görmesi, ilim–tasavvuf sentezinin somut bir tezahürü niteliğindedir. Bu yapı içerisinde ilim, tasavvufî rehberliğin meşruiyet zeminini oluşturmuş; tasavvuf ise ilmî bilginin ahlâk ve toplumsal hayata yansımasını sağlayan bir terbiye süreci olarak işlev görmüştür.

Çalışmada ulaşılan önemli sonuçlardan biri, Norşin'de ilmî yeterlilik ile manevî otoritenin aynı şahsiyette birleşmesinin dinî otoritenin meşruiyetini güçlendirmiş olmasıdır. Bu durum, ilimsiz maneviyat iddialarının önüne geçtiği gibi, tasavvufsuz bir ilim anlayışının da ahlâkî derinlikten yoksun kalmasını engellemiştir. Böylece Norşin, klasik İslâm düşüncesinde ilim ve tasavvuf arasında kurulması öngörülen denge anlayışının kurumsal bir örneğini sunmuştur.

[23] Mustafa Kara, *Metinlerle Osmanlılarda Tasavvuf ve Tarikatlar*, Bursa: Dergâh Yayınları, 2009, s. 210–225.

Norşin'deki medrese–tekke bütünleşmesi, yalnızca dinî eğitimle sınırlı kalmamış; toplumsal hayata da doğrudan yansımıştır. Norşin Dergâhı'nın bölgesel ölçekte uzlaştırıcı bir otorite olarak işlev görmesi, ilim ve tasavvufun birlikte yürütüldüğü yapılarda dinî bilginin toplumsal barışın tesisinde etkili olabileceğini göstermektedir.

Sonuç olarak bu çalışma, Norşin örneğinin Nakşî-Hâlidî geleneğinde ilim ve tasavvufun birbirini dışlayan değil, birbirini tamamlayan alanlar olarak ele alındığını açık biçimde ortaya koyduğunu göstermektedir. Norşin, tarihsel bir hatıradan ziyade, günümüz dinî eğitim anlayışı, dinî otorite tartışmaları ve toplumsal rehberlik meseleleri açısından anlamlı bir referans noktası sunan canlı bir tecrübe niteliği taşımaktadır.

SIFIR ATIK PERPEKTİFİNDEN DÖNGÜSEL EKONOMİ

Prof. Dr. Kemal YAMAN
Karabük Üniversitesi
kyaman@karabuk.edu.tr - 0000-0001-9844-4264

ÖZET

Bu çalışmada, sıfır atık uygulamalarının döngüsel ekonomi modeli ile ilişkisini inceleyerek, kaynak verimliliğinin artırılması ve atık oluşumunun minimuma indirilmesi açısından ne gibi sonuçların ortaya çıkacağı örnek uygulamalar ışığında değerlendirmektedir. Sıfır Atık, doğrusal ekonomi modelinin "al-kullan-at" döngüsünü tersine çevirerek; atığın kaynağında azaltılmasını, yeniden kullanımın yaygınlaştırılmasını ve geri dönüşüm oranlarının artırılmasını hedefleyen entegre bir sistemdir. Döngüsel ekonomi ise ürünlerin, malzemelerin ve kaynakların ekonomik döngü içerisinde mümkün olduğunca uzun süre tutulmasını, atık malzemelerin mümkün oldukça yeniden üretim sürecine katılmasını sağlayarak hem çevresel sürdürülebilirliğe hem de ekonomik değer elde edilmesine katkı sağlar. Bu haliyle döngüsel ekonomi kavramı sıfır atık uygulamalarının endüstriyel boyutunu hedef alan bir anlayıştır.
Dünyada sıfır atık fikrinin temelleri 1990'lü yılların başından itibaren atılmaya başlamıştır. Bu dönemde ana fikir olarak hiçbir atığın çöp olmadığı ve mutlaka değerlendirilebilecek bir alan olduğu ifade edilmiştir. Türkiye'de ise 2019 yılından itibaren sıfır atık konusu yasal bir belgeye dayandırılarak ulusal bir politika halinde gelmiştir. Ayrıca Çevre, Şehircilik ve İklim Değişikliği Bakanlığı tarafından 2025-2028 yıllarını kapsayan Ulusal Döngüsel Ekonomi Stratejisi ve Eylem Planı hazırlanmış olup bu uygulama da sıfır atık anlayışını destekleyen bir politika olarak kabul edilebilir. Ayrıca sıfır atık politikalarının döngüsel ekonomi sistemine geçişi kolaylaştırdığı ve ürün yaşam döngüsü yönetiminin güçlendirilmesi gibi alanlarda önemli etkiler sunmaktadır. Türkiye'de son yıllarda artan Sıfır Atık uygulamaları, belediyelerden sanayi tesislerine, eğitim kurumlarından kamu binalarına kadar geniş bir yelpazede kaynak geri kazanım oranlarını yükseltmiştir. Bu durum, döngüsel ekonomi uygulamalarının desteklenmesi açısından güçlü bir altyapı oluşturmaktadır.
Sonuç olarak, Sıfır Atık anlayışı döngüsel ekonomiye geçişi hızlandıran stratejik bir öneme sahiptir. Bu çalışma, politika yapıcılar, yerel yönetimler ve özel sektör için uygulanabilir öneriler geliştirmekte; sürdürülebilir üretim ve tüketim ile döngüsel ekonomi modellerine geçişte Sıfır Atık'ın kritik rolünü vurgulamaktadır.
Anahtar Kelimeler: Döngüsel Ekonomi, Sıfır Atık, Geri Dönüşüm

1. GİRİŞ

Sanayi devrimi mikro ve makro ekonomi düzeyinde karlılığı artırmayı amaçlayan bir anlayışı egemen kılmıştır. Bunun sonucu olarak doğal kaynaklar hiç tükenmeyecek etmiş gibi kullanılmış, hava su ve toprak kirliliği ciddiye alınmamış ve doğrusal ekonomi anlayışı dediğimiz al-kullan-at anlayışı tüm tüketiciler üzerinde egemen olmuştur. Bu sınırsız tüketim anlayışı sonucunda 1950'lere gelindiğinde öncelikle hava kirliliğinden kaynaklı toplu insan

ölümleri Londra ve San Francisco gibi küresel şehirlerde toplu ölümler yaşanmaya başlanınca sanayi devriminin yol açtığı bu soruna çözüm arama ihtiyacı ortaya çıkmıştır. 1972 yılında Düzenlenen Birleşmiş Milletler İnsan Çevresi Konferansı ile başlayan bu arayış günümüze kadar uluslararası bölgesel ve ulusal düzeyde yoğun bir şekilde devam etmiştir ve etmektedir. Bu çabaların sonucu olarak doğrusal ekonomi anlayışından vazgeçilerek dünya genelinde döngüsel ekonomi uygulamalarına geçiş benimsenmiştir. Döngüsel ekonomi kavramı mevcut malzeme ve ürünlerin mümkün olduğunca uzun süre paylaşılmasını, kiralanmasını, yeniden kullanılmasını, onarılmasını, yenilenmesini ve geri dönüştürülmesini içeren bir üretim ve tüketim modelini ifade eder (European Parliament, 2025). Böylece her türlü ürünün yaşam döngüsü uzatılırmış ve doğal kaynakların verimli ve sürdürülebilir kullanımı sağlanmış olur. Kapsamda Avrupa Birliği 2015 yılında birinci döngüsel ekonomi eylem planını ilan etmiş ve 2018 yılından başlayarak yürürlüğe girmesine karar vermiş, Bu karara paralel olarak 2019'da Avrupa Yeşil Mutabakatı anlayışını ve kapsamda yapılması gerekenleri duyurmuş, Mart 2020'de Avrupa Komisyonu Avrupa Yeşil Mutabakatı'nın temel bileşenlerinden birini oluşturan Yeni Döngüsel Ekonomi Planı'nı yayımlamıştır. Türkiye de bu anlayışa uygun bir politika benimsemiş, 2019 yılında sıfır atık yönetmeliğini, 2021 yılında Ulusal Yeşil Mutabakat Eylem Planını ve 2024 yılında Ulusal İklim Değişikliği Azaltım Stratejisi ve Eylem Planını, 2025 yılında Ulusal Döngüsel Ekonomi Stratejisi ve Eylem Planı (2025-2028) hazırlanmış ve yayımlamıştır (ÇŞİDB, 2025). Bu durumda, döngüsel ekonomi yaklaşımı aslında 1900'lerin başına kadar uzanan bir geçmişi olan sıfır atık anlayışının günümüze uyarlanmış bir halidir ve bu şekliyle sıfır atık ve döngüsel ekonomi kavramları birbirini destekleyen ve tamamlayan iki kavramdır.

2. DÖNGÜSEL EKONOMİ

Geleneksel ekonomi modeli, sanayi devriminden bu yana süregelen ve al-kullan-at yaklaşımına dayanan doğrusal bir sistem üzerine kuruludur. Bu modelde ham maddeler ürünlere dönüştürülür, belirli bir süre kullanılır ve sonunda atık olarak bertaraf edilir. Ancak küresel kaynakların hızla tükenmesi ve çevresel kirliliğin artması, bu sürdürülebilir olmayan modelin yerine yenileyici ve onarıcı bir sistem olan döngüsel ekonominin benimsenmesini zorunlu kılmıştır. Döngüsel ekonomi; ham madde kullanımından atık oluşumuna kadar olan süreçte çevrenin korunmasını odak noktasına alan, atık kavramını sistemden çıkarmayı hedefleyen bir üretim ve tüketim modelidir. Bu sistemde temel amaç, ürünlerin, bileşenlerin ve malzemelerin her zaman en yüksek fayda ve değerde tutulmasını sağlamaktır (Noman, vd., 2022; ÇŞİDB, 2025, Anonim, 2020; Saidani vd. 2019).

Döngüsel ekonomi sistemi aslında üç temel ilke üzerine inşa edilmiştir.
1-Atık ve kirliliğin önlenmesi
2-Ürün ve materyallerin mümkün olduğunca uzun süre sistemde tutulması
3-Doğal sistemlerin yeniden canlandırılması.

Bu ilkelerin hayata geçirilmesini sağlamak için literatürde "R stratejileri" adı verilen farklı teknikler kullanılmaktadır. Bunların başında ürünün işlevinden vazgeçerek veya onu dijital gibi hizmetlerle sunarak gereksiz hale getirmeyi ifade eden "Reddet" (Refuse) stratejisi gelmektedir. Bunu, ürün kullanımını daha yoğun hale getirmeyi amaçlayan "Yeniden Düşün" (Rethink) ve kaynak kullanım

verimliliğini artıran "Azalt" (Reduce) stratejileri takip etmektedir (Gülenç, 2022; Noman, 2022, EC, 2020; Malooly and Daphne, 2023).

Görsel 1. Doğrusal Ekonomi ve Döngüsel Ekonomi

Döngüsel ekonomik modele geçiş, sadece çevresel değil, aynı zamanda ciddi ekonomik ve sosyal fırsatlar sunmaktadır. Ekonomik açıdan; ham madde maliyetlerinin düşürülmesi, tedarik güvenliğinin sağlanması ve yeni iş alanlarının yaratılması yoluyla rekabet gücünün artırılması gibi avantajlar sağlamaktadır. Çevresel boyutta ise, sera gazı emisyonlarının azaltılması ve doğal kaynak kullanımında dengenin korunması, iklim değişikliği ile mücadelede önemli avantajlar sağlamaktadır. Sosyal açıdan ise döngüsel ekonomi, yeşil istihdam fırsatlarını beraberinde getirerek toplumun tüm kesimleri için adil bir geçiş sürecini desteklemektedir (Anonim, 2025; Anonim, 2020; Noman vd., 2022; ÇŞIDB,2025).

3.SIFIR ATIK

Sıfır Atık, doğal kaynakların verimli kullanılması, atık oluşumunun önlenmesi ve oluşan atıkların yeniden kullanım, geri dönüşüm ve geri kazanım yoluyla ekonomiye kazandırılmasını hedefleyen bütüncül bir yaklaşımdır. Bu yaklaşım, çevresel sürdürülebilirliğin sağlanmasının yanı sıra ekonomik ve sosyal faydalar da sunmaktadır (United Nations Environment Programme [UNEP], 2018).

Geleneksel “al–kullan–at” anlayışının aksine Sıfır Atık, ürünlerin yaşam döngüsünü uzatmayı ve kaynak verimliliğini artırmayı amaçlar. Bu kapsamda, atık oluşumunun kaynağında azaltılması en öncelikli adım olarak görülmektedir. Özellikle ambalaj atıkları, gıda israfı ve tek kullanımlık ürünler Sıfır Atık politikalarının temel odak alanları arasında yer almaktadır (Zero Waste International Alliance [ZWIA], 2018).

Sıfır Atık uygulamaları, iklim değişikliğiyle mücadelede de önemli bir araçtır. Atık miktarının azaltılması, sera gazı salımlarını düşürmekte ve enerji tasarrufuna katkı sağlamaktadır (European Environment Agency [EEA], 2020). Ayrıca bireylerin ve kurumların tüketim alışkanlıklarını sorgulamasına olanak tanıyarak çevre bilincinin gelişmesine katkıda bulunur.

Sıfır Atık yaklaşımı, yalnızca bir atık yönetim modeli değil; sürdürülebilir yaşam biçimini teşvik eden kapsamlı bir dönüşüm sürecidir. Bu yaklaşımın yaygınlaşması, çevresel sorunların azaltılmasında kritik bir rol oynamaktadır. Bu durumda sıfır atık anlayışı döngüsel ekonomi ile

anlam kavram ve uygulama açısından örtüşmektedir, ancak sıfır atık uygulamalarının döngüsel ekonomi kavramından önce hayata geçtiğini, bu konuda teorik ve uygulamalı çalışmalar yapıldığını görmekteyiz.

Türkiye'de Döngüsel Ekonomi ve Sıfır Atık Vizyonu kapsamında yapılan çalışmalar incelendiğinde 2019 yılında uygulamaya giren "Sıfır Atık Yönetmeliği" atık yönetiminde radikal bir dönüşüm sürecine girilmesini sağlamıştır. Bu proje, sadece çevresel bir faaliyet değil, aynı zamanda 11. ve 12. Kalkınma Planı ve Yeşil Mutabakat Eylem Planı ile entegre bir devlet politikasıdır (ÇŞİDB, 2024). Bu kapsamda yapılan çalışmalar sonucunda 2017 yılında %13 olan belediye atığı geri kazanım oranı, projenin etkisiyle 2023 yılı sonunda %34,92 seviyesine yükselmiştir (Sıfır Atık Vakfı, 2024). Bu süreçte toplanan atıkların geri dönüştürülmesiyle ekonomiye yaklaşık 185 milyar TL kazandırılmış; 498 milyon ağaç kesilmekten kurtarılmıştır (ÇŞİDB, 2024). 2035 yılı hedefi ise Ulusal Atık Yönetimi ve Eylem Planı kapsamında, 2035 yılına kadar geri kazanım oranının %60'a çıkarılması şeklinde tanımlanmıştır.

4.SONUÇ

Sıfır Atık ve Döngüsel Ekonomi yaklaşımları, sürdürülebilir kalkınma hedefleri doğrultusunda birbirini tamamlayan iki temel paradigma olarak öne çıkmaktadır. Sıfır Atık, ağırlıklı olarak atık oluşumunun önlenmesi, kaynakların verimli kullanımı ve tüketim alışkanlıklarının dönüştürülmesine odaklanırken; Döngüsel Ekonomi daha geniş bir çerçevede üretim, tasarım, tüketim ve yeniden kullanım süreçlerini kapsayan sistemsel bir ekonomik modeli ifade etmektedir. Bu yönüyle Sıfır Atık, Döngüsel Ekonomi'nin uygulanabilirliğini artıran pratik ve davranışsal bir araç niteliği taşımaktadır.

Karşılaştırmalı olarak değerlendirildiğinde, Sıfır Atık yaklaşımı bireysel ve kurumsal düzeyde farkındalık yaratma ve kısa vadede somut çevresel kazanımlar sağlama açısından güçlüdür. Döngüsel Ekonomi ise uzun vadeli yapısal dönüşümü hedefleyerek, ürünlerin yaşam döngüsünün yeniden tasarlanmasını ve ekonomik değerin sistem içinde korunmasını amaçlamaktadır. Dolayısıyla Sıfır Atık uygulamaları, Döngüsel Ekonomi'nin temel ilkelerini destekleyerek atıkların kaynak olarak değerlendirilmesine katkı sunmaktadır.

Sonuç olarak, çevresel sürdürülebilirliğin sağlanabilmesi için bu iki yaklaşımın birbirinden bağımsız değil, bütünleşik biçimde ele alınması gerekmektedir. Sıfır Atık, toplumsal davranış değişikliğini hızlandıran bir araç olarak Döngüsel Ekonomi'nin saha düzeyindeki karşılığını oluştururken; Döngüsel Ekonomi ise Sıfır Atık hedeflerinin kalıcı ve sistematik biçimde hayata geçirilmesini mümkün kılmaktadır. Bu bütüncül yaklaşım, hem çevresel hem de ekonomik sürdürülebilirlik açısından kritik bir öneme sahiptir.

ÖZET

Bu çalışma, hukuki düzenlemelerin ekonomik verimlilik üzerindeki etkilerini teorik ve analitik bir çerçevede incelemektedir. Ekonomik verimlilik; kıt kaynakların toplumsal refahı üst düzeye çıkaracak şekilde tahsis edilmesi olarak tanımlanmaktadır. Bu süreçte hukuki kurumların belirleyici rolü vurgulanmaktadır. Çalışmanın temel görüşü, etkin bir hukuk düzeninin işlem maliyetlerini düşürerek öngörülebilirliği artırdığıdır. Böylece ekonomik birimlerin teşvikleri daha uygun hâle getirilmektedir.

Çalışmada; Pareto ve Kaldor–Hicks verimliliği gibi temel ekonomik verimlilik kriterleri ele alınmaktadır. Hukukun ekonomik analizinin, hukuki kuralları ekonomik sonuçları bakımından değerlendirdiğini ortaya koymaktadır. Mülkiyet haklarının korunması, sözleşmelerin icra edilebilirliği ve haksız fiil hukukunun caydırıcılık işlevi, ekonomik etkinliği doğrudan etkileyen kurumsal unsurlar olarak ele alınmaktadır.

Çalışmada rekabet hukuku düzenlemelerinin piyasa gücünü sınırlayarak inovasyonu ve tüketici refahını artırdığı, çevre, sağlık ve güvenlik düzenlemelerinin ise dışsallıkları içselleştirerek sosyal maliyetleri düşürdüğü ileri sürülmektedir. Bununla birlikte aşırı düzenleme, düzenleyici yakalama ve hukuki belirsizlik gibi olguların verimlilik kayıplarına yol açtığı; bu nedenle düzenleme tasarımlarında maliyet–fayda analizinin zorunlu olduğu belirtilmektedir.Sonuç olarak metin, hukuki düzenlemelerin ekonomik verimliliğin hem ön koşulu hem de belirleyicisi olduğunu; güçlü mülkiyet hakları, etkin sözleşme hukuku, rekabetçi piyasa yapısı ve

dışsallıklara yönelik doğru tasarlanmış düzenlemelerin ekonomik refahın artırılmasında kritik rol oynadığını savunmaktadır.

Anahtar Kelimeler: Ekonomi, Hukuk, Verimlilik, Ekonomik Verimlilik.

ABSTRACT

THE ROLE OF LEGAL REGULATIONS IN ECONOMIC EFFICIENCY

This study examines the effects of legal regulations on economic efficiency within a theoretical and analytical framework. Economic efficiency is defined as the allocation of scarce resources in a way that maximizes social welfare. The decisive role of legal institutions in this process is emphasized. The main argument of the study is that an effective legal system increases predictability by reducing transaction costs. This makes incentives for economic units more appropriate.

The study addresses fundamental economic efficiency criteria such as Pareto and Kaldor–Hicks efficiency. It demonstrates that the economic analysis of law evaluates legal rules in terms of their economic consequences. The protection of property rights, the enforceability of contracts, and the deterrent function of tort law are addressed as institutional elements that directly affect economic efficiency.

The study also argues that competition law regulations increase innovation and consumer welfare by limiting market power, while environmental, health, and safety regulations reduce social costs by internalizing externalities. However, it is noted that phenomena such as overregulation, regulatory capture, and legal uncertainty lead to efficiency losses; therefore, cost-benefit analysis is mandatory in regulatory design. In conclusion, the text examines the economic efficiency of legal regulations.

Keywords: Economy, Law, Efficiency, Economic Efficiency.

GİRİŞ

Hukuki düzenlemeler, ekonomik birimlerin davranışlarını ve teşvik yapılarını biçimlendirerek ekonomik verimliliğin sağlanmasında önemli bir rol oynamaktadır(Cooter & Ulen, 2016). Bu düzenlemeler, kaynakların etkin tahsisini sağlayarak ekonomik verimliliğin yükseltilmesinde önemli bir araçtır. Aşırı veya yanlış tasarlanmış düzenlemeler işlem maliyetlerini artırarak verimlilik kayıplarına yol açabilir. Mülkiyet haklarının korunması, sözleşmelerin güvence altına alınması, rekabetçi piyasa düzeninin kurulması ve dışsallıkların düzenlenmesi gibi hukuki uygulamalar, modern ekonomilerde verimliliğin ana belirleyicileri olmaktadır(Posner, 2007). Hukuki düzenlemelerin ekonomik etkilerinin analiz edilmesi, etkin politika tasarımı açısından önem taşır. Bu çalışma, hukuki düzenlemelerin ekonomik verimlilik üzerindeki rolünü hukuk ve ekonomi perspektifinden ele almayı amaçlamaktadır.

1. KAVRAMSAL ÇERÇEVE VE TEORİK TEMELLER

1.1. Ekonomik Verimlilik Kavramı

Ekonomik verimlilik, kıt kaynakların toplumsal refahı en üst düzeye çıkaracak şekilde kullanılması anlamına gelmektedir (Stiglitz, 1989). Üretimin artırılması tek başına yeterli olmayıp, doğru maliyetle ve tüketici tercihleriyle uyumlu üretim yapılması esastır. Günümüzde, ekonomik sistemleri, gelişmişlik düzeyleri ne olursa olsun ülkelerde verimliliğin ulusal refahı yükseltmede belirleyici bir unsur olduğu görüşü genel kabul görmektedir. Verimlilikte sağlanan yükseliş, ekonomik büyümenin ve kalkınmanın temel dinamiklerinden biri olarak değerlendirilmektedir (İleri,1999). Bu bağlamda verimlilik, yalnızca üretim miktarının artırılmasıyla değil, kaynakların etkin tahsisi ve kullanımının optimize edilmesiyle ilişkilendirilmektedir (İleri, 2014). Ayrıca verimlilik artışları, rekabet gücünün yükselmesine ve sürdürülebilir ekonomik büyümenin sağlanmasına önemli katkılar sunmaktadır (Ulusoy, 2020). Nitekim etkin bir kurumsal ve hukuki yapı, verimlilik düzeylerini doğrudan etkileyerek uzun vadeli kalkınma performansının belirleyicilerinden biri hâline gelmektedir (Ardıyok, 2008).

1.1.1. Pareto ve Kaldor–Hicks Verimliliği

Pareto verimliliği, kaynakların yeniden dağıtımı sonucunda en az bir bireyin durumunun iyileşip kimsenin durumunun kötüleşmemesi ilkesine dayanır. Ekonomik etkinliğin nihai bir sınırını tanımlar (Pareto, Manuale di Economia Politica, 1906) Bu ölçüt, bireyler arası refah karşılaştırmalarına izin vermemesi nedeniyle normatif açıdan tarafsız bir kriter sunmakla birlikte, uygulamada oldukça sınırlı bir alan bulmaktadır. Kamu politikaları ve hukuki düzenlemeler çoğu durumda kaçınılmaz olarak kazananlar ve kaybedenler yaratmaktadır. Bu bağlamda Pareto kriteri, hukuki müdahalelerin ekonomik sonuçlarını değerlendirmede yetersiz kalmaktadır. Bu dar tanım Kaldor ve Hicks tarafından genişletilmiştir. Bu sınırlılığı aşmak amacıyla geliştirilen Kaldor–Hicks verimliliği yaklaşımı, bir düzenlemeden elde edilen toplam kazancın toplam kayıpları aşması ve kazanç sağlayanların kaybedenleri potansiyel olarak tazmin edebilmesi hâlinde, söz konusu düzenlemenin toplumsal açıdan daha etkin kabul edilebileceğini ileri sürmektedir (Kaldor, 1939; Hicks, 1939). Bu yaklaşımda fiilî bir tazminat zorunluluğu bulunmamakta, bunun yerine net sosyal faydanın varlığı esas alınmaktadır. Böylece Kaldor–Hicks ölçütü, maliyet–fayda analizine dayalı değerlendirmelere daha geniş bir uygulama alanı sunmaktadır... Kaldor–Hicks, bir değişiklikten kazanç sağlayanların kaybedenleri tam anlamıyla tazmin edebilmesi durumunda düzenlemenin toplumsal açıdan daha etkin kabul edilebileceğini öne sürmektedir (Kaldor, 1939; Hicks, 1939). Bu yaklaşım, refah ekonomisinin politika analizlerinde sıkça kullanılmaktadır. Pareto optimalitesinin katı koşullarını aşarak uygulamada karşılaşılan maliyet–fayda değerlendirmelerine daha esnek bir çerçeve sunmaktadır. Kaldor–Hicks verimliliği, kazananların kaybedenleri teorik olarak tazmin edebildiği durumların verimli olduğunu kabul ederek daha esnek bir değerlendirme sunar (Posner, 2007).

Hukuk ve ekonomi literatüründe Kaldor–Hicks verimliliği, özellikle düzenleyici müdahalelerin ekonomik etkilerinin analizinde temel bir referans noktası hâline gelmiştir. Richard Posner, hukuki kuralların ekonomik etkinliğinin değerlendirilmesinde Kaldor–Hicks ölçütünün, Pareto kriterine kıyasla daha gerçekçi ve işlevsel bir çerçeve sunduğunu belirtmektedir (Posner, 2007). Bu yaklaşımın dağılımsal adalet ve gelir eşitsizliği üzerindeki etkileri göz ardı edebileceği

yönünde eleştiriler de mevcuttur (Kaplow & Shavell, 2002). Dolayısıyla hukuki düzenlemelerin ekonomik verimlilik açısından değerlendirilmesinde, Kaldor–Hicks ölçütünün sağladığı analitik kolaylıklar ile adalet ve hakkaniyet ilkeleri arasındaki dengenin gözetilmesi büyük önem taşımaktadır.

1.2. Temel Prensipler ve Hukuki Çerçeve

Hukuki düzenlemeler işlem maliyetlerini azaltarak kaynak kullanımını optimize eder (Ogus, 2004). Mülkiyet haklarının güçlü olduğu ülkelerde ekonomik etkinliğin daha yüksek olduğu ampirik çalışmalarca desteklenmektedir (Tirole, 2017). Ekonomik verimlilik açısından hukuki düzenlemelerin rolü, kaynakların kıtlığı karşısında en yüksek toplumsal faydanın sağlanmasını hedefleyen temel prensiplere dayanmaktadır. Bu çerçevede hukuki düzenlemeler, ekonomik aktörlerin davranışlarını yönlendirerek piyasa başarısızlıklarını gidermeyi ve işlem maliyetlerini azaltmayı amaçlar. Hukukun öngörülebilir ve istikrarlı olması, ekonomik karar alma süreçlerinde belirsizliği azaltarak yatırımların ve uzun vadeli planlamanın önünü açar (Posner, 2014). Özellikle mülkiyet haklarının açık biçimde tanımlanması ve korunması, kaynakların etkin kullanımını teşvik eden temel unsurlardan biridir (Coase, 1960). Hukukun etkinliği, yalnızca kuralların varlığına değil, aynı zamanda bu kuralların uygulanabilirliğine ve denetim mekanizmalarının işlerliğine bağlıdır. Aksi takdirde, aşırı karmaşık veya tutarsız düzenlemeler ekonomik faaliyetler üzerinde ek maliyetler yaratabilir. Bu nedenle hukuki düzenlemelerin tasarımında fayda-maliyet analizi önemli bir değerlendirme aracı olarak öne çıkmaktadır. Hukukun ekonomik analizi yaklaşımı, düzenlemelerin toplumsal refah üzerindeki etkilerini ölçerek daha etkin politika tercihleri geliştirilmesine katkı sağlar. Sağlam bir hukuki çerçeve, ekonomik verimliliğin artırılmasında tamamlayıcı bir kurumsal yapı işlevi görmektedir (Ogus, 2004).

1.3. Hukukun Ekonomik Analizi

Hukukun ekonomik analizi yaklaşımı, hukuki kuralları ekonomik sonuçları üzerinden değerlendirir. Rasyonel davranan birey varsayımıyla hareket eder (Posner, 2007). Hukuki kurumlar, ekonomik aktörlerin teşvik yapılarını şekillendiren mekanizmalar olarak kabul edilir (Parisi, 2017). Hukukun ekonomik analizi, hukuki kuralların bireylerin ve kurumların davranışları üzerindeki etkilerini ekonomik araçlar yardımıyla inceleyen disiplinlerarası bir yaklaşımdır (Posner, 2014; Cooter & Ulen, 2016). Bu yaklaşım, hukukun temel işlevlerinden birinin kıt kaynakların etkin dağılımını sağlamak olduğunu varsayar (Küçükahmetoğlu, 2018). Ekonomik analiz, hukuki düzenlemelerin işlem maliyetleri, teşvik yapıları ve toplumsal refah üzerindeki sonuçlarını sistematik biçimde değerlendirmeye imkân tanımaktadır. Özellikle sözleşme hukuku ve mülkiyet hakları alanında, hukuki kuralların etkinlik kriteri çerçevesinde ele alındığı görülmektedir (Shavell, 2004). Hukuki belirliliğin artması, ekonomik birimlerin öngörülebilirlik düzeyini yükselterek piyasa işlemlerinin daha düşük maliyetle gerçekleşmesini sağlamaktadır (Rekabet Kurumu, 2023). Hukukun ekonomik analizi, normatif ve pozitif bir inceleme yöntemi de sunmaktadır. Rekabet hukuku, düzenleyici hukuk ve haksız fiil sorumluluğu, ekonomik analiz yaklaşımının yoğun biçimde uygulandığı başlıca alanlar arasındadır(Posner, 2014). Yalnızca etkinlik ölçütüne dayalı değerlendirmelerin adalet ve hakkaniyet gibi hukuki değerleri ikinci plana itebileceği yönünde eleştiriler bulunmaktadır. Bu nedenle çağdaş çalışmalarda ekonomik analiz ile sosyal refah ve etik boyutların birlikte

değerlendirilmesi gerektiği vurgulanmaktadır (Cooter & Ulen, 2016). Hukukun ekonomik analizi, hukuki düzenlemelerin ekonomik ve toplumsal sonuçlarını anlamada güçlü bir analitik çerçeve sunmaktadır.

1.4. Hukuki Düzenlemenin Amacı: Piyasa Aksaklıkları

Dışsallıklar, tekel gücü ve bilgi asimetrisi gibi durumlar serbest piyasanın çözemediği aksaklıklar olup hukuki müdahaleleri gerekli kılar (Stiglitz, 1989). Dışsallıklar, tekel gücünün yoğunlaşması ve bilgi eksikliği gibi faktörler, serbest piyasa mekanizmasının kaynakları etkin biçimde tahsis etmesini engelleyen piyasa aksaklıkları arasında yer almaktadır. Bu tür aksaklıklar, bireysel kararların toplumsal maliyet ve faydaları tam olarak yansıtmamasına yol açmakta, refah kayıplarına neden olmaktadır (Stiglitz, 1989). Negatif dışsallıkların var olduğu durumlarda, piyasa fiyatları toplumsal maliyetleri içermediğinden hukuki düzenlemeler yoluyla düzeltici müdahaleler gerekli hâle gelmektedir. Tekelci yapıların ortaya çıkması rekabetçi baskıyı zayıflatarak fiyatların yapay olarak yükselmesine ve tüketici refahının azalmasına yol açar. Bilgi eksikliğinin olduğu piyasalarda taraflar arasındaki eşitsiz bilgi dağılımı, sözleşme ilişkilerinin etkinliğini azaltmakta ve piyasa başarısızlıklarını derinleştirmektedir. Bu bağlamda hukuki düzenlemeler, piyasa aksaklıklarını gidermeye yönelik kurumsal çerçeveyi oluşturarak ekonomik etkinlik ve sosyal refahın artırılmasına katkı sağlamaktadır.

2.YÖNTEM (METODOLOJİ)

Bu çalışma, hukuki düzenlemelerin ekonomik verimlilik üzerindeki etkilerini incelemek amacıyla nitel araştırma yöntemine dayalı kuramsal ve kavramsal bir analiz yürütmektedir. Araştırmada hukuk ve ekonomi literatüründe geliştirilen teorik yaklaşımlar sistematik biçimde değerlendirilmiştir. Bu kapsamda çalışma, betimleyici ve analitik bir metodoloji izlemektedir.Araştırmanın temel yöntemi, hukuk ve ekonomi literatüründe yer alan klasik ve çağdaş eserlerin karşılaştırmalı analizine dayanmaktadır. Pareto ve Kaldor–Hicks verimlilik ölçütleri, hukuki düzenlemelerin ekonomik sonuçlarını değerlendirmede analitik araçlar olarak ele alınmıştır. Mülkiyet hakları, sözleşme hukuku, haksız fiil sorumluluğu ve rekabet hukuku gibi temel hukuk alanları bu ölçütler ışığında incelenmiştir. Bu yaklaşım, hukuki normların yalnızca normatif yönlerini değil, aynı zamanda ekonomik aktörlerin davranışları üzerindeki teşvik etkilerini de ortaya koymayı amaçlamaktadır. Çalışmada ikincil veri kaynakları kullanılmış olup; uluslararası ve ulusal literatürde yer alan akademik makaleler, kitaplar ve raporlar temel veri setini oluşturmuştur. Literatür taraması sürecinde, hukukun ekonomik analizi yaklaşımının öncü isimleri ile düzenleme ekonomisi alanındaki temel çalışmalar esas alınmıştır. Bu sayede, hukuki düzenlemelerin verimlilik üzerindeki olumlu ve olumsuz etkileri çok boyutlu bir perspektifle ele alınmıştır.Metodolojik olarak, düzenleyici müdahalelerin ekonomik sonuçları incelenirken maliyet–fayda analizi mantığı esas alınmıştır. Aşırı düzenleme, düzenleyici yakalama ve hukuki belirsizlik gibi kavramlar, hukuki düzenlemelerin neden her zaman verimlilik artırıcı sonuçlar doğurmadığını açıklamak amacıyla analitik çerçeveye dâhil edilmiştir. Bu yönüyle çalışma, normatif bir değerlendirmeden ziyade, pozitif analiz ağırlıklı bir yaklaşım benimsemektedir.

3. LİTERATÜR İNCELEMESİ

Hukuki düzenlemelerin ekonomik verimlilik üzerindeki etkisi, hukuk ve ekonomi literatüründe tartışılan temel konulardan biridir. Bu literatür çalışması, hukukun yalnızca normatif bir düzenleme aracı olmadığını, aynı zamanda ekonomik birimlerin teşvik yapılarını şekillendiren kurumsal bir mekanizma olduğunu vurgulamaktadır. Hukukun ekonomik analizi yaklaşımı, hukuki kuralların kaynak tahsisi, işlem maliyetleri ve toplumsal refah üzerindeki etkilerini inceleyerek verimlilik odaklı bir değerlendirme sunmaktadır (Posner, 2014).Ekonomik literatürde mülkiyet haklarının açık ve güvenli biçimde tanımlanması, verimli piyasa işleyişinin ön koşullarından biri olarak kabul edilmektedir. Coase (1960), mülkiyet haklarının belirgin olduğu ve işlem maliyetlerinin düşük olduğu durumlarda, hukuki düzenlemelerin kaynak tahsisini doğrudan etkilemediğini ifade etmiştir. İşlem maliyetleri yükseldikçe hukuki çerçevenin verimlilik açısından kritik hâle geldiğini ileri sürmüştür. Hukuk, piyasa başarısızlıklarını telafi eden tamamlayıcı bir unsur olarak konumlandırılmaktadır. Literatür, hukuki müdahalelerin özellikle dışsallıklar, bilgi asimetrileri ve tekelci yapılar gibi piyasa aksaklıklarını gidermede önemli bir rol oynadığını ortaya koyduğunu göstermekredir. Etkin biçimde tasarlanmış düzenlemeler, özel maliyetler ile sosyal maliyetler arasındaki farkı azaltarak ekonomik etkinliği artırır (Stiglitz, 1989). Aşırı veya hatalı düzenlemelerin, uyum maliyetlerini artırarak verimlilik kayıplarına yol açabileceği de literatürde vurgulanmaktadır. Hukuki düzenlemelerin verimlilik üzerindeki etkisi, normların içeriğine ve uygulanma kapasitesine de bağlıdır. North (1990), kurumsal yapıların etkinliğinin, resmi kurallar kadar bu kuralların uygulanmasını sağlayan yaptırım mekanizmalarına bağlı olduğunu belirtmektedir. Zayıf uygulama ve denetim, hukuki belirsizliği artırarak ekonomik aktörlerin rasyonel karar alma süreçlerini olumsuz etkileyebilir. Literatür çaşlışmasında, hukuki düzenlemelerin ekonomik verimlilik açısından çift yönlü bir etkiye sahip olduğunu göstermektedir. Etkin ve öngörülebilir bir hukuki çerçeve, işlem maliyetlerini azaltarak yatırımı ve üretkenliği teşvik etmektedir.Tutarsız ve maliyetli düzenlemeler ekonomik performansı zayıflatabilmektedir. Bu nedenle hukuk politikalarının tasarımında ekonomik analiz yöntemlerinin kullanılması, literatürde geniş ölçüde kabul gören bir yaklaşım olarak öne çıkmaktadır (Ogus, 2004).

Türkiye literatüründe ise; hukuki düzenlemelerin ekonomik verimlilik üzerindeki etkisi, hukuk ve ekonomi yaklaşımı çerçevesinde ele alınmaktadır. Hukukun yalnızca normatif bir düzenleme aracı olmadığı, ekonomik aktörlerin davranışlarını ve teşvik yapılarını da şekillendiren kurumsal bir mekanizma olduğu vurgulanmaktadır (Baykal, 2020). Düzenleyici hukuk bağlamında yapılan çalışmalar, hukuki müdahalelerin piyasa aksaklıklarını gidermede önemli bir rol oynadığını; ancak bu müdahalelerin maliyet–fayda analiziyle desteklenmediği durumlarda verimlilik kayıplarına yol açabileceğini ortaya koymaktadır (Uğur, 2012; Polat, 2016). Mülkiyet haklarının korunması ve sözleşmelerin icra edilebilirliğinin sağlanması, kaynakların etkin tahsisini kolaylaştırarak ekonomik etkinliği artırmaktadır (Kaya, 2019). Refah ekonomisi perspektifinden bakıldığında ise Pareto ve Kaldor–Hicks verimlilik ölçütlerinin, hukuki düzenlemelerin ekonomik sonuçlarının değerlendirilmesinde analitik bir çerçeve sunduğu ifade edilmektedir (Demir & Yıldız, 2017). Rekabet hukuku alanındaki Türkçe çalışmalar da piyasa gücünün sınırlandırılmasının, tüketici refahı ve dinamik verimlilik açısından olumlu sonuçlar doğurduğunu göstermektedir (Öztürk, 2020).

4. HUKUKİ DÜZENLEMELERİN VERİMLİLİK ÜZERİNDEKİ ROLÜ

4.1. Mülkiyet Hakları ve İşlem Maliyetleri

Mülkiyet hakkı, bireyin sahip olduğu mal ve değerler üzerinde serbestçe tasarrufta bulunabilmesini ifade eden temel bir haktır. Bu hak yalnızca ekonomik bir değer olmayıp, aynı zamanda bireyin kişisel özgürlüğü, insan onuru ve hukuk güvenliğiyle doğrudan ilişkilidir. Modern hukuk devletlerinde mülkiyet hakkının korunması, devletin temel yükümlülüklerinden biri olarak kabul edilmektedir. Mülkiyet haklarının güvenilirliği yatırım kararlarını doğrudan etkiler; güvenli bir hukuki ortam kaynak tahsisini daha verimli hâle getirir (Ardıyok, 2008).Coase Teoremi işlem maliyetlerinin düşük olduğu varsayımında tarafların pazarlık yoluyla verimli çözüme ulaşabileceğini belirtir; ancak işlem maliyetlerinin yüksek olduğu gerçek hayatta hukuki düzenlemeler zorunludur (Coase, 1960).

4.2. Sözleşme Hukuku ve Ticari Güven

Sözleşmelerin icra edilebilirliği ticari ilişkilerde öngörülebilirlik ve güven sağlar (Cooter & Ulen, 2016).Etkin ihlal teorisine göre sözleşme ihlali bazı durumlarda toplumsal refahı artırabilir (Posner, 2007). Sözleşmelerin icra edilebilirliği ve haksız fiil hukukunun caydırıcılık işlevi, hukuk devletinin ve piyasa ekonomisinin sağlıklı işleyişi açısından vazgeçilmez öneme sahiptir. Sözleşmelerin bağlayıcılığının güvence altına alındığı ve haksız fiil sorumluluğunun etkin biçimde uygulandığı bir hukuk düzeni, bireylerin hukuka olan güvenini artırmaktadır. Ekonomik birimlerin toplumsal refahın sürdürülebilirliğine katkı sağlamaktadır Haksız fiil sorumluluğu, hukuka aykırı bir fiil sonucu başkasına zarar veren kişinin bu zararı gidermekle yükümlü tutulmasını ifade eder. Bu sorumluluk türü, kusura dayalı sorumluluk esasına dayanmakla birlikte, bazı hâllerde kusursuz sorumluluk rejimleri de kabul edilmiştir.

4.3. Haksız Fiil Hukuku ve Risk Yönetimi

Haksız fiil hukuku, caydırıcılık mekanizmasıyla aktörleri topluma zarar veren davranışlardan uzaklaştırır (Calabresi, 1970). Bu sayede sosyal maliyetler düşer. K aynak tahsisi daha verimli hâle gelir. Haksız fiil hukuku, ekonomik analiz perspektifinden bakıldığında, bireylerin ve kurumların faaliyetlerinden doğan zarar risklerini içselleştirmelerini sağlayan düzenleme alanıdır. Bu hukuk dalı, caydırıcılık işlevi aracılığıyla, aktörleri topluma zarar veren davranışlardan uzaklaştırmayı amaçlar (Calabresi, 1970). Zarar veren fiillerin hukuki yaptırımlarla karşılanması, potansiyel birim açısından beklenen maliyetleri artırarak riskli davranışların azalmasına katkıda bulunur. Bu mekanizma sayesinde, sosyal maliyetlerin minimize edilmesi ve ekonomik etkinliğin artırılması mümkün hâle gelir. Haksız fiil sorumluluğu, zararların kimin tarafından ve hangi ölçüde üstlenileceğini belirleyerek riskin optimal dağılımını teşvik eder. Bu durum, bireylerin önlem alma düzeylerini rasyonel biçimde ayarlamalarına olanak tanır (Shavell, 1987). Özen yükümlülüğünün ihlali hâlinde sorumluluk doğması, önleyici yatırımların artmasını teşvik eder. Böylelikle, kazaların ve zararların gerçekleşme olasılığı düşerken toplam toplumsal refah yükselir. Haksız fiil hukuku, zarar sonrası telafi mekanizması ile beraber zarar öncesi davranışları şekillendiren bir risk yönetimi aracıdır. Etkin işleyen bir haksız fiil rejimi, hem caydırıcılık hem de risk paylaşımı yoluyla kaynak tahsisini daha verimli hâle getirmektedir (Posner, 2014).

5. DÜZENLEME TÜRLERİNİN VERİMLİLİK ANALİZİ

5.1. Rekabet Hukuku Düzenlemeleri

Rekabet hukuku, tekel gücünü sınırlandırarak tüketici refahını artırır (Ardıyok, 2008). Rekabetçi piyasalar inovasyonu ve dinamik verimliliği destekler (Tirole, 2017) Rekabet, piyasa aktörlerinin mal ve hizmet sunumu sırasında birbirleriyle özgürce yarışabilmesini ifade eder. Klasik iktisat teorisine göre rekabet, görünmez el mekanizması aracılığıyla toplumsal refahı maksimize eden bir işlev görür. Neoklasik iktisat yaklaşımı ise rekabeti, marjinal maliyet ile fiyatın eşitlendiği etkin piyasa koşullarının sağlanmasıyla ilişkilendirmektedir. Rekabet hukuku düzenlemeleri, özellikle tekelci ve oligopolistik piyasa yapılarında piyasa gücünün sınırlandırılması yoluyla dengeleyici bir işlev üstlenmektedir (Motta, 2004; Carlton & Perloff, 2015). Gelir dağılımı ve sosyal refah açısından bakıldığında; tekelci yapıların ve piyasa gücü yoğunlaşmasının önlenmesi, gelir dağılımındaki bozulmaların sınırlandırılmasına katkı sağlamaktadır. Bu yönüyle rekabet hukuku, sosyal refah devletinin dolaylı araçlarından biri olarak da değerlendirilebilir. Fiyat oluşumu ve tüketici refahı açısından ise rekabetin etkin olduğu piyasalarda fiyatlar, maliyetlere daha yakın düzeylerde oluşmakta ve tüketici refahı artmaktadır. Rekabet hukukunun etkin uygulanmadığı piyasalarda ise fiyatların yapay biçimde yükseldiği ve tüketici aleyhine sonuçlar doğduğu gözlemlenmektedir.

Kartel anlaşmalarının yasaklanması ve hâkim durumun kötüye kullanılmasının önlenmesine yönelik müdahaleler, firmalar arasında rekabetçi baskının sürdürülmesini sağlayarak kaynakların daha etkin tahsis edilmesine katkıda bulunmaktadır. Bu çerçevede rekabet hukuku, piyasa aksaklıklarının giderilmesine yönelik tamamlayıcı bir politika aracı olarak değerlendirilmektedir. Rekabetin etkin biçimde işlediği piyasalarda fiyatların marjinal maliyetlere daha yakın düzeylerde oluştuğu ve bunun tüketici refahını artırdığı kabul edilmektedir (Varian, 2019). Buna karşılık, rekabet hukukunun yetersiz uygulandığı veya piyasa gücünün yoğunlaştığı durumlarda firmaların fiyatları rekabetçi seviyelerin üzerine çıkardığı ve tüketici aleyhine refah kayıplarının ortaya çıktığı gözlemlenmektedir. Rekabet hukuku düzenlemeleri, yalnızca hukuki bir denetim mekanizması olmanın ötesinde, ekonomik sistemin işleyişini doğrudan etkileyen temel politika araçları arasında yer almaktadır. Etkin bir rekabet hukuku rejimi, piyasalarda verimliliği artırmakta, tüketici refahını korumakta ve sürdürülebilir ekonomik büyümeye katkı sağlamaktadır. Bu nedenle rekabet politikalarının tasarım ve uygulanma süreçlerinde, hukuki ilkeler ile ekonomik analizlerin birlikte değerlendirilmesi büyük önem taşımaktadır. Hukuk ve ekonomi arasındaki bu etkileşim, rekabet hukukunu modern piyasa ekonomilerinin vazgeçilmez unsurlarından biri hâline getirmektedir.

5.2. Çevre, Sağlık ve Güvenlik Düzenlemeleri

Dışsallıkların içselleştirilmesini sağlayan çevresel düzenlemeler sosyal maliyetlerin azalmasına katkı sağlar (Coase, 1960). Sağlık ve güvenlik alanındaki düzenlemeler iş kazalarını ve ekonomik kayıpları azaltarak verimliliği artırır (Ogus, 2004). Çevre, sağlık ve güvenlik düzenlemeleri, piyasa mekanizmasının tek başına çözemediği dışsallıkları gidermeyi amaçlayan temel kamu politikası araçlarıdır. Özellikle çevresel düzenlemeler, üretim ve tüketim faaliyetlerinden kaynaklanan olumsuz dışsallıkların fail tarafından üstlenilmesini sağlayarak toplumsal maliyetlerin azaltılmasına katkıda bulunur. Bu bağlamda, çevre hukukunun temel işlevlerinden biri, çevresel zararların ekonomik karar alma süreçlerine dâhil

edilmesini sağlamaktır (Coase, 1960). Sağlık alanındaki düzenlemeler ise bireylerin maruz kaldığı riskleri azaltarak iş gücünün korunmasını ve beşerî sermayenin sürdürülebilirliğini destekler. İş sağlığı ve güvenliği mevzuatı, iş kazaları ve meslek hastalıklarının önlenmesi yoluyla üretim süreçlerinde kesintilerin azalmasına katkı sağlar. Bu tür düzenlemeler, yalnızca bireysel refahı değil, aynı zamanda işletmelerin uzun vadeli verimliliğini de olumlu yönde etkiler. Risklerin azaltılması, sigorta maliyetlerinin ve tazminat yüklerinin düşmesine imkân tanır. Böylece ekonomik birimler, daha öngörülebilir bir faaliyet ortamında karar alabilir. Etkin biçimde tasarlanmış çevre, sağlık ve güvenlik düzenlemeleri, düzenleme maliyetleri ile sağlanan toplumsal faydalar arasında bir denge kurulmasını gerektirir. Bu alanlardaki hukuki müdahaleler, ekonomik etkinliği artırırken toplumsal refahın korunmasına önemli katkılar sunmaktadır (Ogus, 2004).

6. VERİMSİZ DÜZENLEMELER VE MALİYETLERİ

Düzenlemeler, piyasa aksaklıklarını gidermek ve toplumsal refahı artırmak amacıyla uygulanmaktadır. Tasarım ve uygulama süreçlerindeki hatalar nedeniyle beklenen etkinlik her zaman sağlayamayabilir. Düzenleyici çerçevenin etkisiz veya öngörülemez biçimde tasarlanması, ekonomik birimlerin karar alma süreçlerini olumsuz etkileyecektir. Bu durum kaynak tahsisinde verimsizlik yaratmaktadır (Baldwin, Cave & Lodge, 2012; Ogus, 2004). Bu açıdan aşırı düzenleme, düzenleyici yakalama ve hukuki belirsizlik gibi unsurlar rekabetçi piyasa yapısını zayıflatmaktadır. Ekonomik büyüme, inovasyon kapasitesi ve yatırım ortamı üzerinde önemli maliyetler doğurmaktadır (Stigler, 1971; Tirole, 2017; Ulusoy, 2020).

6.1. Aşırı Düzenleme

Aşırı düzenlemeler, uyum maliyetlerini artırarak firmaların rekabet gücünü zayıflatmakta ve piyasa etkinliğini olumsuz etkilemektedir (Ogus, 2004). Aşırı düzenleme, piyasa aktörleri üzerinde gereğinden fazla bürokratik yük oluşturarak idari ve operasyonel maliyetlerin artmasına yol açmaktadır. Karmaşık raporlama yükümlülükleri, sık değiştirilen mevzuat hükümleri ve uzun onay süreçleri, küçük ve orta ölçekli işletmeler açısından önemli giriş ve faaliyet engelleri yaratmaktadır. Bu durum, piyasalarda yoğunlaşmayı artırarak rekabetin azalmasına neden olabilmektedir. Ogus (2004), aşırı düzenlemenin yalnızca doğrudan idari maliyetleri değil, fırsat maliyetlerini de yükselttiğini ve piyasa dinamizmini zayıflattığını vurgulamaktadır. Hahn ve Sunstein (2002) ise aşırı regülasyonun maliyet–fayda analizlerinde sistematik yanlılıklara yol açarak düzenleme tercihlerinin ekonomik rasyonalite temelinden uzaklaşmasına neden olduğunu belirtmektedir. Düzenleyici belirsizliğin artması, firmaların uzun vadeli yatırım kararlarını ertelemesine yol açabilmektedir. Bu tür bir ortamda yenilikçi faaliyetlerin teşvik edilmesi zorlaşmakta ve Ar-Ge yatırımları sınırlanmaktadır. Aşırı düzenleme, girişimcilik faaliyetlerini baskılayarak yeni firmaların piyasaya girişini zorlaştırmaktadır. Orantısız ve karmaşık düzenleyici çerçeveler, ekonomik büyüme ve uluslararası rekabet gücü üzerinde olumsuz etkiler yaratmaktadır.

6.2. Düzenleyici Yakalama

Düzenleyici kurumların çıkar grupları tarafından etkilenmesi kamu yararına aykırı sonuçlar doğurur (Tirole, 2017). Düzenleyici yakalama, düzenleyici kurumların zamanla düzenledikleri sektörlerin etkisi altına girmesiyle kamu yararına aykırı sonuçlar doğurur. Bilgi eksiklikleri,

sektörle yakın ilişkiler ve politika süreçlerindeki baskılar bu sorunu derinleştirir. Tirole (2017), yakalanmış kurumların düzenlemeleri kamu yararı yerine belirli çıkar gruplarının talepleri doğrultusunda şekillendirdiğini ifade etmiştir. Stigler (1971) ise düzenleyici yakalamanın rekabeti bozarak tüketici refahını azalttığını vurgular. Bu durum, piyasa girişlerinin kısıtlanmasına ve kaynakların verimsiz bir şekilde tahsis edilmesine yol açar.

6.3. Hukuki Belirsizlik

Öngörülemez hukuki düzenlemeler yatırımcı güvenini sarsarak ekonomik büyümeyi olumsuz etkiler (Ulusoy, 2020). Hukuki belirsizlik, yatırımcıların geleceğe yönelik risk algısını artırarak uzun vadeli ekonomik kararları olumsuz etkiler. Normlar arasındaki uyumsuzluklar, sık düzenleme değişiklikleri ve keyfî uygulamalar ekonomik ortamda öngörülemezlik yaratır. Ulusoy (2020), hukuki belirsizliğin yatırım ortamını zayıflatıp ekonomik büyümeyi baskıladığını belirtirken, Baldwin, Cave ve Lodge (2012) düzenleyici istikrarın kurumsal güven için kritik önem taşıdığını ifade eder. Bu bağlamda hukuki belirsizlik, sermaye girişlerini sınırlayan, yatırımları erteleyen ve verimlilik artışlarını engelleyen bir unsur olarak ortaya çıkar.

7. SONUÇ VE ÖNERİLER

Bu çalışma, hukuki düzenlemelerin ekonomik verimlilik üzerindeki rolünü hukuk ve ekonomi perspektifinden ele alarak, hukukun yalnızca normatif bir sistem değil ekonomik sonuçlar da doğuran kurumsal bir yapı olduğunu ortaya koymuştur. Ekonomik verimlilik, kıt kaynakların toplumsal refahı en üst düzeye çıkaracak biçimde tahsis edilmesini gerektirmektedir. Bu sürecin sağlıklı işlemesi büyük ölçüde hukuki çerçevenin niteliğine bağlıdır. Çalışmada incelenen Pareto ve Kaldor–Hicks verimliliği kriterleri, hukuki düzenlemelerin ekonomik sonuçlarının değerlendirilmesinde önemli analitik araçlar sunmaktadır. Kaldor–Hicks yaklaşımı, hukuki ve düzenleyici müdahalelerin kaçınılmaz olarak kazananlar ve kaybedenler yarattığı gerçeğini dikkate alarak politika analizlerinde daha uygulanabilir bir çerçeve sağlamaktadır.

Mülkiyet haklarının güvence altına alınması, sözleşmelerin etkin biçimde icra edilebilir olması ve haksız fiil hukukunun caydırıcı bir yapıya sahip olması, ekonomik birimlerin davranışlarını rasyonel biçimde yönlendiren temel unsurlar arasında yer almaktadır. Bu kurumsal yapılar, işlem maliyetlerini azaltarak piyasa işlemlerinin daha öngörülebilir ve düşük maliyetli biçimde gerçekleşmesine katkı sağlamaktadır. Rekabet hukuku düzenlemelerinin piyasa gücünü sınırlaması statik ve dinamik verimlilik açısından önemli kazanımlar yaratmaktadır. Çevre, sağlık ve güvenlik alanındaki düzenlemeler, dışsallıkların içselleştirilmesi yoluyla sosyal maliyetlerin azaltılmasına katkıda bulunmaktadır.

Çalışma, hukuki düzenlemelerin her durumda verimlilik artırıcı sonuçlar doğurmadığını da ortaya koymaktadır. Aşırı düzenleme, düzenleyici yakalama ve hukuki belirsizlik gibi olgular, ekonomik aktörlerin teşvik yapılarını bozarak kaynak tahsisinde ciddi verimsizliklere yol açabilmektedir. Bu nedenle hukuki düzenlemelerin tasarımında maliyet–fayda analizinin sistematik biçimde kullanılması büyük önem taşımaktadır. Hukukun ekonomik analizi yaklaşımı, bu noktada düzenlemelerin toplumsal refah üzerindeki etkilerini ölçmeye imkân tanıyan güçlü bir metodolojik çerçeve sunmaktadır. Hukuki düzenlemeler ekonomik verimliliğin sağlanmasında temel rol oynar; ancak düzenlemelerin tasarımında maliyet–fayda

analizi dikkate alınmalı, aşırı düzenleme, düzenleyici yakalama ve hukuki belirsizlikten kaçınılmalıdır (Ogus, 2004; Posner, 2007; Tirole, 2017).Verimliliği artırmak için mülkiyet haklarının güçlendirilmesi, etkin sözleşme hukuku, rekabetçi piyasa yapısı ve dışsallıkları hedefleyen düzenlemeler hayati önem taşır.

Sonuç olarak; hukuki düzenlemeler ekonomik verimliliğin ön koşulu ve belirleyicisidir. Etkin, öngörülebilir ve istikrarlı bir hukuki çerçeve; yatırım ortamını güçlendirmekte, ekonomik büyümeyi desteklemekte ve toplumsal refahın artırılmasına katkı sağlamaktadır. Gelecekte yapılacak çalışmalarda, hukuki düzenlemelerin sektörel bazda ve ampirik yöntemlerle incelenmesi, hukuk ve ekonomi literatürüne önemli katkılar sunacaktır. Bu bağlamda, verimlilik odaklı ancak adalet ve hakkaniyet ilkelerini de gözeten dengeli bir düzenleme yaklaşımı, sürdürülebilir ekonomik kalkınmanın temel unsurlarından biri olarak karşımıza çıkmaktadır.

8. GENEL DEĞERLENDİRME VE SONUÇLAR

Bu bildiri ile, hukuki düzenlemelerin ekonomik verimlilik üzerindeki etkisini hukuk ve ekonomi yaklaşımı çerçevesinde ele almaya çalışılmıştır. Hukukun ekonomik sistem içerisindeki kurumsal işlevini analiz etmeyi amaçlamıştır. Çalışma kapsamında yapılan değerlendirmeler, hukuki düzenlemelerin yalnızca normatif kurallar bütünü olarak değil, aynı zamanda ekonomik aktörlerin davranışlarını ve teşvik yapılarını şekillendiren temel bir kurumsal mekanizma olarak işlev gördüğünü ortaya koymaktadır. Ekonomik verimliliğin sağlanmasında mülkiyet haklarının güvenli biçimde tanımlanması, sözleşmelerin etkin şekilde icra edilebilir olması ve haksız fiil hukukunun caydırıcı bir yapıya sahip olmasının belirleyici unsurlar arasında yer aldığını göstermektedir. Bu hukuki yapıların, işlem maliyetlerini azaltarak piyasa işlemlerinin öngörülebilirliğini artırdığı ve kaynak tahsisinin daha etkin gerçekleşmesine katkı sağladığı tespit edilmiştir. Rekabet hukuku düzenlemelerinin ise piyasa gücünü sınırlandırarak statik ve dinamik verimlilik üzerinde olumlu etkiler yarattığı değerlendirilmektedir.Bildiri kapsamında ele alınan Pareto ve Kaldor–Hicks verimlilik ölçütleri, hukuki düzenlemelerin ekonomik sonuçlarının değerlendirilmesinde tamamlayıcı analitik araçlar sunmaktadır. Pareto ölçütü teorik açıdan güçlü bir referans noktası oluşturmakla birlikte, uygulamadaki sınırlılıkları nedeniyle düzenleyici müdahalelerin analizinde yetersiz kalmaktadır. Buna karşılık Kaldor–Hicks yaklaşımı, düzenleyici kararların kaçınılmaz olarak kazananlar ve kaybedenler yarattığı gerçeğini dikkate alarak politika analizlerinde daha işlevsel bir çerçeve sunmaktadır.Bununla birlikte çalışma, hukuki düzenlemelerin her durumda verimlilik artırıcı sonuçlar doğurmadığını da ortaya koymaktadır. Aşırı düzenleme, düzenleyici yakalama ve hukuki belirsizlik gibi olgular, ekonomik aktörlerin teşvik yapılarını bozarak kaynak tahsisinde verimsizliklere yol açabilmektedir. Bu durum, düzenleyici müdahalelerin tasarım ve uygulanma süreçlerinde maliyet–fayda analizinin sistematik biçimde kullanılmasının gerekliliğini ortaya koymaktadır.

FİNANSAL DİNAMİKLER VE TEKNOLOJİK GELİŞMENİN GELİR DAĞILIMINI ŞEKİLLENDİREN ROLÜ: TÜRKİYE'DEN UZUN VE KISA DÖNEM KANITLAR

Doç. Dr. Ömer Uğur BULUT
Kafkas Üniversitesi / İktisadi ve İdari Bilimler Fakültesi,
bulut.o.u@gmail.com - https://orcid.org/0000-0002-6511-8187

ÖZET

Türkiye'de gelir dağılımının nasıl şekillendiğini anlamak amacıyla bu çalışma, finansal istikrarsızlık (finansal baskı endeksi), finansal gelişme (geniş tanımlı para arzı), küresel finansal entegrasyon (finansal küreselleşme endeksi) ve teknolojik yeniliklerin (patent başvuruları) gelir eşitsizliği üzerindeki etkilerini bütüncül bir çerçevede değerlendirmektedir. Gelir eşitsizliği Gini katsayısı ile ölçülmüş ve 1987–2021 dönemine ait yıllık veriler ARDL modeli kapsamında analiz edilmiştir. Bulgular, gelir eşitsizliği ile finansal baskı, para arzı, finansal küreselleşme ve patent başvuruları arasında güçlü ve istatistiksel olarak anlamlı bir uzun dönem ilişkisi bulunduğunu göstermektedir. Uzun dönem sonuçlarına göre finansal istikrarsızlık ve küresel finansal entegrasyon gelir eşitsizliğini artırırken; finansal gelişmeyi temsilen kullanılan para arzı eşitsizliği azaltıcı bir mekanizma sunmaktadır. Bu durum, Türkiye'de finansal piyasaların yapısının ve küresel finansal entegrasyon düzeyinin gelir dağılımını doğrudan şekillendirdiğini, buna karşılık para arzının ekonomik bir tampon görevi görebildiğini göstermektedir. Teknolojik yeniliklerin pozitif katsayısı, Türkiye'de inovasyonun henüz kapsayıcı bir ekonomik yapı oluşturmadığını ortaya koymaktadır. Kısa dönem sonuçları, finansal şokların gelir dağılımı üzerinde hızlı ve belirgin etkiler yarattığını; ancak bu etkilerin kalıcı olmadığını göstermektedir. Sonuçlar doğrultusunda makro ihtiyati çerçevenin güçlendirilmesi, spekülatif baskı dönemlerinde düzenleyici tedbirlerin artırılması, küresel sermaye hareketlerinin etkin yönetilmesi ve teknolojik gelişmenin kapsayıcı biçimde teşvik edilmesi önerilmektedir. Elde edilen bulgular, Birleşmiş Milletler Sürdürülebilir Kalkınma Amaçları'ndan SDG 10 (Eşitsizliklerin Azaltılması) ile uyumludur. Finansal istikrarsızlık ve küresel finansal entegrasyonun eşitsizliği artırıcı etkileri, finansal kırılganlıkların önemini ortaya koymaktadır. Buna karşılık, finansal gelişmenin para arzı kanalıyla eşitsizliği azaltıcı bir mekanizma sunması, kapsayıcı ve istikrarlı para politikalarının SDG 10 hedeflerine ulaşmada kritik bir rol oynayabileceğine işaret etmektedir.

ABSTRACT

This study examines how income distribution in Türkiye is shaped by financial instability (financial pressure index), financial development (broad money supply), global financial integration (financial globalization index), and technological innovation (patent applications) within a comprehensive analytical framework. Income inequality is measured using the Gini coefficient, and annual data for the period 1987–2021 are analyzed using the ARDL approach. The findings reveal a strong and statistically significant long-run relationship between income inequality and financial pressure, broad money supply, financial globalization, and patent applications. According to the long-run results, financial instability and global financial integration increase income inequality, whereas broad money supply, representing financial development, functions as an inequality-reducing mechanism. This indicates that the structure of Türkiye's financial markets and the degree of global financial integration directly shape income distribution, while monetary expansion can serve as an economic buffer. The positive coefficient of technological innovation suggests that innovation in Türkiye has not yet evolved into an inclusive economic structure. Short-run results indicate that financial shocks generate rapid and pronounced effects on income distribution; however, these effects are not persistent. Based on these findings, strengthening the macroprudential framework, increasing regulatory measures during periods of speculative pressure, effectively managing global capital flows, and promoting inclusive technological development are recommended. The results are consistent with the United Nations Sustainable Development Goal 10 (Reduced Inequalities). While financial instability and global financial integration intensify inequality through heightened financial vulnerabilities, financial development via the monetary channel highlights the critical role of inclusive and stable monetary policies in achieving SDG 10 objectives.

Keywords: Income Inequality, Financial Pressure, Financial Development, Global Financial Integration, Sustainable Development

1. GİRİŞ

Gelir dağılımı, ekonomik büyüme, sosyal refah ve politik istikrar açısından kritik bir belirleyici olması nedeniyle hem gelişmiş hem de gelişmekte olan ülkelerde politika tartışmalarının merkezinde yer almaktadır. Gelir eşitsizliğinin yüksek olduğu ekonomilerde tüketim eğilimlerinin zayıflaması, tasarruf–yatırım dengesinin bozulması ve toplumsal kırılganlıkların artması gibi çok yönlü etkiler ortaya çıkmaktadır (Laborda & Suárez, 2024). Bu nedenle gelir dağılımını etkileyen makroekonomik ve finansal unsurların bütüncül biçimde analiz edilmesi, özellikle dönüşüm sürecindeki ekonomiler için büyük önem taşımaktadır. Finansal baskı ve piyasa oynaklığı, sermaye hareketlerinin hızla yön değiştirmesi ve para piyasalarındaki daralmalar gibi unsurlar, ekonomik birimlerin gelir düzeyini kısa sürede etkileyebilmekte; uzun dönemde ise yapısal eşitsizlik mekanizmalarını güçlendirebilmektedir (Aghion & Bolton, 1997; Rajan & Zingales, 2003).

Türkiye özelinde incelendiğinde, 1980 sonrası dönemde finansal serbestleşme, sermaye hareketlerinin serbest dolaşımı ve küresel entegrasyon süreçleri, ekonomik yapıyı köklü biçimde dönüştürmüştür. Bu dönüşüm, gelir dağılımının hem düzeyini hem de zaman içindeki değişim hızını önemli ölçüde etkilemiştir (Öniş & Şenses, 2005). Dolayısıyla Türkiye'de gelir eşitsizliğinin dinamiklerini anlamak, bu yapısal dönüşüm süreçlerinin hangi mekanizmalar üzerinden etkide bulunduğunu incelemeyi gerektirmektedir. Bu mekanizmalardan ilki finansal istikrarsızlıktır. Finansal baskı ve piyasa volatilitesi, ekonomik belirsizliği artırarak özellikle düşük ve orta gelir gruplarının ekonomik konumunu olumsuz etkilemektedir. Finansal piyasalardaki daralmalar, kredi maliyetlerinin yükselmesi ve sermaye kaçışları gibi unsurlar, gelir eşitsizliğini artırıcı bir yapı oluşturmaktadır (Kumar & Dash, 2024). Bu çerçevede finansal istikrarsızlık, gelir dağılımını doğrudan etkileyen en kırılgan kanallardan biri olarak öne çıkmakta ve Türkiye gibi finansal piyasaları dış şoklara duyarlı ülkelerde daha belirgin sonuçlar yaratmaktadır.

Finansal istikrarsızlığın yanında finansal gelişme de gelir eşitsizliği açısından kritik bir rol üstlenmektedir. Geniş para arzı, kredi hacmi ve finansal aracılık mekanizmalarının derinleşmesi gibi unsurlar, ekonomik fırsatlara erişimi artırarak eşitsizliği azaltabilir (Beck vd., 2007). Ancak bazı çalışmalarda finansal gelişmenin varlık sahipleri lehine işleyerek gelir farklarını artırdığı da belirtilmektedir (Greenwood & Jovanovic, 1990). Bu durum, finansal sistemin eşitsizlik üzerindeki etkisinin tek yönlü olmadığını ve ekonomik yapı ile düzenleyici çerçevenin niteliğine bağlı olarak farklı sonuçlar doğurabileceğini göstermektedir. Finansallaşma eğilimine ek olarak küresel ekonomik bağlılık gelir eşitsizliğinin şekillenmesinde önemli bir kanaldır. Finansal küreselleşme, sermaye akımlarının hızlanması ve finansal entegrasyonun artmasıyla birlikte ekonomik kazançların belirli gruplarda yoğunlaşmasına yol açabilmektedir (Jaumotte vd., 2013). Bu nedenle küresel entegrasyonun eşitsizlik üzerindeki etkisini doğru şekilde anlamak, özellikle sermaye hareketlerine duyarlı ekonomiler açısından kritik bir araştırma alanıdır.

Gelir dağılımını etkileyen bir diğer önemli unsur ise teknolojik yeniliktir. Teknolojik gelişme, üretim süreçlerinde nitelikli işgücüne olan talebi artırarak ücret farklılıklarını genişletebilmekte; bu durum gelişmekte olan ülkelerde eşitsizliği daha da

derinleştirebilmektedir (Autor, 2015). Dolayısıyla teknolojik yeniliğin eşitsizlik üzerindeki etkisi, Türkiye gibi teknoloji ithal eden ve dijital dönüşümü hızla yaşayan ülkelerde daha da dikkat çekici bir araştırma konusu hâline gelmiştir.

Tüm bu unsurlar birlikte değerlendirildiğinde, Türkiye'de gelir dağılımının finansal dinamikler, küresel finansal entegrasyon ve teknolojik yeniliklerle karmaşık bir etkileşim içinde olduğu anlaşılmaktadır. Literatürde bu faktörlerin tek tek gelir eşitsizliği üzerindeki etkilerini inceleyen çalışmalar bulunsa da (Asteriou et al., 2014; Demirgüç-Kunt & Levine, 2009), uzun ve kısa dönem dinamiklerini eşzamanlı olarak değerlendiren kapsamlı analizler sınırlıdır. Bu nedenle, söz konusu değişkenlerin birlikte ele alındığı bütüncül bir çerçeve, politika yapıcıların gelir eşitsizliğini azaltmaya yönelik araçlarını tasarlarken hangi finansal ve teknolojik kanalların daha etkili olduğunu anlamaları açısından büyük önem taşımaktadır. Türkiye gibi finansal oynaklığa duyarlı, küresel sermaye hareketleriyle yakından ilişkili ve teknolojik dönüşüm süreci devam eden ülkelerde, gelir eşitsizliğini etkileyen bu mekanizmaların doğru şekilde tanımlanması, uygulanacak ekonomi politikalarının başarısı açısından kritik bir ön koşuldur.

Çalışma, finansal baskı, finansal gelişme, küresel finansal entegrasyon ve teknolojik yeniliklerin gelir eşitsizliği üzerindeki etkilerini Gecikmesi Dağıtılmış Otoregresif (ARDL) modeliyle analiz ederek, ekonomi politikası tasarımında hangi değişkenlerin daha etkin politika kaldıraçları sunduğunu belirlemeye yardımcı olmaktadır.

Bu yaklaşım aynı zamanda gelir eşitsizliğini, Birleşmiş Milletler Sürdürülebilir Kalkınma Amaçları arasında yer alan SDG 10 – Eşitsizliklerin Azaltılması hedefi çerçevesinde değerlendirmeye imkân tanımaktadır. SDG 10, ekonomik büyümenin tek başına yeterli olmadığını; finansal, parasal ve teknolojik dönüşümlerin toplumun farklı kesimleri üzerindeki dağıtımsal etkilerinin politika tasarımının merkezine alınması gerektiğini vurgulamaktadır (Bhandari, 2024). Bu bağlamda finansal baskı, finansal gelişme, küresel finansal entegrasyon ve teknolojik yenilik gibi makroekonomik dinamikler, gelir eşitsizliğini derinleştirebilecek ya da dengeleyebilecek temel kanallar olarak öne çıkmaktadır. Dolayısıyla gelir eşitsizliğinin bu değişkenlerle birlikte analiz edilmesi, SDG 10'un öngördüğü kapsayıcı, dayanıklı ve adil büyüme hedeflerinin ne ölçüde desteklendiğini ampirik olarak değerlendirmeye olanak sağlamaktadır.

2. KAVRAMSAL ÇERÇEVE/TEORİK ALTYAPI VE LİTERATÜR BOŞLUĞU

Gelir dağılımını belirleyen dinamikleri anlamak, yalnızca makroekonomik göstergelerin izlenmesini değil, aynı zamanda finansal derinleşme, spekülatif baskı, teknolojik dönüşüm ve küresel entegrasyon gibi yapısal unsurların ekonomi üzerindeki etkilerinin teorik çerçevede değerlendirilmesini gerektirir. Bu nedenle kavramsal çerçeve, finansal baskı mekanizmalarının işleyişinden finansal ve teknolojik Kuznets eğrilerine, finansal gelişme teorilerinden McKinnon ve Shaw'ın finansal liberalizasyon yaklaşımına uzanan geniş bir literatüre dayanmaktadır. Amaç, Türkiye'de gelir eşitsizliğini belirleyen temel kanalların teorik olarak nasıl ortaya çıktığını açıklamak ve ampirik bulguların yorumlanmasına sağlam bir temel oluşturmaktır.

2.1. Spekülatif Baskı Endeksi

Finansal istikrarsızlığın gelir dağılımı üzerindeki rolü, özellikle spekülatif baskı endeksi literatürü üzerinden açıklanabilmektedir. Spekülatif baskı göstergesi, döviz kuru, faiz oranı ve rezerv hareketlerindeki ani değişimlerin yarattığı finansal stres düzeyini ölçen bir bileşik endekstir (Girton & Roper, 1977). Bu endeks, finansal piyasalardaki dengesizlikleri ve kırılganlıkları yakalayarak sermaye çıkışları, rezerv kayıpları ve para politikası baskıları gibi unsurların ekonomi üzerindeki olumsuz etkilerini görünür kılar. Finansal baskının artması, genellikle düşük gelirli grupları daha fazla etkileyen talep daralmaları, işsizlik artışı ve reel gelir kayıplarıyla sonuçlanmakta; böylece gelir eşitsizliği derinleşmektedir (Kaminsky & Reinhart, 1999). Spekülatif baskı göstergesinin bu etkisi, finansal istikrarsızlığın gelir eşitsizliğini açıklamada neden kritik bir değişken olduğunu teyit etmektedir.

Spekülatif baskı endeksi, döviz piyasası üzerindeki baskıyı ölçmek amacıyla geliştirilen bileşik bir göstergedir ve finansal istikrarsızlığın en temel ölçütlerinden biri olarak kabul edilir. Endeksin temelleri Girton ve Roper'in (1977) para krizi yaklaşımına dayanmakla birlikte, modern literatürde en yaygın kullanılan biçimi Eichengreen vd. (1995) tarafından geliştirilmiştir. Bu yaklaşıma göre, spekülatif baskı yalnızca döviz kuru hareketlerinden değil, aynı zamanda uluslararası rezervlerdeki değişimlerden ve faiz oranı farklarından beslenen çok boyutlu bir süreçtir. Buna göre, Kaminsky vd. (1998) spekülatif baskı endeksinin farklı piyasa baskılarını bir arada değerlendiren yapısını ayrıntılandırmış ve para krizlerinin öngörülmesinde güçlü bir gösterge olduğunu vurgulamıştır.

Ampirik literatürde Eichengreen vd. (1995), katsayıların standartlaştırılmasının tahmin edilen parametrelerin istatistiksel geçerliliği ya da güvenilirliği üzerinde herhangi bir bozucu etki yaratmadığını ortaya koymaktadır. Bu tespit, farklı ölçüm birimlerine sahip değişkenlerin ortak bir ölçekte değerlendirilmesine imkân tanıyarak, elde edilen bulguların yöntemsel tutarlılığını ve karşılaştırılabilirliğini güçlendirmektedir. Bu çerçevede çalışmada katsayılar bilinçli bir tercih olarak standartlaştırılmıştır ($\alpha_1 = \alpha_2 = \alpha_3 = 1$). Krkoska (2001: 42-43) tarafından geliştirilen yaklaşımı takiben spekülatif baskı endeksi; nominal döviz kurundaki yıllık yüzde değişim, mevduat faiz oranı ve uluslararası rezervlerdeki yıllık yüzde değişim bileşenleri esas alınarak oluşturulmuştur. Bu hesaplama yöntemi, başka çalışmalarda da benimsenmiş olup (Çepni, 2014: 172–173), finansal baskı endeksinin modelde ölçek etkilerinden arındırılmış ve analitik olarak tutarlı biçimde kullanılmasını mümkün kılmaktadır.

$$SPRESSURE_t = \alpha_1 \Delta EXCHANGE_t + \alpha_2 \Delta INTEREST_t - \alpha_3 \Delta RESERVE_t \qquad (1)$$

Denklem 1'deki formül, farklı değişkenleri karşılaştırılabilir hâle getirerek piyasa baskısının dengeli bir göstergesini üretir. Δ değişimi sembolize etmek üzere, t zaman aralığında spekülatif baskı ($SPRESSURE_t$) arttığında döviz kuru ($EXCHANGE_t$) üzerinde değer kaybı baskısı oluşur, rezerv kayıpları ($RESERVE_t$) ivmelenir ve faiz oranları ($INTEREST_t$) yükselir. Bu süreçler özellikle düşük gelirli kesimlerde ekonomik kırılganlığı artırarak gelir eşitsizliğini olumsuz etkileyebilmektedir (Kaminsky & Reinhart, 1999). Bu nedenle finansal baskı endeksi, gelir eşitsizliği dinamiklerini açıklamada kritik bir değişken niteliği taşımaktadır.

Spekülatif baskı endeksi finansal istikrarsızlığın ve finansallaşma/spekülatif eğilimlerin göstergesi olarak ampirik analizin bağımsız değişkeni olarak geçmektedir.

2.2. Finansal Kuznets Eğrisi

Finansal baskı mekanizmalarına ek olarak, finansal gelişmenin gelir eşitsizliği üzerindeki etkisi literatürde sıklıkla Finansal Kuznets Eğrisi hipotezi kapsamında tartışılmaktadır. Greenwood ve Jovanovic'in (1990) öncü çalışmasına göre, ekonomik büyümenin erken aşamalarında finansal gelişme eşitsizliği artırmakta; ancak finansal piyasalar derinleştikçe gelir dağılımı daha dengeli hâle gelmektedir. Başka bir ifadeyle, finansal gelişme ile gelir eşitsizliği arasında ters U şeklinde doğrusal olmayan bir ilişki bulunmaktadır. Bu model, finansal aracılık hizmetlerine erişimi olan kesimlerin başlangıçta daha hızlı zenginleşmesiyle eşitsizliğin yükseldiğini, ancak ekonominin daha olgun aşamalarında finansal erişimin yaygınlaşmasıyla eşitsizliğin azaldığını öne sürmektedir.

Finansal Kuznets Eğrisi modeline göre, ekonomik kalkınmanın erken aşamalarında finansal piyasaların derinleşmesi, varlık sahibi grupların daha hızlı kazanç sağlamasına neden olur ve eşitsizlik artar. Ancak finansal gelişmenin ilerleyen aşamalarında finansal aracılık hizmetlerinin geniş kitlelere yayılmasıyla eşitsizlik azalır. Böylece finansal gelişme ile gelir eşitsizliği arasında ters U şeklinde doğrusal olmayan bir ilişki ortaya çıkar. Banerjee and Newman (1993), Galor ve Zeira (1993) ve Destek vd. (2017) çalışmaları bu ilişkiyi destekler nitelikte bulgular sunmuştur.

Bu yaklaşım, çalışmanın ampirik analizinde kullanılan geniş tanımlı para arzı ile Gini katsayısı arasındaki uzun dönem ilişkisinin teorik temelini oluşturmaktadır.

2.3. Teknolojik Kuznets Eğrisi

Finansal Kuznets Eğrisine benzer istatistiksel eğilimle, teknolojik ilerlemenin gelir eşitsizliğini nasıl etkilediği, literatürde Teknolojik Kuznets Eğrisi yaklaşımıyla açıklanmaktadır. Teknolojik gelişme başlangıç aşamalarında nitelikli işgücüne olan talebi artırarak ücret farklılıklarının genişlemesine neden olmakta, bu da eşitsizliğin artmasına yol açmaktadır (Elfaki & Ahmed, 2024). Ancak teknolojik dönüşüm olgunlaştıkça ve inovasyon toplumun daha geniş kesimlerine yayıldıkça, teknolojik kazanımların yeniden dağıtım etkisinin güçlenmesiyle eşitsizlik azalabilmektedir. Bu doğrusal olmayan yapı, teknolojik yenilikler ile gelir eşitsizliği arasındaki ilişkinin doğrusal olmadığını ve ülke koşullarına bağlı olarak yön değiştirebileceğini göstermektedir.

Kuznets eğrilerinin kavramsal/teorik mantığına paralel teknolojik gelişmenin gelir eşitsizliği üzerindeki etkisi doğrusal olmayan bir yapı göstermektedir. Autor (2015), Kim (2012) ve Tang vd. (2022) gibi araştırmacılar, teknolojik ilerlemenin ilk aşamalarında nitelikli işgücüne olan talebin arttığını, bu nedenle ücretlerin açıldığını ve eşitsizliğin yükseldiğini savunmaktadır. Teknoloji yaygınlaştıkça ve üretim süreçleri daha kapsayıcı hâle geldikçe eşitsizlik zamanla azalabilmektedir.

Türkiye gibi teknoloji ithal eden ve dijital dönüşüm süreci devam eden ekonomilerde bu yaklaşım eşitsizlik analizinde önemli bir teorik çerçeve sunmaktadır. Bu doğrultuda, çalışmanın

ampirik analizde teknolojik gelişme göstergesi olarak kullanılan paten başvuru sayısının teorik altyapısını Teknolojik Kuznets Eğrisi oluşturmaktadır.

2.4. McKinnon–Shaw Finansal Liberalizasyon Hipotezi

Finansal gelişmenin teorik temellerinden biri McKinnon (1973) ve Shaw'ın (1973) finansal liberalizasyon ya da tamamlayıcılık hipotezidir. Bu yaklaşıma göre finansal baskı—yüksek zorunlu karşılıklar, faiz kontrolleri ve kredi tahsis kısıtları gibi uygulamalar— tasarrufları ve yatırımları azaltarak ekonomik büyümeyi sınırlar. Finansal serbestleşme ise tasarrufları teşvik eder, yatırım kapasitesini artırır ve uzun vadede gelir artışı yoluyla eşitsizliği azaltıcı etki yaratabilir. Ancak kısa dönemde finansal serbestleşme, özellikle finansal sistemin kırılgan olduğu ekonomilerde eşitsizliği geçici olarak artırabilmektedir (McKinnon, 1973). Finansal serbestleşmenin kısa dönemde eşitsizliği artırabileceği, ancak uzun dönemde gelir dağlımını iyileştirme potansiyeli taşıdığı yönündeki bu yaklaşıma benzer eğilimle Tunalı ve Çetinkaya (2019) ve Yanar ve Şahbaz (2013) ampirik analizler gerçekleştirmiştir.

McKinnon (1973) ve Shaw (1973) tarafından geliştirilen finansal serbestleşme hipotezi, finansal baskının yatırımlar ve ekonomik büyüme üzerindeki kısıtlayıcı etkilerini açıklamaktadır. Bu hipoteze göre, faiz kontrolleri, zorunlu karşılık oranları ve kredi kotaları gibi finansal baskı araçları tasarrufları azaltır ve yatırım kapasitesini sınırlar. Finansal serbestleşme ise tasarrufları ve yatırım akımlarını artırarak ekonomik büyümeyi destekler ve uzun dönemde gelir eşitsizliğini azaltıcı etkiler yaratabilir.

McKinnon–Shaw finansal liberalizasyon hipotezi mekanizması, çalışmanın ampirik analizindeki finansal küreselleşme endeksinin gelir eşitsizliği üzerindeki etkisinin yorumlanmasında kritik bir teorik çerçeve sunmaktadır.

Spekülatif baskı endeksi finansal kırılganlığı, Finansal Kuznets Eğrisi finansal gelişmenin doğrusal olmayan etkisini, Teknolojik Kuznets eğrisi teknolojik değişimin eşitsizlik üzerindeki farklılaşan etkilerini, McKinnon–Shaw hipotezi ise finansal serbestleşme–büyüme–eşitsizlik ilişkisinin yönünü açıklamaktadır. Bu nedenle söz konusu teoriler birlikte ele alındığında, Türkiye'de gelir eşitsizliğini belirleyen mekanizmaları bütüncül çerçevede değerlendirmek mümkün olmaktadır. Bu teorik tartışmalar, finansal baskı, finansal gelişme, küresel entegrasyon ve teknolojik yenilikler arasındaki ilişkinin çok boyutlu olduğunu göstermektedir. Bu nedenle çalışmada kullanılan ARDL modeli, söz konusu değişkenlerin hem uzun dönem yapılarını hem de kısa dönem şok etkilerini analiz edebilmek açısından uygun bir analitik araç sunmaktadır.

2.5. SDG BAĞLANTISI

Bu çalışma, gelir eşitsizliğini merkeze alması itibarıyla United Nations tarafından belirlenen SDG 10 – Eşitsizliklerin Azaltılması hedefiyle doğrudan ilişkilidir. SDG 10, yalnızca gelir dağılımındaki uçurumların daraltılmasını değil; ekonomik, finansal ve teknolojik dönüşümlerin toplumun farklı kesimleri üzerindeki asimetrik etkilerinin azaltılmasını ve özellikle alt gelir gruplarının refah artışının sürdürülebilir biçimde desteklenmesini amaçlamaktadır (SDG 10.1 ve 10.2) (Apel, 2020). Bu bağlamda çalışma, spekülatif baskı endeksi ve finansal küreselleşme

göstergeleri aracılığıyla finansal şokların, sermaye hareketlerinin ve piyasa oynaklığının gelir dağılımı üzerindeki etkilerini analiz ederek, makroekonomik istikrarsızlıkların eşitsizlikleri derinleştirip derinleştirmediğini SDG 10 perspektifinden değerlendirmektedir.

SDG 10'un bir diğer alt hedefi olan 10.4, mali, parasal ve sosyal politikaların daha eşitlikçi sonuçlar üretecek şekilde tasarlanmasını öngörmektedir (Kuhn, 2020). Bu doğrultuda çalışmada kullanılan geniş tanımlı para arzı, parasal genişleme ve likidite koşullarının gelir eşitsizliği üzerindeki dağıtımsal etkilerini incelemeye imkân tanımaktadır. Literatür, parasal genişlemenin varlık fiyatları ve finansal getiriler yoluyla yüksek gelir grupları lehine sonuçlar doğurabileceğini ve bu kanal üzerinden eşitsizlikleri artırma potansiyeli taşıdığını vurgulamaktadır (Furceri vd., 2019). Bu çalışma, para politikalarının Türkiye'de gelir dağılımını hangi mekanizmalar üzerinden etkilediğini ortaya koyarak, SDG 10.4 kapsamında kapsayıcı ve dengeleyici politika tasarımının ampirik temellerini güçlendirmeyi amaçlamaktadır.

Öte yandan SDG 10'un 10.5 numaralı alt hedefi, finansal piyasaların düzenlenmesi ve istikrarının güçlendirilmesini, eşitsizlikleri artırıcı şokların sınırlandırılması açısından kritik bir politika alanı olarak tanımlamaktadır. Bu çerçevede çalışmada yer alan patent başvuru sayısı, teknolojik yeniliklerin gelir dağılımı üzerindeki etkisini değerlendirmeye yönelik bir gösterge olarak kullanılmaktadır. Mevcut literatür, teknolojik ilerlemenin yüksek vasıflı işgücü lehine ücret farklılaşmasını artırarak eşitsizlikleri derinleştirebileceğini ortaya koymaktadır (Egger & Grossmann, 2005). Çalışma, teknolojik yeniliklerin Türkiye'de gelir eşitsizliği üzerindeki etkisini finansal istikrar ve küresel entegrasyon dinamikleriyle birlikte ele alarak, SDG 10 kapsamında kapsayıcı teknolojik dönüşümün hangi koşullar altında mümkün olabileceğine ilişkin ampirik kanıtlar sunmayı hedeflemektedir.

2.6. Literatür Katkısı

Mevcut literatür, gelir eşitsizliği ile finansal gelişme, finansallaşma ve teknolojik dönüşüm arasındaki ilişkiyi farklı kuramsal çerçeveler ve ampirik yöntemler üzerinden ele almaktadır. Uygur ve Han (2021), finansal serbestleşme ile gelir eşitsizliği arasındaki ilişkiyi panel kantil regresyon yöntemiyle inceleyerek, finansal gelişmenin gelir dağılımı üzerindeki etkisinin doğrusal olmadığını ve gelir dağılımının farklı dilimlerinde asimetrik sonuçlar ürettiğini ortaya koymuştur. İkinci olarak Atasever (2022), finansallaşma sürecini banka kredileri, borçlanma dinamikleri ve finans dışı sektörün finansal faaliyetlere yönelimi üzerinden ele almış; finansallaşmanın özellikle gelişmekte olan ekonomilerde gelir eşitsizliğini artırıcı bir mekanizma oluşturduğunu vurgulamıştır. Üçüncü çalışmada Cafrı (2018), teknolojik yenilik ve yayılmayı patent göstergeleri aracılığıyla analiz ederek, teknoloji temelli dönüşümün yüksek vasıflı işgücü lehine gelir farklılaşmasını derinleştirdiğini ve bu etkinin farklı ülke gruplarında geçerli olduğunu göstermiştir. Son olarak Köyel ve Yamak (2025), Türkiye özelinde finansal gelişme ile gelir eşitsizliği arasındaki ilişkiyi geniş para arzı ve kredi göstergeleri üzerinden incelemiş; finansal gelişmenin kısa ve uzun dönemde gelir dağılımı üzerinde farklı yönlerde etkiler yaratabildiğini ortaya koymuştur.

Bu çalışma, mevcut literatürden üç temel noktada ayrışarak özgün bir katkı sunmaktadır. İlk olarak, finansal gelişme ve finansallaşmayı yalnızca kredi veya para arzı göstergeleriyle sınırlı

ele almak yerine, spekülatif baskı endeksi, geniş tanımlı para arzı, finansal küreselleşme ve teknolojik yenilik (patent başvuruları) değişkenlerini aynı ampirik çerçevede birleştirerek gelir eşitsizliğinin çok boyutlu belirleyicilerini birlikte analiz etmektedir. İkinci olarak, literatürde ağırlıklı olarak panel veri yöntemleri tercih edilirken, bu çalışma Türkiye'ye özgü dinamikleri dikkate alan zaman serisi temelli ARDL yaklaşımı ile kısa ve uzun dönem etkileri eşanlı biçimde ortaya koymaktadır. Üçüncü olarak, teknolojik yeniliği temsilen yerleşik olmayan patent başvurularının kullanılması, teknoloji üretimi ile teknoloji sahipliği arasındaki ayrışmayı gelir eşitsizliği perspektifinden görünür kılmakta; böylece teknolojik dönüşümün dağıtımsal etkilerine ilişkin literatürde görece ihmal edilen bir kanala odaklanmaktadır. Bu yönleriyle çalışma, finansal istikrarsızlık, parasal koşullar, küresel finansal entegrasyon ve teknoloji temelli dönüşümlerin gelir eşitsizliği üzerindeki etkileşimli etkilerini ortaya koyarak, Türkiye özelinde literatürdeki önemli bir boşluğu doldurmayı amaçlamaktadır.

3. METODOLOJİ

3.1. Çalışmanın Amacı ve Araştırma Tasarımı

Bu çalışma, finansal (spekülatif baskı endeksi, geniş tanımlı para arzı, finansal küreselleşme endeksi) ve teknolojik dönüşüm (patent başvuru sayısı) süreçlerinin Türkiye'de gelir dağılımı üzerindeki etkilerini bütüncül bir çerçevede incelemeyi amaçlamaktadır. Analizin temel odağı, finansal istikrarsızlık, finansal gelişme, küresel finansal entegrasyon ve teknolojik yeniliklerin gelir eşitsizliğini hangi kanallar üzerinden periyodik olarak şekillendirdiğini ortaya koymaktır. Bu doğrultuda, 1987–2021 dönemine ait yıllık veriler kullanılarak değişkenler arasındaki kısa ve uzun dönem ilişkiler ARDL modeli aracılığıyla analiz edilmiştir. Çalışmada, finansal baskı endeksi finansal kırılganlıkları; geniş tanımlı para arzı finansal gelişmeyi; finansal küreselleşme endeksi küresel sermaye entegrasyonunu; patent başvuruları ise teknolojik yenilikleri temsil eden temel açıklayıcı değişkenler olarak modele dâhil edilmiştir. Böylece, gelir eşitsizliğini etkileyen finansal, teknolojik ve küresel kanalların eşanlı biçimde değerlendirilmesi hedeflenmiştir.

Bu çerçevede çalışma, Türkiye'de gelir eşitsizliğinin belirleyicilerini makroekonomik ve yapısal bir perspektiften analiz etmeyi amaçlayarak dört temel araştırma sorusu etrafında yapılandırılmıştır.

- Finansal istikrarsızlıkta meydana gelen değişimler, gelir eşitsizliğini hangi yönde etkilemektedir? Spekülatif baskı endeksi üzerinden bu etki nasıl şekillenmektedir?
- Küresel finansal entegrasyon, Türkiye örneğinde gelir eşitsizliği üzerinde bir faktör müdür? Finansal küreselleşme gelir dağılımı sorunsalına çözüm üretebilmekte midir?
- Finansal gelişme (derinleşme) geniş tanımlı para arzı bağlamında gelir eşitsizliği problemine çözüm olarak politika aracı olarak kullanılabilir midir?
- Teknolojik yeniliklerin gelir eşitsizliği üzerindeki etkileri kısa ve uzun dönemde farklılaşmakta mıdır? Patent başvuru sayıları üzerinden bu etkileşimin yönü ve şiddeti nasıldır?

3.2. Veri Seti ve Değişkenlerin Tanımı

Çalışmada kullanılan bağımlı değişken gelir eşitsizliğini temsil eden Gini katsayısıdır. Gini katsayısı verileri, "Standardized World Income Inequality Database" (SWIID) veri setlerinden derlenmiştir (Solt, 2020). Finansal istikrarsızlığı temsil etmek amacıyla kullanılan spekülatif baskı endeksi, döviz kuru, rezerv ve faiz oranı hareketlerinden türetilerek finansal kırılganlıkların yoğunluğunu yansıtan bileşik bir göstergedir. Bu gösterge Denklem 1'deki eşitlik aracılığıyla Türkiye örneğinde oluşturulmuştur (Çepni, 2014; Eichengreen vd., 1995; Krkoska, 2001). Spekülatif baskı endeksinin oluşturulmasında kullanılan temel veri bileşenleri Dünya Bankası (WB) ve Türkiye Cumhuriyet Merkez Bankası (TCMB) veri sisteminden temin edilmiştir. Diğer taraftan, Finansal gelişme göstergesi olarak kullanılan geniş tanımlı para arzının GSYH içindeki payı, finansal sistemin derinliğini ve likidite kapasitesini temsil etmektedir. Söz konusu finansal gelişme göstergesi ve para politikası aracı WB veri tabanından alınmıştır.

Tablo 1. Ampirik Analiz Verileri

Değişken	**Sembol**	**Açıklama**	**Kaynak**
Gelir Eşitsizliği	GINI	Vergi ve transfer sonrası GINI Katsayısı (Kullanılabilir Gelir), gelir eşitsizliğini temsilen	SWIID 9.9
Spekülatif Baskı	SPRESSURE	Finansal kırılganlıklar ve spekülatif eğilimleri yansıtan endeks	WB ve TCMB
Finansal Küreselleşme	FGLOBAL	Küresel finansal entegrasyon düzeyini temsilen kullanılan endeks	SEI
Geniş Tanımlı Para Arzı	BMONEY	Finansal gelişme göstergesi olarak geniş tanımlı para arzının (M2) GSYH'ye oranı	WB
Patent Başvuruları	TPATENT	Yerleşik olmayan kişilere ait toplam yabancı patent başvuru sayıları	OECD

Küresel finansal entegrasyonu temsilen kullanılan finansal küreselleşme endeksi, ülkelerin küresel sermaye piyasalarıyla bütünleşme derecesini ölçen bileşik bir göstergedir. KOF "Swiss Economic Institute" (SEI) aracılığıyla derlenen bu endeks, sermaye hareketleri, doğrudan yabancı yatırımlar ve portföy akımları gibi kanalları kapsayarak küresel finansal entegrasyonun gelir dağılımı üzerindeki etkilerinin analiz edilmesine imkân tanımaktadır (Dreher, 2006). OECD veri bankasından alınan ve teknolojik yenilik göstergesi olarak kullanılan patent başvuru sayıları ise teknolojik üretim kapasitesini ve yenilik faaliyetlerinin yoğunluğunu yansıtmaktadır. Çalışmada yerleşik olmayan (yabancı başvuru sahipleri) patent başvuruları kullanılmıştır. Bunun temel nedeni, bu göstergenin finansal küreselleşme, çok uluslu firmaların teknoloji sahipliği ve teknoloji rantlarının dağılımı kanalları üzerinden gelir eşitsizliğiyle daha doğrudan ilişkili olmasıdır (Jaumotte vd., 2013).

3.3. Teorik Beklentiler ve Beklenen Bulgular

Finansal istikrarsızlık ile gelir eşitsizliği arasındaki ilişkinin, özellikle spekülatif baskı ve finansal kırılganlık dönemlerinde düşük ve orta gelir gruplarının daha fazla etkilenmesi nedeniyle pozitif yönde olması beklenmektedir. Finansal baskının artması, işsizlik, gelir oynaklığı ve varlık fiyatlarındaki dalgalanmalar yoluyla eşitsizliği derinleştirebilmektedir. Küresel finansal entegrasyonun ise sermaye kazançlarının belirli gruplarda yoğunlaşması nedeniyle gelir eşitsizliğini artırıcı bir etki yaratması olasıdır. Buna karşılık, finansal gelişmenin para arzı kanalıyla ekonomik faaliyetleri ve finansal erişimi destekleyerek gelir eşitsizliğini azaltıcı bir rol üstlenmesi beklenmektedir. Patent başvuru sayısı ile ölçülen teknolojik yenilik faaliyetleri, mevcut üretim yapısı ve işgücü piyasasının nitelik bileşimi dikkate alındığında, özellikle kısa ve orta vadede yüksek vasıflı işgücü ve sermaye sahipleri lehine getiriler üreterek gelir eşitsizliğini artırıcı bir etki yaratma potansiyeline sahiptir. Bu bağlamda patent göstergesi, teknolojik ilerlemenin üretim sürecine dâhil olma kapasitesi sınırlı olan düşük ve orta vasıflı gruplar açısından gelir farklılaşmasını derinleştirebilecek bir kanal olarak değerlendirilmiştir. Bu bağlamda, finansal ve teknolojik değişkenlerin gelir eşitsizliği üzerindeki etkilerinin doğrusal olmayan ve zamana bağlı dinamik bir yapı sergilemesi beklenmektedir.

3.4. Ekonometrik Model

Çalışmanın amacı doğrultusunda, kısa ve uzun dönem etkileri eşanlı olarak test edebilmek amacıyla kullanılan ARDL yaklaşımına ait ekonometrik modelin fonksiyonel formu Denklem 2'de, temel model ise Denklem 3'de gösterilmektedir.

$$GINI_t = \int (SPRESSURE_t, BMONEY_t, FGLOBAL_t, TPATENT_t) \quad (1)$$

$$GINI_t = \beta_0 + \beta_1 SPRESSURE_t + \beta_2 BMONEY_t + \beta_3 FGLOBAL_t + \beta_4 TPATENT_t + \varphi_t \quad (2)$$

Denklem 1 ve Denklem 2'de yer alan t zaman periyodu, β_0 regresyonun sabit terimi, β_1, β_2, β_3 ve β_4 bağımsız değişkelerin regresyon etki katsayıları, φ_t modelin hata terimidir.

4. EKONOMETRİK YÖNTEM VE ARDL YAKLAŞIMI

3.1. ARDL Yönteminin Temel Mantığı

ARDL yaklaşımı, zaman serileri arasındaki ilişkiyi uzun dönem dengesi ve kısa dönem uyum süreçleri üzerinden analiz etmeye olanak sağlayan dinamik bir ekonometrik çerçeve sunmaktadır. Yöntemin literatürde öne çıkan en önemli özelliği, analizde yer alan değişkenlerin aynı bütünleşme derecesine sahip olmasını zorunlu kılmamasıdır. Başka bir ifadeyle, ARDL yaklaşımı hem düzeyde durağan [I(0)] hem de birinci farkta durağan [I(1)] serilerle birlikte çalışabilmekte; bu yönüyle klasik eşbütünleşme yöntemlerine kıyasla daha esnek bir yapı sunmaktadır (Pesaran & Shin, 1998).

Bu bağlam:

- gözlem sayısının sınırlı olduğu,
- yıllık frekansta veri kullanılan,
- değişkenlerin bütünleşme derecelerinin farklılık gösterebildiği

ampirik çalışmalarda ARDL yöntemini öne çıkarmaktadır. Bu noktada, Narayan (2005), küçük örneklemler için geliştirilen sınır testinin, uzun dönem katsayı tahminlerinde daha güvenilir ve tutarlı sonuçlar ürettiğini ortaya koymaktadır.

3.2. Model Yapısı ve Katsayıların Yorumu

Çalışmada ele alınan değişkenler arasındaki ilişkiler, ARDL modelinin genel matematiksel formu kullanılarak tahmin edilmiştir. Bu yapı Denklem 4'te sunulmaktadır. Modelde kullanılan Δ fark operatörü, kısa dönem dinamikleri yakalamaya hizmet ederken; düzey terimleri değişkenler arasındaki uzun dönem denge ilişkisini temsil etmektedir.

$$\Delta GINI_t = \delta_0 + \delta_1 GINI_{t-1} + \delta_2 SPRESSURE_{t-1} + \delta_3 BMONEY_{t-1} + \delta_4 FGLOBAL_{t-1} + \delta_5 TPATENT_{t-1} + \sum_{i=1}^{a} \delta_6 \Delta GINI_{t-i} + \sum_{i=0}^{b} \delta_7 \Delta SPRESSURE_{t-i} + \sum_{i=0}^{c} \delta_8 \Delta BMONEY_{t-i} + \sum_{i=0}^{d} \delta_9 \Delta FGLOBAL_{t-i} + \sum_{i=0}^{e} \delta_{10} \Delta TPATENT_{t-i} + \mu_t \quad (4)$$

Model kapsamında, a bağımlı değişkenin gecikmeli değerini; b, c, d ve e bağımsız değişkenlerin gecikmeli değerlerini yansıtmaktadır. δ_0 sabit terimi deterministik bileşeni temsil ederken, μ_t hata terimi modele dâhil edilmeyen rastlantısal etkileri kapsamaktadır. δ_1, δ_2, δ_3, δ_4 ve δ_5 ARDL modelinin uzun dönem katsayılarını, δ_6, δ_7, δ_8, δ_9 ve δ_{10} kısa dönem katsayılarını sembolize etmektedir. ARDL yapısı, bu haliyle, kısa ve uzun dönem katsayılarını ayrıştırarak ekonomik ilişkilerin zamansal boyutunu daha net biçimde ortaya koymaktadır.

3.3. Kısa Dönem–Uzun Dönem Bağlantısı: Hata Düzeltme Mekanizması

ARDL yaklaşımının ayırt edici yönlerinden biri, kısa dönem sapmaları uzun dönem denge ilişkisiyle ilişkilendiren hata düzeltme mekanizmasını (ECM) doğrudan modele entegre edebilmesidir. Bu kapsamda, Denklem 4'ten türetilen hata düzeltme teriminin bir dönem gecikmeli değeri ($COINT_{t-1}$) modele eklenerek Denklem 5'te gösterilen ECM yapısı oluşturulmuştur.

$$\Delta GINI_t = \delta_0 + \delta_1 GINI_{t-1} + \delta_2 SPRESSURE_{t-1} + \delta_3 BMONEY_{t-1} + \delta_4 FGLOBAL_{t-1} + \delta_5 TPATENT_{t-1} + \sum_{i=1}^{a} \delta_6 \Delta GINI_{t-i} + \sum_{i=0}^{b} \delta_7 \Delta SPRESSURE_{t-i} + \sum_{i=0}^{c} \delta_8 \Delta BMONEY_{t-i} + \sum_{i=0}^{d} \delta_9 \Delta FGLOBAL_{t-i} + \sum_{i=0}^{e} \delta_{10} \Delta TPATENT_{t-i} + \delta_{11} COINT_{t-1} + \mu_t \quad (5)$$

δ_{11} hata düzeltme katsayısının:

- negatif işaretli,
- istatistiksel olarak anlamlı

olması, sistemin uzun dönem dengesinden sapması durumunda yeniden dengeye yöneldiğini göstermektedir. Katsayının mutlak değeri ise bu uyum sürecinin ne kadar hızlı gerçekleştiğine dair önemli bilgiler sunmaktadır (Narayan & Narayan, 2005).

3.4. Model İstikrarı ve Parametre Güvenilirliği

Tahmin edilen katsayıların zaman içerisinde istikrarlı olup olmadığını değerlendirmek amacıyla CUSUM ve CUSUMSQ testleri uygulanmıştır. Brown vd. (1975) tarafından geliştirilen bu testler, model parametrelerinde yapısal kırılma ya da ani sapmalar olup olmadığını incelemeye olanak tanımaktadır.

Bu testler sayesinde:

- modelin yapısal bütünlüğü,
- katsayıların zamana karşı duyarlılığı,
- tahmin sonuçlarının güvenilirliği

çok boyutlu biçimde değerlendirilmektedir. Bu yönüyle ARDL yaklaşımı, küçük örneklemlerde dahi güçlü bir istatistiksel çerçeve sunmaktadır.

3.5. Uzun Dönem İlişkinin Sınanması: Sınır Testi

Değişkenler arasında uzun dönemli bir eşbütünleşme ilişkisinin varlığı, ARDL sınır testi prosedürü aracılığıyla değerlendirilmiştir. Bu yöntemde hesaplanan F-istatistiği, uzun dönem ilişkinin bulunmadığını ifade eden sıfır hipotezi altında tanımlanan alt [I(0)] ve üst [I(1)] kritik sınır değerleriyle karşılaştırılmaktadır.

Çalışmada:

- örneklem hacminin görece küçük olması,
- verilerin yıllık frekansta kullanılması

nedenleriyle Narayan (2005) tarafından küçük örneklemler için önerilen kritik değerler esas alınmıştır. Bununla birlikte, bulguların sağlamlığını test etmek amacıyla Pesaran vd. (2001) tarafından sunulan asimptotik kritik değerlerle de karşılaştırmalar yapılmıştır. Bu ikili yaklaşım, eşbütünleşme sonuçlarının örneklem büyüklüğüne duyarlılığını en aza indirmeyi hedeflemektedir.

3.6. Gecikme Uzunluğu Seçimi

Modelin kurulumu aşamasında, verilerin yıllık frekansta olması ve örneklem büyüklüğünün etkin biçimde kullanılmasının gerekliliği göz önünde bulundurularak maksimum gecikme uzunluğu dört ile sınırlandırılmıştır. Daha yüksek gecikme sayılarının modele dâhil edilmesi, serbestlik derecelerini hızla azaltarak parametre tahminlerinin güvenilirliğini zayıflatabileceğinden, gecikme yapısının parsimonik tutulması tercih edilmiştir (Pesaran & Shin, 1998).

Her bir değişken için gecikme yapısı, modelin bilgi içeriğini maksimize ederken gereksiz parametre kullanımını sınırlamayı amaçlayan Akaike Bilgi Kriteri (AIC) esas alınarak belirlenmiştir. Bu seçim yaklaşımı, hem kısa dönem uyum mekanizmalarının doğru biçimde yakalanmasına hem de uzun dönem katsayılarının tutarlı ve istikrarlı şekilde tahmin edilmesine imkân tanımaktadır (Pesaran, 1997).

4. AMPİRİK BULGULAR

Analizde kullanılan zaman serilerinin durağanlık özellikleri, Genişletilmiş Dickey–Fuller (ADF) ve Phillips–Perron (PP) birim kök testleri yardımıyla incelenmiştir. ADF testi,

otokorelasyon problemini gecikmeli fark terimleri aracılığıyla parametrik biçimde ele alırken; PP testi, otokorelasyon ve değişen varyans sorunlarını parametrik olmayan düzeltmelerle gidererek daha esnek bir yapı sunmaktadır (Dickey & Fuller, 1979; Phillips & Perron, 1988).

Her iki testin birlikte kullanılması, durağanlık bulgularının güvenilirliğini artırmakta ve ARDL yaklaşımının gerektirdiği bütünleşme koşullarının sağlanıp sağlanmadığını daha sağlam biçimde ortaya koymaktadır. Birim kök testlerine ilişkin sonuçlar Tablo 2'de sunulmaktadır.

Tablo 2. Durağanlık Analizi Bulguları

Değişken	ADF		PP		SONUÇ	
	I(0)	I(1)	I(0)	I(1)	ADF	PP
GINI	-0.418 (0.983)	-3.750** (0.033)	-1.140 (0.907)	-3.722** (0.035)	I(1)	I(1)
SPRESSURE	-5.374*** (0.001)		-5.476*** (0.000)		I(0)	I(0)
BMONEY	-3.157 (0.110)	-7.443*** (0.000)	-2.893 (0.177)	-9.943*** (0.000)	I(1)	I(1)
FGLOBAL	-4.178** (0.012)		-4.205** (0.011)		I(0)	I(0)
TPATENT	-3.163 (0.109)	-3.469* (0.060)	-1.872 (0.647)	-3.294* (0.085)	I(1)	I(1)

NOT: ***, ** ve * sırasıyla %1, %5 ve %10 düzeylerindeki anlamlılığı göstermektedir. Parantez içindeki değerler p-değerleridir.

ADF ve PP birim kök testlerinden elde edilen bulgular, analizde kullanılan değişkenlerin homojen olmayan bütünleşme özellikleri sergilediğini ortaya koymaktadır. Gelir eşitsizliğini temsilen kullanılan GINI değişkeni ile geniş tanımlı para arzı (BMONEY) ve teknolojik yenilik göstergesi (TPATENT), düzey değerlerinde durağanlık göstermemekte; buna karşılık birinci farkları alındığında her iki test istatistiğine göre de anlamlı biçimde durağan hâle gelerek I(1) sürece sahip olduklarını ortaya koymaktadır. Öte yandan spekülatif baskı göstergesi (SPRESSURE) ile finansal küreselleşme endeksi (FGLOBAL), düzeyde güçlü durağanlık sergileyerek I(0) sınıfında yer almaktadır. Bu sonuçlar, modelde yer alan değişkenlerin aynı bütünleşme derecesine sahip olmadığını, ancak hiçbir serinin ikinci dereceden bütünleşik (I(2)) olmadığını göstermektedir. Dolayısıyla, farklı bütünleşme derecelerine sahip serilerin birlikte analiz edilmesine imkân tanıyan ve küçük örneklemler için güçlü sonuçlar üreten ARDL sınır testi yaklaşımının, çalışmanın ampirik yapısıyla uyumlu ve uygun bir yöntem olduğu değerlendirilmektedir.

Tablo 3. ARDL Modeli Bulguları

SINIR TESTİ				
MODEL	F-İSTATİSTİK	I(0) KRİTİK DEĞERLER [%10-%5-%1]	I(1) KRİTİK DEĞERLER [%10-%5-%1]	SONUÇ
ARDL (3,2,3,4,3)	13.090	2.450-2.860-3.740 (2.752-3.354-4.768)	3.520-4.010-5.060 (3.994-4.774-6.670)	EŞBÜTÜNLEŞME

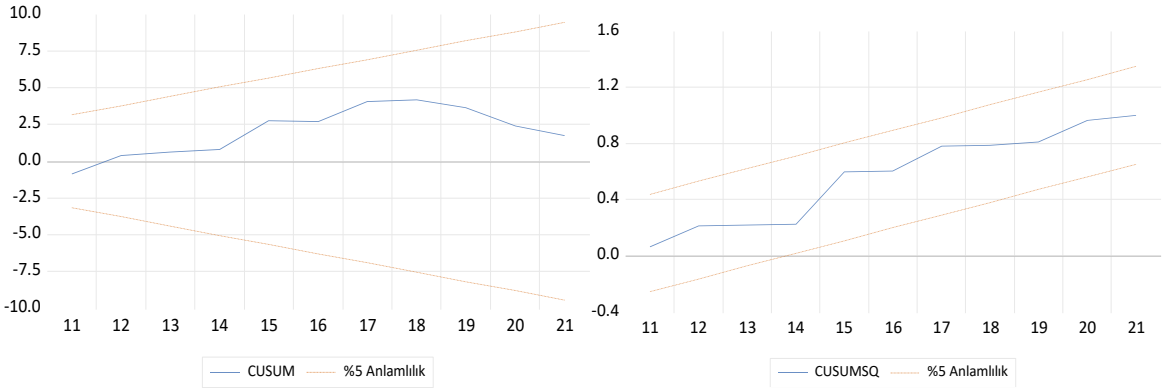
MODEL TANI TESTLERİ				
TANI	TEST TÜRÜ	İSTATİSTİK	OLASILIK	SONUÇ
MODEL SPESİFİKASYONU	RAMSEY RESET	4.607	0.057	%5 ANLAM DÜZEYİNDE UYGUN
DEĞİŞEN VARYANS	BREUSCH-PAGAN-GODFREY	1.597	0.215	
OTOKORELASYON	BREUSCH-GODFREY	0.608	0.670	
NORMAL DAĞILIM	JARQUE-BERA	1.211	0.546	

Sınır testi bulguları, kurulan ARDL (3,2,3,4,3) modelinde hesaplanan F-istatistik değerinin (13.090), hem Narayan (2005) tarafından küçük örneklemler için önerilen kritik üst sınırların hem de Pesaran vd. (2001) tarafından sunulan asimptotik kritik değerlerin tüm anlamlılık düzeylerinde çok belirgin biçimde üzerinde olduğunu göstermektedir. Bu sonuç, gelir eşitsizliği ile spekülatif baskı, parasal genişleme, finansal küreselleşme ve teknolojik yenilik değişkenleri arasında, geçici eş hareketlerin ötesine geçen güçlü ve kalıcı bir uzun dönem denge ilişkisinin varlığına işaret etmektedir. F-istatistiğin kritik eşiklerden bu denli uzaklaşması, modelde tespit edilen eşbütünleşmenin istatistiksel olduğu kadar ekonomik anlamda da sağlam bir yapıya sahip olduğunu ortaya koymaktadır.

Modelin içsel tutarlılığını ve fonksiyonel uygunluğunu sınamak amacıyla uygulanan tanı testleri, kurulan spesifikasyonun genel olarak yüksek ekonometrik kalite sergilediğini göstermektedir. Ramsey Reset testi, modelin fonksiyonel formunun %5 anlamlılık düzeyinde kabul edilebilir olduğunu ortaya koyarken, bu bulgu regresyon denkleminde ihmal edilmiş sistematik bir yapı bulunmadığını göstermektedir. Breusch–Pagan–Godfrey testi, hata terimlerinde değişen varyans sorununa işaret etmezken; Breusch–Godfrey otokorelasyon testi, modelin dinamik yapısının seri korelasyon içermeden doğru biçimde kurulduğunu teyit

etmektedir. Buna ek olarak Jarque–Bera testi, hata terimlerinin normal dağılım varsayımını sağladığını ortaya koyarak istatistiksel çıkarımların güvenilirliğini desteklemektedir.

Bu sonuçlar bir arada değerlendirildiğinde, kurulan ARDL modelinin yalnızca uzun dönem eşbütünleşme ilişkisini güçlü biçimde ortaya koymakla kalmadığı, aynı zamanda klasik regresyon varsayımlarını büyük ölçüde sağlayan istikrarlı, dengeli ve güvenilir bir ampirik yapı sunduğu anlaşılmaktadır. Dolayısıyla elde edilen kısa ve uzun dönem katsayıları, Türkiye'de gelir eşitsizliğinin finansal istikrarsızlık, parasal koşullar, küresel finansal entegrasyon ve teknolojik dönüşümle nasıl şekillendiğine ilişkin akademik açıdan ikna edici ve politika yapımı açısından anlamlı çıkarımlar üretmeye elverişli bir zemin sunmaktadır.



Şekil 1. CUSUM ve CUSUMSQ Grafikleri

Şekil 1'de sunulan CUSUM ve CUSUMSQ grafikleri, kurulan ARDL modeline ait parametrelerin zaman içinde yapısal bir kırılmaya maruz kalmadan istikrarlı biçimde davrandığını ortaya koymaktadır. Her iki testte de kümülatif toplam istatistiklerinin %5 anlamlılık düzeyine ait kritik bantlar içinde kalması, katsayıların örneklem boyunca zamansal tutarlılığını ve hata varyansının rejim değişimi içermediğini teyit etmektedir. Özellikle CUSUMSQ sonuçları, modelin yalnızca ortalama ilişkiler açısından değil, aynı zamanda oynaklık ve şoklara verilen tepkiler bakımından da kararlı bir yapıya sahip olduğunu göstermektedir. Bu bulgular, gelir eşitsizliği ile finansal baskı, parasal genişleme, finansal küreselleşme ve teknolojik yenilik arasındaki ilişkilerin geçici dalgalanmalardan ziyade kalıcı bir denge çerçevesinde şekillendiğine işaret etmekte; elde edilen kısa ve uzun dönem katsayılarının ekonometrik olarak güvenilir ve politika yorumlarına elverişli olduğunu güçlendirmektedir.

Tablo 4. Uzun Dönem Katsayıları

Değişken	Katsayı	T-İstatistik	Olasılık
SPRESSURE	0.0166***	6.9326	0.0000
BMONEY	-0.2591***	-6.6688	0.0000
TPATENT	0.0005***	4.0180	0.0004
FGLOBAL	0.2416***	6.4804	0.0000

NOT: ***, ** ve * sırasıyla %1, %5 ve %10 düzeylerindeki anlamlılığı göstermektedir.

Tablo 4'te yer alan uzun dönem bulguları, çalışmada ele alınan tüm açıklayıcı değişkenlerin gelir eşitsizliği üzerinde istatistiksel olarak anlamlı ve kalıcı etkilere sahip olduğunu

göstermektedir. Spekülatif baskı (SPRESSURE) değişkeni gelir eşitsizliğini uzun dönemde artırıcı yönde etkilemektedir. Geniş tanımlı para arzı (BMONEY) değişkeninin katsayısı negatif olup, parasal genişlemenin uzun vadede gelir eşitsizliğini azaltıcı bir etki yarattığını ortaya koymaktadır. Teknolojik yenilik (TPATENT) göstergesi gelir eşitsizliği üzerinde pozitif ve anlamlı bir etkiye sahiptir. Benzer şekilde finansal küreselleşme (FGLOBAL) değişkeni de uzun dönemde gelir eşitsizliğini artırıcı yönde etkilemektedir. Bu sonuçlar, gelir eşitsizliğinin finansal istikrarsızlık, küresel entegrasyon ve teknolojik dönüşüm karşısında artma eğilimi gösterdiğini, buna karşılık parasal derinleşme ile dengelenebildiğini ortaya koymaktadır.

Tablo 5. ECM Mekanizması Bulguları

Değişken	Katsayı	T-İstatistik	Olasılık
D(GINI(-1))	0.3486***	3.6938	0.0022
D(GINI(-2))	0.5034***	4.8210	0.0002
D(SPRESSURE)	0.0032***	4.5441	0.0004
D(SPRESSURE(-1))	-0.0035***	-5.2523	0.0001
D(BMONEY)	-0.0062	-0.6999	0.4947
D(BMONEY(-1))	0.1026***	6.7248	0.0000
D(BMONEY(-2))	0.0666***	5.8433	0.0000
D(TPATENT)	-0.0001	-1.4193	0.1762
D(TPATENT(-1))	-0.0004***	-5.3418	0.0001

D(FGLOBAL(-2))	-0.1207***	-8.9964	0.0000
COINT(-1)	-0.708***	-9.4474	0.0000

NOT: ***, ** ve * sırasıyla %1, %5 ve %10 düzeylerindeki anlamlılığı göstermektedir.

Tablo 5'te sunulan ECM mekanizması bulguları, gelir eşitsizliğinin kısa dönemde yüksek süreklilik ve geçmişe bağımlılık sergileyen bir uyum sürecine sahip olduğunu göstermektedir. Hata düzeltme terimi (COINT−1) negatif ve istatistiksel olarak yüksek düzeyde anlamlı olup, kısa dönemde ortaya çıkan dengesizliklerin uzun dönem dengeye hızlı biçimde geri döndüğünü ortaya koymaktadır. Spekülatif baskı (SPRESSURE) cari dönemde eşitsizliği artırırken, bir dönem gecikmeli etkisinin azaltıcı yönde olduğu görülmektedir. Geniş tanımlı para arzı (BMONEY) cari dönemde anlamsızken, bir ve iki dönem gecikmeli etkileri pozitif ve anlamlıdır. Teknolojik yenilik (TPATENT) cari dönemde anlamsız olmakla birlikte, gecikmeli etkilerinin negatif ve anlamlı olduğu tespit edilmiştir. Finansal küreselleşme (FGLOBAL) değişkeni cari dönemde anlamsızken, bir ve iki dönem gecikmeli etkileri negatif ve istatistiksel olarak güçlüdür. Bu bulgular, gelir eşitsizliğinin kısa dönemde finansal, parasal ve teknolojik şoklara gecikmeli ve yön değiştiren tepkiler verdiğini göstermektedir.

5. TARTIŞMA VE SONUÇ

Bu çalışma, Türkiye'de gelir eşitsizliğinin finansal ve teknolojik dinamiklere karşı yüksek derecede duyarlı bir yapı sergilediğini ortaya koymaktadır. Elde edilen bulgular, gelir dağılımının yalnızca reel ekonomik göstergelerle değil, aynı zamanda finansal kırılganlıklar, küresel finansal entegrasyon düzeyi ve teknolojik dönüşüm süreçleriyle birlikte şekillendiğini göstermektedir. Bu sonuç, gelir eşitsizliğini makroekonomik istikrar ve finansal yapıdan bağımsız ele alan yaklaşımların sınırlı kaldığını ortaya koymaktadır.

Uzun dönem analiz sonuçları, finansal baskı endeksinin gelir eşitsizliği üzerindeki artırıcı etkisini açık biçimde ortaya koymaktadır. Bu bulgu, spekülatif baskı dönemlerinde döviz kuru oynaklığı, faiz oranı artışları ve finansal belirsizliklerin özellikle düşük ve orta gelir gruplarını daha olumsuz etkilediğini ima etmektedir. Benzer şekilde, küresel finansal entegrasyonun gelir eşitsizliğini artırıcı yönde etkide bulunması, küresel sermaye hareketlerinin ve finansal getirilerin belirli kesimlerde yoğunlaşması yoluyla eşitsizlikleri derinleştirebildiğine işaret etmektedir. Bu sonuç, finansal küreselleşmenin her koşulda kapsayıcı refah artışı sağlamadığına yönelik literatürdeki eleştirel yaklaşımlarla uyumludur. Buna karşılık, finansal gelişmeyi temsilen kullanılan geniş para arzının gelir eşitsizliği üzerindeki azaltıcı etkisi, para politikasının yalnızca fiyat istikrarı değil, aynı zamanda gelir dağılımı açısından da önemli bir politika aracı olabileceğini göstermektedir. Para arzının genişlemesi yoluyla krediye erişimin artması ve ekonomik faaliyetlerin desteklenmesi, gelir dağılımı üzerindeki olumsuz etkilerin yumuşatılmasına katkı sunabilmektedir. Bu yönüyle bulgular, finansal gelişmenin uygun kurumsal çerçeve altında eşitsizlikleri azaltıcı bir mekanizma işlevi görebileceğini ortaya koymaktadır.

Teknolojik yeniliklere ilişkin elde edilen pozitif katsayı ise, Türkiye'de inovasyon süreçlerinin henüz kapsayıcı bir ekonomik yapı oluşturmadığını göstermektedir. Teknolojik ilerlemenin, nitelikli işgücü lehine gelir farklarını artırması ve teknolojiye erişimdeki eşitsizlikler yoluyla gelir dağılımını bozucu bir etki yaratması, teknolojik dönüşümün dağılımsal boyutunun politika tasarımında yeterince dikkate alınmadığını düşündürmektedir.

Kısa dönem sonuçları, finansal şokların gelir dağılımı üzerinde hızlı ve güçlü etkiler yarattığını; ancak bu etkilerin kalıcı olmadığını ortaya koymaktadır. Negatif ve istatistiksel olarak anlamlı hata düzeltme katsayısı, sistemin kısa sürede uzun dönem dengesine geri döndüğünü göstermektedir. Bu durum, gelir eşitsizliğinin kısa vadede finansal dalgalanmalara oldukça duyarlı olduğunu, ancak yapısal politikalar ve kurumsal mekanizmalar sayesinde uzun vadede yeniden dengeye gelebileceğini ima etmektedir.

Genel olarak değerlendirildiğinde, çalışma sonuçları gelir eşitsizliğiyle mücadelenin yalnızca sosyal transfer politikalarıyla sınırlı kalmaması gerektiğini göstermektedir. Finansal istikrarın güçlendirilmesi, spekülatif baskıların sınırlandırılması, küresel sermaye hareketlerinin etkin biçimde yönetilmesi ve para politikasının dağılım etkilerinin gözetilmesi, daha kapsayıcı bir büyüme patikasının oluşturulması açısından kritik öneme sahiptir. Ayrıca teknolojik gelişmenin, geniş toplum kesimlerine yayılan kapsayıcı inovasyon stratejileriyle desteklenmesi, gelir eşitsizliğinin azaltılmasına yönelik tamamlayıcı bir politika alanı olarak öne çıkmaktadır. Bu çerçevede çalışma, Türkiye için gelir dağılımı, finansal istikrar ve sürdürülebilir kalkınma arasındaki ilişkinin bütüncül biçimde ele alınması gerektiğine işaret etmektedir.

Bu çalışmadan elde edilen bulgular, Eşitsizliklerin Azaltılması (SDG 10) ve bu amacın alt hedefleriyle doğrudan ilişkilidir. SDG 10, yalnızca gelir dağılımındaki bozulmaların azaltılmasını değil; aynı zamanda ekonomik, finansal ve kurumsal süreçlerin kapsayıcı biçimde yeniden yapılandırılmasını hedeflemektedir. Bu bağlamda, çalışmanın ampirik sonuçları, SDG 10'un özellikle 10.1, 10.4 ve 10.5 alt hedeflerine önemli katkılar sunmaktadır. Öncelikle, finansal istikrarsızlık ve küresel finansal entegrasyonun gelir eşitsizliğini artırıcı etkileri, SDG 10.1 (en alt gelir gruplarının gelir artışının hızlandırılması) açısından kritik bir risk alanına işaret etmektedir. Finansal baskı dönemlerinde düşük ve orta gelir gruplarının gelir ve istihdam kayıplarına daha açık hâle gelmesi, eşitsizliklerin yapısal olarak derinleşmesine neden olabilmektedir. Bu bulgu, makroekonomik istikrarın sağlanmasının yalnızca büyüme değil, aynı zamanda eşitsizliklerin azaltılması açısından da temel bir ön koşul olduğunu göstermektedir.

İkinci olarak, finansal gelişmeyi temsilen kullanılan geniş para arzının gelir eşitsizliğini azaltıcı etkisi, SDG 10.4 (mali, ücret ve sosyal koruma politikaları yoluyla eşitliğin sağlanması) ile örtüşmektedir. Para arzı kanalıyla finansal erişimin genişlemesi ve ekonomik faaliyetlerin desteklenmesi, gelir dağılımı üzerindeki olumsuz baskıları hafifletebilmektedir. Bu sonuç, para politikasının dağılım etkilerinin göz ardı edilmemesi gerektiğini ve kapsayıcı mali–parasal politika bileşimlerinin SDG 10 hedeflerine ulaşmada önemli bir araç sunduğunu ortaya koymaktadır. Buna karşılık, teknolojik yeniliklerin gelir eşitsizliğini artırıcı yönde etkide bulunması, SDG 10.2 (sosyal, ekonomik ve politik kapsayıcılığın güçlendirilmesi) açısından önemli bir politika boşluğuna işaret etmektedir. Teknolojik ilerlemenin nitelikli işgücü lehine gelir farklarını artırması ve teknolojiye erişimdeki eşitsizlikler, inovasyonun kapsayıcı olmayan bir yapıda ilerlediğini göstermektedir. Bu durum, teknolojik dönüşümün sosyal ve bölgesel eşitsizlikleri azaltacak şekilde yönlendirilmesinin gerekliliğini ortaya koymaktadır. Son olarak, finansal kırılganlıkların ve küresel sermaye hareketlerinin gelir dağılımı üzerindeki etkileri, SDG 10.5 (finansal piyasaların düzenlenmesi ve izlenmesinin güçlendirilmesi) ile doğrudan ilişkilidir. Bulgular, spekülatif baskıların sınırlandırılması ve finansal piyasaların daha etkin düzenlenmesinin, eşitsizlikleri azaltmaya yönelik sürdürülebilir politika çerçevesinin ayrılmaz bir parçası olduğunu göstermektedir.

Genel olarak değerlendirildiğinde, çalışma sonuçları SDG 10'un yalnızca sosyal politika alanında değil, finansal istikrar, para politikası, küresel sermaye yönetimi ve teknolojik dönüşüm politikalarıyla birlikte ele alınması gerektiğini ortaya koymaktadır. Bu yönüyle çalışma, SDG 10 hedeflerine ulaşılmasında makroekonomik ve finansal politikaların merkezi rolünü vurgulayan bütüncül bir perspektif sunmaktadır.

ÖZET

Bu çalışma, Avrupa Birliği'nin iklim değişikliğiyle mücadele kapsamında uygulamaya koyduğu Sınırda Karbon Düzenleme Mekanizması (CBAM) ile halihazırda uygulanan Emisyon Ticaret Sistemi (ETS)'ni ekonomik, çevresel ve sektörel boyutlarıyla incelemeyi amaçlamaktadır. CBAM, Avrupa Birliği dışından ithal edilen karbon yoğun ürünlerin, ETS kapsamında Avrupa'daki eşdeğer ürünlerle aynı karbon maliyetine tabi tutulmasını öngörmektedir. Bu düzenlemenin temel hedefi, karbon sızıntısını önlemek ve Avrupa sanayisinin rekabet gücünü korurken küresel ölçekte karbon emisyonlarını azaltmaktır. Çalışmada, ETS'nin tarihsel gelişimi, işleyiş mekanizması ve karbon fiyatlandırması üzerindeki etkileri detaylandırılmış, CBAM'ın sektörler üzerindeki potansiyel etkileri ifade edilmiştir. Özellikle demir-çelik, alüminyum, çimento, elektrik ve gübre gibi enerji yoğun sektörler özelinde, bu düzenlemelerin üretim maliyetleri, dış ticaret dengesi ve yatırım kararları üzerindeki etkilerine değinilmiştir. Ayrıca Türkiye özelinde CBAM'ın ihracat üzerindeki olası etkileri tartışılmış, Türkiye'nin bu sürece uyum sağlamak için atması gereken adımlar ele alınmıştır. Makro iktisadi düzeyde yapılan incelemeler, CBAM ve ETS gibi karbon fiyatlandırma mekanizmalarının enflasyon, üretim yapısı ve rekabetçilik üzerinde hem kısa vadeli maliyetler hem de uzun vadeli fırsatlar sunduğunu göstermektedir. Bu bağlamda, karbon düzenlemelerinin sadece çevresel bir araç değil, aynı zamanda sanayi politikası ve ticaret stratejisiyle entegre biçimde değerlendirilmesi gerektiği vurgulanmaktadır.

Anahtar Kelimeler: CBAM, ETS, Sürdürülebilirlik

CARBON BORDER ADJUSTMENT MECHANISM (CBAM) AND EMISSIONS TRADING SYSTEM (ETS): AN ASSESSMENT FROM THE PERSPECTIVE OF THE EUROPEAN UNION AND TURKEY

ABSTRACT

This study aims to examine the Carbon Border Adjustment Mechanism (CBAM) implemented by the European Union as part of its efforts to combat climate change, along with the existing Emissions Trading System (ETS), in terms of their economic, environmental and sectoral dimensions. CBAM envisages that carbon-intensive products imported from outside the European Union will be subject to the same carbon costs as equivalent products within the ETS in Europe. The main objective of this regulation is to prevent carbon leakage and reduce carbon emissions on a global scale while maintaining the competitiveness of European industry. The study details the historical development of the ETS, its operating mechanism and its effects on carbon pricing, and outlines the potential impacts of CBAM on various sectors. It specifically addresses the effects of these regulations on production costs, foreign trade balance and investment decisions, particularly in energy-intensive sectors such as iron and steel, aluminium, cement, electricity and fertilisers. Furthermore, the potential effects of CBAM on exports in Turkey are discussed, and the steps Turkey needs to take to adapt to this process are addressed. Macroeconomic analyses show that carbon pricing mechanisms such as CBAM and ETS offer both short-term costs and long-term opportunities in terms of inflation, production structure, and competitiveness. In this context, it is emphasised that carbon regulations should be evaluated not only as an environmental tool but also in an integrated manner with industrial policy and trade strategy.

Keywords: CBAM, ETS, Sustainability

1. GİRİŞ

Küresel ısınma ve iklim değişikliği, son yıllarda dünya genelinde ekonomik ve siyasi karar mekanizmalarının merkezine yerleşmiş en kritik sorunlardan biri haline gelmiştir. Sera gazı emisyonlarının artışıyla birlikte atmosferdeki karbon yoğunluğu yükselmekte, bu da hem çevresel hem de ekonomik kırılganlıkları derinleştirmektedir. Bu bağlamda, sürdürülebilir kalkınma hedefleri doğrultusunda çevresel maliyetlerin piyasa mekanizması içinde fiyatlanması ve iklim değişikliği ile mücadelede etkin araçların geliştirilmesi giderek önem kazanmaktadır (Flues ve van Dender, 2017)

Avrupa Birliği (AB) bu kapsamda öncü bir aktör olarak öne çıkmakta ve "Avrupa Yeşil Mutabakatı" (European Green Deal) çerçevesinde önemli düzenlemeleri hayata geçirmektedir (European Commission, 2019). Bu düzenlemelerin merkezinde yer alan iki temel mekanizma, Emisyon Ticaret Sistemi (ETS) ve Sınırda Karbon Düzenleme Mekanizması (CBAM)'dır. ETS, piyasaya dayalı bir karbon fiyatlama aracı olarak, AB içinde sera gazı emisyonlarının azaltılmasını hedeflerken; CBAM, AB dışından gelen malların karbon içeriğini dengeleyerek karbon kaçağını önlemeye ve küresel ticarette karbon fiyatlamasında eşitliği sağlamaya çalışmaktadır (Mehling vd., 2019).

Söz konusu mekanizmalar sadece çevresel boyutlarıyla değil, aynı zamanda ekonomik ve sektörel etkileriyle de dikkat çekmektedir. Bu noktada çimento, demir-çelik, alüminyum, enerji ve gübre gibi karbon yoğun sektörler hem AB'de hem de bu bölgeyle ekonomik ilişkileri yoğun olan ülkelerde önemli bir dönüşüm süreciyle karşı karşıya kalmaktadır (Flues ve van Dender, 2017). Türkiye, Gümrük Birliği kapsamında AB ile derin ekonomik entegrasyon içinde yer aldığından, bu dönüşümün etkilerini güçlü bir şekilde hissedecek ülkelerin başında gelmektedir.

Bu çalışmanın temel amacı, CBAM ve ETS mekanizmalarını kavramsal ve işleyişsel düzeyde açıklamak; AB ve Türkiye açısından bu sistemlerin etkilerini makroekonomik bir perspektiften değerlendirmek ve özellikle sektör bazında ortaya çıkabilecek sonuçları ifade etmektir. Çalışmada bu doğrultuda ilk olarak CBAM ve ETS'nin kavramsal çerçevesi sunulmuş, AB perspektifinden bu mekanizmaların gelişimi ve uygulanışı ele alınmıştır. Türkiye'nin durumu, bu mekanizmaların Türkiye ekonomisine etkisi ve sektör bazlı değerlendirmeler yapılarak makroekonomik değerlendirme kapsamında dış ticaret, üretim ve yatırım gibi göstergelere değinilmiştir.

2. KAVRAMSAL ÇERÇEVE

2.1 Emisyon Ticaret Sistemi (ETS)

Emisyon Ticaret Sistemi, çevreye zarar veren karbon ve diğer sera gazı emisyonlarını azaltmaya yönelik piyasa tabanlı bir çevre politikası aracıdır. Bu sistemde, hükümetler ya da uluslararası otoriteler, belli bir zaman dilimi için toplam bir emisyon kotası belirlemektedir. Bu kota, genellikle bir ülkenin ya da sektörün sera gazı azaltım hedefleri doğrultusunda tespit edilmektedir. Bu sınır doğrultusunda işletmelere veya kuruluşlara belli miktarda emisyon izinleri (allowances) verilmektedir. Eğer bir işletme, kendisine tahsis edilen izin miktarından daha az emisyon üretmesi durumunda fazla izinlerini başka bir işletmeye satabilmektedir.

Tersine, belirlenen kotayı aşan işletmeler ise ya piyasadan izin satın almak ya da ceza ödemek zorundadır (Ellerman vd., 2010).

ETS'nin temel prensibi, “kirleten öder” ilkesindir. Ancak bu ilke, geleneksel anlamda doğrudan ceza mekanizmaları yerine piyasa teşvikleriyle hayata geçirilmektedir. Sistemin işleyişi, arz ve talep dengesi çerçevesinde izinlerin fiyatının oluşmasına olanak sağlamaktadır. Bu durum, işletmeleri daha verimli üretim tekniklerine yönelmeye ve daha az karbon emisyonu ile faaliyet göstermeye teşvik etmektedir (Stavins, 2007).

AB ETS, 2005 yılında devreye girmiştir ve dünyanın en büyük karbon ticaret sistemidir. Sistem üç temel aşamadan geçmiş, dördüncü aşaması ise 2021-2030 dönemini kapsamaktadır. İlk dönemlerde emisyon hakları ücretsiz olarak dağıtılırken, zamanla bu hakların açık artırma yoluyla satılması sistemin merkezine yerleşmiştir. Sistemin kapsamına enerji üretimi, enerji yoğun sanayi kolları ve havacılık sektörü girmektedir. Bu alanlar, AB toplam emisyonlarının yaklaşık %40’ını oluşturmaktadır (European Commission, 2023).

ETS'nin temel faydası, karbon fiyat sinyali oluşturarak temiz teknoloji yatırımlarını teşvik etmesidir. Aynı zamanda karbon yoğun sektörler arasında maliyet etkinliği sağlayarak toplam azaltım hedeflerine ulaşılmasını kolaylaştırmaktadır (Flues ve van Dender, 2017). Her ne kadar ETS etkin bir çevre politikası aracı olarak öne çıksa da, uygulama aşamasında çeşitli zorluklar barındırmaktadır. Bunların başında, izin arzının fazla olması gelmektedir. Özellikle ilk uygulama dönemlerinde piyasa dengesinin doğru kurulamaması, izin fiyatlarının aşırı düşmesine neden olmuş ve sistemin etkinliğini azaltmıştır. Ayrıca, bazı sektörlerin ücretsiz tahsisatla korunması, sistemin piyasa mantığına ters düşen sonuçlar doğurabilmektedir (Laing vd., 2013).

2.1.1. ETS’nin Tarihsel Gelişimi ve Uluslararası Çerçeve

Emisyon ticareti ilk olarak 1997 Kyoto Protokolü çerçevesinde uluslararası iklim politikalarına dahil edilmiştir. Kyoto Protokolü, sanayileşmiş ülkelere toplam sera gazı emisyonlarını azaltma yükümlülüğü getirirken, bu hedeflere ulaşmada piyasa temelli esneklik mekanizmaları öngörmüştür. Bu mekanizmalardan biri olan "Emisyon Ticareti", protokolün 17. maddesiyle tanımlanmış ve uluslararası alanda yasal zemine oturtulmuştur (UNFCCC, 1998).

Kyoto Protokolü’nün ardından Avrupa Birliği, 2005 yılında Avrupa Birliği Emisyon Ticaret Sistemi (EU ETS)’ni başlatarak dünyanın en büyük ve en kapsamlı ETS platformunu oluşturmuştur. EU ETS, zamanla kapsamını genişleterek enerji, sanayi ve havacılık gibi sektörleri içine almıştır. Sistem, 2021 yılında Dördüncü Faza geçmiştir ve karbon fiyatlarının daha istikrarlı ve yüksek düzeyde seyretmesini sağlamıştır (European Commission, 2021).

2.1.2. ETS'nin İşleyiş Mekanizması

Emisyon Ticaret Sistemi’nin temel unsurları; emisyon sınırı (Cap), izin Tahsisi (Allocation), raporlama ve doğrulama, ticaret (Trade) ve uygunluk ve yaptırımlar olarak sıralanabilir.

- Emisyon Sınırı (Cap): Sistemin çevresel etkinliğini sağlayan temel unsur, toplam emisyon sınırının önceden belirlenmesidir. Bu sınır, her yıl kademeli olarak düşürülerek toplam emisyon azaltımı sağlanır.

- İzin Tahsisi (Allocation): Emisyon izinleri, ücretsiz olarak ya da açık artırma yöntemiyle dağıtılır. Serbest tahsis yöntemi, başlangıçta sanayi rekabet gücünü korumak amacıyla sıkça kullanılmıştır.
- Ticaret (Trade): İşletmeler, emisyon izinlerini serbest piyasada alıp satabilirler. Bu mekanizma, maliyet etkinliğini artırır.
- Raporlama ve Doğrulama: Katılımcı firmalar yıllık emisyonlarını raporlamakla yükümlüdür. Bu veriler bağımsız doğrulayıcılar tarafından denetlenir.
- Uygunluk ve Yaptırımlar: Emisyonlarını karşılayacak yeterli izni olmayan işletmeler para cezaları ile karşı karşıya kalır. Bu da sistemin caydırıcılığını artırır (Tietenberg, 2010).

2.1.3. ETS'nin Ekonomik ve Çevresel Etkileri

ETS, çevresel faydaların yanı sıra birçok ekonomik avantaj da sunmaktadır. Piyasa temelli bir sistem olması nedeniyle, emisyon azaltımı hedeflerine en düşük maliyetle ulaşılması sağlanır. Bu özellik, sabit oranlı vergi ya da doğrudan düzenleyici önlemlere kıyasla daha esnek bir yapı sunar. Ayrıca, ETS kapsamında karbon fiyatlarının oluşması, düşük karbonlu teknolojilerin gelişimini teşvik eder. Bu bağlamda, karbon fiyatlaması yeşil inovasyonun önemli bir itici gücü haline gelmektedir (Newell vd., 2014).

Çevresel açıdan değerlendirildiğinde, ETS uygulamaları sera gazı emisyonlarını azaltma yönünde kayda değer etkiler yaratmıştır. Örneğin, Avrupa Birliği'nde uygulanan sistem sayesinde 2005–2020 yılları arasında ETS kapsamındaki sektörlerin emisyonlarında %40'a varan bir azalma sağlanmıştır (European Environment Agency, 2020).

2.2. Sınırda Karbon Düzenleme Mekanizması (CBAM)

Küresel ısınma ve iklim değişikliğiyle mücadele kapsamında karbon emisyonlarının azaltılması, başta Avrupa Birliği (AB) olmak üzere birçok ülkenin politika öncelikleri arasında yer almaktadır. Bu kapsamda geliştirilen çeşitli piyasa temelli araçlar ve düzenlemeler hem çevresel sürdürülebilirliğe katkı sağlamakta hem de ekonomik faaliyetlerin karbonsuzlaştırılmasını teşvik etmektedir. Bu araçlardan biri olan Sınırda Karbon Düzenleme Mekanizması (Carbon Border Adjustment Mechanism, CBAM), Avrupa Yeşil Mutabakatı'nın bir parçası olarak 2021 yılında Avrupa Komisyonu tarafından önerilmiş ve 2023 itibarıyla geçiş süreci başlamıştır. CBAM, AB dışında üretilen ve karbon yoğunluğu yüksek olan ürünlerin AB pazarına girişinde, karbon maliyetinin dâhil edilmesini öngören bir mekanizmadır (European Commission, 2021).

Avrupa Birliği, 2050 yılına kadar net sıfır sera gazı emisyonuna ulaşmayı hedeflemektedir. Bu hedef doğrultusunda oluşturulan Avrupa Yeşil Mutabakatı (European Green Deal), enerji, sanayi, ulaşım, tarım ve ticaret gibi alanlarda kapsamlı dönüşümler öngörmektedir. Ancak karbon emisyonlarının azaltılmasına yönelik sıkı çevre politikalarının, yerli üreticiler açısından rekabet dezavantajı yaratma riski bulunmaktadır. Bu durum "karbon kaçağı (carbon leakage)" olarak adlandırılmaktadır. Karbon kaçağı, üretimin daha düşük çevre standartlarına sahip ülkelere kayması sonucunda küresel emisyonların artmasına yol açmaktadır (Cosbey vd., 2019).

CBAM, bu riski azaltmayı ve AB'nin iklim hedeflerine ulaşmasını desteklemeyi amaçlamaktadır. Mekanizma, karbon yoğunluğu yüksek sektörlerde ithal edilen ürünlerin, AB içerisindeki üreticilere uygulanan karbon fiyatlandırmasıyla eşdeğer bir maliyete tabi tutulmasını sağlamaktadır. Böylece çevreye duyarlı üretim yöntemleri teşvik edilirken, adil rekabet koşulları korunmaktadır (European Commission, 2021).

CBAM, iklim politikaları açısından önemli bir yenilik olmakla birlikte bazı eleştirilerle de karşı karşıyadır. Öncelikle gelişmekte olan ülkeler, mekanizmayı yeni bir korumacılık aracı olarak değerlendirmektedir. Bu ülkeler, CBAM'ın aslında çevresel amaçlardan çok sanayi korumacılığına hizmet ettiğini öne sürmektedir (Pauwelyn, 2013).

2.2.1. Kapsam ve Uygulama Süreci

CBAM, başlangıçta altı sektörü kapsamaktadır: çimento, demir-çelik, alüminyum, gübre, elektrik ve hidrojen. Bu sektörler, yüksek karbon yoğunluğu ve uluslararası ticaret hacmi açısından öne çıkmaktadır. CBAM, AB dışından gelen bu ürünlerin karbon içeriklerine göre belirli bir maliyet uygulanmasını öngörür. İthalatçılar, ürünlerinin üretiminde ortaya çıkan doğrudan ve dolaylı karbon emisyonlarını beyan etmek ve buna göre "CBAM Sertifikası" satın almak zorundadır (Van Asselt, 2021).

CBAM'ın uygulama süreci iki aşamalıdır:

1. Geçiş Dönemi (2023–2025): Bu dönemde sadece raporlama yükümlülüğü bulunmaktadır. İthalatçılar, ürünlerinin karbon içeriğine ilişkin verileri düzenli olarak Avrupa Komisyonu'na bildirecektir. Herhangi bir mali yükümlülük uygulanmamaktadır.

2. Tam Uygulama Dönemi (2026 ve sonrası): 2026'dan itibaren CBAM sertifikaları zorunlu hale gelecek ve ithalatçılar karbon içeriklerine göre maliyet ödeyecektir. Üçüncü ülkelerde benzer bir karbon fiyatlandırma sistemi varsa, bu maliyet CBAM yükümlülüğünden düşülebilecektir (European Commission, 2021).

2.2.2. CBAM'ın Küresel Ticaret Üzerindeki Etkileri

CBAM, küresel ticaret açısından önemli sonuçlar doğuracaktır. Öncelikle, gelişmekte olan ülkeler bu mekanizmadan olumsuz etkilenebilir. Özellikle karbon yoğunluğu yüksek ürünleri AB'ye ihraç eden ülkeler, ek maliyetlerle karşı karşıya kalabilir. Bu durum, bu ülkelerin ihracat gelirlerini azaltabileceği gibi, üretimde çevre dostu teknolojilere geçiş baskısı yaratabilir (Mattoo vd., 2009). Ancak CBAM, aynı zamanda yeşil dönüşüm için teşvik edici bir araç olarak değerlendirilmektedir. Üçüncü ülkeler, karbon fiyatlandırma sistemlerini benimseyerek hem çevresel performanslarını artırabilir hem de CBAM maliyetlerinden muaf tutulabilir. Bu anlamda mekanizma, küresel düzeyde karbon fiyatlandırmasının yaygınlaştırılmasına katkı sağlayabilir (Mehling vd., 2019).

CBAM'ın Dünya Ticaret Örgütü (DTÖ) kurallarına uygunluğu da tartışma konusudur. Ticarette ayrımcılığa yol açmadan uygulanması, AB'nin dış politika hedefleriyle uyumlu hale getirilmesi gerekmektedir. Bu nedenle CBAM, çevresel hedefler ile uluslararası ticaret normlarının dengelenmesi açısından kritik bir örnek oluşturmaktadır.

3. AVRUPA BİRLİĞİ PERSPEKTİFİNDEN CBAM VE ETS

3.1 AB İklim Politikalarının Evrimi: "Yeşil Mutabakat"a Giden Süreç

Avrupa Birliği, iklim değişikliği ile mücadelede dünya genelinde öncü bir rol oynamaktadır. Bu öncülük, Kyoto Protokolü'nden bu yana sürdürülmekte olup özellikle 2015 Paris Anlaşması ve 2019 tarihli Avrupa Yeşil Mutabakatı ("European Green Deal") ile kurumsal temelleri derinleştirilmiştir. Yeşil Mutabakat, 2050 yılına kadar Avrupa'yı dünyanın ilk "iklim nötr" kıtası yapmayı hedeflemektedir (European Commission, 2019). Bu hedef doğrultusunda sera gazı emisyonlarının 2030'a kadar %55 oranında azaltılması, enerji verimliliği hedeflerinin yükseltilmesi ve yenilenebilir enerjiye geçişte hız kazanılması gibi politikalar devreye sokulmuştur. Bu dönüşümün temel finansman araçları arasında Avrupa İklim Fonu, "Just Transition Mechanism" ve Avrupa Yatırım Bankası'nın iklim finansmanı programları yer almaktadır (Krawchenko ve Gordon, 2021).

ETS ve CBAM, bu geniş vizyonun iki temel enstrümanıdır. Nitekim ETS iç piyasada karbon maliyetini yansıtırken, CBAM dış ticarette bu maliyetin ithalatçılara da yüklenmesini sağlamaktadır. Böylece karbon kaçağı riski azaltılırken, AB sanayisinin rekabet gücü ve yeşil dönüşüm ivmesi korunmuş olmaktadır. CBAM'ın yasal altyapısı, AB'nin iklim hedeflerine dayandırılmış olup, Dünya Ticaret Örgütü (WTO) kuralları ile uyumlu hale getirilmesi amacıyla çevresel gerekçeler açıkça vurgulanmıştır. Bu, özellikle gelişmekte olan ülkelerin "yeşil korumacılık" eleştirilerine karşı bir ön savunma mekanizmasıdır (Mehling vd., 2019).

CBAM sisteminde yer alan unsurlar Şekil 1.'de gösterilmektedir. Bu doğrultuda ilk olarak ithal ürünlerin karbon içeriği ölçülür. Daha sonra ilgili ülkede zaten karbon fiyatlandırması varsa, AB bu maliyeti mahsup eder. Bir sonraki adımda her ürün için birim başına karbon emisyonu belirlenir. Son olarak firmalar bu oranlara göre "CBAM sertifikaları" satın alınmaktadır.

Görsel 1. CBAM Sisteminde Yer Alan Unsurlar

CBAM, karbon kaçağını önlemenin yanı sıra, AB dışındaki ülkeleri de karbon fiyatlamaya zorlayan bir dışsal baskı mekanizmasıdır. Bu yönüyle uluslararası iklim politikalarında yön verici bir araç haline gelmiştir (Marcu vd., 2021).

3.2 ETS'nin Uygulanışı ve Dönemsel Gelişimi

AB Emisyon Ticaret Sistemi (EU ETS), 2005 yılında faaliyete geçmiş olup bugün enerji santralleri, ağır sanayi tesisleri ve havayolu taşımacılığı dahil olmak üzere yaklaşık 10.000'den fazla tesis için bağlayıcıdır. Sistem dört dönemde gelişim göstermiştir:

1. Dönem (2005-2007): Pilot aşama. Haklar ücretsiz dağıtılmış, deneme süreci ağırlıklı olarak gerçekleşmiştir.
2. Dönem (2008-2012): Kyoto hedefleriyle uyumlu hale getirildi. Emisyonlarda düşüş başlamıştır.
3. Dönem (2013-2020): Tek bir AB tavanı belirlendi. Artan ölçüde açık artırma uygulanmıştır.
4. Dönem (2021-2030): Emisyon azaltım hızı artırıldı (%2.2/yıl → %4.2/yıl), karbon piyasası istikrar rezervi (MSR) devreye girmiştir.

AB ETS, 2023 yılı itibarıyla karbon fiyatlarını ton başına 80–100 € aralığında tutmakta ve bu durum yatırım kararlarını ciddi ölçüde etkilemektedir (ICAP, 2023). Ayrıca AB, ETS kapsamında elde ettiği gelirleri iklim yatırımlarına yönlendirmektedir. 2022 yılında yalnızca açık artırmalardan 30 milyar €'ya yakın gelir elde edilmiştir (European Commission, 2023a).

Bu sistem, iktisadi rasyonalite açısından "en az maliyetle emisyon azaltımı" hedefini gerçekleştiren piyasa temelli bir çözüm olarak değerlendirilmekte ve birçok ülkede benzer modellerin kurulmasına ilham olmaktadır (Sterner ve Coria, 2013).

3.3 Sektörel Etkiler ve İktisadi Yansımalar

CBAM'ın ilk aşamada kapsadığı sektörler; çimento, demir-çelik, gübre, alüminyum ve elektrik üretimidir. Bu sektörler yüksek karbon yoğunlukları nedeniyle öncelikli seçilmiş ve AB'ye yapılan ithalat hacmi göz önüne alınmıştır.

Ekonomik modelleme çalışmaları, CBAM'ın etkilerini birkaç maddede özetlenebilmektedir. İlk olarak AB içi üretim artarken, karbon yoğun üretim ithalatı düşmektedir (Böhringer vd., 2022). Gelişmekte olan ülkeler için AB pazarına erişim zorlaşabilmektedir. AB'de karbon fiyatları artarken, inovasyon ve temiz üretim teknolojilerine yönelim hızlanmaktadır. Ancak CBAM'ın ticaret sapması, dış ticarette maliyet artışı ve yoksul ülkelerle olan ilişkilerde gerilim gibi yan etkileri de bulunmaktadır (Cosbey vd., 2019). Bu nedenle AB, CBAM politikalarının eşlikçisi olarak gelişmekte olan ülkelere teknik ve mali destek sunmayı planlamaktadır.

4. TÜRKİYE PERSPEKTİFİNDEN CBAM VE ETS

4.1 Türkiye'nin Yeşil Dönüşümü

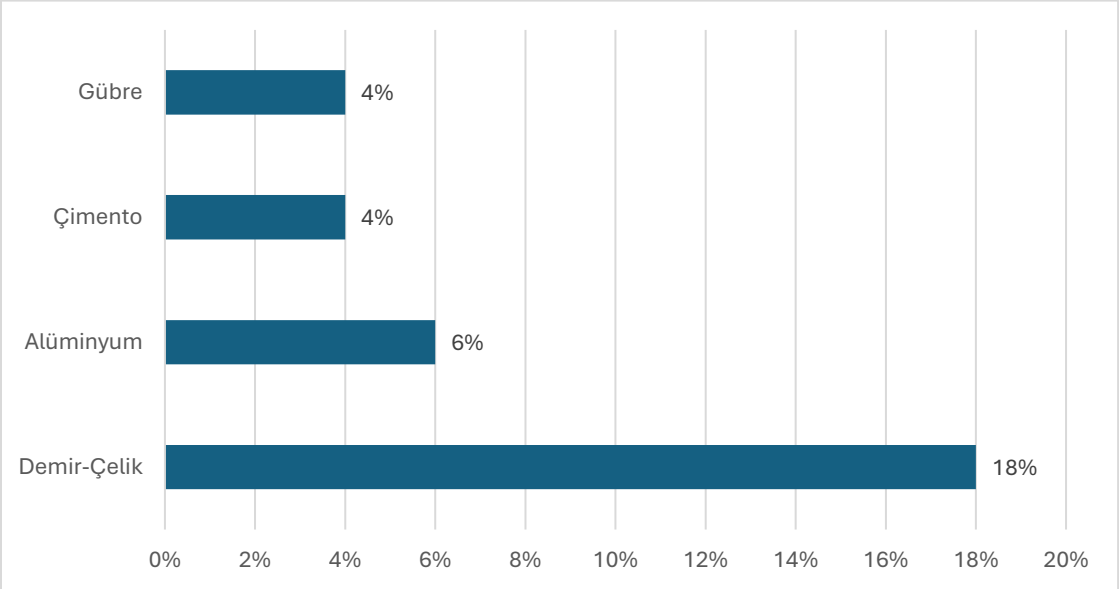
Türkiye, 2021 yılında Paris İklim Anlaşması'nı onaylamış ve 2053 yılı için "karbon nötr" hedefini ilan etmiştir. Bu kapsamda, 2022 yılında yayımlanan İklim Şurası Sonuç Raporu ve Yeşil Mutabakat Eylem Planı, CBAM sürecine uyumda kritik belge niteliğindedir (T.C. Çevre, Şehircilik ve İklim Değişikliği Bakanlığı, 2022).

Ayrıca Ulusal Emisyon Ticaret Sistemi (ETS) kurulması yönünde çalışmalar başlatılmış, 2024 yılı itibarıyla pilot uygulamaya geçilmesi planlanmıştır. Bu sistem, Türkiye'nin karbon fiyatlandırma altyapısını kurarak AB ile ekonomik entegrasyonunun sürdürülebilmesi açısından elzemdir (OECD, 2023).

Avrupa Yeşil Mutabakatı çerçevesinde geliştirilen politika araçlarından biri olan CBAM, AB iklim değişikliği ile mücadele hedeflerine ulaşma sürecinde kritik bir rol oynamaktadır. Avrupa Komisyonu tarafından hazırlanan CBAM taslağına göre, bu düzenlemeden ilk aşamada etkilenecek sektörler çimento, elektrik, gübre, demir-çelik ve alüminyum olarak belirlenmiştir (European Commission, 2021b). Bu sektörlerin ortak özelliği, üretim süreçlerinde yüksek düzeyde karbon salınımına neden olmalarıdır. Bu bağlamda, CBAM'nin yürürlüğe girmesiyle birlikte, söz konusu ürün gruplarını ihraç eden ülkelerin, özellikle de Türkiye gibi AB ile güçlü ticari bağlara sahip olanların, ihracat süreçlerinin olumsuz etkilenmesi kaçınılmaz görünmektedir (İmer-Ertunga ve Seyhun, 2022).

4.2 Türkiye'nin Dış Ticaret Yapısı ve CBAM

AB, Türkiye'nin en büyük ticaret ortağıdır. 2022 yılında Türkiye'nin toplam ihracatının yaklaşık %41'i AB ülkelerine gerçekleşmiştir (TÜİK, 2023). CBAM kapsamındaki sektörlerin AB'ye ihracat içindeki payı Görsel 2'de gösterilmiştir.



Kaynak: TÜİK, 2023 (Dış Ticaret İstatistikleri)

Görsel 2. Türkiye'de CBAM Kapsamındaki Sektörlerin AB'ye İhracat İçindeki Payı

Türkiye'nin CBAM kapsamındaki sektörlerin AB'ye ihracat içindeki payı oldukça yüksektir. Bu doğrultuda Demir-çelik, %18, alüminyum, %6, çimento: %4 ve gübre, %3 olarak belirlenmiştir. Bu sektörler hem enerji yoğun hem de karbon emisyonları yüksek olduğu için CBAM maliyetlerinden ilk etkilenecek alanlardır. Türkiye'nin AB'ye karbon içerikli ürün ihracatı yaklaşık 10 milyar doları aşmaktadır. Eğer karbon maliyeti yurt içinde fiyatlanmazsa, bu ürünler CBAM kapsamında ciddi bir maliyetle karşılaşacaktır (İmer-Ertunga ve Seyhun, 2022).

CBAM uygulamasının yürürlüğe alınmasına ilişkin geçiş süreci 2023-2025 yılları arasında üç aşamalı bir yol haritası çerçevesinde planlanmaktadır (European Commission, 2021d). Bu süre zarfında herhangi bir karbon vergisi öngörülmemekte; ancak, teknik ve idari altyapının oluşturulması amacıyla bir ön hazırlık süreci yürütülmektedir (European Commission, 2021c). Bu dönemde, CBAM kapsamında değerlendirilen ürün gruplarının karbon salınımına ilişkin veriler ihracatçı ülkelerden temin edilecek ve bu bilgiler Avrupa'daki ithalatçı firmalar aracılığıyla raporlanacaktır. İthalatçılar, bu süreci yönetebilmek adına ulusal otoritelerden yetki almak ve sisteme kayıt olmak durumundadır. Ayrıca her yılın 31 Mayıs tarihine kadar, bir önceki yıl ithal ettikleri ürünlerin miktarını ve bu ürünlerin neden olduğu karbon emisyonlarını raporlamakla yükümlü kılınmışlardır (İmer-Ertunga ve Seyhun, 2022).

Türkiye açısından değerlendirildiğinde, AB ile mevcut ticaret hacmi dikkate alındığında CBAM'nin yaratacağı etkiler büyük önem taşımaktadır. Bu çerçevede Türkiye, CBAM'ye uyum sağlamak ve oluşabilecek ticari kayıpları en aza indirmek amacıyla çeşitli kurumsal adımlar atmıştır. Bu doğrultuda, Ticaret Bakanlığı'nın öncülüğünde farklı bakanlıklar ve kamu kurumlarının katılımıyla bir çalışma grubu oluşturulmuş ve 15 Temmuz 2021 tarihinde "Yeşil Mutabakat Eylem Planı" kamuoyuna açıklanmıştır (T.C. Ticaret Bakanlığı, 2021). Söz konusu eylem planı, iklim değişikliği ve sürdürülebilir kalkınma konularında farkındalık yaratmayı, Avrupa Yeşil Mutabakatı ve CBAM'nin genel çerçevesini anlamayı ve Türkiye'nin bu süreçte izleyeceği yol haritasını belirlemeyi amaçlayan stratejik bir başlangıç niteliğindedir(İmer-Ertunga ve Seyhun, 2022).

Türkiye'de sürdürülen yeşil dönüşüm politikalarının bir devamı niteliğinde olan bir diğer önemli gelişme ise 21-25 Şubat 2022 tarihlerinde Konya'da düzenlenen "İklim Şûrası 2022" olmuştur. Bu etkinlik kapsamında, iklim değişikliğine neden olan sera gazı emisyonlarının azaltılmasına yönelik ulusal bir yol haritasının belirlenmesi amacıyla kamu kurumları, özel sektör temsilcileri ve sivil toplum kuruluşları bir araya gelerek tematik çalışma komisyonları oluşturmuştur (T.C. Çevre, Şehircilik ve İklim Değişikliği Bakanlığı, 2022a). Bu girişimler, Yeşil Mutabakat Eylem Planı çerçevesinde oluşturulacak politika kararlarına hem içerik hem de yön tayin etme bakımından katkı sunmaktadır (İmer-Ertunga ve Seyhun, 2022).

CBAM'ye yönelik olarak Türkiye'de yürütülen bu çalışmalar, ülkenin yeşil dönüşüm sürecine ivme kazandıracak ve sürdürülebilirlik eksenli politika yapımına destek olacaktır. CBAM'nin devreye alınması ile birlikte, yalnızca üretim süreçlerinde değil, aynı zamanda kurumsal raporlama standartlarında da dönüşüm gerekliliği doğmaktadır. Bu noktada, firmalar açısından "Çevresel, Sosyal ve Yönetişim" (ÇSY) kriterlerinin ön plana çıktığı daha kapsamlı ve şeffaf bir raporlama sistemine geçilmesi zorunluluğu ortaya çıkmaktadır. Bu tür bir dönüşümün en somut örneklerinden biri ise entegre raporlama sistemleridir. Entegre raporlama, firmaların finansal ve finansal olmayan performans göstergelerini bir arada sunmalarına imkân tanımakta ve paydaşlara daha bütüncül bir değer yaratımı perspektifi sunmaktadır (İmer-Ertunga ve Seyhun, 2022).

5. CBAM ve ETS'nin MAKROEKONOMİK DÜZEYDE ETKİLERİ

Avrupa Birliği'nin Sınırda Karbon Düzenleme Mekanizması (CBAM) ve Emisyon Ticaret Sistemi (ETS), çevresel hedeflerin gerçekleştirilmesi bakımından önemli araçlardır. Ancak bu düzenlemelerin sadece çevre politikaları açısından değil, aynı zamanda makroekonomik istikrar

üzerinde de önemli etkileri bulunmaktadır. Karbon fiyatlandırması yoluyla üretim ve tüketim maliyetlerinin değişmesi, fiyatlar genel düzeyini, üretim yapısını, büyüme oranlarını ve gelir dağılımını doğrudan etkilemektedir (Goulder ve Schein, 2009).

Karbon fiyatlandırmasının temel etkisi, karbon yoğun ürünlerin maliyetini artırarak piyasa aktörlerini daha düşük emisyonlu teknolojilere yönlendirmektir. Ancak bu maliyet artışı, kısa vadede enflasyonist baskılara neden olabilir. Avrupa Merkez Bankası (2021), karbon fiyatlandırmasının Avrupa'da önümüzdeki on yılda yıllık enflasyona 0.15 ila 0.3 puan arası bir katkı yapabileceğini öngörmektedir. Türkiye gibi enerji ithalatçısı ve karbon yoğun üretim yapısına sahip ülkelerde bu etki daha belirgin hissedilebilir. Öte yandan, karbon düzenlemelerinin büyüme üzerindeki etkisi literatürde tartışmalıdır. Bazı çalışmalar, uygun tasarlanmış karbon fiyatlandırması politikalarının yeşil inovasyonu ve verimliliği teşvik ederek uzun vadeli büyümeyi destekleyebileceğini ortaya koymuştur (Acemoglu vd., 2012). Nitekim AB'de ETS kapsamındaki sektörlerde enerji verimliliği ve yenilenebilir kaynak yatırımlarının artması, üretim yapısında dönüşüm yaratmış ve yeşil istihdam alanlarının gelişmesini teşvik etmiştir (Martin vd., 2016). Ancak bu dönüşümün sağlıklı gerçekleşmesi için karbon gelirlerinin yeniden dağıtılması ve düşük gelirli hanehalklarına yönelik sosyal politika mekanizmalarının devreye alınması gerekmektedir.

Gelir dağılımı üzerindeki etkiler ise daha karmaşıktır. Karbon fiyatlaması dolaylı vergilendirme biçiminde işlediği için, düşük gelirli gruplar oransal olarak daha yüksek yük altına girebilir. Bu bağlamda, karbon fiyatlamasının regresif etkiler doğurabileceği, özellikle enerji ve ulaşım gibi zorunlu tüketim kalemlerinde maliyet artışlarının hanehalkı bütçeleri üzerindeki baskıyı artıracağı öngörülmektedir (Flues ve Thomas, 2015). Bu nedenle, karbon fiyatlandırmasının sosyal açıdan adil biçimde uygulanabilmesi için gelir eşitsizliğini azaltıcı önlemler alınmalı, elde edilen gelirlerin bir bölümü sosyal yardımlar, enerji destek programları veya doğrudan transferler aracılığıyla yeniden dağıtılmalıdır.

Türkiye Cumhuriyet Merkez Bankası'nın (TCMB) iklim değişikliği konusundaki çalışmaları, halihazırda para politikalarına entegre edilebilecek gerekli dönüşümlerin altyapısını oluşturmayı hedefleyen faaliyetler çerçevesinde yürütülmektedir. Bu bağlamda, "2053 Net Sıfır Emisyon" ve "Yeşil Kalkınma" hedefleri doğrultusunda çeşitli bakanlıklarla eşgüdüm içinde hareket edilmekte; komisyonlar, çalışma grupları ve çalıştaylara katılım sağlanmakta ya da bu platformlarda hazırlanan dokümanlara katkı sunulmaktadır (Ülkü, 2023).

İklim değişikliği çerçevesinde geliştirilecek politika uygulamalarının etkinliğini artırmak ve bu politikaların çıktılarının sağlıklı bir şekilde değerlendirilebilmesini temin etmek adına; karbon ayak izinin doğru şekilde tespit edilmesi, etkili bir karbon fiyatlama mekanizmasının kurulması ve uluslararası düzeyde kabul gören bir taksonominin varlığı büyük önem arz etmektedir. Bu kapsamda TCMB, Çevre, Şehircilik ve İklim Değişikliği Bakanlığı'nın koordinasyonunda yürütülen İklim Şûrası Yeşil Finansman ve Karbon Fiyatlama Komisyonu'nun çalışmalarına aktif katkı sunmakta; ayrıca Ulusal Karbon Piyasası, Ulusal Taksonomi ve Emisyon Ticaret Sistemi'ne ilişkin gelişmeleri yakından takip etmektedir (Ülkü, 2023).

Öte yandan, iklim değişikliğiyle mücadelede uluslararası iş birliklerinin önemi göz önüne alınarak, TCMB 14 Aralık 2021 tarihinde Yeşil Finans Sistemi için Merkez Bankaları ve Denetleyiciler Ağı'na (NGFS) üye olmuştur. Bu üyelik kapsamında genel kurul ve ilgili alt grup

toplantılarına katılım sağlanmaktadır. Buna ek olarak, G20 bünyesinde faaliyet gösteren Sürdürülebilir Finans Çalışma Grubu (SFWG) ile proje bazlı çalışmalar yürütülmekte; böylece sürdürülebilir finans alanında uluslararası gelişmelerin eş zamanlı takibi ve politikaların bu doğrultuda şekillendirilmesi amaçlanmaktadır (Ülkü, 2023).

Makroekonomik anlamda yeşil dönüşüm politikaları, sadece bir çevresel zorunluluk değil, aynı zamanda üretim ve ihracat yapısının dönüşümünü sağlayacak stratejik bir fırsat olarak da değerlendirilmektedir. Türkiye gibi gelişmekte olan ülkeler için bu dönüşüm, teknoloji transferi, yeşil finansman kaynaklarına erişim ve uluslararası rekabet gücünün korunması açısından kritik öneme sahiptir. Ancak bu sürecin sosyo-ekonomik dengeleri gözeterek tasarlanması, adil geçiş ilkesi doğrultusunda sosyal koruma mekanizmaları ile desteklenmesi gerekmektedir.

6. SONUÇ

Sınırda Karbon Düzenleme Mekanizması (CBAM) ve Emisyon Ticaret Sistemi (ETS), Avrupa Birliği'nin iklim değişikliğiyle mücadele stratejisinde merkezi bir konuma sahiptir. Bu düzenlemeler, sadece çevresel hedeflerin gerçekleştirilmesine değil, aynı zamanda ekonomik sistemin yeniden yapılandırılmasına hizmet etmektedir. Karbon fiyatlandırması aracılığıyla üretim ve tüketim kalıplarının değiştirilmesi, enerji verimliliği, yeşil teknolojilere yönelim ve sürdürülebilir büyüme hedeflerine ulaşılması açısından stratejik bir araç haline gelmiştir. Bu çalışmada, CBAM ve ETS'nin temel işleyiş mantığı, hukuki ve ekonomik yönleri, sektörler üzerindeki etkileri ve Türkiye ile Avrupa Birliği özelinde yaşanabilecek dönüşümler çok boyutlu bir şekilde ele alınmıştır. Bulgular göstermektedir ki, söz konusu politikalar sadece çevresel sürdürülebilirliği değil, aynı zamanda ticaret, yatırım, fiyat istikrarı ve sosyal adalet gibi makroekonomik hedefleri de yakından etkilemektedir.

Makro düzeyde bakıldığında, karbon fiyatlandırması enflasyonist baskılar yaratabilmekte; özellikle enerji yoğun sektörlerde üretim maliyetlerini yükseltmektedir. Ancak bu maliyet artışı, doğru şekilde tasarlanmış yeniden dağıtım mekanizmalarıyla dengelenebilir ve hatta uzun vadede yeşil büyüme fırsatlarına dönüşebilir. Bununla birlikte, gelir dağılımı üzerindeki regresif etkilerin azaltılması, düşük gelirli grupların korunması ve adil geçişin sağlanması, politika tasarımının merkezinde yer almalıdır.

Türkiye açısından CBAM ve ETS süreci, yalnızca AB ile olan dış ticaret ilişkileri çerçevesinde değerlendirilmemelidir. Bu mekanizmalar aynı zamanda Türkiye'nin üretim yapısının modernleşmesi, çevre dostu teknolojilere entegrasyonu ve uluslararası pazarlarda rekabet gücünün artırılması açısından bir fırsat olarak görülmelidir. Ancak bu sürecin başarılı bir şekilde yönetilmesi, kapsayıcı iklim politikalarının yanı sıra, yeşil finansman olanaklarının geliştirilmesi, kurumsal kapasitenin artırılması ve sektörel geçiş stratejilerinin net biçimde belirlenmesine bağlıdır.

Sonuç olarak, CBAM ve ETS gibi karbon düzenleme mekanizmaları, geleneksel ekonomi-çevre ikilemini aşarak yeni bir kalkınma paradigmasının kapılarını aralamaktadır. Ancak bu paradigmanın etkin, adil ve sürdürülebilir şekilde hayata geçirilebilmesi; sadece teknik düzenlemelerle değil, aynı zamanda güçlü bir siyasi irade, toplumsal mutabakat ve bütüncül bir politika yaklaşımıyla mümkündür. Türkiye'nin bu sürece entegre olurken, ekonomik rekabet

gücünü koruyacak şekilde iklim politikalarını ana akımlaştırması, hem çevresel hem de makroekonomik istikrar açısından kritik önemdedir.

ÖZET

Savaşlar, ülkeler arasındaki ekonomik ilişkileri ve ticaret hacimlerini derinden etkileyen olağanüstü dönemlerdir. Özellikle artan jeopolitik belirsizlikler tedarik zincirlerinde aksamalara, maliyetlerin yükselmesine ve dış ticarette dalgalanmalara sebebiyet vermektedir. Bu bağlamda 2023'te yeniden şiddetlenen İsrail-Filistin Savaşı yalnızca bölgedeki güvenlik dengelerini değil, ekonomik faaliyetleri de önemli ölçüde etkilemiştir. Çatışmaların oluşturduğu güvenlik riski, liman operasyonlarında zaman zaman meydana gelen aksaklıklar ve artan lojistik maliyetleri bölge ticareti üzerinde baskı yaratmaktadır. Savaşın dış ticarete etkileri özellikle tarım, savunma, teknoloji ve lojistik gibi sektörlerde daha görünür hâle gelmiştir. Artan jeopolitik riskler, Orta Doğu'daki ticaret akışını ve ekonomik beklentileri ciddi biçimde şekillendirmiştir. Güvenlik kaygıları; lojistik giderlerinin yükselmesine, tedarik zincirlerinin bozulmasına ve dış ticarette kısa süreli daralmalara yol açmıştır. Türkiye açısından değerlendirildiğinde, hem bölgesel istikrarsızlık hem de İsrail ile ekonomik ilişkilerde yaşanan dalgalanmalar dış ticaret performansını doğrudan etkilemiştir. Bu dönemde Türkiye–İsrail ticareti, siyasi gerilimler, dış ticarette kısıtlamalar ve karşılıklı ekonomik uygulamalar nedeniyle belirgin biçimde yavaşlamıştır.

Bu çalışmanın amacı, İsrail-Filistin Savaşı'nın Türkiye ile İsrail arasındaki dış ticarete etkilerini ekonomik göstergeler üzerinden analiz etmektir. Çalışmada nitel içerik analizi yöntemi kullanılarak resmi dış ticaret verileri, literatür ve güncel ekonomik raporlar incelenmiştir. Çalışmanın kapsamı 2015–2024 dönemindeki ticaret dinamiklerini içermekte olup, savaş öncesi ve sonrası karşılaştırmalı olarak değerlendirilmiştir. Araştırma bölgesel çatışmaların ekonomik ilişkilere yansımasını anlamaya katkı sağlaması açısından önem taşımaktadır.

Anahtar Kelimeler: Dış ticaret, Jeopolitik Risk, İsrail-Filistin Savaşı

THE IMPACTS OF THE ISRAEL-PALESTINE WAR ON TÜRKİYE-ISRAEL FOREIGN TRADE

ABSTRACT

Wars are extraordinary periods that profoundly affect economic relations and trade volumes between countries. Increasing geopolitical uncertainties, in particular, cause disruptions in supply chains, rising costs, and fluctuations in foreign trade. In this context, the renewed intensity of the Israel-Palestine war in 2023 has significantly affected not only the security balance in the region but also economic activities. The security risk posed by the conflict, occasional disruptions in port operations, and increased logistics costs are putting pressure on regional trade. The war's effects on foreign trade have become particularly visible in sectors such as agriculture, defense, technology, and logistics. Rising geopolitical risks have seriously shaped trade flows and economic expectations in the Middle East. Security concerns have led to higher logistics costs, disrupted supply chains, and short-term contractions in foreign trade. From Turkey's perspective, both regional instability and fluctuations in economic relations with Israel have directly affected foreign trade performance. During this period, Turkey-Israel trade slowed significantly due to political tensions, restrictions on foreign trade, and reciprocal economic measures.

The purpose of this study is to analyze the effects of the Israeli-Palestinian War on foreign trade between Turkey and Israel through economic indicators. The study uses qualitative content analysis to examine official foreign trade data, literature, and current economic reports. The scope of the study covers trade dynamics between 2015 and 2024, with a comparative assessment of the pre- and post-war periods. The research is significant in terms of contributing to the understanding of how regional conflicts reflect on economic relations.

Keywords: Foreign trade, Geopolitical risk, Israel-Palestine war

1.GİRİŞ

Savaşlar, yalnızca askerî çatışmalarla sınırlı kalmayıp ekonomik ilişkiler üzerinde de kalıcı etkiler yaratmaktadır. Dış ticaret, bu etkilerin en yoğun hissedildiği alanlardan biridir. Özellikle büyük ölçekli savaşlar, ülkelerin üretim kapasitelerini ve ticari faaliyetlerini doğrudan kısıtlayarak ihracat ve ithalat hacimlerinde ciddi gerilemelere neden olmaktadır. Güvenlik endişeleri sonucu limanların, altyapının ve ulaşım hatlarının zarar görmesi, ticaretin aksamasında belirleyici bir rol oynamaktadır. Tarihsel deneyimler, Birinci ve İkinci Dünya Savaşları dönemlerinde küresel ticaretin önemli ölçüde daraldığını göstermekte; bu süreçlerde ülkelerin savaş ekonomisine yönelmesi, olağan ticari ilişkilerin ikinci plana itilmesine yol açmıştır (Ardıç, 2024).

Savaşların ekonomik sonuçları yalnızca çatışmaya doğrudan taraf olan ülkelerle sınırlı kalmamakta, tarafsız ülkeler de ticari ilişkiler yoluyla bu süreçten olumsuz etkilenmektedir. Birinci ve İkinci Dünya Savaşları gibi geniş çaplı çatışmalar, sadece savaşan ülkeler arasındaki ticareti değil, küresel ticaret sisteminin tamamını daraltmıştır. Bu dönemlerde artan riskler ve lojistik sorunlar, ülkeleri tedarik zincirlerini yeniden yapılandırmaya zorlamış; bazı mal gruplarında arz kısıtları ve fiyat yükselişleri ortaya çıkmıştır (Krpec & Hodulak, 2019). Savaşlar, küresel üretim ve tedarik ağlarında ciddi aksamalara neden olmaktadır. Çatışma bölgelerindeki üretim tesislerinin zarar görmesi ya da faaliyetlerini durdurması, bu ülkelerle ticaret yapan firmaların alternatif tedarikçilere yönelme, üretim süreçlerini yeniden düzenleme veya yedekleme stratejileri geliştirme gibi yüksek maliyetli uyum mekanizmalarına başvurmasına yol açmaktadır.

İsrail-Filistin çatışması, 20. yüzyılın başlarından itibaren sürmekte olan ve bilhassa 1948'de İsrail Devleti'nin kurulmasıyla tırmanan uzun süreli bir bölgesel anlaşmazlıktır. Çatışmanın temelinde, İsrail'in kuruluş süreciyle birlikte Filistin topraklarında yaşayan Arap nüfusun önemli bir bölümünün yerlerinden edilmesi yer almaktadır. Bu tarihten itibaren Filistinliler kendi devletlerini kurma mücadelesi verirken, süreç içerisinde İsrail ile çok sayıda silahlı çatışma yaşanmıştır. Gazze Şeridi ve Batı Şeria başta olmak üzere bazı bölgelerde siyasal ve askerî gerilimler sürekli olarak yüksek seyretmiştir. İki devletli çözüm yaklaşımı uzun süredir gündemde olmasına rağmen, güvenlik, toprak ve hak taleplerine ilişkin anlaşmazlıklar nedeniyle kalıcı bir barış sağlanamamıştır (Doğrul ve Ünlü, 2023). 2023 yılının 7 Ekim tarihinde Hamas'ın İsrail'e düzenlediği saldırılar, çatışmaya yeni bir boyut kazandırmış ve Gazze Şeridi'nde şiddetli çatışmaların başlamasına sebebiyet vermiştir. Bu dönemde hem siviller hem de savaşçı gruplar arasında büyük kayıplar yaşanmış, insani koşullar ağırlaşmıştır (Habertürk, 2025).

İsrail–Filistin Savaşı, bölgesel güvenlik dengelerinin ötesinde, küresel ve bölgesel ekonomik ilişkiler ile dış ticaret hareketleri üzerinde de belirgin etkiler yaratmıştır. Savaşın başlamasından bu yana özellikle Türkiye ile İsrail arasındaki ticari ilişkilerde gözle görülür bir gerileme yaşanmış; siyasi tansiyonun yükselmesi iki ülke arasındaki dış ticaret hacmini olumsuz yönde etkilemiştir. Resmî veriler, 2023–2024 döneminde Türkiye'nin İsrail ile gerçekleştirdiği toplam ticaretin kayda değer ölçüde azaldığını, hem ihracat hem de ithalat kalemlerinde daralma meydana geldiğini ortaya koymaktadır (Böcüoğlu-Bodur, 2024). Türkiye yönetimi, 2024 yılı başında İsrail'e yönelen bazı ihracat kalemlerinde kısıtlamalar uygulamış ve Mayıs 2024

itibarıyla İsrail ile tüm doğrudan ticaret işlemlerinin durdurulduğunu ilan etmiştir. Söz konusu kararlar, belirli sektörlerde faaliyet gösteren ihracatçılar açısından mali baskılar oluştururken, firmaların yeni ve alternatif pazarlara yönelme çabalarını da hızlandırmıştır (Akın ve Bassist, 2025; Tekin, 2024).

Savaş, uluslararası ticaretin önemli unsurlarından biri olan lojistik ve denizyolu taşımacılığı üzerinde de ilave riskler oluşturmuştur. Çeşitli çalışmalar, çatışmaların deniz ticaretinde güvenlik sorunlarını derinleştirdiğini; bunun sonucunda taşıma güzergâhlarının yeniden düzenlendiğini, navlun maliyetlerinin yükseldiğini ve tedarik zincirlerinde aksamalar yaşandığını ortaya koymaktadır. Özellikle Orta Doğu'nun küresel ticarette kritik bir geçiş alanı olmasını sağlayan Süveyş Kanalı çevresinde artan belirsizlikler, bu riskleri daha da belirgin hâle getirmiştir (Ece ve Özdemir, 2025).

Bu çalışmanın temel amacı, İsrail-Filistin Savaşı'nın dış ticaret üzerindeki etkilerini genel çerçevede ele almak ve özellikle 2023 sonrası yaşanan gelişmelerin Türkiye-İsrail dış ticaret ilişkilerine yansımalarını analiz etmektir. Savaşların dış ticaret hacmi, ticaret politikaları, ve ülke ekonomileri üzerindeki dönüştürücü etkileri ortaya konularak, İsrail-Filistin Savaşı özelinde yaşanan ticari daralmaların nedenleri ve sonuçları değerlendirilmiştir. Araştırmanın yöntemi, ağırlıklı olarak nitel analiz yaklaşımına dayanmaktadır. Bu bağlamda, savaş öncesi ve sonrası dönemdeki ticaret verileri karşılaştırılarak, ekonomik göstergelerdeki dalgalanmalar ve ticaretin yönü üzerine çıkarımlar yapılacaktır. TÜİK, Worldbank, Trademap, Trading Economics gibi resmi kurumların yayımladığı ticaret verilerinden faydalanılmıştır. Çalışmanın kapsamı, savaşların dış ticaret üzerindeki genel etkileri ile sınırlandırılmış olup, özel olarak İsrail-Filistin Savaşı'nın Türkiye-İsrail dış ticaret ilişkilerine olan yansımalarına odaklanmaktadır. Bu çalışmada kullanılan veriler, 2015-2024 yılları arasındaki ekonomik göstergeler ve dış ticaret verileri üzerinden yapılan karşılaştırmalarla somutlaştırılacaktır. 2024 yılı itibarıyla Türkiye'nin İsrail'e yönelik uyguladığı kısıtlamalar ve ticaretin tamamen durdurulmasına ilişkin gelişmeler de analiz edilmiştir. Bu çalışmanın önemi, güncel bir uluslararası çatışmanın Türkiye'nin dış ticaretine olan etkilerini somut veriler ve akademik değerlendirmeler ışığında ele almasıdır. İsrail-Filistin Savaşı'nın yalnızca bölgesel değil, aynı zamanda küresel ticaret dengeleri üzerindeki etkilerini ortaya koyması bakımından literatüre katkı sağlaması beklenmektedir. Ayrıca çalışma, dış ticaret politikalarının kriz dönemlerinde nasıl şekillendiğini göstermesi açısından politikacılar ve araştırmacılar için yol gösterici nitelik taşımaktadır.

2. İSRAİL-FİLİSTİN SAVAŞI'NIN GENEL ÇERÇEVESİ

İsrail–Filistin sorununun tarihsel arka planı, Osmanlı İmparatorluğu dönemine ve Birinci Dünya Savaşı sonrasında şekillenen yeni uluslararası düzene uzanmaktadır. Uzun yıllar Osmanlı egemenliğinde kalan Filistin toprakları, imparatorluğun dağılmasıyla birlikte İngiliz denetimine girmiştir. Savaş yılları ve sonrasında güç kazanan Siyonist hareket, dünyanın farklı bölgelerinde yaşayan Yahudilerin Filistin'e göç ederek burada ulusal bir devlet kurma düşüncesini ön plana çıkarmış; İngiltere'nin 1917'de yayımladığı Balfour Deklarasyonu ise Filistin'de Yahudi halkı için bir "ulusal yurt" oluşturulmasını destekleyen resmi bir açıklama olarak öne çıkmıştır. Bu süreç, bölgede yaşayan Arap nüfus ile Yahudi topluluklar arasındaki

gerilimin giderek artmasına zemin hazırlamıştır (Uyanık ve Yavuz, 2023; Anadolu Ajansı, 2017).

1947 yılında Birleşmiş Milletler'in Filistin topraklarının Arap ve Yahudi devletleri arasında paylaştırılmasını öngören planı, Filistinli Araplar ve Arap ülkeleri tarafından büyük ölçüde kabul görmemiştir. İsrail'in 1948'de bağımsızlığını ilan etmesinin ardından Arap–İsrail Savaşı başlamış ve bölge hızla çatışma ortamına sürüklenmiştir (Euronews, 2024). Bu süreçte çok sayıda Filistinli zorla yerinden edilmiş ve mülteci durumuna düşmüştür. Filistin toplumunda bu dönem "Nakba" (Büyük Felaket) olarak anılmaktadır. 1948 sonrasında ortaya çıkan sınır anlaşmazlıkları, mülkiyet sorunları ve mülteci meselesi, uzun yıllar devam edecek siyasal ve askerî çatışmaların temelini oluşturmuştur (Öztürk, 2024).

1967'de yaşanan Altı Gün Savaşı'nın ardından İsrail, Gazze Şeridi, Batı Şeria ve Doğu Kudüs'ü kontrol altına alarak hâkimiyet alanını genişletmiştir. Bu süreç, uygulanan yerleşim politikaları ve güvenlik tedbirleriyle birlikte soruna yeni ve daha karmaşık bir boyut kazandırmış, işgal altındaki bölgelerde yürütülen askerî ve idarî uygulamaların uluslararası hukuk ile yerel halk üzerindeki etkileri, hem diplomatik gerilimleri artırmış hem de günlük yaşam koşullarını daha da zorlaştırmıştır (Sezer, 2024).

1970'li yıllardan itibaren Filistin ulusal hareketinin güç kazanması ve 1980–1990'larda yaşanan kitlesel halk ayaklanmalarıyla mücadelenin biçimi değişmiş, 1990'larda başlatılan Oslo süreci gibi barış girişimleri geçici umutlar yaratsa da kalıcı bir çözüme ulaşılamamıştır. Güvenlik endişeleri, yerleşim uygulamaları ve tarafların iç siyasal dinamikleri, müzakere süreçlerinin önündeki temel engeller olarak varlığını sürdürmektedir (Belder, 2023).

2000'li yıllara girilirken İsrail–Filistin ihtilafı, Oslo Barış Süreci'nin fiilen sona ermesi ve Camp David müzakerelerinin sonuçsuz kalmasının ardından yeniden sert bir çatışma evresine girmiştir. Eylül 2000'de Ariel Sharon'un Kudüs'teki Mescid-i Aksa'yı ziyaret etmesi, geniş çaplı protestoları tetiklemiş, bu gelişme yoğun silahlı direniş eylemleri ile İsrail'in kapsamlı askerî operasyonlarının karşılıklı olarak artmasına yol açmıştır. Söz konusu dönemde Batı Şeria ve Gazze'de gerilim tırmanmış, binlerce Filistinli ve yüzlerce İsrailli hayatını kaybetmiştir (Utrecht University, 2024).

2000'li yıllardan sonra da süregelen çatışma, 7 Ekim 2023'te Hamas'ın İsrail'e yönelik geniş çaplı saldırısıyla birlikte yeniden kapsamlı bir savaşa dönüşmüştür (Fouda, 2025). Bu saldırının ardından İsrail, Gazze Şeridi'nde Hamas'a karşı yoğun askerî operasyonlar başlatmış, çatışmalar sonucunda on binlerce Filistinli ölmüştür. Gazze'ye yönelik operasyonlar altyapı ve sağlık sisteminde ağır tahribata yol açarken, insani koşullar ciddi biçimde kötüleşmiş ve milyonlarca Filistinli yerinden edilmiştir (Dağ, 2025). 2025 yılında sınırlı ateşkes girişimleri ve Birleşmiş Milletler ile arabulucu aktörlerin çabalarına rağmen kalıcı bir barış sağlanamamış; uluslararası toplumun iki devletli çözüm çağrıları sürerken bölgede çatışma ve gerilim devam etmektedir.

3. TÜRKİYE VE İSRAİL'İN EKONOMİK GÖRÜNÜMÜ

Bu bölümde, İsrail-Filistin Savaşı'nın dış ticaret üzerindeki etkilerinin daha sağlıklı biçimde analiz edilebilmesi amacıyla Türkiye ve İsrail ekonomilerinin genel görünümleri ele alınmaktadır. İki ülkenin makroekonomik yapıları, büyüme dinamikleri ve sektörel dağılımları

incelenerek, savaş sürecinde yaşanan ticari değişimlerin hangi ekonomik zemin üzerinde gerçekleştiği ortaya konulmaktadır. Bu çerçevede öncelikle Türkiye ekonomisinin genel özellikleri, ardından İsrail ekonomisinin temel göstergeleri değerlendirilecektir.

3.1. Türkiye

Türkiye, coğrafi olarak Avrupa ile Asya kıtalarının tam kesişim noktasında yer alır. Bu konum ona hem bölgesel hem de küresel siyasette benzersiz bir rol sağlar. Kuzeyde Karadeniz, güneyde Akdeniz ve batıda Ege Denizi ile çevrili yarımada yapısı İstanbul ve Çanakkale Boğazları üzerinden uluslararası deniz ticaret yollarını kontrol edebilme imkânı sunmaktadır. Bu nitelik, Türkiye'yi sadece bölgesel aktör olmaktan çıkarıp uluslararası ilişkilerde kritik bir oyuncu hâline getirir. Ayrıca Orta Doğu, Balkanlar, Kafkasya ve Akdeniz gibi kritik jeopolitik bölgelerin kesişim noktasında yer alması, ülkenin stratejik değerini daha da artırmaktadır. Bu bağlamda Türkiye, tarihsel süreç boyunca ekonomik ve askeri açıdan stratejik bir köprü ülke rolü üstlenmiştir (Doğan & Sertkaya Doğan, 2022).

İstanbul ve Çanakkale Boğazları gibi kritik su yolları, Karadeniz ile Akdeniz arasındaki ticaret ve enerji taşımacılığını yönlendirmektedir. Bu durum Türkiye'ye hem ekonomik hem de güvenlik boyutunda önemli bir jeopolitik avantaj sağlamaktadır. Bununla birlikte Türkiye, Hazar ve Orta Doğu kaynaklı petrol ve doğal gazın Avrupa pazarlarına ulaştırılmasında kilit bir geçiş hattı konumunda bulunmakta ve bu yönüyle Avrupa'nın enerji arz güvenliği açısından da stratejik bir değer taşımaktadır.

Öte yandan Türkiye, ulaştırma ve lojistik altyapısında kayda değer ilerlemeler kaydetmektedir. İstanbul Havalimanı, Marmaray ve 2022 yılında hizmete giren 1915 Çanakkale Köprüsü gibi büyük ölçekli projeler, ülkenin küresel ticaretteki bağlantı ve köprü işlevini daha da güçlendirmektedir (T.C. Dışişleri Bakanlığı Ottava Büyükelçiliği, 2025).

Türkiye, stratejik coğrafi konumunun ekonomik faydasını dünya ticaret ağında doğrudan hisseden ülkelerden biridir. Asya, Avrupa ve Afrika arasında geçiş noktası olması, ülkeyi yalnızca askerî ve siyasi açıdan değil, aynı zamanda ekonomik açıdan da önemli bir merkez konumuna taşımaktadır. Avrupa Birliği ile yürürlükte olan Gümrük Birliği anlaşması, sanayi ürünlerinin serbest dolaşımını mümkün kılarak Türkiye'nin ihracat kapasitesini genişletmiş ve Avrupa ile ticari ilişkilerde belirleyici bir unsur olmuştur. Bu çerçevede Türkiye, söz konusu düzenleme sayesinde Avrupa'nın önde gelen ticaret ortaklarından biri hâline gelmiştir (Turkish Business World, 2024).

Türkiye'nin stratejik konumu ve güçlenen lojistik altyapısı, dış ticaret kapasitesini artıran başlıca unsurlar arasında yer almaktadır. Bununla birlikte bu potansiyelin fiili ekonomik performansa ne ölçüde dönüştüğü yalnızca coğrafi ve yapısal üstünlüklerle açıklanamaz; makroekonomik istikrarın durumu, büyüme eğilimleri, fiyatlar genel seviyesi ve istihdam koşulları gibi temel göstergelerle de doğrudan bağlantılıdır. Bu nedenle Türkiye ekonomisinin son yıllardaki genel görünümünün incelenmesi, dış ticaret ilişkilerinin ve bilhassa kriz süreçlerinde uygulanan ticaret politikalarının daha doğru ve kapsamlı biçimde değerlendirilmesine imkan tanımaktadır.

Bu çerçevede, Türkiye'nin 2015–2024 dönemine ait temel makroekonomik göstergeleri; ekonomik büyüme eğilimleri, gelir düzeyi, enflasyon ve işsizlik oranları dikkate alınarak

Çizelge 1'de sunulmaktadır. Söz konusu göstergeler, Türkiye ekonomisinin küresel şoklar, jeopolitik gelişmeler ve bölgesel çatışmalar karşısında nasıl bir performans sergilediğini ortaya koyması bakımından önem taşımaktadır.

Çizelge 1. Türkiye'nin Ekonomik Göstergeleri (2015-2024)

Yıllar	GSYİH (Milyar $)	GSYİH Büyüme (%)	Kişi Başına Düşen Milli Gelir ($)	Enflasyon Oranı	İşsizlik Oranı
2015	864.3	6.1	11050	7.67	10.3
2016	869.7	3.3	10970	7.78	10.9
2017	859.0	7.5	10696	11.14	10.9
2018	779.0	3.0	9569	16.33	11.0
2019	761.0	0.8	9215	15.18	13.7
2020	720.3	1.9	8639	12.28	13.2
2021	819.9	11.4	9743	19.60	11.0
2022	907.1	5.5	10675	72.31	10.4
2023	1118.3	5.1	13106	53.86	9.4
2024	1192.3	3.2	15463	58.51	8.7

Kaynak: Dünya Bankası; Trading Economics

Söz konusu dönem incelendiğinde, Türkiye ekonomisinin küresel ve bölgesel şoklara karşı dalgalı bir seyir izlediği görülmektedir. GSYİH düzeyi genel olarak artış eğiliminde olsa da, büyüme oranlarının yıllar itibarıyla istikrarsız bir yapı sergilediği dikkat çekmektedir. Özellikle 2020 ve 2022 yıllarında yaşanan daralmalar; küresel ekonomik belirsizlikler, pandemi süreci ve jeopolitik risklerin ekonomik faaliyetler üzerindeki olumsuz etkilerini ortaya koymaktadır. Buna karşılık 2021 yılında büyümenin yeniden hız kazanması, pandemi sonrası ekonomi politikalarının ve küresel toparlanmanın etkilerini yansıtmaktadır.

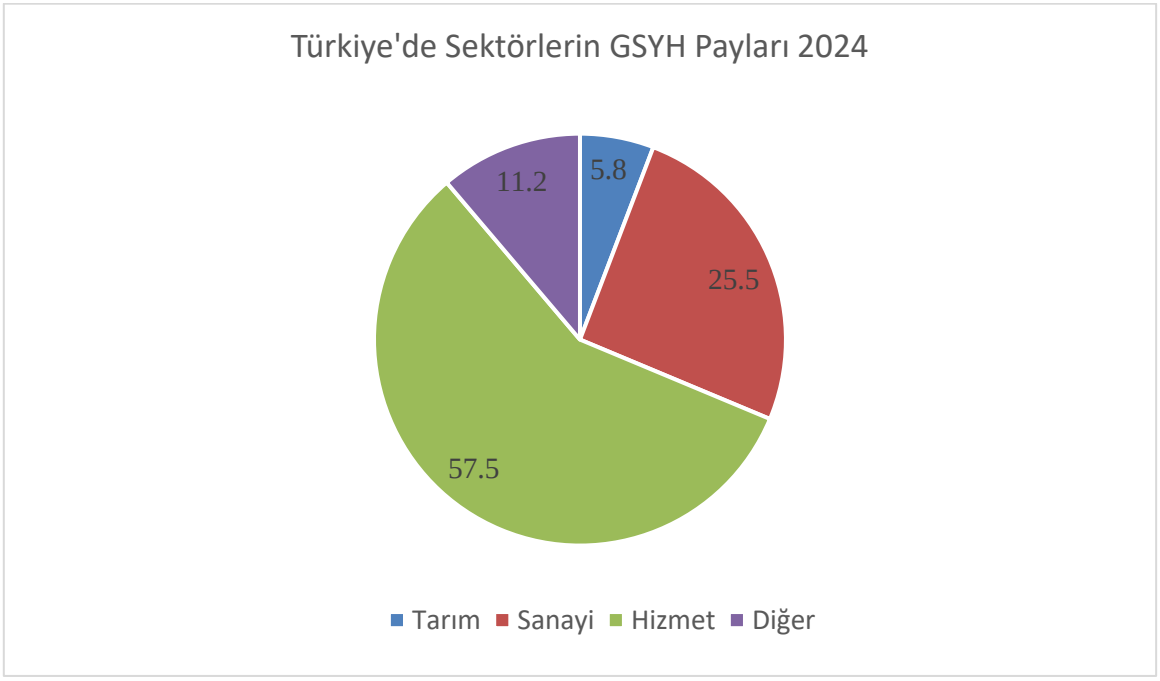
Kişi başına düşen milli gelirde uzun vadede artış gözlemlense de, enflasyon oranlarındaki yüksek oynaklık ekonomik istikrar açısından önemli bir sorun alanı oluşturmaktadır. Özellikle 2021'den sonra enflasyonun belirgin biçimde yükselmesi, satın alma gücü ve iç talep üzerinde baskı yaratmıştır. İşsizlik oranı ise dönem boyunca görece dalgalı bir seyir izlemekle birlikte, 2023 ve 2024 yıllarında düşüş eğilimine girmiştir. Bu durum, istihdam piyasasında kısmi bir iyileşmeye işaret etmektedir.

Türkiye ekonomisinin bu makroekonomik görünümü, dış ticaret ilişkilerinin değerlendirilmesi açısından da önemli bir çerçeve sunmaktadır. Ekonomik büyüme, enflasyon ve işsizlik gibi göstergelerdeki dalgalanmalar, dış ticaret politikalarının ve ticari ortaklarla kurulan ilişkilerin seyrini doğrudan etkilemektedir. Bu bağlamda, İsrail-Filistin Savaşı'nın yaşandığı 2023 sonrası

dönemde Türkiye'nin dış ticaretinde gözlenen değişimler, yalnızca siyasi gelişmelerle değil, aynı zamanda bu makroekonomik koşulların yarattığı yapısal etkilerle birlikte değerlendirilmelidir.

Makroekonomik göstergeler, bir ekonominin genel performansına ilişkin önemli ipuçları sunsa da, bu performansın hangi sektörler üzerinden üretildiğinin incelenmesi daha ayrıntılı bir değerlendirme yapılmasına olanak tanımaktadır. Ekonomik büyümenin sürdürülebilirliği ve dış ticaret kapasitesi, büyük ölçüde tarım, sanayi ve hizmetler sektörlerinin üretim içindeki ağırlığına ve bu sektörler arasındaki yapısal dönüşüme bağlıdır. Özellikle sanayi ve hizmetler sektörlerinin GSYİH içindeki payı, bir ülkenin küresel ticaret sistemine entegrasyon düzeyini ve rekabet gücünü yansıtan temel göstergeler arasında yer almaktadır.

Türkiye ekonomisi, uzun vadeli yapısal dönüşüm sürecinde tarım, sanayi ve hizmet sektörlerinin farklı ağırlıklarla katkı sağladığı bir yapıya sahiptir. Geleneksel olarak ekonominin belkemiğini oluşturan tarım sektörü, uygun iklim ve geniş tarım alanları sayesinde üretim ve gıda güvenliği açısından stratejik bir rol üstlenmektedir.



Görsel 1. Türkiye'de Sektörlerin GSYH Payları 2024

Kaynak: Dünya Bankası

Görsel 1, 2024 yılı itibarıyla Türkiye ekonomisinin sektörel dağılımını göstermektedir. Sunulan veriler Türkiye'de GSYİH'nin büyük bölümünün hizmetler sektörü tarafından üretildiğini göstermektedir. Hizmetler sektörünün toplam katma değer içerisindeki yüksek payı, Türkiye ekonomisinin giderek hizmet ağırlıklı bir yapıya dönüştüğüne işaret etmektedir. Bu durum; ticaret, ulaştırma, turizm, finans ve lojistik gibi sektörlerin ekonomik büyüme üzerindeki etkisinin giderek artmasına işaret etmektedir.

Sanayi sektörünün GSYİH içindeki payı, Türkiye'nin üretim ve ihracat kapasitesi açısından stratejik bir konumda bulunduğunu göstermektedir. Sanayi, özellikle imalat sanayii üzerinden dış ticaretin ana taşıyıcısı konumunda olup, küresel talep dalgalanmaları ve jeopolitik

gelişmeler karşısında ekonominin en duyarlı alanlarından biridir. Tarım sektörünün payının görece düşük olması ise yapısal dönüşümün bir sonucu olarak değerlendirilebilir ancak tarım, gıda güvenliği ve kırsal istihdam açısından stratejik önemini korumaktadır.

3.2.İsrail

İsrail, coğrafi olarak Ortadoğu'nun doğu Akdeniz kıyısında yer alır ve kuzeyde Lübnan, doğuda Suriye ve Ürdün'le, güneydoğuda Mısır'la komşudur. Akdeniz'e açılan kısa sahil şeridi, Süveyş Kanalı'na yakınlığı ve Kızıldeniz'e geçişi sağlayan Tiran Boğazı gibi dar suyollarına erişimi, ülkeyi hem askeri hem ekonomik açıdan stratejik bir konuma yerleştirir. Bu konum, Asya, Afrika ve Avrupa arasında bir köprü işlevi görmesinin yanı sıra küresel deniz ticaret yolları üzerinde kritik bir nokta olmasını sağlar. Bölgenin enerji ve ticaret açısından önemi, İsrail'in dış politika ve güvenlik stratejilerini doğrudan etkileyen temel coğrafi faktörlerdendir (Çiçekci, 2019).

İsrail ekonomisi, gelişmiş ve dinamik bir yapıya sahip olup özellikle yüksek teknoloji sektöründe etkin rolüyle tanınır. Yüksek teknoloji, ülke ekonomisinin omurgasını oluşturmaktadır. Bu sektör yaklaşık olarak gayrisafi yurt içi hasılanın %20'sini üretmekte ve toplam ihracatın yarısından fazlasını oluşturmaktadır. Bu durum, İsrail'in eğitimli iş gücü ve güçlü Ar-Ge kapasitesinin bir sonucu olarak ortaya çıkmıştır. Ancak bu odaklanma aynı zamanda ekonomiyi belirli risklere karşı hassas hâle getirmektedir. Yüksek teknoloji dışı sektörlerde verimlilik daha düşük kalmakta ve gelir dağılımında eşitsizlikler gözlemlenmektedir (Sherman, 2024).

Doğu Akdeniz'de son yıllarda ortaya çıkan hidrokarbon rezervleri, İsrail'in bölgesel konumunu daha da önemli hale getirmiştir. Doğalgaz sahalarının keşfi, ülkenin hem ekonomik kalkınma planlarını hem de bölgesel diplomasi stratejilerini yeniden şekillendirmiştir. Enerji kaynakları, sadece ekonomik çıkarlar için değil, aynı zamanda bölge ülkeleriyle oluşturulan ittifakların temellerini güçlendirmek ya da yeniden tanımlamak için de bir araç hâline gelmiştir. Bu gelişme özellikle Doğu Akdeniz'de deniz sınırı antlaşmaları ve güvenlik işbirlikleri bağlamında İsrail'in dış politikasını derinden etkilemektedir (Çalık-Topuz, 2025).

Buna ek olarak İsrail, yüksek askeri ve ekonomik gelişmişlik seviyesine sahip küçük bir devlettir. Stratejik konumu onu hem bölgesel hem de küresel aktörler için kilit bir aktör hâline getirir. Başta ABD olmak üzere Batılı güçlerle olan askeri ve istihbarat işbirlikleri bu konumla doğrudan bağlantılıdır. Bu ilişkiler, ülkenin savunma kapasitesini güçlendirirken bölgede istikrar ve çatışma dinamiklerinin şekillenmesinde önemli rol oynar (Qian, 2023).

İsrail'in ekonomik performansı son yıllarda bölgesel güvenlik koşullarından etkilenmiştir. Özellikle 2023'ten itibaren yaşanan çatışmalar ve savaş ortamı, ekonomik büyümeyi yavaşlatmış ve bazı dönemlerde daralma yaşanmasına yol açmıştır.

Çizelge 2. İsrail'in Ekonomik Göstergeleri (2015-2024)

Yıllar	GSYİH (Milyar $)	GSYİH Büyüme (%)	Kişi Başına Düşen Milli Gelir ($)	Enflasyon Oranı	İşsizlik Oranı
2015	303.5	2.2	36213	-0.6	5.2
2016	321.9	4.5	37094	-0.5	4.7
2017	358.5	4.4	37963	0.3	4.1
2018	376.3	4	38730	0.8	3.9
2019	400.6	3.7	39407	0.8	3.7
2020	410.8	-2	37936	-0.6	4.2
2021	489.9	9.4	40805	1.5	4.8
2022	525.2	6.3	42516	4.4	3.7
2023	512.2	1.8	42012	4.2	3.4
2024	540.4	0.9	41845	3.1	2.9

Kaynak: Dünya Bankası; Trading Economics

Çizelge 2, İsrail ekonomisinin 2015–2024 dönemine ait temel makroekonomik göstergelerini ortaya koymaktadır. Söz konusu veriler, İsrail ekonomisinin genel olarak istikrarlı bir büyüme eğilimi sergilediğini ancak küresel ve bölgesel şoklar karşısında dönemsel dalgalanmalara maruz kaldığını göstermektedir. 2016-2019 yılları arasında GSYİH düzeyinin düzenli biçimde arttığı ve ekonomik büyümenin ortalama %3–4 bandında seyrettiği görülmektedir. Bu dönem, İsrail ekonomisinin görece istikrarlı bir küresel ortamda ve güvenlik risklerinin sınırlı olduğu koşullarda büyüdüğünü yansıtmaktadır.

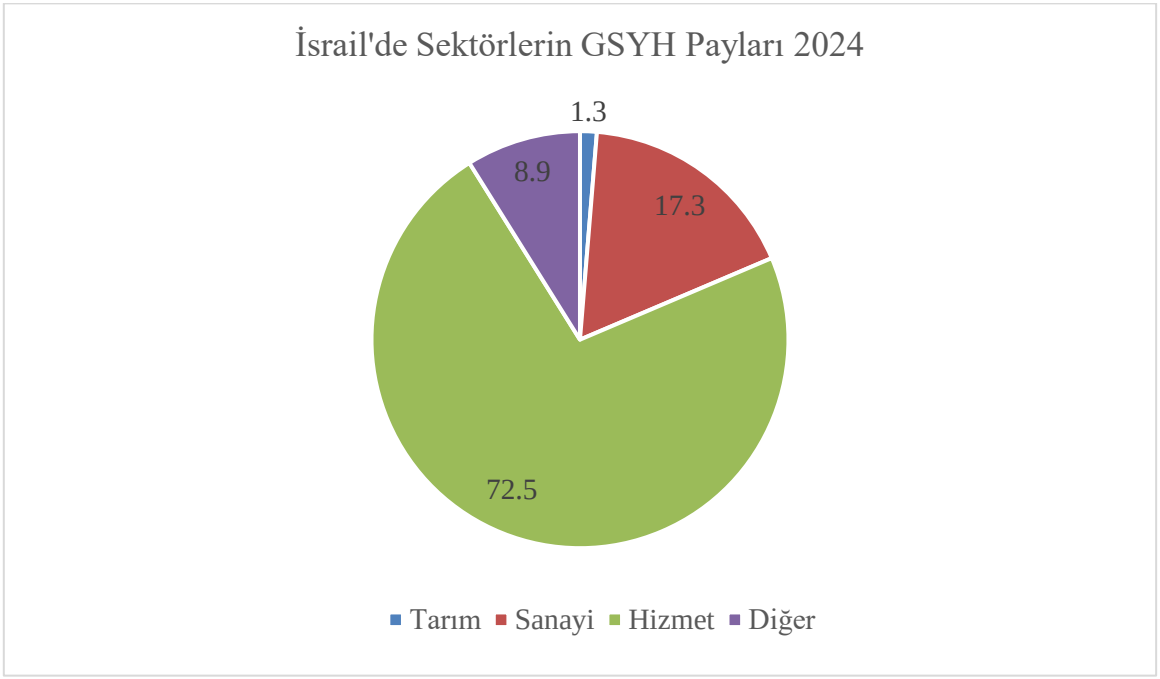
2020 yılında COVID-19 pandemisinin etkisiyle ekonomik büyüme oranı %-2 seviyesine gerilemiş, kişi başına düşen milli gelirde düşüş yaşanmış ve işsizlik oranı yeniden yükselmiştir. Buna karşılık 2021 ve 2022 yıllarında güçlü bir toparlanma süreci gözlemlenmiş; 2021'de büyüme oranı %9,4 ile dikkat çekici bir seviyeye ulaşmıştır. Bu toparlanmada, yüksek teknoloji sektörünün dinamizmi ve küresel talepteki artış belirleyici olmuştur.

Ancak 2023 ve 2024 yıllarına gelindiğinde ekonomik büyümenin belirgin biçimde yavaşladığı görülmektedir. 2023'te büyüme oranı %1,8'e, 2024'te ise %0,9'a gerilemiştir. Bu yavaşlamada

İsrail-Filistin Savaşı'nın yarattığı güvenlik belirsizlikleri, artan savunma harcamaları ve yatırım ortamındaki bozulmanın etkili olduğu değerlendirilmektedir. Aynı dönemde kişi başına düşen milli gelirde düşüş eğilimi gözlemlenirken enflasyon oranının 2022 sonrasında yükseldiği ve ancak 2024 itibarıyla kısmen gerilediği dikkat çekmektedir.

İşsizlik oranı ise genel olarak düşük seviyelerde seyretmiş olmakla birlikte, savaş ortamına rağmen 2023 ve 2024 yıllarında sınırlı bir gerileme göstermiştir. Bu durum, İsrail işgücü piyasasının özellikle yüksek teknoloji sektöründeki istihdam kapasitesi sayesinde görece dayanıklılığını koruduğunu ortaya koymaktadır. Bununla birlikte büyüme oranlarındaki yavaşlama ve gelir göstergelerindeki durağanlık, savaşın orta ve uzun vadede İsrail ekonomisi üzerindeki olumsuz etkilerinin derinleşebileceğine işaret etmektedir.

Bir ekonominin dış ticaret kapasitesi, krizlere karşı dayanıklılığı ve bölgesel şoklara verdiği tepkiler; büyük ölçüde tarım, sanayi ve hizmetler sektörlerinin üretim içindeki ağırlığına ve bu sektörler arasındaki yapısal dağılıma bağlıdır. Özellikle yüksek katma değerli sektörlerin GSYİH içindeki payı, ekonomik büyümenin sürdürülebilirliği ve dış ticaret yapısının niteliği açısından belirleyici bir rol oynamaktadır. Bu çerçevede, İsrail ekonomisinin sektörel dağılımı Görsel 2.'de gösterilmiştir.



Görsel 2. İsrail'de Sektörlerin GSYH Payları 2024

Kaynak: Dünya Bankası

2024 verileri İsrail'de gayrisafi yurt içi hasılanın büyük ölçüde hizmetler sektörü tarafından üretildiğini göstermektedir. Hizmetler sektörünün %72,5 gibi yüksek bir paya sahip olması, İsrail ekonomisinin ileri düzeyde hizmet ağırlıklı bir yapıya sahip olduğunu ve özellikle finans, bilişim, ticaret, ulaştırma ve yüksek teknolojiye dayalı hizmetlerin ekonomik büyüme üzerinde belirleyici rol oynadığını ortaya koymaktadır. Bu yapı, İsrail'in küresel değer zincirlerine entegrasyonunun ve dış ticarette katma değeri yüksek alanlara yöneliminin bir yansıması olarak değerlendirilebilir.

Sanayi sektörünün GSYİH içindeki payı %17,3 düzeyindedir. Bu oran sanayi üretiminin İsrail ekonomisinde sınırlı ancak stratejik bir role sahip olduğunu göstermektedir. Özellikle savunma sanayii, ileri teknolojiye dayalı imalat ve enerji sektörleri, sanayi üretiminin dış ticaretle doğrudan ilişkili alanlarını oluşturmaktadır. Ancak sanayi sektörünün payının hizmetler sektörüne kıyasla görece düşük olması, İsrail ekonomisinin fiziksel üretimden ziyade bilgi ve teknoloji yoğun faaliyetlere dayandığını ortaya koymaktadır.

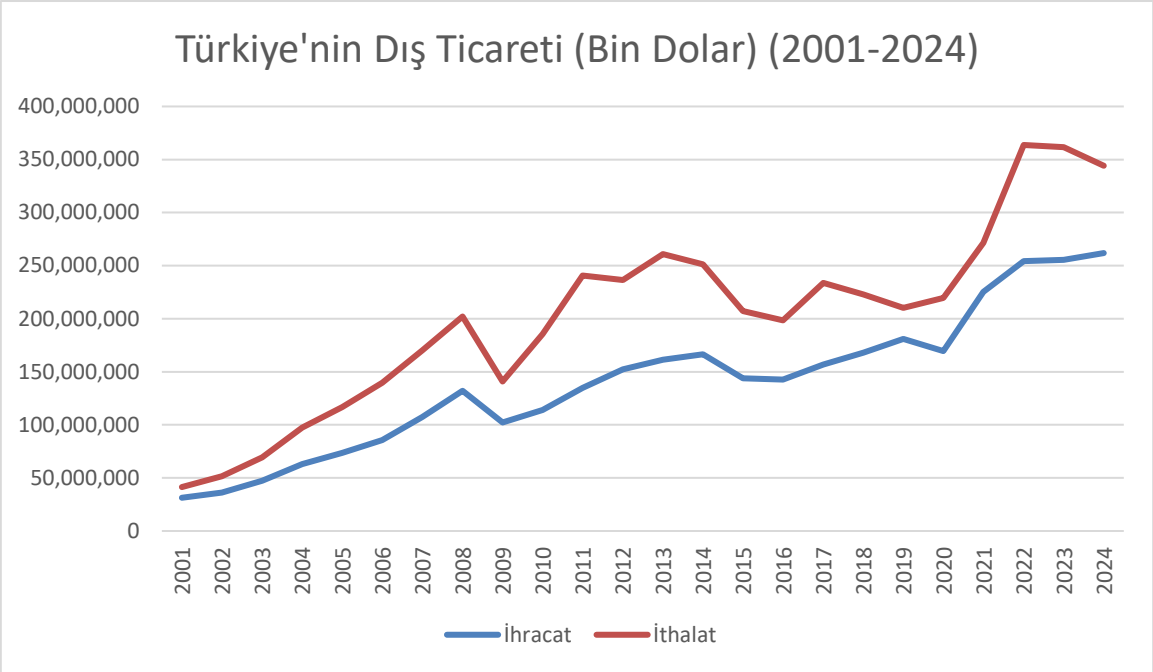
Tarım sektörünün GSYİH içindeki payı ise %1,3 gibi oldukça düşük bir seviyededir. Bu durum, İsrail'in sınırlı doğal kaynakları ve coğrafi koşulları ile uyumlu olup tarım sektörünün ekonomide nicel olarak küçük bir yer tuttuğunu göstermektedir. Buna karşın tarım sektörü, ileri sulama teknolojileri ve verimlilik odaklı üretim yapısı sayesinde stratejik ve teknolojik bir önem taşımaya devam etmektedir.

4. İSRAİL-FİLİSTİN SAVAŞININ TÜRKİYE VE İSRAİL DIŞ TİCARETİNE ETKİLERİ

Bu bölümde, İsrail-Filistin Savaşı'nın Türkiye ve İsrail'in dış ticaret yapıları üzerindeki etkileri ayrıntılı biçimde incelenmektedir. Savaşın yarattığı jeopolitik belirsizliklerin, ticaret hacimleri ve dış ticaret üzerindeki yansımaları ele alınarak hem ülkelerin kendi dış ticaret performansları hem de ikili ticari ilişkiler değerlendirilmektedir. Bu doğrultuda, öncelikle savaşın Türkiye'nin dış ticaretine etkileri, ardından İsrail'in dış ticaretindeki değişimler ve son olarak Türkiye-İsrail arasındaki ticari ilişkiler analiz edilecektir.

4.1.Türkiye Dış Ticaretine Etkisi

İsrail-Filistin Savaşı'nın 2023 yılı itibarıyla yeniden şiddetlenmesi Türkiye'nin dış ticaret yapısını hem doğrudan hem de dolaylı kanallar aracılığıyla etkilemiştir. Türkiye, Orta Doğu coğrafyasına yakınlığı ve bölge ülkeleriyle kurduğu yoğun ticari ilişkiler nedeniyle bölgesel çatışmalardan dış ticaret hacmi ve ticaret politikaları açısından hızlı biçimde etkilenebilen ülkeler arasında yer almaktadır.



Görsel 3. Türkiye'nin Dış Ticareti (2001-2024)

Kaynak: Trademap

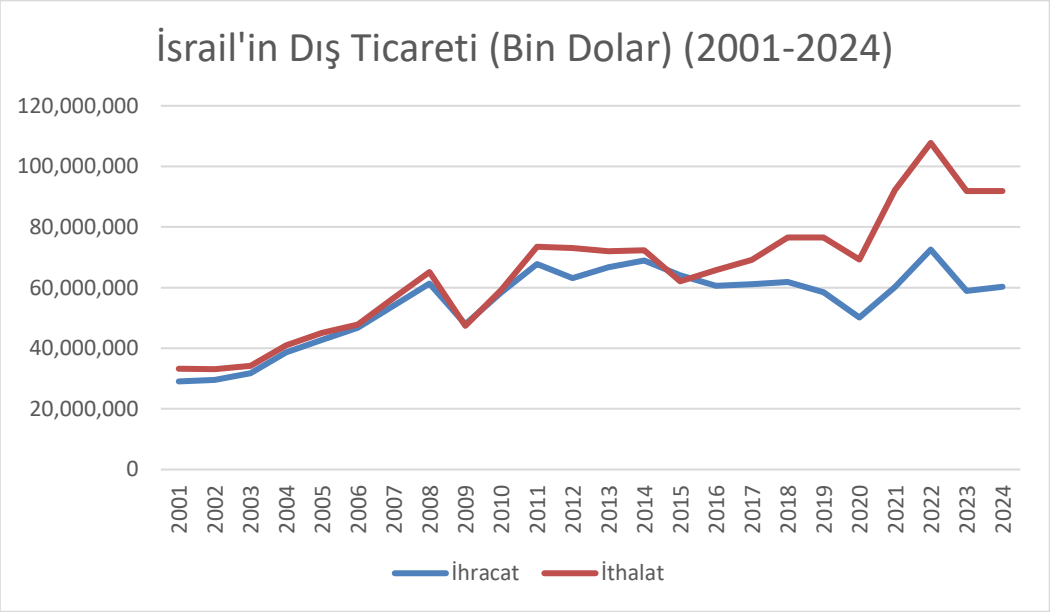
Görsel 3, 2001–2024 döneminde Türkiye'nin ihracat ve ithalat hacimlerinin yıllar itibarıyla seyrini ortaya koymaktadır. Görsel incelendiğinde, her iki ticaret kaleminde de uzun vadede belirgin bir artış eğilimi olduğu görülmektedir. Özellikle 2000'li yılların başından itibaren Türkiye'nin küresel ticaret sistemine entegrasyonunun güçlenmesiyle birlikte ihracat ve ithalat hacimleri hızlı bir yükseliş göstermiştir.

2015–2019 döneminde ihracat ve ithalat artış hızlarının görece yavaşladığı ve dalgalı bir seyir izlediği görülmektedir. Bu dalgalanmada küresel ekonomik belirsizlikler, jeopolitik riskler ve iç ekonomik koşulların etkili olduğu değerlendirilmektedir. 2020 yılında ise COVID-19 pandemisinin küresel ticaret üzerindeki olumsuz etkileri sebebiyetiyle hem ihracat hem de ithalat hacimlerinde düşüş yaşanmıştır.

Görselde görüldüğü üzere, 2021–2022 döneminde hem ihracat hem de ithalat hacimlerinde güçlü bir artış eğilimi söz konusuyken, 2023 yılı itibarıyla bu ivmenin zayıflamaya başladığı görülmektedir. Bu yavaşlamada küresel ekonomik koşulların yanı sıra, Orta Doğu'da artan jeopolitik risklerin ve özellikle İsrail-Filistin Savaşı'nın yarattığı belirsizlik ortamının etkili olduğu değerlendirilmektedir. 2023 yılında dış ticaret hacminin yüksek seviyesini korumakla birlikte artış hızının sınırlanması, savaşın bölgesel ticaret yolları ve lojistik maliyetler üzerindeki olumsuz etkileriyle ilişkilendirilebilir. İsrail-Filistin Savaşı'nın Doğu Akdeniz ve Süveyş Kanalı çevresinde güvenlik risklerini artırması, deniz taşımacılığında navlun ücretlerinin yükselmesine ve teslim sürelerinin uzamasına neden olmuştur. Bu durum, Türkiye'nin özellikle Orta Doğu ve Asya ile olan ticaretinde ithalat maliyetlerini artırarak ticaret hacmindeki artışı baskılamıştır.

4.2.İsrail Dış Ticaretine Etkileri

2023 yılında gerçekleştirilen Gazze Operasyonu, İsrail ekonomisi ve dış ticareti üzerinde çok boyutlu etkiler yaratmıştır. Bu etkilerin başında güvenlik harcamalarındaki belirgin artış gelmektedir. Devam eden askerî faaliyetler süresince savunma bütçesi ciddi ölçüde yükselmiş; operasyonların finansmanı, ek güvenlik tedbirleri ve Demir Kubbe hava savunma sisteminin yoğun kullanımı kamu maliyesi üzerinde önemli bir yük oluşturmuştur. Savunmaya ayrılan kaynakların artması, diğer kamu hizmetlerine yönlendirilebilecek bütçenin daralmasına yol açmıştır. Bir diğer önemli etki, turizm gelirleri ve yatırımlarda yaşanan gerilemedir. İsrail ekonomisi açısından önemli bir paya sahip olan turizm sektörü, çatışmaların yarattığı güvenlik endişeleri nedeniyle ciddi bir daralma yaşamış; turist sayısındaki düşüş otelcilik, yeme-içme ve bağlantılı hizmet sektörlerini olumsuz etkilemiştir. Bunun yanı sıra, artan belirsizlik ortamı uluslararası yatırımcı güvenini zayıflatarak yabancı sermaye girişlerinde azalmaya neden olmuştur. Son olarak, çatışmalar iş gücü ve üretim kayıplarını da beraberinde getirmiştir. Operasyon sürecinde birçok işletme faaliyetlerini durdurmak ya da sınırlı kapasiteyle sürdürmek zorunda kalmış; özellikle sınır bölgelerinde üretim süreçleri aksayarak genel ekonomik verimliliği düşürmüştür. Bu gelişmeler, bazı sektörlerde istihdam kayıplarının ortaya çıkmasına neden olmuştur (Duyar, t.y.).



Görsel 4. İsrail'in Dış Ticareti (2001-2024)

Kaynak: Trademap

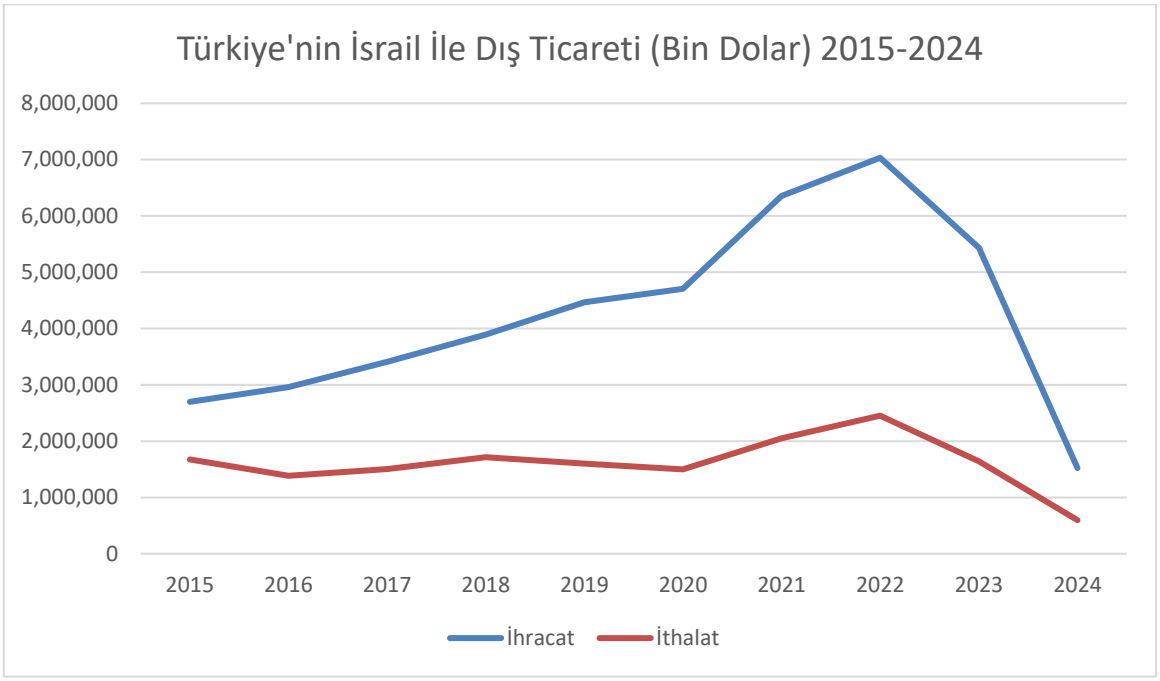
Görsel 4, 2001–2024 döneminde İsrail'in dış ticaret hacmindeki değişimi göstermekte olup, savaş ve çatışma dönemlerinin ticaret göstergeleri üzerinde belirgin dalgalanmalara yol açtığı görülmektedir. Özellikle yoğun çatışmaların yaşandığı yıllarda ihracat ve ithalat artış hızının yavaşladığı, bazı dönemlerde ise gerilemelerin yaşandığı dikkat çekmektedir. 2023 sonrası süreçte İsrail-Filistin Savaşı'nın yeniden şiddetlenmesiyle birlikte artan güvenlik harcamaları, lojistik aksamalar ve bölgesel risk algısındaki yükselişin dış ticaret performansı üzerinde baskı oluşturmuştur.

Bu gelişmeler İsrail ekonomisinin dış ticaret yapısının jeopolitik risklere karşı kırılganlığını ortaya koymakta, savaşın yalnızca insani ve siyasi sonuçlar doğurmakla kalmayıp aynı zamanda

ülkenin dış ticaret performansı ve ekonomik istikrarı üzerinde de belirleyici bir rol oynadığını göstermektedir.

4.3.Türkiye-İsrail Dış Ticaretine Etkisi

2023 sonrasında başlayan çatışmalar ve 2024–2025 döneminde artan diplomatik gerilimler, Türkiye ile İsrail arasındaki doğrudan ticaret hacminde hızlı ve belirgin bir gerilemeye yol açmıştır. Türkiye'nin Mayıs 2024'te doğrudan ticaretin durdurulduğunu duyurması ile liman ve ulaştırma alanlarında uygulanan çeşitli kısıtlayıcı önlemler, ikili ticaretin fiilen sınırlandırılmasına neden olmuştur. Bu gelişmeler yıllık toplam ticaret hacminde kayda değer düşüşler yaratmıştır. Söz konusu tutum, kısa vadede ihracatçı firmaların pazar kayıpları yaşamasına ve iki ülke arasındaki tedarik zincirlerinde kopmaların ortaya çıkmasına yol açmıştır (T.C. Ticaret Bakanlığı, 2025).



Görsel 5. Türkiye'nin İsrail İle Dış Ticareti 2015-2024

Kaynak: Trademap

Görsel 5. 2015–2024 döneminde Türkiye'nin İsrail ile olan dış ticaretinin seyrini ihracat ve ithalat kalemleri üzerinden göstermektedir. Buna göre, incelenen dönemin büyük bölümünde Türkiye'nin İsrail'e yönelik ihracatının ithalatından belirgin biçimde yüksek olduğu ve Türkiye lehine bir dış ticaret dengesi oluştuğu görülmektedir. Özellikle 2015–2022 yılları arasında ihracatta istikrarlı bir artış eğilimi dikkat çekmektedir.

Ancak 2023 yılında hem ihracat hem de ithalat kalemlerinde belirgin bir gerileme yaşandığı görülmektedir. 2024 yılında ise düşüşün daha da keskinleştiği ve dış ticaret hacminde büyük bir daralma meydana gelmiştir. Bu kırılma, İsrail-Filistin Savaşı'nın şiddetlenmesiyle birlikte Türkiye'nin İsrail'e yönelik ticari kısıtlamaları ve siyasi tutumunun ekonomik ilişkilere doğrudan yansıdığını göstermektedir. Özellikle 2024 yılında ihracattaki sert düşüş, savaşın ve diplomatik gerilimin dış ticaret üzerindeki etkisinin somut bir göstergesidir.

Çizelge 3. Türkiye'nin İsrail'e Dış Ticaretinin Toplam Dış Ticaretine Oranı

Yıl	Toplam İhracata Oranı %	Toplam İthalata Oranı %
2015	1.9	0.8
2016	2.1	0.7
2017	2.2	0.6
2018	2.3	0.8
2019	2.5	0.8
2020	2.8	0.7
2021	2.8	0.8
2022	2.8	0.7
2023	2.1	0.5
2024	0.6	0.2

Kaynak: Trademap

Çizelge 3, 2015–2024 döneminde Türkiye'nin İsrail ile gerçekleştirdiği dış ticaretin, Türkiye'nin toplam dış ticareti içindeki payını ihracat ve ithalat oranları üzerinden göstermektedir. Veriler söz konusu dönemin büyük bölümünde İsrail'in Türkiye açısından sınırlı ancak istikrarlı bir ticaret ortağı konumunda olduğunu ortaya koymaktadır. Özellikle 2015–2022 yılları arasında İsrail'e yapılan ihracatın toplam ihracat içindeki payının kademeli olarak arttığı ve %1,9'dan %2,8 seviyesine yükseldiği görülmektedir.

2023 yılı itibarıyla ihracat ve ithalat oranlarında belirgin bir gerileme gözlenmektedir. Bu düşüş, İsrail-Filistin Savaşı'nın derinleşmesiyle birlikte artan siyasi ve ekonomik belirsizliklerin ikili ticaret üzerindeki etkisini yansıtmaktadır. 2024 yılında ise ihracat oranının %0,6'ya, ithalat oranının ise %0,2'ye kadar gerilemesi, Türkiye'nin İsrail ile olan dış ticaretinin toplam dış ticaret içindeki ağırlığının ciddi biçimde azaldığını ortaya koymaktadır. Bu gelişme, uygulanan ticari kısıtlamalar ve diplomatik gerilimin ekonomik ilişkilere doğrudan yansımasıdır.

Çizelge 4. Türkiye'den İsrail'e 2024 Yılı Dış Ticaret Yapılan Ürünler

Ürünler	İhraç Edilen Ürünler	İthal Edilen Ürünler
1-	Demiryolu veya tramvay vagonları dışındaki araçlar ve bunların parça ve aksesuarları	Mineral yakıtlar, mineral yağlar ve bunların damıtılmasından elde edilen ürünler
2-	Plastik ve mamülleri	Plastik ve mamülleri
3-	Elektrikli makina ve cihazlar	Demir ve çelik

4-	Demir ve çelik	Nükleer reaktörler, kazanlar, makineler
5-	Kıymetli veya yarı kıymetli taşlar	Çeşitli kimyasal ürünler
6-	Nükleer reaktörler, kazanlar, makineler	Kağıt ve mukavva
7-	Örülmemiş giyim eşyası ve aksesuarı	Organik kimyasallar
8-	Tuz; kükürt; toprak ve taş; sıva malzemeleri, kireç ve çimento	Kıymetli veya yarı kıymetli taşlar
9-	Kağıt ve mukavva	Optik alet ve cihazlar, fotoğraf, sinema, ölçü, kontrol, ayar alet ve cihazları, tıbbi veya cerrahi alet ve cihazlar
10-	Mobilya	Elektrikli makine ve cihazlar ve bunların parçaları

Kaynak: Trademap

Çizelge 4, 2024 yılı itibarıyla Türkiye ile İsrail arasında gerçekleştirilen dış ticarette öne çıkan ürün gruplarını ihracat ve ithalat bazında göstermektedir. Çizelge incelendiğinde, iki ülke arasındaki ticari ilişkinin büyük ölçüde sanayi ürünleri, ara mallar ve teknoloji yoğun ürünler etrafında şekillendiği görülmektedir. Bu durum, Türkiye–İsrail ticaretinin ağırlıklı olarak üretim ve sanayi temelli bir yapıya sahip olduğunu ortaya koymaktadır.

Türkiye'nin İsrail'e gerçekleştirdiği ihracatta demiryolu veya tramvay vagonları dışındaki taşıtlar ve bunların aksamları, elektrikli makine ve cihazlar ile demir-çelik ürünlerinin ön plana çıktığı dikkat çekmektedir. Ayrıca plastik ve mamulleri, nükleer reaktörler, kazanlar ve makineler gibi sermaye ve ara malı niteliğindeki ürünler Türkiye'nin sanayi kapasitesinin İsrail pazarına yansıdığını göstermektedir. Bunun yanında kıymetli veya yarı kıymetli taşlar, mobilya ve örülmemiş giyim eşyaları gibi ürünler, ihracatın çeşitlendiğine işaret etmektedir.

SONUÇ

Bu çalışma, İsrail-Filistin Savaşı'nın dış ticaret üzerindeki etkilerini genel bir çerçevede ele almış; özellikle 2023 sonrası dönemde yaşanan gelişmelerin Türkiye, İsrail ve Türkiye-İsrail ikili dış ticaret ilişkileri üzerindeki yansımalarını incelemiştir. Savaşların yalnızca askerî ve insani sonuçlar doğurmadığı, aynı zamanda ekonomik ilişkiler ve ticaret akışları üzerinde belirleyici etkiler yarattığı bu çalışma kapsamında açık biçimde ortaya konulmuştur. Bulgular, savaş ortamının üretim, lojistik, ticaret politikaları ve uluslararası ekonomik ilişkiler üzerinde çok boyutlu baskılar oluşturduğunu göstermektedir.

Çalışmada elde edilen veriler, İsrail-Filistin Savaşı'nın Türkiye'nin genel dış ticaret hacmini doğrudan dramatik biçimde azaltmasa da, bölgesel risk algısının artması, lojistik maliyetlerin yükselmesi ve ticaret yollarındaki belirsizlikler yoluyla dolaylı etkiler yarattığını ortaya

koymaktadır. Özellikle Doğu Akdeniz ve Orta Doğu kaynaklı jeopolitik riskler, navlun ücretleri ve teslim süreleri üzerinde baskı oluşturarak ticaret hacmindeki artış hızını sınırlamıştır. Bu durum, Türkiye gibi dış ticarete dayalı büyüme modeline sahip ülkelerin bölgesel çatışmalara karşı ne denli hassas olduğunu göstermektedir.

İsrail ekonomisi açısından değerlendirildiğinde ise savaşın etkilerinin daha doğrudan ve belirgin olduğu görülmektedir. Artan güvenlik harcamaları, yatırım ortamındaki bozulma, turizm gelirlerindeki düşüş ve üretim süreçlerindeki aksamalar, İsrail'in ekonomik büyüme hızını yavaşlatmış ve dış ticaret performansını baskılamıştır. Özellikle 2023 ve 2024 yıllarında büyüme oranlarındaki belirgin gerileme, savaşın ekonomik maliyetlerinin orta vadede derinleşebileceğine işaret etmektedir. İsrail ekonomisinin yüksek teknoloji ve hizmetler sektörüne dayalı yapısı, belirli ölçüde dayanıklılık sağlasa da, jeopolitik risklerin uzun süreli hale gelmesi durumunda bu yapının da kırılganlık gösterebileceği değerlendirilmektedir.

Türkiye ve İsrail arasında 2015–2022 döneminde görece istikrarlı seyreden ticari ilişkiler, 2023 sonrası dönemde siyasi gerilimler ve Türkiye'nin uyguladığı ticari kısıtlamalar nedeniyle ciddi biçimde daralmıştır. 2024 yılı itibarıyla Türkiye'nin İsrail ile olan dış ticaretinin toplam dış ticaret içindeki payının belirgin şekilde düşmesi, siyasi kararların ekonomik ilişkiler üzerindeki doğrudan etkisini açık biçimde ortaya koymaktadır. Bu durum, dış ticaretin yalnızca ekonomik değil, aynı zamanda politik bir araç olarak da kullanılabildiğini göstermektedir.

Sonuç olarak bu çalışma, İsrail-Filistin Savaşı'nın yalnızca bölgesel bir güvenlik sorunu değil, aynı zamanda uluslararası ticaret dengelerini ve ekonomik ilişkileri şekillendiren önemli bir faktör olduğunu ortaya koymaktadır. Türkiye açısından bu savaş, alternatif pazar arayışlarının hızlanması ve dış ticarette risk çeşitlendirmesinin önemini gündeme getirirken; İsrail açısından ise jeopolitik risklerin ekonomik maliyetlerinin daha görünür hâle gelmesine yol açmıştır.

ÖZET

Küresel ölçekte dijital teknolojilerin hızla yaygınlaşması, uluslararası para sisteminin geleneksel yapısını dönüştüren yeni bir dönemin kapılarını aralamıştır. Bu dönüşümün merkezinde, devletlerin geliştirdiği merkez bankası dijital paraları (CBDC'ler) ile doların Bretton Woods sonrası pekişmiş olan hegemonik konumu arasındaki rekabet yer almaktadır. Dijitalleşme, sınır ötesi ödemeleri hızlandırarak ve işlem maliyetlerini azaltarak mevcut dolar merkezli altyapıyı teknik açıdan sorgularken; Çin'in e-CNY projesi, Avrupa Birliği'nin dijital euro girişimi ve çeşitli bölgesel CBDC projeleri, rezerv para statüsünün geleceğine yönelik tartışmaları derinleştirmektedir.

Bu çalışma, doların uluslararası gücünün hangi unsurlar tarafından korunduğunu, dijitalleşmenin bu unsurları nasıl yeniden şekillendirdiğini ve CBDC'lerin küresel para mimarisinde yeni güç merkezleri yaratma potansiyelini incelemektedir. Bulgular, doların finansal piyasa derinliği ve güven temelli üstünlüğünün kısa vadede devam ettiğini; ancak dijital ödemelerin yaygınlaşması, ABD dışı alternatif ödeme ağlarının gelişmesi ve CBDC teknolojilerinin jeopolitik bir araç hâline gelmesi nedeniyle uzun vadede çok kutuplu bir para düzeninin ortaya çıkma ihtimalinin güçlendiğini göstermektedir. Çalışma ayrıca, Türkiye'nin dijital TL ve bölgesel iş birliği stratejileri üzerinden gelişen dijital para rekabetinde aktif rol almasının ekonomik ve finansal egemenlik açısından kritik olduğuna işaret etmektedir.

Anahtar Kelimeler: CBDC, Dolar Hegemonyası, Uluslararası Para Sistemi, Dijitalleşme, E-CNY, Dijital Euro.

DIGITALIZATION IN THE INTERNATIONAL MONETARY SYSTEM: THE HEGEMONY OF THE DOLLAR AND THE CBDC COMPETITION

ABSTRACT

The rapid global adoption of digital technologies has ushered in a new era transforming the traditional structure of the international monetary system. At the heart of this transformation lies the competition between central bank digital currencies (CBDCs) developed by states and the dollar's post-Bretton Woods hegemonic position. Digitalization challenges the existing dollar-centric infrastructure from a technical standpoint by accelerating cross-border payments and reducing transaction costs; while China's e-CNY project, the European Union's digital euro initiative, and various regional CBDC projects deepen debates about the future of reserve currency status.

This study examines the elements that maintain the international power of the dollar, how digitalization is reshaping these elements, and the potential of CBDCs to create new power centers in the global monetary architecture. The findings indicate that while the dollar's financial market depth and trust-based dominance persist in the short term, the proliferation of digital payments, the development of alternative payment networks outside the US, and the geopolitical instrumentalization of CBDC technologies strengthen the likelihood of a multipolar monetary order emerging in the long term. The study also points out that Turkey's active role in the evolving digital currency competition, through its digital Turkish Lira and regional cooperation strategies, is critical for its economic and financial sovereignty.

Keywords: CBDC, Dollar Hegemony, International Monetary System, Digitalization, E-CNY, Digital Euro.

1.GİRİŞ

Uluslararası para sisteminin küresel ölçekte dijital dönüşüm süreci, modern ekonomi politiğinin en dikkat çekici tartışmalarından birini oluşturmaktadır. Blokzincir tabanlı teknolojilerin, kripto varlıkların ve özellikle merkez bankası dijital paralarının (Central Bank Digital Currency – CBDC) yaygınlaşması, uluslararası likiditenin geleneksel yapısında köklü değişimlere yol açabilecek niteliktedir. Bretton Woods sisteminin çöküşünden bu yana dolar merkezli yapı, ABD'nin finansal piyasalardaki derinliği, güven ilişkisi, küresel ticaretteki ağırlığı ve güçlü jeopolitik konumu sayesinde istikrarını sürdürmüştür (Eichengreen, 2011; Cohen, 2015). Ancak dijitalleşmenin ortaya çıkardığı yeni teknolojik kapasite, uluslararası para düzeninde ilk kez doların egemenliğini yapısal olarak sorgulayan alternatiflerinin doğmasına zemin hazırlamaktadır.

Son yıllarda 130'dan fazla ülkenin CBDC projelerine başlaması (BIS, 2023), uluslararası ödeme sistemleri ve sınır ötesi para akımlarının geleceğinin yeniden tasarlandığını

göstermektedir. Özellikle Çin'in dijital yuan projesi olan e-CNY, dolar-dışı ödeme ağlarının güçlendirilmesi ve ABD hegemonyasının zayıflatılması hedefi ile jeopolitik bir araç olarak konumlanmaktadır (Auer & Böhme, 2020; Prasad, 2021). Buna paralel olarak Avrupa Merkez Bankası'nın dijital euro girişimi, AB'nin stratejik "dijital egemenlik" arayışının bir parçası olarak şekillenmiştir (Panetta, 2023). Bu gelişmeler, küresel ekonomide doların yeniden tanımlanan bir rekabet alanıyla karşı karşıya olduğuna işaret etmektedir.

Dijitalleşmenin uluslararası para sistemi üzerindeki etkisi, yalnızca teknik bir dönüşüm olmanın ötesindedir. Uluslararası ödeme altyapılarının (SWIFT, CHIPS), finansal yaptırım mekanizmalarının, rezerv dağılımının ve küresel likidite mimarisinin tamamı bu dönüşümden etkilenmektedir (IMF, 2022; Tooze, 2023). ABD'nin yaptırım kapasitesinin önemli bir bölümü doların küresel finansal ağlardaki merkezî konumuna dayanırken, dijital alternatiflerin yaygınlaşması bu stratejik gücün uzun vadede zayıflayabileceğine dair tartışmaları artırmıştır (Kirshner, 2020; Farrell & Newman, 2019).

CBDC'lerin ortaya çıkışı, devletlerin parasal egemenliklerini güçlendirme, ödeme sistemlerinde dışa bağımlılığı azaltma ve bölgesel güç alanları oluşturma hedefleriyle de ilişkilidir. Bu çerçevede dijital paraların yükselişi, yalnızca ekonomik değil, aynı zamanda jeopolitik bir dönüşümün de başlangıcı olarak değerlendirilmektedir (Brunnermeier et al., 2021; Bordo & Levin, 2017). Uluslararası para sistemi dijitalleşme etkisiyle daha rekabetçi, daha çok kutuplu ve daha teknolojik bir yapıya doğru evrilmektedir.

Türkiye açısından bakıldığında, mevcut dolarizasyon düzeyi, dış ticaretin büyük bölümünde ABD doları kullanımının devam etmesi ve SWIFT benzeri ağlara yüksek bağımlılık, dijitalleşen para düzeninin ülke ekonomisi için stratejik önemini artırmaktadır. Türkiye Cumhuriyet Merkez Bankası'nın dijital TL projesi, bu dönüşümün bir parçası olarak değerlendirilmeli; bölgesel CBDC iş birlikleri, teknolojik kapasite ve finansal egemenlik boyutları birlikte ele alınmalıdır (TCMB, 2023).

Bu çalışma, uluslararası para sisteminin dijitalleşme sürecini dolar hegemonyası bağlamında incelemeyi, CBDC rekabetinin ekonomik ve jeopolitik yansımalarını değerlendirmeyi ve Türkiye açısından stratejik sonuçları tartışmayı amaçlamaktadır. Çalışma, teorik literatür, uluslararası kurum raporları ve güncel akademik araştırmalar ışığında çok boyutlu bir analiz ortaya koymaktadır.

2. KURAMSAL ÇERÇEVE

Uluslararası para sisteminin dijitalleşme süreci, iktisat literatüründe hem parasal ekonomi hem uluslararası finans hem de ekonomi politiği kapsayan çok disiplinli bir yaklaşımı gerektirir. Bu nedenle bu bölümde, dolar hegemonyasının teorik temelleri, uluslararası para düzeninin işleyişi ve dijital para teknolojilerinin bu yapıyı nasıl dönüştürdüğü sistematik olarak ele alınmaktadır. Literatür çerçevesi özellikle para hegemonyası, ağ etkileri, uluslararası likidite mimarisi, CBDC tasarımları ve dijitalleşmenin jeoekonomik etkileri üzerine kuruludur.

2.1. Para Hegemonyası ve Uluslararası Para Sistemi Teorileri

Uluslararası para sistemi tarihsel olarak hegemonik güçlerin ekonomik ve politik kapasitesine bağlı olarak şekillenmiştir. Charles Kindleberger'in hegemonik istikrar teorisi, uluslararası ekonomik düzenin istikrarının lider bir devletin sağlayacağı finansal güvenlik, likidite ve düzen kurma kapasitesine bağlı olduğunu savunur (Kindleberger, 1973). Bu bağlamda ABD, II. Dünya Savaşı sonrası dönemde doların altına endeksli olduğu Bretton Woods sistemi ile hegemonik liderliği üstlenmiş ve sistem 1971 sonrası altın standardı sona erse de dolar merkezli yapısını sürdürmüştür (Eichengreen, 2011).

Benjamin Cohen (2015) para hegemonyasını sadece ekonomik kapasiteyle değil, aynı zamanda para biriminin işlevsel üstünlüğü ile açıklar: rezerv para, fatura birimi, işlem aracı ve değer saklama işlevlerindeki küresel kullanım oranı, hegemonyanın en belirleyici göstergeleridir. ABD doları, bugün uluslararası rezervlerin yaklaşık %59'unu, küresel ticari sözleşmelerin %50'den fazlasını ve uluslararası borçlanmanın büyük bölümünü oluşturmaktadır (IMF, 2023).

Doların başarısını açıklayan diğer önemli kavram ağ etkileridir. Obstfeld & Rogoff (2005), bir para biriminin uluslararası ölçekte benimsenmesinin ağ büyüdükçe maliyetsizleştiğini ve kendini güçlendiren bir döngü oluşturduğunu belirtmektedir. Bu nedenle doların küresel kullanımının yüksek olması, onun hâkimiyetini daha da pekiştirmektedir.

2.2. Doların Hegemonik Konumunu Güçlendiren Yapısal Unsurlar

Teori literatürü doların üstünlüğünü dört ana yapısal unsura dayandırmaktadır:

(1) ABD finansal piyasalarının derinliği ve güvenilirliği
Uluslararası yatırımcıların dolar cinsi varlıklara yüksek talep göstermesi, ABD hazine tahvillerinin güvenli liman işlevi görmesi ve derin sermaye piyasaları doların likidite üstünlüğünü pekiştirir (Caballero & Fahri, 2017).

(2) Küresel ticarette merkezî konum
Ticaretin dolarizasyonu, özellikle emtia piyasalarında doların standart fiyatlandırma aracı olarak kullanılmasını sağlamıştır (Gopinath, 2015).

(3) Finansal altyapı hâkimiyeti (SWIFT – CHIPS)
ABD'nin yaptırım gücü, uluslararası ödeme ağlarını kontrol etmesinden kaynaklanır (Farrell & Newman, 2019). Bu durum doların sadece ekonomik değil jeopolitik bir araç olmasını da mümkün kılar.

(4) Jeopolitik ve askeri güç kapasitesi
Para hegemonyası, askeri ve diplomatik güç ile desteklenen bir yapı olarak ele alınır (Kirshner, 2020). ABD'nin küresel ittifak ağları doların rezerv para olarak güvenilirliğini artırmaktadır.

Bu unsurlar, dijitalleşme öncesi dönemde doların üstünlüğünü tartışmasız kılarken, dijital teknolojilerin yükselişi bu dengelerin bir kısmını sorgulayan yeni bir aşamayı başlatmıştır.

2.3. Dijitalleşmenin Parasal Mimariyi Dönüştürücü Etkisi

Dijitalleşme, uluslararası para sisteminin en temel unsurlarına dokunan bir dönüşüm yaratmaktadır. Blokzincir teknolojisi, dağıtık defter yapıları, akıllı sözleşmeler, tokenizasyon ve gerçek zamanlı ödeme sistemleri, ulusal sınırların ötesine geçen yeni bir finansal altyapı oluşturmuştur (Narula, 2022).

Dijitalleşmenin uluslararası para sistemi üzerinde yarattığı etkiler üç başlıkta özetlenebilir:

(1) Ödeme Maliyetlerinin Azalması ve Hızın Artması
Sınır ötesi işlemler SWIFT gibi geleneksel ağlarda ortalama 1–3 gün sürerken, dijital yenilikler işlemleri saniyeler içinde gerçekleştirebilir (BIS, 2022).

(2) Finansal Aracısızlaşma (Disintermediation)
Dijital paralar, bankalar veya ABD merkezli ödeme ağları gibi aracılara olan bağımlılığı azaltabilir. Bu durum ABD'nin finansal sisteme dayalı yaptırım kabiliyetini orta vadede sınırlayabilir (Tooze, 2023).

(3) Dijital Para Rekabetinin Doğması
CBDC'ler ülkelerin parasal egemenliklerinin dijital boyutunu güçlendirirken, jeopolitik rekabeti de ödeme teknolojilerine taşımaktadır (Brunnermeier et al., 2021).

2.4. CBDC Tasarımları ve Uluslararası Kullanım Potansiyeli

CBDC'ler genellikle hesap bazlı, token bazlı veya hibrit modeller şeklinde tasarlanır (Auer & Böhme, 2020). Bir dijital paranın uluslararası alanda kullanılabilmesi için:

- Yüksek teknik güvenlik,
- Sınır ötesi ödeme uyumluluğu,
- Güçlü finansal altyapı,
- Hukuki ve kurumsal güven,
- Geniş kullanıcı ağı

gibi kriterlere sahip olması gerekir (IMF, 2022).

Bu kriterlere dayanarak araştırmacılar, CBDC'lerin kısa vadede doların yerini alma ihtimalinin düşük olduğunu, ancak bölgesel rezerv blokları oluşturma kapasitesine sahip olduğunu göstermektedir (Prasad, 2021; Panetta, 2023).

2.5. Dijital Para Rekabetinin Jeopolitik Boyutu

Dijital para sadece ekonomik bir araç değil, aynı zamanda uluslararası güç mücadelesinin bir parçası hâline gelmiştir. Çin'in e-CNY projesi, ABD yaptırımlarını aşmayı mümkün kılacak alternatif ödeme ağlarıyla birlikte değerlendirilmektedir (Zhang, 2021). AB'nin dijital euro hamlesi ise dijitalleşen dünyada ABD finansal hâkimiyetine karşı bir "stratejik özerklik" arayışı olarak yorumlanmaktadır (Panetta, 2023).

Bu nedenle literatür, CBDC rekabetini "parasal jeopolitik" kavramı üzerinden değerlendirmektedir (Berg, 2022).

3. LİTERATÜR İNCELEMESİ

Uluslararası para sisteminin dijitalleşme süreci, ekonomi literatüründe son on yılın en hızlı gelişen araştırma alanlarından biri hâline gelmiştir. Bu bölümde; dolar hegemonyası, uluslararası para mimarisinin dönüşümü, CBDC rekabeti, kripto-finans dinamikleri ve dijitalleşmenin jeopolitik yansımaları üzerine yapılan çalışmalar kapsamlı biçimde değerlendirilmektedir. Literatür akımları özellikle beş tematik kümeye ayrılarak sunulmaktadır:

Doların tarihsel hegemonik yapısı,

Ağ etkileri ve uluslararası likidite,

CBDC tasarımları ve teknolojik dönüşüm,

Dijitalleşmenin jeopolitik etkileri ve

Rezerv para rekabetinin geleceği.

3.1. Doların Tarihsel Hegemonyası Üzerine Literatür

Uluslararası para sistemine ilişkin klasik çalışmalar, dolar hegemonyasını ABD ekonomisinin büyüklüğü ve finansal piyasa derinliği ile ilişkilendirmiştir. Kindleberger (1973), hegemonik bir devletin küresel likidite sağlayıcı olarak uluslararası düzenin istikrarını garanti altına aldığını vurgular. Eichengreen (2011), ABD dolarının özellikle 1970 sonrası esnek kur rejimine geçişten sonra bile rezerv para konumunu korumasını "güven mekanizması" ve "piyasa ölçeği" ile açıklamıştır.

Cohen (2015), doların gücünü parasal işlevlerin çok boyutluluğuna bağlar: değer saklama, ödeme aracı, rezerv birimi ve fatura birimi rollerinin tümünde üstünlük sağlaması doların diğer para birimlerine karşı sistemik bir avantaj yarattığını savunur. Bu tartışma, global ekonomide doların "ağ etkileri yoluyla pekişen hegemonik döngü" oluşturduğunu iddia eden Gopinath (2015) ve Obstfeld & Rogoff (2005) tarafından da desteklenmektedir.

ABD varlıklarının güvenli liman özelliği, küresel kriz dönemlerinde dolar talebini artırarak doların hegemonik konumunu pekiştirmektedir (Caballero, Farhi & Gourinchas,

2016). Bu literatür, mevcut sistemde doların üstünlüğünün teknik bir rastlantı değil, yapısal ve politik bir tercih olduğunu ortaya koymaktadır.

3.2. Ağ Etkileri, Uluslararası Likidite ve Ödeme Sistemleri

Ağ etkileri literatürü, uluslararası para yarışında "ilk hareket eden avantajı"nın uzun süreli sonuçlar doğurabileceğini belirtir. Krugman (1991), para kullanımında ağ dışsallıklarının rekabeti keskin biçimde sınırladığını, bir para biriminin hâkimiyetinin kendisini yeniden ürettiğini savunmuştur.

Farrell ve Newman'ın (2019) "weaponized interdependence" yaklaşımı, ABD merkezli finansal ağların—özellikle SWIFT ve CHIPS'in—dolar hegemonyasının kritik bileşenleri olduğunu göstermektedir. Bu altyapılar yalnızca finansal işlemleri değil, aynı zamanda ABD'nin yaptırım kapasitesini de güçlendirmektedir. Bu nedenle ödeme sistemleri üzerindeki kontrol, parasal hegemonya literatüründe giderek daha fazla öne çıkan bir faktör hâline gelmiştir (Tooze, 2023).

Rezerv dağılımı üzerine çalışan Frankel (2008) ve Ito & McCauley (2020), doların son 40 yıldaki rezerv payının dalgalansa bile kalıcı olduğunu göstermiştir. IMF (2023) verileri doların küresel rezervlerde hâlen %59 payla lider olduğunu doğrulamaktadır.

3.3. CBDC Tasarımları, Dijital Para Ekonomisi ve Teknolojik Model Literatürü

BIS (2020, 2023) raporları, CBDC tasarımlarının para politikasının aktarım mekanizmalarını, finansal aracılığı ve ödeme sistemlerini dönüştürebileceğini göstermektedir. Auer & Böhme (2020), perakende ve toptan CBDC modelleri arasındaki ayrımın ulusal ve küresel düzeyde farklı etkiler yaratacağını belirtmektedir.

Brunnermeier, James & Landau (2021), CBDC'lerin uluslararası para rekabetini yeniden tanımlayabileceğini; ancak bir dijital paranın rezerv işlevi görebilmesi için teknik kapasitenin yanı sıra güven, hukuki çerçeve ve makroekonomik istikrar gerektirdiğini vurgulamıştır.

Prasad (2021), dijital paraların parasal egemenliği güçlendirebileceğini ancak istikrarsız ülkelerde dolarizasyonu artırabileceğine işaret etmektedir. Bordo & Levin (2017), CBDC'nin enflasyon hedeflemesi ve merkez bankası şeffaflığıyla uyumlu bir çerçevede tasarlanması gerektiğini savunur.

Kripto varlık literatürü de bu tartışmayı destekleyerek, özel dijital paraların sınır ötesi akımlarda dolar alternatifleri yaratabileceğini, ancak volatilite riskinin rezerv işlevini kısıtladığını vurgulamıştır (Narula, 2022; Adrian & Mancini-Griffoli, 2019).

3.4. Dijitalleşmenin Jeopolitik ve Jeoekonomik Etkilerine Yönelik Literatür

Dijital para literatüründe en hızlı gelişen alanlardan biri jeopolitik etkilerdir. Zhang (2021), Çin'in e-CNY projesinin yalnızca finansal bir yenilik değil, ABD yaptırımlarına karşı stratejik bir alternatif olduğunu savunur. Chen, Liang & Wójcik (2023), e-CNY'nin Kuşak-Yol güzergâhlarında doların etkisini orta vadede sınırlayabileceğini göstermiştir.

Panetta (2023), dijital euronun Avrupa Birliği'nin "stratejik özerklik" hedefinin bir parçası olduğunu; AB ödeme sistemlerinin ABD bağımlılığını azaltmayı hedeflediğini açıkça ifade eder. Bu literatür, dijital paraların ekonomik araçlardan ziyade jeopolitik güç enstrümanları hâline geldiğini ortaya koymaktadır (Berg, 2022; Tooze, 2023).

Karataş & Erdinç (2022), dijital para egemenliğinin özellikle yaptırımlar, enerji ticareti ve bölgesel finans ağları üzerinde belirleyici olabileceğini gösteren Türkiye merkezli çalışmalara örnektir.

3.5. Rezerv Para Rekabetinin Geleceği ve Çok Kutuplu Sistem Tartışmaları

Dijitalleşme sonrası rezerv para rekabetinin geleceği üzerine literatür iki ana görüşe ayrılmaktadır:

(1) "Dolar Kalıcıdır" Görüşü

Bu yaklaşım, doların finansal derinlik, likidite, ağ etkileri ve küresel güven sayesinde CBDC rekabetine rağmen konumunu sürdüreceğini savunur (Eichengreen, 2011; Obstfeld, 2022; Gopinath, 2020).

(2) "Çok Kutuplu Rezerv Sistemi" Görüşü

Bu görüşe göre dijitalleşme, bölgesel CBDC bloklarının ortaya çıkmasını sağlayabilir. Örneğin:

- Çin–Asya CBDC ekseni,
- AB–Avrupa CBDC ekseni,
- BRICS dijital para girişimleri,
- Körfez bölgesinde enerji ticareti için dijital ödeme ağları.

Bu yaklaşımı destekleyen çalışmalar, gelecek 20 yılda rezerv para yapısının kademeli olarak çok kutuplu bir yapıya evrilebileceğini belirtmektedir (Prasad, 2021; Bordo & Levin, 2017; Chen & Wójcik, 2023).

Türkiye üzerine yapılan çalışmalar ise, ülkenin dolarizasyon düzeyi ve dış ticaret kompozisyonu nedeniyle dijitalleşen sistemde stratejik politika üretmesi gerektiğini vurgulamaktadır (TCMB, 2023; Yıldırım, 2021).

3.6. Literatürden Çıkan Temel Sonuçlar

Literatür genel olarak üç eğilime işaret etmektedir:

1. Doların hegemonik pozisyonu güçlü olmakla birlikte dijitalleşme yeni kırılma alanları yaratmaktadır.
2. CBDC'ler kısa vadede küresel rezerv hiyerarşisini değiştirmese de orta vadede bölgesel güç merkezleri oluşturabilir.
3. Dijitalleşme ekonomik olduğu kadar jeopolitik bir rekabet alanı hâline gelmiştir.

Bu sonuçlar ışığında dijital paralar, sadece teknik bir yenilik değil, uluslararası para düzeninin jeoeekonomik yeniden yapılanmasının bir parçası olarak değerlendirilmelidir.

4.CBDC REKABETİ: ABD–ÇİN–AB KARŞILAŞTIRMASI

Dijitalleşme, küresel para sisteminde yalnızca teknolojik bir dönüşüm değil, aynı zamanda uluslararası güç dengelerini yeniden tanımlayan stratejik bir kırılma alanı yaratmıştır. Özellikle büyük ekonomiler arasındaki CBDC rekabeti, küresel likidite akımları, ödeme altyapıları ve jeopolitik etki alanları üzerinde belirleyici bir rol oynamaktadır. Bu bölümde ABD, Çin ve Avrupa Birliği'nin dijital para stratejileri; motivasyonları, teknolojik kapasiteleri, kullanım alanları ve jeopolitik hedefleri çerçevesinde karşılaştırılmaktadır.

4.1. Çin'in e-CNY Projesi ve Dijital Hegemonya Arayışı

Çin Halk Bankası (PBoC) tarafından geliştirilen **dijital yuan (e-CNY)**, dünyada en ileri aşamaya ulaşmış perakende CBDC projelerinden biridir. PBoC'nin resmi raporlarına göre e-CNY, hem iç ekonomide nakitsiz ödemeleri desteklemek hem de sınır ötesi işlemlerde dolar bağımlılığını azaltmak amacıyla tasarlanmıştır (PBoC, 2022).

4.1.1. Çin'in Stratejik Hedefleri

Literatüre göre Çin'in CBDC motivasyonları üç ana başlık altında toplanmaktadır:

1. **Dijital finansal egemenlik:**
   Çin, AliPay ve WeChat Pay gibi özel dijital ödeme devlerinin ekonomik sistem üzerinde oluşturduğu baskıyı dengelemek istemektedir (Ahn & Kim, 2023).
2. **ABD dolarına bağımlılığı azaltma:**
   e-CNY, Çin'in yaptığı enerji, hammadde ve teknoloji ithalatında alternatif bir ödeme mekanizması oluşturabilir (Zhang, 2021).
3. **Uluslararası ödeme ağlarında jeopolitik güç:**
   Çin, SWIFT'e karşı kendi ağı olan **CIPS**'i (Cross-Border Interbank Payment System) geliştirmiştir. Literatürde bu gelişme "dijitalleştirilmiş finansal jeoekonomi" olarak tanımlanır (Chen, Liang & Wójcik, 2023).

4.1.2. Bölgesel ve Küresel Etki

Çin'in dijital parası özellikle şu alanlarda etkili olmaya başlamıştır:

- Kuşak-Yol ülkelerinde pilot iş birlikleri (Laos, Tayland, BAE)
- BRICS içi dijital ödeme ağları

- Sınır ötesi e-commerce platformları

Bu durum bazı akademisyenler tarafından "dijital renminbi bölgesi" olarak adlandırılmaktadır (Berg, 2022).

4.2. ABD'nin Temkinli CBDC Yaklaşımı ve Doların Dijital Savunusu

ABD, küresel rezerv para ihraç eden ülke olduğundan CBDC konusunda daha temkinli hareket etmektedir. Federal Reserve (Fed), dijital dolar konusunda farklı araştırmalar yürütse de henüz bir pilot uygulama başlatmamıştır.

4.2.1. ABD'nin Temel Öncelikleri

Fed'in CBDC konusundaki yaklaşımı şu risk ve fırsatlara odaklanır:

1. **Doların uluslararası konumunun korunması:**
   ABD, CBDC'nin dolar hegemonyasını zayıflatmasına izin vermemek istemektedir (Adrian & Mancini-Griffoli, 2019).
2. **Finansal istikrar kaygıları:**
   CBDC'nin bankalardan mevduat çekişine yol açarak bankacılık sistemini zayıflatabileceği Endişe edilmektedir (Bordo & Levin, 2017).
3. **Ödeme sistemlerinin modernizasyonu:**
   Fed'in CBDC'ye alternatif olarak geliştirdiği FedNow sistemi, gerçek zamanlı ödemeleri güçlendirerek CBDC ihtiyacını azaltmayı hedeflemektedir (Fed, 2023).

4.2.2. ABD'nin Jeopolitik Stratejisi

Dolar hâlâ dünyanın:

- %59 rezerv parasını,
- %88 döviz işlemi payını,
- Küresel borçlanmanın büyük bölümünü

oluşturduğu için ABD, CBDC konusunda hızdan çok kontrol ve hegemonik uyumluluğu öncelemektedir (IMF, 2023).

Bu nedenle literatüre göre ABD, CBDC'yi "dijital dolar alanını genişletmek için jeopolitik araç" olarak kullanmayı planlamaktadır (Tooze, 2023).

4.3. Avrupa Birliği ve Dijital Euro Girişimi

Avrupa Merkez Bankası (ECB), dijital euroyu "Avrupa'nın dijital stratejik özerkliği" için kritik bir teknoloji olarak tanımlamıştır (Panetta, 2023).

4.3.1. AB'nin Motivasyonları

Dijital euro projesi beş temel amaca dayanmaktadır:

1. ABD ödeme sistemlerine bağımlılığı azaltmak
2. Avrupa içi ödeme entegrasyonunu güçlendirmek
3. Veri gizliliği ve finansal güvenliği sağlamak
4. Avro'nun uluslararası statüsünü güçlendirmek
5. Fintech rekabetine yanıt vermek

AB literatürü, dijital euronun özellikle ABD merkezli Visa–Mastercard hâkimiyetini kırmayı hedeflediğini vurgular (Arner & Buckley, 2021).

4.3.2. Uluslararası Alanda Dijital Euro

Dijital euro, euro bölgesinin dışındaki ülkeler için de alternatif bir ödemeler sistemi sunabilir. Ancak AB'nin jeopolitik etkisinin sınırlı olması, dijital euronun dolar karşısında kısa vadede önemli bir meydan okuma yaratmasını engellemektedir.

4.4. ABD–Çin–AB Dijital Para Rekabetinin Sistemik Sonuçları

Karşılaştırmalı analiz literatürü, üç büyük aktörün dijital para stratejilerinden üç temel sonuç çıkarmaktadır:

(1) Dijitalleşme Para Hegemonyasında Yeni Bir Rekabet Alanı Oluşturmuştur

Çin dijital para entegrasyonunda öncü konumda olup bölgesel güç yaratmayı amaçlarken, ABD doların merkezî konumunu dijital mimariyle güçlendirmeye çalışmaktadır (Brunnermeier et al., 2021).

(2) Bölgesel Dijital Para Blokları Doğmaktadır

AB, Çin ve BRICS ülkeleri arasında ödeme ağları çeşitlenmekte, bu da tek kutuplu dolar sisteminden çıkış ihtimalini güçlendirmektedir (Chen & Wójcik, 2023).

(3) Küresel Rezerv Para Sistemi Orta Vadede Çok Kutuplu Bir Görünüme Evrilmektedir

Prasad (2021) ve Tooze (2023), CBDC'lerin küresel rezerv ağırlıklarını hızla değiştirmese de jeopolitik ve teknolojik dönüşüm nedeniyle çok katmanlı bir rezerv yapısının kaçınılmaz olduğunu savunmaktadır.

4.5. Türkiye Açısından Sonuçların Önemi

ABD–Çin–AB arasındaki CBDC rekabeti:

- Dış ticaret ödeme araçlarını,
- Uluslararası sermaye akımlarını,
- Türkiye'nin dolarizasyon düzeyini,
- Bölgesel entegrasyon potansiyelini

doğrudan etkilemektedir.

Türkiye'nin dijital TL projesi bu rekabet alanına doğru konumlandırılmalı ve Türkiye'nin dış politika–finans etkileşimi çok boyutlu olarak değerlendirilmelidir (TCMB, 2023).

5.DOLAR HEGEMONYASININ DİJİTALLEŞME KARŞISINDAKİ DAYANIKLILIĞI

Dijitalleşme, uluslararası para sisteminde yeni aktörlerin ve teknolojik araçların ortaya çıkmasına zemin hazırlarken, ABD dolarının uzun süredir devam eden hegemonik konumunun sürdürülebilirliği yeniden tartışma konusu hâline gelmiştir. CBDC'lerin yükselişi, alternatif ödeme altyapılarının gelişmesi ve finansal teknolojilerin sınır ötesi işlemleri hızlandırması, doların küresel para sistemi içindeki merkezi rolünü doğrudan olmasa da dolaylı biçimde zorlamaktadır. Bununla birlikte literatür, dolar hegemonyasının dijitalleşme karşısında hâlen güçlü direnç mekanizmalarına sahip olduğunu göstermektedir.

5.1. Doların Yapısal Dayanıklılığının Kaynakları

Doların küresel para sistemi içindeki baskın konumunun dijitalleşmeye rağmen korunmasının ardında, büyük ölçüde yapısal faktörler yer almaktadır. Öncelikle ABD finansal piyasalarının derinliği ve likiditesi, dolar cinsinden varlıkların küresel yatırımcılar açısından vazgeçilmez bir "güvenli liman" niteliği taşımasını sağlamaktadır (Caballero & Farhi, 2017). ABD Hazine tahvilleri, kriz dönemlerinde dahi küresel likidite talebini karşılayan temel araçlar olarak işlev görmektedir.

İkinci olarak, doların küresel ticaretteki hâkim konumu dijitalleşme ile kolaylıkla aşılabilecek bir özellik değildir. Gopinath (2015), ticaret sözleşmelerinin büyük bölümünün dolar üzerinden fiyatlanmasının firmalar açısından belirsizlik maliyetlerini azalttığını ve bu nedenle dolar kullanımının rasyonel bir tercih hâline geldiğini vurgulamaktadır. Dijital ödeme teknolojileri işlem hızını artırsa da ticaretin fiyatlandırma para birimini kısa vadede dönüştürme kapasitesine sahip değildir.

Üçüncü olarak, doların uluslararası finansal mimariyle olan kurumsal entegrasyonu, dijital alternatiflere karşı önemli bir üstünlük yaratmaktadır. SWIFT, CHIPS ve ABD merkezli takas sistemleri, küresel finansal akımların önemli bir bölümünü yönlendirmekte ve doların merkezî rolünü pekiştirmektedir (Farrell & Newman, 2019). Bu altyapılar, sadece teknik değil aynı zamanda politik güç unsurlarıdır.

5.2. Dijitalleşmenin Dolar Üzerindeki Sınırlı Kısa Vadeli Etkileri

Literatürde genel kabul gören görüş, dijital paraların ve CBDC'lerin kısa vadede doların rezerv para statüsünü doğrudan tehdit etmediği yönündedir. Eichengreen (2022), tarihsel deneyimlerin uluslararası para sisteminde lider para biriminin yerini almasının onlarca yıl sürebildiğini ortaya koymaktadır. Benzer biçimde Obstfeld (2022), dijitalleşmenin daha çok ödeme kanallarını dönüştürdüğünü, rezerv tercihlerinin ise makroekonomik istikrar ve güven gibi faktörlere dayandığını savunmaktadır.

CBDC'ler sınır ötesi işlemlerde hız ve maliyet avantajı sağlasa da bu özellikler tek başına küresel rezerv para statüsü kazanmak için yeterli değildir. Bir para biriminin uluslararası düzeyde kabul görmesi; güçlü hukuki altyapı, açık sermaye piyasaları, düşük politik risk ve derin finansal araç çeşitliliği gerektirmektedir (IMF, 2022). Bu koşulların büyük bölümünü hâlen ABD sağlamaktadır. Bu nedenle literatür, dijitalleşmenin kısa vadede doların konumunu zayıflatmaktan ziyade, mevcut sistemi daha verimli hâle getirdiği yönünde birleşmektedir (Gopinath & Stein, 2021).

5.3. Orta ve Uzun Vadede Ortaya Çıkan Kırılganlık Alanları

Her ne kadar doların kısa vadeli dayanıklılığı güçlü olsa da dijitalleşme orta ve uzun vadede bazı yapısal kırılganlık alanları yaratmaktadır. Bunlardan ilki, alternatif ödeme ağlarının çoğalmasıdır. Çin'in CIPS sistemi, Rusya'nın SPFS ağı ve bölgesel ödeme platformları, dolar merkezli finansal ağların tekelleşmiş yapısını kısmen de olsa aşındırmaktadır (Chen & Wójcik, 2023).

İkinci kırılganlık alanı, finansal yaptırımların giderek daha yoğun biçimde kullanılmasıdır. ABD'nin dolar ve ödeme sistemleri üzerinden uyguladığı yaptırımlar, bazı ülkeleri dolar-dışı ödeme ve rezerv alternatifleri geliştirmeye yöneltmiştir (Tooze, 2023). Bu durum, doların jeopolitik bir güç aracı olarak kullanılması ile uzun vadeli güvenilirliği arasında potansiyel bir gerilim yaratmaktadır.

Üçüncü olarak, CBDC'lerin bölgesel entegrasyon kapasitesi, doların küresel ağ etkilerini zayıflatabilecek yeni bloklar oluşturabilir. Özellikle Çin'in Kuşak-Yol Girişimi kapsamındaki ülkelerle dijital para entegrasyonu, doların bazı ticaret koridorlarındaki hâkimiyetini sınırlayabilir (Zhang, 2021).

5.4. Dolar Hegemonyasının Dönüşümü: Gerileme mi, Yeniden Yapılanma mı?

Literatürde artan sayıda çalışma, dolar hegemonyasının "çöküş" yerine "dönüşüm" sürecine girdiğini ileri sürmektedir. Brunnermeier, James ve Landau (2021), dijitalleşmenin doların mutlak hâkimiyetini zayıflatabileceğini; ancak ABD'nin teknolojik adaptasyon ve kurumsal esneklik sayesinde yeni dijital mimariye uyum sağlayabileceğini savunmaktadır.

Bu perspektife göre ABD, dijital dolar veya dolar destekli ödeme sistemleri aracılığıyla hegemonik konumunu yeniden yapılandırabilir. FedNow gibi projeler, CBDC olmaksızın dahi doların dijital altyapısını güçlendirme potansiyeline sahiptir (Federal Reserve, 2023). Dolayısıyla dijitalleşme, dolar için bir tehditten ziyade, doğru stratejilerle hegemonik kapasitenin güncellenmesi anlamına gelebilir.

6.CBDC REKABETİNİN JEOPOLİTİK BOYUTU

Uluslararası para sisteminde dijitalleşmenin hız kazanması, ekonomik rekabetin ötesine geçen yeni bir jeopolitik mücadele alanı yaratmıştır. Merkez bankası dijital paraları

(CBDC'ler), yalnızca ödeme sistemlerini modernize eden teknik araçlar olarak değil; aynı zamanda devletlerin küresel güç projeksiyonlarını yeniden tanımlayan stratejik enstrümanlar olarak ortaya çıkmaktadır. Bu bağlamda CBDC rekabeti, para politikası, finansal altyapı ve jeopolitik güç ilişkilerinin kesişim noktasında şekillenmektedir.

6.1. Parasal Jeopolitik ve Dijital Egemenlik

Paranın jeopolitik boyutu, uluslararası ilişkiler literatüründe uzun süredir tartışılmakla birlikte, dijitalleşme bu tartışmayı yeni bir boyuta taşımıştır. Kirshner (2020), parasal gücü bir devletin dış politika hedeflerini destekleyen temel araçlardan biri olarak tanımlarken; Farrell ve Newman (2019) küresel finansal ağların kontrolünün modern jeopolitiğin en etkili güç unsurlarından biri hâline geldiğini savunmaktadır. CBDC'ler bu ağların dijital versiyonlarını oluşturma potansiyeline sahiptir.

Dijital egemenlik kavramı, devletlerin ödeme sistemleri, veri akışları ve finansal altyapılar üzerindeki kontrolünü ifade etmektedir. Avrupa Birliği'nin dijital euroyu stratejik özerklik hedefiyle ilişkilendirmesi ve Çin'in e-CNY projesini ulusal güvenlik çerçevesinde ele alması, CBDC'lerin teknik olmaktan ziyade jeopolitik bir araç olarak konumlandığını göstermektedir (Panetta, 2023; Zhang, 2021).

6.2. CBDC'ler ve Yaptırımların Geleceği

CBDC'lerin jeopolitik önemini artıran temel unsurlardan biri, finansal yaptırımların etkinliği üzerindeki potansiyel etkileridir. ABD'nin dolar ve SWIFT ağı üzerinden uyguladığı yaptırımlar, küresel finansal sistemde merkezi bir rol oynamaktadır. Ancak dijital paralar ve alternatif ödeme ağlarının gelişmesi, bu yaptırım mekanizmalarının etkinliğini orta ve uzun vadede sınırlayabilir (Tooze, 2023).

Çin ve Rusya gibi ülkeler, CBDC'leri ve yerel ödeme sistemlerini ABD yaptırımlarına karşı stratejik bir tampon olarak değerlendirmektedir. Literatürde bu süreç, "yaptırım kaçınma kapasitesinin dijitalleşmesi" olarak tanımlanmaktadır (Farrell & Newman, 2019; Berg, 2022). Bununla birlikte IMF (2022), CBDC'lerin tamamen yaptırımları devre dışı bırakmasının kısa vadede mümkün olmadığını, zira küresel finansal entegrasyonun hâlen dolar merkezli olduğunu vurgulamaktadır.

6.3. Bölgesel CBDC Blokları ve Güç Alanları

Dijitalleşme, küresel para sistemini tek merkezli bir yapıdan çok merkezli bir yapıya dönüştürme potansiyeline sahiptir. Özellikle bölgesel CBDC iş birlikleri, uluslararası ödeme akımlarını yeniden yönlendirebilecek niteliktedir. Çin'in e-CNY'yi Kuşak ve Yol Girişimi kapsamındaki ülkelerle entegre etmeye yönelik çabaları, literatürde "dijital para diplomasisi" olarak adlandırılmaktadır (Chen, Liang & Wójcik, 2023).

Benzer şekilde, Körfez ülkeleri arasında yürütülen çok taraflı CBDC projeleri (mBridge gibi), enerji ticaretinde dolar-dışı ödeme seçeneklerinin geliştirilmesine zemin hazırlamaktadır

(BIS, 2023). Bu projeler, küresel enerji piyasalarında doların merkezî rolünü doğrudan sarsmasa da bölgesel ödeme ağlarının çeşitlenmesine katkı sunmaktadır.

Bu gelişmeler, uluslararası para sisteminde çok katmanlı ve bölgesel güç alanlarına dayalı bir yapının oluşabileceğini göstermektedir.

6.4. Dijital Para Rekabeti ve Küresel Güç Dengesinin Dönüşümü

CBDC rekabeti, klasik askeri ve ticari rekabetten farklı olarak, daha çok altyapı temelli bir güç mücadelesi şeklinde ilerlemektedir. Dijital ödeme sistemlerinin standartlarını belirleyen ülkeler, uzun vadede finansal akımlar üzerinde önemli bir kontrol gücü elde edebilecektir (Brunnermeier et al., 2021).

Bu bağlamda ABD, Çin ve AB arasındaki CBDC rekabeti şu üç düzlemde şekillenmektedir:

1. Teknolojik liderlik ve standart belirleme,
2. Jeopolitik etki alanlarının genişletilmesi,
3. Finansal egemenliğin korunması ve güçlendirilmesi.

Literatür, bu rekabetin sıfır toplamlı bir oyun olmadığını; aksine küresel para sisteminde çok merkezli ve rekabetçi bir yapının ortaya çıkabileceğini göstermektedir (Prasad, 2021; Tooze, 2023).

6.5. Türkiye Açısından Jeopolitik Çıkarımlar

Türkiye, coğrafi konumu, dış ticaret yapısı ve finansal entegrasyon düzeyi nedeniyle dijital para rekabetinin dolaylı etkilerine açık bir ülkedir. Dijital TL projesi, Türkiye'nin bu yeni para düzeninde pasif bir izleyici yerine aktif bir aktör olabilmesi açısından stratejik öneme sahiptir (TCMB, 2023).

Türkiye'nin bölgesel ödeme sistemleri, Türk Devletleri Teşkilatı ve Orta Doğu–Körfez ülkeleriyle dijital para iş birlikleri geliştirmesi, dolar bağımlılığını azaltmasa bile ödeme çeşitliliğini artırarak finansal kırılganlıkları sınırlayabilir.

7.TÜRKİYE İÇİN DEĞERLENDİRME VE POLİTİKA ÖNERİLERİ

Uluslararası para sisteminin dijitalleşmesi ve CBDC rekabetinin derinleşmesi, Türkiye gibi gelişmekte olan ve dış finansmana bağımlı ekonomiler açısından hem riskler hem de stratejik fırsatlar barındırmaktadır. Türkiye'nin yüksek dolarizasyon oranı, dış ticaretin büyük ölçüde döviz cinsinden gerçekleştirilmesi ve uluslararası ödeme altyapılarına bağımlılığı, dijital para düzenindeki dönüşümlerin ülke ekonomisi üzerindeki etkilerini daha belirgin hâle getirmektedir. Bu bağlamda Türkiye'nin dijital para stratejisinin yalnızca teknolojik bir yenilik

olarak değil, makroekonomik istikrar, finansal egemenlik ve jeopolitik konumlanma ekseninde ele alınması gerekmektedir.

7.1. Türkiye Ekonomisinin Mevcut Konumu ve Kırılganlık Alanları

Türkiye ekonomisinde dolarizasyon, uzun süredir tartışılan yapısal bir sorundur. Finansal sistemde yabancı para mevduatların toplam mevduatlar içindeki payının yüksekliği, para politikasının etkinliğini sınırlamakta ve kur oynaklığına duyarlılığı artırmaktadır (Özatay, 2020). Uluslararası ticarette ise özellikle enerji ve ara malı ithalatının dolar üzerinden fiyatlanması, küresel dolar likidite koşullarındaki değişimlerin Türkiye ekonomisine hızla yansımasına neden olmaktadır (Yeldan, 2021).

Bu çerçevede dijitalleşen uluslararası para sistemi, Türkiye için iki temel kırılganlık alanı ortaya çıkarmaktadır. Birincisi, dolar merkezli ödeme sistemlerine olan bağımlılığın sürmesi durumunda küresel finansal şoklara maruziyetin devam etmesidir. İkincisi ise alternatif dijital ödeme ağlarının dışında kalınması hâlinde, ticaret ve finansal entegrasyonda rekabet gücünün zayıflaması riskidir. Bu nedenle Türkiye'nin dijital para ve ödeme sistemleri alanında proaktif bir strateji geliştirmesi önem taşımaktadır.

7.2. Dijital TL Projesinin Stratejik Önemi

Türkiye Cumhuriyet Merkez Bankası tarafından yürütülen Dijital Türk lirası (Dijital TL) projesi, bu dönüşüm sürecinde kritik bir adım olarak değerlendirilmektedir. TCMB (2023) raporlarında Dijital TL'nin öncelikli hedefleri; ödeme sistemlerinde verimliliğin artırılması, finansal kapsayıcılığın güçlendirilmesi ve dijital ekonomiye uyumun hızlandırılması şeklinde tanımlanmaktadır. Bununla birlikte literatür, Dijital TL'nin potansiyel etkilerinin yalnızca ulusal sınırlar içinde değerlendirilmemesi gerektiğini vurgulamaktadır (Auer & Böhme, 2020; Prasad, 2021).

Dijital TL'nin toptan (wholesale) kullanımının geliştirilmesi, özellikle dış ticaret ödemeleri ve bankalar arası mutabakat süreçlerinde maliyetleri azaltma potansiyeline sahiptir. Ayrıca bölgesel ticaret ortaklarıyla yapılacak dijital para entegrasyonları, dolar dışı ödeme kanallarının çeşitlenmesine katkı sunabilir. Ancak bu sürecin, finansal istikrarı zedelemeyecek şekilde kademeli ve kontrollü biçimde tasarlanması gerekmektedir (Bordo & Levin, 2017).

7.3. Bölgesel İş Birlikleri ve Dijital Para Diplomasisi

Uluslararası literatürde giderek daha fazla vurgulanan bir kavram, dijital para diplomasisidir. Bu yaklaşım, ülkelerin dijital para projelerini dış politika ve bölgesel iş birliği stratejileriyle bütünleştirmesini ifade etmektedir (Brunnermeier et al., 2021). Türkiye açısından bu çerçeve, özellikle Türk Devletleri Teşkilatı, Orta Doğu ve Körfez ülkeleri ile geliştirilebilecek dijital ödeme altyapıları açısından önemlidir.

Enerji ithalatı ve ihracatı, Türkiye'nin dış ticaret dengesinde belirleyici bir unsurdur. Körfez ülkeleriyle dijital ödeme sistemleri üzerinden gerçekleştirilecek ticari işlemler, kur riskini azaltmasa bile ödeme süreçlerinin hızlanmasına ve maliyetlerin düşmesine katkı sağlayabilir. Benzer şekilde Orta Asya ülkeleriyle kurulabilecek dijital ödeme ağları, Türkiye'nin bölgesel finans merkezi olma hedefini destekleyebilir (Ekinci & Kılınç, 2022).

7.4. Finansal Egemenlik, Veri Güvenliği ve Düzenleyici Çerçeve

CBDC'ler yalnızca parasal değil, aynı zamanda veri temelli yapılardır. Bu nedenle dijital paraların tasarımı, veri gizliliği, siber güvenlik ve hukuki altyapı gibi unsurlarla doğrudan ilişkilidir. Avrupa Birliği'nin dijital euro projesinde veri gizliliğini önceliklendirmesi ve Çin'in e-CNY'de devlet kontrolünü vurgulaması, farklı siyasi ve kurumsal tercihlere işaret etmektedir (Panetta, 2023; Zhang, 2021).

Türkiye açısından Dijital TL'nin tasarımında, kullanıcı gizliliği ile kamu otoritesinin denetim kapasitesi arasında dengeli bir yapı kurulması kritik önemdedir. Aksi hâlde dijital paraya yönelik toplumsal güvenin zedelenmesi, sistemin benimsenmesini sınırlayabilir. Bu noktada düzenleyici çerçevenin açık, öngörülebilir ve uluslararası standartlarla uyumlu olması gerekmektedir (IMF, 2022).

7.5. Politika Önerileri

Bu değerlendirmeler ışığında Türkiye için aşağıdaki politika önerileri öne çıkmaktadır:

1. **Dijital TL'nin toptan kullanım kapasitesi güçlendirilmelidir.**
   Bankalar arası ödemeler ve dış ticaret işlemleri için pilot uygulamalar genişletilmelidir.
2. **Bölgesel dijital ödeme iş birlikleri geliştirilmelidir.**
   Türk Devletleri, Körfez ülkeleri ve seçili ticaret ortaklarıyla teknik entegrasyon projeleri başlatılmalıdır.
3. **Dijital para stratejisi makroekonomik istikrarla uyumlu hâle getirilmelidir.**
   Dijital TL, para politikası aktarım mekanizmasını zayıflatmayacak biçimde tasarlanmalıdır.
4. **Finansal egemenlik ve veri güvenliği önceliklendirilmelidir.**
   Dijital altyapılar yerli teknoloji kapasitesiyle desteklenmeli, siber güvenlik yatırımları artırılmalıdır.
5. **Uluslararası norm ve standartlarla uyum sağlanmalıdır.**
   BIS, IMF ve bölgesel finans kuruluşlarının belirlediği ilkeler dikkate alınmalıdır.

8. SONUÇ

Uluslararası para sisteminin dijitalleşme süreci, Bretton Woods sonrası dönemde şekillenen dolar merkezli küresel parasal mimarinin ilk kez teknolojik temelli bir meydan okumayla karşı karşıya kaldığını göstermektedir. Merkez bankası dijital paralarının (CBDC) yükselişi, sınır ötesi ödemelerin hızlanması, işlem maliyetlerinin azalması ve alternatif finansal altyapıların gelişmesi gibi unsurlar aracılığıyla mevcut sistemin işleyişini dönüştürmektedir.

Bununla birlikte bu dönüşüm, doların kısa vadede küresel rezerv para konumunu kaybettiğine işaret etmemektedir.

Çalışma bulguları, ABD dolarının uluslararası para sistemi içindeki hâkimiyetinin; finansal piyasa derinliği, güvenli liman niteliği, ağ etkileri ve jeopolitik güç unsurları sayesinde dijitalleşmeye karşı yüksek bir dayanıklılık sergilediğini ortaya koymaktadır. CBDC'ler ve dijital ödeme teknolojileri, doların teknik üstünlüğünü kısmen sorgulasa da rezerv para statüsünün belirleyicisi olan kurumsal güven, hukuki altyapı ve makroekonomik istikrar gibi faktörleri kısa vadede ikame edememektedir. Bu nedenle dijitalleşme, dolar hegemonyasının ani bir çöküşünden ziyade, yeniden yapılanma ve dönüşüm sürecine işaret etmektedir.

Öte yandan orta ve uzun vadede dijitalleşmenin küresel para sisteminde daha çok katmanlı ve çok merkezli bir yapıyı teşvik etme potansiyeli taşıdığı görülmektedir. Çin'in e-CNY projesi, Avrupa Birliği'nin dijital euro girişimi ve bölgesel CBDC iş birlikleri, doların mutlak hâkimiyetini sınırlamasa da belirli ticaret koridorlarında ve bölgesel ödeme ağlarında dolar-dışı alternatiflerin gelişmesine zemin hazırlamaktadır. Bu durum, gelecekte küresel rezerv sisteminin tek bir para birimi etrafında değil, birden fazla dijital ve geleneksel para biriminin bir arada var olduğu daha esnek bir yapıya evrilebileceğini göstermektedir.

Türkiye açısından dijitalleşen uluslararası para düzeni, dikkatle yönetilmesi gereken bir geçiş sürecini ifade etmektedir. Yüksek dolarizasyon düzeyi ve dış ticarette döviz bağımlılığı, Türkiye'yi küresel parasal dalgalanmalara karşı kırılgan kılmaktadır. Bu bağlamda Dijital Türk lirası projesi, yalnızca ödeme sistemlerinin modernizasyonu açısından değil, finansal egemenliğin güçlendirilmesi ve bölgesel entegrasyonun artırılması açısından da stratejik bir araç olarak değerlendirilmelidir. Ancak dijital TL'nin başarısı, makroekonomik istikrarla uyumlu bir tasarım, güçlü bir düzenleyici çerçeve ve uluslararası iş birlikleriyle desteklenmesine bağlıdır.

Sonuç olarak bu çalışma, dijitalleşmenin uluslararası para sisteminde hem süreklilik hem de dönüşüm unsurlarını bir arada barındırdığını göstermektedir. Dolar hegemonyası kısa vadede varlığını sürdürürken, CBDC'ler ve dijital ödeme altyapıları uzun vadede küresel para mimarisini daha rekabetçi, çok kutuplu ve jeopolitik açıdan daha karmaşık bir yapıya dönüştürme potansiyeline sahiptir. Türkiye gibi gelişmekte olan ülkeler için bu süreç, doğru stratejilerle yönetildiğinde risklerin azaltılabileceği ve yeni fırsatların yaratılabileceği bir dönüşüm alanı sunmaktadır.

ÖZET

Karbon vergisi, ülkelerin düşük karbonlu üretime geçişini hızlandırmayı amaçlayan temel bir iklim politikası aracıdır. Türkiye'de henüz uygulanmıyor olsa da Avrupa Birliği'nin Sınırda Karbon Düzenlemesi (CBAM) ve Paris Anlaşması yükümlülükleri, ulusal karbon fiyatlandırmasının kaçınılmaz olduğunu göstermektedir. Bu çalışma, karbon vergisinin Türkiye'deki başlıca enerji-yoğun sektörlerin rekabet gücü üzerindeki potansiyel etkilerini incelemektedir. Çimento, demir–çelik, kimya, alüminyum ve tekstil gibi sektörler enerji tüketimi, emisyon yoğunluğu ve ihracat bağımlılığı açısından değerlendirilmiştir. Bulgular, kısa vadede karbon maliyetlerinin rekabet baskısı yaratabileceğini; ancak uzun vadede teknoloji yatırımları ve enerji verimliliği yoluyla rekabet gücünün artırılabileceğini göstermektedir. Çalışma, karbon vergisi tasarımında sektörlerin dönüşüm sürecini destekleyici politikaların kritik olduğunu vurgulamaktadır.

Anahtar Kelimeler: Karbon Vergisi, Rekabet Gücü, Enerji-Yoğun Sektörler, Yeşil Dönüşüm, CBAM.

THE IMPACT OF CARBON TAX ON SECTORAL COMPETITION IN TURKEY

ABSTRACT

Carbon tax is a key climate policy tool aimed at accelerating countries' transition to low-carbon production. Although not yet implemented in Turkey, the European Union's Border Carbon Adjustment (CBAM) and Paris Agreement obligations demonstrate the inevitability of national carbon pricing. This study examines the potential impacts of carbon tax on the competitiveness of major energy-intensive sectors in Türkiye. Sectors such as cement, iron and steel, chemicals, aluminum, and textiles were evaluated in terms of energy consumption, emission intensity, and

export dependence. The findings show that carbon costs may create competitive pressure in the short term; however, in the long term, competitiveness can be increased through technology investments and energy efficiency. The study emphasizes that policies supporting the transformation process of sectors are critical in carbon tax design.

Keywords: Carbon Tax, Competitiveness, Energy-Intensive Sectors, Green Transition, CBAM.

1. GİRİŞ

Küresel iklim değişikliğiyle mücadele, son yıllarda ekonomik politika yapım süreçlerinin merkezine yerleşmiş; karbon emisyonlarının sınırlandırılması, ülkelerin sanayi politikaları ve dış ticaret stratejileri üzerinde belirleyici bir rol üstlenmiştir. Karbon fiyatlandırma mekanizmaları, bu çerçevede hem çevresel hedeflerin gerçekleştirilmesi hem de ekonomik etkinliğin sağlanması açısından öne çıkan politika araçlarıdır (OECD, 2021).

Avrupa Birliği'nin Sınırda Karbon Düzenleme Mekanizması (CBAM), karbon maliyetlerinin uluslararası ticarette rekabet bozucu etkilerini sınırlamayı hedeflemektedir. Türkiye'nin ihracat yapısında AB'nin yüksek payı ve enerji-yoğun sektörlerin ağırlığı dikkate alındığında, karbon vergisi tartışması çevresel bir tercih olmaktan çıkmakta; rekabet gücünün korunmasına yönelik stratejik bir zorunluluk hâline gelmektedir (TÜİK, 2023; European Commission, 2023).

Bu çalışma, karbon vergisinin Türkiye ekonomisi üzerindeki etkilerini sektörel rekabet perspektifinden ele almakta ve politika yapıcılar için yol gösterici çıkarımlar sunmayı amaçlamaktadır.

2. KAVRAMSAL ÇERÇEVE

Karbon vergisinin sektörel rekabet üzerindeki etkilerini sağlıklı biçimde analiz edebilmek için, öncelikle bu politika aracının teorik dayanaklarının ve rekabet gücüyle olan ilişkisinin kavramsal düzeyde ele alınması gerekmektedir. Karbon vergisi, çevresel dışsallıkların fiyat mekanizması aracılığıyla içselleştirilmesini hedefleyen iktisadi bir araç olmakla birlikte, uygulama sonuçları itibarıyla üretim maliyetleri, teknoloji tercihleri ve uluslararası rekabet dinamikleri üzerinde doğrudan etkiler yaratmaktadır. Bu nedenle karbon vergisinin yalnızca çevre politikası perspektifinden değil, aynı zamanda sanayi ve rekabet politikası bağlamında da değerlendirilmesi önem taşımaktadır.

Bu bölümde, ilk olarak karbon vergisinin ekonomik mantığı ve temel amaçları ele alınmakta; ardından rekabet gücü kavramı, enerji yoğunluğu ve karbon politikaları arasındaki etkileşim teorik çerçevede tartışılmaktadır. Böylece karbon vergisinin kısa ve uzun vadede sektörler üzerindeki potansiyel etkilerini anlamaya yönelik analitik bir zemin oluşturulması amaçlanmaktadır.

2.1. Karbon Vergisinin Amacı ve Ekonomik Mantığı

Karbon vergisi, çevresel dışsallıkların piyasa mekanizması aracılığıyla içselleştirilmesini amaçlayan Pigoucu vergilendirme yaklaşımına dayanmaktadır. Pigou (1920), üretim faaliyetlerinin neden olduğu toplumsal maliyetlerin piyasa fiyatlarına yansıtılmaması durumunda kaynak tahsisinde etkinliğin bozulacağını ileri sürmekte ve bu tür dışsallıkların vergilendirme yoluyla düzeltilmesini önermektedir. Karbon vergisi de bu çerçevede, sera gazı emisyonlarının çevre ve toplum üzerindeki maliyetini firmaların karar süreçlerine dâhil ederek emisyon azaltımını teşvik eden bir politika aracı olarak tasarlanmaktadır.

Ekonomik açıdan karbon vergisinin temel hedefi, firmaların üretim ve teknoloji tercihlerini karbon yoğun faaliyetlerden düşük karbonlu alternatiflere yönlendirmektir. Emisyon başına sabit bir fiyat belirlenmesi, firmalara hangi emisyon azaltım teknolojisinin kullanılacağı konusunda esneklik sağlamakta ve azaltım maliyetlerinin sektörler arasında etkin biçimde dağılmasına olanak tanımaktadır (Metcalf & Weisbach, 2009). Bu yönüyle karbon vergisi, çevresel hedeflere ulaşırken ekonomik etkinliği gözeten piyasa temelli bir araç olarak öne çıkmaktadır.

Literatürde karbon vergisinin, emisyon ticaret sistemlerine kıyasla fiyat belirsizliğini azaltması önemli bir avantaj olarak değerlendirilmektedir. Emisyon ticaretinde toplam emisyon miktarı sabitlenirken karbon fiyatı piyasa koşullarına bağlı olarak dalgalanabilmekte; bu durum yatırım kararlarında belirsizlik yaratabilmektedir. Karbon vergisinde ise fiyatın önceden belirlenmiş olması, firmaların uzun vadeli yatırım ve teknoloji dönüşüm kararlarını daha öngörülebilir bir çerçevede alabilmelerini sağlamaktadır (Stiglitz et al., 2017; OECD, 2021). Bu özellik, özellikle sermaye yoğun ve uzun geri dönüş sürelerine sahip sektörlerde karbon vergisini cazip bir politika aracı hâline getirmektedir.

Bununla birlikte karbon vergisinin etkinliği, vergi oranının düzeyi, uygulama kapsamı ve elde edilen gelirlerin nasıl kullanıldığıyla yakından ilişkilidir. Literatürde, karbon vergisinden elde edilen gelirlerin yeşil yatırımların finansmanı, enerji verimliliği destekleri ve düşük gelir gruplarının korunması amacıyla kullanılması durumunda hem çevresel hem de sosyal açıdan daha başarılı sonuçlar elde edilebileceği vurgulanmaktadır (Goulder & Schein, 2013; World Bank, 2021).

2.2. Rekabet Gücü, Enerji Yoğunluğu ve Karbon Politikaları

Rekabet gücü, bir sektörün veya ekonominin uluslararası piyasalarda sürdürülebilir biçimde üretim yapabilme ve pazar payını koruyabilme kapasitesini ifade etmektedir. Bu kapasite; üretim maliyetleri, teknolojik yetkinlik, emek verimliliği, enerji kullanımı ve dış pazarlara erişim gibi çok sayıda faktörün bileşiminden oluşmaktadır (Krugman, 1994; Porter, 1990). Özellikle enerji maliyetlerinin toplam üretim maliyetleri içindeki payının yüksek olduğu sektörlerde, enerji fiyatları ve çevresel düzenlemeler rekabet gücü üzerinde belirleyici bir rol oynamaktadır.

Enerji yoğunluğu yüksek sektörlerde karbon vergisinin kısa vadede üretim maliyetlerini artırarak rekabet baskısı yaratması olasıdır. Karbon fiyatının üretim maliyetlerine yansıması, özellikle uluslararası ticarete açık sektörlerde fiyat rekabetini zorlaştırabilmekte ve karbon kaçağı riskini gündeme getirebilmektedir (Martin et al., 2014; Fischer et al., 2019). Bu nedenle literatürde, karbon politikalarının rekabet üzerindeki etkilerinin sektörler arasında heterojenlik gösterdiği sıklıkla vurgulanmaktadır.

Ancak uzun vadede karbon vergisinin rekabet gücü üzerindeki etkileri daha farklı bir çerçevede değerlendirilmektedir. Çevresel düzenlemelerin firmaları enerji verimliliğini artırmaya ve düşük karbonlu teknolojilere yatırım yapmaya zorlaması, üretim süreçlerinde verimlilik artışına yol açabilmektedir. Dechezleprêtre ve Sato (2017), karbon fiyatlandırmasının yenilik faaliyetlerini teşvik ederek firmaların teknoloji kapasitelerini güçlendirdiğini ve bu durumun uzun vadede rekabet avantajı yaratabileceğini ortaya koymaktadır. Bu yaklaşım, Porter ve van der Linde (1995) tarafından geliştirilen ve çevresel düzenlemelerin inovasyonu tetikleyerek rekabet gücünü artırabileceğini savunan Porter Hipotezi ile de örtüşmektedir.

Dolayısıyla karbon vergisi ile rekabet gücü arasındaki ilişki, zamansal ve yapısal bir farklılaşma göstermektedir. Kısa vadede maliyet artışı baskın bir etki yaratırken, orta ve uzun vadede teknoloji adaptasyonu, enerji verimliliği ve ürün farklılaştırması yoluyla rekabet gücünün yeniden inşa edilmesi mümkün olabilmektedir. Bu nedenle karbon politikalarının değerlendirilmesinde statik maliyet etkilerinin yanı sıra dinamik verimlilik ve inovasyon etkilerinin de dikkate alınması gerekmektedir (Aghion et al., 2016; OECD, 2021).

3. LİTERATÜR İNCELEMESİ

Karbon vergisinin rekabet gücü üzerindeki etkileri, çevre iktisadı ve uluslararası ticaret literatüründe uzun süredir tartışılan bir konudur. Bu literatür genel olarak karbon fiyatlandırmasının kısa vadeli maliyet etkileri ile uzun vadeli verimlilik ve yenilik dinamikleri arasındaki dengeye odaklanmaktadır. Ayrıca karbon kaçağı ve uluslararası rekabet eşitsizlikleri, politika tasarımında dikkate alınması gereken temel risk alanları olarak öne çıkmaktadır.

3.1. Karbon Vergisi ve Kısa Vadeli Rekabet Etkileri

Literatürdeki birçok çalışma, karbon vergisinin uygulamaya konulduğu ilk dönemlerde özellikle enerji-yoğun ve ticarete açık sektörlerde üretim maliyetlerini artırdığını ortaya koymaktadır. Aldy ve Stavins (2012), karbon fiyatlandırmasının kısa vadede firmaların maliyet yapısını bozarak fiyat rekabetini zorlaştırabileceğini belirtmektedir. Benzer şekilde Martin, Muûls ve Wagner (2014), karbon fiyatlarının firmalar üzerinde heterojen etkiler yarattığını ve bu etkilerin sektörlerin enerji yoğunluğuna göre farklılaştığını göstermektedir.

Bu çerçevede kısa vadeli rekabet baskısının temel nedeni, firmaların mevcut teknoloji yapılarıyla karbon maliyetlerini üretim süreçlerine hızlı biçimde entegre edememeleridir. Özellikle sermaye yoğun sektörlerde üretim teknolojilerinin dönüşümü zaman almakta; bu durum karbon vergisinin ilk aşamada maliyet artırıcı etkisini güçlendirmektedir (Fischer et al.,

2019). Dolayısıyla literatürde kısa vadede rekabet gücü üzerinde olumsuz etkilerin ortaya çıkabileceği genel kabul görmektedir.

3.2. Uzun Vadeli Verimlilik, İnovasyon ve Porter Hipotezi

Karbon vergisinin uzun vadeli etkilerine ilişkin literatür, daha iyimser bir çerçeve sunmaktadır. Porter ve van der Linde (1995), çevresel düzenlemelerin firmaları inovasyona zorlayarak verimlilik artışı ve rekabet avantajı yaratabileceğini ileri sürmektedir. Porter Hipotezi olarak bilinen bu yaklaşım, çevre politikalarının yalnızca maliyet unsuru değil, aynı zamanda teknolojik dönüşümün tetikleyicisi olabileceğini savunmaktadır.

Ampirik çalışmalar, karbon fiyatlandırmasının enerji verimliliği yatırımlarını ve Ar-Ge faaliyetlerini artırabildiğini göstermektedir. Aghion ve arkadaşları (2016), karbon vergilerinin yönlendirilmiş teknik değişimi teşvik ederek düşük karbonlu teknolojilerin geliştirilmesini hızlandırdığını ortaya koymaktadır. Calel ve Dechezleprêtre (2016) ise Avrupa Birliği Emisyon Ticaret Sistemi kapsamında karbon fiyatlandırmasının patent faaliyetlerini olumlu yönde etkilediğini bulgulamaktadır.

Bu bağlamda karbon vergisinin uzun vadeli rekabet etkileri, firmaların teknoloji adaptasyon kapasitesi ve politika tasarımının öngörülebilirliği ile yakından ilişkilidir. Karbon fiyatlarının istikrarlı ve öngörülebilir olması, firmaların uzun vadeli yatırım kararlarını destekleyerek rekabet gücünün yeniden inşa edilmesine katkı sunmaktadır (OECD, 2021).

3.3. Karbon Kaçağı, Uluslararası Rekabet ve CBAM

Karbon vergisi literatüründe önemli bir diğer tartışma alanı, karbon kaçağı riskidir. Karbon kaçağı, karbon fiyatlandırmasının uygulanmadığı veya daha düşük olduğu ülkelere üretimin kayması sonucu küresel emisyonların azalmak yerine yer değiştirmesi anlamına gelmektedir (Fischer et al., 2019). Bu durum, karbon politikalarının çevresel etkinliğini zayıflatırken, karbon fiyatı uygulayan ülkelerde rekabet kaybı riskini artırmaktadır.

Bu soruna çözüm olarak geliştirilen mekanizmalardan biri, Avrupa Birliği'nin Sınırda Karbon Düzenleme Mekanizmasıdır (CBAM). CBAM, ithal ürünlerin karbon içeriğine göre fiyatlandırılmasını öngörerek, karbon kaçağı riskini azaltmayı ve yerli üreticilerle ithalatçılar arasında rekabet eşitliği sağlamayı amaçlamaktadır (European Commission, 2023). Literatürde CBAM'ın, karbon vergisinin rekabet üzerindeki olumsuz etkilerini sınırlayabilecek tamamlayıcı bir politika aracı olduğu vurgulanmaktadır (Mehling et al., 2019).

Bu çerçevede literatür, karbon vergisinin rekabet gücü üzerindeki etkilerinin tek başına vergi oranı ile değil, uluslararası koordinasyon ve tamamlayıcı politika araçlarıyla birlikte değerlendirilmesi gerektiğini ortaya koymaktadır.

4. TÜRKİYE'DE SEKTÖREL ETKİ ANALİZİ

Karbon vergisinin sektörel rekabet üzerindeki etkileri, sektörlerin enerji yoğunluğu, emisyon profili, teknoloji seviyesi ve dış ticaret yapısına bağlı olarak farklılaşmaktadır. Türkiye ekonomisinde sanayi üretiminin önemli bir kısmı enerji-yoğun sektörlerde yoğunlaşmakta; bu sektörler aynı zamanda ihracat performansı açısından da kritik bir rol üstlenmektedir. Bu bölümde, karbon vergisinin Türkiye'de öne çıkan beş sektör üzerindeki potansiyel etkileri analitik bir çerçevede değerlendirilmektedir.

4.1. Demir–Çelik Sektörü

Demir–çelik sektörü, Türkiye'nin hem üretim hacmi hem de ihracat değeri açısından en stratejik sanayi kollarından biridir. Sektör, yüksek enerji tüketimi ve karbon emisyonu nedeniyle karbon vergisinden en fazla etkilenmesi beklenen alanlardan biridir. Türkiye'de üretimin önemli bir bölümü elektrik ark ocaklarına dayansa da kullanılan elektrik enerjisinin karbon yoğunluğu, sektörde dolaylı emisyonları artırmaktadır (IEA, 2022).

Karbon vergisinin kısa vadede demir–çelik sektöründe üretim maliyetlerini artırarak fiyat rekabetini zorlaştırması muhtemeldir. Özellikle AB pazarına ihracat yapan firmalar açısından CBAM kapsamında ortaya çıkacak karbon maliyetleri, rekabet baskısını artıracaktır. Ancak orta ve uzun vadede elektrik ark ocaklarının verimliliğinin artırılması, yenilenebilir enerji kaynaklarının kullanımı ve hidrojen bazlı çelik üretimine geçiş gibi teknolojik dönüşümler, karbon maliyetlerini azaltarak sektörel rekabet gücünü destekleyebilir (IEA, 2023; World Steel Association, 2022).

4.2. Çimento Sektörü

Çimento sektörü, karbon emisyonlarının büyük bölümünün yakıt kullanımından ziyade kimyasal süreçlerden kaynaklanması nedeniyle karbon politikalarına karşı yapısal olarak hassas bir sektördür. Türkiye, Avrupa'nın en büyük çimento üreticilerinden biri konumunda olup sektörün ihracatında AB pazarı önemli bir paya sahiptir. Bu durum, CBAM'ın çimento sektörü üzerindeki etkilerini daha belirgin hâle getirmektedir (European Commission, 2023).

Karbon vergisinin kısa vadede çimento üretim maliyetlerini artırarak fiyat rekabetini olumsuz etkilemesi beklenmektedir. Bununla birlikte literatür, düşük klinker oranlı üretim, alternatif yakıt kullanımı ve atık ısı geri kazanımı gibi uygulamaların emisyon yoğunluğunu önemli ölçüde azaltabileceğini göstermektedir (IEA, 2018; World Bank, 2021). Bu tür yatırımların teşvik edilmesi, karbon vergisinin uzun vadede sektörde teknolojik modernizasyonu hızlandırarak rekabet gücünü yeniden şekillendirmesine katkı sağlayabilir.

4.3. Kimya Sektörü

Kimya sektörü, Türkiye sanayisinde katma değeri yüksek ve ihracata yönelik bir sektör olmasına rağmen enerji yoğunluğu bakımından orta düzeyde bir profile sahiptir. Sektörün en

önemli özelliklerinden biri, yenilik ve Ar-Ge kapasitesinin görece yüksek olmasıdır. Bu durum, karbon vergisinin kimya sektöründe diğer enerji-yoğun sektörlere kıyasla daha sınırlı bir maliyet baskısı yaratmasına olanak tanıyabilir (CEFIC, 2022).

Karbon vergisi, kimya sektöründe üretim maliyetlerini artırmakla birlikte, firmaları yeşil hidrojen kullanımı, biyobazlı hammaddeler ve döngüsel ekonomi uygulamalarına yönlendirebilir. Literatürde, bu tür teknolojik dönüşümlerin kimya sektöründe uzun vadeli rekabet avantajı yarattığı ve sürdürülebilir ürünlere olan talebin artmasıyla birlikte ihracat performansını desteklediği vurgulanmaktadır (OECD, 2021; IEA, 2022).

4.4. Alüminyum Sektörü

Alüminyum sektörü, yüksek elektrik tüketimi nedeniyle karbon fiyatlandırmasına son derece duyarlı bir yapıya sahiptir. Türkiye'de alüminyum üretiminin önemli bir bölümü ithal enerji kaynaklarına dayalı olarak gerçekleştirilmektedir. Bu durum, karbon vergisinin maliyetler üzerindeki etkisini artırmaktadır (IEA, 2023).

Bununla birlikte alüminyum sektörü, geri dönüşüm potansiyeli yüksek bir sektördür. Geri dönüştürülmüş alüminyum üretiminin birincil üretime kıyasla çok daha düşük enerji ve emisyon yoğunluğuna sahip olması, karbon vergisi koşullarında önemli bir rekabet avantajı sunmaktadır. Yenilenebilir enerji kaynaklı üretimin teşvik edilmesi ve geri dönüşüm kapasitesinin artırılması, sektörün karbon vergisine uyumunu kolaylaştırabilir (European Aluminium Association, 2022).

4.5. Tekstil Sektörü

Tekstil sektörü, diğer incelenen sektörlere kıyasla daha düşük emisyon yoğunluğuna sahip olmakla birlikte, AB pazarına yüksek bağımlılığı nedeniyle karbon politikalarına dolaylı olarak hassastır. Özellikle tedarik zinciri boyunca karbon ayak izi raporlaması ve sürdürülebilirlik standartları, sektörün rekabet gücünü etkileyen önemli unsurlar hâline gelmiştir (OECD, 2020).

Karbon vergisinin tekstil sektörü üzerindeki doğrudan maliyet etkileri sınırlı olsa da yeşil tedarik zinciri uygulamalarına uyum sağlayamayan firmalar için pazar kaybı riski bulunmaktadır. Buna karşılık enerji verimliliği, yenilenebilir enerji kullanımı ve sürdürülebilir üretim sertifikaları, sektör için uzun vadeli rekabet avantajı yaratabilir.

5. SEKTÖREL REKABET ÜZERİNDE BEKLENEN ETKİLER

Karbon vergisinin sektörel rekabet üzerindeki etkileri zamansal olarak farklılaşmakta ve sektörlerin uyum kapasitesine bağlı olarak değişmektedir. Bu nedenle etkilerin yalnızca statik maliyet artışları çerçevesinde değil, dinamik verimlilik ve teknoloji dönüşümü perspektifinden ele alınması gerekmektedir. Bu bölümde karbon vergisinin kısa, orta ve uzun vadede sektörler üzerindeki beklenen rekabet etkileri bütüncül bir yaklaşımla değerlendirilmektedir.

5.1. Kısa Vadeli Etkiler

Karbon vergisinin uygulanmaya başlanmasıyla birlikte, özellikle enerji yoğun sektörlerde üretim maliyetlerinde artış yaşanması kaçınılmazdır. Bu maliyet artışı, firmaların mevcut teknoloji yapılarıyla karbon fiyatlarını üretim süreçlerine hızlı biçimde yansıtamamalarından kaynaklanmaktadır. Kısa vadede firmaların karbon yoğun üretim tekniklerinden düşük karbonlu alternatiflere geçişi sınırlı olduğundan, karbon vergisi doğrudan bir maliyet unsuru olarak ortaya çıkmaktadır (Aldy & Stavins, 2012).

Bu durum, uluslararası ticarete açık sektörlerde fiyat rekabetini zorlaştırarak ihracat performansını olumsuz etkileyebilir. Özellikle AB pazarına ihracat yapan enerji-yoğun sektörlerde, CBAM ile karbon maliyetlerinin artması, uyum sağlayamayan firmalar açısından pazar payı kaybı riskini artırmaktadır (European Commission, 2023). Ayrıca kısa vadede karbon vergisinin kârlılık üzerindeki baskısı, bazı firmaların yatırım kararlarını ertelemesine veya üretim hacmini azaltmasına yol açabilir.

Bununla birlikte literatürde kısa vadeli olumsuz etkilerin sektörler arasında homojen olmadığı vurgulanmaktadır. Enerji verimliliği yüksek, teknoloji altyapısı görece gelişmiş firmalar, karbon vergisinin maliyet baskısını daha sınırlı ölçüde hissedebilmekte ve rekabet avantajlarını koruyabilmektedir (Martin et al., 2014).

5.2. Orta Vadeli Etkiler

Orta vadede karbon vergisinin rekabet üzerindeki etkileri, firmaların uyum stratejilerine bağlı olarak yeniden şekillenmektedir. Bu dönemde firmalar, artan karbon maliyetlerini dengelemek amacıyla enerji verimliliği yatırımlarına yönelmekte, üretim süreçlerini optimize etmekte ve karbon yoğun girdilerin kullanımını azaltmaya çalışmaktadır. Literatürde, karbon fiyatlandırmasının firmaları maliyet düşürücü yeniliklere yönlendirdiği ve bu sürecin rekabet yapısını dönüştürdüğü belirtilmektedir (Dechezleprêtre & Sato, 2017).

Orta vadede karbon vergisinin rekabet üzerindeki etkilerinden biri de sektör içi yeniden yapılanmadır. Uyum sağlayabilen firmalar pazarda konumlarını güçlendirirken, uyum sağlayamayan firmalar rekabet avantajlarını kaybedebilmektedir. Bu durum, sektörel düzeyde verimlilik artışına ve daha etkin firmaların ön plana çıkmasına yol açmaktadır. Aghion ve arkadaşları (2016), karbon fiyatlandırmasının yönlendirilmiş teknik değişimi teşvik ederek daha yenilikçi firmaların rekabet üstünlüğü elde ettiğini göstermektedir.

Ayrıca orta vadede karbon vergisi, ürün farklılaştırması ve yeşil ürünlere yönelik talep artışı yoluyla firmalar için yeni pazar fırsatları yaratabilmektedir. Özellikle çevresel standartların yüksek olduğu pazarlarda, düşük karbonlu üretim yapan firmalar fiyat rekabetinin ötesinde kalite ve sürdürülebilirlik temelli rekabet avantajı elde edebilmektedir (OECD, 2021).

5.3. Uzun Vadeli Etkiler

Uzun vadede karbon vergisinin sektörel rekabet üzerindeki etkileri daha yapısal bir nitelik kazanmaktadır. Bu aşamada karbon vergisi, yalnızca bir maliyet unsuru olmaktan çıkarak üretim yapısını ve teknoloji tercihlerini kalıcı biçimde dönüştüren bir politika aracına dönüşmektedir. Firmaların düşük karbonlu teknolojilere geçişi, enerji verimliliği artışı ve yenilenebilir enerji kullanımı, uzun vadede üretim maliyetlerini düşürerek rekabet gücünü artırabilmektedir (Porter & van der Linde, 1995).

Uzun vadeli etkiler aynı zamanda ülkelerin sanayi yapısında dönüşümü de beraberinde getirmektedir. Karbon vergisi, karbon yoğun ve düşük katma değerli üretimden, daha temiz ve yüksek katma değerli üretime geçişi teşvik edebilmektedir. Bu dönüşüm, uluslararası piyasalarda sürdürülebilirlik kriterlerinin giderek önem kazandığı bir ortamda, firmaların rekabet konumlarını güçlendirebilir (Stiglitz et al., 2017; World Bank, 2021).

Bu çerçevede karbon vergisinin uzun vadede rekabet gücü üzerindeki nihai etkisi, politika tasarımının öngörülebilirliği, elde edilen gelirlerin kullanım biçimi ve tamamlayıcı sanayi politikalarının varlığı ile yakından ilişkilidir. Karbon vergisinin doğru tasarlanması hâlinde, rekabet gücünü zayıflatan değil, yeniden yapılandıran bir araç olabileceği literatürde yaygın biçimde kabul edilmektedir.

6. SONUÇ VE POLİTİKA ÖNERİLERİ

Bu çalışma, karbon vergisinin Türkiye'deki enerji-yoğun sektörlerin rekabet gücü üzerindeki olası etkilerini kavramsal, sektörel ve zamansal boyutlarıyla ele almıştır. Elde edilen bulgular, karbon vergisinin kısa vadede üretim maliyetlerini artırarak özellikle enerji yoğun ve ihracata açık sektörlerde rekabet baskısı yaratabileceğini; ancak orta ve uzun vadede uygun politika tasarımı ve teknolojik dönüşümle birlikte rekabet gücünü destekleyici bir mekanizmaya dönüşebileceğini göstermektedir.

Analiz sonuçları, karbon vergisinin etkilerinin sektörler arasında homojen olmadığını ortaya koymaktadır. Demir–çelik ve çimento gibi yüksek emisyon yoğunluğuna sahip sektörler karbon maliyetlerine daha duyarlı iken, kimya ve tekstil gibi sektörlerde uyum kapasitesi ve inovasyon potansiyelinin daha yüksek olduğu görülmektedir. Bu durum, karbon vergisinin tek tip bir politika aracı olarak değil, sektörel farklılıkları gözeten esnek bir çerçevede tasarlanması gerektiğine işaret etmektedir.

Avrupa Birliği'nin Sınırda Karbon Düzenleme Mekanizması (CBAM), Türkiye açısından karbon vergisini yalnızca çevresel bir tercih olmaktan çıkararak, uluslararası rekabetin korunması bağlamında stratejik bir zorunluluk hâline getirmektedir. Türkiye'nin karbon fiyatlandırma mekanizmalarına uyum sağlamaması durumunda, özellikle AB pazarına yönelik ihracatta maliyet artışları ve pazar kaybı riskiyle karşılaşması olasıdır. Bu nedenle karbon vergisi, Türkiye'nin dış ticaret ve sanayi politikalarıyla uyumlu biçimde ele alınmalıdır.

Bu çerçevede politika önerileri dört ana başlık altında toplanmaktadır.

6.1. Karbon Vergisinin Tasarımı ve Kademeli Geçiş

Karbon vergisinin etkinliği, vergi oranının düzeyinden ziyade tasarımının öngörülebilirliği ve kademeli uygulanmasına bağlıdır. Enerji-yoğun sektörler için ani ve yüksek oranlı bir karbon vergisi, kısa vadede rekabet gücünü ciddi biçimde zayıflatabilir. Bu nedenle sektörel farklılıkları dikkate alan, aşamalı ve öngörülebilir bir geçiş süreci tasarlanmalıdır. Literatürde kademeli geçişin, firmaların uyum maliyetlerini azaltarak politika kabulünü artırdığı vurgulanmaktadır (OECD, 2021).

6.2. Vergi Gelirlerinin Dönüşüm Odaklı Kullanımı

Karbon vergisinden elde edilen gelirlerin genel bütçe içinde eritilmesi yerine, yeşil dönüşümü destekleyici alanlara yönlendirilmesi kritik önemdedir. Enerji verimliliği yatırımları, düşük karbonlu teknolojilerin teşviki, yeşil Ar-Ge destekleri ve sanayide dönüşüm fonlarının oluşturulması, karbon vergisinin rekabet üzerindeki olumsuz kısa vadeli etkilerini dengeleyebilir. Bu yaklaşım, literatürde “çifte kazanç” (double dividend) hipotezi çerçevesinde değerlendirilmektedir (Goulder & Schein, 2013).

6.3. Sanayi ve Finansman Destek Mekanizmaları

Karbon vergisinin rekabet gücü üzerindeki etkilerini sınırlamak için sanayiye yönelik tamamlayıcı destek mekanizmaları geliştirilmelidir. Özellikle KOBİ’ler için yeşil finansman araçları, düşük faizli dönüşüm kredileri ve enerji verimliliği hibe programları, firmaların karbon vergisine uyum kapasitesini artırabilir. Ayrıca yeşil tahvil ve sürdürülebilir finansman araçlarının yaygınlaştırılması, özel sektör yatırımlarını teşvik edici bir rol oynayabilir (World Bank, 2021).

6.4. CBAM ile Uyumlu Ulusal Karbon Fiyatlandırma Stratejisi

Türkiye’nin karbon vergisi politikası, AB’nin CBAM uygulamasıyla uyumlu bir ulusal karbon fiyatlandırma stratejisi çerçevesinde ele alınmalıdır. Ürün bazlı karbon ayak izi hesaplamaları, sertifikasyon sistemleri ve raporlama altyapısının güçlendirilmesi, ihracatçı sektörlerin rekabet gücünü koruması açısından önem taşımaktadır. Bu bağlamda karbon vergisi, Türkiye’nin yeşil dönüşüm sürecinde dışsal bir baskı unsuru olmaktan çıkarak, içsel bir politika aracına dönüştürülebilir.

Genel Değerlendirme

Sonuç olarak karbon vergisi, Türkiye için başlangıçta güçlü bir dönüşüm baskısı yaratmakla birlikte, doğru politika tasarımı ve tamamlayıcı önlemlerle birlikte ele alındığında rekabet gücünü azaltan değil, uzun vadede yeniden yapılandıran bir politika aracı hâline gelebilir. Enerji-yoğun sektörlerin düşük karbonlu üretime geçişini destekleyen bütüncül bir yaklaşım hem çevresel hedeflerin gerçekleştirilmesine hem de Türkiye’nin uluslararası rekabet gücünün korunmasına katkı sağlayacaktır.

BAKIM EKONOMİSİ VE KADIN EMEĞİ: ILO'NUN SOSYAL KORUMA YAKLAŞIMI

Doç. Dr. Neşe YILDIZ

Karabük Üniversitesi,

neseyildiz@karabuk.edu.tr- ORCID: 0000-0002-4247-8163

Özet

Bu çalışma, bakım ekonomisinin kadın emeği üzerindeki etkilerini Uluslararası Çalışma Örgütü'nün (ILO) sosyal koruma yaklaşımı çerçevesinde incelemeyi amaçlamaktadır. Bakım hizmetleri; çocuk, yaşlı, engelli ve hasta bakımını kapsayan, büyük ölçüde kadınlar tarafından yerine getirilen ve çoğu zaman görünmez kalan emek alanlarından biridir. Bakım ekonomisi, küresel ölçekte yaklaşık 381 milyon kişiye istihdam sağlayarak toplam istihdamın %11,5'ini oluşturmaktadır. Ücretsiz bakım emeği ise ağırlıklı olarak hanehalkı ve aileler içerisinde yerine getirilmekte olup, yıllık bazda küresel ekonomiye yaklaşık 11 trilyon ABD doları tutarında bir katkı sunduğu tahmin edilmektedir. ILO verileri, ücretsiz ve düşük ücretli bakım emeğinin kadınların işgücüne katılımını sınırlandıran temel yapısal faktörlerden biri olduğunu ortaya koymaktadır. Çalışmada nitel araştırma yöntemi benimsenmiş; ILO sözleşmeleri, raporları ve politika belgeleri doküman analizi yöntemiyle incelenmiştir. Analiz, ILO'nun sosyal koruma yaklaşımının bakım emeğini yalnızca sosyal bir sorumluluk alanı olarak değil, aynı zamanda istihdam yaratma ve toplumda cinsiyet eşitliğini güçlendirme potansiyeline sahip bir ekonomik alan olarak ele aldığını göstermektedir. Özellikle sosyal güvenlik sistemlerinin yaygınlaştırılması, bakım hizmetlerinin kamusal olarak desteklenmesi ve insana yakışır iş standartlarının bakım sektörüne entegre edilmesi, kadınların istihdama katılımını artıran temel politika araçları arasında yer almaktadır. ILO perspektifinden bakıldığında, bakım ekonomisinin güçlendirilmesi, kadın emeğinin görünürlüğünü artırmasına, kayıt dışılığı azalmasına ve çalışma hayatında cinsiyet temelli eşitsizliklerin giderilmesine katkı sunacaktır. Bu bağlamda ILO'nun bakım ekonomisi ve kadın emeğine yönelik sosyal koruma politikaları, kapsayıcı ve sürdürülebilir istihdam hedefleri açısından stratejik bir önem taşımaktadır.

Anahtar Kelimeler: Uluslararası Çalışma Örgütü, bakım ekonomisi, kadın emeği, sosyal koruma.

1. GİRİŞ

Günümüz küreselleşmiş ekonomisinde, bakım ekonomisi, teknolojik dönüşümler, demografik kaymalar ve iklim değişikliği gibi yapısal faktörlerin etkisiyle stratejik bir öneme bürünmüştür (International Labour Organization [ILO], 2024a). Bakım ekonomisi, bireylerin fiziksel, duygusal, zihinsel ve sosyal ihtiyaçlarını karşılamaya yönelik hizmetlerin üretim ve dağıtımını kapsar; bu, ücretli sektörler (sağlık, eğitim ve sosyal hizmetler) ile ücretsiz ev içi emeği içermektedir. Ancak, bu ekonominin büyük kısmı, kadınlar üzerinden gerçekleştirilmekte olup, bu durum, küresel olarak çalışma hayatında cinsiyetler arasında eşitsizliğinin temel nedenlerinden biri olarak kabul edilmektedir (ILO, 2018; Antonopoulos, 2009).

Literatürde, bakım ekonomisi kavramı, feminist ekonomi ve emek sosyolojisi disiplinlerinde kök salmıştır. Folbre (1994) gibi öncüler, bakım emeğini "görünmez emek" olarak tanımlayarak, onun ekonomik değerini vurgulamışlardır. Özellikle, 2023 verilerine göre, bakım sorumlulukları nedeniyle iş gücünün dışında kalan 748 milyon kişinin 708 milyonu kadın olup, bu, işgücü piyasası dışında kalan küresel kadın iş gücünün %45'ini etkilemektedir (ILO, 2024b).

Bu çalışma, bakım ekonomisinin kadın emeği üzerindeki etkilerini ILO'nun sosyal koruma yaklaşımı çerçevesinde analiz etmeyi amaçlamaktadır Bu kapsamda çalışma, bakım ekonomisinin tanımı ve önemini tartışarak başlayacak, bakım ekonomisinin boyutlarını ve kadın emeğindeki rolünü verilerle analiz edecek, ILO'nun sosyal koruma yaklaşımını detaylandıracaktır.

2. BAKIM EKONOMİSİ KAVRAMI, TANIMI VE ÖNEMİ

Bakım ekonomisi kavramı, 1990'lardan beri feminist iktisatçılar tarafından geliştirilmiştir. Waring'in (1988) çalışması, ulusal hesaplamalarda bakım emeğinin dışlanmasını eleştirerek, bunun ekonomik göstergelerin cinsiyet körlüğüne yol açtığını savunmuştur. Benzer şekilde, Elson (2002), cinsiyet bütçeleme araçlarını önererek, bakım yatırımlarının makroekonomik politikalarla entegre edilmesini talep etmiştir. Ghosh (2024) ise, ücretli bakım emekçileri arasındaki eşitsizlikleri inceleyerek, ücretli bakım işinin heterojen yapısını incelemiş ve ev hizmetlileri gibi düşük statülü bakım işgücünün, doktorlar gibi yüksek statülü bakım işgücüne kıyasla daha kadınlaşmış, sıklıkla daha yaşlı, tipik olarak daha az eğitimli ve kayıt dışı istihdamda olma olasılığının daha yüksek olduğunu araştırmasında ortaya koymuştur.

ILO ve Birleşmiş Milletler'e gör, bakım ekonomisi, öncelikle çocuklar, yaşlılar, engelliler ve hastalar gibi yardıma muhtaç grupların, ayrıca sağlıklı bireylerin günlük hayatlarını sürdürebilmek için ihtiyaç duydukları bedensel, ruhsal, duygusal ve toplumsal destek hizmetlerinin oluşturulup tüketilmesini kapsar (ILO, 2018; United Nations High-Level Panel on Women's Economic Empowerment, 2017). Bu ekonomi, ücretli (sağlık, eğitim ve sosyal hizmetler) ve ücretsiz bakım işini içermektedir.

Dünya Ekonomik Forumu-WEF (2024) ise bakım ekonomisini makro perspektiften, işletme perspektifinden ve hak temelli perspektiften tanımlanabileceğini ifade etmektedir. Buna göre, makro perspektiften, bakım ekonomisi, üretken ekonominin motoru olarak görülmekte ve ekonomik sonuçlarda belirleyici bir faktör olarak –gayrisafi yurtiçi hasıla -GSYİH, işgücü katılımı, iş yaratma ve ücretler dahil– yer alır. Bakım ekonomisi, sağlık, eğitim ve bakım ile kişisel hizmetler gibi ücretli çekirdek faaliyet sektörlerini; ayrıca ücretli olmayan faaliyetleri içerir; bunların tümü teknolojiden imalata kadar her bir sektörün performansını etkilemektedir. İşletme perspektifinden bakıldığında, kuruluşlar bakım ekonomisiyle; çalışanlarına ve tedarik zincirlerine karşı özen yükümlülüğü olan işverenler, sektördeki yatırımcılar ve yenilikçiler, ayrıca bakım hizmetleri ve ürünleri sağlayıcıları bakımından ilişki kurabilirler. Son olarak, hak temelli perspektiften, bakım ekonomisi cinsiyet eşitliği, demografik değişim, engellilik kapsayıcılığı, küresel hareketlilik, iklim adaptasyonu ve daha fazlası gibi dönüştürücü gündemlerin kalbinde bir sosyal organizasyon biçimi olarak tanımlanır.

Öte yandan, Birleşmiş Milletler Kadınların Ekonomik Güçlendirilmesi Yüksek Düzeyli Paneli (2017), bakım emeğinin tanınması, azaltılması ve yeniden dağıtılması için ILO'nun sosyal

koruma yaklaşımıyla uyumlu ulusal bakım sistemleri değişikliklerini önermiştir. Literatür, bakım ekonomisinin sadece sosyal bir mesele olmadığını, ekonomik kalkınmanın vazgeçilmez bir unsuru olduğunu vurgulamaktadır.

3. BAKIM EKONOMİSİNE İLİŞKİN GÜNCEL KÜRESEL VERİLER

Bakım ekonomisini önemli kılan unsurlardan biri, ekonomideki yeri, önemi, çalışan sayısı ve bu sektörde yaşanan gelişmelerdir. ILO, (2024b; 2025) ve World Economic Forum [WEF], (2024) verilerine göre bakım ekonomisi ile ilgili genel veriler şu şekildedir:

- Bakım ekonomisinde 311 Milyon kişi yer almaktadır.
- Bakım ekonomisi, dünya istihdamının %11,5'ini sağlamaktadır.
- Hane halkları tarafından doğrudan istihdam edilen ev emekçileri, ücretli bakım işgücünün %25'ini oluşturmaktadır.
- Ücretsiz bakım emeğinin değeri 11 trilyon ABD dolardır.
- Yüksek gelirli ülkelerde, bir göçmen bakım emekçisi, göçmen olmayan bir bakım emekçisinden %19,6 daha az kazanma olasılığı yüksektir.
- Bakım sorumlulukları nedeniyle 748 Milyon kişi işgücüne dahil olamamaktadır.

Görüldüğü üzere günümüzde gelir karşılığında çalışan 311 milyon kişiden oluşan, dünya istihdamının % 11.5'inin sağlayan bir bakım ekonomisi söz konusudur. Ancak bu istihdam rakamının 2 katından fazla, gelir karşılığı olmaksızın, 748 milyon kişi bakım sorumluluğu nedeniyle işgücü piyasasının dışında yer almaktadır. Ücretsiz bakım emeğinin değeri ise 11 trilyon ABD doları bulmaktadır.

Bakım ekonomisine yatırımın geri dönüşleri konusunda uluslararası kuruluşlar tarafından bazı tahminler yapılmaktadır. UN Women (2025, 23 October 2025)'e göre, bakım açığını kapatmak için gereken kamu yatırımları, 2035 yılına kadar 300 milyon yeni istihdam oluşturabilir. Bakıma yatırılan her dolar, diğer endüstrilerden iki ila üç kat daha fazla iş yaratır ve vergi gelirlerini artırarak maliyetleri dengelemeye yardımcı olur. ILO 'nun 82 ülke verisine dayalı olarak yaptığı hesaplamalara göre ise, bakım ekonomisine yatırılan her 1 ABD doları, 2035 yılına kadar küresel GSYİH'da ortalama 3,76 ABD doları artışa yol açabilir. Ayrıca, bu tür yatırımlar kadınların istihdam oranını 2019'daki küresel ortalama olan %46,2'den 2035'te %56,5'e çıkarabilir ve aylık kazançlardaki küresel cinsiyet açığını 2019'daki %20,1'den 2035'te %8,0'a düşürebilir (ILO 2023).

Bakım sağlama ihtiyacındaki büyüme, daha fazla bakım emekçisi talebi yaratmaktadır. Yaklaşık 249 milyon kadını ve 132 milyon erkeği temsil eden bakım işgücü, hem önem hem de sayı açısından büyümeye devam etmesi beklenmektedir (WEF, 2024). Demografik projeksiyonlar, bakım talebinin patlayıcı bir şekilde artacağını öngörmektedir. 2015'te 2,1 milyar kişi (1,9 milyar çocuk ve 0,2 milyar yaşlı) bakım ihtiyacı duyarken, 2030'a kadar bu sayı 2,3 milyara yükselecek; buna ek olarak 100 milyon çocuk (6-14 yaş) ve 100 milyon yaşlı dahil edilecektir (ILO, 2018). Bu artış, yaşlanan nüfus ve düşük doğurganlık oranlarından kaynaklanmakta olup, düşük gelirli ülkelerde daha belirgindir. Dünya Sağlık Örgütü'nün (WHO) tahminlerine göre, 2030'a kadar 18 milyon sağlık çalışanı açığı oluşacak, bu da bakım sistemlerini zorlayacaktır (World Health Organization [WHO], 2016).

WEF'in 2024 yılında yayınlanan raporunda ise 2030 yılına kadar, küresel talebi karşılamak için tahmini 475 milyon daha fazla resmi işin gerekeceği öngörülmektedir. Dünya Ekonomik Forumu bulguları, sosyal hareketlilik ve insan sermayesi hedeflerini karşılamak için eğitim, sağlık ve bakımda –özellikle sağlık hizmetleri, çocuk bakımı çalışanları, erken çocukluk öğretmenleri ve ilk ve orta öğretim öğretmenleri gibi– daha fazla işe ihtiyaç duyulduğunu öne sürmektedir. Yalnızca Amerika Birleşik Devletleri'nde, ABD İstatistik Bürosu, 2030'a kadar bir milyon evde sağlık bakımı emekçisi işinin ekleneceğini tahmin etmektedir (WEF, 2024).

Bütün bu getirilerine rağmen bakım ekonomisine yatırımlar yetersiz kalmakta, hizmetler erişilemez, pahalı ve düşük kaliteli olmaktadır (ILO, 2022).

4. BAKIM EKONOMİSİ VE KADIN EMEĞİ

Kadın emeği, bakım ekonomisinin temel direğini oluşturmaktadır. ILO, (2024; 2025), UN Women (15 Dec. 2025) ve WEF (2024) verilerine göre kadın emeğine yönelik bakım ekonomisi ile ilgili genel veriler şu şekildedir:

- Ücretli bakım sektöründe kadınlar %65-70 oranında temsil edilmekte olup, düşük gelirli ülkelerde bu oran %80'e çıkmaktadır
- Kadınlar, toplam ücretsiz bakım emeğinin %76,2'sini gerçekleştirir.
- Ev işçileri istihdamının % 76'sı kadınlardan oluşmaktadır.
- Ev işçilerinin % 81'i kayıtdışı istihdam edilmektedir.
- Ücretsiz bakım emeğine harcanan zaman, kadınlarda ortalama 4 saat 25 dakika, erkeklerde 1 saat 23 dakikadır.
- Kadın göçmen ve ev emekçileri, dünyanın birçok ülkesinde ücretli bakım işgücünün önemli bir kısmını oluşturmaktadır. Örneğin, OECD ülkelerinde bakım emekçilerinin %90'ı kadın olup, %20'si yabancı doğumludur.
- Yüksek gelirli ülkelerde, bir göçmen bakım emekçisi, göçmen olmayan bir bakım emekçisinden %19,6 daha az kazanma olasılığı yüksektir.
- Bakım sorumlulukları nedeniyle işgücüne dahil olmayan 748 Milyon kişinin 708 Milyonu Kadın, 40 Milyonu erkektir.

Görüldüğü gibi ILO (2024b)'nun 2023 verilerine göre, bakım sorumlulukları nedeniyle iş gücünün dışında kalan 748 milyon kişinin 708 milyonu kadın olup, bu, kadınların %45'i bakım emeğini gerekçe göstermektedir; erkeklerde bu oran ise %5'tir. Diğer bir deyişle bakım sorumlulukları, işgücü piyasası dışında kalan küresel kadın iş gücünün %45'inin işgücü piyasasına katılımını engellemektedir. Diğer taraftan, bu veriler ekonomik gelişmişlik düzeyine göre farklılaşmaktadır. Buna göre, yüksek gelirli ülkelerde bu oran, kadınlarda %19, erkelerde %3 iken, bu oranlar yüksek orta gelirli ülkelerde sırasıyla %47, %8, düşük orta gelirli ülkelerde, 54, %3 ve düşük gelirli ülkelerde ise %43, %3 şeklindedir. Yüksek orta gelirli ülkeler ve düşük orta gelirli ülkelerde bu oranlar, kadınlarda dünya ortalamasının üzerinde yer almaktadır. Diğer taraftan 25-54 yaş arası kadınlarda bu oran %66'ya ulaşmakta olup, düşük eğitimli ve kırsal kadınlar daha fazla etkilenmektedir.

Sinha et al. (2024), Hindistan'da yapılan zaman kullanımı anketlerine dayanarak, ek bir saat bakım emeğinin kadınların iş gücüne katılımını %20 azaltırken, erkeklerde anlamlı etki oluşturmadığını; ayrıca kadınların yaşam memnuniyetini düşürdüğünü bulmuştur.

Ücretsiz bakım yükü (çocuk/yaşlı bakımı), etkin ve güvenilir destek mekanizmaları olmadığı zaman kadınların ücretli çalışmaya katılımını engellemektedir. Ücretli bakımda ise düşük ücretler, becerilerin tanınmaması; informal istihdam söz konusu olmakta ve sosyal korumadan uzak işgücü piyasası olmaktadır. Diğer taraftan, birçok durumda uzun çalışma saatleri, özellikle göçmen ev işçileri için artan taciz ve şiddet riski söz konusudur (ILO, 2024c, UN Women, 15 December 2025).

5. ILO'NUN BAKIM EKONOMİSİ VE KADIN EMEĞİ'NE YÖNELİK SOSYAL KORUMA YAKLAŞIMI

5.1. ILO Sözleşmeleri, Tavsiye Kararları, Bildirgeleri ve Raporlarında Bakım Ekonomisi ve Kadın Emeği

ILO geçmişten günümüze bakım ekonomisi konusunda birçok çalışma ortaya koymakta ve çalışmalarının son yıllarda dikkat çekici bir şekilde arttığı görülmektedir.

Uluslararası Çalışma Örgütü (ILO), bakım ekonomisinde insana yakışır işi teşvik etmek ve bakım konusunda yaşam döngüsü yaklaşımı benimsemek uluslararası standartlar oluşturmaktadır. Bu kapsamda ILO, örneğin 1952 tarihli 102 Sayılı Sosyal Güvenlik (Minimum Standartlar) Sözleşmesi gibi bakım ekonomisiyle ilgili birçok standarda yer vermektedir. Bir dizi standart ise bakım mesleklerini özel olarak ele almaktadır; örneğin 1977 tarihli 149 Sayılı Hemşirelik Personeli Sözleşmesi ve 157 Sayılı Tavsiye Kararı ile 2011 tarihli 189 Sayılı Ev İçi Çalışanlar Sözleşmesi ve 201 Sayılı Tavsiye Kararı. Ayrıca, insana yakışır işin belirli yönlerine ilişkin ve geniş uygulama kapsamına sahip birçok diğer standart da bakım mesleklerini kapsar ve bunlarla ilgilidir. Diğerleri de aile sorumlulukları olan emekçilerin durumunu ele almaktadır; örneğin 1981 tarihli 156 Sayılı Aile Sorumlulukları Olan Emekçiler Sözleşmesi ve 165 Sayılı Tavsiye Kararı ile 2000 tarihli 183 Sayılı Annelik Koruması Sözleşmesi ve 191 Sayılı Tavsiye Kararı.

ILO'nun 2019 yılında yayınladığı ''Geleceğin Çalışması için Yüzyıl Bildirgesi'', bakım ekonomisine yatırımı, işte cinsiyet eşitliğini sağlamak için bir araç olarak tanımaktadır.

Son zamanlarda ILO, bakım emeğinin fırsatlarını ve zorluklarını vurgulamak için çabalarını daha da ilerletmiş olup, bakım emeğinin herkes için çevre dostu sürdürülebilir ekonomilere ve toplumlara adil geçiş için önemini vurgulamakta, bu kapsamda raporlar ortaya koymaktadır. Kadınların ve erkeklerin tutumları ve algıları üzerine yapılan küresel bir anket, iş ve aile dengesinin, kadınların işgücü piyasasına girmesi, kalması ve ilerlemesi için ana zorluk olarak kaldığını ortaya koymuştur. Bu kapsamda dönüm noktası niteliğindeki bir ILO raporu olan "İnsan Yakışır İşin Geleceği İçin Bakım İşi ve Bakım İşleri/ Meslekleri (Care work and care jobs for the future of decent work)'', ücretsiz ve ücretli bakım emeğinin küresel boyutlarını ve değişen çalışma dünyasıyla ilişkisini incelemiş olup, hane halklarında ve işgücü piyasasında kalıcı cinsiyet eşitsizliklerini ve bunların bakım emeğiyle ayrılmaz bağlantılarını vurgulamıştır. Ayrıca, bakım ekonomisini insana yakışır iş yaratma motoru olarak konumlandırmış ve ilgili sektörlerdeki insana yakışır iş açıklarını ele alma ihtiyacını belirtmiştir. Diğer taraftan ILO tarafından bakım ekonomisiyle ilgili birkaç uluslararası emek standardının uygulanmasını inceleyen iki Genel Anket yayınlamıştır.

ILO'nun-"Bakım Ekonomisi ve İnsana Yakışır İşe İlişkin Karar"'ında Bakım Ekonomisi ve Kadın Emeği

ILO'nun bakım işleri ve bakım ekonomisi ile ilgili geliştirdiği en önemli politikalardan biri 2024 Uluslararası Çalışma Konferansı'nda kabul edilen "Bakım Ekonomisi ve İnsana Yakışır İşe İlişkin Karar" olmuştur. ILO Kararları, konferansın üçlü yapısı (hükümetler, işverenler ve işçiler) tarafından derinlemesine tartışmalar sonucunda benimsenir, Konferansın kolektif iradesini veya görüşünü ifade eder. Temel amaçları, ILO'nun gelecekteki eylemlerini yönlendirmek, politika önceliklerini belirlemek ve teknik komitelerdeki tartışmaları takip etmek veya somutlaştırmaktır. ILO Kararları, üye devletler için politik bir taahhüt veya rehberlik niteliği taşır, ancak zorunlu uygulama gerektirmez.

"Bakım Ekonomisi ve İnsana Yakışır İşe İlişkin Karar", devletlerin bakım hizmetlerini finanse etme ve düzenleme sorumluluğunu tanımlamakta olup, evrensel sosyal koruma tabanını (temel gelir, sağlık ve emeklilik) güçlendirmeyi hedeflemektedir (ILO, 2024e). Bu karar, bakım yatırımlarının 2035'e kadar 300 milyon insan onuruna yaraşır iş yaratacağını tahmin etmekte ve politika uyumunu (sosyal koruma, işgücü düzenlemeleri ve kamu finansmanı) vurgulamaktadır.

Karar, bakım ekonomisinden kaynaklı zorluklarla baş etme ve bakım ekonomisinin sunduğu fırsatlardan yararlanma konusunda ülkelerin yolunu açmaktadır. Kararda, "İyi işleyen bir bakım ekonomisinin yalnızca bireyleri ve aileleri desteklemekle kalmayıp aynı zamanda işgücünün daha sağlıklı olmasına katkıda bulunduğu, iş olanakları yarattığı ve üretkenliği artırdığı" belirtilmektedir. Kararda ayrıca, ücretsiz bakım işlerinin kadınlar için işgücüne katılım, istihdamda kalma ve ilerleme konusunda yarattığı "yapısal engeller" de vurgulanmaktadır ((ILO, 2024d).

Bakım ekonomisindeki zorlukların ele alınmasına yönelik kapsamlı bir yaklaşım sunan ILO 5R olarak formüle edilen bir bakım çerçevesi ortaya koymaktadır. Bu çerçeve, bakım emeğini tanıma ve değer verme ihtiyacını ve bakıcılar için adil ve sürdürülebilir çözümler yaratma gerekliliğini vurgulamaktadır. 5R şu anlamlara gelmektedir.

Tanıma (Recognise)

- Tüm bakım emeği biçimlerinin ölçülmesi ve karar alma süreçlerinde ücretsiz bakım emeğinin dikkate alınması.
- Hem ücretli hem de ücretsiz bakım işinin topluma ve ekonomiye kritik bir katkı olarak öneminin kabul edilmesi.
- Kaliteli bakım hizmetlerine evrensel erişim hakkının güvence altına alınması.
- Kadınların omuzlarındaki orantısız ücretsiz bakım yüküne ve bunun cinsiyet eşitliği üzerindeki etkisine dikkat çekilmesi.

Azaltma (Reduce)

- Daha iyi altyapı, kamu hizmetleri ve teknoloji yoluyla ücretsiz bakım işinin yükünü en aza indirilmesi.
- Kaliteli bakım hizmetleri, bakım politikaları ve bakım odaklı altyapıya yatırım yapılması

- Kadınlar ve erkekler, aileler ve genel olarak toplum arasında ortak sorumluluğu teşvik edin.

Yeniden Dağıtım (Redistribution)

- Bakım sorumluluklarının cinsiyetler arasında, hane halkı içinde ve aileler ile devlet arasında daha adil bir şekilde dağıtılmasının sağlanması
- Ebeveyn izni ve uygun fiyatlı çocuk bakımı gibi ortak bakım verme süreçlerini destekleyen kamu politikalarını savunulması.
- Tüm kadınlar ve erkekler için cinsiyete duyarlı ve kamu finansmanlı izin politikalarını uygulayın
- Bakım dostu ve cinsiyete duyarlı sosyal koruma sistemlerinin, minimum standartlar dahil, sağlanması.

Ödül (Reward)

- Tüm bakım emekçileri için insana yakışır istihdam koşullarının düzenlenmesi ve uygulanması ve eşit değerde iş için eşit ücret verilmesi.
- Hem kadın hem erkek bakım emekçileri için güvenli, çekici ve teşvik edici bir çalışma ortamı sağlanması.
- Göçmen bakım emekçilerini korumak için yasaların yürürlüğe koyulması ve önlemlerin uygulanması.

Temsil Etme (representation)

- Kadınların siyasi, ekonomik ve kamu hayatındaki tüm karar alma seviyelerinde tam ve etkin katılımını ve liderlik için eşit fırsatlar sağlanması.
- Bakım emekçileri ve işverenler için sendikalaşma özgürlüğünün teşvik edilmesi.
- Bakım sektörlerinde sosyal diyaloğun teşvik edilmesi ve toplu pazarlık hakkının güçlendirilmesi.
- Bakım emekçilerini temsil eden sendikalar ile bakım hizmeti alanlarını ve ücretsiz bakıcıları temsil eden sivil toplum örgütleri arasında ittifaklar kurulmasının teşvik edilmesi (ILO, 2024f)

6. SONUÇ

Bu çalışma, bakım ekonomisinin kadın emeği üzerindeki etkilerini, Uluslararası Çalışma Örgütü'nün sosyal koruma yaklaşımı çerçevesinde incelemiştir. Bakım ekonomisi, ücretli ve ücretsiz emek bileşenleriyle, kadınların günlük yaşamını ve ekonomik katılımını şekillendiren bir alan olarak öne çıkmaktadır. ILO verilerine göre, 381 milyon bakım emekçisinin %65-70'i kadın olup, ücretsiz bakım emeğinin %76,2'sini kadınlar üstlenmekte; bu, 708 milyon kadının işgücü piyasasına dahil olmamasına neden olmaktadır. Ücretsiz bakımın yıllık 11 trilyon ABD doları ekonomik değeri, bakım emeğinin görünmezliğinin yarattığı yapısal engelleri vurgulamakta; düşük ücret, informel istihdam ve uzun saatler gibi riskler, kadınların üretkenliğini ve refahını tehdit etmektedir.

ILO'nun sosyal koruma yaklaşımı, bakıa ekonomisini yalnızca sosyal bir sorumluluk olarak değil, istihdam oluşturma ve işgücü piyasasında cinsiyet eşitliğini aracı olarak konumlandırmaktadır. 102, 149, 189, 156 ve 183 sayılı Sözleşmeler ile 2019 Yüzyıl Bildirgesi ve 2024 Kararı, bakım emeğini temel haklarla entegre etmekte; gelir, sağlık, emeklilik gibi evrensel sosyal koruma tabanını güçlendirmeyi önermektedir. Özellikle 2024 yılında kabul edilen ‘‘Bakım Ekonomisi ve İnsana Yakışır İşe İlişkin Karar’’ında ortaya konulan 5R

Çerçevesi (Tanıma, Azaltma, Yeniden Dağıtım, Ödül, Temsil), ücretsiz bakımın yükünü hafifletirken ücretli bakımın değerini artıran bütüncül bir strateji sunmaktadır. Bu çerçeve, bakım izni politikaları, kamu yatırımları ve sosyal diyalog yoluyla kadınların iş-hayat dengesini iyileştirmeyi hedeflemektedir.

Bulgular, bakım ekonomisinin güçlendirilmesinin, kadınların istihdam oranını artıracağını, kadın-erkek arasındaki ücret açığını düşürebileceğini göstermektedir. ILO'nun yaklaşımı, bakım ekonomisini dönüştürerek kadın emeğini görünür kılmakta ve kapsayıcı büyümeyi hedeflemektedir. Öte yandan, demografik dönüşümlerin bakım ekonomisinin önemini artırması beklendiğinden, ulusal politikaların ILO standartlarıyla uyumlu hale getirilmesi önemli olacaktır.

ÖZET

Ekonomik büyüme üretim ve refah artışının önemli bir göstergesi olduğundan tüm dünyada hükümetlerin kalkınma politikalarının merkezinde yer almaktadır. Bununla birlikte küresel iklim değişikliğinin neden olduğu aşırılıklar ekonomik büyüme ve çevre ilişkisine olan akademik ilgiyi arttırmıştır. Bu araştırma Brezilya, Rusya, Hindistan, Çin ve Güney Afrika (BRICS) için ekonomik büyümenin ormansızlaşma üzerindeki etkilerini kentleşme ve nüfus değişkenleri bağlamında incelemiştir. Günümüzde ormansızlaşma yoğun insan aktivitesinin önemli sonuçlarından olmasının yanında iklim değişikliğinin temel sürücülerinden birisidir. Bu nedenle dünya genelinde hızla artan ormansızlaşma ulusların sürdürülebilir kalkınma hedeflerini tehdit etmektedir. Ekonomik büyüme ve ormansızlaşma arasındaki ilişki ampirik literatürde Çevresel Kuznets Eğrisi (EKC) hipotezi çerçevesinde ele alınmıştır. Araştırmada BRICS ülkelerinin 1994-2023 arasındaki dönemi panel veri analizi teknikleri kullanılarak analiz edilmiştir. Değişkenler arasındaki uzun dönem ilişkisi Pedroni (1999, 2004) ve Johansen-Fisher eşbütünleşme testleri kullanılarak incelenmiştir. Analiz sonuçları sosyo-ekonomik göstergeler ile ormansızlaşmanın uzun dönemde eşbütünleşik olduğunu göstermiştir. Uzun dönem katsayıların tahmini ise FMOLS, DOLS-MG ve CCR tahmincileri kullanılarak tahmin edilmiştir. Analiz sonuçları BRICS ülkeleri için EKC hipotezinin geçerli olduğunu göstermiştir. Sonuçlar araştırmacılar ve politika yapıcılar açısından son derece önemli çıkarımlar ortaya koymuştur.

Anahtar Kelimeler: Ormansızlaşma, Ekonomik Büyüme, Sosyo-Ekonomik Göstergeler, BRICS Ülkeleri.

THE IMPACT OF SOCIO-ECONOMIC INDICATORS ON DEFORESTATION IN BRICS COUNTRIES

ABSTRACT

Since economic growth is an important indicator of production and welfare increase, it is at the center of the development policies of governments all over the world. However, the extremes caused by global climate change have increased academic interest in the relationship between economic growth and the environment. This research examined the effects of economic growth on deforestation for Brazil, Russia, India, China and South Africa (BRICS) in urbanization and population variables. Today, deforestation is one of the main drivers of climate change and is one of the important consequences of intense human activity. For this reason, rapidly increasing deforestation around the world threatens the sustainable development goals of nations. The relationship between economic growth and deforestation has been discussed in the empirical literature within the framework of the Environmental Kuznets Curve (EKC) hypothesis. In the research, the period between 1994 and 2023 of BRICS countries was analyzed using panel data analysis techniques. The long-term relationship between the variables was examined using Pedroni (1999, 2004) and Johansen-Fisher cointegration tests. The results of the analysis showed that socio-economic indicators and deforestation are cointegrated in the long run. The estimation of long-term coefficients was estimated using FMOLS, DOLS-MG and CCR estimators. The results of the analysis showed that the EKC hypothesis is valid for BRICS countries. The results revealed extremely important implications for researchers and policy makers.

Keywords: Deforestation, Economic Growth, Socio-Economic Indicators, BRICS Countries.

1. GİRİŞ

Ekonomik büyüme üretim ve refah artışının önemli bir göstergesi olduğundan tüm dünyada hükümetlerin kalkınma politikalarının merkezinde yer almaktadır. Bununla birlikte küresel iklim değişikliğinin neden olduğu aşırılıklar ekonomik büyüme ve çevre ilişkisine olan akademik ilgiyi arttırmıştır. Bu araştırma Brezilya, Rusya, Hindistan, Çin ve Güney Afrika (BRICS) için ekonomik büyümenin ormansızlaşma üzerindeki etkilerini kentleşme ve nüfus değişkenleri bağlamında incelemiştir. Günümüzde ormansızlaşma yoğun insan aktivitesinin önemli sonuçlarından olmasının yanında iklim değişikliğinin temel sürücülerinden birisidir. Bu nedenle dünya genelinde hızla artan ormansızlaşma ulusların sürdürülebilir kalkınma hedeflerini tehdit etmektedir. Ekonomik büyüme ve ormansızlaşma arasındaki ilişki ampirik literatürde Çevresel Kuznets Eğrisi (EKC) hipotezi çerçevesinde ele alınmıştır. Koop ve Tole (1999), 76 gelişmekte olan ülke 1961-1992 dönemi için ormansızlaşma, gayri safi yurtiçi hasıla (GSYH) ve kişi başına düşen GSYH arasındaki ilişkiyi incelemişlerdir. Çalışmalarında, büyüme ile çevresel kalitenin önce kötüleştiğini sonra iyileştiğini yönde bulgulara ulaşılmıştır. Uusivuori vd (2002), 67 tropikal ülke 1970-1991 dönemi için FAO FORIS verilerini kullanarak çoklu regresyon modellemesi uyguladıkları çalışmalarında, nüfus yoğunluğu ve kişi başına gelirin ormansızlaşma üzerinde önemli faktörleri olduğu tespit edilmiştir. López ve Galinato (2005), Brezilya, Endonezya, Malezya ve Filipinler 1980-1999 dönemi yıllık verileri ile ormansızlaşmayı açıklayan çalışmalarında, ticaret açıklığı ve ekonomik büyümenin ormansızlaşmaya neden olduğu bulgusuna ulaşılmıştır. Ewers (2006), 103 ülke Küresel ormansızlaşma ile ekonomik büyüme arasındaki ilişkinin incelendiği çalışmada, yüksek gelirli ülkelerin kaybolan orman örtüsüne karşı yeni plantasyonlarla yüksek ağaçlandırma oranlarına sahip olduğunu buna karşılık, az ormana sahip düşük gelirli ülkelerde ise ormanların hızlı bir oranda tüketme olasılığı olduğu bulgusuna ulaşılmıştır. Mendes ve Junior (2012) , Amazon bölgesi 2004 yılı için ormansızlaşma, yolsuzluk ve ekonomik büyüme arasındaki ilişkiyi Genelleştirilmiş Toplamsal Model (GAM) yöntemi ile analiz ettikleri çalışmalarında, ekonomik büyüme oranının ormansızlaşma düzeyi üzerinde istatistiksel olarak anlamlı etkileri olduğu ancak yolsuzluğun anlamlı bir etkisi olmadığı bulgusuna ulaşılmıştır. Ahmed vd (2015), Pakistan 1980-2013 dönemi için ormansızlaşma ve ekonomik büyüme, enerji tüketimi, ticaret açıklığı ve nüfus arasındaki ilişkiyi Eşbütünleşme için Otoregresif Dağıtılmış Gecikme (ARDL) sınır testi yaklaşımı ve VECM-Granger nedensellik testi kullanarak incelemişlerdir. Elde edilen sonuçlara göre uzun vadede ekonomik büyümenin ormansızlaşma üzerinde azalan negatif bir etkisi olduğunu ve ekonomik büyüme ve enerji tüketimi arasında çift yönlü bir nedensellik etkisi tespit edilmiştir. Cuaresma ve Heger (2019), ekonomik kalkınmanın, yoksul ülkelerde ağaç örtüsü kaybına yol açarken, gelişmiş ülkelerde aynı etkiyi gösterip göstermediğini coğrafi regresyon süreksizliğini kullanarak incelemişlerdir. Bulgulara göre, Sahra Altı Afrika ve genel olarak düşük gelirli ülkelerin en yüksek kalkınma-ormansızlaşma esnekliğine sahip olduğu tespit edilmiştir. Benedeka ve Fertő (2020), 1990-2015 dönemi için orman örtüsünün artışı ile kişi başına düşen GSYİH arasındaki ilişkiyi "Orman Kurtarma Endeksi" ile analiz edilen çalışmada, ormanların genel olarak artmasına rağmen, daha az değerli orman türlerini destekleyen yeniden düzenlemelerle orman biyoçeşitliliğine daha fazla önem verilmesine dikkat çekmişlerdir. Ajanaku ve Collins (2021), 1990-2016 dönemi için Afrika'da meydana gelen ormansızlaşmaya uygulanan Çevresel Kuznets Eğrisi (EKC) hipotezini Panel GMM yöntemi ile incelemektedir. Ampirik sonuçları, EKC hipotezinin Afrika'daki

ormansızlaşma için geçerli olduğunu ve uygun arazi kullanımı ve orman ürünleri ticareti politikaları yoluyla ormansızlaşmayı azaltabileceği ve bu politika sonuçlarının ekonomik büyümeyi etkilemeyeceği yönde kanıtlar elde edilmiştir. Barros ve Chimeli (2026), Brezilya Amazon bölgesi 2000-2010 dönemi için ormansızlaşma ile sosyo-ekonomik kalkınma arasında ilişkiyi çevresel Kuznets eğrisi (EKC) bağlamında inceleyen çalışmada sosyo-ekonomik büyümenin artık ormansızlaşmanın bir itici gücü olmadığı sonucuna ulaşılmıştır.

2. ANALİZ BULGULARI

Bu araştırma BRICS grubu ülkelerinde 1994-2023 arasını kapsayan dönemde sosyo-ekonomik göstergelerin ormansızlaşma üzerindeki etkisini incelemiştir. Tablo 1'de araştırma değişkenleri sunulmuştur. Çalışmada ormansızlaşmayı temsilen orman alanı (arazi alanın yüzdesi) kullanılmıştır. Ekonomik büyümeyi temsilen ise kişi başına düşen reel GSYH (ABD Doları kullanılmıştır). Çalışmada kentleşme (toplam nüfusunun yüzdesi) ve nüfus verileri kontrol değişkeni olarak modele dahil edilmiştir. Araştırma verileri Dünya Bankasının resmi veri tabanı olan Dünya Kalkınma Göstergeleri veri tabanından alınmıştır.

Tablo 1. Araştırma Değişkenleri

Değişken	Açıklama	Türü	Veri Kaynağı
LnDEF	Orman alanı (arazi alanının yüzdesi)	Doğal logaritması alınmıştır.	WDI
LnGDP	Kişi başına düşen reel GSYH (ABD Doları)	Doğal logaritması alınmıştır.	WDI
LnURB	Kentsel nüfus (toplam nüfusun yüzdesi)	Doğal logaritması alınmıştır.	WDI
LnPOP	Toplam nüfus	Doğal logaritması alınmıştır.	WDI

BRICS ülkeleri için ekonomik büyümenin ormansızlaşma üzerindeki etkisi *Çevresel Kuznets Eğrisi (EKC)Hipotezi* çerçevesinde ele alınmıştır. Bu hipotez Kuznets'in (1955) gelir eşitsizliği ve kişi başına gelir arasındaki ilişkiyi ele aldığı çalışmanın çevresel uyarlamasına dayanır. Grosmann ve Kruger (1991) tarafından önerilen bu yaklaşıma göre kişi başına gelir ve çevresel bozulma arasında ters bir "*U*" ilişkisi söz konusudur. *EKC* hipotezi ormansızlaşma bağlamında ele alındığında kalkınmanın başlangıç aşamasında tarıma dayanan ekonomik faaliyetler ve aşırı doğal kaynak kullanımı ormansızlaşmayı arttıracak, bana belir bir gelir düzeyinden sonra sanayileşme, hizmet sektörünün gelişimi, verimlilik ve çevre dostu teknolojilerin yaygınlaşması ile ormansızlaşmanın azalacağını savunmaktadır. Araştırmada değişkenler arasındaki panel veri ilişkisini veren doğrusal modelin gösterimi aşağıdaki gibidir:

$$LnDEF_{it} = \alpha_{it} + \beta_1 LnGDP_{it} + \beta_2 LnGDP^2_{it} + \beta_3 LnGDP_{it} + \beta_4 LnURB_{it} + \beta_5 LnPOP_{it} + \varepsilon_{it} \quad (1)$$

Burada *LnDEF*, ormansızlaşmanın doğal logaritmasını göstermektedir. *LnGDP*, *LnGDP*^{2}, *LnURB ve LnPOP* ekonomik büyümenin, ekonomik büyümenin karesinin, kentleşmenin ve toplam nüfusun doğal logaritmasıdır. Modelde *i* ve *t* birim ve zaman boyutunu α sabiti, β eğim parametrelerini ve ε hata terimini temsil etmektedir. Tablo 2'de araştırma serilerine ilişkin tanımlayıcı istatistikler verilmiştir. Ormansızlaşmanın doğal logaritmasının ortalama değeri 3.378, maksimum ve minimum değerleri ise 4.229 ve 2.636 olarak hesaplanmıştır. LnGDP ve LnGDP2 serilerinin ortalama değerleri 8.394 ve 71.117, maksimum değerleri 9.432 ve 88.966, minimum değerleri ise 6.377 ve 40.678 olarak bulunmuştur. Araştırma serileri yıllık verilerden oluşmuştur.

Tablo 2. Tanımlayıcı İstatistikler

	LnDEF	LnGDP	LnGDP^2	LnURB	LnPOP
Ortalama	3.378	8.394	71.117	4.013	19.504

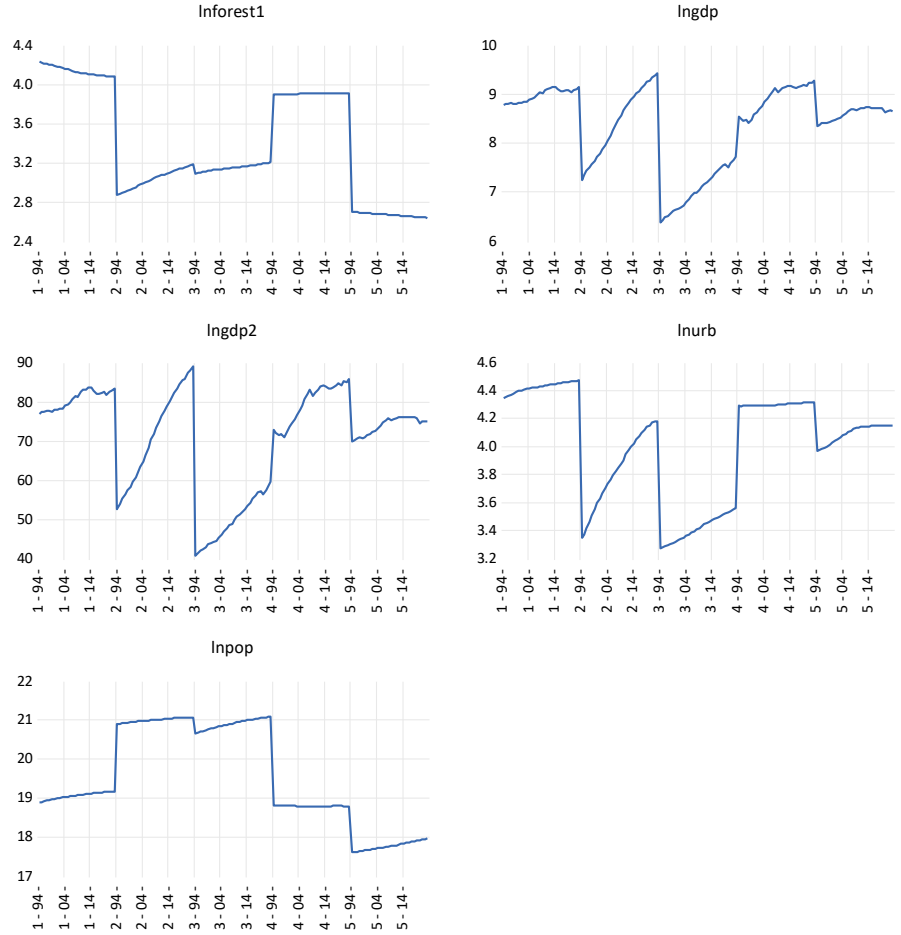
Şekil 1'de araştırma serilerinin dönemsel (1994-2023) değişim grafikleri gösterilmiştir.

Şekil 1. Araştırma Değişkenlerinin Dönemsel Değişim Grafiği



Araştırma çerçevesinde ilk olarak serilerin yatay kesit bağımlılığı (YKB) problemi içerip içermedikleri Breusch-Pagan (1980) tarafından önerilen LM istatistiği kullanılarak incelenmiştir. LM analiz sonuçları Tablo 3'de sunulmuştur. Sonuçlara göre tüm serilerde YKB problemi vardır. Bu nedenle değişkenlerin durağanlığı YKB'nin varlığında sağlam sonuçlar veren ve Pesaran (2007) tarafından önerilen CIPS testi kullanılarak analiz edilmiştir. Analiz sonuçlarına göre tüm seriler düzeyde birim kök içeriyorken, birinci farkları alındığında durağanlaşmışlardır (Tablo 4).

Tablo 3. Yatay Kesit Bağımlılığı Analizi

	LM İstatistik	Prob.

LnPOP	-2.085	-3.929***

*** p≤0.01 düzeyinde anlamlılığı temsil etmektedir.
CIPS testi uygulanırken sabitli ve trendli opsiyonu seçilmiştir.

Araştırma kapsamında değişkenler arasındaki uzun dönem ilişkisi Pedroni (1999, 2004) ile Johansen-Fisher eşbütünleşme testleri kullanılarak incelenmiştir. Tablo 5'de verilen analiz sonuçları ormansızlaşma ile açıklayıcı değişkenlerin uzun dönemde eşbütünleşik olduğunu göstermiştir. Tahmin edilen modelin slope heterojenliği ise Pesaran-Yamagata (2008) ve Blomquist-Westerlund (2013) Delta testleri kullanılarak incelenmiştir. Tablo 6'da verilen Delta testi sonuçları tahmin edilen modelin heterojen özellikler sergilediğini göstermiştir. Araştırmanın sonraki aşamasında uzun dönem katsayıların tahmini Pedroni (2001) DOLS-MG, Pedroni'nin (1996, 2000) önerdiği Tam Değiştirilmiş En Küçük Kareler (FMOLS) ve Park'ın (1992) Kanonik Ko-entegrasyon Regresyon (CCR) tahmincileri kullanılarak tahmin edilmiştir. Tahmin sonuçları Tablo 7'de sunulmuştur.

Ekonomik büyümenin ormansızlaşmayı temsil eden LnDEF üzerindeki etkisi tüm tahminci sonuçlarına göre negatif iken, ekonomik büyümenin karesinin LnDEF üzerindeki etkisi pozitif bulunmuştur. Bu bakımdan araştırma sonuçları BRICS ülkeleri için EKC hipotezinin geçerli

olduğunu ve ekonomik kalkınmanın başlangıç aşamasında ormansızlaşmanın arttığını, belli bir eşik seviyesinden sonra ise ekonomik kalkınmanın ormansızlaşmayı azalttığını göstermiştir. Analiz sonuçları kentleşmenin ormansızlaşmayı azalttığını, nüfus artışının ise ormansızlaşmayı attırdığını göstermiştir.

Araştırma doğrultusunda değişkenler arasındaki nedensellik ilişkisi Dumitrescu-Hurlin (2012) tarafından önerilen Granger temelli heterojen nedensellik testi kullanılarak incelenmiştir. Sonuçlar Tablo 8'de gösterilmiştir. Buna göre ekonomik büyümeden ormansızlaşmaya doğru tek yönlü Granger nedensellik söz konusu iken, kentleşme ve nüfus ile ormansızlaşma arasında çift yönlü Granger nedensellik vardır. Sonuçlar kentleşmeden ekonomik büyümeye doğru tek yönlü Granger nedensellik olduğunu göstermiştir. Nüfus ile ekonomik büyüme ve kentleşme arasında çift yönlü Granger nedensellik vardır.

3. SONUÇ

İklim değişikliği günümüzde etkisini gittikçe arttırarak, dünya genelinde hava-su kaynaklı anormallikleri tetikleyerek, küresel bir krize dönüşmüştür. Küresel iklim değişikliği ile mücadelede ormanların korunması ve yaygınlaştırılmasının kritik bir rolü vardır. Bu araştırma BRICS ülkeleri için ekonomik büyümenin ormansızlaşma üzerindeki etkisini *EKC* hipotezi çerçevesinde incelemiştir. Sonuçlar ormansızlaşma ve ekonomik büyümenin uzun dönemde eşbütünleşik olduğunu göstermiştir. Analiz sonuçlarına göre uzun dönemde BRICS ülkeleri için *EKC* hipotezi geçerlidir. Buna göre ekonomik kalkınmanın başlangıç aşamasında ormansızlaşma artmış, belli bir eşik seviyesinden sonra ise artan ekonomik kalkınma ve refah ormansızlaşmayı olumlu etkilemiştir. Analiz sonuçları kentleşmenin ormansızlaşmayı azalttığını, nüfus artışının ise ormansızlaşmayı attırdığını göstermiştir. Araştırma kapsamında değişkenler arasındaki nedensellik ilişkisi Dumitrescu-Hurlin (2012) tarafından önerilen Granger temelli heterojen nedensellik testi kullanılarak incelenmiştir. Sonuçlar ekonomik

büyümeden ormansızlaşmaya doğru tek yönlü Granger nedensellik olduğunu, kentleşme ve nüfus ile ormansızlaşma arasında çift yönlü Granger nedensellik olduğunu göstermiştir. Analiz sonuçlarına göre kentleşmeden ekonomik büyümeye doğru tek yönlü Granger nedensellik vardır. Nüfus ile ekonomik büyüme ve kentleşme arasında çift yönlü Granger nedensellik vardır.

SOSYAL MEDYAYLA BİRLİKTE DÖNÜŞEN MAHREMİYET ALGISI

Yüksek Lisans Öğrencisi, Büşra ÖZCAN ÖZOĞLU
T.C. Burdur Mehmet Akif Ersoy Üniversitesi
bozcan9623@gmail.com- ORCID ID: 0009-0003-5910-2263

ÖZET

Günümüz düşünce dünyasında mahremiyet kavramı önemli bir yere sahiptir. Her gün dönüşen ve değişen toplum düzeninde dinamik bir yapıya sahip olan mahremiyet kavramı da kendi içinde değişmekte ve dönüşmektedir. Günümüzde mahremiyetin dönüşümüne şahit olmaktayız. Nitekim sosyal medyayla birlikte dönüşen mahremiyet, görme ve gösterme üzerine oluşturduğu yeni anlamlarla toplumsal yaşamda değişikliklere sebep olmuştur. Geçmişte güzel olanı saklamak marifetken bugün göstermek alkışlanır hale gelmiştir. Sosyal medyayla birlikte modern toplumda gizli olanın görünürlük kazanması mahremiyet algısında dönüşüme sebep olmuştur. Mahremiyet kavramının görünmezlik ve bağımsızlık özellikleri olduğunu söyleyebiliriz. Sosyal medyanın hayatımıza girmesiyle birlikte en mahrem olanın bile görülebilir hale gelmeye başlamıştır. Günümüzde kişilerin en yoğun şekilde iletişim ve etkileşime girdiği mecraların başında sosyal medya platformları gelmektedir. Sosyal medyayla birlikte bireylerin sosyalliğini sağlayacağı alanları gerçek alanlardan dijital alanlara geçmiştir. Bu durum insanları tamamen gerçek ilişkilerden koparmıştır diyemeyeceğimiz gibi yapay ilişkilerin yokluğundan da bahsedilememektedir. İnsanların sosyalliği bu platformlardaki paylaşımlarına gelen etkileşimlerle ölçülür duruma gelmiştir. İnsanlar sosyal medyayla birlikte yediği yemekleri, giydiği kıyafetleri, gezdiği şehirleri, kendisini ne kadar çok beğendiğini ve tabi ki beğenildiğini, doğum günlerini vs hayatının her alanını tanıdığı tanımadığı herkese açmaya başlamıştır. Kişiler kendi özelini teşhir ettiği gibi başkalarının özelini de merak etme, görüntüleme ve elde etmek için özel çabalar göstermektedir. Sosyal medyadaki tüm insanların daima mutlu olduğu algısıyla birlikte de insanlar kendisini o mutluluğa sahip olmak için aynı şeyleri yapmaya özendirilir duruma gelmiştir. Sosyal medyanın günümüzde hızla yayılmasıyla birlikte mahremiyet algısının da dönüştüğü görülmektedir. Bu çalışmanın amacı sosyal medya mecralarının bireylerin hayatına girmesiyle mahremiyet algısı açısından ne gibi değişim ve dönüşümü oluşturduğunu incelemektir. Çalışmada sosyolojik analiz yöntemi kullanılmıştır. Analiz sonucunda, sosyal medyayla birlikte dönüşen mahremiyet algısının sürekli bir değişim ve uyum sürecinde olduğu görülmüştür. Bireylerin ve toplumun bu değişimlere adapte olması ve mahremiyetin korunması için aktif bir şekilde çalışması gerekmektedir. Bu sayede sosyal medyanın sağladığı faydaları ve iletişim imkanlarını kullanırken, kişisel mahremiyetimizi de koruyabilir ve dijital dünyada güvenli bir şekilde var olabiliriz.

Anahtar Kelimeler: Sosyal Medya, Mahremiyet, Ahlak

GİRİŞ

Mahremiyet, bireylerin kişisel alanını, düşüncelerini ve bilgilerini kontrol etme yeteneğidir. Fakat günümüzde sosyal medyanın hızlı yükselişiyle birlikte, mahremiyet algısı da değişime ve dönüşüme uğramıştır. Günümüzün dijital çağında, sosyal medya platformları hayatımızın önemli bir parçası haline gelmiştir. Facebook, Twitter, Instagram gibi platformlar aracılığıyla bireyler günlük yaşantılarını paylaşırken, düşüncelerini, fotoğraflarını ve kişisel bilgilerini milyonlarca insanla kolaylıkla paylaşabilir olduğu gözlemlenmektedir. Sosyal medya kullanımıyla birlikte gelen bu kolaylık mahremiyet algısında da dönüşümlere neden olmaktadır.

Sosyal medya platformları, kullanıcıların kişisel bilgilerini ve paylaşımlarını geniş bir kitleyle paylaşmasını teşvik eder. Bu durum ise bireylerin mahremiyet sınırlarını bulanıklaştırmaktadır. Örneğin, geçmişte özel olarak kabul edilen bir fotoğraf veya düşüncenin günümüzde sosyal medya aracılığıyla paylaşıldığında hızla yayılabilir ve kontrol dışına çıkabilir hale geldiği görülmektedir. Ayrıca, sosyal medyanın sunduğu "beğeniler", "takipçiler" ve "paylaşım" gibi özellikler, insanların dikkatini ve onayını çekme ihtiyacını artırmakta ve böylelikle bireyleri daha fazla kişisel bilgi paylaşmaya yönlendirebilmektedir. Dolayısıyla mahremiyet algısı, sosyal medyanın etkisiyle zayıflayabilmekte ve bireyler daha açık bir şekilde özel hayatlarını sergilemeye başlayabilmektedir.

Sosyal medya platformlarıyla birlikte toplumsal değerlerde de değişme meydana gelmiştir. Bu araştırmada, sosyal medyanın yükselişiyle birlikte dönüşen mahremiyet algısı ele alınacaktır. Ayrıca sosyal medyanın mahremiyet anlayışımızı nasıl etkilediğini, avantajlarını ve dezavantajları üzerinde durulacak ve bireylerin mahremiyetlerini korumak için neler yapabileceklerini ve sosyal medyanın mahremiyetin geleceği üzerindeki olası etkileri üzerinde durulacaktır.

Sosyal medyanın hayatımızdaki önemli bir yer edinmesiyle birlikte ortaya çıkan mahremiyet algısının nasıl değiştiğini ve bireylerin bu yeni ortamda nasıl bir denge kurmaları gerektiğini anlamak amacını taşımaktadır. Mahremiyetin bireysel ve toplumsal boyutlarını inceleyerek, sosyal medyanın sağladığı olanaklar ve riskler arasındaki dengeyi ele alacaktır. Ayrıca, sosyal medyanın mahremiyetin sınırlarını belirleme ve kişisel kontrol sağlama konusundaki etkileri de tartışılacaktır.

1. MAHREMİYET

1.1. Mahremiyetin Tanımı

Kişisel mahremiyet ya da özel yaşam kavramı, günümüzde toplumsal hayatta çok önemli yeri olan bir kavramdır. Ancak mahremiyet kavramının tanımlanması ve sınırlarının belirlenmesi oldukça zordur. Çünkü mahremiyet, birçok insan için farklı anlamlara gelmektedir. Hatta çoğu insan, günlük hayatlarının önemli bir parçası olan bu olgunun çoğu zaman farkında da olamazlar (Yüksel, 2003:78). Mahremiyet kavramı tanımlamalarında hangi boyuttan bakıldığına göre değişkenlik göstermektedir. Bu bağlamda aşağıda bazı boyutlarıyla mahremiyet tanımlamalarına yer verilecektir.

Mahremiyet kavramını İslami kaynaklar açısından tanımladığımızda; mahremiyet kavramının temeline indiğimizde kök harfleri Arapça “حرم” (h-r-m) olan “mahrem” kelimesi sözlükte; yasaklanan, haram olan şey, tabu, kutsal, mukaddes, kişinin evlenemeyeceği kişiler anlamına

gelmektedir. Mahremiyet kavramı ise kişinin kendi sınırlarını koruması ve insanlar arasındaki ilişkilerde sınırlarını gözetmesi, başkalarının duyması istenmeyen özel bilgi, kişinin bedeninde dokunulmaması gereken özel bölgeler, belirli sınırlar dahilinde girilmesi ve görülmesi izin verilen mekanlar olarak tanımlanmaktadır (Martı-Yıldız vd :2022:2).

Mahremiyet kavramının daha iyi anlaşılması için "mahrem" kelimesinin anlamından bahsetmek faydalı olacaktır. Mahrem, Türkçe sözlüğe göre, yakın akraban olduğu için nikah düşmeyen kimse, başkalarına söylenmeyen, gizli ve sırdaş olarak tanımlanmaktadır (https://sozluk.gov.tr/). Osmanlıca- Türkçe sözlükte ise mahremiyet, mahrem olma hali, mahremlik şeklinde açıklanmıştır. Mahrem kelimesi ise; dinin yasakladığı şey, yakın akraba olması sebebiyle kadınların kendisinden çekinmediği, nikah düşmeyen evlenmeyi yasak ettiği kimse her şeyini bilen, herkese söylenmesi doğru olmayan gibi anlamlara gelmektedir. (Özön, 1971: 440). Türkçe sözlükte ise, "mahrem'' kelimesi "nikah düşmeyen yakın akraba, gizli, sırdaş" gibi anlamlarda geçmektedir. (Canpolat, 1983: 799)

Batı dillerinde mahremiyet kelimesi; privacy (privata: mahrem) Latince privo, privare fiilinden gelmektedir. Bir kenara koymak, ayırmak, muaf tutmak, bağışlamak, serbest bırakmak, kişiye özel gibi anlamlara gelen kelime, aynı zamanda, privatus şeklindeki isim şekliyle de hem özel vatandaş hem de siyasi ya da kamusal görevi olmayan kişi anlamında kullanılmaktadır. Terimin Arapça ve Latince anlamlarına bakıldığında mahrum bırakma vurgusunun öne çıktığı görülmektedir. Bu anlamların yanı sıra "kutsal" anlamı da vardır. Poyraz'a göre harem, kelimesinin aslı Kâbe'dir. Kâbe Allah'ın Haremi (haremullah)'dir. Kâbe'nin ev olması, evin kutsallığı ve mahremiyeti yanında yasağı da belirtmektedir. Kutsal üzerinden dünya-ev (Grekçe: oikon) ilişkisine ve buradan kamusal olana (polis) geçiş yapan Poyraz, hem kendi mahreminden sorumlu olmak hem de mahrem olmayandan korumak fiillerini ön plana çıkarmaktadır (Poyraz, 2019: 22, 23).

Mahremiyet kavramı mahrem olma hallerinin tamamını içine almaktadır. Bunların yanı sıra kişinin bedenini örtecek şekilde giyinmesi, kişilerin vücudunda gizlenmesi gereken bölgeleri, kişilerin cinsel hayatı ve bunun gizliliği, kişisel ve sosyal hakları, kişisel bilgiler, bireysel alanı ve bunun kullanım hakkı gibi birçok alanı içine alan anlam çeşitliliği zengin olan bir kavramdır. Bu anlam çeşitliliğinin sebebi ise mahremiyet kavramının dini, toplumsal, insan fıtratına uygun ve hukuk alanlarında da bir karşılığa sahip olmasıdır. Türk toplumunu göz önünde bulundurduğumuzda mahremiyet kavramı hem dini hem de toplumsal bir zemin üzerinde inşa edilmiş ve anlam karşılığı olan önemli bir kavramdır (DİB,2007).

Mahremiyet olgusu çok eski dönemlerden beri bilinen kavramlardandır. Bu olgunun temel yapıtaşı olan özel hayat alanından söz edebilmek için "birey" kavramından hareket edilmelidir. Modern öncesi ve geleneksel toplumsal yapılarda bugünkü anlamıyla "birey" den ve bireyin "özel yaşan alanı" ndan bahsetmek zordur (Yüksel, 2003:182). Bu sebeple bireysel yaşantılar ve toplumsal yaşantılar birbiriyle ilişki içerindedir ki toplumu oluşturan ana karakter bireydir. Mahremiyet kavramının bireysel ve toplumsal olmakla birlikte birçok kavramsallaştırması vardır.

Mahremiyet kavramsallaştırmalarına geçmeden önce mahremiyetin önemine değinecek olursak Westin, çalışmasında mahremiyetin neden önemli olduğu sorusuna cevap aramış ve genel hatlarıyla dört maddede ele almaktadır. Bunlar; "kişisel özerklik ve manipüle edilmekten

kaçınma arzusu", "duygusal rahatlama ve psikolojik mahremiyet yönetimi", "kişinin kendi kendini değerlendirmesi", "hem kişilerarası hem de güvendiğimiz başkalarıyla bilgi paylaşımının sınırları kapsamında belirli miktarda iletişimin korunması" olarak ifade edilmektedir. Mahremiyet 'in, "özgürlük, özerklik, benlik, insan ilişkilerinin geliştirilmesi ve özgür bir toplumun varlığının geliştirilmesi" gibi işlevlerinden dolayı merkezi bir önemi vardır. Bu bağlamda mahremiyet kavramsallaştırmalarını ana hatlarıyla dört başlık altında incelemek mümkündür. Bunlar: (Livberber, 2018:20-21).

- "Kişilerarası duygusal iletişim ve etkileşimi düzenleme ve duyguların ifade sürecinde bir "ihtiyaç",
- Kişisel sınır, yalnız kalma ve ulaşılabilirlik kapsamında "korunma hakkı",
- "Kültürel algı",
- Din referansında "Haramdan sakınma, sadakat ve kul hakkıdır".

İlk kavramsallaştırma mahremiyetin bir ihtiyaç olduğudur. Mahremiyet her şeyden önce en temel insani bir ihtiyaç ve toplumsal ilişkilerin düzeninde de önemli bir gereklilik arz etmektedir. İkinci anlamda ise kişinin kendi sınırları kapsamında korunma hakkı olarak ifade edilmektedir. Üçüncü anlamında ise kültürün mahremiyet kavramını etkilemesiyle oluşan kültürel algı anlamında bahsedilmektedir. Dini literatürdeki karşılığı ise haramdan sakınma, kul hakkı gibi anlamlara gelmektedir.

2. SOSYAL MEDYA

2.1. Sosyal Medya Tanımı, Tarihçesi ve Gelişimi:

İnternet, dünya genelinde 4.66 milyar insanın kullandığı bir platformdur ve 1960'lara kadar uzanan bir geçmişi vardır. İlk zamanlarda bilimsel ve askeri araştırmalar için kullanılan internet, 1980'lerin sonunda halka açılmıştır. Bilgisayarların gelişmesiyle beraber internet kavramı ortaya çıkmış ve ABD, İngiltere ve Fransa'da bulunan laboratuvarlarda internet ağlarının ilk paket tasarımları geliştirilmiştir. 1990'ların sonuna gelindiğinde Tim Berners-Lee'nin World Wide Web'i icat etmesiyle internet daha yaygın bir şekilde kullanılmaya başlanmıştır. World Wide Web, tarayıcılar aracılığıyla web sitelerinin görüntülenmesini sağlayan bir araç zinciri anlamına gelmektedir. Türkiye'de internet altyapısının gelişimi belirli aşamalardan geçmiştir. Türkiye'ye internetin gelişi ise 12 Nisan 1993 tarihinde ODTÜ- TÜBİTAK işbirliğiyle Ankara-Washington arasına kurulan bir kiralık hat ile olmuştur. İlk başlarda sadece belirli kurumlar ve üniversiteler internete erişebilirken, 1993- 1996 yılları arasında TÜBİTAK ve birçok üniversite ODTÜ üzerinden internet bağlantısı sağlamıştır. Daha sonra Türkiye'de web siteleri açılmaya başlamıştır, hatta ilk Türkçe içerikli web sayfaları ODTÜ ve Bilkent Üniversitelerinin web siteleri olmuştur. "996 yılında ise Türkiye'de ilk İnternet Servis Sağlayıcı (ISS) olan TURKNET hizmete başlamıştır. İnternet'in hızla gelişmesiyle beraber ÖSYM, sınav sonuçlarını internet üzerinden açıklamaya başlamış ve bankalarda müşterilere internet üzerinden hizmet vermeye başlamıştır. Şuanda Türkiye'de nüfusun yaklaşık %72'si internete erişim sağlamaktadır, bu da 83 milyon nüfuslu ülkede yaklaşık 62 milyon kişiye denk gelmektedir (https://shiftdelete.net/turkiyede-internet-altyapisinin-gelisimi).

Web 2.0 kavramı ilk olarak 2004 yılında, O'Reilly ve MediaLive International tarafından düzenlenen bir web konferansında ortaya çıkmıştır. Web 2.0, teknolojik gelişmeleri (AJAX, RSS, XML, CSS …) ve kullanıcı bakış açısındaki büyük değişmeleri içermektedir. Web 1.0'da

kullanıcılar sadece siteleri ziyaret eden ve içeriği okuyan "ziyaretçiler" olarak adlandırılırken, Web 2.0'da kullanıcılar siteleri oluşturabilir, içeriği değiştirebilir duruma gelerek "kullanıcı" adını almışlardır (https://bidb.itu.edu.tr/seyir-defteri/blog/2013/09/08/web-2.0).

Sosyal medyanın en önemli bileşeni sosyal ağlardır. Sosyal ağlar, kullanıcıların web içeriğini oluşturmasını sağlayan web 2.0 teknolojisi üzerine kurulmuş bir modeldir. Sosyal medya, internet tabanlı uygulamaların kullanıcı merkezli olarak içerik üretimine ve geliştirilmesine izin veren bir kavramdır. Web 1.0'da kullanıcılar sadece okuyucu konumundayken, Web 2.0 ile birlikte kullanıcılar diğer kullanıcılar ve ağ ile etkileşim kurabilme imkanı bulmuştur. Bu gelişme, internetin kullanım alanlarını çeşitlendirerek kullanıcıların etkileşimde bulunabileceği sosyal ağlarda büyümeye yol açmıştı (Tarcan, 2015:2-6).

Sosyal medya, bir şey, bir yer ya da bir ortam değildir, bir terkip, bir kavramdır (Pettman, 2017: 11). Pettman, akış içindeki paylaşımlara en fazla iki günlük ömrünün olduğundan hareketle Heraklitos'un nehir metaforunu sosyal medyaya uyarlamış ve "aynı canlı akışa iki kez giremezsin." diyerek bu yeni iletişim türünün değişkenlik ve hızına vurgu yapmıştır. O'na göre kişiler bir anlığına gözünü ekrandan ayırsa hayatını değiştirmeyi vadeden tweet'i kaçıracakmış hissi yaşamaktadır. Fakat şüphesiz sosyal medya kullanıcıları tek tip değildir. (Pettman, 2017: 12). Sosyal medya kullanıcıları sadece bir tip değil farklı farklı birçok tipten meydana gelmektedir.

2.2.Sosyal Medyanın İşlevleri

Sosyal medyanın birçok işlevi vardır. Bunlar; sosyalleşme, reklam-pazarlama-ticaret, haberleşme- enformasyon, siyasi ve dini örgütlenmelerdir. Sosyal medya, insanların birbirleriyle iletişim kurmasını ve bağlantılarını sürdürmesini sağlamaktadır. Bunun yanı sıra kullanıcıların güncel bilgileri paylaşmasını, haberleri takip etmesini ve farklı konularda bilgi edinmesini sağlar. Ayrıca kullanıcıların kendi bilgi ve içeriklerini paylaşmalarına olanak tanır.

Sosyal medyanın işlevlerinden ve kullanım şekillerinden hareketle bir tipoloji ortaya çıkarılmıştır.

1. Her kullanıcı kendisini bir gruba ait olma hissi içinde sürekli bir takip ve takip edilme arzusu içindedir. Bunun yanında bu takipleşme süreciyle insanları etkileyecek şekilde bir amaç doğrultusunda kullananlar.
2. Tüm hayatını sanal aleme taşıyanlar, bunlar evinin en mahrem alanından bile görüntüler sunarak insanlara kendini teşhir eden ve kullandığı malzemelerin satışını yaparak bu mahrem alanından maddi menfaat sağlayanlardır. Bu kişiler maddi menfaatlerin yanı sıra manevi menfaatler de elde ederler. Nitekim bu kullanıcılarda beğenilme isteği ve kendini gösterme arzusu; diğer kullanıcıların onlara mesaj, beğenilerle dönüt vermesiyle bunu elde edecektir.
3. Sosyal medya aracılığıyla kendi düşüncelerini insanlara ulaştırma çabasında olanlar.
4. Eğitim platformu olarak kullananlar. Örneğin yabancı dil öğrenmek isteyenler için binlerce sayfanın var olduğu bilinmektedir.
5. Kendi siyasi veya dini görüşü etrafında insanları toplayan ve bu doğrultuda örgütlenen bir kitle oluşturanlar.

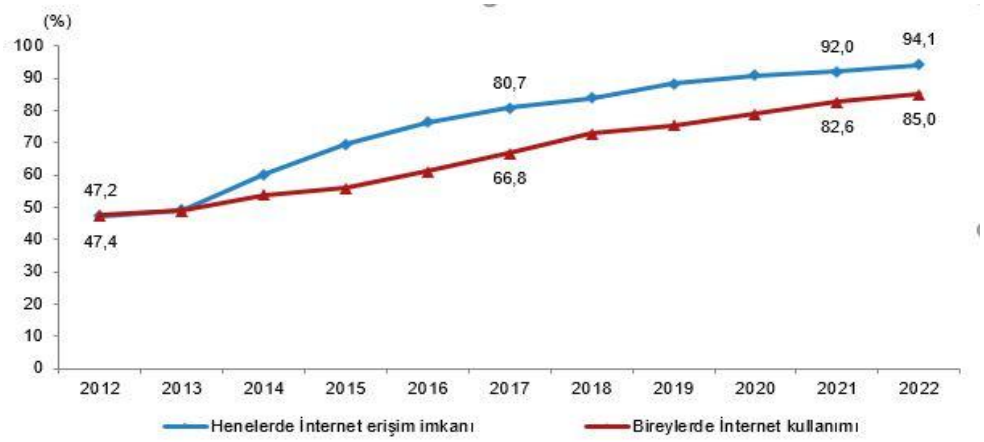
2.3. Sosyal Medya Kullanımı

2.3.1. TÜİK Verilerine Göre İnternet- Sosyal Medya Kullanımı:

2022 yılında yapılan hanehalkı bilişim teknolojileri kullanım araştırmasına göre, hanelerin %94,1'i evden internete erişebiliyor olduğu gözlemlenmiştir. Bu oran bir önceki yıla göre artış göstererek %92,0 olarak gerçekleşmiştir. İnternet erişim imkânı olan hane oranı İstatistiki Bölge Birimleri Sınıflaması (İBBS) 1. Düzeyine göre yapılan araştırmaya göre, internet erişim imkanına sahip olan hane oranı en yüksek bölgeler sırasıyla %98,7 ile TR1 İstanbul, %98,3 ile TR5 Batı Anadolu ve %94,4 ile TR3 Ege olarak kaydedilmiştir. Bu verilere göre, 2022 yılında internet kullanan bireylerin oranı %85,0 olmuştur. Cinsiyet bazında, erkeklerin internet kullanım oranı %89,1 iken kadınların oranı %80,9 olarak belirlenmiştir.

Evlerde İnternet Erişim İmkânı ve Bireylerde İnternet Kullanımı 2012-2022

Görsel 1. Hanelerde İnternet Erişim İmkânı ve Bireylerde İnternet Kullanımı (2012-2022).



Kaynak: TÜİK, 2012-2022 Hanehalkı Bilişim Teknolojileri Kullanım Araştırması İstatistikleri.

2022 yılının ilk 3 ayında, bireylerin %82,7'sinin düzenli olarak internet kullandığı görülmüştür. Düzenli olarak internet kullanan kadınların oranı %78,6 iken erkeklerin oranı %86,9 olmuştur.

Bireylerin İnternet Kullanım Sıklığı, 2022

Çizelge 1. Bireylerin İnternet Kullanma Sıklığı 2022 (%)

	Toplam	Erkek	Kadın
Düzenli internet kullanımı	82,7	86,9	78,6
Günde birkaç defa	69,1	73,3	64,9
Günde bir defa veya hemen hergün	10,9	11,0	10,9
Haftada en az bir defa (ancak hergün değil)	2,7	2,6	2,9

Haftada bir defadan az	0,7	0,7	0,7

Kaynak: TÜİK, 2012-2022 Hanehalkı Bilişim Teknolojileri Kullanım Araştırması İstatistikleri.

Son 12 ayda internet kullanan bireylerin internet üzerinden özel kullanım amacıyla mal veya hizmet satın alma ya da sipariş verme (e-ticaret) oranı, 2021 yılında %44,3 iken 2022 yılında %46,2 olmuştur. Cinsiyete göre İnternet üzerinden mal veya hizmet satın alma ya da sipariş verme oranı erkeklerde %49,7 iken kadınlarda %42,7 olmuştur. Bu oran, bir önceki yıl sırası ile %48,3 ve %40,3 olarak gerçekleşmiştir.

2022 yılının ilk 3 ayında internet üzerinden mal veya hizmet satın alan bireylerin en çok tercih ettiği ürünler incelendiğinde, %71,3 ile giyim, ayakkabı ve aksesuar ilk sırada yer almaktadır. Onu sırasıyla %50,2 ile lokantalar, fast food zincirleri ve yemek şirketlerinden yapılan teslimatlar, %41,9 ile gıda ürünleri, %28,7 ile temizlik ürünleri ve kişisel bakım malzemeleri, %27,4 ile kozmetik, güzellik ve sağlık ürünleri takip etmektedir. Cinsiyete göre incelendiğinde, erkeklerin en çok tercih ettiği ürünler giyim, ayakkabı ve aksesuar (%64,7), lokantalar, fast food zincirleri ve yemek şirketlerinden yapılan teslimatlar (%51,1) ve gıda ürünleri (%40,9) olmuştur. Kadınlar ise giyim, ayakkabı ve aksesuar (%78,4), lokantalar, fast food zincirleri ve yemek şirketlerinden yapılan teslimatlar (%49,2) ve gıda ürünleri (%43,0) üzerinde daha fazla alışveriş yapmışlardır.

2022 yılında, internet üzerinden eğitim, mesleki veya özel amaçlar için öğrenme faaliyetinde bulunan bireylerin oranı %15,9'a düşmüştür. Bu oran erkeklerde %15,6, kadınlarda ise %16,3 olarak gerçekleşmiştir. En yaygın kullanılan sosyal medya ve mesajlaşma uygulamaları incelendiğinde, %82,0 ile WhatsApp, %67,2 ile YouTube ve %57,6 ile Instagram ilk sıralarda yer almaktadır. Cinsiyete göre bakıldığında, erkeklerin en çok kullandığı uygulamalar %85,9 ile WhatsApp, %70,8 ile YouTube ve %61,5 ile Facebook iken, kadınların tercih ettiği uygulamalar %78,1 ile WhatsApp, %63,7 ile YouTube ve %55,9 ile Instagram olmuştur (https://data.tuik.gov.tr/Bulten/Index?p=Hanehalki-Bilisim-Teknolojileri-(BT)-Kullanim-Arastirmasi-2022-45587&dil=1&utm_campaign=DonanimHaber&utm_medium=referral&utm_source=DonanimHaber).

Yukarıda internet kullanımına dair verilen TÜİK verilerinden hareketle İnternet kullanımlarının sosyal medya kullanımıyla paralel doğrultuda olduğunu varsaydığımızda ki sosyal medya kullanımlarının da ayrıca verileri bulunmaktadır. Hanelerin son on yıldaki internet kullanımları göz önüne alınarak, çoğu evde 2022 yılı itibariyle internetin var olduğu bilinmektedir. İnternet kullanımlarına baktığımızda ise kişilerin büyük çoğunluğunun oyun, giyim ve alışveriş için kullandıkları görülmektedir. Bilgi ve eğitim için kullanma istatistikleri ise geçen yıldan bu yıla bile %1.2'lik oranda azalmıştır.

3. SOSYAL MEDYAYLA BİRLİKTE DÖNÜŞEN MAHREMİYET

Mahremiyet tarih içinde dönüşüme uğramıştır. Bu dönüşüme bilgi ve teknoloji araçlarının ve araçların kullanım amaçlarının değişmesi sebep olarak gösterilebilir. İletişim teknolojilerindeki ilerleme, mahremiyetin dönüşümünde önemli bir role sahiptir. Başlangıçta mutlulukla karşılanan teknolojik yenilikler, zamanla tehdit edici olarak algılanmaya başlanmıştır. Bunun sebebi ise, iletişim teknolojilerinin bütün duvarları, sınırları aşan ve her şeyi görünür, duyulur hale gelecek şekilde dönüşmesidir. Teknolojik gelişmelerin etkisi, hayat sürecinin dönüştürülebilir ve giderek daha fazla denetim altına alınabilir olduğunu göstermiştir. (Çağan, 2019:31).

Nitekim toplumun yaşadığı değişim ve dönüşüm mahremiyet algı ve kalıplarının da değişimine sebep olmaktadır. Bu bağlamda toplumu oluşturan bireylerin davranış, değer ve normları da değişmektedir. Kişiler arasındaki etkileşim ve iletişim genel olarak sosyal medya mecraları aracılığıyla sağlanmaktadır. Sosyal medyanın hayatımıza girmesiyle değişen birçok şeyin yanı sıra değer yargıları, normlar ve davranışlar da değişmiş ve dönüşmüştür.

Mahremiyeti oluşturan temel yapı taşlarından biri de ahlaktır. Ahlak kavramı genellikle iyi ve kötü huyları, fazilet ve rezîletleri ifade etmek üzere kullanılmış. Ahlâk, insanın ruhî ve mânevî yetilerini güçlendirerek ruhsal gelişimini sağlayan bilgi ve düşünce alanını ifade eder (Çağrıcı, 1989:1).

Ahlaki belirsizlik, insanların değer yaratan Tanrı'ya veya toplumun olumlu bir kolektif iradesine dikkat eden bireylerin artışına yol açar. Bunun sonucunda insanlar; günümüzde olduğu gibi, herhangi bir değişmez değere veya prensibe bağlı kalmadan değerin sürekli olarak yeniden oluşturulduğuna inanırlar. Bu inançları, ihtiyaç duydukları her anda istedikleri nitelikte değerleri üretme yeteneğine sahip olmalarını sağlar. Belirli bir değer alanının olmaması, bu belirsizliği destekler ve belirsizlikte fiil alanının daha şeffaf hale gelmesine neden olur. Bu nedenle belirsizlik sadece ahlakın değil onun ötesinde bir durum haline gelir. Diğer durumlar ise akışkan, denetimsiz, dağınık, göz önünde ve tehlikeli bir şekilde özgürdür (Çağan, 2019:20).

Toplumun her geçen gün dönüşmesiyle birlikte kişilerde buluna ahlak anlayışı da değişmektedir. Her dönemin kendine ait değer, norm ve davranışları bulunmaktadır. Bu bağlamda dönemsel olarak ahlak anlayışı da değişmekte ve ilişkili olan mahremiyet algısı da değişmektedir. Toplumsal olaylardaki ahlak anlayışında görülen farklılaşma mahremiyet anlayışındaki farklılaşmaya sebep olmaktadır.

Ahlak alanındaki bu belirsizlik, cinsiyetler arasındaki ayrımı belirsizleştirmiş ve bunun sonucunda bedenin deşifre edilmesine ve görsel bir nesne haline gelmesine yol açmıştır. Hatta bu durum bedenin tamamen cinsel içerikli bir nesneye indirgenmesine bile sebep olmuştur. Gösteri toplumunda, görsel algının akıldan ve ruhtan daha öncelikli olduğu bilinmektedir. Bu toplumda "görünen şey iyidir, iyi olan görünür" mantığı geçerlidir. (Debord, 2006:39).

2023 yılına gelindiğinde, sosyal medya dünyası giderek genişlemiş ve farklı platformlar kullanıcıların dikkatini çekmek için çeşitli yenilikler yapmıştır. En çok kullanılan sosyal medya uygulamaları arasında Twitter, TikTok, YouTube, Instagram, Facebook, WhatsApp, Reddit, Quara ve Telegram öne çıkmaktadır. Bu platformlar, kullanıcılara geniş bir kullanıcı kitlesi, kolay bilgi ulaşımı, keyifli zaman geçirme imkanı ve yüksek etkileşim sunarak popülerliklerini korumaktadır (https://mgssoftware.net/en-cok-kullanilan-sosyal-medya-uygulamalari).

Günümüzde bireylerin en fazla kullandıkları sosyal medya platformları Whatsapp, Twitter, Youtube ve İnstagram olduğu gözlemlenmiştir. Haberleşmenin dışında, iletişim ve etkileşim kullanım alanı olan İnstagram ve Youtube kanallarını incelediğimizde sosyal medya fenomenleri olan kişilerin kendilerini takip eden kullanıcıları sürekli bir alışveriş yapmaya teşvik ettiği görülmektedir. Örneğin "şu veya bu ürün için .. linkine tıklayınız" gibi söylemleriyle insanları tüketime ve bununla beraber kendilerinde gösterdikleri gerek evi gerek kıyafetleri ve gerekse aile içindeki ilişkileriyle kendisini göstermesiyle de mahremiyetini hem beden hem bilgi hem de mekânsal olarak teşhir etmektedir.

Giddens, mahremiyeti bireyler arasında gelişen ilişkilerin bir sonucu olarak değerlendirmiştir. Mahremiyet kavramına yeni bir boyut kazandıran Giddens mahremiyeti; bireyin diğer bireyin özelliklerinin bilmesi sonucunda kendi özelliklerinin ortaya şeklinde açıklamıştır (Giddens, 2010: 89-123). Bu açıklamadan hareketle günümüzde mahremiyet, bireyin diğer insanlarla ve kendisiyle gerçekleştirdiği duygusal iletişim kurma şekli olarak değerlendirilir. Mahremiyet, kişiler arasında eşitlik bağlamında gerçekleşen duygusal ilişkiler ve etkileşimlerle belirlenir. Aile, arkadaşlar ve yakın ilişki kurulan kişiler arasındaki ilişkiler ve diyaloglar mahremiyetin alanını ve niteliğini belirler. Bu ilişkiler, duygusal ve özel alanını ifade eder. Günümüzde kişilerin duygusal iletişim, karşılıklı etkileşim ve diyalogları yerine getireceği mecralar sosyal platformlar olmuştur. Sosyal medyayla birlikte bireylerin sosyalliğini sağlayacağı alanları gerçek alanlardan dijital alanlara geçmiştir. Bu durum insanları tamamen gerçek ilişkilerden koparmıştır diyemeyeceğimiz gibi yapay ilişkilerin yokluğundan da bahsedilememektedir. İnsanların sosyalliği bu platformlardaki paylaşımlarına gelen etkileşimlerle ölçülür duruma gelmiştir.

Her gün yenileşen ve değişen toplum düzeninde dinamik bir yapıya sahip olan mahremiyet kavramı da kendi içinde değişmekte ve dönüşmektedir. Günümüzde mahremiyetin dönüşümüne şahit olmaktayız. Nitekim sosyal medyayla birlikte dönüşen mahremiyet, görme ve gösterme üzerine oluşturduğu yeni anlamlarla toplumsal yaşamda değişikliklere sebep olmuştur. Geçmişte güzel olanı saklamak marifetken bugün göstermek alkışlanır hale gelmiştir. Sosyal medyayla birlikte modern toplumda gizli olanın görünürlük kazanması mahremiyet algısında dönüşüme sebep olmuştur.

SONUÇ

Mahremiyet her insanın doğuştan sahip olduğu temel hak ve hürriyetlerdendir. Yaşama hakkı gibi ırk, cinsiyet, inanç, yaş gözetmeksizin sonradan değil doğuştan sahip olduğu bir haktır. İnsanın yaşamasına saygı duyulduğu gibi nasıl yaşayacağı konusunda da ona saygı duymak gerekmektedir. İnsanın mahrem alanlarından olan özel hayatına da bu doğrultuda saygı duymak gerekmektedir. Yukarıda belirttiğimiz üzere mahremiyet kavramı hem Türk Ceza Kanunu'nda hem de Avrupa İnsan Hakları Bildirgesi'nde korunması gereken bir alandır ve korunulmaması halinde cezai yaptırımları vardır. Modern hukukta anayasalarla, özel hukukta ilgili maddeler ve uluslararası sözleşmelerle koruma altına alınan bir kavramdır mahremiyet. İslam hukuku penceresinden bakmamız gerekirse mahremiyet hakkının temel kaynağı Kur'an ve sünnettir. Hem beşerî hükümler hem ilahi hükümler tarafından koruma altına alınan mahremiyet sosyal medyayla birlikte belirli sınırların dışına taştığı ve bu sınırların aşıldığı gözlemlenmektedir. Bu kapsamda mahremiyetin sosyal medya ve diğer kitle iletişim araçlarında daha sıkı bir şekilde korunmasına ihtiyaç vardır ve bunun için müşahhas bir sosyal medya bakanlığı oluşturulması gerekmektedir. Geleceğin mirası olan gençler için bu platformlarda geçirdikleri zamanları göz önünde bulundurduğumuzda sosyal medya üzerinde düzenlemeler oluşturacak bu kuruluşların kısa sürede büyük değişimleri de yanında getirecekleri ümit edilmektedir.

Mahremiyet kavramının görünmezlik ve bağımsızlık özellikleri olduğunu söyleyebiliriz. Sosyal medyanın hayatımıza girmesiyle birlikte en mahrem olanın bile görülebilir hale gelmeye başlamıştır ve bu durum bazı kişiler için bir sorun teşkil etmediği gözlemlenmektedir. Diğer yandan sosyal medyanın sosyalleşme işlevinden hareket ettiğimizde kişilerin gerçek hayatta hiçbir tanışıklığı olmamasına rağmen kendi hayatını, ailesini, giyimini kuşamın ve birçok şeyi onunla paylaşır hale geldiği gözlemlenmektedir. Toplumsal ilişkilerin ve etkileşimlerin günümüzde daha çok sosyal medya mecraları aracılığıyla yapıldığından hareketle kişiler arasındaki samimiyetten doğan sosyal ilişkiler günümüzde sadece şekilden ibaret hale gelen ilişkilere dönüşmüştür. Hamza Çakır (2018:12), sosyal medyayı tanımlarken Necip Fazıl'dan hareketle çift olarak tabir etmektedir. Meşhur şiirinde söylediği gibi: "Her şey akar; su, tarih, yıldız, insan ve fikir. Olukları çift, birinden nur diğerinden kir akıyor. Nur oluğu biraz yavaş akıyor. Sosyal meydanında olukları çift olumlu yanları yok mu? Muhakkak vardır fakat yavaş akmaktadır (Çakır, 2018:12).

Bu çalışmamız açısından şunları tavsiye etmekte fayda vardır. Sosyal medyanın nur oluğundan da fazla akması için sosyal medyanın nasıl doğru kullanılacağına dair eğitimlerin verilmesi önemlidir. Gerek ilköğretim gerekse lise kademelerinde seçmeli veya zorunlu seçmeli olarak sosyal medya okur yazarlığı dersiyle birlikte kişilerin nasıl bu platformları faydalı kullanacağına dair dersler verilmelidir. Bireylerde küçük yaşlardan itibaren mahremiyet bilincinin olduğu görülür. Kişilerde ki mahremiyet anlayışı ailesi, arkadaşları ve okul öğrenimiyle geliştiği gözlemlenmektedir. Çalışmamızı mahremiyet parametresi üzerinden ele aldığımız için çocukluk döneminde ailelerinden alacağı bu eğitimin zemini oluşturulmalıdır.

Mahremiyet kavramı dinin yanı sıra toplumsal, kültürel norm ve değerlerle, kabullerle şekillenen bir olgudur. Toplumun yaşadığı değişim ve dönüşüm mahremiyet algı ve kalıplarının da değişimine sebep olmaktadır. Hızla değişen toplum düzeni, teknolojik gelişmelerde toplumda mahremiyet algı ve kalıplarının da değiştirmektedir. Her gün dönüşen ve yenilenen

dünya düzeninde, sosyal medya mecralarının hayatımıza girmesiyle birlikte mahremiyet algısı da değişmiş ve dönüşmüştür.

Sosyal medyayla birlikte dönüşen mahremiyet algısı, sürekli bir değişim ve uyum sürecindedir. Bireylerin ve toplumun bu değişimlere adapte olması ve mahremiyetin korunması için aktif bir şekilde çalışması gerekmektedir. Bu sayede sosyal medyanın sağladığı faydaları ve iletişim imkanlarını kullanırken, kişisel mahremiyetimizi de koruyabilir ve dijital dünyada güvenli bir şekilde var olabiliriz.

İLETİŞİM ÖĞRENCİLERİNİN TOPLUMSAL CİNSİYET BAĞLAMINDA MEDYA İLETİLERİNİ ANALİZ ETME BECERİLERİ

Dr. Öğr. Üyesi Funda İNCE BAKİ
Sinop Üniversitesi
fundaince@sinop.edu.tr - 0000-0001-9959-2066

ÖZET

Toplumsal ve kültürel olarak biçilen rol ayrımlarını ifade eden toplumsal cinsiyet kavramı, kadına ve erkeğe dair özelliklerin, rollerin toplumsal ve kültürel faktörler dolayısıyla ayrıştığını belirtmektedir. Toplumsal yaşam içinde biçilen roller, cinsiyet farklılıklarının önemli belirleyicileridir. Cinsiyet rolleri ile kadının ve erkeğin toplum içerisinde nasıl konumlanacağı, daha yetişme sürecinde yerleşik hale gelmektedir. Tarihsel ve kültürel kodlara göre şekil alan kadın-erkek rolleri, tüm bunların dışında bilhassa medya eliyle pekiştirilmektedir. Peki Z kuşağı toplumsal cinsiyet kavramının ne olduğunun ve yerleşik hale gelen kültürel rollerin yerleşmesinde medyanın etkisinin ne kadar bilincindedir? sorusu üzerinden; Toplumsal Cinsiyet ve Medya dersini alan İletişim öğrencilerinin medya iletilerini analiz etme becerileri üzerine gerçekleştirilen çalışmaya 8 kız, 10 erkek olmak üzere 18 öğrenci katılım sağlamıştır.

14 hafta boyunca süren ders kapsamında toplumsal cinsiyet, feminizm gibi kavramlar üzerinde detaylı olarak durulurken, etki gücü en yüksek aygıtlardan biri olan medyanın içerik üretimi noktasında konuyla bağı ele alınmış, türlü örnekler üzerinden toplumsal cinsiyet konusu değerlendirilmiştir.

Dönem sonunda konuya dair alt yapı oluşturmuş olan öğrencilerin bilinçli birer medya okuru olarak medya iletilerini irdelemeleri ve analiz etmeleri talep edilmiştir. Medya iletilerinin toplumsal cinsiyet bağlamında değerlendirilmesi dışında öğrencilere herhangi bir sınır ya da kriter konulmamıştır. Çalışma sonucunda 18 öğrencinin her birinin farklı bir konuyu ele aldığı ve farklı yönleriyle irdelediği görülmüştür.

Öğrencilerden sadece medya içeriklerine dair değerlendirme istenilmiş olmasına rağmen, ödev konusu belirlerken bazı öğrencilerin toplumsal cinsiyet başlığına dikkat ettiği, fakat bunu medya içerikleri üzerinden irdeleme kısmını atlamış oldukları görülmüştür. Öğrenciler tarafından seçilen örneklerin bazılarının medya içerikleriyle bir ilgisi bulunmadığı saptanmıştır. Çalışma sonucunda, iletişim öğrencilerinin toplumsal cinsiyet bağlamında medya iletilerini nasıl ve ne yönde değerlendirdikleri ele alınarak, kavrama dair analiz becerileri irdelenmiştir.

Anahtar Kelimeler: Toplumsal Cinsiyet, Medya İletileri, Z Kuşağı.

1. GİRİŞ

Toplumsal cinsiyet, cinsiyet eşitsizliğini vurgulamaktadır ve cinsiyet eşitsizliği, diğer tüm eşitsizliklerin dışında değerlendirilmelidir. Hem iktidar yapısının, hem ekonomik sistemin, hem de kültürel kodların güdümünde tayin edilen toplumsal cinsiyet, kadını ve erkeği toplumsal yaşam içerisinde farklı noktalarda konumlandırmaktadır. Biyolojik farkların ötesinde bir yaklaşımın nihayetinde kadın ve erkek, eşitsiz ilişkilerin iki ayağını oluşturmaktadır.

Kadın ve erkek, tüm hayatın ortak şekillendiricileri olmalarına rağmen, ekonomik gücün eril zihniyetin elinde toplanmış olması dolayısıyla hayatta eşit bir ortaklık kuramamışlardır. Yasalar önünde eşitlik, sözde eşitlik olarak kalmaktadır.

Butler: "Toplumsal cinsiyet inşa edilmiş bir şeyse eğer farklı bir şekilde inşa edilebilir mi? Toplumsal cinsiyetin inşası nasıl ve nerede vuku bulur?" soruları üzerinden toplumsal cinsiyeti tanımlamaya çalışırken "Toplumsal cinsiyeti inşa eden kültür böyle bir yasa ya da yasalar dizisi üzerinden kavrandığında toplumsal cinsiyet eskiden biyoloji kaderdir formülasyonunda olduğu denli belirlenmiş ve sabitlenmiş oluveriyor, bu sefer biyoloji değil, kültür kader oluyor."[1] demektedir. Kadının zayıf bir fizyolojiye ve duygusal yapıya sahip olduğu gerekçesiyle toplumsal hayatta ikincil konuma itilmesi, aslında kültürel kodlamanın bu süreçte ne kadar önemli olduğunu göstermektedir.

Toplumsal cinsiyet kavramı, başlıbaşına fırsat eşitliğinin baltalayıcısıdır. Kadının geri bırakılmışlığı anatomiyle değil, ekonomik olarak güçsüz kılınmasıyla ilintilidir. Eşitlik, her alanda "ama'sız, çünkü'süz" bir şekilde kurulduğu takdirde yerini bulacaktır. Kadın, hayatın her alanında, her anında yer alabildiği takdirde fırsat eşitliğinden bahsetmek mümkün olacak ve özgürleşebilecektir.

İlkel çağlarda baba soyluluğu ana soyluluğun yerine geçiren devrimden daha önemli bir ideolojik devrim olmadığını belirten Beauvoir, böylece annenin besleyici ve hizmetkar konumuna düşürüldüğünü, babanın ise egemenliğinin yüceltildiğini ve tüm haklara sahip hale geldiğini vurgulamaktadır.[2] "Özel mülkiyetle birlikte tahtından indirilen kadının yazgısı, yüzyıllar boyunca özel mülkiyete bağlı olmuştur. Buna karşılık hiçbir şeye sahip olmadığı için bir kişi olması saygınlığına erişemez. Bizzat kendisi önce babasının, sonra kocasının olmak üzere erkeğin mallarının bir parçasıdır."[3] ifadesiyle Beauvoir, kadının mülkiyet hakkının olmamasının, onu özgürlükten ve eşitlikten yoksun kıldığının altını çizmektedir.

Berktay toplumsal cinsiyeti: "Belirli bir zamanda, belirli bir toplumda, cinsler için uygun olduğu varsayılan davranışların kültürel tanımı."[4] olarak tanımlamaktadır. Kadınlık ve erkekliğin birer kimlik değil, toplumsalın dokusunu ören tahakküm sistemlerinin tertibatları olduğunu ifade eden Bora: "Bu sistem içinde kadın olmak, her durumda sınırlanmış, erkek karşısında güçsüz kılınmış bir konumda olmak anlamına gelir."[5] demektedir.

"Toplumsal cinsiyet, biyolojik cinsiyetten farklı olarak toplumsal ve kültürel olarak belirlenen ve dolayısıyla içeriği toplumdan topluma olduğu kadar tarihsel olarak da değişebilen cinsiyet konumu ya da cins kimliğidir. Cinsler arasındaki eşitsiz güç ilişkilerini de belirtir."[6] ifadeleriyle toplumsal cinsiyetin anatomiye değil kültüre bağlı olarak belirlendiğini vurgulamaktadır Berktay. Goffman: "Toplumsal cinsiyet teşhirlerimizin kökenlerine ilişkin en önemli açıklama, elbette, biyolojiktir. Toplumsal cinsiyetin hayvani doğamızın bir uzantısı olduğu varsayılır; tıpkı hayvanların cinsiyetlerini dışa vurduğu gibi insanlar da dışa vurur: Her iki durumda da doğuştan gelen etmenlerin davranışları açıkladığı söylenir."[7] demektedir.

Direk ise toplumsal cinsiyete dair tanımlamayı şöyle yapmaktadır: "İktidar, kültür ve tarih aşırı bir biçimde, kadınlar ve erkekler arasında eşit olmayan bir biçimde dağılmıştır; burada bir asimetrinin varlığı aşikardır. Bu asimetriye çeşitli adlar vermek mümkündür: Eril tahakküm, kadınlara boyun eğdirilmesi, ataerkillik, sistemli kadın düşmanlığı, fallokrasi, kadınların ezilmesi, kadına karşı ayrımcılık, kadın düşmanlığı gibi... Bu asimetrinin diğer bir adı da toplumsal cinsiyettir."[8]

Toplumsal cinsiyet, sadece kadınlar ve erkekler için makul hal ve tutumları belirlemez, aynı zamanda bu iki cinsin arasında ayrışan bir güç ilişkisi de inşa eder. Erkeklerin ve kadınların, neyi yapıp neyi yapamayacağı, neye haklarının olup olmadığı kalın çizgilerle belirlenmiştir. Erkek, sokakta ve çalışma hayatında konumlandırılırken, kadın evin sınırları içinde ama çalışma hayatının dışında, ideal eş-anne olarak konumlandırılmıştır. Bu durumun karşılığında erkek, eve para getiren olarak tüm hayat üzerinde söz hakkına sahip olan otorite haline gelmiştir. Erkeğin ekonomik gücünün yanında, kadının ayakları üstünde durmak için uygun ve yeterli olmayan koşulları kadını erkeğe tabi kılmıştır.

Sancar: "Erkekler eril tahakkümü nasıl öğrenir? Eril tahakküm ne ölçüde babadan öğrenilen bir alışkanlıklar bütünüdür? Erkek üstünlüğüne dayalı bir toplumsal çevreye doğan biri erkek cinsiyet eşitliğini nasıl benimseyebilir? Bir erkeğin nasıl bir babanın çocuğu olduğu, onun eşitlikçi tutumlar benimsemesini ne ölçüde belirler/engeller? Cinsler arası ayrım ve eşitsizlik ne ölçüde aileden/babadan öğreniliyor?" gibi sorular üzerinden toplumsal cinsiyetin taşlarını döşeyen aşamaları ele almaktadır.[9]

Kadını erkeğe bağlı kılan koşul sadece ekonomik değildir elbette. Kadının çalışma hayatına dahil olması kadın ile erkek arasındaki eşitsiz ilişkiyi ortadan kaldırmaya yetmemektedir. Ekonomik koşulların yanı sıra tarihsel, kültürel ve toplumsal koşullar da cinsiyetin bir ayrışım sebebi olması üzerinde büyük etkiye sahip olan faktörlerdir. Geçmişten bugüne kadının temel önceliği eş ve anne olmak olarak kabul edilmiş, ettirilmiştir. Kadının hem iyi bir eş hem de kusursuz bir anne olmasının gerekliliği dikte edilmektedir.
Çakır: "Geleneksel tarih yazıcılığı erkeklerin yaşam pratiklerinden kaynaklanan olayları konu edinir, erkeklerin tarihsel deneyimleri üzerine odaklanır, özneyse erkektir. Bu tarih, kadınların yer almadığı savaşların, fetihlerin, elde edemediği kahramanlıkların, üyesi olamadığı parlamento, meclis gibi siyasi kurumların tarihidir. Tarih, olayların üzerine geliştiği zemin, bunların ortaya çıkmasını hazırlayan gerçek nedenler ve kişilerle ilgilenmez. Önemli olan alınan sonuçlardır. Sonucun ortaya çıktığı alan ise genelde kamusal alanın sınırları içindedir ve

bu sınırlar içinde tarihin öznelerinden biri olan kadın yoktur."[10] demektedir. Yaşanan tarih içerisinde kadının ne kadar büyük ve önemli bir yer kapladığı tarihi yazanların eril zihniyeti dolayısıyla göz ardı edilmiştir.

Kadın sadece ev içinde değil, toplumsal hayatın hemen her alanında ikincil bırakılmıştır. Erkeğin hükmetmeye, yönetmeye layık, kadının ise bu hükmün altında yaşamaya, yönetilmeye uygun olması kadının fiziksel, mental ve ruhsal özelliklerinin zayıflığının altı çizilerek temel düstur haline gelmiştir. Doğanın kanunu olarak belirtilen bu durum, kadının bu gücün altında ezilmesini ve eşitsizliği doğallaştırmaktadır. "Siyasal egemenliğin dili kadınları toplumsal olarak cinsiyetlendirdikçe, modernliğin kadınlara açtığı kamusal alanı kapatıp kadınları geleneksel rollerine hapsetmeye çalıştıkça daha çok kadın erkek şiddetinin hedefi oluyor."[11] ifadesiyle Direk çizilen rollerin, kalıpların birer norm haline gelmesiyle kadının hayatın değil ama her anlamda şiddetin öznesi haline geldiğinin altını çizmektedir.

Her ne kadar toplumsal cinsiyetin kökleşmesine karşı birtakım düzenlemeler, iyileştirmeler, pozitif yönde gelişmeler ve uygulamalar söz konusu olsa da bunlar kültürel kodların yıkılması için yeterli değildir, en azından fiiliyat yeterli olmadığını göstermektedir. Yazılı metinlerde yapılan iyileştirmeler, kadına yönelik eşitsiz yaklaşımların ortadan kalkması için tek başına yeterli gelmemektedir. Toplumsal zihniyetin değişebilmesi çok daha fazlasını gerektirmektedir. Hem aile içinde eşler ve kız-erkek çocuklar arasındaki eşit olmayan rol ve sorumluluklar, hem çalışma hayatında kadına gerektiği kadar yer açılmaması ve açılan yerin karşılığında da uygun olmayan çalışma koşullarının ortaya çıkması toplumsal cinsiyet olgusunun varlığını sürdürmesine neden olmaktadır.

Öz, bu durumu şöyle özetlemektedir: "Cumhuriyet'le birlikte toplumun yeniden yapılandırılmasının neticesinde, kadınların kamusal yaşama daha çok katılabilmesi için bazı yasal düzenlemelerle kadınlar okuma-yazma hakkı gibi bazı kazanımlar elde etmiş ve bu da kadın tarihinin yazılmasına katkıda bulunmuşsa da bu değişim kadınlar açısından gerçek bir özgürlüğü beraberinde getirmemiştir. Kağıt üzerinde hakların var olması ile bu hakların toplumsal yaşamda fiilen karşılığını bulmasının eş zamanlı olmaması ve toplumun yeniden yapılandırılışının da esasen kadın özgürlüğü gibi bir hedefle yola çıkmamasını bunun ana nedenleri olarak sayabiliriz. Zira toplumun yeniden yapılandırılışı ağırlıkla asker elit bir tabaka tarafından gerçekleştirilmeye çalışıldığı için topluma yeniden biçilen elbise de eril-militarist-elit olmaktan kurtulamamıştır. Geleneği zaten savaş, yağma, erlikten gelen ve savaş kültürü ile ataerkilliği fazlasıyla iç içe geçirmiş bir kültürün dönüşüm projesi de fazlasıyla ataerkil ve militarist bakış kadınlara özgürlük getirdiği iddiasında olmasına rağmen, kadına getirdiği özgürlük, ataerki ve militarizme ölesiye sadık, vatana, uğruna ölmeye her an hazır iyi evlatlar yetiştiren annelik kalıplarıyla sınırlıdır."[12] Yani, kadın anne olmanın ötesinde tahayyül edilmezken, mevcut yapı da ailenin kutsallığı üzerine şekillenmiştir.

Mutluer: "Toplumsal cinsiyeti tartışmak; aynı zamanda cinsiyet, cinsellik, beden, norm ve yasağı da belli bir zaman, coğrafya ve etnisite, sınıf, yaş gibi özellikler bağlamında

[10] Serpil Çakır, Osmanlı Kadın Hareketi, Metis Yayınları, İstanbul, 2020, s. 30.

[11] Zeynep Direk, a.g.e., s. 21-22.

[12] Nil Mutluer (Der.), Cinsiyet Halleri-Türkiye'de Toplumsal Cinsiyetin Kesişim Sınırları "Görünmezlik Kıskacında Lezbiyenler / Yasemin Öz", Varlık Yayınları, İstanbul, 2020, s.199.

tartışmaktır."[13] demekte ve toplumsal cinsiyetin, coğrafyadan, kültürel fotoğrafından, politik ikliminden ve iktidar mekanizmalarından bağımsız düşünülemeyeceğinin[14] altını çizmektedir.

Halihazırda tarihe bakıldığında, insanın çok çeşitli sebeplerle dışlanmışlığı, ötekileştirilmişliği sık görülen ve hatta olağan görülen bir durumken, cinsiyet dolayısıyla yaşanan eşitsizlikler, ikincil kılınma sadece kadının maruz kaldığı bir durumdur. Kadın ve erkek kimliğinin biyolojinin dışında toplumsal olarak kurgulandığı aşikar olmakla birlikte tüm bu kurgunun coğrafyaya, zamana, kültürel altyapıya göre kim ya da kimler tarafından tayin edilmiş olduğu değişikliğe uğramaktadır ama ortak olan nokta ise bu belirleyici otoritenin eril zihniyeti temsil ettiğidir. Hemen her coğrafyada cinsiyet rolleri farklı şekillerde belirlenmiştir. Kadınları kendi yerlerinde tutmaya yarayan bütün mekanizmalar içinde en etkili olanın, bu yerin kendilerinin iyiliği için tasarlanmış olduğunu öne süren görüş olduğunu ve böylelikle de bağımlı bir grubun kendi bağımlılığını içselleştirmesinin mümkün olduğunu[15] vurgulayan Berktay, kadının bedeni, erkeğin de zihni ve cinsel olanı temsil ettiğini[16] ifade etmektedir.

Kadınlar ile erkekler arasındaki eşitsiz güç ilişkileri, ataerkil sistemi daha da güçlendirmektedir. Hemen her açıdan kadından üstün sayılan erkek, bu üstünlük ayrıcalığıyla kadın üzerinde kontrol sağlama hakkını da ele geçirmektedir. Beden ve beraberinde toplumsal roller, kültürün taşıyıcılarıdır. "Bir zamanlar her şeyin yaratıcısı olan toprak ve kadın bedeni, sonradan yalnızca erkeğin can veren tohumunu taşımaya yarayan bir araca dönüştürülür. Kadın artık yaşamın kaynağı cömert ve bereketli toprak değil, erkeğin yarattığı canı içinde tutup büyüten bir taşıyıcıdan ibarettir."[17] demektedir Berktay.

Kandiyoti: "Toplumsal kurumlar tekil bir ataerkil mantığı yansıtmazlar, tersine her biri toplumsal cinsiyet hiyerarşilerinin hem yaratıldığı hem de sorgulandığı siyasal süreçlerin ve iktidar ilişkilerinin alanıdırlar."[18] demektedir. Cinsiyetlendirilmiş toplumsal ilişkiler, henüz yetişme sürecinde çocuklukta yerleştirilen kültürel kodlarla oluşmaktadır. Kız ve erkek çocuklarının birbirlerinden farklılaştırılmış yetiştirilme, eğitilme, fırsat sunulma süreçleri toplumsal cinsiyeti inşa etmektedir. Çalışma hayatında var olmak, erkeğin toplumsal hayattaki gücünü vurgulayan temel dinamiklerin başında gelmektedir.
Sancar: "Erkeklik dünya çapında iktidarı elde tutanların bir özelliği olduğuna göre, genel evrensel bir erkeklik tanımı yapılabilir mi?"[19] gibi haklı bir soru sormakta ve soruya karşılık iktidarı elinde tutan erkeklerin sahip olduğu erkeklik imgesine işaret eden hegemonik erkeklik tanımlaması yapmaktadır: "Hegemonik erkeklik en genel anlamıyla, bir kavram olarak tartışmaların merkezine oturdu. Genç, kentli, beyaz, heteroseksüel, makul ölçülerde dindar,

spor dallarında en azından birisini başarılı olarak yapabilecek düzeyde aktif bedensel performansa sahip erkeklerin temsil ettiği erkeklik."[20]

Erkeğin çalışma hayatında, kadının ise ev içinde konumlandırılmış olması erkeği ailenin reisi statüsüne yükseltmiştir. Çalışma yaşamının erkek egemen bir yaklaşıma sahip olduğu aşikardır. Hooks: "Bugün çalışmanın kadınları erkek tahakkümünden kurtarmadığını biliyoruz. Ancak bu durum kadının özgürleşmesi için ekonomik anlamda kendine yeterli hale gelmesinin gerekli olduğu gerçekliğini değiştirmiyor. Bizi nasıl bir çalışma şeklinin özgürleştireceğinden bahsetmeliyiz. Genel olarak daha yüksek ücretle, çalışma saatleri rahat olan işlerin çalışana en yüksek derecede özgürlük sunduğu açıktır."[21] sözleriyle sadece çalışmanın kadını erkekle eşit kılmaya yetmediğinin, bu noktada çalışma koşullarının niteliğinin önem arz ettiğinin altını çizmektedir.

Sancar, biyolojik cinsiyetten başka bir toplumsal cinsiyetin ortaya çıkma nedeninin iktidar ilişkilerini denetiminde tutanların maddi çıkarları olduğunu vurgulamaktadır.[22] Bu durumun nedenlerini; aile yapısı, kadının doğurganlığı-anneliği, kadının görünmeyen emeğinde aramak gerekmektedir.

Donovan: "17. ve 18. yüzyıllar boyunca öncesinde ve sonrasında kadının eş ve anne olarak evine ait olduğu varsayımı neredeyse evrenseldi. 18. yüzyılın ortasından itibaren ve özellikle 19. yüzyılın başında yaşanan tarihsel dönüşümler, başta sanayi devrimi kadını özel alanda tecrit ederek iş yeri ile ev mekanını birbirinden ayırdı. Fabrikaların makineleşmesi ve küçük ev sanayinin çöküşü ile birlikte işin kamusal dünyası ile evin özel dünyası daha önce hiç olmadığı kadar birbirinden ayrıldı. Bu gibi gelişmeler akılcılığı kamusal alanda, akıldışılığı ve ahlakı özel alanla ve kadınla özdeşleştiren aydınlanma düşüncesini desteklemiştir. Kadının kocasının himayesi altında, aileye ait olduğu fikri tüm liberal erkek kuramcıların ortak düşüncesiydi."[23] demektedir.

Medyanın, mevcut toplumsal cinsiyet normlarının ve rollerinin oluşumunda çok büyük bir gücü vardır. Medyanın, toplumsal cinsiyet rollerini kurma sürecinde, toplumun kadın ve erkeğe yönelik bakış açısını belirlemede etkisi tartışılmazdır. Erkeğin hayatın temel dinamiklerine dair belirleyici güce sahip olması, cinsiyet eşitsizliklerinin kökenini oluşturmaktadır. Medya, altını çizdiği kodlarla toplumsal yaşamın kodlarını da pekiştirmektedir. Çakır: "Osmanlı kadınının konumu modernleşmeye paralel olarak değişmeye başlayacaktır. Tüm bu değişimler o zamana dek yalnızca ev içinde anne ve eş rolleri ile sınırlanmış olan kadına da yansımış, kadın toplumsal yaşamda farklı bir statü kazanmak amacıyla taleplerde bulunmaya başlamıştır. Bu konudaki en etkin rol basının olmuştur. Kadınların kendilerini ifade etmeleri, tanıtmaları ilk kez basın kanalıyla gerçekleşmiştir."[24] Özellikle kadın dergileri aracılığıyla sesini duyurmaya, varlığını göstermeye başlamış olan kadın için medya artık ikincil konumunu pekiştirme aracı haline gelmiştir. Kültürün belirlediği kadın-erkek ilişkilerini, cinsiyet kodlarını medya sunduğu içeriklerle pekiştirmektedir.

2. Yöntem

2.1. Araştırmanın Evreni

Toplumsal Cinsiyet ve Medya dersini alan İletişim öğrencilerinin medya iletilerini analiz etme becerileri üzerine gerçekleştirilen çalışmaya 8 kız, 10 erkek olmak üzere 18 öğrenci, 16 çalışmayla katılım sağlamıştır. 14 hafta boyunca süren ders kapsamında toplumsal cinsiyet, feminizm gibi kavramlar üzerinde detaylı olarak durulurken, etki gücü en yüksek aygıtlardan biri olan medyanın içerik üretimi noktasında konuyla bağı ele alınmış, türlü örnekler üzerinden toplumsal cinsiyet konusu değerlendirilmiştir.

Dönem sonunda konuya dair alt yapı oluşturmuş olan öğrencilerin bilinçli birer medya okuru olarak medya iletilerini irdelemeleri ve analiz etmeleri talep edilmiştir. Medya iletilerinin toplumsal cinsiyet bağlamında değerlendirilmesi dışında öğrencilere herhangi bir sınır ya da kriter konulmamıştır. Çalışma sonucunda, 18 öğrencinin her birinin farklı bir konuyu ele aldığı ve farklı yönleriyle irdelediği görülmüştür.

Öğrencilerden sadece medya içeriklerine dair değerlendirme istenilmiş olmasına rağmen, ödev konusu belirlerken bazı öğrencilerin toplumsal cinsiyet başlığına dikkat ettiği, fakat bunu medya içerikleri üzerinden irdeleme kısmını atlamış oldukları görülmüştür. Öğrenciler tarafından seçilen örneklerin bazılarının medya içerikleriyle bir ilgisinin bulunmadığı saptanmıştır. Çalışma sonucunda, iletişim öğrencilerinin toplumsal cinsiyet bağlamında medya iletilerini nasıl ve ne yönde değerlendirdikleri ele alınarak, kavrama dair analiz becerileri irdelenmiştir.

2.2. Verilerin Analizi

Toplanan veriler Maxqda nitel analiz programı üzerinden analiz edilmiştir.

2.3. Bulgular

Popüler isimlerin medyada yansımaları: 1	
Kadın Sporcuların Med. Yansımaları: 2	
Bilimde ve Medyada Kadın: 1	
Eğitimde ve Medyada Cinsiyet Eşitsizliği:1	
Ebeveynlik Algısı ve Medyada Yansımaları: 1	

Çalışma kapsamında temel amaç, medyanın ürettiği formatlar ve içeriklerle cinsiyet eşitsizliklerini nasıl ve ne yönde derinleştirdiğine dair farkındalık oluşturmak olmasına rağmen, öğrencilerin üçte birinin hem konu seçimleri hem de seçtikleri konuları ele alış biçimleri, meseleye detaylı olarak bakamadıklarını ve medyanın bu noktadaki tavrını yakalayamadıklarını, yani bilinçli bir medya okuru gibi içerik okuma yapamadıklarını göstermiştir.

İlk çalışmada, 1 kız 1 erkek olmak üzere iki öğrenci tarafından, "Eğitim-Sen'in 10 Mart 2025'te okullarda toplumsal cinsiyet eşitliği konusunda farkındalık yaratmak amacıyla bir ders düzenlemeyi planlamasına karşılık, bu girişime Bakanlık tarafından müsaade edilmemesi" konu başlığı olarak ele alınmıştır. Tercih edilen konu başlığı her ne kadar toplumsal cinsiyet kavramının köklü bir yer edinmesine dair önemli bir noktayı ele alıyorsa da bir medya içeriği değildir.

İkinci çalışmada, bir erkek öğrenci tarafından "KİHEP – Kadının İnsan Hakları Eğitim Programı" konu başlığı olarak ele alınmış, çalışmada, KİHEP'in kadınlar için neden ve ne yönde etkili olduğu detaylı olarak anlatılmış ama konunun medyayla bir ilişkisi kurulmamıştır.

Üçüncü çalışmada, bir kız öğrenci tarafından "Dilberay" Filmi konu başlığı olarak seçilmiş ve film özelinde kadın kimliği üzerinden toplumun dayattığı rollere dikkat çekilmiştir.

Dördüncü çalışmada, bir erkek öğrenci tarafından "Toplumsal cinsiyet ve sporda kadınların görünürlüğü" konu başlığı üzerinden toplumsal cinsiyet eşitsizliğinin en görünür olduğu alanlardan biri olan spor dünyasındaki eşitsiz süreç kadın Türk voleybolcular, Arda Güler ve Fenerbahçe Kadın Basketbol Takımı örnekleri üzerinden ele alınmıştır. Sporda kadınların nasıl daha az değer gördüğü ve bu durumun medya eliyle de güçlendirildiği vurgulanmıştır.

Beşinci çalışmada, bir erkek öğrenci tarafından "Avatar: Son Hava Bükücü" animasyon dizisi konu olarak seçilmiştir. Toplumsal cinsiyet rollerinin henüz çocuklukta yerleşmesi ve bu yaşlarda en etkili unsurlardan birinin çizgi filmler olması dolayısıyla seçilen dizi üzerinden çocuklara yönelik bir yapımda cinsiyet rollerinin nasıl ele alındığı irdelenmiştir.

Altıncı çalışmada, bir erkek öğrenci tarafından "Eğitimde Cinsiyet Eşitsizliği Raporu" ve medyada cinsiyet eşitsizliğinin yansımaları" ele alınmış ve medyanın toplumsal cinsiyet eşitsizliğini hem yansıtmakta hem de pekiştirmekte olduğu vurgulanmıştır. Kadınların medyada çoğunlukla klişe rollerle (ev hanımı, anne, güzellik nesnesi) temsil edildiği, özellikle televizyon dizileri ve reklamlar aracılığıyla geleneksel cinsiyet rollerinin yeniden üretildiği üzerinde

durulmuştur. Eğitimle ilgili haberlerde, kız çocuklarının başarılarının ikinci planda kaldığı ya da olağanüstü gibi sunulduğu ifade edilmiştir.

Yedinci çalışmada, bir erkek öğrenci tarafından "Oyunlarda Cinsiyet Eşitliği" konusu seçilmiş, dijital oyunlarda erkek egemen bir yapının hakim olduğu, kadın oyuncuların çoğunlukla aşağılandığı, hakarete uğradığı ve oyun koşullarının cinsiyet dolayısıyla eşit işlemediği vurgulanmıştır. Sadece keyif amaçlı oynanan dijital oyunlarda dahi yerleşmiş cinsiyetçi anlayışın etkileri görülmektedir.

Sekizinci çalışmada, bir kız öğrenci tarafından "Agora" filmi seçilmiş ve filmin ana karakteri Hypatia'nın hikayesi üzerinden, bilimsel düşüncenin ve kadınların susturulmasına karşı güçlü bir duruşun önemi irdelenmiştir.

Dokuzuncu çalışmada, iki kız öğrenci tarafından "Sporda Cinsiyetçilik" konusu ele alınmış ve erkek merkezli spor dünyasının adaletsizliğini vurgulamak amaçlanmıştır. Erkeklerin daha çok desteklenmesinin, daha çok görünür olmasının sadece onların yetenekli olmasıyla ilgili değil, sistemin onlara tanıdığı alanla ilgili olduğunun altı çizilmiştir.

Onuncu çalışmada, bir erkek öğrenci tarafından "Reklamlarda Kadınların Daha Sık Kullanılması: Satış ve İlgi Çekme Aracı Olarak Kadın Bedeni" konu başlığı üzerinden kadınların reklamlarda daha sık kullanılmasının yalnızca ürün tanıtımı değil, aynı zamanda toplumsal algıların yeniden üretimi açısından da dikkat çekici olduğu, reklam sektöründe kadın figürünün daha fazla tercih edilmesinin temel sebeplerinden birinin toplumda yerleşik olan "kadın dikkat çeker" algısı olduğu vurgulanmıştır.

On birinci çalışmada, bir erkek öğrenci tarafından "Kadın ve Erkek Futbolundaki Eşitsizlikler" konu başlığı üzerinden, Türkiye'de kadın ve erkek futbolu arasında maaşlardan, medyada görünürlüğe, altyapıdan toplumsal algıya kadar birçok alanda ciddi eşitsizlikler bulunduğu ifade edilmiştir.

On ikinci çalışmada, bir erkek öğrenci tarafından "Türkiye'de Kadın Ünlülere Yönelik Muamele: Başarıdan Çok Söylem Üzerine Bir İnşa" başlığı altında, Türkiye'de kadın ünlülerin kamuoyunda maruz kaldığı muamelenin yalnızca bireysel değil, yapısal ve kültürel bir mesele olduğu, kadınların sanat, spor veya medya gibi alanlarda elde ettikleri başarıların çoğu zaman ikinci plana atıldığı, kadınların dış görünümleri, özel hayatları ya da cinsel kimlikleri ile ön plana çıkarıldıkları ve yoğun bir toplumsal denetime maruz kaldıkları ve bu durumun da Türkiye'deki toplumsal cinsiyet eşitsizliğinin en görünür noktalarından biri olduğu, Aleyna Tilki, Hadise ve Ebrar Karakurt gibi isimler popüler örnekler üzerinden değerlendirilmiştir.

On üçüncü çalışmada, bir kız öğrenci tarafından "Toplumsal Cinsiyet Rollerinde Ebeveynlik Algısı" başlığı altında, toplumsal cinsiyet rollerinin ebeveynlik üzerindeki etkileri incelenirken, toplumun anneler ve babalar üzerindeki beklentileri, tüm bu beklentilerin medyadaki yansımaları ve sosyal algı değerlendirilmiştir. Çalışmada, ebeveynlik sorumluluklarının toplumsal cinsiyete göre nasıl farklılaştığı örneklerle açıklanmıştır.

On dördüncü çalışmada, bir erkek öğrenci tarafından "Aile Dizisinde Toplumsal Cinsiyet Rolleri ve Kadın Temsilleri" konu başlığı üzerinden yayınlandığı dönemde en çok reyting alan dizilerden biri üzerinden kadın-erkek ilişkileri, kadın ve erkeğin toplumsal konumları ve aile içi dinamiklerin adaletsizliği, erkeğin gücü elinde tutan ve yöneten iken, kadının yönetilmeye mahkum olması gibi noktalar üzerinde durulmuştur. Aslında sadece belirtilen örnekte değil, ana

akımda yayınlanan çok izleyicili birçok dizinin kadını ve erkeği konumlandırış biçimi çok benzerdir.

On beşinci çalışmada, bir erkek öğrenci tarafından "Dijital Oyunlarda Kadın Oyunculara Yönelik Ayrımcı Tavırlar" konusu seçilmiş ve dijital oyun alanının eril bir dile ve zihniyete sahip olduğu, kadının bu alanda da ikincil konuma itildiği, "istenmeyen, yetersiz kişi" olarak kabul edildiği üzerinde durulmuştur.

On altıncı çalışmada, bir kız öğrenci tarafından "Kadınların Bilimdeki Yeri, Cinsiyet Ayrımcılığı ve Medyada Yansımaları" konu başlığı tercih edilmiş, bilim alanında kadının yeteri ve gerektiği kadar yer bulamadığı, değer görmediği vurgulanırken, halihazırdaki çabaların, başarıların da öncelikle medya tarafından göz ardı edildiği, erkeğe ait olan her adım haddinden fazla yüceltilirken, kadının görünmez kılındığının altı çizilmiştir.

Genel sonuç göstermektedir ki toplumsal cinsiyet ve medya dersini almak, iletişim öğrencilerinin toplumsal cinsiyete dair temel ve doğru bir bakış açısı geliştirmeleri üzerinde büyük bir etkiye sahip olmakla birlikte, hem toplumsal hayatın hem de medyanın oluşturduğu ve pekiştirdiği çerçeve itibarıyla bilinçli bir okuma yapabilmelerine olanak sağlamıştır. Öğrencilerin üçte ikisi toplumsal cinsiyet konusunu hem toplumsal çerçevede hem de medyada yansımaları itibarıyla ele alırken, geri kalan kısım ise konuyu doğru ve çarpıcı yönleriyle ele alırken, medyayla ilgi noktasına dikkat göstermemişlerdir. Çalışmalarda vurgulanan temalar; toplumsal farkındalık, toplumsal cinsiyet rolleri, ataerkil yapı, görünürlük, cinsiyet temelli eşitsizlikler" gibi noktalardan oluşurken, bu temalar altında birbiriyle ilintili çok çeşitli kod ortaya çıkmıştır. Tüm bunlar ışığında; toplumsal farkındalığın geliştirilebilmesi için öncelikle kadınların haklarını ve halihazırdaki fırsatları öğrenmesi gerektiği, kadına yüklenen "ev hanımı, eş, anne, güzellik nesnesi" gibi kültürel klişe toplumsal cinsiyet rollerinin çocukluktan itibaren yerleştiği, medya içerikleri eliyle de pekiştirildiği, ataerkil yapının eşitsiz güç ilişkileri üzerine inşa olurken kadını nesne haline getirerek aynı zamanda ikincil planda bıraktığı, namus kisvesi altında da erkek şiddetini meşrulaştırdığı vurgulanmaktadır. Kadının sosyal alanda görünürlük kazanması ancak kadınsı tarafını kullandığında mümkün görünmekte, birçok alanda kadının görünürlüğü erkekten sonra ve değersizleştirilerek gelmektedir. Hemen her alandaki kadının görünmezliği medya eliyle daha da derinleştirilmektedir. Tüm bunların yanı sıra cinsiyet temelli eşitsizlikler, önce aile içi dinamiklerde, ardından da bilhassa çalışma hayatında baş göstermektedir. Kadının hem fiziksel hem mental hem de ruhsal olarak yetersiz ve zayıf olarak kabul edilmesi ve ettirilmesi kadını çalışma hayatında birçok olanaktan mahrum kılmakta, hatta temel haklarından bile yoksun kalmasına sebep olmaktadır.

Çizelge 3. Çalışmalara Göre Cinsiyet Dağılımı

	Medyayla İlgili Çalışmalar	Medyayla İlgili Olmayan Çalışmalar
Kız Öğrenci	**5**	**3**
Erkek Öğrenci	**6**	**4**

Toplamda 18 öğrencinin katıldığı çalışmaya, dört öğrenci ikişer kişilik gruplar halinde katılmış, 11 örnek medyayla ilintili tercihlerden oluşurken, 5 örnek medyayla ilgili olmayan dijital

oyunlarda cinsiyetçilik, kadınlara yönelik sosyal ve yasal çalışmalar, spor dünyasında erkek egemen zihniyet gibi konulardan oluşmaktadır.

Seçilen konu başlıklarına ve bu başlıkların medyayla ilişkisine bakıldığında öğrencilerin cinsiyet dağılımları arasında belirgin bir fark görülmemiştir. Bu durum da göstermektedir ki bir konuya dair alınan eğitimler ve çalışmalar vasıtasıyla bilinç geliştirebilmiş, farkındalık kazanabilmiş olmak erkek ya da kadın fark etmeksizin konuya yaklaşımı pozitif anlamda ortak kılmaktadır.

Çizelge 4. Çalışmalarda Değinilen Temalar

Temalar	**Toplumsal Farkındalık**	**Top. Cinsiyet Rolleri**	**Ataerkil yapı**	**Görünürlük**	**Cinsiyet Temelli Eşitsizlikler**
Kodlar	Kadın Haklarının Öğrenilmesi	Toplumsal Normlar	Eşitsiz Güç İlişkileri	Sporda Kadınların Görünürlüğü	Medyada Cinsiyet Eşitsizliği
	Fırsatlar/Haklar	Çocuklukta Aktarılan Cin. Rolleri	Erkek Şiddeti	Medyada Görünürlük	Eğitimde Cinsiyet Eşitsizliği
		Dizilerle Pekiştirilen Cin. Rolleri	İkincil Planda Bırakılmak	Dijital Oyunlarda Cinsiyetçilik	Maaş Eşitsizlikleri
		Klişe Roller (Ev hanımı, Eş, Anne, Güzellik Nesnesi)	Namus	Erkek Egemen Dijital Oyun Sektörü	
		Kültürel kodlar	Kadınlık-Erkeklik Kalıpları		
		Ebeveynlik Rolleri	Değersizleştirilme Kadının Nesneleştirilmesi		
			Erkek Egemen Dünya		
			Kadınlara		

			Yönelik Önyargılar		

Çizelge 5. Temaların Yoğunluk Dağılımı

	Bölümler	Yüzde
ataerkil yapı	22	27,50
görünürlük	20	25,00
toplumsal cinsiyet rolleri	13	16,25
toplumsal farkındalık	13	16,25
cinsiyet temelli eşitsizlikler	11	13,75
kadının nesneleştirilmesi	1	1,25
TOPLAM	80	100,00

Örnekler kapsamında; en çok ataerkil yapı vurgulaması yapılırken, kadının görünürlüğünün yetersizliği ve değersizleştirilmesi, toplumsal cinsiyet rollerinin kültürel olarak nasıl yerleşik hale geldiği, toplumsal farkındalığın yoğunluklu olarak hakların ve fırsatların farkına varılarak sağlanabileceği, cinsiyet temelli eşitsizliklerin anatomi gerekçe gösterilerek haklı kılınmaya çalışıldığı ama aslında kültürel olarak kabul ettirilen noktaların çokluğu, tüm bunların yanı sıra da kadının hem ailede, hem sosyal hayatta hem de çalışma hayatında özne konumunu bir türlü kazanamadığı, nesne kalmaya mahkum bırakıldığı gibi noktalar hemen her çalışmada detaylı bir şekilde üzerinde durulan konulardır.

Görsel 1. Çalışmalara Dair Yoğunluk Taşıyan Kod Bulutu

Görsel 2. Çalışmalara Dair Yoğunluk Taşıyan Kelime Bulutu

3. SONUÇ

Toplumsal ve kültürel olarak biçilen rol ayrımlarını ifade eden toplumsal cinsiyet kavramı, kadına ve erkeğe dair özelliklerin, rollerin toplumsal ve kültürel faktörler dolayısıyla ayrıştığını belirtmektedir. Tarihsel ve kültürel kodlara göre şekil alan ve medya eliyle de pekiştirilen kadınlık-erkeklik rolleri üzerine Z kuşağının bakış açısını ölçmek, toplumsal cinsiyet kavramının ne olduğunun ve yerleşik hale gelen kültürel rollerin yerleşmesinde medyanın etkisinin ne kadar bilincinde olduklarını irdelemek üzerine gerçekleştirilen çalışmaya 8 kız, 10 erkek olmak üzere 18 öğrenci katılım sağlarken, çalışma sonucunda 18 öğrencinin her birinin farklı bir konuyu ele aldığı ve farklı yönleriyle irdelediği görülmüştür.

Öğrencilerden sadece medya içeriklerine dair değerlendirme istenilmiş olmasına rağmen, konu başlığı belirlerken bazı öğrencilerin toplumsal cinsiyet başlığına dikkat ettiği, fakat bunu medya içerikleri üzerinden irdeleme kısmını atlamış oldukları görülmüştür. Öğrenciler tarafından seçilen örneklerin bazılarının medya içerikleriyle bir ilgisi bulunmadığı saptanmıştır. Toplumsal cinsiyet bağlamında medya iletilerini değerlendirmeleri istenilen İletişim öğrencileri, konu seçiminde ve akabinde değerlendirme sürecinde toplumsal cinsiyet konusuna odaklanmış, ama bunu yaparken bazıları sadece medya iletilerini ele almamış, farklı konu başlıkları üzerinden toplumsal cinsiyet konusunu değerlendirmiş ve bunu yaparken konunun medyayla ilgisine dikkat etmeyi atlamışlardır.

Çalışma kapsamında temel amaç, medyanın ürettiği formatlar ve içeriklerle cinsiyet eşitsizliklerini nasıl ve ne yönde derinleştirdiğine dair farkındalık oluşturmak olmasına rağmen, öğrencilerin üçte birinin hem konu seçimleri hem de seçtikleri konuları ele alış biçimleri, meseleye detaylı olarak bakamadıklarını ve medyanın bu noktadaki tavrını

yakalayamadıklarını, yani bilinçli bir medya okuru gibi içerik okuma yapamadıklarını göstermiştir.

Genel sonuç göstermektedir ki toplumsal cinsiyet ve medya dersini almak, iletişim öğrencilerinin toplumsal cinsiyete dair temel ve doğru bir bakış açısı geliştirmeleri üzerinde büyük bir etkiye sahip olmakla birlikte, hem toplumsal hayatın hem de medyanın oluşturduğu ve pekiştirdiği çerçeve itibarıyla bilinçli bir okuma yapabilmelerine olanak sağlamıştır. Öğrencilerin üçte ikisi toplumsal cinsiyet konusunu hem toplumsal çerçevede hem de medyada yansımaları itibarıyla ele alırken, geri kalan kısım ise konuyu doğru ve çarpıcı yönleriyle ele alırken, medyayla ilgi noktasına dikkat göstermemişlerdir. Tüm bunlar ışığında; toplumsal farkındalığın geliştirilebilmesi için öncelikle kadınların haklarını ve halihazırdaki fırsatları öğrenmesi gerektiği, kadına yüklenen "ev hanımı, eş, anne, güzellik nesnesi" gibi kültürel klişe toplumsal cinsiyet rollerinin çocukluktan itibaren yerleştiği, medya içerikleri eliyle de pekiştirildiği, ataerkil yapının eşitsiz güç ilişkileri üzerine inşa olurken kadını nesne haline getirerek aynı zamanda ikincil planda bıraktığı, namus kisvesi altında da erkek şiddetini meşrulaştırdığı vurgulanmaktadır. Kadının sosyal alanda görünürlük kazanması ancak kadınsı tarafını kullandığında mümkün görünmekte, birçok alanda kadının görünürlüğü erkekten sonra ve değersizleştirilerek gelmektedir. Hemen her alandaki kadının görünmezliği medya eliyle daha da derinleştirilmektedir. Tüm bunların yanı sıra cinsiyet temelli eşitsizlikler, önce aile içi dinamiklerde, ardından da bilhassa çalışma hayatında baş göstermektedir. Kadının hem fiziksel hem mental hem de ruhsal olarak yetersiz ve zayıf olarak kabul edilmesi ve ettirilmesi kadını çalışma hayatında birçok olanaktan mahrum kılmakta, hatta temel haklarından bile yoksun kalmasına sebep olmaktadır.

Örnekler kapsamında; en çok ataerkil yapı vurgulaması yapılırken, kadının görünürlüğünün yetersizliği ve değersizleştirilmesi, toplumsal cinsiyet rollerinin kültürel olarak nasıl yerleşik hale geldiği, toplumsal farkındalığın yoğunluklu olarak hakların ve fırsatların farkına varılarak sağlanabileceği, cinsiyet temelli eşitsizliklerin anatomi gerekçe gösterilerek haklı kılınmaya çalışıldığı ama aslında kültürel olarak kabul ettirilen noktaların çokluğu, tüm bunların yanı sıra da kadının hem ailede, hem sosyal hayatta hem de çalışma hayatında özne konumunu bir türlü kazanamadığı, nesne kalmaya mahkum bırakıldığı gibi noktalar hemen her çalışmada detaylı bir şekilde üzerinde durulan konulardır.

Seçilen konu başlıklarına ve bu başlıkların medyayla ilişkisine bakıldığında öğrencilerin cinsiyet dağılımları arasında belirgin bir fark görülmemiştir. Bu durum da göstermektedir ki bir konuya dair alınan eğitimler ve çalışmalar vasıtasıyla bilinç geliştirebilmiş, farkındalık kazanabilmiş olmak erkek ya da kadın fark etmeksizin konuya yaklaşımı pozitif anlamda ortak kılmaktadır. Yani, yürütülecek akademik çalışmalarla, eğitimlerle, yasal düzenlemelerle ve daha atılabilecek birçok adımla cinsiyet temelli eşitsizliklere karşı mücadele yürütmek ve sürece dair kazanımlar elde etmek mümkündür.

Z KUŞAĞINDA GÖSTERİŞÇİ TÜKETİM: OLUMSUZ DEĞERLENDİRİLME KORKUSUNUN VE KİŞİLERARASI ETKİLERE KARŞI TÜKETİCİ DUYARLILIĞININ ROLÜ

Dr. Öğretim. Üyesi İsmail Gökhan CİNTAMÜR

İstanbul Bilgi Üniversitesi, İletişim Fakültesi

gokhan.cintamur@bilgi.edu.tr-0000-0002-9371-0188

ÖZET

Diğer kuşaklar ile karşılaştırıldığında, özellikle kendinden hemen önce gelen Y kuşağı ile bile ciddi farklılıklar taşıdığı ifade edilen Z kuşağı hem bugünün hem de gelecek on yılların tüketim davranışlarının şekillenmesinde son derece belirleyici bir rol oynayacaktır. Dolayısıyla, bu kuşağın tüketici davranışlarının incelenmesi hem akademik hem de profesyonel dünya için önemli iç görüler sunacaktır. Özellikle sosyal medya kullanımının ve fenomenlerin yönlendirici etkisinin arttığı günümüzde; Z kuşağının ideal benlik imajını yansıtmasında gösterişçi tüketime yönelmesi ve bu eğilimin temelinde başkaları tarafından olumsuz değerlendirilme korkusu ile kişiler arası etkilere karşı duyarlılığın yatması muhtemeldir. Bu doğrultuda mevcut araştırma, Z kuşağı tüketicilerinde olumsuz değerlendirilme korkusu, kişiler arası etkilere karşı tüketici duyarlılığı ve gösterişçi tüketim arasındaki doğrudan ve dolaylı ilişkileri araştırmıştır. Kolayda örnekleme yoluyla ulaşılan 360 katılımcıdan elde edilen cevaplar, yapısal eşitlik modellemesi ile analiz edilmiştir. Elde edilen sonuçlar, Z kuşağına mensup tüketicilerin olumsuz değerlendirilme korkusunun, kişiler arası normatif ve bilgilendirici etkilere karşı duyarlılığını doğrudan arttırdığını, ancak gösterişçi tüketim eğilimi üzerinde doğrudan anlamlı bir etkiye sahip olmadığını ortaya koymuştur. Bununla birlikte olumsuz değerlendirilme korkusu, kişiler arası normatif ve bilgilendirici etkiler aracılığı ile gösterişçi tüketim eğilimini dolaylı olarak arttırmıştır. Ayrıca, kişiler arası normatif ve bilgilendirici etkilere karşı tüketici duyarlılığının da gösterişçi tüketimi doğrudan ve pozitif yönde etkilediği sonucuna ulaşılmıştır.

Anahtar Kelimeler: Gösterişçi Tüketim, Olumsuz Değerlendirilme Korkusu, Kişilerarası Etkilere Duyarlılık, Z Kuşağı, Tüketici Davranışı

CONSPICUOUS CONSUMPTION IN GEN Z: THE ROLE OF FEAR OF NEGATIVE EVALUATION AND CONSUMER SUSCEPTIBILITY TO INTERPERSONAL INFLUENCES.

ABSTRACT

Compared to previous generations, Generation Z is considered distinct even from the preceding Generation Y and will play a pivotal role in shaping consumption behaviours both today and in the coming decades. Therefore, examining the consumer behaviour of this cohort offers significant insights for both academia and the business world. Particularly in the current era, where social media usage and the guiding impact of social media influencers are rising, Generation Z's tendency towards conspicuous consumption to reflect their ideal self-image is likely driven by the fear of negative evaluation and susceptibility to interpersonal influence.

In this context, the present study investigates the direct and indirect relationships between fear of negative evaluation, susceptibility to interpersonal influence, and conspicuous consumption among Generation Z consumers. Data obtained from 360 participants via convenience sampling were analysed using structural equation modelling. The results revealed that while the fear of negative evaluation directly increases susceptibility to interpersonal normative and informative influences, it does not have a statistically significant direct effect on conspicuous consumption. However, fear of negative evaluation indirectly enhances conspicuous consumption mediated by susceptibility to interpersonal normative and informative influences. Furthermore, the study concludes that susceptibility to interpersonal influence has a direct and positive effect on conspicuous consumption.

Keywords: Conspicuous Consumption, Fear of Negative Evaluation, Susceptibility to Interpersonal Influences, Gen Z, Consumer Behaviour

1. GİRİŞ

Gösterişçi tüketim oldukça uzun yıllardır süre gelen bir fenomen olarak karşımıza çıkmakta ve temellerini ilk kez 1899 yılında yayımlanan Veblen'in Aylık Sınıfı Teorisi adlı eserine dayanmaktadır. Veblen söz konusu eserinde tüketimin gösteriş amaçlı da yapılabileceğini ifade etmekle kalmayıp aynı zamanda bu tüketim kalıbının hem üst bir sınıfa hem de onlara benzemeye çalışan diğer sınıflara üye kişilere özgü olabileceğini ifade etmiştir (Güleç, 2015, s. 63) Gösterişçi tüketim, *"kişinin sosyal konumunu güçlendirmek için bir mekanizma olarak malların görünür şekilde tüketilmesi"* olarak tanımlanabilir (Roy Chaudhuri vd., 2011, s. 216). Gösterişçi tüketimin temel motivasyonları arasında; hayranlık kazanma ve kişinin değerini başkalarının gözünde doğrulama arzusunun yanı sıra kişinin zenginliğini çevresindeki kişilere gösterme arzusu da sayılabilir (Hız, 2011, s. 118). Her ne amaçla yapılırsa yapılsın, gösterişçi tüketim, özellikle İkinci Dünya Savaşı sonrası post modernite ile şekillenen tüketim kültürünün hâkim olduğu toplumlarda dikkat çeken bir araştırma konusu olarak literatürde yerini almıştır.

Öte yandan Lin ve Chen (2012, s. 354), olumsuz değerlendirilme korkusunun ve kişiler arası etkilere karşı duyarlılığının, kişilerin davranışlarının iki önemli öncülü olduğunu ifade etmektedir. Olumsuz değerlendirilme korkusu; *"akranların olumsuz değerlendirmelerine ilişkin korkuları, endişeleri veya kaygılarına karşılık gelmektedir"* (La Greca ve Lopez, 1998, s. 86). Kişilerarası etkilere karşı duyarlılık ise *"ürün ve markaların satın alınması ve kullanılması yoluyla önemli diğer kişilerle özdeşleşme ya da onların gözündeki imajını geliştirme ihtiyacı ve satın alma kararlarında diğerlerinin beklentilerine uyma isteği"* olarak tanımlanmaktadır (Bearden vd., 1989, s. 473). Bu bağlamda bazı tüketicilerin, diğer insanların kendi hakkındaki düşünce ve değerlendirmeleri doğrultusunda davranışlarını değiştirebilmesi mümkündür (Cintamür, 2023, s. 252). Tam da bu noktada, kişiler arası etkilere karşı hassasiyeti yüksek olan tüketicilerin, olumlu değerlendirilmelerine neden olabilecek ürün ve hizmetlere yönelik tüketim eğilimlerinin yüksek, olumsuz değerlendirilmelerine sebep olacak ürün ve hizmetlere dair tüketim eğilimlerinin ise düşük olduğu görülmüştür (Netemeyer vd., 1992). Dahası, bazı araştırmacılar kişiler arası etkilere karşı duyarlılığın ve başkaları tarafından olumsuz değerlendirilme korkusunun, tüketici davranışının önemli çalışma alanları olan kompulsif satın alma ve anlık satın alma eğilimlerinde etkili olduğunu göstermiştir (Biolcati, 2017; Cintamür, 2023; Lin ve Chen, 2012; Roberts vd., 2014).

Sosyal statü sergilemek amacıyla lüks mallar edinme ve sergileme pratiği olan gösterişçi tüketim psikolojik ve sosyal faktörlerden etkilenmektedir. Bu açıdan, anlık satın alma ve kompulsif satın alma gibi tüketici davranışlarını etkileyen olumsuz değerlendirilme korkusu ve tüketicinin kişiler arsı etkilere karşı duyarlılığı değişkenlerinin, gösterişçi tüketimi de etkilenmesi muhtemeldir. Özellikle Instagram gibi platformlar sosyal karşılaştırmayı teşvik ederek kullanıcıların belirli ürünlere sahip olmadıklarında kendilerini yetersiz hissetmelerine yol açabilmektedir. Bununla birlikte genç yetişkinlerin, sosyal medya platformlarında yansıtmak istedikleri benlikleri ile uyumlu bir imaja sahip ürün/hizmetleri tercih etme eğiliminde olduğu ve bu uyumun daha cazip bir imaj yansıtmak için genç tüketicileri lüks ürünler satın almaya yönlendirdiği bulunmuştur (Yunus vd., 2023). Dolayısıyla bu yönelişin başkaları tarafından olumsuz değerlendirilme korkusunu azaltmak maksadıyla olabileceğini öne sürmek mümkündür. Diğer taraftan sosyal medya fenomenleri, özellikle Z kuşağı arasında satın alma kararlarını önemli ölçüde şekillendirmektedir (Erwin vd., 2023). Bununla birlikte

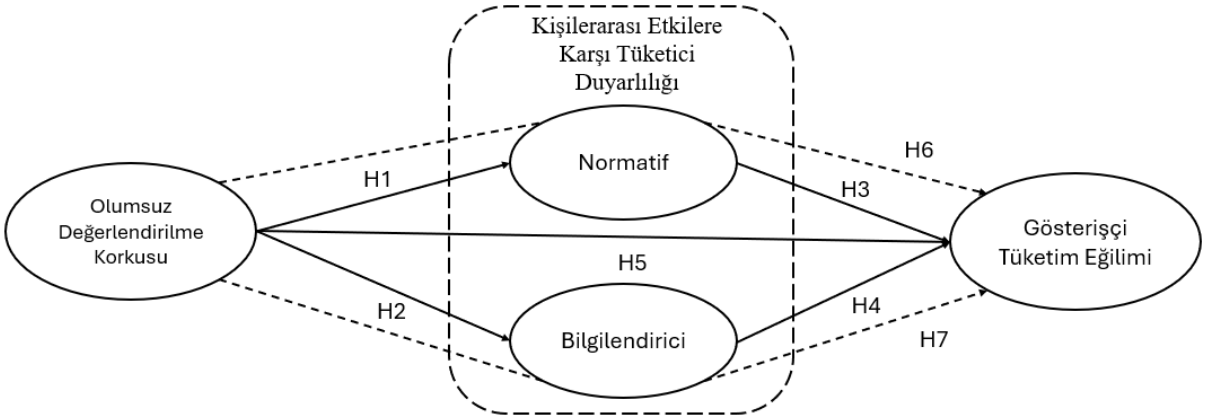
sosyal medya kullanıcıları, kendilerinden daha yüksek bir statüye sahip olduğunu düşündükleri fenomenlerle etkileşimde bulunduklarında, onlara duydukları hayranlık neticesinde onların kullandığı ürünü satın alabilmekte ve böylece onları taklit etmeye çalışmaktadır (Kim vd., 2023, s. 659). Dolayısıyla lüks ürünleri tanıtan fenomenlerin takipçileri, bu fenomenler ile benzer bir statüye sahip olmak için lüks ürünlerinin tüketimini, sosyal ortamlarda görünür bir şekilde gerçekleştirerek, diğer bir ifade ile gösterişçi tüketim yaparak, onları taklit etmek ve onlar gibi olmak isteyebilir. Nitekim, Instagram fenomenlerinin, tüketicileri gösterişçi tüketime yönlendirdiği gösterilmiştir (Ünlü ve Filan, 2021). Ayrıca, statüsünü yükseltmek isteyen kişiler, üst sınıfa mensup kişilerin özellikle sosyal medyada gözler önüne serdiği tüketim alışkanlıklarını kopyalayarak kendi sosyal medya hesaplarında paylaşmakta, tüketimin sembolik gücünden yararlanmakta ve bu sayede sınıf atladıklarına inanmaktadır (Yalçın ve Koçer, 2025, s. 381). Bu bağlamda sosyal medya fenomenlerinin veya ulaşılmak istenilen statüye sahip kişilerin bir rol model olarak, kişiler arası etkileşimlere karşı duyarlılığı yüksek genç tüketicileri kolaylıkla yönlendirebileceğini düşünmek mümkündür.

Z kuşağının tüketici davranışını anlamak özellikle modern dünyada rekabet avantajı kazanmak isteyen işletmeler açısından önemlidir. Z Kuşağı, önceki nesillerden farklı olan benzersiz tercih ve davranışlara sahip önemli ve büyüyen bir tüketici tabanını temsil etmektedir. Z kuşağı ile etkili ve sürdürülebilir bir iletişim kurmak öncelikle onların tüketici davranışlarındaki diğer kuşaklara göre benzer ve farklı yanlarının ortaya konulması ve bu temelde geliştirilen pazarlama stratejileri ile mümkün olacaktır. Hem şu anda hem de gelecek on yıllarda önemli bir pazar bölümü olarak varlığını sürdürecek olan Z kuşağının tüketici davranışlarının anlaşılması, son derece önemledir. Bu nedenle mevcut çalışma Z kuşağına mensup tüketicilerin olumsuz değerlendirilme korkusu ile kişiler arası etkilere karşı duyarlılığının, gösterişçi tüketim eğilimlerini nasıl etkilediğini incelemeyi amaçlamaktadır. Çalışma neticesinde elde edilen sonuçların hem bu alandaki literatüre hem de pazarlama uygulayıcılarının Z kuşağı ile ilgi geliştireceği pazarlama politikalarına yön gösterici nitelikte olması umulmaktadır.

2. METODOLOJİ

2.1. Araştırma Modeli, Değişkenleri ve Hipotezleri

Görsel 1. araştırma modelini tanımlamaktadır. Araştırma modelinde, olumsuz değerlendirilme korkusu ve gösterişçi tüketim eğilimi birinci düzey ve tek boyutlu yapılar olarak tanımlanırken kişilerarası etkilere karşı tüketici duyarlılığı ise birinci düzey, ancak çok boyutlu bir yapı olarak ele alınmıştır.



Görsel 1. Araştırma Modeli

Araştırma modelinde yer alan kesiksiz oklar, değişkenler arasındaki doğrudan ilişkilere, kesikli oklar ise dolaylı ilişkilere karşılık gelmektedir. Araştırama modelinde yer alan değişkenler arasında ön görülen ilişkilere göre aşağıdaki hipotezler oluşturulmuştur:

H1: Olumsuz değerlendirilme korkusu, kişilerarası normatif etkilere karşı tüketici duyarlılığını arttırmaktadır.

H2: Olumsuz değerlendirilme korkusu, kişilerarası bilgilendirici etkilere karşı tüketici duyarlılığını arttırmaktadır.

H3: Kişilerarası normatif etkilere karşı tüketici duyarlılığı, gösterişçi tüketim eğilimini arttırmaktadır.

H4: Kişilerarası bilgilendirici etkilere karşı tüketici duyarlılığı, gösterişçi tüketim eğilimini arttırmaktadır.

H5: Olumsuz değerlendirilme korkusu, gösterişçi tüketim eğilimini arttırmaktadır.

H6: Olumsuz değerlendirilme korkusu, kişilerarası normatif etkilere karşı tüketici duyarlılığı aracılığı ile gösterişçi tüketim eğilimini arttırmaktadır.

H7: Olumsuz değerlendirilme korkusu, kişilerarası bilgilendirici etkilere karşı tüketici duyarlılığı aracılığı ile gösterişçi tüketim eğilimini arttırmaktadır.

2.2. Örnekleme Yöntemi ve Veri Toplama Süreci

Araştırma kapsamında, Türkiye'de yaşayan 18 yaş ve üzerindeki Z kuşağına mensup tüketicilere yer verilmiştir. Bireylerin hangi kuşağa mensup olduğuna dair literatürde farklı kabuller olmakla birlikte, bu araştırmada Z kuşağı mensubu tüketicilerin, 1995 ile 2009 (dahil) yılları arasında doğmuş kişilerden oluştuğu görüşü benimsenmiştir (McCrindle, 2014, ss. 12–14). Ancak araştırma kapsamına 18 yaş altında olan Z kuşağı tüketicileri dahil edilmediği için sadece 1995 ile 2007 (dahil) yılları arasında doğan Z kuşağı tüketicilerine ulaşmak hedeflenmiştir.

Araştırmada kolayda örnekleme ve çevrimiçi (online) anket yönteminden yararlanılmıştır (Malhotra, 2010). Kolayda örneklemenin doğasına uygun bir şekilde, en kolay ulaşılabilecek Z kuşağı tüketicilerinin üniversite öğrencileri olması nedeniyle çeşitli üniversitelerin önlisans, lisans ve lisans üstü sınıflarında potansiyel katılımcılara anket formuna erişimi sağlayacak QR kodları veya anket linkleri iletilmiştir. Bununla birlikte üniversite öğrencisi olmayan, ancak potansiyel katılımcı olarak değerlendirilen kişilere, yazar tarafından araştırmaya katılımı sağlayacak olan bağlantılar e posta, sosyal medya veya WhatsApp uygulaması aracılığı ile iletilmiştir.

Anket formu altı bölümden oluşmaktadır. Birinci bölümde bilgilendirilmiş onam formuna, ikinci bölümde katılımcıların araştırma kapsamına dâhil edilip edilmeyeceğini belirten ve katılımcıların doğum tarihini soran 1 adet filtre soruya yer verilmiştir. Üçüncü bölümde katılımcıların olumsuz değerlendirilme korkusunu ölçen sekiz adet soru yer alırken, dördüncü bölümde katılımcıların kişilerarası etkilere karşı tüketici duyarlılığını ölçmeye yönelik 12 soru bulunmaktadır. Anket formunun beşinci bölümünde katılımcıların gösterişçi tüketim eğilimini ölçen 11 adet soru, altıncı ve son bölümde ise demografik özellikleri belirlemeye yönelik beş adet soru yer almaktadır. Böylece anket formu toplamda 37 adet sorudan oluşmaktadır.

Tesadüfi olmayan bir örnekleme yöntemi kullanıldığı için, minimum örneklem büyüklüğünün hesaplanmasında, araştırmada kullanılan istatistiki analizler dikkate alınmış (Malhotra, 2010, s. 374), bu minvalde, yapısal eşitlik modellemesinin ölçüm modelinde yer alan değişken sayısının 10 ile 20 katı kadarlık bir örnek hacmi hedeflenmiştir (Byrne, 2016; Kline, 2005). Bu bağlamda örneklem büyüklüğü ihtiyacı 310 ile 620 arasında hesaplanmış olup 35 günlük bir süre zarfında 437 katılımcıya ulaşılmıştır. 13 katılımcı filtre sorusu nedeniyle elenirken, 64 katılımcı ise anketi cevaplamayı bir noktada bırakarak vermiş oldukları eksik cevaplar nedeniyle elenmiştir. Sonuç olarak 360 adet geçerli ve tam cevaplanmış anket formu elde edilmiş ve analizler bu cevaplar dikkate alınarak gerçekleştirilmiştir.

2.3. Araştırmada Kullanılan Ölçekler

Araştırmada yer alan değişkenlerin ölçümünde, hali hazırda literatürde var olan ölçeklerden yararlanılmıştır. Bu kapsamda, olumsuz değerlendirilme korkusu, La Greca ve Lopez (1998)'den uyarlanan 8 adet ifadeden oluşan beşli Likert ölçeği (1= hiçbir zaman, 5= her zaman) ile değerlendirilirken, kişilerarası etkilere karşı duyarlılık, Bearden vd., (1989)'dan uyarlanan beşli Likert ölçeği (1= kesinlikle katılmıyorum, 5= kesinlikle katılıyorum) şeklindeki 12 adet soru yardımı ile ölçülmüştür. Katılımcıların gösterişçi tüketim eğilimleri ise Roy Chaudhuri vd., (2011)'den uyarlanan ve yine beşli Likert ölçeği (1= kesinlikle katılmıyorum, 5= kesinlikle katılıyorum) şeklindeki 11 adet sorudan oluşan bir ölçek yardımı ile değerlendirilmiştir. Sahaya çıkılmadan önce, anket formu 12 katılımcıya yüz yüze dağıtılmış ve anket formunda yer alan soruları okunabilirlik ve anlaşılabilirlik açısından değerlendirmeleri istenmiştir. Elde edilen ciddi bir geri bildirim olmaması nedeniyle, anket formunun mevcut şekli korunarak saha çalışmasına başlanmıştır.

3. BULGULAR

3.1. Katılımcılarının Demografik Yapısı ve Elde Edilen Ölçek Puanları

Katılımcıların demografik özellikleri Çizelge 1.'de olduğu gibidir:

Çizelge 1. Örneklem Yapısı

		N	%
Cinsiyet	Kadın	230	63,9
	Erkek	130	36,1
	Toplam	360	100
		N	**%**
Öğrencilik Durumu	Ön Lisans Öğrencisi	49	13,6
	Lisans Öğrencisi	273	75,8
	Lisansüstü Öğrencisi	31	8,6
	Öğrenci Değil	7	1,9
	Toplam		100
Çalışma Durumu	Çalışmıyor	242	67,2
	Çalışıyor	118	32,8
	Toplam	360	100
		N	**%**
Kişisel Gelir	10,000 TL'den az	83	23,1
	10,001-20,000 TL	97	26,9
	20,001-30,000 TL	73	20,3
	30,001-40,000 TL	34	9,4
	40,001-50,000 TL	19	5,3
	50,001 TL ve üzeri	54	15,0
	Toplam	360	100
		N	**%**

Medeni Durum	Bekar	354	98,3
	Evli	6	1,7
	Toplam	360	100

Çizelge 1. incelendiğinde, katılımcıların çoğunluğunun kadınlardan (%63,9) oluştuğu, eğitim açısından ağırlığın lisans öğrencilerinde olduğu (%75,8), katılımcıların çoğunun çalışmadığı (%67,2), kişisel gelir bağlamında katılımcıların %50'sinin 20.001 TL altında bir gelire sahip olduğu ve neredeyse tamamının bekar olduğu (%98,3) anlaşılmaktadır. Verilerin çok büyük bir kısmının üniversite öğrencilerinden elde edildiği düşünüldüğünde, gözlenen örneklem profilinin bu şekilde olması oldukça doğaldır.

Katılımcıların kendilerine yöneltilen ifadelere, diğer bir değişle araştırmada kullanılan ölçeklere ilişkin verdikleri cevaplara göre elde edilen ortalama, standart sapma, çarpıklık ve basıklık değerleri Çizelge 2.'de olduğu gibidir:

Çizelge 2. Ölçeklere Ait Tanımlayıcı İstatistikler

Değişkenler	Ortalama	Standart Sapma	Çarpıklık	Basıklık
Başkalarının benim hakkımda söylediği sözler için endişe duyuyorum. (ODK1)	2,6944	,89004	-,004	,000
Başkalarının beni beğenmediğinden endişe ediyorum. (ODK2)	2,2222	1,02371	,562	-,162
Başkalarının beni beğenmeyeceğinden korkuyorum. (ODK3)	2,0250	1,02988	,796	-,003
Başkalarının benim hakkımda ne düşündüğünden endişe ediyorum. (ODK4)	2,3944	1,00692	,415	-,344
Başkalarının benimle dalga geçtiğini hissediyorum. (ODK5)	1,7833	,90048	,970	,285
Alay konusu olmaktan endişe duyuyorum. (ODK6)	2,0333	1,08881	,793	-,239
Akranlarımın benim hakkımda arkamdan konuştuğunu hissediyorum. (ODK7)	2,2833	1,08561	,548	-,361
Eğer biriyle tartışırsam, karşımdaki kişinin beni beğenmeyeceğinden endişe duyuyorum. (ODK8)	1,7194	,97983	1,337	1,080
Arkadaşlarımın onayladığından emin olana kadar en son moda stilleri nadiren satın alırım. (NORM1)	2,0556	,99145	,561	-,551

Satın aldığım ürünleri ve markaları başkalarının da beğenmesi önemlidir. (NORM2)	2,5083	1,17302	,219	-1,056
Ürün satın alırken genellikle başkalarının onaylayacağını düşündüğüm markaları satın alırım. (NORM3)	2,0889	1,07796	,735	-,367
Diğer insanlar beni bir ürünü kullanırken görebilecekse, genellikle satın almamı bekledikleri markayı satın alırım. (NORM4)	1,9806	1,02186	,937	,170
Hangi markaların ve ürünlerin başkaları üzerinde iyi izlenimler bıraktığını bilmek isterim. (NORM5)	3,0667	1,23370	-,333	-,994
Başkalarının satın aldığı aynı ürünleri ve markaları satın alarak aidiyet duygusu kazanırım. (NORM6)	2,0028	1,03826	,910	,102
Birisi gibi olmak istediğimde, genellikle onun satın aldığı markaları satın almaya çalışırım. (NORM7)	1,8056	1,03476	1,246	,764
Diğer insanlarla genellikle satın aldıkları aynı ürün ve markaları satın alarak özdeşleşirim. (NORM8)	1,8528	,98625	1,175	,844
Doğru ürünü veya markayı satın aldığımdan emin olmak için genellikle başkalarının ne satın aldığını ve kullandığını gözlemlerim. (BİL1)	2,7194	1,24970	-,025	-1,252
Bir ürünle ilgili çok az deneyimim varsa, genellikle arkadaşlarıma ürün hakkında sorular sorarım. (BİL2)	3,8194	1,12612	-1,323	1,157
Bir ürün sınıfında mevcut olan en iyi alternatifi seçmeye yardımcı olması için genellikle başkalarına danışırım. (BİL3)	3,3500	1,14408	-,761	-,346
Satın almadan önce sıklıkla arkadaşlarımdan veya ailemden bir ürün hakkında bilgi alırım. (BİL)	3,3972	1,10481	-,722	-,128
Pahalı bir maka satın aldığımda bu satın almam, etrafımdaki kişilere bir mesaj verir. (GT1)	2,4611	1,21212	,370	-1,013
Bazı ürünleri başkalarına varlıklı olduğumu göstermek istediğim için satın alırım. (GT2)	1,8361	1,08591	1,209	,533
İş adamlarının gösterişli/çok şık kulübüne üye olurdum. (GT3)	2,2833	1,24124	,618	-,744

Başkalarına özgün bir zevkim olduğunu göstermek için, normalde sade bir tasarıma sahip olan bir ürünün ilginç ve nadir bir versiyonunu satın alırdım. (GT5)	2,4861	1,25111	,426	-,923
Diğerleri, güzellik ve zevk konusunda benim standartlarımla boy ölçüşebilmeyi dilerler. (GT6)	2,5389	1,21671	,427	-,730
Egzotik bir görünüme ve tasarıma sahip bir ürün seçerek arkadaşlarıma farklı olduğumu gösteririm. (GT7)	2,1806	1,10867	,760	-,162
Ürünleri veya markaları, herkesin hayran olduğu tarzımı yaratmak için seçerim. (GT8)	2,3889	1,19837	,455	-,873
Her zaman birinci sınıf ürünler satın alırım. (GT9)	2,4611	1,10891	,234	-,904
Genellikle sıradan ürünlerin daha ilginç bir versiyonunu bulmaya çalışırım, çünkü başkalarına orijinal olmaktan hoşlandığımı göstermek isterim. (GT10)	2,4222	1,19635	,416	-,907
Başkalarına sofistike olduğumu gösteririm. (GT11)	2,3583	1,10805	,504	-,464

Kompozit Değişkenler	**Ortalama**	**Standart Sapma**	**Çarpıklık**	**Basıklık**
Olumsuz Değerlendirilme Korkusu	2,1444	0,73207	0,845	1,143
Kişilerarası Normatif Etkilere Karşı Tüketici Duyarlılığı	2,1701	0,73686	0,520	0,188
Kişilerarası Bilgilendirici Etkilere Karşı Tüketici Duyarlılığı	3,3215	0,92149	-0,903	0,418
Gösterişçi Tüketim	2,3773	0,83004	0,424	-0,205

Çizelge 2.‘den anlaşılacağı üzere, olumsuz değerlendirilme korkusu ile ilgili ifadelerin tamamının ortalamasının üçün altında olduğu, kişilerarası etkilere karşı tüketici duyarlılığının normatif boyutunun biri, bilgilendirici boyutunun ise üç ifadesi hariç diğer tüm ifadelerinin ortalamasının yine üçün altında oluştuğu görülmektedir. Benzer şekilde gösterişçi tüketim ile ilgili tüm ifadelerin ortalaması üç puanın altında hesaplanmıştır.

Çizelge 2.’de ayrıca ilgili ifadelerden hesaplanan ve araştırma modelinde yer alan değişkenlerin kompozit skorları da yer almaktadır. Söz konusu değerler tek yönlü t testleri aracılığı ile ölçeğin orta noktası ile karşılaştırıldığında, yapılan t testlerine ilişkin tüm önem seviyelerinin anlamlı olduğu (p=0,001) görülmüştür. Buna göre, katılımcıların düşük bir olumsuz değerlendirilme korkusuna sahip olduğu, kişilerarası normatif etkilere karşı düşük bir tüketici duyarlılığı gösterirken, kişilerarası bilgilendirici etkilere karşı nispeten yüksek bir tüketici duyarlılığı sergilediği, fakat düşük bir gösterişçi tüketim eğilimine sahip olduğu ifade edilebilir.

3.2. Keşfedici Faktör Analizi

Keşfedici faktör analizi (KFA), araştırma modelinde yer alan değişkenlerinin boyutluluğunu incelemek ve özellikle ileride yapılacak olan geçerlilik testlerine zarar verecek çapraz faktör yüklerini tespit edebilmek adına SPSS 30 sürümü kullanılarak uygulanmıştır. KFA, en çok olabilirlik (maximum likelihood) yaklaşımı ve promax rotasyonu kullanılarak gerçekleştirilmiş ve faktör sayısı belirlenirken öz değeri bir ve birin üzerinde olan faktörler dikkate alınmıştır. Faktör yükü 0,50'nin altında olan veya orijinal faktör yükü ile herhangi bir çapraz faktör yükü arasında 0,20'den az fark olan değişkenler silinmiştir (Hair vd., 2010).

Bu kurallara uyularak dört defa KFA tekrar edilmiştir. Birinci KFA neticesinde toplam varyansın %61,809'unu açıklayan özdeğeri birin üzerinde altı faktör elde edilmiş ve yukarıda ifade edilen kurallar gereği, olumsuz değerlendirilme korkusunun üç ifadesi, kişiler arası normatif etkilere karşı tüketici duyarlılığının üç ifadesi, kişiler arası bilgilendirici etkilere karşı tüketici duyarlılığının bir ifadesi ile gösterişçi tüketime ait üç ifade çıkarılarak analiz tekrar edilmiştir.

İkinci KFA sonucunda, toplam varyansın %67,038'ni açıklayan özdeğeri birin üzerinde beş faktör elde edilmiş ve yine yukarıda ifade edilen kurallar gereği, kişiler arası normatif etkilere karşı tüketici duyarlılığının bir ifadesi ile gösterişçi tüketime ait bir ifade çıkarılarak analiz tekrar edilmiştir.

Üçüncü KFA sonrasında toplam varyansın %65,517'sinini açıklayan özdeğeri birin üzerinde dört faktör elde edilmiş, takip edilmesi kararlaştırılan kurallar gereği, kişiler arası normatif etkilere karşı tüketici duyarlılığının bir ifadesi çıkarılarak analiz tekrar edilmiştir.

Dördüncü ve nihai KFA sonuçlarına göre, toplam varyansın %67,722'sinini açıklayan ve özdeğeri birin üzerinde dört faktör elde edilmiş, tüm faktör yükleri 0,50'nin üzerinde gözlenmiş ve dikkate değer bir çapraz faktör yüküne rastlanmamıştır. Bu analizin sonuçlarına göre, faktör yükleri 0,562 ile 0,883 arasında değişmekte olup, olumsuz değerlendirilme korkusu beş, kişiler arası normatif etkilere karşı tüketici duyarlılığı üç, kişiler arası bilgilendirici etkilere karşı tüketici duyarlılığı üç, gösterişçi tüketim ise yedi değişkenden oluşan yapılar olarak elde edilmiştir.

3.3. Ölçüm Modelinin Değerlendirilmesi

Ölçüm modelinin test edilmesi için doğrulayıcı faktör analizi (DFA) Amos 30 sürümü yardımıyla uygulanmıştır. Çizelge 2.'de yer alan çarpıklık ve basıklık değerlerinin sırasıyla |3|'ü ve |7|'yi aşmaması nedeniyle, tek değişkenli normal dağılımdan önemli bir sapma olmadığı anlaşılmaktadır (Byrne, 2016, s. 123; Kline, 2005, s. 50). Ancak, çoklu normal dağılımdan sapmaya işaret eden Mardina skoru (19,140), kabul edilebilir değerin üzerinde (5) hesaplanmıştır (Byrne, 2016, s. 123). Bu nedenle çoklu normal dağılımdan sapmanın neden olabileceği sorunların üstesinden gelmek adına, DFA bootstrapping yöntemi ile uygulanmıştır (Byrne, 2016, s. 367).

DFA'da, olumsuz değerlendirilme korkusu ile gösterişçi tüketim birinci düzey ve tek boyutlu yapılar olarak tanımlanırken, kişiler arası etkilere karşı tüketici duyarlılığı ise birinci düzey, ancak iki boyutlu bir yapı olarak tanımlanmıştır. DFA, 2.000 bootstrap örneklem ile gerçekleştirilmiştir.

İlk DFA sonuçları, modelin eldeki veri seti ile uyumu açısından kabul edilebilir değerler üretmiştir ($x^2_{(129)}$ = 276,834; p<.000; x^2/df =2,146; CFI=0,954; TLI= 0,945; IFI=0,954; $RMSEA_{0,047-0,066}$= 0,056; SRMR= 0,0467). Model uyumunu, kabul edilebilir küçük bir modifikasyon ile arttırmanın bir yolunun olup olmadığını anlamak için modifikasyon önerileri incelenmiş ve olumsuz değerlendirilme korkusunun birinci değişkeni ile dördüncü değişkeninin hata varyansları arasında bir ilişkinin tanımlanmasının modelin ki kare değerinde 29,175'lik bir azalma sağlayacağı görülmüştür. Söz konusu ilişki tanımlanarak DFA yeniden gerçekleştirilmiştir.

İkinci DFA sonuçları son derece iyi uyum iyiliği indeksleri üretmiştir ($x^2_{(129)}$ = 243,247; p<.000; x^2/df =1,900; CFI=0,964; TLI= 0,957; IFI=0,964; $RMSEA_{0,040-0,060}$= 0,050; SRMR= 0,0459) (Hair vd., 2010; Hu ve Bentler, 1999). Elde edilen sonuçların özeti Çizelge 3.'te yer almaktadır.

Çizelge 3. incelendiğinde, tüm değişkenlere ait standardize faktör yüklerinin önerilen minimum değerin (0,50) üzerinde olduğu (Bagozzi vd., 1991), benzer şekilde ortalama açıklanan varyans değerlerinin de istenilen değerin (0,50) üzerinde hesaplandığı (Fornell ve Larcker, 1981) ve kompozit güvenilirliklerin yine önerilen değerden (0,60) büyük olduğu görülmektedir (Bagozzi ve Yi, 1988). Ayrıca tüm Cronbahc's alfa değerlerinin de 0,70'in üzerinde olduğu anlaşılmaktadır. Dolayısıyla ölçüm modelinin yakınsak (convergent) geçerlilik sağladığı tespit edilmiştir.

Ölçüm modelinin ayırt edici (discriminant) geçerliliğini değerlendirmek üzere Fornel ve Larker (1981) kriterinden yararlanılmış olup, bu bağlamda örtük değişkenlere ait hesaplanan ortalama açıklanan varyans değerlerinin kareköklerinin, örtük değişkenler arasındaki bütün mümkün ikili korelasyon değerlerinden yüksek olduğu tespit edilmiştir. Bu değerleri Çizelge 4.'te görmek mümkündür. Dolayısıyla olarak ölçüm modelinin ayırt edici geçerlilik sağladığı tespit edilmiştir.

Çizelge 3. Ölçüm Modeline İlişkin DFA Sonuçları.

3.4. Yapısal Modelin Değerlendirilmesi ve Araştırma Hipotezlerinin Test Edilmesi

Yapısal eşitlik modellemesi (YEM) analizi, Amos 30 programı aracılığı uygulanmış olup, ölçüm modelinin test edilmesinde elde edilen nihai faktör yapısı kullanılarak analiz 2.000 bootstrap örneklem üzerinden gerçekleştirilmiş ve böylece çoklu normal dağılımdan sapmanın neden olabileceği olumsuzluklar elemine edilmiştir.

YEM analizi son derece iyi uyum iyiliği indeksleri üretmiştir ($x^2_{(129)}$ = 261,293; p<.000; x^2/df =2,026; CFI=0,958; TLI= 0,951; IFI=0,959; $\text{RMSEA}_{0,044-0,063}$= 0,053; SRMR= 0,0596) (Hair vd., 2010; Hu ve Bentler, 1999). YEM analizi sonucunda elde edilen; değişkenler arası doğrudan ilişkilere ait standardize yol katsayıları, dolaylı ilişkilere ait standardize olmayan yol katsayıları ve hipotezlerin sınanmasına ilişkin sonuçlar Çizelge 5.'te sunulmuştur.

Çizelge 5. incelendiğinde, sadece olumsuz değerlendirilme korkusu ile gösterişçi tüketim arasında tanımlanan doğrudan ilişkiye ait standardize yol katsayısı hariç, diğer tüm yollara ait standardize ve standardize olmayan yol katsayılarının istatistiki olarak anlamlı olduğu, %95 güven aralıklarının sıfır değerini içermediği görülmektedir. Dolayısıyla, z kuşağına mensup tüketicilerin olumsuz değerlendirilme korkusunun, kişilerarası normatif ve bilgilendirici etkilere karşı tüketici duyarlılığını arttırdığına dair H1 (B=0,403; p=0,001) ve H2 (B=0,202; p=0,009) hipotezler kabul edilmiştir. Benzer şekilde, z kuşağına mensup tüketicilerin kişiler arası normatif ve bilgilendirici etkilere karşı duyarlılığının gösterişçi tüketim eğilimini arttırdığına ilişkin H3 (B=0,335; p=0,001) ve H4 (B=0,156; p=0,028) hipotezleri de kabul edilmiştir. Ancak z kuşağına mensup tüketicilerin olumsuz değerlendirilme korkusunun, gösterişçi tüketim eğilimini doğrudan arttırdığını ileri süren H5 hipotezi reddedilmiştir (B=0,077; p=0,321). Buna karşılık, z kuşağına mensup tüketicilerin, olumsuz değerlendirilme korkusunun kişiler arası normatif ve bilgilendirici etkilerine karşı duyarlılığının aracılık rolü ile gösterişçi tüketim üzerimde dolaylı bir etkiye sahip olduğu yönündeki H6 (B=0,184; p=0,001) ve H7 (B=0,043; p=0,021) hipotezleri kabul edilmiştir.

Çizelge 5. YEM Sonuçları ve Hipotez Testleri

Dolaylı etkiler, spesifik yol analizlerinin ayrıştırılması amacıyla AMOS User-Defined Estimands fonksiyonu kullanılarak hesaplandığı için standardize edilmemiş değerler ve bunlara ait Bootstrap güven aralıkları raporlanmıştır.

4. SONUÇ VE ÖNERİLER

Bu araştırma, Z kuşağına mensup tüketiciler özelinde, olumsuz değerlendirilme korkusu, kişiler arası etkilere karşı tüketici duyarlılığı ve gösterişçi tüketim eğilimleri arasındaki doğrudan ve dolaylı ilişkileri araştırmıştır. Bu bağlamda, olumsuz değerlendirilme korkusunun kişiler arası normatif ve bilgilendirici etkilere karşı tüketici duyarlılığı ve gösterişçi tüketim eğilimini doğrudan arttırdığı, benzer şekilde kişiler arası normatif ve bilgilendirici etkilere karşı tüketici duyarlılığının gösterişçi tüketim eğilimini doğrudan arttırdığı, olumsuz değerlendirilme korkusunun kişiler arası normatif ve bilgilendirici etkilere karşı tüketici duyarlılığı aracılığı ile gösterişçi tüketim eğilimini dolaylı olarak arttırdığı ileri sürülmüştür.

Araştırma sonuçlarına göre, Z kuşağı tüketicilerinin olumsuz değerlendirilme korkusunun, kişiler arası normatif ve bilgilendirici etkilere karşı tüketici duyarlılığını arttırdığı ortaya konulmuştur. Söz konusu bu bulgu araştırma beklentileri ile uyumludur. Benzer şekilde Z kuşağı tüketicilerinin, kişiler arası normatif ve bilgilendirici etkilere karşı duyarlılığının, gösterişçi tüketim eğilimini doğrudan yükselttiği tespit edilmiştir. Bu bulgu da yine araştırma beklentileri ile uyumludur. Buna karşılık Z kuşağı tüketicilerinin olumsuz değerlendirilme

korkusunun, gösterişçi tüketim eğilimi üzerinde doğrudan bir etkiye sahip olmadığı görülmüştür. Ulaşılan bu sonuç ise araştırma beklentileri ile uyumlu değildir. Öte yandan, Z kuşağı tüketicilerinin olumsuz değerlendirilme korkusunun, kişiler arası normatif ve bilgilendirici etkilere karşı duyarlılığı aracılığı ile gösterişçi tüketim eğilimini arttırdığı sonucuna ulaşılmıştır.

Yukarıda ifade edilen araştırma bulgularına ilave olarak, z kuşağına mensup tüketicilerin olumsuz değerlendirilme korkusu, kişiler arası normatif etkilere karşı tüketici duyarlılığı ile gösterişçi tüketim eğilimlerinin düşük düzeyde olduğu, ancak kişiler arası bilgilendirici etkilere karşı duyarlılıklarının ise hafif derece yüksek olduğu tespit edilmiştir.

Araştırmanın sağladığı katkılar ile birlikte sahip olduğu bir dizi kısıt, elde edilen sonuçların dikkatli bir şekilde yorumlanmasını beraberinde getirmektedir. Bu minvalde, araştırmanın sahip olduğu ilk kısıt, tesadüfi olmayan bir örnekleme yönteminin kullanılmasıdır. Bu nedenle ulaşılan sonuçların araştırma örneği itibariyle geçerli olduğuna ve Z kuşağının tamamına atfedilmesi hususunda dikkatli olunması gerektiği ifade edilmelidir. Ancak ulaşılan sonuçların, araştırma örneği ile benzer yapıdaki tüketici gruplarına yönelik strateji geliştirmede önemli iç görüler sunduğu da göz önüne alınmalıdır.

Araştırmanın bir diğer kısıtı, elde edilen sonuçların sadece araştırma modelinde yer alan değişkenler bağlamında geçerli olmasıdır. Bu nedenle gelecekteki araştırmalara, anlık satın alma, kompulsif satın alma, statü tüketimi, öz saygı vb. değişkenlerin araştırma modeline aracı veya moderatör değişkenler şeklinde dahil edilerek daha geniş çaplı araştırma yapması tavsiye edilmektedir. Böyle araştırmalar konu hakkındaki bilgi birikimin gelişmesine katkı sağlayacaktır. Bununla birlikte gelecekteki araştırmacılara, benzer ya da genişletilmiş araştırma modellerini birden fazla kuşak bağlamında test ederek, araştırma modelinde yer alan doğrudan ve dolaylı ilişkilerin nasıl farklılaştığını incelemesi de tavsiye edilmektedir.

ORCİD: 0009-0001-2760-1864

Özet

Bu çalışmada, Gençlik ve Spor Bakanlığı'nın hedef odaklı iletişim stratejileri, yapay zekâ destekli uygulamalar ve güvenlik görevlilerinin iletişim becerileri kapsamında yürütülen uygulamaların etkinliği incelenmiştir. Araştırmanın verileri, SPSS 27.0 programı kullanılarak betimsel ve çıkarımsal istatistik yöntemleri ile analiz edilmiştir. Katılımcıların demografik özellikleri frekans ve yüzde dağılımları ile belirlenmiş; değişkenlerin merkezi eğilim ve dağılım özellikleri ortalama ve standart sapma değerleri ile ortaya konmuştur. Normallik testleri (Kolmogorov-Smirnov ve Shapiro-Wilk) sonucunda çoğu değişkenin normal dağılımdan sapma gösterdiği tespit edilmiş ve analizlerde non-parametrik yöntemler tercih edilmiştir.

Cinsiyete bağlı farklılıklar Mann-Whitney U testi ile, yaş, eğitim durumu, çalışma durumu ve görev yapılan birime göre farklılıklar ise Kruskal-Wallis H testi ile değerlendirilmiştir. Katılımcıların kamu hizmetlerine katılım, hizmetlere erişim ve memnuniyet, kurumlara yönelik tutum, yürütülen iletişim ve toplumsal katılım durumları ile GSB'nin iletişim stratejilerinin etkinliği, yapay zekâ destekli uygulamalar, güvenlik görevlilerinin iletişim becerileri, dijital kanallar ve genç odaklı iletişim politikaları arasındaki ilişkiler Spearman's rho korelasyon analizi ile incelenmiştir. Analizler sonucunda değişkenler arasında anlamlı ve güçlü pozitif ilişkiler saptanmıştır. Tüm analizlerde istatistiksel anlamlılık düzeyi $p<0,05$ olarak kabul edilmiştir.

Bu çalışma, gençlik ve spor alanında yürütülen iletişim stratejilerinin etkinliğinin değerlendirilmesi, dijital ve yapay zekâ destekli uygulamaların genç odaklı hizmetlerdeki rolünün anlaşılması ve güvenlik görevlilerinin iletişim süreçlerindeki katkısının belirlenmesi açısından önemli bulgular sunmaktadır.

Anahtar Kelimeler: Hedef odaklı iletişim, Gençlik ve Spor Bakanlığı, yapay zekâ, güvenlik görevlileri, dijital iletişim, genç odaklı politikalar

Abstract

This study examined the effectiveness of the Youth and Sports Ministry's target-oriented communication strategies, artificial intelligence-supported applications, and communication

skills of security personnel. The data were analyzed using SPSS 27.0 through descriptive and inferential statistical methods. Demographic characteristics of the participants were determined by frequency and percentage distributions, while central tendency and dispersion of variables were measured using mean and standard deviation values. Normality tests (Kolmogorov-Smirnov and Shapiro-Wilk) revealed that most variables deviated from normal distribution; therefore, non-parametric tests were applied.

Gender differences were examined with the Mann-Whitney U test, while differences based on age, education level, employment status, and department assignment were evaluated using the Kruskal-Wallis H test. The relationships between participants' public service participation, access and satisfaction with services, attitudes toward institutions, communication and social participation levels, and the Ministry's communication strategies, AI-supported applications, security personnel's communication skills, digital channels, and youth-focused policies were analyzed using Spearman's rho correlation. Significant and strong positive relationships were identified among the variables, with statistical significance set at $p<0.05$.

This study provides valuable insights into the evaluation of communication strategies in youth and sports, the role of digital and AI-supported applications in youth-oriented services, and the contribution of security personnel in communication processes.

Keywords: Target-oriented communication, Youth and Sports Ministry, artificial intelligence, security personnel, digital communication, youth-focused policies

1. Giriş

Günümüzde kamu kurumları ile vatandaşlar arasındaki ilişkilerde önemli değişimler, iletişim teknolojilerindeki hızlı ilerlemelerle ortaya çıkmıştır. Dijitalleşmenin hızlanması, kamu yönetiminde bilgi transferini, katılımcılığı ve geri bildirim süreçlerini yeniden şekillendirmiştir. Bu değişim, Gençlik ve Spor Bakanlığı'nın (GSB), gençlik politikalarının geliştirilmesinde önemli bir role sahip olan stratejik iletişim anlayışını yenilemesini zorunlu kılmıştır(Gençlik ve Spor Bakanlığı, 2023, s. 12).

Bakanlık, genç bireyleri sadece hizmetlerin pasif alıcıları olmakla kalmayıp, aynı zamanda karar alma süreçlerine aktif katılımcılar haline getirmeyi hedeflemektedir. Bu doğrultuda, iletişim stratejileri belirli kitlelerin sosyokültürel özellikleri, beklentileri ve değerleri göz önünde bulundurularak hazırlanmıştır (Çetin & Akbaş, 2021, s. 88). Gençlik merkezleri, spor alanları ve öğrenci yurtlarında yürütülen etkinliklerle desteklenen GSB'nin iletişim uygulamaları, gençlerin aidiyet hislerini kuvvetlendirmek amacıyla doğrudan iletişim kurmayı amaçlamaktadır(Gençlik Hizmetleri Genel Müdürlüğü, 2022, s. 45).

Bakanlığın iletişim politikalarında dijitalleşme önemli bir yere sahiptir. Sosyal medya, mobil uygulamalar ve çevrimiçi geri bildirim sistemleri aracılığıyla gerçekleştirilen iletişim faaliyetleri, gençlerle ikili bir etkileşim imkanı tanımaktadır. GSB, gençlerin ilgi alanları, dijital davranış şekilleri ve bilgi edinme yöntemlerini inceleyerek mesajlarını bu çerçevede uyarlamaktadır(Yılmaz, 2020, s. 73). Böylece dijital katılım ve veri odaklı yönetim, hedef odaklı iletişim stratejilerinin temel bileşenleri haline gelmiştir. Yapay zekâ destekli yöntemler ise, GSB'nin iletişim süreçlerinde kullandığı yenilikçi araçlardan biridir. Sosyal medya incelemeleri, duygu analizi ve otomatik geri bildirim sistemleri sayesinde elde edilen veriler, gençlerin ihtiyaçlarının ve eğilimlerinin daha hassas bir şekilde belirlenmesine yardımcı olmaktadır. Bu şekilde Bakanlık, iletişim stratejilerini canlı ve ölçülebilir hale getirirken, veri tabanlı karar alma yeteneğini de artırmaktadır (Aydın & Gündüz, 2022, s. 102).

Bu süreç içinde güvenlik personelinin rolü de önemlidir. Gençlik ve Spor Bakanlığı'na bağlı yerlerde görev yapan güvenlik görevlileri, sadece fiziksel güvenliği sağlamakla kalmaz, aynı zamanda kurumsal iletişimde gençlerle sağlıklı ilişkiler kurulmasında da rol oynamaktadır. Güvenlik görevlilerinin empatik iletişim yetenekleri, kriz zamanlarında doğru bilgilendirme yapabilmeleri ve kurumun imajını koruyucu davranışları, hedef odaklı iletişim stratejilerinin başarılarına doğrudan katkıda bulunmaktadır(Demirtaş, 2019, s. 64). Sonuç olarak, GSB'nin iletişim politikaları, yalnızca bilgi aktarımına dayanan geleneksel yaklaşımları değil, aynı zamanda katılımcı, veri odaklı ve çok boyutlu yöntemleri de içermektedir. Bu stratejiler, gençlerin toplumsal katılımını artırmak, kamu kurumuna olan güveni pekiştirmek ve gençlik hizmetlerinde sürdürülebilir etkileşim sağlamak açısından büyük öneme sahiptir.

2. Literatür Taraması

Kamu kurumlarının iletişim yöntemleri, sadece bilgi paylaşımında bulunmakla kalmayıp, aynı zamanda güven oluşturma, katılım sağlama ve aidiyet hissini güçlendirme amacıyla sosyal bir yol olarak görülmektedir. Gençlik politikalarının odak noktası olan Gençlik ve Spor Bakanlığı (GSB), gençlerin sosyal, kültürel ve spor alanındaki gelişimlerini desteklemek için iletişim teknolojilerini usta bir şekilde kullanmaktadır(Gençlik ve Spor Bakanlığı, 2023, s. 18).

2.1. Yapay Zekâ Destekli Yaklaşımlar ve Dijitalleşme Süreci

Dijital dönüşüm, kamu yönetiminde etkili iletişim süreçlerini hızlandırarak verimliliği artıran kritik bir unsur olarak kabul edilmektedir. Yapay zekâ (YZ) uygulamaları, özellikle veri analitiği ve hedef kitle segmentasyonu gibi alanlarda kamu kurumlarının iletişim etkinliğini

geliştirme potansiyeline sahiptir. Bu bağlamda, GSB'nin dijital medya kampanyalarında sosyal medya analizleri ve içerik performans ölçümleri gibi veri odaklı yöntemler kullandığı bilinmektedir (Kara, 2021).

Yapay zekâ destekli iletişim yöntemleri, mesajların doğru zamanda ve uygun platformlarda iletilmesini sağlayarak hedef kitle ile etkileşimi güçlendirmektedir. Ancak, literatürde bu teknolojilerin sadece verimlilik aracı değil, aynı zamanda etik sorumluluk, kişisel verilerin korunması ve şeffaflık kavramları çerçevesinde ele alınması gerektiği vurgulanmaktadır (Erdoğan & Aksoy, 2022). Bu nedenle, GSB'nin iletişim stratejilerinde teknolojik yeniliklerin yanı sıra toplumsal güveni esas alan bir yaklaşım benimsemesi büyük önem taşımaktadır.

2.2. Hedef Odaklı İletişim Stratejileri

"Hedef odaklı iletişim" ifadesi, kamu kurumlarının mesajlarını belirli demografik veya sosyal grupların değer ve beklentilerine göre şekillendirmeyi hedefleyen bir yöntemdir (Çetin & Akbaş, 2021, s. 84). Bu yöntemde iletişim, sadece tek taraflı bilgi verme değil, aynı zamanda etkileşimli bir süreç olarak görülmektedir. Aydın (2017, s. 93), gençlik politikalarında hedef odaklı iletişimin en önemli amacının "katılımı teşvik ederek, kamu hizmetlerini daha erişilebilir ve anlamlı kılmak" olduğunu ifade etmektedir.

GSB'nin uyguladığı stratejik iletişim planları, gençlerin sosyokültürel çeşitliliğini göz önünde bulundurarak; farklı ilgi alanlarına yönelik özel mesajlarla programlar tanıtmaktadır. Sosyal medya kanalları aracılığıyla gerçekleştirilen gençlik kampanyaları, hedef kitlelerin dijital davranışları incelenerek oluşturulmaktadır (Yılmaz, 2020, s. 72). Bu bakımdan GSB, kamu yönetiminde "kitle odaklı iletişim" anlayışından "birey odaklı iletişim" anlayışına geçişte öncü bir rol üstlenmektedir(Gençlik Hizmetleri Genel Müdürlüğü, 2022, s. 56).

2.3. Dijitalleşme ve Yapay Zekâ Destekli Yaklaşımlar

Son yıllarda, iletişim süreçlerine yapay zekâ (YZ) teknolojilerinin dahil edilmesi, kamu kuruluşlarının hedef kitleleriyle olan etkileşimlerini önemli ölçüde değiştirmiştir. Veri analizi, duygu analizi, otomatik yanıt sistemleri ve sosyal medya izleme araçları, gençlik politikalarının geliştirilmesinde kritik bir referans noktası olmuştur (Aydın & Gündüz, 2022, s. 104). Bu tür teknolojiler, kurumların gençlerin isteklerine hızla yanıt vermesine, kişiye özel içerikler üretmesine ve hizmet verimliliğini değerlendirmesine olanak tanımaktadır.

Kamu kuruluşlarında YZ destekli karar alma sistemlerinin uygulanmasının, özellikle gençlik merkezleri ve spor salonları gibi yüksek insan etkileşimi olan yerlerde iletişim kalitesini

artırdığı gözlemlenmiştir (Erdoğan, 2021, s. 117). Bu uygulamalar, kurumların yalnızca bilgi üretiminde değil, aynı zamanda veri güvenliği, etik sınırlar ve şeffaflık gibi konularda da yeni sorumluluklar üstlenmesine yol açmıştır(Özdemir, 2022, s. 133).

2.4. Güvenlik Görevlilerinin Kurumsal İletişimdeki Rolü

Kurum içi iletişim alanındaki çalışmalar, güvenlik personelinin sadece fiziksel koruma sağlayan birimler değil, ayrıca kurum imajını temsil eden "ön hat iletişim aktörleri" olduğu üzerine odaklanmaktadır (Demirtaş, 2019, s. 62). Gençlik merkezleri ve spor komplekslerinde çalışan güvenlik görevlileri, gençlerle yaptıkları günlük etkileşimler aracılığıyla kurumun sosyal algısının şekillenmesinde önemli bir rol oynamaktadır.

Güvenlik görevlilerinin iletişim yetenekleri, kriz yönetimi ve empati becerileri, gençlerle sağlıklı ilişkiler kurma yetisi, GSB'nin hedef odaklı iletişim stratejilerinin başarısına önemli ölçüde katkıda bulunmaktadır (Kara & Arslan, 2020, s. 88). Kurumun kimliğini güçlendiren bu anlayış, güvenlik personelinin fiziksel güvenliğin yanı sıra sosyal güvenliği de destekleyen bir unsur olarak belirlenmesine olanak sağlar(Demirtaş, 2019, s. 65).

2.5. Güvenlik Görevlilerinin Rolü: Kurumsal Temsilden İletişim Unsuruna

Gençlik merkezleri, öğrenci yurtları, spor tesisleri ve organizasyon sahaları, GSB'nin hizmet alanları arasında önemli bir yer tutmaktadır. Bu alanlar, gençlerin doğrudan etkileşimde bulunduğu yerlerdir. Burada çalışan güvenlik personeli, sadece fiziksel güvenliği sağlamakla kalmaz, aynı zamanda kurumun genel dış görünümünü de temsil eder (Demir, 2019). Güvenlik görevlilerinin iletişim şekli, gençlerin kuruma olan bakış açısını ve güven duygusunu büyük ölçüde etkileyebilir.

Kurum içindeki iletişimde güvenlik görevlilerinin rolü çok önemlidir. Araştırmalar, güvenlik personelinin kurum içindeki iletişime katılımının, çalışanların motivasyonunu artırdığını ve kuruma bağlılığı güçlendirdiğini göstermektedir (Yıldız, 2020). Bu nedenle, GSB'nin hedef odaklı iletişim stratejileri oluşturulurken, güvenlik görevlilerinin iletişim becerilerini geliştirmeye yönelik eğitim programlarının planlanması da önem taşır. Bu yöntem, yalnızca hizmet kalitesini artırmakla kalmaz; aynı zamanda kurumun güven temelli iletişim anlayışını da güçlendirir.

2.6. Literatürün Genel Değerlendirmesi

İlgili kaynaklar değerlendirildiğinde, kamu kuruluşlarının hedefe yönelik iletişimi benimsemesinin gençlerin kurumsal süreçlere daha aktif şekilde katılmalarını sağladığı

gözlemlenmektedir (Yılmaz, 2020, s. 76). Ayrıca, yapay zekâ tabanlı iletişim araçlarının stratejik kullanımı, kurumların veri odaklı karar verme yeteneklerini geliştirmektedir (Aydın & Gündüz, 2022, s. 108). GSB'ye odaklanan araştırmalar, dijitalleşme ile insan faktörünün birlikte ele alınması gerektiğini; güvenlik personeli gibi doğrudan etkileşimde bulunan çalışanların iletişim becerilerinin bu stratejilerin etkinliğinde belirleyici rol oynadığını göstermektedir (Gençlik Hizmetleri Genel Müdürlüğü, 2022, s. 59).

Sonuç olarak, literatür, Gençlik ve Spor Bakanlığı'nın hedef odaklı iletişim stratejilerinin karmaşık bir yapı taşıdığını; bu yapının dijital dönüşüm, yapay zeka destekli analizler ve insan merkezli iletişim öğeleriyle desteklendiğini ortaya koymaktadır.

3. Yöntem

Bu çalışmada elde edilen veriler SPSS 27.0 programı ile analiz edilmiştir. Araştırmanın amaçlarına uygun olarak betimsel ve çıkarımsal istatistik yöntemleri kullanılarak analiz edilmiştir. Katılımcıların demografik özelliklerini tanımlamak amacıyla cinsiyet, yaş, eğitim durumu, çalışma durumu ve görev yapılan birim gibi kişisel bilgilerin frekans ve yüzde dağılımları hesaplanmıştır. Ayrıca, araştırmada yer alan değişkenlerin merkezi eğilim ve dağılım özelliklerini ortaya koymak için ortalama ve standart sapma değerleri belirlenmiş; böylece Gençlik ve Spor Bakanlığı'nın iletişim stratejilerinin etkinliği, yapay zekâ destekli uygulamaların kullanımı, güvenlik görevlilerinin iletişim becerileri, dijital kanallar ve teknolojik yeniliklerin kullanımı ve genç odaklı iletişim politikaları gibi boyutların katılımcılar tarafından nasıl algılandığı gösterilmiştir.

Değişkenlerin dağılım özelliklerini belirlemek için Kolmogorov-Smirnov ve Shapiro- Wilk normallik testleri uygulanmış ve çoğu değişkenin normal dağılımdan sapma gösterdiği saptanmıştır. Bu nedenle parametrik testler yerine non-parametrik analizler tercih edilmiştir. Cinsiyete bağlı farklılıkların incelenmesinde Mann-Whitney U testi, yaş, eğitim durumu, çalışma durumu ve görev yapılan birim gibi kategorik değişkenlere göre farklılıkların değerlendirilmesinde ise Kruskal-Wallis H testi kullanılmıştır.

Katılımcıların kamu hizmetlerine katılım, hizmetlere erişim ve memnuniyet, kurumlara yönelik tutum, yürütülen iletişim ve toplumsal katılım durumları ile Gençlik ve Spor Bakanlığı'nın iletişim stratejilerinin etkinliği, yapay zekâ destekli uygulamaların kullanımı, güvenlik görevlilerinin iletişim becerileri, dijital kanallar ve teknolojik yeniliklerin kullanımı ve genç odaklı iletişim politikaları arasındaki ilişkiler Spearman's rho korelasyon analizi ile değerlendirilmiştir. Analizler sonucunda değişkenler arasında anlamlı ve güçlü pozitif ilişkiler

tespit edilmiştir. Tüm analizlerde istatistiksel anlamlılık düzeyi p<0,05 olarak kabul edilmiş ve sonuçların güvenilirliği sağlanmıştır.

4. Bulgular

Çalışmanın bu bölümünde, Gençlik ve Spor Bakanlığı'nın iletişim stratejileri, yapay zekâ destekli uygulamalar, güvenlik görevlilerinin iletişim becerileri, dijital kanallar ve teknolojik yenilikler ile kamu kurumlarındaki genç odaklı iletişim politikalarının, bireylerin kamu hizmetlerine katılımı, erişim ve memnuniyeti, kurumlara yönelik tutumu, yürütülen iletişim ve toplumsal katılımı üzerindeki etkileri istatistiksel olarak incelenmiş ve tablolar eşliğinde yorumlanmıştır.

Çalışmaya katılan bireylerin cinsiyet, yaş, eğitim durumu, çalışma durumu ve görev yapılan birim gibi kişisel bilgilerinin betimsel istatistiği Tablo 1'de paylaşılmıştır.

Tablo 1. Bireylerin Kişisel Bilgilerinin Betimsel İstatistiği

		f	**Yüzde %**
Cinsiyet	**Kadın**	**25**	**51,0**
	Erkek	24	49,0
Yaş	18-24 Yaş	4	8,2
	25-30 Yaş	8	16,3
	31-40 Yaş	**19**	**38,8**
	41 Yaş +	18	36,7
Eğitim Durumu	**Lise**	**16**	**32,7**
	Ön Lisans	14	28,6
	Lisans	11	22,4
	Yüksek Lisans	8	16,3
Çalışma Durumu	**Kamu Personeli**	**37**	**75,5**
	Özel Sektör Çalışanı	7	14,3
	Diğer	5	10,2
Görev Yapılan Birim	İl/İlçe Müdürlüğü	6	12,8
	Güvenlik Hizmetleri	**21**	**44,7**
	Gençlik Hizmetleri	3	6,4
	Diğer	17	36,2

Tablo 1. incelendiğinde, çalışmaya toplam da 49 birey katılım göstermiştir. Katılımcıların cinsiyet dağılımının dengeli olduğu görülmektedir. Katılımcıların %51'i kadın (n=25) ve %49'u erkek (n=24) bireylerden oluşmaktadır. Yaş dağılımı incelendiğinde, grubun çoğunluğunu 31–40 yaş aralığındaki bireyler oluşturmaktadır (%38,8; n=19). Bunu %36,7 oranıyla 41 yaş ve üzeri katılımcılar (n=18) izlemekte, 25–30 yaş grubundaki bireylerin oranı %16,3 (n=8), 18–24 yaş grubundakilerin oranı ise %8,2 (n=4) olarak belirlenmiştir.

Eğitim durumuna göre katılımcıların önemli bir kısmının lise mezunu olduğu görülmektedir (%32,7; n=16). Bunu %28,6 ile ön lisans mezunları (n=14), %22,4 ile lisans mezunları (n=11) ve %16,3 ile yüksek lisans mezunları (n=8) takip etmektedir. Bu bulgu, katılımcı grubunun genel olarak orta düzey eğitim seviyesine sahip olduğunu göstermektedir.

Çalışma durumuna göre katılımcıların büyük bir kısmı kamu sektöründe görev yapmaktadır (%75,5; n=37). Özel sektörde çalışanların oranı %14,3 (n=7), "diğer" kategorisinde yer alan katılımcıların oranı ise %10,2 (n=5) olarak saptanmıştır. Bu durum, örneklemin kamu çalışanları ağırlıklı oluştuğunu göstermektedir.

Görev yapılan birim açısından değerlendirildiğinde, katılımcıların %44,7'si güvenlik hizmetlerinde (n=21), %36,2'si diğer birimlerde (n=17), %12,8'i il veya ilçe müdürlüklerinde (n=6) ve %6,4'ü gençlik hizmetlerinde (n=3) görev yapmaktadır. Bu dağılım, örneklem grubunun çoğunlukla güvenlik ve idari birimlerde çalışan personelden oluştuğunu ortaya koymaktadır.

Çalışmaya katılan bireylerin Gençlik ve Spor Bakanlığı'nın iletişim stratejilerinin etkinliği, yapay zekâ destekli uygulamaların kullanımı, güvenlik görevlilerinin iletişim becerileri, dijital kanallar ve teknolojik yeniliklerin kullanımı, kamu kurumlarındaki genç odaklı iletişim politikaları gibi değişkenlerinin düzeylerini gösteren Ortalama istatistiği Tablo 2'de paylaşılmıştır.

Tablo 2. Değişkenlerinin Ortalama Analizi

	N	**Min.**	**Max.**	**Top.**	**Ort.**	**SS.**
Gençlik ve Spor Bakanlığı'nın iletişim stratejilerinin etkinliği	49	1,40	5,00	193,40	3,9469	,83044
Yapay zekâ destekli uygulamaların kullanımı	49	1,40	5,00	184,00	3,7551	,82388
Güvenlik görevlilerinin iletişim becerileri	49	2,00	5,00	193,20	3,9429	,86795

Dijital kanallar ve teknolojik yeniliklerin kullanımı	49	1,25	5,00	193,50	3,9490	,79710
Kamu kurumlarındaki genç odaklı iletişim politikaları	49	1,00	5,00	187,33	3,8231	,85824

Tablo 2.'deki veriler incelendiğinde, katılımcıların Gençlik ve Spor Bakanlığı'nın iletişim stratejilerinin etkinliğine ilişkin algılarının genel olarak yüksek düzeyde olduğu görülmektedir (Ort.=3,94±0,830). Bu bulgu, katılımcıların Bakanlığın iletişim stratejilerini büyük ölçüde etkili bulduklarını göstermektedir. Güvenlik görevlilerinin iletişim becerilerine yönelik ortalama da benzer biçimde yüksektir (Ort.=3,94±0,867); bu durum, kurum çalışanlarının iletişim konusunda olumlu bir izlenim yarattığını düşündürmektedir. Dijital kanallar ve teknolojik yeniliklerin kullanımına ilişkin ortalamanın 3,94±0,797 olması, katılımcıların kurumun dijital dönüşüm ve yenilikçi uygulamalara uyum sağlama düzeyini oldukça olumlu değerlendirdiklerini göstermektedir.

Yapay zekâ destekli uygulamaların kullanımına ilişkin ortalama değerin 3,75±0,823 olduğu görülmektedir. Bu sonuç, yapay zekâ teknolojilerinin kurum faaliyetlerinde belirli ölçüde benimsendiğini ancak diğer değişkenlere kıyasla biraz daha düşük düzeyde algılandığını göstermektedir. Kamu kurumlarındaki genç odaklı iletişim politikalarına ilişkin ortalamanın ise 3,82±0,858 olduğu belirlenmiştir. Bu bulgu, katılımcıların gençlere yönelik iletişim politikalarını genel olarak olumlu değerlendirdiğini, ancak bu alanda iyileştirme potansiyeli bulunduğunu göstermektedir.

Genel olarak ortalamalar 3,75 ile 3,94 arasında değişmektedir. Bu değerler, katılımcıların araştırma kapsamındaki tüm boyutlarda orta-üst düzeyde olumlu görüşe sahip olduklarını ortaya koymaktadır. Standart sapma değerlerinin 0,797 ile 0,867arasında değişmesi, katılımcı görüşlerinin büyük ölçüde tutarlı ve homojen bir dağılım gösterdiğini düşündürmektedir.

Çalışmada kullanılan Gençlik ve Spor Bakanlığı'nın iletişim stratejilerinin etkinliği, yapay zekâ destekli uygulamaların kullanımı, güvenlik görevlilerinin iletişim becerileri, dijital kanallar ve teknolojik yeniliklerin kullanımı, kamu kurumlarındaki genç odaklı iletişim politikaları verilerinin Normallik analizi Tablo 3.'de paylaşılmıştır.

Tablo 3. Verilerin Normallik Analizi

	Kolmogorov-Smirnov[a]			Shapiro-Wilk		
	Statistic	df	p.	Statistic	df	**p.**
Gençlik ve Spor Bakanlığı'nın iletişim stratejilerinin etkinliği	,144	49	,013	,918	49	,002
Yapay zekâ destekli uygulamaların kullanımı	,138	49	,020	,946	49	,025
Güvenlik görevlilerinin iletişim becerileri	,112	49	,171	,927	49	,005
Dijital kanallar ve teknolojik yeniliklerin kullanımı	,219	49	,001	,898	49	,001
Kamu kurumlarındaki genç odaklı iletişim politikaları	,153	49	,006	,911	49	,001

a. Lilliefors Significance Correction

Tablo 3.'de çalışmada incelenen değişkenlerin dağılımlarının normal olup olmadığını ortaya koymak amacıyla Kolmogorov-Smirnov ve Shapiro-Wilk testleri uygulanmıştır. Elde edilen sonuçlara göre, Gençlik ve Spor Bakanlığı'nın iletişim stratejilerinin etkinliği değişkeninde her iki testin de anlamlılık değerleri 0,05'in altında çıkmış olup, değişkenin normal dağılımdan sapma gösterdiği anlaşılmaktadır. Benzer şekilde, yapay zekâ destekli uygulamaların kullanımı değişkeni ve dijital kanallar ile teknolojik yeniliklerin kullanımı değişkenleri de normallik testleri açısından normal dağılımdan farklılık göstermektedir. Güvenlik görevlilerinin iletişim becerileri değişkeninde Kolmogorov-Smirnov testi normallik varsayımını reddetmese de, Shapiro-Wilk testi anlamlı bulunmuş ve normal dağılımın sağlanmadığını göstermiştir. Kamu kurumlarındaki genç odaklı iletişim politikaları değişkeninde de her iki testin anlamlı çıkması, dağılımın normal olmadığını ortaya koymaktadır. Küçük örneklem boyutu nedeniyle Shapiro-Wilk testi daha güvenilir kabul edilmektedir. Bu nedenle, analizlerde parametrik testler yerine non-parametrik testlerin kullanılması uygun görülmüştür. Bu yaklaşım, elde edilen verilerin dağılım özelliklerini dikkate alarak daha güvenilir ve geçerli sonuçlar elde edilmesini sağlamaktadır.

Çalışmaya katılan bireylerin cinsiyet durumları ile Gençlik ve Spor Bakanlığı'nın iletişim stratejilerinin etkinliği, yapay zekâ destekli uygulamaların kullanımı, güvenlik görevlilerinin iletişim becerileri, dijital kanallar ve teknolojik yeniliklerin kullanımı, kamu kurumlarındaki genç odaklı iletişim politikaları puanlarının Mann-Whitney U analizi Tablo 4. paylaşılmıştır.

Tablo 4. Bireylerin Cinsiyet Durumları ile Gençlik ve Spor Bakanlığı'nın İletişim Stratejilerinin Etkinliği, Yapay Zekâ Destekli Uygulamaların Kullanımı, Güvenlik Görevlilerinin İletişim Becerileri, Dijital Kanallar ve Teknolojik Yeniliklerin Kullanımı, Kamu Kurumlarındaki Genç Odaklı İletişim Politikaları Puanlarının Mann-Whitney U Analizi

	Toplam	49			
Kamu kurumlarındaki genç odaklı iletişim politikaları	**Kadın**	**25**	**29,40**	**735,00**	**U= -2,23**
	Erkek	24	20,42	490,00	**p.= ,025**
	Toplam	49			

Tablo 4'te çalışmaya katılan bireylerin cinsiyet durumlarına göre bazı değişkenlerde anlamlı farklılıklar bulunduğu görülmektedir. Gençlik ve Spor Bakanlığı'nın iletişim stratejilerinin etkinliğine ilişkin puanlarda kadın katılımcıların sıra ortalaması 28,72, erkek katılımcıların ise 21,13 olarak belirlenmiştir. Ancak bu fark istatistiksel olarak anlamlı değildir (U=-1,87; p=,061). Dolayısıyla, iletişim stratejilerinin etkinliğine ilişkin algıların cinsiyete göre farklılaşmadığı söylenebilir.

Yapay zekâ destekli uygulamaların kullanımına ilişkin kadın katılımcıların sıra ortalamasının 29,38, erkek katılımcıların ise 20,44 olduğu ve bu farkın istatistiksel olarak anlamlı düzeyde olduğu görülmektedir (U=-2,21; p=,027). Bu sonuç, kadın katılımcıların yapay

zekâ destekli uygulamaların kullanımına ilişkin algılarının erkeklere kıyasla daha yüksek olduğunu göstermektedir.

Dijital kanallar ve teknolojik yeniliklerin kullanımına ilişkin değişkende de kadınların sıra ortalaması 29,28, erkeklerin ise 20,54'tür ve fark anlamlı bulunmuştur (U=-2,18; p=,029). Bu bulgu, kadın katılımcıların kurumun dijital ve teknolojik yenilikleri kullanma düzeyini erkeklerden daha olumlu değerlendirdiğini ortaya koymaktadır.

Kamu kurumlarındaki genç odaklı iletişim politikalarına ilişkin sonuçlar da benzer bir eğilim göstermektedir. Kadın katılımcıların sıra ortalaması 29,40, erkeklerin 20,42'dir ve aradaki fark istatistiksel olarak anlamlıdır (U=-2,23; p=,025). Bu sonuç, kadın katılımcıların genç odaklı iletişim politikalarına ilişkin algılarının erkeklere göre daha olumlu olduğunu göstermektedir.

Güvenlik görevlilerinin iletişim becerilerine yönelik puanlarda cinsiyete göre anlamlı bir fark saptanmamıştır (U=-,775; p=,438). Kadınların sıra ortalaması 26,54, erkeklerin ise 23,40 olup bu fark istatistiksel olarak anlamlı düzeyde değildir.

Genel olarak, yapay zekâ destekli uygulamaların kullanımı, dijital kanallar ve teknolojik yeniliklerin kullanımı ile kamu kurumlarındaki genç odaklı iletişim politikaları değişkenlerinde kadın katılımcıların erkeklere kıyasla daha yüksek algılara sahip oldukları ve bu farklılıkların istatistiksel olarak anlamlı olduğu görülmektedir. Diğer değişkenlerde ise cinsiyete göre anlamlı bir farklılık tespit edilmemiştir.

Çalışmaya katılan bireylerin yaş durumları ile Gençlik ve Spor Bakanlığı'nın iletişim stratejilerinin etkinliği, yapay zekâ destekli uygulamaların kullanımı, güvenlik görevlilerinin iletişim becerileri, dijital kanallar ve teknolojik yeniliklerin kullanımı, kamu kurumlarındaki genç odaklı iletişim politikaları puanlarının Kruskal Wallis H analizi Tablo 5. paylaşılmıştır.

Tablo 5. Bireylerin Yaş Durumları ile Gençlik ve Spor Bakanlığı'nın İletişim Stratejilerinin Etkinliği, Yapay Zekâ Destekli Uygulamaların Kullanımı, Güvenlik Görevlilerinin İletişim Becerileri, Dijital Kanallar ve Teknolojik Yeniliklerin Kullanımı, Kamu Kurumlarındaki Genç Odaklı İletişim Politikaları Puanlarının Kruskal Wallis H Analizi

Tablo 5. İncelendiğinde, Gençlik ve Spor Bakanlığı'nın iletişim stratejilerinin etkinliği, yapay zekâ destekli uygulamaların kullanımı, güvenlik görevlilerinin iletişim becerileri, dijital kanallar ve teknolojik yeniliklerin kullanımı ile kamu kurumlarındaki genç odaklı iletişim politikaları değişkenleri açısından yaş durumları anlamlı bir fark oluşturmamıştır ($p>0,05$).

Katılımcıların yaş grupları arasında sıra ortalamalarına bakıldığında 31-40 yaş aralığındaki katılımcıların tüm boyutlarda daha yüksek algılara sahip oldukları, 41 yaş ve üzeri grubun ise en düşük ortalamaları gösterdiği dikkat çekmektedir. Bu bulgular, yaş ilerledikçe

kurumun iletişim ve teknoloji odaklı uygulamalarına yönelik algının bir miktar azalma eğilimi gösterdiğini, ancak bu farkların istatistiksel olarak anlamlı düzeye ulaşmadığını ortaya koymaktadır.

Çalışmaya katılan bireylerin eğitim durumları ile Gençlik ve Spor Bakanlığı'nın iletişim stratejilerinin etkinliği, yapay zekâ destekli uygulamaların kullanımı, güvenlik görevlilerinin iletişim becerileri, dijital kanallar ve teknolojik yeniliklerin kullanımı, kamu kurumlarındaki genç odaklı iletişim politikaları puanlarının Kruskal Wallis H analizi Tablo 6. paylaşılmıştır.

Tablo 6. Tablo 6.'da Gençlik ve Spor Bakanlığı'nın iletişim stratejilerinin etkinliği, yapay zekâ destekli uygulamaların kullanımı, güvenlik görevlilerinin iletişim becerileri, dijital kanallar ve teknolojik yeniliklerin kullanımı ile kamu kurumlarındaki genç odaklı iletişim politikaları değişkenleri açısından eğitim durumları anlamlı bir fark oluşturmamıştır (p>0,05).

Katılımcıların eğitim düzeyinin sıra ortalamaları dikkate alındığında, lisans ve ön lisans mezunlarının dijitalleşme, yapay zekâ kullanımı ve genç odaklı iletişim politikalarına ilişkin algılarının diğer eğitim gruplarına göre daha yüksek olduğu; lise ve yüksek lisans mezunlarının ise bu alanlarda daha düşük değerlere sahip oldukları söylenebilir. Bu sonuç, eğitim düzeyinin belirli bir noktaya kadar olumlu algıyı güçlendirdiğini, ancak ileri eğitim seviyelerinde bu etkinin dengelendiğini göstermekte olup bu farkların istatistiksel olarak anlamlı düzeye ulaşmadığını ortaya koymaktadır.

Çalışmaya katılan bireylerin çalışma durumları ile Gençlik ve Spor Bakanlığı'nın iletişim stratejilerinin etkinliği, yapay zekâ destekli uygulamaların kullanımı, güvenlik görevlilerinin iletişim becerileri, dijital kanallar ve teknolojik yeniliklerin kullanımı, kamu kurumlarındaki genç odaklı iletişim politikaları puanlarının Kruskal Wallis H analizi Tablo 7. paylaşılmıştır.

Tablo 7'de Gençlik ve Spor Bakanlığı'nın iletişim stratejilerinin etkinliği, yapay zekâ destekli uygulamaların kullanımı, güvenlik görevlilerinin iletişim becerileri, dijital kanallar ve teknolojik yeniliklerin kullanımı ile kamu kurumlarındaki genç odaklı iletişim politikaları değişkenleri açısından istatistiksel olarak anlamlı bir fark bulunmamıştır (p>0,05).

Çalışmaya katılan bireylerin çalışma durumlarına göre sıra ortalamaları dikkate alındığında, kamu kurumu dışındaki katılımcıların (özellikle "diğer" kategorisindekilerin) tüm değişkenlerde daha yüksek algılara sahip oldukları, özel sektör çalışanlarının ise genel olarak en düşük değerlere sahip oldukları görülmektedir. Bu sonuç, kamu dışındaki bireylerin Bakanlık politikalarını ve uygulamalarını daha dışarıdan, olumlu bir bakışla

değerlendirdiklerini düşündürmekte fakat bu farkların istatistiksel olarak anlamlı düzeye ulaşmadığını ortaya koymaktadır.

Çalışmaya katılan bireylerin görev yapılan birim durumları ile Gençlik ve Spor Bakanlığı'nın iletişim stratejilerinin etkinliği, yapay zekâ destekli uygulamaların kullanımı, güvenlik görevlilerinin iletişim becerileri, dijital kanallar ve teknolojik yeniliklerin kullanımı, kamu kurumlarındaki genç odaklı iletişim politikaları puanlarının Kruskal Wallis H analizi Tablo 8. paylaşılmıştır.

Tablo 9.'da çalışmaya katılan bireylerin kamu hizmetlerine katılımı, kamu hizmetlerine erişim ve memnuniyeti, kurumlara yönelik tutumları, yürütülen iletişim ve toplumsal katılım durumları ile Gençlik ve Spor Bakanlığı'nın iletişim stratejilerinin etkinliği, yapay zekâ destekli uygulamaların kullanımı, güvenlik görevlilerinin iletişim becerileri, dijital kanallar ve teknolojik yeniliklerin kullanımı ile kamu kurumlarındaki genç odaklı iletişim politikaları puanları arasında güçlü ve anlamlı pozitif ilişkiler olduğu görülmektedir ($p<0,01$).

Özellikle Gençlik ve Spor Bakanlığı'nın iletişim stratejilerinin etkinliği ile kamu hizmetlerine katılım (r=0,831), kamu hizmetlerine erişim ve memnuniyet (r=0,869), kurumlara yönelik tutum (r=0,869), yürütülen iletişim (r=0,945) ve toplumsal katılım (r=0,641) arasında

yüksek düzeyde anlamlı korelasyonlar saptanmıştır. Bu bulgu, Bakanlığın iletişim stratejilerinin etkinliğinin, bireylerin kamu hizmetlerine katılımını, erişimini ve memnuniyetini, kurumlara yönelik tutumlarını ve toplumsal katılım düzeylerini olumlu yönde etkilediğini göstermektedir.

Yapay zekâ destekli uygulamaların kullanımı da benzer biçimde güçlü ilişkiler göstermektedir. Bu değişken ile kamu hizmetlerine katılım (r=0,836), kamu hizmetlerine erişim ve memnuniyet (r=0,835), kurumlara yönelik tutum (r=0,604), yürütülen iletişim (r=0,608) ve toplumsal katılım (r=0,895) arasında anlamlı pozitif korelasyonlar bulunmuştur. Bu sonuç, yapay zekâ destekli uygulamaların kullanımının bireylerin kamu hizmetlerine yönelik deneyimlerini ve toplumsal katılımı artırıcı bir etkisi olduğunu ortaya koymaktadır.

Güvenlik görevlilerinin iletişim becerileri ile ilgili olarak da tüm boyutlarda anlamlı pozitif ilişkiler mevcuttur. Kamu hizmetlerine katılım (r=0,679), kamu hizmetlerine erişim ve memnuniyet (r=0,693), kurumlara yönelik tutum (r=0,858), yürütülen iletişim (r=0,810) ve toplumsal katılım (r=0,559) ile korelasyon değerleri, güvenlik personelinin iletişim becerisinin, bireylerin kamu hizmetleri deneyimi ve tutumları üzerinde belirgin bir etkisi olduğunu göstermektedir.

Dijital kanallar ve teknolojik yeniliklerin kullanımı ile tüm boyutlar arasındaki korelasyonlar oldukça yüksek bulunmuştur: kamu hizmetlerine katılım (r=0,887), kamu hizmetlerine erişim ve memnuniyet (r=0,823), kurumlara yönelik tutum (r=0,885), yürütülen iletişim (r=0,899) ve toplumsal katılım (r=0,775). Bu durum, dijital ve teknolojik araçların etkin kullanımının bireylerin kamu hizmetleri ile etkileşimini ve kurumsal algısını güçlendirdiğini göstermektedir.

Kamu kurumlarındaki genç odaklı iletişim politikaları da tüm değişkenlerle pozitif ve anlamlı ilişkiler sergilemektedir. Sırasıyla kamu hizmetlerine katılım (r=0,773), kamu hizmetlerine erişim ve memnuniyet (r=0,688), kurumlara yönelik tutum (r=0,728), yürütülen iletişim (r=0,778) ve toplumsal katılım (r=0,773) ile anlamlı korelasyonlar gözlenmiştir. Bu bulgu, genç odaklı iletişim politikalarının hem bireylerin kamu hizmetlerine yönelik davranışlarını hem de toplumsal katılım düzeylerini destekleyici bir etkisi olduğunu ortaya koymaktadır.

Genel olarak, değişkenler ile kamu hizmetlerine katılım, erişim ve memnuniyet, kurumlara yönelik tutum, yürütülen iletişim ve toplumsal katılım arasında güçlü ve anlamlı pozitif ilişkiler bulunmaktadır. Bu sonuç, iletişim stratejilerinin, yapay zekâ ve dijital

uygulamaların, güvenlik personelinin iletişim becerilerinin ve genç odaklı politikaların, bireylerin kamu hizmetleri deneyimi ve toplumsal katılımını desteklediğini açık bir şekilde göstermektedir.

5. Tartışma ve Sonuç

5.1. Tartışma

Bu çalışmada, Gençlik ve Spor Bakanlığı'nın (GSB) iletişim stratejilerinin etkinliği, katılımcıların algılarına göre yapay zeka destekli uygulamalar, güvenlik personelinin iletişim becerileri, dijital kanallar ve gençlere yönelik iletişim politikaları üzerinde durularak incelenmiştir. Sonuçlar, katılımcıların genel olarak tüm boyutlarda orta düzeyde olumlu görüşlere sahip olduğunu göstermektedir.

Öncelikle demografik dağılıma bakıldığında, katılımcı grubunun % 51'i kadın , % 49'u erkek olup, çoğunluğu 31-40 yaş aralığındadır. Bu, örneklemin gençlik hizmetlerine aktif olarak katılan veya bu hizmetleri sağlayan bireylerden oluştuğunu göstermektedir. Bu bağlamda, hem yaş aralığı hem de sektör dağılımı, gençlik politikaları için önemli veriler olarak hizmet etmekte olup, literatürde yer alan ve " gençlerin dijital kullanıma daha yatkın " olduğunu belirten bulgularla örtüşmektedir (UNICEF ve LSE, 2011, s. 11-12) .

Bulgulara göre katılımcılar kurumun iletişim stratejilerini, güvenlik personelinin iletişim becerilerini, dijital kanalların ve teknolojik yeniliklerin kullanımını çok olumlu (ortalama ≈ 3) olarak değerlendirdiler. 94). Bu bulgu, kurumların gençlerle kurduğu iletişim süreçlerinde dijital içerik / kanal kullanımına ilişkin stratejik yaklaşım ve politika uygulamalarının iyi algılandığını göstermektedir. Bu bulgu, Türkiye'deki kamu kurumları üzerinde yapılan ve bakanlıkların sosyal medyayı öncelikli olarak tek yönlü bilgilendirme amacıyla kullandığını ortaya koyan bir çalışmayla çelişmektedir. Gençlik ve Spor Bakanlığı'nda iletişimin literatürde (Boztepe - Taşkıran, 2016, s. 52) belirtilen geleneksel uygulamalardan farklı olarak daha katılımcı ve etkileşimli bir yapıya bürünmesi dikkat çekicidir.

Yapay zeka destekli uygulamalar için ortalama puan diğer değişkenlere kıyasla biraz daha düşüktür (≈ 3) . 75) dikkat çekici bir bulgudur. Bu bulgu, iletişim teknolojilerinin kamu kurumlarında hızla yaygınlaşmasına rağmen, yapay zekâ destekli iletişim ve hizmet modellerinin henüz tam olarak yerleşmediğini göstermektedir. Bu bulgu, Türk kamu yönetiminde dijital dönüşüm ve uyum sürecinin hâlâ tamamlanmamış olduğunu gösteren rapor sonuçlarıyla tutarlıdır. Ekonomik İşbirliği ve Kalkınma Örgütü (OECD) , " Türkiye Dijital

Hükümet İncelemesi " raporunda, kamu kurumlarının dijital hizmetlerde ilerleme kaydettiğini, ancak iç kapasite, veri altyapısı ve personel becerileri konusunda iyileştirilmesi gereken alanlar bulunduğunu vurgulamaktadır (OECD, 2023, s . 17-18) .

Cinsiyete dayalı analizlerde, kadın katılımcıların yapay zeka destekli uygulamalara, dijital kanallara ve gençlere yönelik iletişim politikalarına ilişkin algılarının erkeklere göre daha yüksek olduğu tespit edildi. Bu durum, iletişim teknolojilerine erişim ve kullanım alışkanlıklarında mevcut cinsiyet farklılıklarına işaret ediyor olabilir. Bu sonuçlar, gençler arasında dijital katılım ve medya kullanımındaki cinsiyet eşitsizliklerini inceleyen araştırmalarla örtüşmektedir; örneğin, erkeklerin dijital vatandaşlığa daha yüksek erişime sahip olduğunu gösteren bir çalışma, kadın katılımcıların daha olumlu algılar geliştirdiği bulgusu ışığında dikkatlice değerlendirilmelidir (Korkmaz ve Nefes vd . , 2023, s. 39) .

Güvenlik personelinin iletişim becerilerine ilişkin yüksek algı ve diğer değişkenlerle anlamlı pozitif ilişkiler, hizmet sunan kurumlarda “belirli kullanıcı temas noktalarındaki personelin ” hizmet algısı ve kurum -vatandaş ilişkisi üzerindeki rolünü doğrulamaktadır. Bu durum, gençlik ve spor tesislerindeki güvenlik birimlerinin yalnızca fiziksel güvenliğe değil, aynı zamanda kurumun gençlerle iletişim ve etkileşimine de katkıda bulunduğunu göstermektedir. Bu bulgu, gençlik merkezlerinde genç bireylere yönelik hizmetlerin katılım ve gönüllülük düzeylerini artırabileceğini gösteren gençlik politikaları literatürüyle örtüşmektedir (Lüküslü, 2018, s. 9).

Tüm analizlerde, katılımcıların kamu hizmetlerine katılımı, erişimi ve memnuniyeti ile değişkenler arasında güçlü ve önemli olumlu ilişkiler tespit edilmiştir. Bu durum, kurumsal iletişim stratejilerinin hizmet süreçleri üzerindeki etkisini göstermektedir. Bu sonuç, gençlik politikasının ana unsurlarından biri olan “bilgilendirme ve erişim” konularının önemine dair literatürdeki vurgu ile uyumlu bir görünüm sunmaktadır (Youth Policies in Turkey – Youth Wiki, 2018, s. 4).

Sonuç olarak, bu araştırmanın sonuçları literatürdeki genel eğilimlerle örtüşmektedir. Ancak gençlik ve spor alanındaki iletişim stratejilerinin, dijitalleşme, yapay zeka entegrasyonu ve kurum çalışanlarının (özellikle güvenlik ve gençlik hizmetleriyle ilgili personelin) iletişim yeteneklerinin gençlerin kamu hizmetlerine katılma durumunu etkilediğine dair özgün bulgular sunmaktadır. Bununla birlikte, yapay zeka uygulamalarına dair algı seviyesinin diğer etkenlere kıyasla nispeten düşük olması ve demografik özellikler (yaş, eğitim düzeyi, çalışılan birim) açısından anlamlı farklılıkların gözlemlenmemesi, uygulama ve politika düzeyinde dikkate alınması gereken maddeler olarak öne çıkmaktadır.

5.2. Sonuç

Çalışmanın bu bölümünde, Gençlik ve Spor Bakanlığı'nın iletişim stratejileri, yapay zekâ destekli uygulamalar, güvenlik görevlilerinin iletişim becerileri, dijital kanallar ve teknolojik yenilikler ile kamu kurumlarındaki genç odaklı iletişim politikalarının, bireylerin kamu hizmetlerine katılım, erişim ve memnuniyet, kurumlara yönelik tutum, yürütülen iletişim ve toplumsal katılım üzerindeki etkilerinin sonuçları paylaşılmıştır.

Katılımcıların genel olarak orta-üst düzeyde olumlu algılara sahip olduğunu görülmektedir. Gençlik ve Spor Bakanlığı'nın iletişim stratejilerinin etkinliği, güvenlik görevlilerinin iletişim becerileri ve dijital kanallar ile teknolojik yeniliklerin kullanımı yüksek düzeyde algılanmıştır. Yapay zekâ destekli uygulamalar ve genç odaklı iletişim politikaları da olumlu değerlendirilmiş, ancak diğer boyutlara kıyasla biraz daha düşük düzeyde algılanmıştır.

Demografik değişkenler açısından, cinsiyetin bazı algılarda anlamlı farklılıklar yarattığı görülmüştür. Kadın katılımcılar, yapay zekâ destekli uygulamaların kullanımı, dijital kanallar ve teknolojik yeniliklerin kullanımı ile genç odaklı iletişim politikaları boyutlarında erkeklere göre daha yüksek algı sergilemiştir. Yaş, eğitim, çalışma durumu ve görev yapılan birim açısından ise istatistiksel olarak anlamlı farklar gözlenmemiştir. Bununla birlikte, 31–40 yaş grubunun ve doğrudan hizmet birimlerinde görev yapan katılımcıların genel olarak algılarının daha yüksek olduğu tespit edilmiştir.

Bütün değişkenler ile kamu hizmetlerine katılım, erişim ve memnuniyet, kurumlara yönelik tutum, yürütülen iletişim ve toplumsal katılım arasında güçlü ve anlamlı pozitif ilişkiler olduğu tespit edilmiştir. Özellikle iletişim stratejilerinin etkinliği ve dijital kanalların kullanımının, bireylerin kamu hizmetleri deneyimi ve toplumsal katılımı üzerinde belirgin bir destekleyici etki sağladığı görülmüştür. Yapay zekâ destekli uygulamalar ve güvenlik görevlilerinin iletişim becerileri de bu etkiyi güçlendiren unsurlar olarak öne çıkmaktadır. Genç odaklı iletişim politikaları ise, hem bireylerin kamu hizmetlerine yönelik tutumlarını hem de toplumsal katılım düzeylerini olumlu yönde etkilemektedir.

Sonuç olarak, Bakanlığın iletişim stratejileri, teknolojik yenilikler ve genç odaklı politikalar, bireylerin kamu hizmetleri deneyimini ve toplumsal katılımını artırmada etkili araçlar olarak değerlendirilmektedir. Bu bulgular, kamu kurumlarının iletişim uygulamalarında dijitalleşmeye ve genç odaklı yaklaşımlara ağırlık vermesinin önemini ortaya koymaktadır.

ÖZET

Tüketim odaklı yaşam tarzı ve bu yaşam tarzının dayattığı standart beden ölçüleri ve küreselleşmiş güzellik algısı, bedeninden memnun olmayan dahası bedenine yabancılaşan kitleler inşa etmektedir. Bahse konu bilinçli inşa reklam aracılığıyla daha hızlı gerçekleştirilmektedir. Parlak renkler, canlı müzikler ve ikna edici görseller eşliğinde iğfal edilen bilinç, bedeni farkında olarak veya olmayarak nesne formuna dönüştürmektedir. Bu dönüşüm toplumsal cinsiyet bağlamında kadın açısından çok daha yoğun bir görünüm kazanmaktadır. Nitekim reklam, kadını destekleyici ve güçlü söylem ve görüntülerin aksine, tecimsel çıkarlar uğruna baskı altına almaktadır. Bu araştırmada amaç markaların kadın bedenine yönelik nesneleştiren yaklaşımını markalar özelinde değerlendirmeyi amaçlamaktadır. Amaçlı örneklem tekniği ile seçilen markalara ait reklamlarda yer alan imgeler nitel araştırma yöntemi olan durum analizi kullanılarak incelenmiştir. Araştırmanın toplumsal cinsiyet ve kadın araştırmaları literatürüne katkı sunması öngörülmektedir. Ayrıca reklam araştırmaları açısından da ilgili araştırma değerlidir. Sonuç olarak ürün ambalajı ile kadın bedeni arasındaki diyalektik ilişkiye ve kadın bedeninin estetize edilmiş bir nesne olarak betimlendiği sonuçlarına ulaşılmıştır.

WOMAN IMPRISONED IN THE BOTTLE: AN ANALYSIS OF THE OBJECTIFIED FEMALE BODY IN ADVERTISING VISUALS

ABSTRACT

The consumption-oriented lifestyle, and the standardized body measurements and globalized beauty standards imposed by it, construct masses of individuals who are dissatisfied with, and moreover, alienated from their own bodies. The aforementioned conscious construction is realized more rapidly through the medium of advertising. Consciousness, seduced by bright colors, vibrant music, and persuasive visuals, knowingly or unknowingly transforms the body into an object form. This transformation takes on a significantly more intense appearance for women within the context of gender. Indeed, advertising, contrary to empowering and

supportive rhetoric and imagery, subjects women to pressure for the sake of commercial interests. This study aims to evaluate brands' objectifying approach towards the female body specifically concerning certain brands. Images featured in the advertisements of purposefully sampled brands were analyzed using case study analysis, a qualitative research method. The research is anticipated to contribute to the literature on gender and women's studies. Furthermore, the relevant research is valuable for advertising studies. In conclusion, the findings reveal a dialectical relationship between product packaging and the female body, and the depiction of the female body as an aestheticized object.

Keywords: Advertising, Gender, Objectification, Case Study

1. GİRİŞ

Toplumsal yapılar içerisinde kadın ve erkek arasındaki diyalektik ilişki salt biyolojik farklılıklarla açıklanamayacak kadar geniş kapsamlı bir olgudur. Kültürel kodlar, ideolojik söylemler kadın ve erkeğe bir takım sorumluluklar yükleyerek toplumsal cinsiyet bağlamında inşa edilmektedir. Toplumsal cinsiyet, kadın ve erkeğe toplum tarafından atfedilen sosyal roller, davranış kalıpları ve yükümlülükleri açıklayan, bilhassa kadın ve erkek arasındaki güç ilişkilerini akabinde eşitsizlikleri gün yüzüne çıkartan bir olgu olarak tanımlanmaktadır. Tarih boyunca kadın, eril hegemonya karşısında eşitsizlik ve özgürlük mücadelesi vermiştir. Her ne kadar kadın ve erkek eşittir nutukları atılsa da mutlak bir gerçek vardır ki gelenekçi toplumsal yapılar erkeği merkeze alan bir hiyerarşi modeli üretirken; kadını daima erkeğin gölgesinde yer alan pasif varlıklar olarak resmetmektedir.

Toplumsal cinsiyet bağlamında eşitsizliklerin en görünür modellerinden biri de beden politikalarıdır. Toplumsal onay mekanizmaları doğrultusunda kadın bedeni; ince belli, fit bir görünüme sahip ve kışkırtıcı özellikleri ile dikkat çeken tüketim nesnesi olarak temsil edilmektedir. Bunun anti tezi durum olan asi, özgürlükçü, öznelliği arayan, bireysel kimlik kazanım mücadelesi veren kadınlar ise toplum tarafından dışlanmaktadır. Çünkü kadın erkeğin boyunduruğu altında yaşayan, salt itaat eden bir nesne olarak kurgulanmaktadır. Bu nesneleştirme özelinde kadın, erkeğin egemenliği altında özel alana hapsedilerek belirli görevler üstlenen (ev işleri, çocuk bakımı, alışveriş vb.) aynı zamanda daima bakımlı, idealize edilen beden prototipine sahip mükemmel kadın olmaları dayatılmaktadır. Hâkim eril modernitesi, kadın bedenini sürekli denetim altında tutarak istediği kalıba sokmakta; estetik kodlar ve cinsiyetçi yaklaşımlarla sürekli baskı kurmakta; bu baskı ise beden memnuniyetsizliği, benliğin değersizleştirilmesi ve kimliksizleşme vb. sonuçlar üretmektedir. Nitekim ataerkil sistem, kadının aktör olarak temsil edilmesinin aksine, daima erkek egemenliği altında yaşayan ve bu duruma sessiz kalan nesne üretmeyi amaçlamaktadır.

Kapitalizmin beslediği medyanın lokomotif araçlarından biri olan reklamlar, toplumsal cinsiyet ideolojilerinin üretildiği en güçlü mecralardan birisidir. Reklam, bir ürünü potansiyel tüketicisine tanıtmayı amaçlayan (Sadakaoğlu, 2018, s. 25), bir ürünü satan (Tekdemir Dökeroğlu & Gökçearslan, 2020, s. 315) salt tecimsel amaçların ötesinde toplumsal ideaların, normların ve ideolojilerin şekillenmesinde aktif rol oynayan iletişim araçlarından biri olmaktadır. Söz gelimi reklamlarda kadın bedeni yeri geldiğinde cinselliği çağrıştıran erotik bir obje olurken yeri geldiğinde ise anne temsili ile sunulan ama her daim tüketimi teşvik eden bir araç olarak temsil edilmektedir. Reklam pratikleri, patriarkal ideoloji eksenli inşa edildiğinden

eril göze hitap etmeyen kadın bedeni bu merkez dışına atılmaktadır. Burada kadın, bir bütün olarak ele alınmamakta aksine parçalara ayrılarak salt anatomik yönleri ile dikkat çeken bir unsur olmaktadır. Bu yönüyle kadın bedeni reklamlarda nesneleştirme pratiğinin birincil örneğini oluşturmaktadır.

Bu çalışma, 5 farklı markaya ait reklam görsellerinde kadın bedeni tasvirini toplumsal cinsiyet ve nesneleştirme pratiği bağlamında incelemeyi amaçlamaktadır. Bu doğrultuda seçili reklam görsellerinde kadın bedeninin toplumsal cinsiyet ve nesneleştirilme pratikleri bağlamında incelemesi nitel araştırma yöntemi olan çoklu durum analizi kullanılarak incelenmiştir.

2. TOPLUMSAL CİNSİYET, REKLAM VE KADIN BEDENİ

Cinsiyet kişinin biyolojik varlığını temel alarak kullanılan bir kavram olmakla birlikte, toplumsal cinsiyet ise kişinin biyolojik varlığına, toplum tarafından yüklenen bir takım anlamlar ve bu anlamlar göz önünde bulundurularak bazı beklentilerin kullanımını ifade etmektedir (Kalaman & Bat, 2014, s. 128). Bu bağlamda cinsiyet kavramı, kadın ve erkek bedenlerini açıklayan anatomik, fizyolojik ayrımı ifade etmek için kullanılırken, (Akbulut Uzun & Özkan, 2020, s. 166) toplumsal cinsiyet cinslere gönderme yaparak aktüel ya da normlara dayalı kültürel davranış kalıplarını içermektedir (Ulusoy, 1999, s. 50). Bu minvalde toplumsal cinsiyet kavramı, (Ruoho & Torkkola, 2018, s. 76) biyolojik kökenli olanla toplumsal olanı ayırt etmek amacıyla kullanılan bir düşünce olmakla birlikte, kadın ve erkek arasındaki ayrımın cinsiyetten kaynaklanmadığı, toplum temelli tasarlandığı belirtilmektedir (Acar Erdol vd., 2019, s. 794). Toplumsal cinsiyet, sosyal yönden kadın ve erkeğe atfedilen roller ve sorumluluklar olup akabinde, kadın ve erkeği biyolojik cinsiyetten farklı kılarak, onların sosyal ve kültürel yönden tanımlanmasını ve buna bağlı olarak toplumların bu iki cinsi birbirinden ayırt etmesi (Kaypak, 2014, s. 344) için kullanılan kavram olarak değerlendirilmektedir. Akalın & Baş (2018, s. 113)'ın vurguladığı gibi, kadın ve erkeğin erillik-dişilik anlatımı üzerinden her iki cinse atıfta bulunan toplumsal cinsiyet, belli başlı davranış modelleri üzerinde şekillenen sosyal yapılanmalardır. Söz konusu toplumsal cinsiyet, toplumun arzuladığı kalıplaşmış kadın ve erkek modellerini içermektedir. Bu kalıplar çerçevesinde, kadın ve erkek rolleri, kadın ve erkeğin konuşması, davranış kalıpları, giyim kuşam vb. kodlar yer almakta (Yüksel, 1999, s. 70) beraberinde kavram, kadın ve erkekler arasındaki toplumsal, psikolojik ve kültürel farklara dikkat çekmektedir (Başak, 2010, s. 55). Nitekim toplumsal cinsiyet kimlikleri bu kavramlar çerçevesinde şekillenmektedir (Araüna vd., 2017, s. 177).

Toplumsal cinsiyet olgusu, dünyanın çok sayıda ülke ve toplumunda yaşanan eşitsizlik sorunsalı olmakla birlikte, kadın ve erkeğe atfettirilen değerler, roller ve kalıplar hiyerarşik olarak erkeğin "üstte ve önde" yer alması, toplum tarafından belirlenmiş cinsiyetinden dolayı ayrı tutulan kadın, erkekten ayrı öteki olarak (Bingöl, 2014, s. 113) konumlanmaktadır. Bu patriarkal toplum yapısında (Telseren Ömeroğlu, 2024, s. 30) toplumsal cinsiyet kalıpları, doğum öncesinde kız bebekler için pembe, erkek bebekler içinse mavi renklerin seçilmesi (Gürhan, 2010, s. 60) akabinde mesleklerin kız ve erkek çocuklara göre farklılaştırılması, küçük yaşlardan itibaren dayatılmaktadır (Hafızoğlu & Altan, 2021, s. 45). Bu patriarkal yapı içerisinde kadınlar anne, eş, ev işlerinden sorumlu domestik görevler üstlenen bireyler iken; erkekler sert, güçlü, ev içi ekonomik sorumlulukları görev edinen, kamusal alanda faaliyet gösteren bireyler olarak resmedilmektedir (Soydan & Küçükşen, 2022, s. 24). Bu durum toplumsal cinsiyet rollerinin kadın ve erkek arasında bir çok noktada farklılık göstermesine yol

açmakla birlikte, edilgen bir konumda yer alan kadınların rollerinin ev işleri, anne, eşle ilgili sorumluluklar (Tuna Uysal vd., 2019, s. 216) mutfak, çocuk bakımı gibi (Doğan, 2021, s. 106) belirli spesifik alanlarla sınırlandırıldığı görülmektedir. Dolayısıyla toplumsal cinsiyet kavramı, biyolojik cinsiyet üzerinden içinde yaşadığımız toplumun kadın ve erkeklere yüklediği roller, davranışlar ve sorumlulukları barındıran (Tansel Akpınar & Erkem Gülboy, 2023, s. 48) bir dizi işlev olarak değerlendirilebilir.

Toplumsal cinsiyetin olgusunun bireylerin kimlik ve rolleri üzerinde bir takım söylemlerinin yanı sıra, beden algısının da bu sosyal yapı içerisinde önemi yadsınamaz gerçektir. Bu doğrultuda, toplumsal cinsiyetin beden algısı üzerindeki etkilerinin detaylı bir şekilde ele alınması gerekmektedir. Beden imajı (algısı) (Kılıç, 2025, s. 33), kişinin fiziksel görünümü hakkında ne düşündüğünü ve hissettiğini ifade etmekle birlikte, gündelik yaşamda beden imajını olumsuz etkileyebilecek olaylar meydana getirmekte ve buna da "beden imajı tehditleri ve zorlukları" denilmektedir; bu durum, kişinin kendisini iyi hissetmesi noktasında tehdit unsuru oluşturmaktadır (Cash vd., 2005, s. 198). Buna bağlı olarak beden algısı daima ideali beraberinde getirmekle birlikte, ideal bedene yüklenen anlamlar ekseriyetle; iyilik, sağlıklılık, güzellik, erdemlik gibi değerleri kapsarken, anti- ideal ise kötülük, çirkinlik, hastalık gibi negatif kodlarla inşa edilmektedir (Topaloğlu, 2010, s. 268). Bedenin biyolojik temelli bir olgu olmaktan çıkıp toplumsal varlığa evrimi, hem kadın hem erkek için toplumsal sermaye formuna dönüştürmüştür. Ne var ki bedenin toplumsal sermaye haline gelmesi bilhassa kadınlar üzerinde ki tahakkümü gözler önüne serilmektedir (Kurtdaş, 2021, s. 187). Bu bağlamda cinsiyet normlarına bağlılık derinleştikçe; kadınların, kadınsı görünüm kazanabilmek amacıyla dikta edilen ideal beden ölçülerini karşılama yönünde baskıyla karşılaştıkları; bahsi geçen durumun kadın bedeninin "ideal ince" standartlar çerçevesinde metalaştırıldığı gözlenmektedir (Uluyol, 2023, s. 81; Yasa, 2021, s. 496). Foucault'un tutumuyla insan bedenlerini makine gibi gören kapitalist yaklaşımın bedenleri, toplumsal prestij ve toplum tarafından onaylanma aracı haline getirdiği; bu çerçeveye ek olarak özellikle kadınların her koşulda güzel görünmelerini (Gören Kekeç, 2025, s. 28; Uğur, 2021, s. 1362) zorunlu kılan idealize edilmiş beden kurgusunun önemine dikkat çekmektedir.

Son yıllarda iletişim araçları, medya gibi etkenler nedeniyle cinsiyete has ideal beden normlarının başka kültürlerde de tatminsizliği artırdığı düşünülmektedir (Uluyol, 2023, s. 75). Medya araştırmaları, farklı medya biçimlerinin insanların beden imajı kaygılarını ve davranış niyetlerine yön vermede kritik bir öneme sahip olduğunu ortaya koymaktadır (Huang vd., 2020). Medya, özellikle kadın bedenlerinin inşa edilmesinde yönlendirici bir güce sahip olup; toplumsal güzellik baskısı bireyleri strese sokarak, kişinin bedeninden utanmasına sebep olacak (body shaming) bir zorlamaya maruz bırakarak (Taştekin & Şahin, 2025, s. 1726) örtük baskı oluşturmaktadır. Buna bağlamda ideal bedenlerin çeşitli kitle iletişim araçlarıyla belirli normlara sokulması, örneğin fit bir vücut, düzgün burun, idealize edilen boy ve bedene sahip olma gibi standartlar bireylerde beden tatminsizliğine yol açmış; bu tatminsizlik fitness, giyim, kozmetik vb. tüketim ürünlerine yönelimi artırarak tüketici kitlesi oluşturulmuştur (Topaloğlu, 2010, s. 271) . Özellikle reklamların ilgi odağı "kadınlar" olduğundan kimi zaman temizlik, giyim, güzellik vb. ürünlerin tüketicisi noktasında özne konumunda lans edilirken, kimi zaman erkeklere hitap eden tüketim ürünlerinin pazarlanması hususunda "nesne" konumunda sunulmuştur (Metin Açer, 2022, s. 327). Nihayetinde beden, tecimsel pratikler söyleminin

tahakkümü gücüyle belirlenmiş, idealize edilen bedeninin bireysel özgünlükten, kişisel farklılıktan uzaklaştırılarak; fizyonomiye, fiziksel hatlara, dış çevreye toplumun beklentilerine ve görünürlük ölçütlerine göre biçimlendirilmiş "ifadesiz" beden kurgulanmasına yol açmaktadır (Köse, 2013, s. 88). Bu veriler ışığında, toplumsal örgü tarafından sürdürülen politikalar, ideal olanı belirleyerek tek tip standartlaşmış beden algısı yaratmaktadır (Demir Parlak, 2022, ss. 882-893). Bu standartlaşmış beden algısı, medya ve reklam pratikleri aracılığıyla ekseriyetle eril bakış açısıyla kanalize edilmekte; bu doğrultuda toplumsal cinsiyet temelli eşitsizlikleri savını güçlendirdiği görülmektedir.

3. NESNELEŞTİRME TEORİSİ VE KADIN BEDENİNİN NESNELEŞTİRİLMESİ

Tarihsel ve toplumsal evrede iktidar ilişkileri, özne olarak şekillendirilen bedeni, ideolojik olarak yansıtarak; denetlenen, boyun eğdirilen ve yönlendirilen bir mekanizma olarak tanımlamakta özellikle kapitalizmin büyümesiyle kadın bedeni, özneleştirilme söylemi üzerinden sistemin sirkülasyonu için metalaştırılmaktadır (Özdemir, 2016, s. 267). Bahse konu metalaştırma diğer bir ifadeyle kadın bedeninin meta, seks objesi ya da erkeğe kıyasla aşağı konumda temsil edilmesi geçmişten günümüze devam eden bir durumdur (Aydınlıoğlu, 2019, s. 260). Özellikle ataerkil toplum düzeninde kadınların ikincil konumda yer alması (Kasap vd., 2018, s. 627) erkeklere şüphesiz öncelik verirken kadınlara da birtakım kısıtlamalar getirmektedir (Altay, 2019, s. 417). Nitekim kapitalizmin doğurduğu sonuçlardan birisi olan cinsiyetçilik, kadınların cinsiyet işlevleriyle görünürlük kazanması, patriyarkal sermayeye hizmet sağlayan bir araç olarak şekillenmesinde etkili olmaktadır (Ergül Güvendi, 2023, s. 111). Bilhassa medyada sergilenen kadın imajının spesifik beden ölçüleri, saç, makyaj ve giyim kalıpları medyanın şekillendirdiği kadın imajında açıkça görülmektedir (Karabacak & Sezgin, 2016, s. 310). Bu bağlamda görsel ve anlatısal üslubun yoğun olduğu reklamlar, standartları üreten ve şekillendiren en etkili mecralardan biri olarak karşımıza çıkmaktadır. Aydın & Kuldaş (2024, s. 555)'a göre reklam içeriklerinde cinsiyetçi içerikli söylemler, kadının nesneleştirilmesi örtük mesajlarla sunulmakta, eril hegemonikleşmenin güçlendirilmesi erkeklerin kadınlar üzerindeki dominant temsillerine yer verilirken, kadınların pasifize edildiği, başka bir deyişle (Hülür & Kalafat Çat, 2018, s. 11) muhafazakâr ideoloji ekseninde yer alan ataerkil söylemin kadın cinsiyetinin sömürülmesi noktasında farklı bir yaklaşım oluşturarak (Darıcı, 2017, s. 25) söz konusu tüketim kalıpları dâhilinde kadınların süs objesi, cinsel obje ve mutluluk nesnesi olarak görülmeye başlandığı ve topluma da bu minvalde empoze edildiği görülmektedir. Bu bağlamda kadın imgesinin güzel, çekici ve seksi cinsel temalarla şekillendiği reklamlar, kadın bedenini nesneleştirerek tüketilebilir bir unsur haline dönüştürürerek (Birol, 2022, s. 199) (Ergül Güvendi, 2023, s. 110) kadın bedeni dikkat çekme, ürünle çağrışım kurma, duygusal bağ kurma vb. stratejilerle pazarlama aracı olarak da metalaştırıldığı gözlenmektedir. Dolayısıyla tüketim kültürünün eksenine yerleştirilen kadının idealize edilen bedene ulaşabilmek adına metaları satın alarak tüketmesi yönünde vurgu yapılmaktadır (Özdemir, 2016, s. 245). Mevcut durumda, kadınların cinsel obje olarak kullanılması (Çelik, 2024, s. 102; Özer, 2021, s. 48; Yalazan & Özsoy, 2021, s. 152) reklam içeriklerinde resmedilen bir olgu olarak karşımıza çıkmaktadır. Benzer şekilde reklamlarda kadına yönelik mutluluğun güzellik, gençlik ve ince görünümle kazanılabileceği; bu mutluluğun erkek tarafından beğenilmek ve onaylanmak mesajı üzerinden inşa edildiği görülmektedir (Şenkal, 2016, s. 109). Öte yandan reklamlarda kadın özel alana ait bir nesne olarak ve bu alanın rollerine sıkıştırılmış bir biçimde

tasvir edilmektedir (İnceoğlu & Onaylı Şengül, 2018, s. 34). Ancak bu tasvir biçimi kadını özel alanda sınırlandırmakla kalmamakla, (Dumanlı, 2013, s. 135)'ya göre eril bakışın seyrine sunulduğu reklamlarda kadınlar hem seyirlik nesneye hem de ürün ile alınıp satılan bir imgeye indirgenmektedir. Bu reklamlarda kadınların salt teni erkekleri etkilemek için araçsallaştırılmamakta; saçları, dudakları, elbiseleri, beden duruşları karşı tarafa cinsel mesajlar aktarmak amacıyla kullanıldığı gözlenmektedir. Nitekim kadınlar, topuklu ayakkabılar giyerek, makyaj yaparak söz gelimi dişilikleriyle dikkat çekerek, kendini eril perspektif için çekici bir nesne haline getirerek patriyarkal düzen içerisindeki ikincil konumunu bir kez daha şekillendirmektedir (Kula Demir & Yiğit, 2013, s. 463). Kadın reklamlarda erkek için konumlandırılmakta anaç renklerle donatılmış, feminen kıyafetlerle kendi kimliğinden ayrıştırılarak erkeğin ideasındaki kadın olarak tezahür etmektedir (Sarı, 2013, s. 94). Benzer şekilde reklamlarda erkeğe yönelik kışkırtıcı bakışlar ve davranışları temsil eden kadınların kullanıldığı görülmekle birlikte (Karaca & Papatya, 2011, s. 497) özne konumunda olan erkeğin arzusal doyumuna yönelik kadın nesneleştirilerek (Acar, 2023, s. 184) patriyarkal eril iktidarın temsilcisi erkeğin edilgen, nesne konumunda olan kadın üzerindeki denetimini sağlamasına olanak tanımaktadır (Öztürk & Akbulut, 2022, s. 1065).

4. YÖNTEM

4.1.Araştırmanın Amacı

Araştırmanın amacı markaların kadın bedenine yönelik nesneleştiren yaklaşımını markalar özelinde incelemektir. Bu amaç doğrultusunda seçilen reklamlarda kadın bedenini çağrıştıran imgeler nesneleştirme (objectification) yaklaşımı bağlamında değerlendirilmektedir. Reklam endüstrisi bedeni ikna stratejisi olarak kullanma pratiğini uzun yıllardır uygulamaktadır. Özellikle kadın bedeni reklam görsellerinde olduğu kadar ürün ambalajlarına da taşınmıştır. Bu indirgemeci yaklaşım nesneleştirme kapsamında çalışmanın temel amacını oluşturmaktadır.

4.2. Araştırmanın Anakütlesi ve Örneklemi

Araştırma reklam görsellerinde kadın bedeni çağrışımı yapan markaları anakütlesine dahil ederken örneklemine 5 farklı markanın reklam görselini dahil etmektedir. Bu bağlamda amaçlı örneklem belirleme tekniği ile Dove, Coca Cola, Avon, Jean Paul Gaultier ve Gediz Mandıra markalarına ait reklam görsellerindeki imgeler çalışma kapsamına dahil edilmiştir.

4.3. Araştırmanın Kısıtlılıkları ve Önemi

Araştırma amaç bağlamında doygun veri sağladığı öngörülen 5 farklı markanın reklam görselleri ile kısıtlı tutulmuştur. Araştırma konusu bağlamında özgün değildir. Öte yandan örneklemine dahil ettiği markalar ve reklam görselleri bağlamında özgün bir nitelik taşımaktadır. Araştırmanın toplumsal cinsiyet ve kadın araştırmaları literatürüne katkı sunması öngörülmektedir. Ayrıca reklam araştırmaları açısından da ilgili araştırma değerlidir.

4.4. Araştırmanın Yöntemi ve Veri Toplama Tekniği

İlgili araştırma nitel araştırma deseni ile gerçekleştirilmiştir. Veri toplama tekniği olarak ise çoklu durum analizi tekniği benimsenmiştir. Birden fazla duruma yönelik derinlemesine bir inceleme (Creswell, 2018, s. 104; Baş ve Akturan, 2017, s. 216) yürütmek amacıyla çalışmada 5 farklı örneklemden veri toplanarak incelenmiştir. Birden fazla durum incelenerek konuya yönelik derin ve kapsamlı bir betimleme ortaya konulması ve okuyucu açısından konunun detaylarına inilmesi amaçlanmıştır.

4.5. Bulgular ve Analiz

Araştırma kapsamında 5 farklı markanın reklam görselleri nesneleştirme bağlamında incelenmiştir.

4.5.1. Jean Paul Gaultier "Divine Elixir" Reklam Görseli Analizi

Görsel 1 ve 2. Jean Paul Gaultier, t.y.

Jean Paul Gaultier markalı ürün görsellerinde, kadın bedeninin doğrudan referans alındığı bir parfüm şişesine yer verilmektedir. Tasarımı ile dikkat çeken parfüm şişesi göğüs, bel ve kalça hatları belirgin bir kadını andırmaktadır. Beden altın rengi bir üst ile süslenerek estetize edilmiştir. İdeal beden ölçüleri şişe üzerinde açıkça vurgulanırken cinsellik ve erotizm çağrışımı gözlerden kaçmamaktadır. Görsel 2'de ise parfüm şişesi gerçek bir kadın model eşliğinde sunulmaktadır. Gerçek ile temsilin yan yana verildiği görsel kadının nesneleştirilmesi pratiğini pekiştirir niteliktedir. Kadın tüm zarafeti, güzelliği ve cazibesiyle reklam görselinin nesnesidir. Reklamda pazarlanan ve tüketime açık hale getirilen parfümden ziyade bedeninin kendisidir. Satın alınabilir bir metaya indirgenen beden, parfüm şişesi ile gerçeklik ve geçerlilik kazanmaktadır.

Toplumsal cinsiyet düzleminde kadın haz nesnesi temsiline uygun resmedilmektedir. Erkek figürünün olmadığı görselde kadın yine de erkek bakışına (male gaze) sahip değildir. Bakışlar yan tarafa yönelmiş bir şekildedir. Doğrudan karşıya, kameraya bakmayan kadın, ataerkil sistem yapısını doğrulamaktadır.

Kadın modelin üzerindeki kahverengi kıyafet beyaz karlı zemin üzerinde daha fazla görünürlük sağlamaktadır. Toprağın anaç ve üretken doğası tanrıça (divine) figürü ile özdeşleştirilerek mesajın etki gücü arttırılmaktadır. Ayrıca şisenin rengi ile kadın modelin giymiş olduğu kahverengi kıyafet toprak ile uyumludur. Kadının karlı zemin üzerinde uzanmış hali ünlü ressamların tablolarında çizmiş oldukları tanrı (divine) figürlerine referansta bulunmaktadır.

Kadın modelin çevresine yerleştirilmiş olan parfüm şişeleri tanrı temsiline uygun olarak onu seven kullar gibidir. Kadın figür bir parfüm şişesine eliyle dokunarak onu adeta kutsamaktadır.

Öte yandan karlı zemine aldırış etmeksizin üzerinde ince ve transparan bir giysi ile uzanan kadın figür insanüstü bir özelliği çağrıştırmaktadır.

4.5.2. Dove "Celebrate The Many Shapes And Sizes Of Beauty" Görseli Analizi

Dove markası kadın bedeninin hangi formda olursa olsun güzel olduğunu göstermek amacıyla birbirinden farklı kadın vücutlarına has özellikleri yansıtan 7 farklı nemlendirici duş jeli şişesi üretmiştir (Marketing Türkiye, 2017). Dove markasının gerçekleştirmiş olduğu kampanya kadın bedenini belirli şekillere soktuğu ve nesneleştirdiği gerekçesiyle tüketiciler tarafından eleştirilmektedir. Görsel 3'de yer alan vücut şeklindeki şişeler farklı kadınları temsil etmektedir. Bu kadın temsilleri vücutları bağlamında ayrıştırılarak nesne formuna indirgenmektedir.

Toplumsal cinsiyet bağlamında kadının, kimlik edinme ve özne olma mücadelesine katkı sağlanılmazken beden tipleri üzerinden görünürlük kazanması önceliklendirilmiştir. Kadının tek tip ideal beden ölçüsü içerisinde sunulmaması onun toplumsal cinsiyet bağlamında erkek karşısındaki konum ve değerini yükseltmemektedir. Kadının toplumsal rolleri ve sorumlulukları göz ardı edilmekte, bu konuda herhangi bir öneri sunulmamaktadır.

Görsel 3. Marketing Türkiye, 2017

Kadın bedeni, kullanım nesnesi olan bir şişeyle özdeşleştirilmektedir bu açıdan nesneleştirilmektedir. Bedenin tüketim nesnesi üzerinden temsil edilmesi birey olma ilkesine ve insani değerlere aykırı bir durum oluşturmaktadır. Ayrıca satın alınıp tüketilen bir ürünün cinsiyeti temsil etme potansiyeli sorgulanabilir bir durumdur. Buradan hareketle nesneleştirme farklılık anlatısı üzerinden yeniden üretilmektedir.

4.5.3. Avon "The Maximum In You" Görseli Analizi

Görsel 4 ve 5. Avon Worldwide, 2019

Avon markalı parfüm görsellerinde, kadın bedeninin ideal dişil görünümünü vurgulayan geniş kalçalı ve ince belli adeta kum saatini andıran görsel kodlar dikkat çekmektedir. Şişenin boyun kısmına yer alan altın varaklı yaprak desenler ise kadının boynundaki takı, aksesuar vb. resmedilerek nesneye adeta insani silüet kazandırmaktadır. Reklam görselini şekillendiren alevler, ateşi kontrol eden özne konumundaki bir kadın tasvirinin aksine, ateşin kendisine kurban edilen maskülen statüko tarafından nesneleştirilen, öfkesi bastırılmış edilgen kadın figürüne gönderme yaparak örtük baskı uygulamaktadır. Toplumsal cinsiyet bağlamında, kadın figürünün bireylik yitimi söz konusu olup kadının salt kolektif estetik perspektif açısından süblime edildiği görülmektedir. Görsel 2'de ise kadın modelin siyah-beyaz bir eksende yer alarak tıpkı bir heykeli anımsatan duruşu resmedilerek, derin dekolte, keskin hatlar ve arzu uyandıran bakışlar kadını seyir nesnesine dönüştürerek eril iktidarın bakışı altında aşağılamaktadır.

Kadın modelin bu kaotik, vahşi görünümlü coğrafyanın ortasında evcilleştirilen dişil kadın portresi çizilerek; kadının özerkliği pasifize edilmekte tabiri caizse kırılgan, narin vb. yumuşatılmış ifadelerle vitrinsel görünüm kazandırılmaktadır. Dikkat çeken bir diğer unsur ise kadın figürün önden o kadar cazibeli ve kışkırtıcı görünümünün aksine arkasında duran son derece sıradan gölgesidir. Kadının gerçek bedeninin ötesinde suni bir takım unsur ile kadınlığı artırılmakta ve cinsel cazibesi üst düzeye çıkarılmaktadır.

4.5.4. Coca Cola "Introducing Diet Coke by Jean Paul Gaultier" Görsel Analizi

Görsel 6. YouTube, 2012

Coca Cola markasının Diet Coke reklamında, Jean Paul Gaultier tarafından tasarlanan şişelerde özel olarak kadın bedenini hedef gösteren göndermeler yer almaktadır. Şişelerin ince, kıvrımlı formu bel, göğüs ve kalça hatlarına açıkça yer veren reklam görselinde, idealize edilen tek bir kadın prototipi dikkat çekmektedir. Özellikle şişelerin üzerinde yer alan kıyafet, takı ve dövme vb. unsurlar toplumsal dayatmalara karşı çıkarak adeta marjinal bir görünüm kazandırmaktadır. Ancak dantel, file çorap detayı kadın bedenini baştan çıkarıcı, erotik figür olarak kodlayarak maskülen söylem pratiğinde cinselliği çağrıştırarak; bu söylemin zevk açlığını şiddetlendirmekte akabinde, norm dışı yaklaşımları gölgede bıraktığı görülmektedir. Ortadaki şişede yer alan mavi ve beyaz renk bileşenleri her ne kadar saflığı, masumiyeti ve sakinliği temsil etse de reklam dilinin ataerkil düzen çerçevesinde şekillendiği su götürmez bir gerçektir. Diğer görsel ise takı ve bilhassa dövme detayları öne çıkmaktadır. Hâkim eril düzen geleneksel kodlarla biçimlenmekle birlikte bu görselde dövme, öznellik, direniş, asi görünüm ve benim bedenim benim kararım tezini çürüterek, kadın bedenini denetleyen, şekillendiren ve pazarlanabilen bir söylem olarak görücüye çıkarmaktadır. Bir diğer husus ise “diyet” kavramının kadın bedeniyle kurduğu sublime edilmiş ideolojik yansımasıdır. Bu ideolojik yansıma, normatif baskı çerçevesinde standardize edilen ideal kadın bedeni; erkek bedenine kıyasla gözetlenen, denetlenen ve eril bakışın arzulanabilen nesnesi olması için daima ince, fit ve seksi bir görünüm kazanması gerektiği ve bunun da reklam dilinde tüketim ekseninden geçtiği görülmektedir. Erkek bedeninin her halükarda kabul edildiği, ancak söz konusu kadın bedeni olunca belirli kalıplara göre sınıflandırılan reklam dilinin ikiyüzlü yaklaşım sergilediği görülmektedir. Tüm bu göstergeler ışığında kadın bedeni melez siluetinden silikleşerek, salt anatomik farklılıklarıyla gündem olabilmekte, reklam dünyasının eril diyalektiği kadını nesneleştirilerek toplumsal proje haline getirmektedir.

4.5.5. Gediz Mandıra Reklam Görseli Analizi

Görsel 7. Gedizmandira, t.y.

Gediz Mandıra markasının görsel analizinde, incelenen zeytinyağı şişesi kadın bedeninin dikkat çekici yönlerine vurgu yapmaktadır. Mitolojik unsurlar barındıran şişe tasarımında Antik Yunan ve Roma heykellerindeki Afrodit ve Venüs figürlerini çağrıştırarak, kadını güzellik, doğurganlık ve anaç rolüyle konumlandırmaktadır. Görselde salt kadın bedeninin fiziki özellikleri dikte edilerek, kadın bedeninin öznellik ve bireysel kimlik erozyonuna uğrayarak anonim oluşu resmedilmektedir. Ataerkil düzende kadın bedeni, eril bakış çerçevesinde biçimlenmektedir. Eril göze hitap etmeyen kadın bedeni yok hükmünde yer almakta, kadın kendi bedeniyle olan iletişimine yabancılaşmaktadır. Öte yandan estetize edilen ideal formlar dışındaki tüm kadın bedenleri dışlanmakla birlikte kadın bedeni sessiz, itaatkâr ve sergilenebilir bir nesne olarak eril hegemonyanın narsist duygularına seslenmekte ve bu doğrultuda sistemin sessiz şiddetine maruz kalmaktadır.

Cinsiyetçi iktidarın egemen olduğu toplumlarda, Görsel 7'de yer alan anlatı temsilinden de anlaşılacağı üzere kadın özel alana sıkıştırılarak yalnızca domestik görevler ile özdeştirilmekte (mutfak vb.) akabinde "yuvayı dişi kuş yapar" güzellemesi üzerinden kadın, cam fanus metaforuyla tanımlanan bir alana hapsedilerek; ev içi sorumlulukları yerine getiren bununla beraber daima bakımlı, ideal vücut yapılarına sahip olan mükemmel kadın temsili arzulanmaktadır. Bu doğrultuda kamusal alanın erkeğe ait olduğu, kadının bu alandan dışlandığını düalist çerçeveyle açıklamak yerinde olacaktır. Bununla birlikte görselde yer alan zeytin/zeytinyağı bolluk, bereket anlamlarını taşıdığından ötürü kadın bedeninin biyolojik olarak üretkenliği, doğurganlığı yani salt biyolojik işlevlerine dem vurarak, kadın bedeninin bir kez daha eril söylem pratiğinin agresif stratejisi altında ezildiği gözlenmektedir. Tüm bu söylemler ışığında, hakim eril statüko etrafında şekillenen medyatik yaklaşım, kadınları hem özel alana mahkum etmekte hemde bu alandan çıkartarak erotize edilmiş vitrin nesnesine indirgemekte söz konusu tezatlık gözle görünür nitelik kazanmaktadır.

5. SONUÇ VE DEĞERLENDİRME

Tarih boyunca erkek egemenliği altında ezilmiş kadın; gerek bedeni üzerinden gerekse bireyselliğini kazanma noktasında patriarkal toplum gözünde hep varoluş mücadelesi vermiştir. Bu mücadele bağlamında, kadın hak ettiği konuma ulaşamamakla birlikte; patriarkal ideoloji kadın bedeni üzerinden güzellemeler yapmaktadır. Patriarkal sistem kadın bedenini, nesneleştirilerek adeta bakılanın gözü altında aşağılamakta ve dayatılan küreselleşmiş güzellik algısı noktasında onu piyasalaştırarak arzu nesnesi haline getirmektedir. Nitekim vahşi kapitalizm kadın bedenini sermayeleştirerek, narsist eril düzenin memnuniyeti için bir araç haline getirmekte ve bu doğrultuda reklam ve medya tasvirleri aracılığıyla yeniden şekillendirerek dolaşıma sokmaktadır. İlgili çalışma reklam ve tanıtım faaliyetlerinde kadın bedeninin patriarkal sistemde nasıl tanımlandığını, ne gibi araçlar ve metaforlar eşliğinde nesneleştirildiğini ortaya koymayı ve söz konusu nesneleştirme ile ilgili toplumsal cinsiyet okuması yapmayı amaçlamaktadır. Amaçlı örneklem yöntemiyle seçilen 5 farklı markaya ait olan reklam görsellerindeki ürün ambalajları, nitel araştırma yöntemi olan çoklu durum analiziyle incelenmiştir. Elde edilen bulgular ışığında, reklam görsellerinde yer alan standardize edilmiş kadın bedenlerinin bir bütün olarak değil aksine parçalara ayrılarak yer verildiği, erkek egemen toplumun kadını salt metalaştırarak ürün ambalajları üzerinden kalıba soktuğu gözlenmektedir.

Çalışmada dikkat çeken bulgular ise, kadın bedeninin erkek gözü ile temsil edilmesidir. Jean Paul Gaultier “Divine Elixir” reklamın 2. görselinde yer alan gerçek kadın temsilleri pasifize edilerek, erkeğin haz noktalarına hizmet eden edilgen varlıklar olarak aktarılmakta, nesneleştirilen kadın ve bedeninin açık pazara sunulduğu görülmektedir. Dove “Celebrate The Many Shapes And Sizes of Beauty” görseli analizinde ise; idealize edilen kadın bedenlerinin kabul edilmediği, farklı bedenlerin de var olduğu özgür, güçlenme, farklılık pratiği üzerinden bir mesaj veriyormuş gibi görünse de beden formunun salt nesneleştirilmeye indirgendiği, kadının bireysel kimlik inşası, akabinde insan olma formu yok sayılarak yalnızca beden bağlamı ile sınırlandırıldığı görülmektedir. Avon “The Maximum In You” ve Coca Cola “Introducing Diet Coke by Jean Paul Gaultier” reklamlarının görsel analizinde ise, erkek gözetimi altında kadın bedeninin idealize edilen formlar çerçevesinde şekillendiği, sessiz, itaatkâr, zarif kadın temsillerinin yer aldığı reklam görsellerinde, sosyal beden politikalarına ve edilgenliğine uygun kadın figürlerine yer verilmektedir. Diğer taraftan toplumsal dayatmalara başkaldıran, sosyal normlara uymayan kadın profilleri (dövmeyi çağrıştıran şişe) ötekileştirilerek toplum dışına itilmektedir. Son görsel analizi olan Gediz Mandıra markasına ait reklam görselinde kadın bedeni parçalara ayrılarak salt anatomik yönleri ağır basan noktalar dikkat çekmektedir. Nitekim kadın özel alana hapsedilerek domestik görevleri üstlenen, evine bağımlı olan, anaç ve bununla birlikte; her zaman ideal formunu koruyan, bakımlı erkeğin gölgesi altında yaşayacak nesne konumuna indirgenmiş sözde bireyler olarak yer almakta ve kamusal alandan uzaklaştırılmaktadır. Araştırma bulguları, reklam görsellerinde ürün ambalaj tasarımları üzerinden kadın bedenini erotize ederek arzu edilen ve mevcut güzellik ve beden ölçüleri çerçevesinde bir forma indirgeyerek nesneleştiren bir pratik olduğu gerçeğini gözler önüne sermektedir. Bu çalışma toplumsal cinsiyet temelli reklam çalışmalarına eleştirel bir katkı sunmakta; kadına reklam pratikleri bağlamında baştan çıkarıcı ve estetize edilen ideal beden kodları eşliğinde örtük baskı uyguladığını ortaya koymaktadır. Zira kadın, sosyal yapıda

salt beden figürleriyle değil aksine sosyal adaletsizlikler karşısında boyun eğmeyen, varoluş mücadelesi veren ve toplumun dönüştürülmesi noktasında kilit rol üstlenmektedir. Dolayısıyla reklam araştırmaları bağlamında kadının salt bedeni ile ön plana çıkarılmaması, bir özne ve birey olarak hak ettiği değeri görmesi ve reklam söylem ve görselleriyle bu değerin pekiştirilmesi son derece önemlidir. Daha dengeli ve eşitlikçi bir toplum düzeninin kadın ile erkek arasındaki toplumsal cinsiyet eşitsizliğinin ortadan kaldırılmasından geçtiği dile getirilmelidir. Bu noktada reklamcılık endüstrisinin ve markaların sorumluluklarını gerçekleştirip gerçekleştirmediği özenle takip edilmelidir.

KISA VİDEO İÇERİKLERİN YÜKSELİŞİ: INSTAGRAM REELS'İN DİJİTAL MEDYA EKOSİSTEMİNE ETKİSİ

Dr. Alya Şahin Sarı
Bağımsız Araştırmacı
alyasahinn@gmail.com - 0009-0007-4787-4521

ÖZET

Bu çalışma, dijital medya ekosistemi içerisinde kısa video içerik biçimlerinin yükselişini ve Instagram'ın Reels özelliğinin bu dönüşüme yaptığı etkileri incelemektedir. Araştırmada, kısa biçimli videoların kullanıcı davranışları, içerik üretim şekilleri ve platform ekonomileri üzerindeki etkileri çok yönlü bir çerçevede değerlendirilmektedir. Video içerik tüketiminin son yıllarda belirgin biçimde artmasının ardındaki bilişsel, teknolojik ve sosyokültürel dinamikler tartışılarak kısa videoların dikkat ekonomisine uyum sağlayan yapısı irdelenmektedir.

Instagram'ın 2020 yılında Reels'i kullanıma sunmasıyla birlikte platformun kısa video alanında stratejik bir konum elde ettiği görülmektedir. Bu doğrultuda çalışmada Reels'in algoritmik görünürlük mekanizmaları, kullanıcıların etkileşim motivasyonları ve içerik üreticilerinin bu formatı marka iletişimi, topluluk inşası ve takipçi büyütme stratejileri bağlamında nasıl benimsedikleri ele alınmaktadır. Ayrıca Reels'in küresel ölçekte viral trendlerin, popüler anlatıların ve kültürel pratiklerin dolaşımını nasıl etkilediği ortaya çıkarılmaktadır.

Metodolojik olarak, belirlenen kriterlere göre seçilen Instagram Reels paylaşımları üzerinden gerçekleştirilen içerik analizi ile platformun kültürel üretim ve dijital iletişim pratikleri üzerindeki etkileri incelenmiştir. Elde edilen bulgular, Reels'in kısa video ekonomisinde merkezi bir aktör konumuna geldiğini ve dijital medya pratiklerini yeniden şekillendirmeye devam ettiğini ortaya koymaktadır.

Anahtar Kelimeler: Instagram, Reels, Kısa Video İçerikleri

THE RISE OF SHORT-FORM VIDEO CONTENT: THE IMPACT OF INSTAGRAM REELS ON THE DIGITAL MEDIA ECOSYSTEM

Dr. Alya Şahin Sarı
Independent Researcher
alyasahinn@gmail.com – 0009-0007-4787-4521

ABSTRACT

This study examines the rise of short-form video content formats within the digital media ecosystem and the impact of Instagram's Reels feature on this transformation. The research evaluates the effects of short-form videos on user behavior, content production practices, and platform economies within a multidimensional framework. By discussing the cognitive, technological, and sociocultural dynamics underlying the significant increase in video content consumption in recent years, the study explores the structure of short videos as formats aligned with the attention economy.

With the introduction of Reels in 2020, Instagram has attained a strategic position in the short-video domain. Accordingly, the study addresses Reels' algorithmic visibility mechanisms, users' motivations for engagement, and the ways in which content creators have adopted this format in the context of brand communication, community building, and follower growth strategies. In addition, the research reveals how Reels influences the circulation of viral trends, popular narratives, and cultural practices on a global scale.

Methodologically, the study employs content analysis conducted on Instagram Reels posts selected according to predetermined criteria in order to examine the platform's impact on cultural production and digital communication practices. The findings demonstrate that Reels has become a central actor in the short video economy and continues to reshape digital media practices.

Keywords: Instagram, Reels, Short-Form Video Content

1. GİRİŞ

İnternet teknolojilerinin ve mobil iletişim araçlarının son yirmi yılda geçirdiği evrim, kullanıcıların medya tüketim alışkanlıklarını kökten değiştirmiş; metin ve statik görsel odaklı

dijital iletişim, yerini giderek daha dinamik ve anlık etkileşime dayalı video içeriklerine bırakmıştır. Görsel kültürün hakimiyet kazandığı bu yeni dönemde, özellikle bant genişliklerinin artması ve akıllı telefonların işlemci kapasitelerinin gelişmesi, videoyu dijital ekosistemin önemli ve ortak dili haline getirmiştir. Bu dönüşüm sürecinde, kullanıcıların giderek kısalan dikkat sürelerine ve hızlı içerik tüketme eğilimlerine yanıt veren kısa video formatı, dijital platformların en stratejik rekabet alanı olarak önemini artırmaktadır.

Kısa video formatının küresel ölçekteki yükselişi, özellikle TikTok platformunun kullanıcılarına sağladığı dikey format, tam ekran deneyimi ve müzik senkronizasyonu ile birlikte kolay kurgu yapısı ile hız kazanmıştır. Bu format, "atıştırmalık içerik" olarak nitelendirilen; üretimi nispeten kolay, tüketimi hızlı ve viralleşme potansiyeli yüksek bir içerik türünü standartlaştırmıştır. Sosyal medya platformları, kullanıcı tabanlarını korumak ve platform içi etkileşim sürelerini artırmak adına bu yeni içerik formatına hızla uyum sağlamıştır. Bu bağlamda Instagram'ın 2020 yılında kullanıma sunduğu "Reels" özelliği, platformun tarihçesindeki en kritik stratejik hamlelerden biri olarak görülmektedir. Başlangıçta fotoğraf paylaşımına dayalı bir "sosyal ağ" olarak kurgulanan Instagram, Reels ile birlikte kullanıcıların sadece takip ettikleri kişilerden değil, algoritmanın önerdiği içerik üreticilerinden de beslendiği bir akışı sunduğu "eğlence medyasına" dönüşmüştür.

Söz konusu dönüşüm, iletişim araçlarını yalnızca mesaj ileten teknolojiler olarak değil; bireylerin düşünme, algılama ve davranış biçimlerini şekillendiren ortamlar olarak ele alan medya ekolojisi yaklaşımı çerçevesinde ele alındığında; Instagram Reels'in sunduğu yeşil ekran (green screen), remix ve şablon gibi teknik olanaklar, kullanıcıları pasif izleyici konumundan çıkararak aktif içerik üreticilerine (prosumer) dönüştürmektedir. Bu teknik altyapı, dijital kültürde estetik kodların, mizah biçimlerinin ve hikâye anlatım pratiklerinin yeniden tanımlanmasına bir zemin sağlamaktadır.

Kısa video içeriklerinin başarısının ardındaki temel iktisadi dinamik ise dikkat ekonomisi kavramı üzerinden düşünülebilir. Enformasyonun sınırsız, insan dikkatinin ise sınırlı bir kaynak olduğu dijital ortamda, platformların temel hedefi kullanıcıyı mümkün olduğunca uzun süre ekran başında ve dolayısıyla platform içerisinde tutmaktır. Instagram Reels algoritmaları, genellikle 15 ila 90 saniye arasında değişen videolar aracılığıyla kullanıcıda süreklilik arz eden bir izleme ve kaydırma (scrolling) davranışına sebebiyet vermektedir. Hızlı kurgu teknikleri, popüler ses dosyaları ve görsel efektlerle desteklenen bu içerikler, kullanıcı tarafında bilişsel süzgeçlere takılmadan hızla tüketilmekte ve algoritmik öneri sistemi tarafından yeniden dolaşıma sokulmaktadır.

Algoritmik kültürün bir yansıması olarak Instagram, içeriklerin görünürlüğünü yalnızca kronolojik akış ya da sosyal ilişki ağları temelinde değil; izlenme süresi, tekrar izleme oranı ve trend etkileşimi gibi performans göstergelerine göre belirlemektedir. Bu durum, içerik üreticileri ve markalar üzerinde algoritmanın önceliklendirdiği içerik türlerine yönelme baskısı oluşturmakta; kültürel üretim süreçleri giderek platformun dinamiklerine uygun teknik ve ekonomik kodlar doğrultusunda şekillenmektedir.

Türkiye'de sosyal medya kullanım oranlarının yüksekliği ve genç nüfusun dijital trendlere hızlı adaptasyonu göz önünde tutulduğunda, Instagram Reels'in yerel dijital kültür üzerindeki etkileri önemli bir araştırma alanıdır. Literatürde kısa videolar üzerine yapılan çalışmaların sayısı artmakla birlikte, bunların önemli bir kısmı TikTok odaklıdır. Instagram Reels'in kendine has dinamiklerini, viral içeriklerin formatlarını ve içerik üretim stratejilerini ele alan çalışmalar ise henüz sınırlıdır. Bu çalışma, söz konusu literatür boşluğunu doldurmayı ve Reels'in dijital medya ekosistemindeki dönüştürücü rolünü çok yönlü bir perspektifle analiz etmeyi amaçlamaktadır.

Bu doğrultuda araştırma, Instagram Reels içeriklerinin tematik yapısını, teknik özelliklerini ve etkileşim dinamiklerini inceleyerek; platformun kültürel bir üretim mekânı olarak nasıl işlediğini ortaya koymayı hedeflemektedir. Çalışma kapsamında, belirlenen kriterlere göre seçilen yüksek etkileşimli Reels videoları üzerinde içerik analizi gerçekleştirilmiş ve elde edilen veriler sonucunda kısa video formatının dijital iletişimdeki konumu değerlendirilmiştir.

1.1.Uluslararası Literatürde Kısa Video Platformları

Sosyal ağ sitelerinde kısa video içeriklerinin yaygınlığı yadsınamaz durumdadır. Singh ve Sinha (2023) tarafından yapılan araştırma, izleyicilerin statik içerikten ziyade kısa ve ilgi çekici videolara daha fazla ilgi duyduğunu göstermektedir. Bu durum, Instagram'da Reels'in popülaritesinin artması ve TikTok gibi hizmetlerin başarısıyla tutarlıdır. Bilhassa Z kuşağının TikTok uygulamasında daha fazla zaman geçirmesiyle, Instagram genel hedef kitlesi olduğunu bildiği Y ve Z kuşaklarını platformda tutma amacıyla çeşitli girişimlerde bulunmuştur: Reels bu girişimlerin somut çıktısıdır (Parsa ve Ars, 2021). Reels'in markalar için etkinliği, formatın pazarlama mesajlarını görsel olarak çekici ve dinamik bir şekilde iletme kapasitesini vurgulayan çeşitli araştırmalarla gösterilmiştir (Sambuno, 2023).

Instagram platformunun bir özelliği olan Reels, marka mesajını iletmek için dinamik ve görsel olarak çekici bir yol sunar. Dahası, kısa videolar işletmelerin daha geniş bir kitleye ve müşteriye ulaşmasına yardımcı olur (Sambuno 2023). Tharsikin'in görüşüne göre, "Reels, tüketiciler

yoğun yaşamlarına uyan içerik ararken, markaların hedef kitleleriyle verimli bir şekilde etkileşim kurması için ideal bir ortam olarak ortaya çıktı."

Uluslararası literatür, kısa video formatlarının dijital medya kullanım pratiklerini dönüştürdüğünü ve özellikle genç kullanıcılar arasında yeni bir iletişim normu haline geldiğini ortaya koymaktadır. Kısa videoların bilgi edinme, sosyalleşme, eğlenme ve kendini ifade etme gibi çoklu motivasyonlarla tüketildiği, bu formatın güncel medya kullanım davranışlarıyla uyumlu olduğu görülmektedir (Omar & Dequan 2020). Kısa videolar artık yeni bir küresel olgu haline gelmiştir (Cao ve diğerleri, 2021).

Algoritmaların kültürel dolaşımı şekillendirme gücüne odaklanan çalışmalar, içerik öneri sistemlerinin kullanıcıların tüketim alışkanlıklarını yönlendirdiğini ve küresel popüler kültürün hızla yayılmasını kolaylaştırdığını vurgulamaktadır (Chen & Li, 2024). TikTok'un yükselişiyle birlikte literatürde "algoritmik eğlence" ve "kısa video kültürü" kavramları ön plana çıkmış; bu platformların izlenme süresi, etkileşim türleri ve kullanıcı davranışlarına dayalı çeşitli ve karmaşık algoritmalarla çalıştığı vurgulanmıştır (Guinaudeau, Votta & Munger, 2023; Gillespie, 2014). Algoritmaların görünürlük politikaları, içerik üretim biçimlerini doğrudan etkilemekte ve kullanıcıların belirli içerik türlerine yönelmesine sebep olmaktadır (Cotter, 2019).

Kısa video platformlarını karşılaştıran çalışmalar, içeriklerin hız, süre ve etkileşim düzeylerinin kullanıcıların algısal değerlendirmeleri üzerinde belirleyici olduğunu göstermektedir (Omar & Dequan, 2020).

1.2.Türkiye'de Kısa Video, Reels ve TikTok Üzerine Çalışmalar

Türkçe literatürde kısa video platformlarına yönelik çalışmalar ağırlıklı olarak TikTok ve Instagram Reels'e odaklanmaktadır. Bu çalışmalar, kullanıcı motivasyonlarının eğlence, trend takibi, dikkat çekme ve sosyal onay ekseninde şekillendiğinin altını çizmektedir (Özdemir & Kocabay, 2022; Kuyucu, 2023). Bununla birlikte kısa video platformları, bireysel tercihlerle sınırlı kalmayarak taklit ve remix kültürü, estetik normların dolaşımı ve sosyal temsillerin yeniden üretimi gibi daha geniş kültürel süreçlerle ilişkilendirilerek de değerlendirilmektedir (Abidin, 2021; Çomu & Binark, 2021). Instagram Reels, gençlik kültürünün hızla birlikte yaşadığı ve dönüştüğü bir mecra olarak da öne çıkmaktadır. #ReelsTrends ve #GenZReels gibi popüler etiketler, gençlerin dijital platformlarda yeni normlar ile değerler oluşturduğunu göstermektedir (Akbaş, 2025)

Türkiye'de kısa video platformlarına ilişkin çalışmalar; kullanıcı davranışları gençlik temsilleri (Akçay, 2022), Reels içerik stratejileri (Kuyucu, 2023) ve algoritmik görünürlük mekanizmaları (Başaran, 2022) üzerinde yoğunlaşmaktadır. Bununla birlikte daha spesifik analizler yapan çalışmalar da mevcuttur. Dijital içerik pazarlaması kapsamında Reels videoların içerik hikayeleştirme biçimlerini araştıran bir çalışmadan elde edilen bulgulara göre zincir otel markalarının paylaştığı reels videolarındaki hikâyeleştirilmiş içeriklerin izlenme, beğeni ve yorum sayısı olarak aldıkları etkileşim oranı, geleneksel içeriklere göre çok daha yüksektir. Ayrıca, zincir otel markalarının takipçi sayısı yüksek etkileyici kişi, spor kulübü veya müzik grubu gibi ünlü kişi ya da kurumlarla iş birliği yapmaları, etkileşim alma oranlarını yükseltmektedir (Rol & Uygur, 2023). Bu araştırmalar, kısa video içeriklerinin Türkiye bağlamında görsel çekicilik, mizah, müzik kullanımı, taklit ve hızlandırılmış montaj teknikleri etrafında şekillendiğini ortaya koymaktadır (Özdemir & Kocabay, 2022).

1.3.Sosyal Medya İçerik Üretim Pratikleri, Algoritma ve Reels Ekosistemi

Kısa video üretimi, dijital içerik üreticileri açısından görünürlük stratejileri ve algoritma uyumlu içerik üretim pratikleriyle yakından ilişkilidir. Sosyal medya içerik üretiminin platformların görünürlük politikaları doğrultusunda şekillendiğini ve üreticilerin algoritmanın çerçevelendirdiği estetik ve biçimsel özelliklere uyum sağlama eğiliminde olduğunu görüşmektedir (Cotter, 2019). Instagram Reels markalara anlamlı izlenimler yaratmak ve hedef kitleleriyle güçlü ilişkiler kurmak için cazip araçlar sunar; bu da onu etkili bir pazarlama aracı haline getirir. Reels içeriklerinde yaygın olarak kullanılan hızlı kurgu, trend sesler, senkronize müzik, altyazı teknikleri, yüksek ritimli montaj ve ışık kullanımı gibi estetik tercihler, bu algoritmik uyumun somut göstergeleri arasında yer almaktadır (Cotter, 2019). Bu çalışmada kullanılan kodlama şeması da literatürde tanımlanan bu teknik ve biçimsel sınıflandırmalardan yola çıkılarak oluşturulmuştur.

Sosyal medya içerik üretimi, bireysel yaratıcılığın yanı sıra platformların sunduğu teknik altyapı ve algoritmik yönlendirmelerle şekillenen çok yönlü bir süreçtir. Çalışmalar, kısa video kullanıcılarının eğlence, görünürlük ve özsunum gibi motivasyon eksenlerinde yoğunlaştığını; bunun yanı sıra yaş gibi demografik faktörlerin medya kullanım davranışlarını şekillendirdiğini; içerik üretim ve tüketim motivasyonlarının kişisel ve sosyal ihtiyaçlarla ilişkili olduğunu ortaya koymaktadır (Omar & Dequan 2020). Benzer biçimde kısa video üreticileri açısından geri bildirim alma hızı, etkileşim oranları ve görüntülenme oranı beklentisinin üretim sürecini belirleyen temel unsurlar olduğu vurgulanmaktadır (Srinivasan,

2023). Bu bulgular, kısa video üretiminin yalnızca bireysel tercihlerle değil, platformun teknik ve algoritmik çerçevesiyle de şekillendiğini göstermektedir.

Jan Van Dijk'in (2016) deyimiyle, "toplumun sinir sistemi haline gelmiş olan ağlar", kısa sürede dünyayı sanal örgütlenmeyle birbirine bağlamış ve gündelik yaşantılarının uzunca bir süresini dijital ekranlarda geçiren kitleler ortaya çıkarmıştır.

Instagram Reels ve benzeri kısa biçimli video platformları, gençlerin dijital alışkanlıklarında önemli değişimlere yol açmıştır. Araştırmalar, bu tür içeriklerin "kısa heyecan patlamaları" sunarak dopamin salınımını tetiklediğini ve bağımlılık davranışlarına zemin hazırladığını ortaya koymaktadır (Tabanschi, Cernisov & Martiniuc, 2023: 280).

Kısa video formatlarının yaygınlaşması, kültürel üretim pratiklerinde de belirgin dönüşümlere yol açmaktadır. Viral akımların ve trend seslerin küresel ölçekte hızla dolaşıma girmesi, kullanıcıların özgün üretimlerin yanı sıra tekrar eden ve taklit temelli içerikleri yoğun biçimde paylaşmasına sebep olmaktadır. Bu süreç, platformların algoritmik mekanizmalarıyla birlikte değerlendirildiğinde, kültürel temsillerde görece bir homojenleşmeye ve belirli içerik kalıplarının sürekli yeniden üretilmesine yol açabilmektedir. Dolayısıyla kısa video ekosistemi, kültürel katılımı hızlandıran bir zemin olmasıyla birlikte bunu belirli normlar etrafında standardize eden bir alan olarak da değerlendirilmelidir.

Instagram Reels'in ortaya çıkışı, TikTok'un küresel ölçekte hızla büyümesi ve kullanıcı davranışlarını dönüştürmesiyle doğrudan ilişkilidir. Instagram, 2020 yılında Reels özelliğini platforma entegre ederek kısa video formatını stratejik bir rekabet alanı olarak konumlandırmıştır. Reels'in başlangıçta 15 saniyelik videolarla sınırlı olan yapısı, zaman içinde 30 ve ardından 90 saniyeye genişletilerek içerik üreticilerine daha esnek bir anlatı alanı sunmuştur. Meta tarafından gerçekleştirilen güncellemelerle Reels içeriklerinin ana akış ve Keşfet sekmesine entegre edilmesi, formatın görünürlüğünü artırmış ve Instagram'ı TikTok ile doğrudan rekabet eden bir kısa video platformu haline getirmiştir.

Reels formatı, platform içerisinde düşük üretim maliyetiyle yüksek etkileşim elde edilmesini mümkün kılan çeşitli teknik araçlarla desteklenmektedir. Müzik kütüphanesi, hız ayarları, artırılmış gerçeklik filtreleri, altyazı ve metin ekleme seçenekleri ve zamanlayıcı gibi özellikler, içerik üretim sürecini erişilebilir hale getirerek yaratıcı katılımı teşvik etmektedir. Bu teknik olanaklar özellikle amatör kullanıcılar için üretim sürecini kolaylaştırmaktadır. Dikey video formatı ve otomatik oynatma gibi tasarım tercihleri ise mobil kullanım deneyimini merkeze alarak Reels'in diğer içerik türlerine kıyasla daha fazla dikkat çekmesini ve tüketilmesini sağlamaktadır.

Instagram algoritmaları, Reels içeriklerinin görünürlüğünü belirlerken kullanıcının geçmiş etkileşimleri, izlenme süresi, videonun tamamlanma oranı ve popüler seslerin kullanımı gibi çok çeşitli performans göstergelerini dikkate almaktadır. Kısa videoların hızlı tempolu ve dikkat odaklı yapısı, izlenme ve tekrar oynatma oranlarını artırarak algoritmanın içeriği daha geniş bir kullanıcı kitlesine sunmasını kolaylaştırmaktadır (Omar, Dequan 2020). Ayrıca Reels içeriklerinin yalnızca takip edilen hesaplara değil, geniş bir kullanıcı havuzuna önerilmesi, TikTok'a benzer bir akış mantığıyla izlenme artışı sağlamaktadır. Bu durum içerik üreticileri açısından görünürlük olanaklarını genişletirken, algoritmik rekabeti de artıraktadır.

Reels, hem bireysel içerik üreticileri hem markalar açısından influencer ekonomisinin önemli bir bileşeni haline gelmiştir. Kısa video formatı, markaların hikâye anlatımını sadeleştirerek daha hızlı ve kolay şekilde geri bildirim almalarına olanak tanımaktadır (Srinivasan, 2023). İçerik üreticileri ise Reels'in sunduğu algoritmik avantajlar sayesinde takipçi tabanlarını daha hızlı genişletebilmekte ve marka iş birliklerini artırabilmektedir. Bu yönüyle Reels, hem kullanıcı etkileşimini artıran hem de dijital pazarlama ve reklam ekonomisini yeniden yapılandıran merkezi bir içerik formatı olarak öne çıkmaktadır.

1.4.Instagram Reels'in Güncel Dijital Medya Ekosistemindeki Yeri

Instagram analiz raporları, Reels'in platform içi görünürlük ve etkileşim açısından öne çıkan içerik formatlarından biri haline geldiğini göstermektedir. Metricool tarafından yayımlanan 2024 raporuna göre Reels, Instagram içerikleri arasında %37,87'lik erişim payı ile dikkat çekici bir yer elde etmiştir. Bu bulgu, Reels'in yalnızca popüler bir video biçimi olmanın ötesine geçerek kullanıcılar ve markalar açısından yüksek erişim potansiyeline sahip stratejik bir içerik formatına dönüştüğünü ortaya koymaktadır (Metricool Reports, 2024).

Kamuya açık veriler üzerinden hazırlanan listelere bakıldığında, bazı Reels videolarda küresel ölçekte rekor seviyelerde izlenme sayılarına ulaşıldığı görülmektedir. Örneğin 2025 yılı itibarıyla en çok görüntülenen Reels videoları arasında yaklaşık 1,9 milyar izlenmeye ulaşan içeriklerin yer alması, kısa video formatının viral dolaşımdaki kapasitesini açık biçimde ortaya koymaktadır (Wikipedia: *Most-Viewed Instagram Reels*, 2025). Bu durum, Reels içeriklerinin dönemsel bir trendden ziyade süreklilik gösteren bir dijital medya pratiği haline geldiğini belli etmektedir.

Buna ek olarak 2024 yılı boyunca aylara göre değişkenlik gösteren trend seslerin, Reels içerik üretim biçimlerinde de etkili bir rol oynadığı görülmektedir. CHIHIRO ve *365* gibi seslerin belirli dönemlerde yüz binlerce paylaşım alması, kısa video üretim biçimlerinin büyük ölçüde ses temelli trendler tarafından yönlendirildiğini göstermektedir (Juntire, 2024). Bu eğilim,

algoritmik öneri sistemleri ile müzik ve ses kullanımının içerik görünürlüğü üzerindeki pozitif etkisini daha görünür kılmaktadır.

Meta tarafından Kasım 2024'te paylaşılan veriler ise Facebook ve Instagram platformlarında günlük yaklaşık 3,5 milyar Reels paylaşımı yapıldığını belirtmektedir. Bu üretim hacmi, Reels formatının yalnızca tüketim açısından değil, içerik üretimi bakımından da dijital medya ekosisteminde merkezi bir konumda olduğunu göstermektedir (PPC Land, 2025). Söz konusu göstergeler, Instagram Reels'in kısa video formatları arasında önemli ve yön verici bir konuma ulaştığını ve içerik üretimi, tüketimi ve görünürlüğün şekillenmesinde başat bir etken haline geldiğini ortaya koymaktadır.

2. ARAŞTIRMA

2.1.Araştırmanın Amacı ve Yöntemi

Bu çalışma, Instagram Reels içeriklerinin dijital medya ekosistemindeki yapısal ve kültürel özelliklerini incelemek amacıyla nitel araştırma yöntemine dayalı betimsel içerik analizini benimsemektedir. İçerik analizi, dijital platformlarda paylaşılan kısa video içeriklerinin biçimsel, tematik ve etkileşimsel özelliklerini sistematik biçimde incelemeye olanak tanımaktadır. Bu yöntem aracılığıyla Reels içeriklerinde öne çıkan anlatı biçimleri, teknik tercihlerin dağılımı ve etkileşim dinamikleri değerlendirilmiştir.

2.2.Örneklem ve Veri Toplama Süreci

Araştırmanın örneklemi, Instagram platformunda herkese açık hesaplar tarafından paylaşılan ve yüksek etkileşim alan Reels videoları arasından seçilmiştir. Örneklem, 11 Kasım 2025 itibarıyla yüksek görüntülenme ve etkileşim oranlarına sahip toplam 13 Reels videosundan oluşmaktadır. Video seçimi sürecinde amaçlı örnekleme tekniği kullanılmış; görüntülenme sayısı yüksek, farklı içerik kategorilerini temsil eden videolar tercih edilmiştir.

Wikipedia'da 11 Kasım 2025 itibarıyla verilen tabloya göre en çok izlenen Instagram Reels videoları ve görüntülenme sayıları şöyle sıralanmıştır:

1. Deepika Padukone – Hilton (It Matters Where You Stay) — ~1.9 milyar
2. Hardik Pandya – BGMI 'Take the Shot' — ~1.6 milyar
3. BGMI – Flex Your New Phone — ~1.4 milyar
4. Sajid Shaikh (Samsung collab) — ~1.1 milyar
5. Anthony Butenyi – Corrupted trombone — ~936 milyon

6. Ranveer Singh (BGMI) — ~877 milyon
7. BGMI (Unnamed gameplay reel) — ~840 milyon
8. Muhammed Riswan – Freestyle football — ~610 milyon
9. Cristiano Ronaldo – Icy water reel — ~575 milyon
10. Janus Wedeinge – Funny girlfriend reel — ~540 milyon
11. Fiske AI – Yacht jump splash — ~520 milyon
12. Anwar – Chain game strong — ~510 milyon
13. VertexCGI — XXL Human Tennis — ~501 milyon

2.3.Veri Analizi ve Kodlama Süreci

Veri analizi sürecinde, öncelikle seçilen Reels videoları izlenmiş ve içeriklerin genel tematik yapıları belirlenmiştir. Ardından her bir video, çoklu kodlama yaklaşımı kullanılarak ayrıntılı biçimde analiz edilmiştir. Kodlama süreci, literatürde kısa video içeriklerine yönelik yürütülen çalışmalar temel alınarak oluşturulmuştur (Srinivasan, 2023).

Kodlama şeması üç ana kategori göz önünde bulundurularak yapılandırılmıştır:

- Biçimsel Özellikler: Video süresi, çekim teknikleri, müzik kullanımı, artırılmış gerçeklik (AR) filtreleri, metin yerleşimi.
- Anlatısal ve Tematik Unsurlar: Trend ses kullanımı, mizah öğeleri, eğitim/öğretici içerik, kişisel hikâye aktarımı, kültürel motifler.
- Etkileşim Göstergeleri: Beğeni, yorum, kaydetme oranları, tekrar izleme davranışı ve paylaşım sıklığı.

Bu çok katmanlı kodlama yapısı göz önünde bulundurularak tema, üretici türü, süre, kurgu hızı, ses kullanımı, görsel teknikler ve izlenme süreleri incelenerek Reels içeriklerinin yalnızca teknik özellikleri değil, aynı zamanda anlatısal yapıları ve kullanıcı etkileşimiyle ilişkileri de birlikte değerlendirilmiştir.

Analiz kapsamında Reels videoları, sürelerine göre üç kategori altında sınıflandırılmıştır:

- S1 (0–10 saniye)
- S2 (11–30 saniye)
- S3 (31–60 saniye)

Instagram Reels formatında maksimum video süresi 90 saniyedir. Bununla birlikte incelenen örneklemde bu sınırın altında kalan içeriklerin daha yüksek etkileşim aldığı gözlemlenmiştir.

Çizelge 1. Reels İçerik Analizi Kodlama Tablosu (n=13)

No	Video / Üretici	Tema	Üretici Türü	Süre Kategorisi	Kurgu Hızı	Ses Kullanımı	Görsel Teknikler	İzlenme
1	Deepika Padukone – Hilton	Reklam / Marka	Ünlü + Marka iş birliği	S3 (31–60 sn)	Orta	Trend / senkron müzik	Sinematik çekim, geçiş, metin	~1.9 B
2	Hardik Pandya – BGMI	Oyun / Reklam	Ünlü + Marka iş birliği	S2 (11–30 sn)	Yüksek	Müzik + oyun sesi	Hızlı kurgu, metin	~1.6 B
3	BGMI – Flex Your New Phone	Oyun / Reklam	Marka	S2 (11–30 sn)	Yüksek	Trend müzik	Oyun görüntüsü, hız	~1.4 B
4	Sajid Shaikh – Samsung collab	Reklam / Teknoloji	Influencer + Marka iş birliği	S3 (31–60 sn)	Orta	Müzik senkron	Ürün odaklı çekim, geçiş	~1.1 B
5	Anthony Butenyi – Corrupted Trombone	Mizah	Bireysel kullanıcı	S1 (0–10 sn)	Yüksek	Orijinal / trend ses	Loop, yakın plan, kesme	~936 M
6	Ranveer Singh	Oyun / Reklam	Ünlü + Marka	S2 (11–30 sn)	Yüksek	Müzik + efekt	Performans	~877 M

	– BGMI		iş birliği				çekimi, hız	
7	BGMI – Gameplay reel	Oyun	Marka	S2 (11–30 sn)	Yüksek	Oyun sesi	Ekran kaydı, oyun kesiti	~840 M
8	Muhammed Riswan – Freestyle football	Spor	Bireysel kullanıcı	S2 (11–30 sn)	Orta	Doğal / orijinal ses	Yavaş çekim, açık alan	~610 M
9	Cristiano Ronaldo – Icy water reel	Spor / Eğlence	Ünlü	S1 (0–10 sn)	Orta	Doğal ses	Tek plan, yakın çekim	~575 M
10	Janus Wedeinge – Funny girlfriend	Mizah / İlişkisel	Bireysel kullanıcı	S2 (11–30 sn)	Orta	Diyalog / orijinal ses	Günlük çekim, kesme	~540 M
11	Fiske AI – Yacht jump splash	CGI / Eğlence	Dijital / CGI üretici	S3 (31–60 sn)	Yüksek	Müzik	CGI, simülasyon, montaj	~520 M
12	Anwar – Chain	Oyun / Challenge	Bireysel	S2 (11–30 sn)	Yüksek	Trend ses	Hızlı kurgu, POV	~510 M

	game strong		kullanıcı					
13	Vertex CGI – XXL Human Tennis	CGI / Eğlence	Dijital / CGI üretici	S3 (31–60 sn)	Yüksek	Müzik / orijinal ses	CGI, efekt, filtre	~501 M

3. BULGULAR

Bu bölümde, 2025 yılına ait Instagram Reels içeriklerinden oluşan örneklem üzerinde gerçekleştirilen nitel içerik analizinin bulguları sunulmaktadır. Analiz, 13 yüksek izlenmeli Reels videosu üzerinden yürütülmüş; bulgular tematik dağılım, süre kategorileri, teknik kullanım şekilleri, ses türleri, üretici profili ve kültürel temsil başlıkları altında sınıflandırılmıştır.

3.1.Tematik Dağılım

Analiz edilen Reels videolarının tematik dağılımları şu şekildedir:

Çizelge 2. Tematik Dağılımlar

Tema	**n**	**%**
Reklam / Marka	4	31
Oyun (reklam ve challenge dâhil)	4	31
Mizah	2	15
Spor	2	15
CGI / Eğlence	2	15
Toplam	13	100

Bu dağılım, incelenen örneklemde marka odaklı ve ticari içeriklerin belirgin bir ağırlığa sahip olduğunu göstermektedir. Reels videolarının yalnızca bireysel paylaşımlarla sınırlı kalmadığı, aynı zamanda profesyonel ve kurumsal içerik üretiminin de önemli bir yer tuttuğu görülmektedir.

3.2.Video Süresine Göre Dağılım

Videolar, yöntem bölümünde tanımlanan süre kategorilerine göre sınıflandırılmıştır. Bulgular, Reels videolarında 11–30 saniye aralığındaki içeriklerin (%62) baskın olduğunu ortaya koymaktadır. Bu süre aralığını 0–10 saniyelik kısa videolar ve 31–60 saniyelik daha uzun anlatı yapısına sahip içerikler izlemektedir.

Süre dağılımı, kısa video formatında orta uzunluktaki içeriklerin yaygın biçimde tercih edildiğini göstermektedir. Literatürde bu süre aralığının kullanıcı dikkatini sürdürme açısından işlevsel olduğu belirtilmektedir (Anderson, 2006)

Çizelge 3. Süre Kategorisi ve Yüzdeleri

Süre Kategorisi	**n**	**%**
S1 (0–10 sn)	2	15
S2 (11–30 sn)	8	62
S3 (31–60 sn)	3	23
S4 (61–90 sn)	0	0
Toplam	13	100

3.3.Teknik Kullanım Bulguları

Analiz edilen videolarda öne çıkan teknik unsurlar ve kullanım oranları şu şekildedir:

Çizelge 4. Teknik Unsurlar

Teknik Unsur	**n**	**%**
Hızlı kurgu / yüksek tempo	7	54
Yakın plan çekim	7	54
Geçiş efektleri	6	46
Metin / altyazı kullanımı	6	46
CGI, filtre veya dijital efekt	4	31

Bu teknik bulgular, Reels videolarında görsel yoğunluk, yüksek tempo ve dikkat çekici anlatı biçimlerinin ön planda olduğunu göstermektedir. Bulgular, kısa video içeriklerinde estetiğin görsel-işitsel öğelerin eşzamanlı ve yoğun kullanımıyla kurulduğunu ortaya koymaktadır (Kress & van Leeuwen, 2001).

3.4.Ses Kullanımına İlişkin Bulgular

Videoların ses kullanım türlerine göre dağılımı aşağıdaki gibidir:

Çizelge 5. Ses Kullanım Türlerine Göre Dağılım

Ses Türü	**n**	**%**
Müzik / trend müzik	6	46
Orijinal / doğal ses	5	38
Müzik + efekt / senkron kullanım	4	31

Ses kullanım şekillerine ilişkin incelemede trend müzik ve seslerin yüksek oranda kullanılması, kısa video içeriklerinde ses temelli anlatının ve müzik senkronizasyonunun belirgin bir rol oynadığını göstermektedir. Bu bulgu, kısa video içeriklerinde ses kullanımının içerik görünürlüğüyle ilişkili olduğuna işaret eden çalışmalarla örtüşmektedir (Kaye, Chen & Zeng, 2021)

3.5.İçerik Üretici Türlerine İlişkin Bulgular

Analiz edilen Reels videolarının içerik üretici profilleri şu şekilde sınıflandırılmıştır:

Çizelge 6. İçerik Üretici Türlerine Göre Dağılım

Üretici Türü	**n**	**%**
Kurumsal / marka temelli (marka ve iş birlikleri dâhil)	7	54
Bireysel kullanıcı	4	31
Dijital / CGI üretici	2	15
Toplam	13	100

Bulgulara bakıldığında, yüksek izlenme alan Reels videolarının önemli bir bölümünün markalar ve profesyonel içerik üreticileri tarafından üretildiği görülmektedir. Bu dağılım, kısa video üretiminin giderek daha profesyonel ve kurumsal bir yapıya yöneldiğini ortaya koymaktadır (Cotter, 2019).

3.6.Kültürel Temsil ve İçerik Çeşitliliği

Analiz edilen videolarda kültürel anlamda farklı temsiller ve anlatım biçimleri tespit edilmiştir.

Çizelge 7. Kültürel Temsil ve İçerik Türleri

Kültürel / Bağlamsal Öge	**n**	**%**
Hindistan merkezli marka ve oyun kültürü	4	31
Küresel spor figürleri	2	15
Evrensel mizah ve ilişkisel anlatılar	2	15
CGI ve dijital görsel kültür	2	15
Diğer / karma temsiller	3	23
Toplam	13	100

Bu çeşitlilik, Reels içeriklerinin tek bir kültürel bağlamla sınırlı kalmadığını, küresel ve çok-kültürlü bir yapıya sahip olduğunu göstermektedir.

4. SONUÇLAR VE DEĞERLENDİRME

Bu çalışma, Instagram Reels platformunda yüksek izlenme alan videolar üzerinden içerik analizi yapılarak kısa video formatının güncel dinamiklerinin ortaya konması amaçlamıştır. Elde edilen bulgular, Reels içeriklerinin sadece eğlence odaklı paylaşımlarla sınırlı olmadığını; stratejik, ticari ve kültürel boyutları içeren çok katmanlı bir yapıya sahip olduğunu göstermektedir. Kısa video formatı, bu yönüyle kullanıcılar ve markalar için hem bir ifade alanı hem de platform temelli bir medya ekonomisi unsuru olarak konumlanmaktadır.

4.1.Reklam ve Marka İçeriklerinin Yükselişi

Analiz edilen videoların bir bölümünün (4/13) reklam veya marka iş birliği içeriği olması, kısa video formatının reklamcılık, tanıtım ve marka iletişimi açısından önemli ve etkili bir yatırım zemini olduğunu ortaya koymuştur. Literatürde TikTok ve Instagram Reels gibi kısa video platformlarının pazarlama stratejilerinde giderek merkezi bir konum kazandığı vurgulanmaktadır (Zulli & Zulli, 2022). Bu sonuç, içerik üretiminin sosyal medya ekonomisi içinde profesyonelleşmesi ve algoritmik görünürlüğün ölçülebilir metrikler üzerinden belirlenmesiyle ilintilidir (Cotter, 2019). Bu bağlamda markaların kısa videoları yalnızca bir reklam ve tanıtım aracı olarak değil, aynı zamanda kültürel etki yaratma ve görünürlük üretme alanı olarak değerlendirdiği söylenebilir.

4.2.Süre, Dikkat ve Algoritmik Optimizasyon

Bulgular, 11–30 saniye aralığındaki videoların (%62) örneklem içinde daha baskın olduğunu ortaya çıkarmıştır. Bu durum, dikkat ekonomisi kuramının kısa video formatı bağlamında işlevsel olduğunu göstermektedir (Anderson, 2006). Kullanıcı dikkat süresine uyumlu kısa süreli içeriklerin algoritma tarafından daha fazla önerilmesi, kısa video üreticilerinin içerik sürelerini stratejik biçimde belirlediğini düşündürmektedir. Süre tercihlerinin bu spesifik aralıkta yoğunlaşması, izlenme süresi ve tekrar izlenme davranışlarını teşvik eden içeriklerin algoritmik olarak içeriklere avantaj sağladığını göstermektedir (Napoli, 2019).

4.3.Teknik Estetik ve Görsel Anlatı Yapıları

Reels videolarında yaygın olarak gözlemlenen hızlı kurgu, yakın plan çekimler, geçiş efektleri ve filtre kullanımı, dinamik ve yoğun bir görsel anlatı biçiminin tercih edildiğini ortaya koymaktadır. Bu teknik tercihler, Kress ve van Leeuwen'in (2001) tanımladığı çok modlu (multimodal) iletişim yapısının Reels ortamında hız, ritim ve görsel-işitsel uyum etrafında somutlaştığını göstermektedir. Bulgular, kısa video estetiğinin dikkat çekme ve devamlı izleme deneyimi yaratma hedefiyle biçimlendirildiğini düşündürmektedir.

4.4.Ses Kullanımının Görünürlük Üzerindeki Rolü

Trend müzik ve popüler seslerin Reels içeriklerinde yüksek oranda kullanılması, ses temelli anlatının platformun algoritması açısından görünürlük anlamında belirleyici bir unsur olduğunu göstermektedir. Literatürde trend seslerin içeriklerin daha geniş kullanıcı kitlelerine ulaşmasını kolaylaştırdığı ve etkileşim oranlarını artırdığı belirtilmektedir (Kaye, Chen & Zeng, 2021). Bu durum, kullanıcıların içerik üretim süreçlerinde müzik kullanımını stratejik bir unsur olarak değerlendirdiğini ve trend seslerin üretim pratiklerini yönlendirdiğini ortaya koymaktadır.

4.5.Kültürel Çeşitlilik ve Küresel Dolaşım

Analiz edilen Reels videolarında farklı kültürel bağlamlara ait içeriklerin yer alması, platformun küresel bir içerik dolaşım alanı sunduğunu göstermektedir. Özellikle Hindistan merkezli marka ve spor içeriklerinin yüksek izlenme sayılarına ulaşması, dijital medyanın yerel içerikleri küresel izleyiciyle buluşturma potansiyeline işaret etmektedir. Bu bulgu, sosyal medya platformlarının kültürel temsil ve dolaşım üzerindeki önemli işlevini vurgulayan çalışmalarla örtüşmektedir (Çomu & Binark, 2021). Reels, bu yönüyle kültürel çeşitliliğin hızla dolaşıma girdiği ve yeniden üretildiği bir dijital zemin olarak değerlendirilebilir.

Bu çalışma, sınırlı sayıda ve yüksek izlenme oranına sahip Reels videoları üzerinden gerçekleştirilen nitel içerik analizine dayalı olarak gerçekleştirilmiştir. Bu nedenle elde edilen bulgular, platformdaki tüm Reels içeriklerini temsil etme iddiasına sahip değildir. Ayrıca analiz, belirli bir zaman dilimini kapsıyor olup algoritmik sıralama ve görünürlük dinamiklerinin zamansal değişkenliği dikkate alındığında, sonuçların bağlamsal olarak değerlendirilmesi gerekmektedir. Bu doğrultuda sıralama baz alınan 11 Kasım tarihli 13 video üzerinden zamanla değişim gösterebilir. Gelecek çalışmalar, farklı zaman aralıklarına ait Reels içeriklerini kapsayan karşılaştırmalı analizler, daha geniş örneklemler veya nicel yöntemlerle desteklenen karma araştırma desenleri aracılığıyla kısa video kültürünün dönüşümünü daha kapsamlı biçimde ele alabilir.

Sonuç olarak Instagram Reels, kısa video ekonomisinin merkezinde konumlanan; algoritmik süreçler aracılığıyla içerik görünürlüğünü belirleyen, üretim pratiklerini giderek profesyonelleştiren ve kültürel temsilleri küresel ölçekte dolaşıma sokan bir dijital medya ekosistemi sunmaktadır. Bu bağlamda Reels, hem kullanıcı deneyimini hem de içerik üretim biçimlerini dönüştüren dinamik ve önemi artacak bir platform olarak değerlendirilebilir.

DİJİTAL GÖSTERİŞ TÜKETİMİ: INSTAGRAM'DA LÜKSÜN TEMSİLİ VE YENİDEN ÜRETİMİ

Dr. Alya Şahin Sarı
Bağımsız Araştırmacı
alyasahinn@gmail.com - 0009-0007-4787-4521

ÖZET

Bu çalışmada, Instagram'da lüks tüketim pratiklerinin dijital ortamda nasıl temsil edildiği ve kullanıcılar tarafından hangi anlamlar çerçevesinde yeniden üretildiği incelenmektedir. Görsel odaklı sosyal medya kültürünün statü, prestij ve aidiyet gibi sosyo-kültürel değerlerin inşasındaki rolünü ele alabilmek amacıyla, seçilmiş Instagram paylaşımları içerik analizi ve görsel söylem analizi yöntemleriyle değerlendirilmiştir.

Analiz bulguları, Instagram'ın lüks tüketimi yalnızca maddi sahipliğin sergilenmesi olarak değil, aynı zamanda dijital kimlik performansı, dijital görünürlük ve sosyal sermaye üretiminin stratejik bir aracı olarak yeniden yapılandırdığını göstermektedir. Kullanıcıların lüks söylemler üzerinden estetik kompozisyonlar, mekânsal semboller ve yaşam tarzı göstergeleri ile etkileşim artırdığı; bu sunumların çevrimiçi görünürlük, statü ve sosyal onay mekanizmalarını güçlendirdiği görülmüştür.

Çalışma, dijitalleşen tüketim kültüründe lüksün anlamının dönüşümünü Instagram üzerinden ortaya koyarak sosyal medya araştırmalarına kuramsal ve yöntemsel düzeyde katkı sağlamayı amaçlamaktadır.

Anahtar Kelimeler: Dijital tüketim kültürü, lüks tüketim, dijital kimlik, Instagram

DIGITAL CONSPICUOUS CONSUMPTION: THE REPRESENTATION AND REPRODUCTION OF LUXURY ON INSTAGRAM

Dr. Alya Şahin Sarı

Independent Researcher

alyasahinn@gmail.com – 0009-0007-4787-4521

ABSTRACT

This study examines how luxury consumption practices are represented in the digital environment of Instagram and within which frameworks of meaning they are reproduced by users. In order to analyze the role of visually oriented social media culture in the construction of socio-cultural values such as status, prestige, and belonging, selected Instagram posts were evaluated through content analysis and visual discourse analysis methods.

The findings indicate that Instagram reconstructs luxury consumption not merely as the display of material ownership, but also as a strategic tool for digital identity performance, digital visibility, and the production of social capital. It was observed that users increase engagement through luxury discourses by employing aesthetic compositions, spatial symbols, and lifestyle indicators; these presentations reinforce mechanisms of online visibility, status, and social approval.

By revealing the transformation of the meaning of luxury within a digitalized consumption culture through the case of Instagram, this study aims to contribute to social media research at both theoretical and methodological levels.

Keywords: Digital consumption culture, luxury consumption, digital identity, Instagram

1.GİRİŞ

Dijitalleşme, bireylerin tüketim pratiklerini ve bu pratiklere yükledikleri anlamları köklü biçimde dönüştürmüştür. Özellikle sosyal medya platformlarında değişen iletişim biçimleri, tüketimin yalnızca ekonomik bir faaliyet olmaktan çıkarak sembolik, kültürel ve iletişimsel bir sürece evrilmesinde merkezi bir zemin olmuş ve belirleyici bir rol üstlenmiştir. Bu bağlamda Instagram platformu da lüks tüketim üzerinde statü, prestij gibi değerlerin yeniden inşa edildiği ve dolaşımda olduğu görünür bir gösteri alanı hâline gelmiştir.

Instagram, görsel temelli yapısı sayesinde kullanıcıların yaşam tarzlarını farklı biçimlerde sunmalarına olanak tanımakta; lüks tüketim pratikleri bu platformda dijital gösteriş tüketiminin merkezi bir unsuru olarak estetik kodlar aracılığıyla öne çıkmaktadır. Kullanıcılar, sahip oldukları nesnelerden çok, bu nesnelerin sunum biçimi üzerinden dijital kimliklerini inşa etmektedir. Bu çalışma, Instagram'da lüks tüketimin hangi temsiller aracılığıyla görünür kılındığını ve bu temsillerin kullanıcılar tarafından nasıl yeniden üretildiğini incelemeyi amaçlamaktadır.

2. KURAMSAL ÇERÇEVE

Ayrıcalıklı yaşam tarzını simgeleyen lüks kavramı "rafine zevk, zarafet, arzu edilen ama gerekli olmayan şeylerin bir konsepti" şeklinde tanımlanmaktadır (Goody, 2006).

Medyanın evrimi, dijital platformların yaygınlaşması ve özellikle sosyal medyanın gündelik hayata entegre olmasıyla birlikte lüksün görünürlük biçimi de dönüşmüştür. Eskiden yalnızca belirli bir sınıfın erişebildiği lüks tüketim alışkanlıkları, günümüzde daha geniş kitlelerin izleyebildiği ve hatta içerik üreterek katıldığı bir alan hâline gelmiştir (Yılmaz ve Yasemin, 2025).

2.1. Gösteriş Tüketimi ve Lüks

Gösteriş tüketimi, bireyin mal ve hizmetleri yalnızca faydaları için değil, toplumsal statüsünü ve saygınlığını görünür kılmak için tüketmesidir (**Veblen, 2005**). Gösteriş tüketimi kavramı, tüketimin bireyler için yalnızca ihtiyaç giderme işleviyle sınırlı olmadığını; aynı zamanda toplumsal statü, prestij ve sınıfsal konumun sembolik bir göstergesi olarak işlev gösterdiğini

vurgulamaktadır. Gösterişçi tüketimin asıl amacı satın alınan mal ya da hizmetlerin satın alan kişiye getirisinden ziyade diğer kişiler tarafından açık bir şekilde zenginlik göstergesi olarak algılanmasıdır (Mason, 2001)

Gösteriş tüketiminde tüketime, maddi boyutların da ötesinde kültürel ve sosyal anlamlar yüklenmiş ve bu tüketim, tüketicinin toplumsal statüsünü, imajını gösteren bir boyut kazanmıştır. Bireyler tüketerek statüsünü göstermek, kişisel imajını sergileyebilmek için gösteriş tüketimine yönelerek toplumdaki diğer bireylerden farklı olacaklarına, saygınlık kazanacaklarına inanmaktadır (Boğa ve Başçı, 2016).

Gösteriş tüketimin nedenleri arasında başkalarına farklı görünme, kendini beğendirme, kişisel imaj sergileme ve kendini başkalarına ispatlama çabası gibi psikolojik motivasyonlar yer almaktadır (Hız, 2011).

Gösteriş tüketimi bireyler tarafından tüketim nesnelerine bazı belli anlamların yüklenmesiyle gerçekleştirilmektedir. Burada bireylerin temel amacı gerçekleştirdikleri tüketim ile kendini tatmin etmekten ziyade kendini topluma kanıtlama çabası olmaktadır. Gösteriş tüketiminde birey, tüketim nesnelerini kullanarak kendini ve seçkinlik hissiyatını tatmin etmek istemektedir. Bu hissiyat bireyin niteliklerine, beğenilerine göre farklılaşmaktadır. Öyle ki birey gösteriş tüketimi ile toplumda bir nevi kendi reklamını yapmaktadır (İlhan ve Uğurhan, 2019).

Gösterişçi tüketimi yapan birey, aslında mal ve hizmetlerden çok marka ve imajları tüketmektedir. Bu bağlamda Gucci bir çanta sahibi olma arzusu, Valentino'nun ürünlerin takip edilmesi bireylerin statü kazanma motivasyonuyla başvurduğu davranışlardır (Ritzer, 2001).

Popüler kültürün ürünü olarak sosyal medyada kısa sürede varlığını duyurup topluma empoze edilen etkileyiciler, dijital ortamların özendirici bir unsuru olmakta ve kullanıcıların manipüle edildiği bir yönlendirme ve denetim mekanizmasının parçası hâline gelmektedir (Aydar ve Nizam, 2025).

Dijital dünyada kimliğin inşasına dijital benlik açısından bakıldığında, kişinin kendine dair tüm duygu ve düşüncelerinin toplamı dijital benliği oluşturur. Bu benlik, bireyin dijital platformlarda ürettiği ya da paylaştığı tüm enformasyonu da kapsamaktadır (Morva, 2016). Lüks ise artık bu kimliğin önemli bir bileşeni haline gelmiştir.

Geleneksel anlamda düşünüldüğünde lüks, maddi ayrıcalık ve üst sınıflara özgü bir tüketim şekli olarak ele alınırken, dijitalleşmeyle birlikte bu kavram farklı bağlamlarda yeniden üretilmektedir. Günümüzde lüks, yalnızca sahip olunan bir nesneyle değil, bu nesnenin temsil edilme biçimi, bağlamı ve sunum biçimiyle de anlam kazanmaktadır.

Instagram gibi sosyal medya platformları, lüks tüketimin sunumunu kolaylaştıran ve bu sunumu gündelik hayatın bir parçası haline getiren mecralar olarak işlev görmektedir. Böylece gösteriş tüketimi, dijital ortamda daha geniş kitlelere ulaşmakta ve görsel anlatılar aracılığıyla yeniden üretilerek dolaşımda kalmaktadır.

Lüks ürün monogramının yaydığı sinyali kendi imajlarını güçlendirmek amacı ile kullanan tüketiciler, yaydıkları statü sinyaliyle başkalarının önünde daha onurlu ve gururlu hissedebilmektedir (Bazi, Filieri ve Gorton, 2020).

2.2. Dijital Kimlik ve Sosyal Sermaye

Sosyal sermaye; toplumu oluşturan bireylerin, sosyal ilişki bağları ve etkileşimlerle resmî kurumlara ve sivil toplum kuruluşlarına üyelikleri aracılığıyla elde edinilen fayda ve üstünlükleri araştıran ve gelişimini sağlayan bir kavramdır. Sosyal sermayenin önemli bir bileşeni olarak kabul edilen sosyal ağlar, sosyal sermayenin yaratılması ve geliştirilmesi için önemli bir paydaştır. Ağlara katılım ve yoğun bir sosyal ağ ilişkisinin var olması, sosyal sermayenin oluşması için gerekli bir koşul olmaktadır (Alan ve Sözen, 2017)

Sosyal medya platformları, bireylerin sürekli olarak kendilerini sundukları, kimliklerini performatif biçimde ürettikleri ve yeniden tanımladıkları birer zemin haline gelmiştir. Dijital kimlik, paylaşılan görseller, yazılan metinler, kurulan etkileşimler ve anlatılar üzerinden inşa edilmektedir. Beğeni, yorum, takipçi sayısı ve kaydetme gibi sayısal göstergeler ise sosyal onay mekanizmaları olarak işlev görmekte; böylece bireylerin dijital ortamda sahip oldukları sosyal sermayeyi daha görünür kılmaktadır.

Lüks tüketim temsilleri, bu sosyal sermayenin sürdürülmesinde ve artırılmasında stratejik bir araç olarak kullanılmaktadır. Prestijli markalar, seçkin mekânlar ve idealize edilmiş yaşam tarzları, kullanıcıların dijital statülerini güçlendiren semboller olarak kullanılmakta ve lüks dijital kimliğin bir parçası haline getirilmektedir.

2.3. Görsel Kültür ve Instagram

Instagram, görsel kültürün yoğun biçimde üretildiği, tüketildiği ve dolaşımda tutulduğu bir platformdur. Görsellerde kullanılan estetik düzenlemeler, filtreler, mekânsal göstergeler, metinler, renk kullanımları ve kompozisyonlar, lüksün dijital anlatısının temel yapı taşlarını oluşturmaktadır. Bu görsel söylem, kullanıcıların hem kendilerini hem de tüketim pratiklerini idealize edilmiş ve izleyici tarafında arzu edilir bir biçimde sunmalarına imkân sağlamaktadır. Dolayısıyla Instagram, lüks tüketimin yalnızca sergilendiği değil, aynı zamanda anlamlandırıldığı ve yeniden üretildiği bir kültürel zemin olarak değerlendirilmektedir.

3. Yöntem

Bu çalışma, nitel araştırma yaklaşımıyla tasarlanmıştır. Araştırma kapsamında, *Time* dergisinin 2025 yılı için açıkladığı en etkili 100 influencer listesinde yer alan içerik üreticilerinin Instagram paylaşımları incelenmiştir. *Time* dergisinin 2025 yılı için yayımladığı "**TIME100 Creators**: The Most Influential Digital Voices" listesi, küresel ölçekte etki gücü kanıtlanmış, farklı alanlarda dijital kültürü yönlendiren influencerları içermesi sebebiyle temel referans noktası olmuştur.

Verilerin analizinde iki aşamalı bir yöntem izlenerek öncelikle içerik analizi uygulanmış ve paylaşımlarda öne çıkan temalar tespit edilmiştir. İkinci aşamada ise görsel söylem analizi kullanılarak estetik kompozisyonlar, mekânsal semboller ve görsel anlatı stratejileri incelenmiştir. Bu yöntemler aracılığıyla lüks tüketimin dijital ortamda nasıl temsil edildiği ve anlamlandırıldığı ortaya konulmuştur.

3.1. Örneklem Seçimi

Amaçlı örnekleme yöntemi kullanılarak, Instagram platformunda aktif olan ve içeriklerinde lüks markalar, prestijli mekânlar, estetik yaşam tarzları ile sembolik statü göstergelerine yer veren hesaplar seçilmiştir. Böylece örneklem, lüks tüketimin farklı temsil biçimlerini moda, güzellik, finansal başarı, eğlence ve popülerlik anlatıları üzerinden kapsayacak biçimde çeşitlendirilmiştir.

Bu çalışmanın örneklemi, lüks tüketimin dijital temsillerini yüksek görünürlük ve etkileşim düzeyinde üretip dolaşıma sokan içerik üreticilerini kapsayacak şekilde belirlenen örneklem dahilinde incelenen influencer hesapları ve içerik tarzları şu şekildedir:

- **Alix Earle (@alix_earle):** Yaşam tarzı, moda, güzellik ve eğlence odaklı paylaşımlarıyla lüks tüketim
- **Olivia Dunne (@livvydunne):** Spor, başarı, güzellik ve yaşam tarzı ekseninde kurduğu görsel anlatılar
- **Charli D'Amelio (@charlidamelio):** Dans ve yaşam tarzı odaklı geniş lüks temalı estetik temsiller
- **Imane Anys – Pokimane (@pokimanelol):** Güzellik, moda ve yaşam tarzı unsurları
- **Wisdom Kaye (@wisdm):** Moda, stil ve lüks markalar üzerinden kurduğu güçlü görsel estetik temsiller
- **Becca Bloom (@beccaxbloom):** Seyahat, lüks moda ve estetik odaklı paylaşımlar
- **Camila Coelho (@camilacoelho):** Moda, güzellik ve seyahat temelli lüks yaşam tarzı temsilleri
- **Nava Rose (@thenavarose):** Lüks moda, tasarım ve şehir yaşamı temsilleriyle popüler kültür odaklı anlatılar
- **Vivian Tu (@your.richbff):** Finansal başarı ve zenginlik imgelerini mizahi bir anlatıyla sunarak statü, sermaye ve kimlik ilişkisini görünür kılan anlatılar
- **Kai Cenat (@kaicenat):** Dijital eğlence, başarı anlatısı ve yükselen popülerlik temaları lüks ögeleri ön planda tutan sunumlar

4. Bulgular

Bu bölümde, araştırma kapsamında incelenen Instagram paylaşımlarından elde edilen bulgular iki aşamalı analiz doğrultusunda sunulmaktadır. İlk aşamada içerik analizi uygulanarak lüks tüketim temsillerinde öne çıkan temalar belirlenmiş; ikinci aşamada ise görsel söylem analizi ile bu temaların hangi estetik ve sembolik stratejilerle üretildiği incelenmiştir.

4.1. İçerik Analizi: Tematik Bulgular

İçerik analizi sonucunda, incelenen influencer hesaplarında lüks tüketimin farklı boyutlarını temsil eden ortak temalar görülmüştür. Bu temalar, lüksün yalnızca maddi bir tüketim biçimi

değil; aynı zamanda statü, kimlik, başarı ve sosyal sermaye üretimiyle ilişkili olarak dijital kimlikte bir anlam ifade ettiğini göstermektedir.

Tablo 1. Instagram'da Lüks Tüketimin Tematik Temsilleri

Tema	Temanın İçeriği / Anlam Alanı	İlgili Influencer Hesapları
Marka Odaklı Lüks	Küresel lüks moda ve güzellik markalarının görünür, tanınabilir ve estetik biçimde sergilenmesi	Wisdom Kaye, Camila Coelho, Becca Bloom, Bretman Rock
Estetik Yaşam Tarzı	Günlük hayatın stilize edilerek seçkin, zahmetsiz ve arzu edilir bir yaşam biçimi olarak sunulması	Alix Earle, Nava Rose, Charli D'Amelio
Mekânsal Prestij	Lüks oteller, özel etkinlik alanları, tatil yeleri ve seçkin iç mekânların statü göstergesi olarak kullanımı	Camila Coelho, Olivia Dunne, Alix Earle
Başarı ve Yükselme Anlatısı	Kariyer, popülerlik ve kişisel yükselişin lüks tüketimle ilişkilendirilerek anlatılması	Kai Cenat, Vivian Tu, Olivia Dunne
Beden ve Performans	Fit beden, güzellik, stil ve performans üzerinden kurulan prestij ve statü vurgusu	Olivia Dunne, Bretman Rock
Finansal ve Sembolik Sermaye	Zenginlik, kazanç, yatırım ve ekonomik başarının statü göstergesi olarak sunulması	Vivian Tu, Kai Cenat
Dijital Popülerlik ve Görünürlük	Takipçi sayısı, viral içerik ve platform içi etkileşimlerin lüks ve statüyle ilişkilendirilmesi	Charli D'Amelio, Kai Cenat

Bu temalar, influencerların lüks tüketimi farklı anlatı stratejileriyle yeniden ürettiklerini ve takipçilerine normatif bir "ideal yaşam" çerçevesinde sergilediklerini ortaya çıkarmaktadır.

4.2. Görsel Söylem Analizi: Estetik ve Temsil Stratejileri

Görsel söylem analizi, içerik analizinde belirlenen temaların Instagram paylaşımlarında nasıl estetize edildiğini ve anlamlandırıldığını ortaya koymaktadır. İncelenen paylaşımlarda lüks tüketim, belirli görsel kodlar ve anlatı biçimleri üzerinden takipçilere ve izleyicilere sunulmaktadır.

Öncelikle, **estetik kompozisyonlar** lüksün temel taşıyıcısı olarak işlev göstermektedir. Simetrik kadrajlar, yumuşak ışık kullanımı, profesyonel fotoğraf kalitesi ve sade ama seçkin arka planlar, paylaşımlara zamansız ve üst sınıf bir estetik değer katmaktadır. Bu kompozisyon biçimi, lüksü gündelik yaşamın doğal bir parçasıymış gibi sunarak olağanlaştırmaktadır.

İkinci olarak, **mekânsal semboller** güçlü bir söylemsel işlev göstermektedir. Lüks oteller, lüks restoranlar, özel davet alanları, backstage görüntüleri, lüks marka ürünler, spor salonları ve şehir manzaraları; ekonomik ve kültürel sermayenin görsel göstergeleri olarak kullanılmaktadır. Mekân, bireysel başarının ve seçkinliğin kanıtı niteliğinde sunulmakta; kullanıcı ile takipçi arasında sembolik de olsa bir mesafe eklemektedir. Bu ulaşılmaz görüntü, izleyiciye mesafe yaratırken izlenen için bir yıldız sembolü olmaktadır.

Üçüncü olarak, **görsel anlatı stratejileri** kişisel hikâye söylemiyle desteklenmektedir. “Gerçekten nasıl zengin olursunuz”, “kendine yatırım” gibi anlatılar, lüks tüketimi hak edilen bir sonuç olarak çerçevelemektedir. Özellikle Kai Cenat ve Vivian Tu örneklerinde, başarı ve finansal kazanım anlatıları lüks imgelerle birleşerek meşrulaştırıcı bir söylem üretmektedir.

Son olarak, beden, stil ve mimik kullanımı da lüksün performatif boyutunu daha güçlü hale getirmektedir. Rahat pozlar, doğal ama kusursuz görünümler, yüksek statülü yaşamı zahmetsiz ve erişilebilir gibi gösterirken; gerçekte bu yaşam biçimini idealize eden bir temsilde bulunmaktadır. Bu bulgular, Instagram’da lüks tüketimin yalnızca nesneler üzerinden değil; estetik, mekân, anlatı ve beden performansları aracılığıyla bütüncül bir görsel söylem olarak inşa edildiğini ve influencerlar için etki alanlarını genişlettikleri bir araç olarak kullanıldığını ortaya koymaktadır.

5. SONUÇ

Tüketim davranışlarının sosyal statüyü işaret eden bir araç olarak ele alınması gösterişçi tüketimin en temel hareket noktasıdır. İnsanların sosyal statüsü, göreceli zenginliklerinin bir fonksiyonu olarak kabul edilir ve bu zenginliğin diğerleri tarafından gözlemlenebileceği de varsayılır. Böylece bireyler tüketim kalıplarını, kamuyu etkileyerek elde edilen, statü sağlayan

mallar ve kendi ihtiyaçları için daha faydalı mallar arasından tercihlerle belirlemektedir. Bu doğrultuda teorik çerçeve Veblen tarafından ortaya konulan ‘gösteriş amaçlı tüketim’ temel fikrine dayanmaktadır (Açıkalın ve Erdoğan, 2004)

Bu çalışma, Instagram platformunda lüks tüketimin nasıl temsil edildiğini ve bu temsillerin dijital kimlik, statü ve sosyal sermaye üretimiyle nasıl ilişkilenerek yeniden üretildiğini incelemiştir. TIME100 Creators listesinde yer alan influencerların paylaşımlarının analiz edilmesi, lüksün günümüz dijital kültüründe yalnızca maddi bir ayrıcalık olmaktan çıkarak estetik, sembolik ve anlatısal bir değer kazanarak sürdürüldüğünü göstermektedir.

İçerik analizi bulguları, lüks tüketimin marka görünürlüğü, estetik yaşam tarzı, mekânsal prestij, başarı anlatıları, dijital popülerlik, beden ve güzellik performansı gibi temalar etrafında çerçevelendirilmektedir. Bu temalar, lüksün tekil bir tüketim pratiği değil; çok katmanlı ve dijital kültür içerisinde inşa edilen bir anlam alanı olduğunu ortaya koymaktadır. Özellikle başarı, emek ve kendine yatırım söylemleri aracılığıyla lüks tüketimin “hak edilmiş” bir sonuç olarak sunulduğu içeriklere rastlanmıştır.

Görsel söylem analizi ise lüksün Instagram’da belirli estetik kodlar ve anlatı biçimleriyle stratejik olarak yeniden üretildiğini göstermiştir. Simetrik kompozisyonlar, seçkin mekânlar, gündelik yaşam anlatıları ve doğal beden performansları, lüks yaşamın zahmetsiz ve ulaşılabilir olduğu izlenimini yaratmaktadır. Oysa aksine kontrollü bir şekilde yapılan bu performans kullanıcı tarafında yüksek beğeni, yorum, paylaşma ve kaydetme istatistikleri olarak mekanizmayı onaylamaktadır. Bu durum, lüksün sıradanlaştırılarak ideal bir yaşam biçimi olarak sunulmasına katkı sağlamaktadır.

5.1. Lüksün Estetikleştirilmiş Temsili

Analiz edilen paylaşımlar, lüks tüketimin çoğunlukla estetik açıdan özenle kurgulanmış yüksek kalitede görsellerle sunulduğunu göstermektedir. Minimalist kompozisyonlar, belirli renk paletleri ve mekânsal düzenlemeler, lüksün seçkin ve ayrıcalıklı bir yaşam tarzı olarak temsil edilmesini sağlamaktadır.

5.2. Dijital Kimlik Performansı Olarak Lüks

Bulgular, lüks tüketimin bireysel kimliğin dijital ortamda performatif biçimde sunulmasının önemli bir aracı olduğunu göstermektedir. Kullanıcılar, lüks nesneleri ve mekânları gündelik

hayatın doğal bir parçası gibi sunarak hem zahmetsiz bir dünya hem idealize edilmiş bir benlik imgesi yansıtmaktadır.

5.3. Görünürlük ve Sosyal Onay Mekanizmaları

Lüks içerikli paylaşımların yüksek etkileşim oranlarına sahip olduğu görülmüştür. Beğeni, kaydetme ve yorumlar, bu tür paylaşımların sosyal onay üretme potansiyelini güçlendirmekte; lüks, dijital ortamda statü ve prestijin yeniden üretilmesini ve dolaşımını sağlamaktadır.

Sonuç olarak, Instagram'da lüks tüketim, yalnızca nesnelerin sergilenmesiyle değil; kimlik performansı, sosyal onay mekanizmaları ve görsel anlatılar aracılığıyla kontrollü bir biçimde inşa edilen ve yönetilen bütüncül bir söylem olarak karşımıza çıkmaktadır. Influencerlar, bu söylemin taşıyıcıları olarak, takipçilerinin tüketim algılarını ve statü beklentilerini şekillendiren önemli kültürel aktörler halini almaktadır.

Çalışma, dijitalleşen tüketim kültüründe lüksün dönüşen anlamlarını görünür kılarak sosyal medya ve iletişim çalışmaları literatürüne güncel bir katkı sağlamaktadır. Gelecekte yapılacak araştırmalar için farklı platformlar, kültürel bağlamlar ve nicel yöntemlerle desteklenebilecek yeni derinlemesine araştırmalar önerilmektedir.

GAZETECİLİĞİN DİJİTAL DÖNÜŞÜMÜ VE GÜVEN SORUNU

Dr. Gürkan KILIÇ

Sakarya Üniversitesi, Öğretim Görevlisi

gkilic@sakarya.edu.tr - ORCID ID: 0000-0002-9929-0639

ÖZET

Hayatın her alanında yaşanan dijital dönüşümün en kuvvetli şekilde etkilediği mesleklerin başında gazetecilik gelmektedir. Meslek pratikleri ve okur alışkanlıklarındaki değişim oldukça kuvvetli yaşanmıştır. İnternet altyapısının verdiği imkanlar nedeniyle zaman ve mekandan bağımsız hale gelen gazetecilikte hız önem kazanmıştır. Diğer yandan mobil cihazların kullanımındaki artış ile de artık isteyen herkes haber üretebilir duruma gelmiştir. Tüm bu etkenlerle kaynağı sorgulanmadan hızlı şekilde üretilen haberlerin kaynağının güvenilirliği ve teyit sorunları ortaya çıkmıştır. Özellikle sosyal medyada kaynağı sorgulanamayan anonim hesaplar tarafından üretilen manipülasyona uğratılmış çok sayıda haberin dolaşıma sokulması, haberin teyit edilme ihtiyacını artırmıştır.

Sakarya, Kocaeli, Bolu, Düzce ve Yalova illerinde yürütülen araştırmada, yerel gazetelerin sahipleri ve üst düzey yöneticileri ile mülakat tekniği ile veriler toplanmış ve geleneksel gazetecilikten, dijital gazeteciliğe geçişte yaşanan haberin güvenirliği ve teyit sorunları ile ilgili analizler yapılmıştır. Okur kitlesinin her ne kadar daha fazla dijital mecralardan ve sosyal medya platformlarından haber alma eğiliminde olduğunun görülmesine rağmen, önemli haberleri halen geleneksel gazeteleri takip ederek teyit etme eğiliminde oldukları görülmektedir. Okur kitlesinin geleneksel gazeteleri, dijital mecralardaki gazetecilik faaliyetlerinden daha güvenilir buldukları ve referans aldıkları da anlaşılmaktadır.

Anahtar Kelimeler: Geleneksel Gazetecilik, Dijital Gazetecilik, Gazeteciliğin Dönüşümü, Yeni Medya, Haberde Teyit

THE DIGITAL TRANSFORMATION OF JOURNALISM AND THE ISSUE OF TRUST

PhD. Gürkan KILIÇ

ABSTRACT

Journalism is one of the professions most strongly affected by the digital transformation experienced in every aspect of life. Changes in professional practices and reader habits have been quite significant. Speed has become crucial in journalism, which has become independent of time and place due to the opportunities provided by internet infrastructure. On the other hand, with the increase in the use of mobile devices, anyone can now produce news. All these factors have led to problems with the reliability and verification of news sources, which are produced quickly without questioning their origin. In particular, the circulation of numerous manipulated news stories produced by anonymous accounts on social media, whose sources cannot be questioned, has increased the need for news verification.

In this research conducted in Sakarya, Kocaeli, Bolu, Düzce, and Yalova provinces, data was collected through interviews with owners and senior managers of local newspapers, and analyses were made regarding the reliability and verification problems of news experienced during the transition from traditional to digital journalism. Although it is observed that the readership tends to obtain news more from digital channels and social media platforms, it is seen that they still tend to verify important news by following traditional newspapers. It is also understood that the readership finds traditional newspapers more reliable and references them than journalistic activities in digital media.

Keywords: Traditional Journalism, Digital Journalism, Transformation of Journalism, New Media, Fact-Checking

1. GİRİŞ

Gazeteciliğin dönüşümü, insanoğlunun en temel ontolojik ihtiyaçlarından biri olan merak ve haberdar olma duygusuna yanıt arama pratiklerinin, tarihin en ilkel dönemlerinden dijital çağın sunduğu olanaklara kadar geçirdiği uzun bir evrim sürecidir. Dumanla haberleşmeden matbaanın icadına, telgrafın kullanımından radyo ve televizyonun evlere girmesine kadar her teknolojik devrim, habercilik mesleğini yeniden şekillendirmiştir. "Geleneksel medya" olarak adlandırılan dönemde gazetecilik, katı hiyerarşik yapılar ve profesyonel "eşik bekçileri" (editörler) tarafından kontrol edilen tek yönlü bir iletişim süreci olarak yürütülmüştür. Ancak 1990'lı yıllarda internetin ve World Wide Web (WWW) teknolojisinin yaygınlaşması, gazetecilikte "Dijital Devrim" olarak adlandırılan yeni bir dönemi başlatmış; haberin üretim, dağıtım ve tüketim süreçlerini kökten değiştirmiştir.

Yeni medya düzeni, sayısal temsil, etkileşimsellik, yöndeşme ve hız gibi temel niteliklerle karakterize edilmektedir. Bu dönüşüm; mobil gazetecilik, veri gazeteciliği ve robot gazetecilik gibi yeni formları ortaya çıkarırken, yer ve zaman sınırlarını ortadan kaldırarak 7/24 kesintisiz habercilik anlayışını yerleştirmiştir. Ancak bu teknolojik imkanlar, beraberinde gazetecilerin çalışma rutinlerinde de bir değişim yaratmış; sahada haber peşinde koşan muhabirin yerini büyük oranda "masabaşı habercilik" yapan ve internet kaynaklarını tarayan editörler almıştır. Bu durum, haber üretiminde hızın doğruluğun önüne geçmesi (hız tuzağı) ve editoryal denetimin zayıflaması gibi etik sorunları tetiklemiştir.

Günümüzde gazetecilik sektörü, dijital platformların sunduğu denetimsiz özgürlük ortamından kaynaklanan çok boyutlu bir güven bunalımıyla karşı karşıyadır. Reklam gelirlerini artırma kaygısıyla ortaya çıkan "tık odaklı" (clickbait) habercilik, asılsız haberlerin (dezenformasyon) sosyal medyada doğru haberlerden çok daha hızlı yayılması ve haber ile reklam ayrımının belirsizleşmesi, medyaya olan güvenin tarihin en düşük seviyelerine gerilemesine neden olmuştur. Özellikle kriz dönemlerinde teyit edilmemiş bilgilerin saniyeler içinde milyonlara ulaşması, haber doğrulama (fact-checking) platformlarına olan ihtiyacı artırmış ve "teyit" kavramını gazeteciliğin merkezine yerleştirmiştir.

Geleneksel gazetecilik pratiklerinde bir haberin yayınlanmadan önce mutlaka teyit edilmesi bir zorunlulukken, dijital mecralarda haberin yayınlandıktan sonra silinebilme esnekliği, manipülasyona ve denetimsizliğe kapı aralamaktadır. Bu çalışma, dijitalleşmenin getirdiği teknolojik olanaklar ile bu sürecin yarattığı etik erozyon, dezenformasyon ve güven sorunu arasındaki ilişkiyi incelemeyi amaçlamaktadır. Sektör temsilcilerinin görüşleri ışığında,

geleneksel gazeteciliğin denetlenebilir ve kalıcı yapısının, dijital dünyanın hızı ve dezenformasyon riski karşısında nasıl bir "güven limanı" olarak görüldüğü analiz edilecektir.

2. GAZETECİLİĞİN DİJİTAL DÖNÜŞÜMÜ, ETİK VE GÜVEN

2.1. Geçmişten Günümüze Gazeteciliğin Dönüşümü

Gazeteciliğin dönüşümü, insanoğlunun ontolojik bir gereksinimi olan merak ve haberdar olma duygusuna cevap bulma pratiklerinin, tarihin en ilkel dönemlerinden dijital çağın sunduğu olanaklara kadar geçirdiği uzun bir evrim sürecidir. Bu süreçte haberleşme; duman, kuş ve duvar resimlerinden başlayarak; yazının bulunması (M.Ö. 5000), matbaanın icadı (M.S. 1450) ve elektronik kitle iletişim araçlarının gelişimi gibi büyük devrimlerle şekillenmiştir.

Antik dönemde Roma İmparatorluğu'nda senato kararlarının halka duyurulduğu Acta Diurna, tarihteki ilk gazete örneklerinden biri kabul edilir (Ayer & Akgül, 2019). 13. yüzyıldan itibaren tacirler ve bankerler arasında haber akışını sağlayan el yazması haber mektupları, modern gazeteciliğin öncüleri olmuştur (Özçağlayan, 2014). Gazetecilikteki en büyük kırılma, 15. yüzyılın ortalarında Johannes Gutenberg'in hareketli parçalı matbaayı icat etmesiyle yaşanmış; bu gelişme bilginin kitlesel üretimini ve yayılmasını mümkün kılarak basım devrimini başlatmıştır (Kılıç, 2019). 17. yüzyılın başında (1605 ve 1609) Avrupa'da ilk süreli gazeteler yayınlanmaya başlamış, 19. yüzyılda Sanayi Devrimi ile birlikte gazeteler seçkin bir zümreye hitap etmekten çıkarak kitle gazetelerine dönüşmüştür (Gezmen, 2019).

20. yüzyılın başlarında telgrafın kullanımıyla haber iletimi ulaşımdan bağımsızlaşmış ve hızlanmıştır. 1920'lerde radyonun, 1950'lerde ise televizyonun evlere girmesiyle gazetecilik görsel ve işitsel bir boyut kazanmış; bu araçlar toplumu bilgilendirme ve manipüle etme gücüyle "geleneksel medya" (konvansiyonel medya) dönemini başlatmıştır. Bu dönemde gazetecilik, katı hiyerarşik yapılar ve profesyonel "eşik bekçileri" (editörler) tarafından kontrol edilen tek yönlü bir iletişim süreci olarak yürütülmüştür (Özçağlayan, 2014).

1990'lı yıllarda internetin ve World Wide Web (WWW) teknolojisinin yaygınlaşması, gazetecilikte "Dijital Devrim" olarak adlandırılan yeni bir dönemi başlatmıştır. İnternet gazeteciliği (çevrimiçi gazetecilik), haberin üretim, dağıtım ve tüketim süreçlerini kökten değiştirmiş; yer ve zaman sınırlarını ortadan kaldırarak 7/24 kesintisiz habercilik anlayışını getirmiştir (Parlak, 2018).

Günümüzde gazetecilik, teknolojideki yöndeşme sayesinde pek çok yeni forma bürünmüştür. Mobil gazetecilik (MoJo), akıllı telefonlar sayesinde her kullanıcının potansiyel bir muhabir olmasını sağlamış ve habere her an her yerden erişimi mümkün kılmıştır. Veri gazeteciliği,

büyük veri yığınlarının (big data) analiz edilip görselleştirilerek sunulmasıyla habere güvenilirlik ve derinlik katmıştır. Robot (algoritmik) gazetecilik, yapay zekâ yazılımları aracılığıyla saniyeler içinde otomatik haber metinleri üretilmesine olanak tanırken; dron gazeteciliği zorlu bölgelerden kuş bakışı görseller sunarak haberin çekiciliğini artırmıştır (Büyükbingöl, 2021; Ünal, 2020).

Dijitalleşme, gazetecilerin çalışma rutinlerini de dönüştürmüştür. Sahada haber peşinde koşan muhabirin yerini büyük oranda "masabaşı habercilik" yapan, internet kaynaklarını tarayan ve ajans haberlerini güncelleyen editörler almıştır (Korap Özel & Deniz, 2018). Yeni dönem gazetecisinden "çoklu beceri" (multi-skilling) sahibi olması; yani aynı anda hem metin yazması hem fotoğraf çekmesi hem de video kurgulaması beklenmektedir. Ancak bu durum, haber üretiminde hızın doğruluğun önüne geçmesi (hız tuzağı) ve editoryal denetimin zayıflaması gibi etik sorunları ve dezenformasyon riskini de beraberinde getirmiştir (Özel & Deniz, 2019).

Hızın yarattığı nitelik kaybına tepki olarak doğan "yavaş gazetecilik" (slow journalism), haberde derinlemesine araştırmayı, niteliği ve doğrulamayı ön plana çıkararak geleneksel gazetecilik değerlerine dönmeyi savunmaktadır. Ayrıca büyük medya holdinglerinin kontrolü dışındaki yurttaş gazeteciliği ve kitlesel fonlamalı modeller, dijital dünyada çok sesliliğin korunması açısından önemli bir alternatif oluşturmaktadır (Akın, 2021).

2.2. Yeni Medya, Etik ve Güven

2.2.1. Yeni Medya Kavramı

Yeni medya, 1970'li yıllardan itibaren gelişim gösteren ancak özellikle 1990'lardan sonra internetin ve bilgisayar teknolojilerinin yaygınlaşmasıyla kitle iletişim araçlarının geçirdiği dijital dönüşümü ifade eden kapsamlı bir kavramdır. En genel tanımıyla, geleneksel medya biçimlerinin (gazete, radyo, televizyon) teknoloji merkezli dönüşümü sonucunda oluşan, sayısal temelli, etkileşimli ve çoklu ortam desteğine sahip yeni bir iletişim düzenidir. Bu mecra; bilgisayar işlem gücü olmadan oluşturulamayacak, merkezsizleşmiş ağ tabanlı ve sınırları esnek bir yapı sergiler (Aydoğan & Kırık, 2012; Büyükbingöl, 2021).

Yeni medyanın tanımlanmasında ve geleneksel medyadan ayrılmasında bazı temel nitelikler öne çıkmıştır:

• Sayısal Temsil (Dijitallik): Yeni medya nesneleri, analog sinyallerin aksine "0" ve "1"den oluşan matematiksel algoritmalara ve sayısal kodlara dayanır. Bu durum, içeriğin kayıpsız çoğaltılmasını, kolayca manipüle edilmesini ve programlanabilir olmasını sağlar (Yaşar, 2020).

• Etkileşimsellik (Interactivity): Yeni medyanın en ayırt edici özelliği, alıcı ile verici arasındaki tek yönlü iletişim duvarını yıkarak çift yönlü bir etkileşime olanak tanımasıdır. Kullanıcı artık sadece pasif bir izleyici değil, içeriği değiştirebilen, yorum yapabilen ve bizzat içerik üretebilen aktif bir öznedir (Birsen, Oğur, & Özmen, 2018).

• Yöndeşme/Yakınsama (Convergence): Bilgi teknolojileri, telekomünikasyon ve geleneksel medya sektörlerinin tek bir platformda (genellikle internet ve akıllı cihazlar) bütünleşmesidir. Bu sayede tek bir cihaz üzerinden hem televizyon izlenebilir, hem gazete okunabilir hem de sosyal etkileşim kurulabilir (Aydoğan, 2013).

• Eşzamansızlık (Asenkron Olabilme): İletişimin gerçekleşmesi için tarafların aynı anda sistemde bulunma zorunluluğunu ortadan kaldırır. Kullanıcılar diledikleri içeriğe diledikleri zaman ve mekândan ulaşma özgürlüğüne sahiptir (Kuyucu, 2021).

• Kitlesizleştirme (Demassification): Geniş kitlelere hitap ederken aynı zamanda bireysel tercihlere odaklanabilme, mesajı kişiye özel hale getirebilme yeteneğidir. Bu özellik, toplumu homojen bir kitle olmaktan çıkarıp bireysel tercihlerle şekillenen bir ağ yapısına dönüştürür (Yurdigül & Yüksel, 2012).

• Hipermetinsellik (Hypertextuality): Bilginin doğrusal bir sırada değil, birbirine bağlı "linkler" (bağlantılar) aracılığıyla sınırsız ve çok boyutlu bir ağ içinde sunulmasıdır (Aslan, Bayrakçı & Küçükvardar, 2016).

Kuramsal açıdan Lev Manovich, yeni medyayı sayısal temsil, modülerlik, otomasyon, değişkenlik ve kod çevrimi olarak beş temel prensip üzerinden tanımlar. Mark Poster ise bu dönemi "İkinci Medya Çağı" olarak adlandırarak; merkezi olmayan, demokratik ve çok yönlü iletişimi vurgular. Manuel Castells bu yeni yapıyı "Ağ Toplumu" kavramıyla açıklarken, geleneksel kurumsal kontrolün yerini bireysel ve yatay örgütlenmelerin aldığına dikkat çeker (Aslan, Bayrakçı & Küçükvardar, 2016).

2.2.2. Yeni Medyada Etik ve Güven Sorunu

Yeni medyada etik ve güven sorunu, iletişim teknolojilerinin hızla gelişmesiyle birlikte geleneksel habercilik pratiklerinin dönüşmesi ve dijital platformların sunduğu denetimsiz özgürlük ortamından kaynaklanan çok boyutlu bir problemdir. Geleneksel medyanın tek yönlü ve merkeziyetçi yapısı, yerini etkileşim, hız ve çok seslilik vadeden yeni medyaya bırakırken; bu değişim beraberinde ciddi bir enformasyon kirliliği ve güven bunalımı getirmiştir (Genel, 2014; Yurdigül & Yüksel, 2012; Kuyucu, 2018).

Yeni medyada etik ve güven ile ilgili sorunları 6 başlıkta incelemek mümkündür.

1. Hız Yarışı ve Doğrulama Sorunu (Hız vs. Doğruluk)

Yeni medya düzeninde habercilik, 7/24 kesintisiz bir akışa dönüşmüştür. Bu durum, haberi rakip mecralardan önce duyurma baskısını artırarak "önce yayınla, sonra doğrula" anlayışını beraberinde getirmiştir (Bilecen & Bayraktutan, 2018).

• Hız Tuzağı: Haberin hızla yayılması, geleneksel medyadaki editoryal kontrol ve süzgeç mekanizmalarını zayıflatmış; bu da hataların ve teyit edilmemiş bilgilerin saniyeler içinde milyonlara ulaşmasına neden olmuştur (Özel, & Deniz, 2019).

• Dezenformasyon: Özellikle kriz ve savaş dönemlerinde asılsız haberler (asparagas), sosyal medyada doğru haberlerden çok daha hızlı yayılmaktadır. Yapılan araştırmalar, yalan haberlerin Twitter'da doğru haberlere göre %70 daha fazla paylaşıldığını göstermektedir (Bilecen & Bayraktutan, 2018).

2. Tık Odaklı Habercilik ve "Tık Tuzağı" (Clickbait)

Dijital gazetelerin reklam gelirleri, sayfa görüntüleme ve tıklanma sayılarına bağlı olduğu için haber üretimi "tık odaklı" bir hale gelmiştir.

• Yanıltıcı Başlıklar: Okuyucuyu tıklamaya zorlayan ancak içerikle örtüşmeyen merak uyandırıcı, eksik veya yanıltıcı başlıklar (clickbait), okur nezdinde medyaya olan güveni zedeleyen en büyük etik sorunlardan biridir (Özel, & Deniz, 2019).

• Sanal Galeriler: Haberi okutmak yerine her karede ayrı bir tık almak amacıyla oluşturulan ve içeriği bölerek okuru mağdur eden uzun galeriler de önemli bir etik ihlaldir (Özçağlayan, 2014).

3. Haber ve Reklam Ayrımının Belirsizleşmesi

Geleneksel gazetecilikte keskin çizgilerle ayrılan editöryal içerik ve ticari reklamlar, yeni medyada iç içe geçmeye başlamıştır.

• Örtülü Reklam: "Advertorial" veya "tanıtıcı haber" adı altındaki içerikler, okur tarafından çoğu zaman haber sanılmakta, bu da tarafsızlık ve bağımsızlık ilkelerini ihlal etmektedir. Haber içeriklerine yerleştirilen reklam linkleri de güvenilirliği olumsuz etkilemektedir (Büyükbingöl, 2021; Özel, & Deniz, 2019).

4. Mahremiyet İhlalleri ve Dijital Gözetim

Dijital teknolojilerin yaygınlaşması, bireylerin özel hayatının gizliliğini ciddi bir risk altına sokmuştur.

• Özel Alan İhlali: Gizli kameralar, dronlar ve sosyal medyadan elde edilen kişisel verilerin izinsiz kullanımı, etik sınırların aşılmasına neden olmaktadır.

• Gözetim Toplumu: Bireylerin internet üzerindeki izleri (cookie/çerezler gibi) takip edilerek kullanıcı profilleri oluşturulmakta ve bu veriler ticari veya siyasi manipülasyon amaçlı kullanılmaktadır (Turan, & Esenoğlu, 2006).

5. Fikri Mülkiyet ve "Kopyala-Yapıştır" Gazeteciliği

Yeni medyada içeriğin kolayca kopyalanıp yayılabilmesi, ciddi bir emek hırsızlığı (intihal) sorununa yol açmaktadır.

• Telif Sorunu: Muhabirlerin büyük emeklerle ürettiği özel haberler, kaynak gösterilmeden başka siteler tarafından hızla çalınmakta; bu da nitelikli gazetecilik üretimini baltalamaktadır. Özellikle internet editörlerinin "masabaşı muhabirliği" yaparak başka mecralardan haber derlemesi, özgün haber üretimini azaltmaktadır (Özel, & Deniz, 2019).

6. Güven Bunalımı ve Teyit Mekanizmaları

Tüm bu etik sorunlar, toplumun medyaya olan güveninin tarihin en düşük seviyelerine gerilemesine neden olmuştur.

• Teyit Platformları: Medyaya olan güven kaybına tepki olarak, dolaşımdaki bilginin doğruluğunu kontrol eden teyit.org, doğrulukpayi.com gibi haber doğrulama (fact-checking) platformları ortaya çıkmıştır (Bilecen & Bayraktutan, 2018).

• Robot Gazetecilik ve Algoritmalar: Haber üretiminde yapay zeka kullanımının artması, haberin kimin sorumluluğunda olduğu ve algoritmaların etik davranıp davranamayacağı sorusunu gündeme getirmiştir (Sayar, 2022).

3. ARAŞTIRMA BULGULARI

3.1. Araştırma Deseni ve Yöntemi

Araştırma deseni olarak güncel bir olayı inceleyerek detaylı bir analizle nasıl ve niçin sorularıyla veri toplamayı amaçlayan Durum Çalışması “case study” seçilmiştir. Durum çalışması, gerçek bir durumun kendi ortamında araştırılmasıdır ve bir durum çerçevesinde genellikle "amaçlı örnekleme" yöntemi kullanılır. Böylece araştırmacılar analiz etmek istedikleri durumu en iyi şekilde temsil eden örneklemi elde etmeyi amaçlarlar. Durum çalışmalarında, araştırmacı belirli bir olayı incelemek istediğinde, ilgili durumları temsil eden bir örneklem seçmesi bu açıdan önem arz etmektedir (Özdemir, & Tuti, 2023).

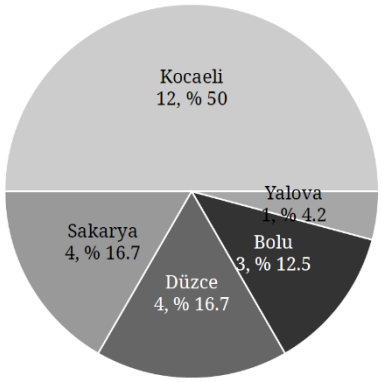
Araştırmada nitel yöntem ile veriler toplanmıştır. Nitel yöntemler, sosyal dünyayı, insanların gerçekliğe ilişkin algılarını, deneyimlerini ve bu gerçekliği inşa ediş biçimlerini anlamlandırmaya çalışan, gerçekçi ve bütüncül bir bakış açısı sunan araştırma yaklaşımlarıdır (Yeşil, 2013). Bu yöntemler, nicel araştırmaların aksine olayların "niçin"i üzerine odaklanır; sayısal verilerden ziyade kişilerin yargıları, sübjektif görüşleri ve deneyimlerini toplamayı hedefler. Sosyal bilimlerde nitel araştırma; insanların yaşam tarzlarını, hikâyelerini, davranışlarını ve toplumsal değişmeyi anlamaya dönük bilgi üretme süreci olarak tanımlanır.

Araştırmada veri toplama tekniği olarak Görüşme tekniği kullanılmıştır. Görüşmede, araştırmaya dahil edilen kişilerin araştırma konusu hakkında duygu ve düşüncelerini anlamak için sorular sorulur. Görüşme, kişilerin tutumları, tecrübeleri ve şikayetlerinin anlaşılabilmesi için de etkili bir tekniktir. Görüşme tekniği bazı kaynaklarda mülakat olarak da ifade edilmektedir (Akman Dömbekci, & Erişen, 2022).

Görüşme yapılırken 5 farklı yöntemden biri seçilir. Araştırmada, yarı yapılandırılmış, açık uçlu görüşme türü seçilmiştir. Bu türde görüşmenin gidişatına göre daha önceden hazırlanan soruların da dışına çıkılarak ilave sorular sorulur, görüşmeciden ses kaydı alınır ve ses kayıtları yazıya dökülür (Creswell, 2021).

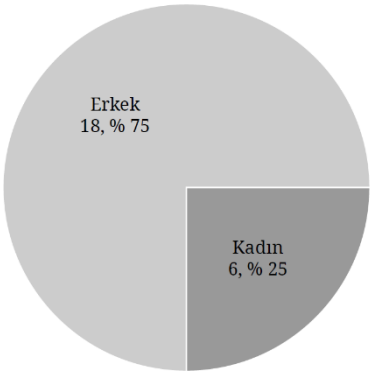
3.2. Araştırma Evreni ve Sınırlılıklar

Araştırma evreninde Sakarya, Kocaeli, Bolu, Düzce ve Yalova illerinde bulunan ve resmi ilan alma hakkı olan 31 yerel gazete yer almaktadır. 31 Yerel gazetenin sahip veya üst düzey yöneticilerinden 24'ü ile görüşülmüştür.



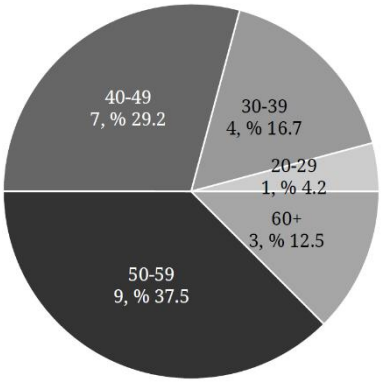
Görsel 1: Görüşme Yapılan Gazetelerin Faaliyette Bulunduğu İller

Görüşme yapılan 24 gazeteciden 12'si Kocaeli'de, 4'er tanesi Sakarya, Bolu ve Düzce'de, 1 tanesi ise Yalova'da bulunmaktadır.



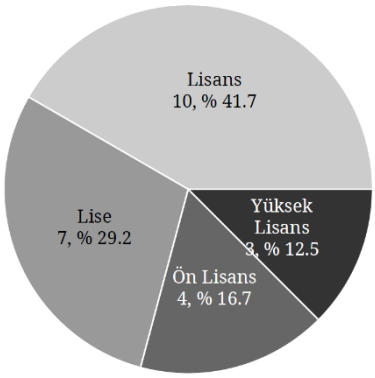
Görsel 2: Görüşmecilerin Cinsiyetleri

Görüşmecilerin 18'i (yüzde 75) erkek, 6'sı (yüzde 25) ise kadındır.



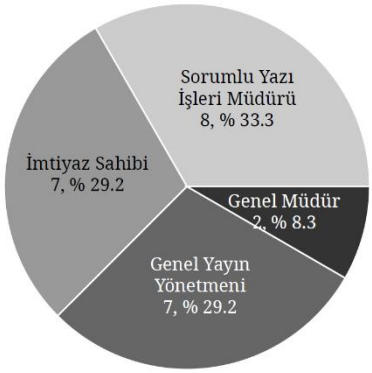
Görsel 3: Görüşmecilerin Yaş Aralıkları

Görüşmecilerin yaş aralıkları sınıflandırıldığında 50-59 yaş arasındakiler 9 kişi ile en kalabalık grubu oluşturmaktadır. 40-49 kişi arasında 7 kişi, 30-39 kişi arasında 4 kişi, 60 yaş üstünde 3 kişi, 20-29 kişi arasında ise 1 kişi bulunmaktadır.



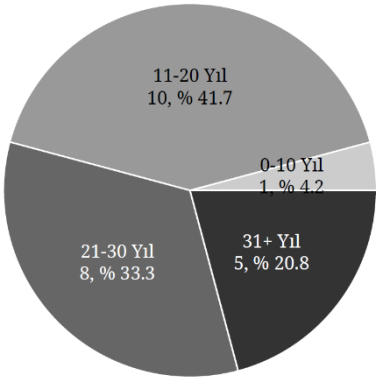
Görsel 4: Görüşmecilerin Eğitim Durumları

Görüşmecilerin 10'u lisans mezunu, 4'ü ön lisans, 3'ü yüksek lisans mezunudur. Görüşmecilerin 7'si ise lise mezunudur.



Görsel 5: Görüşmecilerin Gazetelerindeki Görevleri

Görüşmecilerin 8'i gazetede sorumlu yazı işleri müdürü, 7'si genel yayın yönetmeni, 2'si genel müdür olarak çalışmaktadır. Görüşmecilerin 7'si ise imtiyaz sahibidir.



Görsel 6: Görüşmecilerin Meslekteki Tecrübeleri

Görüşmecilerin sadece 1'i mesleklerinde 0-10 yıl arasında tecrübeye sahiptir. 11-20 yıl arasında tecrübeye sahip olanların sayısı 10 kişi, 21-30 yıl arasında tecrübeye sahip olanların sayısı 8'dir. 31 yıldan daha fazla mesleki tecrübeye sahip olanların sayısı ise 5'dir.

3.3. Bulgular

Geleneksel gazete haberciliği ve internet haberciliğinde güven ve teyit

Görüşme yapılan gazetecilere göre internet haberciliğinin en büyük sorunlarından biri yapılan haberlere olan güvenin az olması. Geleneksel gazeteler ile internet haberciliği arasındaki en büyük fark onlara göre haberin güvenirliği ve teyit ihtiyacının oluşması. Geleneksel gazetede bir haberi yaparken mutlaka teyit aldıklarını belirten bir görüşmeci;

“Gazetede haber yaparken teyidini almadığımız bir haberi yapmıyoruz.” derken bir diğeri, “biz yalan haber üretmiyoruz. Neden? Çünkü eleştirdiğim adamı öğle yemeğinde karşımda görürüm. Ama bu dijital mecrada otur klavyenin başına, online yaz kimseyi görme, kimseyle temas etme, kimseye dokunma.” diyerek, dijital ortamda haberciliğin manipülasyona açık olduğunu ifade etmektedir.

Bir diğer görüşmeci ise sosyal medyada herkesin gazetecilik faaliyeti yapabildiğine işaret ederek; “İnternette herkes gazetecilik yapabiliyor. Ama bir kesim insan, bu kişiler tarafından internette veya sosyal medyada paylaşılan haberlerin doğruluğunu bölgede yayın yapan gazetelerden teyit etmeye çalışıyor. Yani yine dönüp dolaşıp gelecekleri yer yine bizim kurumlarımız oluyor. Yerel gazeteler oluyor. Ulusalda da böyle. Bir gazetede yer alan haberlerin teyidi olmadan o gazete çok etkili olmuyor.” derken, insanların internet ortamındaki haberlere güvenmediklerini ve teyit için yine geleneksel gazeteleri kullandıklarını vurgulamıştır.

Benzer şekilde bazı görüşmeciler de

“Zaten insanlar gazetelerin internet sitelerindeki haberleri daha güvenilir buluyor”

“İşte sosyal medya çıktı işte herkes gazeteci oldu gibi şehir efsanesi var. Ona katılmıyorum ben. Sosyal medyadaki bilgilerin önemli bölümünün kirli ve eksik bilinçsizce dağılan yanlış bilgi olduğunu, dezenformasyona çok açık olduğunu düşünüyorum. Bu aksine güvenilir, sağlıklı ve hızlı haber veren kurumsal medya kuruluşlarına olan ihtiyaçları ve onların önemini artıracaktır diye düşünüyorum.”

İfadeleriyle kurumsal olarak gazetecilik faaliyetinde bulunmaya devam eden medya kuruluşlarının güvenilir haber üretme konusunda önemine işaret etmektedir.

Yalan haber ve dezenformasyon

Görüşmeciler ağırlıklı olarak başta sosyal medya olmak üzere internet ortamında üretilen haberlerin genellikle asılsız ve yalan olduğunu ifade etmektedirler.

Görüşmeciler;

“İnternet haberciliği veya özellikle sosyal medyadaki haberlerin çoğu asılsız ve yalan haber olabiliyor.”

“Gazetede daha fazla ayrıntı var. Daha fazla emek görüyorum. Daha güvenilir buluyorum. İnternette doğru bilgiye her zaman ulaşmak mümkün olamayabiliyor.”

“Şimdi günümüzü gerçek anlamda değerlendirirsek, insanların çok aktif olduğu ve haberlere ulaştığı yerler haber siteleri değil. Sosyal Medya. İnsanların İnstagram’da, Twitter’da, Facebook’ta neredeyse bizim yerimize habercilik yaptığı bir dönemi yaşıyoruz. Haberi internet haber sitelerinden önce alan bir halk topluluğu var. Hatta haber yaratan, dezenformasyona da uğrayan bir sirkülasyon var.”

Sözleriyle özellikle sosyal medyada dolaşıma sokulan haberlere olan güvenin az olduğuna vurgu yapmaktadırlar.

Yayından Kaldırılan Haberler

Görüşmecilere göre internet ortamındaki haberlere olan güvensizliğin nedenlerinden biri de bazı haberlerin yayına sokulduktan sonra kaldırılma uygulamasıdır. Bu esneklik manipülasyona uğratılmış haberin okura ulaşarak amacına ulaşmasının ardından yayından kaldırılmasına olanak vermekte ve güvensizlik oluşturmaktadır.

Görüşmecilerden bazıları söz konusu uygulamayı şöyle değerlendirmiştir:

“Internet sitelerindeki haberlere biraz daha az güven oluyor bence. Yani gazete daha böyle bir kere bastıktan sonra orada kalıyor bir daha geri almak mümkün değil ama internet sitesinde durum farklı orada bir haberi hemen 5 10 dakika içinde tekrar bir yayından kaldırabiliyorsunuz.”

“(Geleneksel gazeteler) Sen yazıyorsun ve yazıyı önüne koyuyorsun. Öbür tarafta (İnternet gazeteleri) yazdı ve sildi. Ya ben orada işte haberi yanlış girmişim. Sildi ve haber gitti. Yazılı basında ise haber önünde duruyor. Bak kardeşim sen bunu yazmışsın. Bu yazarken yanlış olabileceğini düşünmedin mi derler ve seni dava ederler.”

“Basılı gazetede kalıcı olan haber dijital gazetede kaldırılabiliyor. Dijital, daha esnek ve daha oynak bir yapı. Ama diğeri basılı olduğu için daha asil, daha güvenilir bence.”

Denetim Sorunu

Geleneksel yayıncılık yapan gazetecilerin, internet ortamında yapılan haberlerin, yalan, manipülatif ve güvensiz olarak görmesinin nedenlerinin başında, bu ortamların yeterince denetlenememesi gelmektedir. Onlara göre bu konuda yasal düzenlemeler kadar bu düzenlemeleri uygulayacak kurumların yetkinliği ile ilgili eksiklikler bulunmaktadır.

Bir görüşmeci bu eksikliğin toplumsal olarak risk teşkil ettiğini savunurken,

“Bir kere siz dijital mecraları kontrol altına alamamışsınız. Salladıkça sallıyorlar. İşte depremde gördük. Ne kadar provokatif eylemler. Yani memlekette bazı şeylerin aksi yönde seyretmesini sağlamak için bin türlü mecralar var. Bunlar harekete geçiyor.” ifadelerini kullanmıştır.

Bir başka görüşmeci ise geleneksel gazetelerin Basın İlan Kurumu ve Basın Savcılığı tarafından sürekli denetlendiğini ifade ederken, aynı denetimin internet ortamındaki habercilik için yapılamadığını kaydederken,

“Bir yazılı gazete ertesi gün çıktığında görseli ve içeriği ile tak diye denetlenebilir bir durumda oluyor. Ama gün içinde 500 tane haberin hızlı bir şekilde aktığı ve insan denetimine açık olmayan bir pozisyon içerisinde denetlenmesi çok zor. Türkiye’de diyelim 50 tane büyük haber sitesi var. Binlerce haber oluyor. Bu haberleri hangi mekanizma, ne şekilde ve nasıl denetleyecek? Denetlenip de onun suç unsuru oluşturup oluşturmadığına nasıl karar vereceksiniz.” görüşünde bulunmuştur.

Bir başka görüşmeci ise geleneksel gazeteciliğin denetlenmesine rağmen dijital ortamlardaki habercilik ile ilgili denetim mekanizmalarının yetersizliğine işaret ederek,

“Dijital öyle değil. Ne kadarını kontrol edeceksin dijitalin. Eline bilgisayar alan sallayıp duruyor. 50 milyon internet sitesi kurulmuş. Herkesin internet sitesi var. Önce denetim mekanizmaları tamamlanır. Tam kontrol altına alınır. Ondan sonra gazetelerin de internet ortamına geçmeleri başlar ve denir ki artık bundan sonra şu şartların dışına çıkılmayacak. Bugün A dediğin yere internette yukarı mahalle için B diyor. Ama gazete tek. Aynı haberi farklı şekilde sayfalarda yayınlayamazsın.” yorumunda bulunmuştur.

Bir başka görüşmeci ise geleneksel gazeteler üzerindeki bu denetimin doğru haber yapma noktasında bir yönlendirme oluşturduğunu kaydederken,

“Türkiye’de ve dünyada kamusal açıdan baktığımız zaman, dezenformasyona en kapalı, denetime en açık olan halkı gerçek bilgilendirmeye ya da güvenli haberlere sevk edecek nokta Radyo Televizyon ve yazılı basındır. İnsanlar internet alemindeki dezenformasyondan sonra, çıkan haberleri ya yazılı basından ya da Radyo ve Televizyondaki haberle karşılaştırarak doğru mu değil mi diye teyit ediyor. O yüzden bir ülkede yazılı basın olmazsa olmazdır. Onun açılan penceresidir. Kamunun açılan penceresi radyo televizyon ve gazetedir. Çünkü denetimi olmayan bir şey haberin kontrolünü ama sansür anlamında demiyorum kontrolsüz hale getiriyor.” sözlerini kullanmıştır.

Geleneksel yayın yapan gazeteciler, internet haberlerindeki teyit ihtiyacının ve güven sorununun, kendileri için bir fırsat oluşturacağı görüşünü savunurken, geleneksel gazetelerin bu açıdan kamusal anlamda ürettiği hizmetlerin önemine de vurgu yapmaktadırlar.

4. SONUÇ

Gazetecilik, matbaanın icadından dijital devrime kadar uzanan süreçte köklü bir değişim geçirmiş; günümüzde internet ve sosyal medyanın etkisiyle 7/24 kesintisiz, ancak denetimi güç bir yapıya bürünmüştür. Çalışma kapsamında elde edilen bulgular, dijitalleşmenin haber üretimini hızlandırırken habere olan güveni ciddi şekilde zedelediğini ortaya koymaktadır.

• Güven Limanı Olarak Geleneksel Medya: Araştırma verilerine göre, internette yayılan dezenformasyon ve kirli bilgi, kurumsal medya kuruluşlarına olan ihtiyacı artırmıştır. Okuyucular, sosyal medyada gördükleri haberlerin doğruluğunu teyit etmek için hala geleneksel yerel ve ulusal gazetelere başvurmaktadır.

• Hız Tuzağı ve Doğrulama Sorunu: Yeni medya düzeninde hakim olan "önce yayınla, sonra doğrula" anlayışı, editoryal denetimi zayıflatmış ve dezenformasyonu tetiklemiştir. İnternet haberciliğinde hızın doğruluğun önüne geçmesi, gazetecilik etiğini sarsan temel unsurdur.

• Denetim Boşluğu: Geleneksel yazılı basın; Basın İlan Kurumu ve yargı organları tarafından sıkı bir denetime tabi tutulurken, dijital mecraların yeterince denetlenememesi manipülatif içeriklerin yayılmasına zemin hazırlamaktadır.

• Esneklik ve Güvensizlik: Dijital haberlerin yayımlandıktan sonra kolayca silinebilmesi veya değiştirilebilmesi, basılı gazetenin "kalıcı ve asil" duruşuyla zıtlık oluşturmakta ve dijital haberciliğe olan güveni azaltmaktadır.

• Etik İhlaller: Tık odaklı habercilik (clickbait), haber-reklam ayrımının belirsizleşmesi ve "kopyala-yapıştır" gazeteciliği (intihal), dijital ortamdaki nitelik kaybının ve güven bunalımının başlıca nedenleridir.

ÖNERİLER

Çalışmada tespit edilen etik ve güven sorunlarının aşılması için şu adımların atılması önerilmektedir:

1. Denetim Mekanizmalarının Güçlendirilmesi: İnternet haber siteleri ve sosyal medya platformları için geleneksel medyadaki gibi işlevsel ve caydırıcı yasal düzenlemeler hayata geçirilmelidir. Dijital mecraların denetimi, sansürden uzak ancak dezenformasyonu engelleyecek şekilde yapılandırılmalıdır.

2. Hız Yerine Doğruluğun Öncelenmesi: Gazeteciler, "hız tuzağına" düşmemek adına haberlerini yayımlamadan önce mutlaka teyit etmeli, editoryal süzgeçlerden geçirmelidir. Bu noktada, teyit.org gibi doğrulama platformlarıyla iş birliği artırılmalıdır.

3. Nitelikli ve "Yavaş Gazetecilik" Anlayışının Benimsenmesi: Nitelik kaybına tepki olarak doğan "yavaş gazetecilik" (slow journalism) ilkeleri çerçevesinde, derinlemesine araştırma ve teyit odaklı içerik üretimine yatırım yapılmalıdır.

4. Etik İlkelerin Dijital Dönüşümü: Tık odaklı (clickbait) yanıltıcı başlıklardan ve gizli reklam (advertorial) uygulamalarından kaçınılmalıdır. Dijital alanda çalışan gazetecilere yönelik güncel etik eğitimleri verilmelidir.

5. Fikri Mülkiyetin Korunması: "Kopyala-yapıştır" gazeteciliğinin önüne geçilmesi için telif hakları yasaları dijital çağa uygun şekilde güncellenmeli, özgün içerik üretimi teşvik edilmelidir.

6. Medya Okuryazarlığının Artırılması: Toplumun dijital içerikleri eleştirel bir süzgeçten geçirebilmesi için medya okuryazarlığı eğitimleri yaygınlaştırılmalı; okuyucunun haber kaynağını sorgulama bilinci geliştirilmelidir.

Gazetecilikte güveni yeniden inşa etmek, geleneksel medyanın titizliğini dijitalin sunduğu olanaklarla birleştirmekten geçmektedir.

GELENEKSEL GAZETELERİN GELECEĞİ

Dr. Gürkan KILIÇ
Sakarya Üniversitesi, Öğretim Görevlisi
gkilic@sakarya.edu.tr - ORCID ID: 0000-0002-9929-0639

ÖZET

İnternete erişim imkanının her geçen sene daha fazla geliştiği Türkiye'de nüfusun yaklaşık yüzde 91'i internet kullanır duruma gelmiştir. Alışverişten, vergi ve bankacılık faaliyetlerine de çok geniş alanda dijital sistemler kullanılırken, medya tüketim alışkanlığı da değişmeye devam etmiş ve daha fazla dijital ortamlara yönelmiştir. 2025 verilerine göre Türkiye'de nüfusun yüzde 88,6'sı WhatsApp, yüzde 72,9 ile YouTube ve yüzde 68,1'i Instagram uygulamasını kullanmaktadır.

İnternet haber sitelerinin ziyaret oranları toplam gazete tirajlarının kat kat üstündedir. Gazeteler her geçen gün daha fazla tiraj kaybı yaşamaktadır. Bunun sonucu olarak birçok gazete kapanmıştır. 2010 yılında 2 bin 780 olan, ulusal, bölgesel ve yerel gazete sayısı, 2024 yılında 753'e düşmüştür. 15 yıldaki kayıp yüzde 73'tür. Yine aynı dönemde toplam gazete tirajları da 2 milyar 432 milyondan, yüzde 81 azalışla, 462,7 milyona gerilemiştir. Araştırma kapsamında gazetecilerle nitel araştırma yöntemlerinden mülakat tekniğiyle yapılan görüşmelerde, gazetecilerin gelecekten beklentilerinin oldukça kötümser oldukları görülmüştür.

Anahtar Kelimeler: Geleneksel Gazetecilik, Dijital Gazetecilik, Gazeteciliğin Dönüşümü, Gazetelerin Geleceği.

THE FUTURE OF TRADITIONAL NEWSPAPERS

ABSTRACT

In Turkey, where internet access has improved every year, approximately 91% of the population uses the internet. Digital systems are used in a wide range of areas, from shopping to taxation and banking, while media consumption habits continue to change, increasingly shifting towards digital platforms. According to 2025 data, 88.6% of the Turkish population uses WhatsApp, 72.9% uses YouTube, and 68.1% uses Instagram.

Internet news sites receive far more visitors than total newspaper circulation. Newspapers are experiencing increasing circulation losses, resulting in the closure of many. The number of national, regional, and local newspapers, which was 2,780 in 2010, fell to 753 in 2024. The loss over 15 years is 73%. Similarly, during the same period, total newspaper circulation decreased from 2.432 billion to 462.7 million, a decrease of 81%. In the research conducted using qualitative research methods, specifically interview techniques with journalists, it was observed that journalists' expectations for the future are quite pessimistic.

Keywords: Traditional Journalism, Digital Journalism, Transformation of Journalism, Future of Newspapers

1. GİRİŞ

Türkiye'de gazetecilik serüveni, 18. yüzyılın sonlarında yabancı elçiliklerin faaliyetleriyle başlamış; 1831'de yayımlanan ilk Türkçe gazete Takvim-i Vekayi ve 1860'ta Şinasi ile Agah Efendi tarafından çıkarılan ilk özel gazete Tercüman-ı Ahval ile kurumsal bir kimlik kazanmıştır. Zaman içerisinde siyasal baskılar, sansür dönemleri ve teknolojik gelişmelerle şekillenen bu köklü gelenek, özellikle 1980 sonrasında medyanın büyük holdinglerin kontrolüne geçmesiyle tekelleşme ve ticarileşme kıskacına girmiştir. Bu dönemde gazete sahipliğinin "gazeteci ailelerden" "iş adamlarına" geçmesi, habercilik anlayışında magazinleşmeyi ve ciddi içerik kaybını beraberinde getirmiştir.

Geleneksel basın; 1970'lerde ofset baskıya, 1980'lerde bilgisayarlı sistemlere geçerek yaşadığı teknolojik ivmeyi, 1995 yılından itibaren internet mecrasına taşımıştır. İnternetin yaygınlaşması, sadece haberin dağıtım kanalını değiştirmemiş; veri haberciliği, robot haberciliği ve yurttaş gazeteciliği gibi yeni uzmanlık alanlarını doğurarak haberin üretim ve tüketim biçimlerini kökten dönüştürmüştür. Günümüzde internet, televizyondan sonra en önemli ikinci haber kaynağı haline gelmiş; akıllı telefonlar ve sosyal medya platformları haber akışının ana mecrası konumuna yükselmiştir.

Ancak bu dijital dönüşüm, geleneksel basılı gazetecilik üzerinde "yıkıcı" bir etki yaratmıştır. 2010-2024 yılları arasındaki veriler incelendiğinde, Türkiye'deki toplam gazete sayısının yüzde 73, toplam tirajların ise yüzde 81 oranında dramatik bir düşüş yaşadığı görülmektedir. Artan kağıt ve baskı maliyetleri, reklam gelirlerinin dev dijital platformlara kayması ve okur alışkanlıklarının kağıttan ekranlara evrilmesi, birçok köklü gazetenin basılı yayın hayatına son vererek tamamen dijitale geçmesine neden olmuştur.

Bugün geleneksel medya, bir yandan kağıda dokunarak okuma kültürünü savunan nostaljik bir kitlenin sadakatiyle ayakta kalmaya çalışırken, diğer yandan hayatta kalabilmek için dijital dönüşümünü tamamlamak zorundadır. Bu çalışma, geleneksel gazetelerin yaşadığı bu varoluşsal krizi veriler ışığında analiz etmekte ve sektör profesyonellerinin görüşleri doğrultusunda basılı basının gelecekte bir "lüks tüketim ürününe" mi dönüşeceği yoksa tamamen mi yok olacağı sorusuna yanıt aramaktadır.

2. GELENEKSEL GAZETELERİN DÖNÜŞÜMÜ

2.1. Türkiye'de Gazetecilik ve Dijital Dönüşümü

Türkiye'de gazetecilik faaliyeti, 18. yüzyılın sonlarında yabancı elçilikler ve azınlıkların girişimleriyle başlamış, zamanla devletin ve ardından Türk müteşebbislerin katılımıyla

gelişmiştir. Osmanlı topraklarındaki ilk gazete, 1795 yılında Fransız Elçiliği tarafından yayımlanan Fransızca *Bulletin de Nouvelles* (Haber Bülteni) olmuştur (Erdoğan, 2007). Türk basın tarihinin başlangıcı olarak ise genellikle Kavalalı Mehmet Ali Paşa'nın 1828'de Mısır'da yayımlattığı Arapça-Türkçe *Vekayi-i Mısriyye* kabul edilir (Çakır, 2007).

1831 yılında çıkarılmaya başlanan Takvim-i Vekayi, Türkiye sınırları içindeki ilk Türkçe gazete ve devletin resmi yayın organıdır. II. Mahmud döneminde yayımlanan bu gazetenin amacı, halkı devlet icraatları hakkında doğru bilgilendirmek ve söylentilerin önüne geçmektir. 1840 yılında çıkarılan Ceride-i Havadis ise William Churchill adındaki bir İngiliz tarafından çıkarılmıştır ve devlet desteği alan ilk yarı özel gazetedir. Özel mülkiyet tarafından çıkarılan ilk Türk gazetesi Agah Efendi ve Şinasi'nin 1860 yılında yayına başlayan gazeteleri Tercüman-ı Ahval'dir. Halka kendi sorunları üzerinde düşünmeyi öğretmeyi amaçlayan ilk fikir gazetesi örneği ise 1862 yılında yine Şinasi tarafından çıkarılan Tasvir-i Efkar isimli gazetedir.

Siyasal Baskılar ve Gelişim Süreci Osmanlı'da gazetecilik, 1864 tarihli Matbuat Nizamnamesi ile yasal bir çerçeveye oturtulmuş ancak bu aynı zamanda sansür ve denetimlerin de başlangıcı olmuştur. 1867'deki Âli Kararname ile artan baskılar sonucu Namık Kemal ve Ziya Paşa gibi aydınlar yurt dışına kaçarak muhalif gazeteler çıkarmışlardır. II. Abdülhamid döneminde (1878-1908) Türk basını ağır bir istibdat ve sansür süreci yaşamış, birçok kelimenin kullanılması dahi yasaklanmıştır. 24 Temmuz 1908'de II. Meşrutiyet'in ilanıyla gazeteler sansürsüz yayımlanmaya başlamış ve bu tarih Türk basınında bir "devrim" olarak nitelendirilmiştir (Çakır, 2007).

Milli mücadele döneminde, *İrade-i Milliye* ve *Hakimiyet-i Milliye* gibi gazeteler ile Anadolu Ajansı (1920), bağımsızlık savaşının dünya kamuoyuna duyurulmasında hayati rol oynamıştır. 1961 yılında ise özgürlükler konusunda yapılan reformlardan basın da etkilenmiş, 212 sayılı yasa ile gazetecilere önemli sosyal haklar tanınmış ve Basın İlan Kurumu kurularak resmi ilanların adaletsiz dağıtımı engellenmeye çalışılmıştır (Erdoğan, 2007).

1980 sonrasında ise Türkiye'de yaşanan ekonomik ve sosyal dönüşümle birlikte medya sektörü büyük holdinglerin eline geçmiş, tekelleşme ve ticarileşme hız kazanmıştır (Atar, 2021). Gazete sahipliği "gazeteci ailelerden" "iş adamlarına" geçmiştir. Bu durum, ciddi haberciliğin yerini magazin ve sansasyonun aldığı bir magazinleşme sürecini tetiklemiştir (Akdoğan, 1995).

Basın teknolojisi, kurşun dizgi (tipo) sisteminden 1970'lerde ofset baskıya, 1980'lerde ise bilgisayar destekli sistemlere geçerek büyük bir hız kazanmıştır. İnternetin yaygınlaşmasıyla birlikte 1995 yılından itibaren Türk gazeteleri web ortamına taşınmış (ilk olarak Aktüel dergisi

ve Zaman gazetesi), ardından sadece dijital ortamda yayın yapan bağımsız haber siteleri ortaya çıkmıştır (Kalsın, 2016).

2000'li yılların başındaki ekonomik kriz, birçok deneyimli gazetecinin işsiz kalarak bağımsız haber siteleri kurmasına yol açmış, bu durum Türkiye'de internet gazeteciliğinin gelişmesine paradoksal bir katkı sağlamıştır. Günümüzde Türkiye'de internet, TV'den sonra en önemli ikinci haber kaynağı haline gelmiş durumdadır.

Dijital dönüşüm, sadece mecrayı değil, haberin üretim ve tüketim biçimini de değiştirerek yeni uzmanlık alanları yaratmıştır. Bunlar arasında, kelime odaklı habercilikten, sıfırlar ve birlerden oluşan veri setlerinin analizine, görselleştirilmesine ve hikayeleştirilmesine dayalı bir disipline üretilen haberler olan ‘veri haberciliği’; algoritmalar kullanılarak, insan müdahalesi olmadan özellikle son dakika ve spor haberlerinin otomatik olarak yazıldığı ‘robot haberciliği’; haberlerde kuş bakışı görüntülerin (dron) ve izleyicinin haberin içine girmesini sağlayan 360 derece videoların (VR) kullanıldığı ‘dron ve sanal gerçeklik haberciliği ve akıllı telefon sahibi her bireyin sosyal medya aracılığıyla haber üreticisi ve dağıtıcısı konumuna yükselebildiği ‘yurttaş gazeteciliği’ni sayabiliriz. Öte yandan dijitalleşmenin en önemli sonuçlarından biri ‘medya yakınsaması’dır ki bu özellik sayesinde kitap okumak, film izlemek ve haber takip etmek tek bir mobil cihaz üzerinden mümkün hale gelmiştir (Yaşar, 2020).

Sosyal medya platformları (Facebook, Twitter vb.) günümüzde haber dağıtımında baskın oyuncular haline gelmiştir ve haber kuruluşları içeriklerini bu platformların algoritmalarına göre şekillendirmeye başlamıştır. Bu durum, haber akışının kontrolünün gazetecilerden ziyade teknoloji şirketlerinin eline geçmesi gibi yeni tartışmaları da beraberinde getirmiştir (Kalsın, 2016).

2.2. Dönüşümün Gazetelere Etkileri

Dijitalleşme ve diğer etkenlerin ardından Türkiye’de gazete sayılarında ve tirajlarında son 15 yılda çok ciddi düşüşlerin yaşandığı görülmektedir. Çizelge 1 incelendiğinde, Türkiye İstatistik Kurumu (TÜİK) tarafından her yıl açıklanan yazılı basın istatistiklerine göre gazete sayısındaki azalış yüzde 73, tirajlarındaki azalış ise yüzde 81’i bulmuştur.

Çizelge 1. Türkiye'deki Gazetelerin (Ulusal, Bölgesel, Yerel) 2010-2024 Yılları Arasında Sayılarında ve Tirajlarında Meydana Gelen Değişim

TOPLAM				YEREL			BÖLGESEL			YAYGIN (ULUSAL)

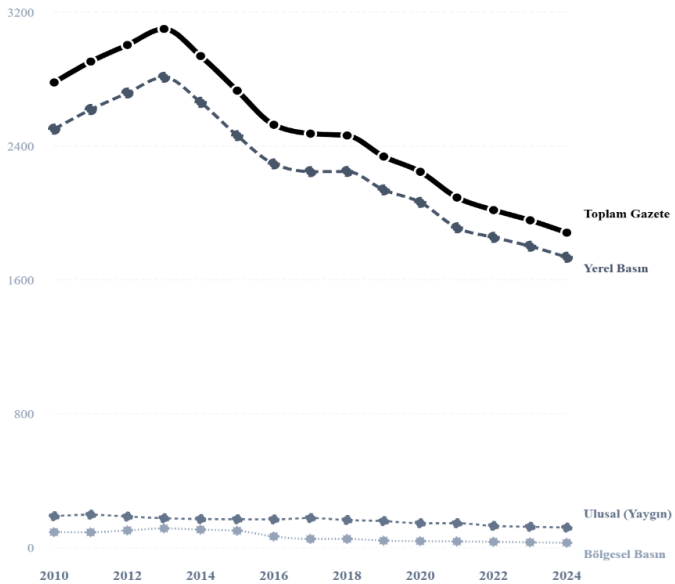
Kaynak: TÜİK verilerinden yazar tarafından oluşturulmuştur.

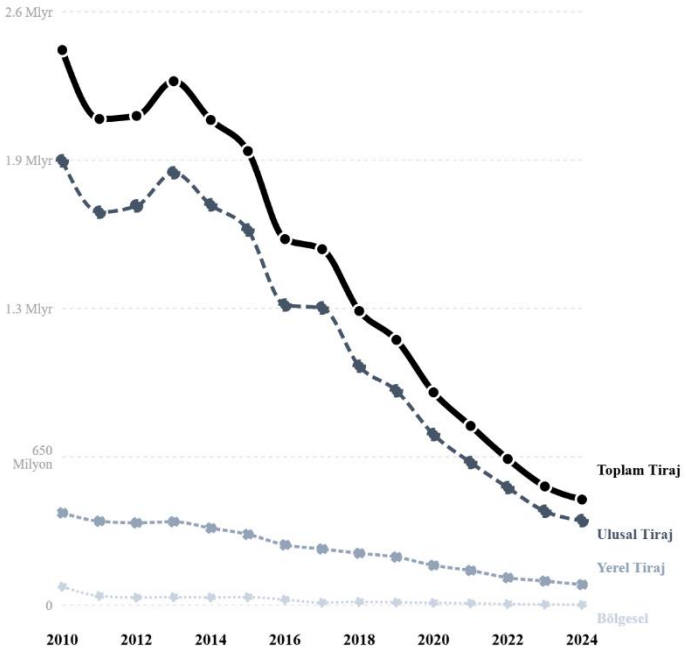
2010 yılında 2 bin 780 olan gazete sayısı 2024 yılına gelindiğinde 753'e gerilemiştir. Bu azalış, Görsel 1'de daha net şekilde görülmektedir.



Görsel 1: Türkiye'deki Ulusal, Bölgesel ve Yerel Gazetelerin, 2010-2024 Yılları Arasında Sayılarında Meydana Gelen Değişim

Gazetelerin söz konusu tarihler arasında sayılarındaki değişimler incelendiğinde azalış, ulusal gazetelerde yüzde 88, bölgesel gazetelerde yüzde 91, yerel gazetelerde ise yüzde 71 oranında gerçekleşmiştir. Özellikle 2014 yılında 143 adetle en fazla sayıya ulaşan bölgesel gazetelerin sayısının 2024 yılına gelindiğinde 8'e düşmesi dikkat çekicidir.

Gazetelerin 2010-2024 yılları arasındaki tirajlarının toplam değişim oranı ise azalış yönünde yüzde 81 olarak gerçekleşmiştir. Görsel 2'de azalış daha net şekilde görülmektedir.



Görsel 2: Türkiye'deki Ulusal, Bölgesel ve Yerel Gazetelerin, 2010-2024 Yılları Arasında Tirajlarında Meydana Gelen Değişim

Buna göre oransal olarak en fazla tiraj kaybına bölgesel gazeteler uğramıştır. Bölgesel gazetelerin tiraj kaybı yüzde 98'dir. Ulusal gazetelerdeki tiraj kaybı yüzde 81, yerel gazetelerin tiraj kayıpları ise yüzde 78'dir. Gazetelerin satış rakamları üzerinden değerlendirme yapmak gerekirse, ulusal gazetelerin 2010 yılında 1 milyar, 946 milyon, 612 bin 851 olan tirajları, 2024 yılına gelindiğinde 370 milyon, 522 bin 910'a gerilemiş; yerel gazetelerin 2010 yılında 404 milyon 376 bin 944 adet olan tirajları 2024 yılında 90 milyon, 178 bin 456'ya düşmüş, bölgesel gazetelerin 2010 yılında 81 milyon 191 bin 505 olan tirajları 2024 yılına gelindiğinde 2 milyon 6 bin 17'ye kadar azalmıştır. Toplamda bakıldığında ise 2010 yılında 2 milyar 432 milyon 181 bin 300 olan Türkiye'deki gazete satış rakamları, 2024 yılında yıllık 462 milyon 707 bin 383'e kadar gerilemiştir.

Gazetelerin kapanması ve tirajlarının çok büyük oranlarda azalması ile Türkiye'deki dijital altyapının ve dijital medya platformlarının kullanım oranları arasında ters orantı olduğu görülmektedir. TÜİK tarafından açıklanan 'Hanehalkı bilişim teknolojileri (BT) kullanım araştırması, 2025' verilerine göre Türkiye'de internet kullanan bireylerin oranı 2024 yılında yüzde 88,8 iken 2025 yılında bu oran yüzde 90,9'a yükselmiştir.

Çizelge 2'de ise Türkiye'de sosyal medya ve mesajlaşma uygulamaları ile ilgili kullanım yüzdeleri sıralanmıştır.

Çizelge 2. Türkiye'de Sosyal Medya ve Mesajlaşma Uygulamaları Kullanım Yüzdeleri

Sosyal Medya ve Mesajlaşma Uygulamaları	TOPLAM		Erkek		Kadın	
	2024	2025	2024	2025	2024	2025
WhatsApp	86,2	88,6	89,5	91,3	82,9	85,9
Instagram	65,4	68,1	67,0	68,7	63,9	67,4
Youtube	71,3	72,9	74,7	75,7	68,0	70,1
Facebook	49,4	49,6	60,5	60,8	38,4	38,4
X	22,7	21,7	27,6	26,7	17,8	16,7
Telegram	14,8	14,8	18,9	18,7	10,8	10,9
Tik Tok	19,1	24,3	23,5	29,1	14,7	19,5
Snapchat	9,8	10,7	8,3	8,5	11,3	12,9
BİP	3,1	2,5	3,6	3,0	2,6	2,0
Diğer	0,8	0,6	0,8	0,6	0,7	0,6

Kaynak: TÜİK, **Hanehalkı Bilişim Teknolojileri (BT) Kullanım Araştırması, 2025 (**https://data.tuik.gov.tr/Bulten/Index?p=Hanehalki-Bilisim-Teknolojileri-(BT)-Kullanim-Arastirmasi-2025-53925)

Çizelge 2'ye göre Türkiye'de 2025 yılında en fazla kullanılan mesajlaşma uygulaması yüzde 86,6 ile WhatsApp'tır. Video paylaşım sitesi Youtube'u kullananların oranı ise yüzde 72,9'dur. En fazla kullanılan sosyal paylaşım ağı yüzde 68,1 ile Instagram olurken, ikinci sırada yüzde 49,6 ile Facebook, üçüncü sırada ise yüzde 21,7 ile X platformu yer almaktadır. Cinsiyet dağılımına göre incelendiğinde ise Snapchat uygulaması dışındaki tüm uygulamalarda erkek kullanıcıların oranı, kadınlardan fazladır. Genellikle haber, gündem ve siyasi konuların çok daha fazla paylaşıldığı ağlar olan X ve Facebook gibi platformlarda erkek kullanıcı oranlarının kadınlara göre çok daha fazla olduğu görülmektedir.

Dijitalleşmenin gazetelerin tirajlarını hem Türkiye'de hem de dünya genelinde ciddi oranda düşürdüğünü söylemek mümkündür (Delibaş, 2023; Karaduman, 2011; Kösedağ, 2019). Bilgi ve iletişim teknolojilerindeki hızlı değişim, okuyucu alışkanlıklarını kağıttan dijital ekranlara kaydırarak geleneksel basılı gazetecilik üzerinde "yıkıcı" bir etki yaratmıştır (Çelik, 2024).

Okur Alışkanlıklarında Değişim

Yıkıcı etki ile sonuçlanan değişimlerin temel nedenlerinden biri olarak okur alışkanlıklarında değişim gösterilmektedir. Konda tarafından yapılan araştırmaya göre 2010 yılında %61 olan gazete okuma oranı, 2018 yılında %26'ya kadar düşmüştür (Çelik, 2024). Reuters Enstitüsü'nün 2018 raporu ise Türkiye'de halkın sadece %6'sının ana haber kaynağı olarak basılı medyayı kullandığını ortaya koymaktadır (Kösedağ, 2019). Öte yandan özellikle genç nesil (Z kuşağı), habere akıllı telefonlar ve sosyal medya üzerinden ücretsiz ve hızlı erişimi tercih etmektedir (Değirmencioğlu, 2016). Okuyucular artık habere mekân ve zaman sınırı olmaksızın ulaşmak istemektedir (Parlak, 2018).

Baskı Maliyetlerinde Artış

Kağıt, mürekkep ve dağıtım gibi fiziksel üretim maliyetlerinin sürekli artması, gazetelerin fiyatlarını yükseltirken basılı nüshaya erişimi zorlaştırmaktadır. Tiraj kayıpları ve artan maliyetler nedeniyle Türkiye'de *Radikal, Vatan* ve *Habertürk* gibi köklü gazeteler basılı yayın hayatlarına son vererek tamamen dijitale geçmek zorunda kalmışlardır (Kılıç & Övür, 2019). Gazetelerin tiraj düşüşleri ve sonucunda kapanmalarına sadece Türkiye'de değil, dünyanın farklı bölgelerinde rastlamak da mümkündür. Dünyadaki en büyük 25 gazetenin 24'ünün dağıtım rakamlarında ciddi düşüşler kaydedilmiştir (Karaduman, 2011). Örneğin, ABD'de 2005-2021 yılları arasında yaklaşık 2.200 yerel gazete kapanmıştır (Budak, 2023).

Reklam Gelirlerinin Azalması

Reklam verenlerin bütçelerini daha ölçülebilir ve hedef odaklı olan dijital mecralara (Google, Facebook vb.) kaydırması, basılı gazetelerin ekonomik sürdürülebilirliğini ve dolayısıyla tiraj artırma kapasitesini zayıflatmıştır (Kanaat, Ilgaz Büyükbakkal & Büyükbakkal, 2019).

Haberde Hız ve Güncellik

Geleneksel gazeteler haberleri en erken bir gün sonra sunabilirken, internet gazeteciliği haberleri "anlık" ve eş zamanlı olarak sunma avantajına sahiptir (Yurdigül & Yüksel, 2012; Öztermiyeci, 2017).

Özetle; dijitalleşme, haberin tüketim biçimini kökten değiştirerek basılı gazeteyi bir "lüks tüketim ürününe" dönüştürme eğilimine girmiş ve geleneksel tiraj modellerini çökertmiştir (Pakkan, 2022). Bazı yerel gazeteler resmi ilan gelirleri sayesinde varlığını sürdürse de, genel tablo basılı nüshaların her geçen gün önem kaybettiğini göstermektedir (Bölükbaşı, 2024).

3. ARAŞTIRMA BULGULARI

3.1. Araştırma Deseni ve Yöntemi

Araştırmanın deseni Durum Çalışmasıdır. Durum çalışmasında güncel bir olayın detaylı bir şekilde incelenmesi ve analizi yapılmaktadır. Durum çalışmalarında genellikle amaçlı örneklem seçilir. Böylece araştırmacılar analiz etmek istedikleri durumu en iyi şekilde temsil eden örneklemi elde etmeyi amaçlarlar (Özdemir, & Tuti, 2023).

Araştırmada veri toplama tekniği olarak, nitel araştırma veri toplama tekniklerinden olan görüşme tekniği kullanılmıştır. Görüşmede, araştırmaya katılan görüşmecilerden, araştırma konusu ile ilgili tecrübe ve bilgileri ışığında görüşleri alınır (Akman Dömbekci, & Erişen, 2022). Örnekleme dahil edilen gazetecilerle yapılan görüşme tekniğinde, yarı yapılandırılmış açık uçlu görüşme tekniği benimsenmiştir. Bu teknikte önceden belirlenmiş soruların dışına, görüşmenin gidişatına göre çıkılarak ilave sorular da sorulabilmektedir. Görüşmeciden ses kaydı alınır ve daha sonra ses kayıtları yazıya dökülerek analize tabi tutulur (Creswell, 2021).

3.2. Araştırma Evreni ve Sınırlılıklar

Araştırma evreninde Sakarya, Kocaeli, Bolu, Düzce ve Yalova illerinde bulunan ve resmi ilan alma hakkı olan 31 yerel gazete yer almaktadır. 31 Yerel gazetenin sahip veya üst düzey yöneticilerinden 24’ü ile görüşülmüştür.

3.3. Bulgular

Görüşmeci gazeteler ağırlıklı olarak dijital dönüşümden gazetelerinin çok fazla etkilendiğinden bahsederken, gazetelerin geleceklerinden çok fazla iyimser olmadıklarını ifade etmişlerdir.

Dijitalleşme Karşısında Gazeteler

Görüşmecilerden biri dijitalleşme karşısında gazetelerin işini zor gördüğünü ifade ederken;

“Yani basılı gazetelerin de geleceğini çok zor görüyorum. Bu dijitalleşme eninde sonunda tamamını kapsayıp, eninde sonunda hepsini dijitale dönüştürecek diye düşünüyorum.” sözlerini kullanmıştır.

Bir başka gazeteci ise dijitalleşme karşısında gazetecilerin geleceği ile ilgili düşüncesini paylaşırken,

“Pek hayırlı görmüyorum. Bitiyor. Bitiyor. Basılı yayın organları bitiyor. Fakat yerel gazetelerin basılı olmasında çok büyük fayda var. Gazetelerin dijitalleşmesi uzun ve orta vadede bana çok mantıklı ve faydalı gelmiyor.” ifadelerini kullanmıştır.

Bir başka görüşmeci ise gazetelerin kapanmasının çok sayıda işsizi doğuracağını şu sözlerle ifade etmektedir:

“Dijitalleşmeye geçtiniz. Böyle bin 500 tane yerel gazete kapandı. Ne olacak sonra? Biz sadece matbaada, dağıtımda en az ikişer tane eleman çalıştırıyoruz sigortalı. Dijitalde bu yok. Bu insanlar da sokakta kalacak. Yani işsizlik daha farklı artar. Bizim tedarik zincirimiz durdurulursa, o zincirdeki insanlar da işsiz kalacak. Dükkan kapatıp yüzbinlerce insan işsiz kalacak.”

Bir başka görüşmeci ise dijital dönüşümün olumlu ve olması gerektiğini belirtirken, yine de bunun gazeteleri bitireceğini şu sözlerle ifade etmiştir:

“Dijital haberciliğin olması gerekiyor, teknolojiye uymak gerekiyor. Onun için gazeteleri bitirecek.”

Tiraj

Bazı görüşmeciler ise tiraj kaybının sürekli düştüğünü ve bundan dolayı da gazetelerin geleceklerinin kötüye gittiğini düşünmektedirler:

“(Gazeteler) Yok olacaklar. Tirajlarımız her geçen sene düşüyor.”

“Şu anda basılı gazeteler kötü bir durumda. Gitgide tiraj düşüyor. Hatta hiç satmayan gazeteler de var. Bunu da biliyoruz. Bu noktada dijitalleşmeye teslim olma noktasında diye düşünüyorum.”

Maliyetler

Baskı başta olmak üzere maliyetlerdeki artış da gazeteciler için bir tehdit oluşturmaktadır. Bir görüşmeci;

“Basılı gazetelerin gelecekleri karanlık. Çünkü dediğimiz gibi maliyetlerin nereye kadar çıkacağını bilmiyoruz. Çünkü maliyetlerde çok ciddi sıkıntılar var.” şeklindeki ifadeleriyle maliyet artışlarının kendileri için ciddi sıkıntı oluşturduğunu belirtmektedir.

Bir başka gazeteci,

“Geleceğini olumsuz görüyorum. Her an kapanma tehlikesi ile karşı karşıyayız. Bunu da maliyetlere bağlıyorum. Çünkü baskı maliyetleri çok fazla.”

Bir diğeri;

“Yazılı basın, matbaa tamamen ortadan kalkmış olacak, dijitale dönmüş olacak. Yoksa o masrafları kaldıracak kimsenin gücü olmaz.”

Bir başkası ise;

“Muhtemelen bunun da arkası gelecektir ama çok azalacaklar. Şöyle düşünüyorum. 3-5 yıl sonra, basılı gazete sayısı çok fazla azalacak, çünkü bu maliyetlerle sürdürülebilir bir yanı yok. Kalanlar daha kıymetli olacaktır diye düşünüyorum.” sözleri ile maliyetlerin artmasıyla gazetecilik faaliyetlerinin sürdürülmesinin oldukça zor duruma geldiğini vurgulamaktadırlar.

Okur Alışkanlıkları

Gazeteciler dijitalleşme ve maliyetten kaynaklanan sıkıntıları aşsalar bile okur alışkanlıklarındaki değişimden ötürü tehditlerin devam edeceği görüşünü savunmaktadır. Bir gazeteci bu düşünceyi;

“Basılı gazetelerin bundan kaynaklı ömürleri bitmese de okuyucu alışkanlıklarından kaynaklı olarak ömürleri bitiyor, bitecek.” şeklinde dile getirmektedir.

Gazetelerin Kapanması

Bazı gazeteciler, sektördeki yaşanan gelişmelerin ardından çok sayıda gazetenin kapandığını ve kapanmaya da devam edeceği görüşünü savunmaktadır. Gazetecilerden bir kısmı pandemi sürecinin gazeteleri çok daha kötü duruma düşürdüğünü şu sözlerle ifade etmişlerdir:

“Zaten pandemide artan sıkıntılar nedeniyle Anadolu’da yüzlerce yerel gazete kapandı. İnternetten haber okumak, dijitalden haber okumak, tüm bunlar mazeret değil.”

“Şimdi pandemi yaşadık. Ve hem satışlar çok azaldı hem de reklam gelirleri sıfırlandı. Anadolu’da yüzlerce gazete kapandı.”

Bir başka gazeteci ise gazeteleri yaşlı bir insana benzeterek, artık son yıllarını yaşadığını şu sözlerle betimlemiştir;

“Bizim günlük gazetelerin artık son yıllarını, yaşlılık dönemlerini bitkisel hayat dönemlerini ben yaşadığını düşünüyorum.”

Gelecekten Umutlu Olanlar

Bazı görüşmeciler ise her ne olursa olsun bir şekilde geleneksel yayıncılığın devam edeceği görüşünü taşımaktadırlar. Kağıda dokunarak okuma alışkanlığının kolay kolay bırakılamayacağını düşünen bazı gazeteciler;

“Ben basılı gazetelerin asla yok olacaklarını düşünmüyorum. Çünkü bir kitle kağıda dokunarak okumayı seviyor.”

“Bana göre geçici olarak basılı gazeteler ilgiyi kaybetmiş, değerini kaybetmiş gibi gözükse bile ayakta kalanlar bence bir müddet daha gidecek diye düşünüyorum. Çünkü o kağıda elleyen bir insanın onu kolay kolay bırakabileceğini düşünmüyorum.”

“Dijital mecralar gençler için iyi olabilir ama gazetenin tadı başka. Elinize alıp da sayfaları çevirmek başka. İstediğiniz zaman istediğiniz yerden devam ediyorsunuz. Sıkıldıkça kaldığınız sayfalardan devam ediyorsunuz.” ifadeleriyle yine de gelecekten umutlu olduklarını kaydetmişlerdir.

Bir başka görüşmeciye göre ise gelecek oldukça iyi görünüyor;

“Ben majör bir cevap vereyim hocam. Ben medyanın geleceğini iyi görüyorum.”

Bir grup gazeteci ise gazetelerin çok azalacağını ama tamamen yok olmayacağı görüşünü savunmaktadır:

“Ben hemen biteceğini düşünmüyorum. Sıfıra ineceğini. İşte 3 yıl içinde basılı gazete kalmayacak gibi noktalara geleceğini düşünmüyorum. Ama evet asgariye inecek. Belirli bir seviyede olacak. Evet internet haberciliği çok ileri seviyede olacak. Ama ben yakın vadede sıfıra ineceğini düşünmüyorum.”

“Yani şöyle diyeyim. Kapanacak derken bu iş tamamen sıfırlanmaz.”

“Ama ben bir de gazete de satamıyorum. O da ayrı bir şey. Ama şöyle de bir gerçek var. Kitap bitti mi bugüne kadar tek tük gidiyor. O zaman bu gazete de gidecek.”

Dönüşüm Zorunluluğu

Görüşmeci gazetecilerin büyük çoğunluğu dijital dönüşümlerini tamamlamaları gerektiğini düşünmektedirler.

“Sadece dijitalleşsek, bir şekilde ayakta kalırız. Çok rahat ayakta kalırız.”

“Böyle giderse geleceğimizi çok parlak görmüyorum. Gazetelerin bir şekilde dijitalleşmelerini tamamlaması gerekiyor.”

“Yani basılı gazetelerin de geleceğini çok zor görüyorum. Bu dijitalleşme eninde sonundan tamamını kapsayıp, eninde sonunda hepsini dijitale dönüştürecek diye düşünüyorum.”

“Dijital haberciliğin olması gerekiyor, teknolojiye uymak gerekiyor. Onun için gazeteleri bitirecek.” şeklindeki ifadeleriyle gazeteciler dönüşümün zorunluluğuna işaret etmektedirler.

3. SONUÇ

Türkiye’de 19. yüzyılda başlayan ve köklü bir geçmişe sahip olan basılı gazetecilik, bugün tarihindeki en büyük "varoluşsal kriz" ile karşı karşıyadır. Araştırma verileri ve sektör temsilcilerinin görüşleri, geleneksel medyanın sadece bir mecra değişikliği değil, "yıkıcı bir dönüşüm" sürecinden geçtiğini açıkça ortaya koymaktadır.

Tiraj Kaybı

2010-2024 yılları arasında Türkiye’deki gazete sayısının %73, toplam tirajların ise %81 oranında azalması, geleneksel modelin sürdürülebilirliğinin kalmadığını kanıtlamaktadır. Özellikle bölgesel gazetelerdeki tiraj kaybının %98’e ulaşması, yerel ve bölgesel basının bu süreçte en ağır darbeyi alan kesim olduğunu göstermektedir.

Maliyet ve Azalan Gelirler

Artan kağıt ve baskı maliyetleri, fiziksel gazete üretimini ekonomik olarak imkansız hale getirirken; reklam gelirlerinin dev dijital platformlara (Google, Facebook vb.) kayması gazetelerin ana gelir damarlarını azaltmıştır.

Okur Alışkanlıklarının Değişmesi

Genç neslin (Z kuşağı) habere ücretsiz, anlık ve mobil cihazlar üzerinden erişme tercihi, basılı gazeteyi güncelliğini yitirmiş bir meta haline getirmiştir. İnternet, bugün televizyondan sonra en önemli ikinci haber kaynağı konumuna yükselmiş; akıllı telefonlar ana haber mecrası olmuştur.

İçerik Kalitesindeki Değişim

1980 sonrası medyanın holdingleşmesi ve sahipliğin "gazetecilerden iş adamlarına" geçmesi, habercilikte magazinleşmeye ve ciddi içerik kaybına yol açarak okur sadakatini zayıflatmıştır.

Sektör temsilcilerinin büyük çoğunluğu, basılı gazetelerin "son yıllarını yaşadığı" ve bir nevi "bitkisel hayatta olduğu" görüşünde birleşmektedir. Bazı görüşmeciler kağıtla kurulan fiziksel bağın bir kitle tarafından sürdürüleceğini düşünse de genel kanı, basılı gazetenin gelecekte ancak kısıtlı bir kesim için "lüks bir tüketim ürününe" dönüşebileceği yönündedir.

ÖNERİLER

Araştırma bulguları ışığında, geleneksel gazetelerin hayatta kalabilmesi ve gazetecilik mesleğinin dijital çağda niteliğini koruyabilmesi için şu stratejik adımlar atılmalıdır:

- Gazeteler, basılı nüshayı merkeze alan anlayışı terk ederek üretim ve dağıtım süreçlerini tamamen dijital mecralara entegre etmelidir.

- Veri haberciliği, robot haberciliği, drone ve VR kullanımı gibi teknoloji odaklı uzmanlık alanları geliştirilerek okuyucuya dijitalin sunduğu tüm olanaklar sunulmalıdır.

- Haberlerin "anlık" sunulması ve sosyal medya algoritmalarına uyumlu içerik üretimi, genç okur kitlesini yakalamak için zorunludur.

- Basılı gazetenin lüks bir ürün haline geleceği öngörüsüyle, genel geçer haberler yerine daha derinlemesine analiz, araştırma ve özel içeriklere odaklanılmalıdır.

- Matbaa ve dağıtım gibi alanlarda yaşanacak iş kayıplarına karşı sektörel geçiş planları hazırlanmalı, bu alanlardaki insan kaynağının dijital medya üretimine kanalize edilmesi sağlanmalıdır.

- Sadece resmi ilanlara veya geleneksel reklamlara dayanmak yerine; abonelik sistemleri, sponsorlu içerikler ve dijital gelir modelleri geliştirilmelidir.

ÖZET

Yeni iletişim teknolojilerinin son yıllardaki hızlı gelişimi ile ortaya çıkan yeni imkânlar büyük bir etkileşim alanı sunmaktadır. İnternet ve sosyal medyanın hızlı gelişimi insanoğlunun yaşamını etkilediği gibi var olan birçok sektörü de bu etkileşim alanında ya var olmaya ya da yok olmaya itmektedir. İnternet ve sosyal medyanın hızlı gelişimi insanlığın var olan kültürel düzenini de hızlı bir şekilde etkileyerek dönüştürmektedir. Popüler kültürün oluşumu ve yayılımı, sosyal medya üzerinde üretim ve tüketim döngüsüne alıştırılan tüketicilerle daha kolay bir hale gelmiştir.

Sosyal medyada neredeyse her yıl ya birçok yeni uygulama ortaya çıkmakta ya da var olan uygulamalar sunmuş olduğu yeni özellikleriyle popüler kültürün sunumuna yeni bir soluk getirmektedir. Ortaya çıkan yeni gelişmeler markaların ve üretici haline gelen tüketicilerin sosyal medyayı kullanma amaçlarını ve kullanım şekillerini de dönüştürebilmektedir. Böylece 1-3 yıl gibi kısa bir süre içerisinde sosyal medyada popüler kültürün aktarımı için kullanılan yeni kavramların ve yeni aktörlerin ortaya çıkması muhtemeldir. Bu nedenle günümüzde popüler kültür ve sosyal medya ile ilintili var olan kavram ve aktörlerin incelenmesi önemlidir. Bu bağlamda yazın taraması ve betimleyici analizden yararlanan çalışmada kültür kavramı, popüler kültür ve sosyal medya ilişkisi ele alınarak açıklanmıştır. Ayrıca bu kavramlarla ilintili olarak sosyal medya ünlüleri, Influencer'lar ve popüler kültür, Influencer'ların rolü ve etkisi, sosyal medyada trendlerin oluşumu ve yayılımı, hashtag kültürü, caps ve memes kavramları açıklanarak sonuç ve değerlendirme kısmında tartışılmıştır.

Anahtar Kelimeler: Sosyal medya, popüler kültür, kültürel araç.

GİRİŞ

İletişim teknolojilerinde yaşanan hızlı değişim ve dönüşüm, bireylerin gündelik yaşam pratiklerinden kültürel üretim biçimlerine kadar birçok alanda değişiklik getirmiştir. Geçmişte televizyon, radyo, gazete, dergi, müzik, sinema ve kitap gibi geleneksel medya araçları ile üretilen ve dağıtılan popüler kültür ürünleri günümüzde sosyal medya araçları ile üretilmekte ve dolaşıma koyulmaktadır. Özellikle internet kullanımı ve sosyal medya araçlarının yaygınlaşması, kültürel değerlerin üretilme, dolaşıma girme ve tüketilme süreçlerini de köklü biçimde değiştirmiştir. Geleneksel kitle iletişim araçlarının tek yönlü yapısına karşın, sosyal medya araçlarının iki yönlü ve katılımlı iletişim sağlaması kültürel öğelerin farklı kültürlerle de etkileşime girmesine olanak kılmıştır. Sosyal medyanın etkileşimli yapısı, kullanıcıları yalnızca mesajların alıcısı olmaktan çıkararak, içerik üreten ve paylaşan aktif birer birey haline getirmiştir. Böylece kullanıcılar, kültürel içeriklerin aktif üreticileri ve dağıtıcıları konumuna gelmiştir.

Sosyal medya aracılığıyla popüler kültür toplamsal bünyeye daha kolay girebilmekte ve bu şekilde olayları, toplumsal koşulları ve hayatı anlamlandırmayı etkileyerek yaşam tarzlarını da şekillendirmektedir. Sosyal medya başta olmak üzere dijital mecraların bireyler için kaçınılmaz ve vazgeçilmez bir hale geldiği günümüz dünyasında her yaştan kullanıcılar sosyal medya araçlarıyla içeriğin hem üreticisi hem de tüketicisi olarak popüler kültürün oluşmasında ve aktarılmasında önemli bir rol oynamaktadırlar (Karaduman, 2017: 9). Öte yandan günümüzde sosyal medya platformları, bireylerin ekonomiden siyasete, gündelik yaşamdan sanata kadar birçok konuda tartıştığı ve fikir belirttiği dijital alanlardır. Bu platformlar aynı zamanda kültürün oluşumu ve dolaşımı üzerinde de belirleyici bir rol üstlenmektedir. Geçmişten günümüze kültür her zaman teknolojik gelişmelerle etkileşim içerisinde olmuştur. Bu etkileşim, kültürün hem üretim hem de aktarım biçimlerinde dönüşümlere yol açarak toplumsal yapıların yeniden şekillenmesinde etkili olmuştur (Güreller, 2021: 90).

Bu çalışmada, sosyal medya bir popüler kültür aracı olarak ele alınmakta; popüler kültür ve sosyal medya kavramları arasındaki ilişki kavramsal bir çerçevede değerlendirilmektedir. Çalışma kapsamında kültür, popüler kültür kavramları açıklanmakta, popüler kültür sosyal medya ilişkisi ele alınmakta, devamında ise sosyal medya ünlüleri ve influencer'ların popüler kültürün oluşumundaki rolleri, trendlerin ve hashtag kültürünün yayılım dinamikleri ile memes/caps üretimlerinin popüler kültür içerisindeki işlevleri değerlendirilmektedir. Yazın taraması ve betimleyici analiz yöntemiyle yürütülen bu değerlendirme, sosyal medyanın popüler kültürü yalnızca yansıtan bir alan değil; aynı zamanda onu üreten, dağıtan ve dönüştüren aktif bir araç olduğunu ortaya koymayı amaçlamaktadır.

1. KÜLTÜR KAVRAMI

Popüler kültür kavramının daha iyi anlaşılabilmesi için başta kültür kavramının ele alınması gerekmektedir. İnsanların yaşam içerisinde karşılaştığı nice olay ve olgunun etkileşimi zamanla kültür ve popüler kültür kavramlarının kapsamını genişleterek bu kavramlara olan bakış açılarını da farklılaştırmaktadır.

Genellikle bir toplumda duygu, düşünce ve yargı birliğini oluşturan sosyal değerlerin tamamı kültür kavramı ile tanımlanmaktadır. Kültür kavramı bu anlamıyla bir toplumun düşünce, gelenek, görenek ve sanat değerlerini içine almaktadır. Kültür bu yönüyle bilgi anlamını üstlenmektedir. Toplumda kültürlü insan, bilgili insan olarak görülmektedir. Bu bilginin temeline felsefi olarak bakıldığında ise aslında insanların var olan doğayı ortaya koydukları üretimlerle dönüştürerek kendilerine uyumlu yeni bir doğa haline getirdikleri görülmektedir. Ayrıca insanların doğayı araçsız yaşayamadıkları anlaşılmaktadır. Dolayısıyla insanların doğadan çok kültüre bağlı oldukları görülmektedir. İnsanlar doğanın düzenine karşı doğayı üreterek kendilerine uyumlu yeni bir ortam hazırlarken zamanla oluşturmuş oldukları değerler bütünü kültürü meydana getirmiştir. İnsanlar bulunduğu alanda yaşam rahatlığı elde edebilmek için zorunlu görevlerin geliştirebileceği yeni bir doğa oluşturmuştur. İlkel doğanın getirdiği zorluklardan kurtulmak isteyen insanlar eylemsel çaba göstererek kültür düzenini kurmuştur (Çeçen, 1996: 11-12).

Erdoğan ve Alemdar (2005: 22) ise, kültürü, halkın paylaştığı tüm değerler, kurallar, gelenekler ve alışkanlıklar ile birlikte bireylerin etkileşim halindeyken doğru ve yanlış hakkında sahip oldukları düşünceler olarak tanımlamışlardır. Kültürün çeşitli biçimlerde anlamlar taşıyabileceğini belirten Erdoğan ve Alemdar, kültürün farklı türlerde sunulabileceğini vurgulamaktadırlar. Bu türler arasında yüksek kültür, kitle kültürü, karşı kültür, Amerikan kültürü, Türk kültürü, İslam kültürü, geleneksel kültür, modern kültür, gençlik kültürü, popüler kültür, üstün kültür, bayağı kültür, kaba kültür, maganda kültürü, ince kültür (şiir ve sanatla ilgili işleme), televole kültürü ve şirket kültürü gibi ayrımlar bulunmaktadır.

Bu ayrımlardan anlaşılacağı üzere kültür, toplumdan topluma farklılık gösterebildiği gibi, toplumların kendi içinde de başka adlandırmalara sahip olabilmektedir. Tüm bu farklı tanımlar bir araya getirildiğinde kültür, bir toplumda kuşaktan kuşağa aktarılan maddi ve manevi değerlerin, inançların, davranışların, düşüncelerin ve alışkanlıkların toplamı olarak tanımlanabilir. Diğer bir ifade ile kültür, bireyin yaşam alanı olarak görülmektedir (Diker, 2023: 156).

Geçmişten günümüze kitle iletişim araçları da kültürün şekillenmesinde ve yayılmasında önemli bir oynamaktadır. Televizyon, radyo, film ve müzik gibi kitle iletişim araçları, kültürel değerleri ve normları geniş kitlelere ulaştırarak kültürel etkileşimi ve değişimi tetiklemektedir. Özellikle 1980'lerden sonra Türkiye'de özel televizyon ve radyoların artmasıyla, yabancı kültüre ait dizi, film ve programlar Türk izleyicisi ile buluşmuş, bu da kültürel aktarımı hızlandırmıştır. Öte yandan Hollywood gibi büyük film endüstrileri aracılığıyla sinema, küresel kültürlerin yayılmasında başat bir etken olmuştur (Diker, 2023: 158-159).

2. POPÜLER KÜLTÜR VE SOSYAL MEDYA

Egemen sınıfların kendi düzenlerini devam ettirebilmek için ürettikleri bir kültür olan popüler kültürde, kültürel değerler ve gelenekler, egemen ideolojilere göre uyarlanıp ilgili kitleye sunulmaktadır. Popüler kültür kavramı sosyal, ekonomik ve siyasi vb. farklı boyutları olan bir kavramdır. Popüler kültürde daha çok alt sınıfların üretebildiği kültür, egemen olan üst sınıfların ideolojisinin çıkarlarına yönelik uyarlanarak sunulmaktadır. Dolayısıyla bu açıdan bakıldığında popüler kültür daha çok alt sınıftan üst sınıfa doğru üretilen bir kavram olarak bir alt kültürdür (Özkan, 2006: 33). Öte yandan günümüzde popüler terimi; toplumun büyük kesimi tarafından istenen, beğenilen ve sevilen anlamlarında kullanılmaktadır. Erdoğan ve Alemdar ise popüler kelimesini şu şekilde açıklamaktadır (2005: 33):

> Popüler kelimesi İngilizceden gelmekte ve ortaçağda "halkın" anlamıyla kullanılmaya başlanmıştır. Günümüzde ise "çoğunluk tarafından sevilen ve seçilen" anlamına gelmektedir. Popüler kavramı "halk, nüfusun büyük çoğunluğu, halk/çoğunluk için, halk/çoğunluk tarafından terimlerini içine alır; Dolayısıyla, kavramın ilk bakışta verdiği anlama göre popüler kültür belli bir grubun ürünü değildir, belli bir grubun sahipliğini içermez: Popülerdir, yani herkesin olmasa bile hemen herkesindir. Kavram kitle kültürü, folklor, işçi sınıfı kültürü ve alt grupları kültürü ile şaşırtıcı derecede çakışır.

Popüler kültür, insanları tüketime yönlendirmektedir. Popüler kültür, insanları tüketime yönlendirmeyi başaramadığında ise bir özenti oluşturmayı amaçlar. Böylece kültür endüstrisini, endüstriyel piyasanın bir aracı olarak oluşturmaktadır. Popüler kültür, insanları etkisi altına alarak kendi amaçları sınırlılığında bir özgürlük sunduğu için insanları bunaltabilmektedir. Popüler kültürde, örnek kimselerin yaşama bakış açıları ve yaşam stilleri zamanla diğer insanlara özendirilerek bunu elde etmek isteyenler için bazı ürünler bir ihtiyaç haline getirilebilmektedir. İnsanlar, özendikleri yaşam stillerini yaşayabilmeleri için popüler kültürün gerekli gösterdiği ihtiyaçları gidermeye başlamalarıyla birlikte aslında kendi özüne yabancılaşarak egemen ideolojinin istediği yönde birbirlerine benzemektedir. İnsanlar popüler kültür ile birlikte anlam kazanan ürünleri tüketerek özendikleri yaşam standardına ve hissetmek istedikleri hazlara hemen ulaşmayı beklerken aslında popüler kültürün tüketim kapanına çoktan yakalanmışlardır. Popüler kültürün zamanla anlamlı hale getirip zamanla anlamsızlaştırdığı ürünler etrafında insanlar tüketim bilincini kaybederek aslında giderek kendilerini tüketmektedirler (Çoşgun, 2012: 838-839).

Popüler kültürde, sürdürülebilir sermaye ve sermaye sistemi sürekli değişimle oluşturulur. Müzik, moda, yiyecek sektöründe popüler kültürün yansımaları gözükmektedir. Müzik sektöründe popülerlik her hafta değişen hit şarkı listesi içerisinde sanatçılar yer almaya çalışırken dinleyiciler ise bu listedeki şarkıları hem dinlemek hem de paylaşmak için yarış halindedir. Giyim alanında mevsimlerle birlikte değiştirilen modayla popüler olan ise kültürel yaşamdır. Yiyecek ve içecek alanına bakıldığında ise McDonalds ve Burger King; Pepsi ve

Coca Cola; Marlboro ve Winston vb. markaların birbirleri arasında tüketicilerin özgür tercihini elde etme rekabetleri ve bunun tüketicilerin önüne bireysel özgürlük, zevk ve tercih şeklinde servis edilmesidir. Popülerin yaratımında diğer popüler olanlardan da yararlanılmaktadır. Popüler olan fikir ve ideolojiler, politikaların yanında popüler olan kişilerden de yararlanılmaktadır. Popülerlik kazanmış olan sanatçı ve sporcular, magazin ve dergi kahramanları popülerin yaratımında kullanılabilmektedir (Erdoğan, 2004: 4-5). Popüler kültürün yayılmasına katkı sağlayan araçların fazlalığı ve etkililiği hayatın her aşamasında bu kavram ile karşılaşılmasını mümkün kılmaktadır. Popüler kültürün yayılmasını sağlayan başlıca araçlar; medya, televizyon, sinema, spor, edebiyat, teknolojik cihazlar (bilgisayar vb.) ve internettir (Sakallı, 2014: 311).

İnternet teknolojisinin sunmuş olduğu olanaklarla birlikte insanlar istedikleri hikâyeyi dinleyebilmekte veya kendilerine ait hikâyelerini oluşturup paylaşabilmektedir. Dijital ortamlarda ortaya konan anlatılar için geleneksel medyada olduğu gibi profesyonel olmanıza gerek duyulmamaktadır. Dijital ortamlarda sadece profesyoneller değil, herkes kendine özgün içerikler üretebilmektedir. Geleneksel medyanın sunmuş olduğu tek yönlü iletişim yapısını deneyimleyen insanlar, internet teknolojisi ile birlikte yatay iletişim yapısına geçiş yapmıştır. Böylece internet kullanan kişiler geleneksel medyanın sunduğu hikâyeleri dinlemek zorunda kalmadan kendi içeriklerini oluşturma ve kendi hikâyelerini geniş kitlelerle kolaylıkla paylaşabilme imkânını yakalamıştır (Paslanmaz ve Narmanlıoğlu, 2020: 32). Son yıllarda sosyal medya platformunun alt yapısını sağlayan internet ve diğer farklı teknolojilerin birbirleriyle etkileşimi ile ortaya çıkan yeni uygulama ve ürünler sadece kişilere değil kurumlara da yeni imkânlar sunmaktadır.

Popüler kültürün başlıca dolaşım alanlarından biri haline gelen sosyal medya, popüler kültürel içeriklerin yayılması ve tüketilmesi açısından etkili bir mecra olarak öne çıkmaktadır. Sosyal medya araçları, kullanıcıların karşılıklı etkileşim kurmalarına ve ilgi duydukları popüler kültür unsurlarına ilişkin bilgi ve içerikleri paylaşmalarına imkân tanımaktadır. Bu etkileşim kültürlerarasında da olmaktadır. Popüler kültürün sosyal medyada temsili, toplum üzerinde önemli bir etkiye sahip olabilir. Popüler kültür temsilleri, toplumun değerlerini, normlarını ve sosyal kimliğini de şekillendirebilmektedir.

Etkileşim olanakları sunması ve kolay erişilebilir bir yapıya sahip olması, sosyal medya ortamlarını günümüzde iletişim alanının en etkili ve belirleyici medya araçları arasına taşımıştır. Günümüzde, gerek dünya genelinde gerekse Türkiye'de internet kullanımının yaygınlaşmasıyla birlikte, sosyal medya aracılığıyla yoğun ve güçlü bir enformasyon dolaşımı gerçekleşmektedir. Bu etkileşim temelli yapı, bireyler ve toplumlar arasında yakınlaşma, ortak ilgi alanlarının oluşması, yeni yaşam biçimleri ve davranış kalıplarının gelişmesi gibi sonuçlar doğurmakta; aynı zamanda sanal kültürel alanların ortaya çıkmasına ve kültürel dönüşüm süreçlerinin hızlanmasına zemin hazırlamaktadır. Bu bağlamda, gündelik yaşamda eğlenceden tüketim tercihlerine kadar geniş bir etki alanına sahip olan sosyal medya ile popüler kültür arasındaki ilişki, görünürlük, şöhret kültürü, moda, boş zaman kullanımı ve eğlence kavramları içerisindedir (Karaduman, 2017: 12).

Sosyal medya, küresel ölçekte çoğunlukla eğlence odaklı ve boş zaman değerlendirme pratiği çerçevesinde değerlendirilmektedir. Sosyal medya kullanım motivasyonları arasında yer alan eğlence arayışı, bu ortamların kullanıcılar açısından en güçlü çekicilik unsurlarından birini oluşturmaktadır. Sosyal medya, eğlenceye hızlı ve kolay erişim sağlayan bir araç olarak tercih edilmektedir. Bu bağlamda popüler kültür ürünleri sosyal medya platformlarında eğlence ekseni etrafında sürekli olarak dolaşıma sokulmakta ve yoğun bir ilgiyle tüketilmektedir (Karakuş, 2024: 144).

Dijital çağın belirleyici unsurlarından biri olan sosyal medya, takipçilerin ürettikleri ve paylaştıkları içeriklerle etkileşim kurmasına imkân tanıyan yapısı sayesinde popüler kültür ürünü olan moda alanında da önemli bir konum elde etmiştir. Bireylerin sosyal medyaya yönelik bağımlılık düzeylerinin hızla arttığı ve sosyal medyanın gündelik yaşam pratiklerine daha yoğun biçimde entegre olduğu görülmektedir. Popüler kültürün büyük ölçüde sosyal medya platformları üzerinden varlık göstermesi bu mecraların toplumdaki çeşitli eğilimler üzerinde belirleyici bir etki yaratmasına yol açmaktadır. Instagram, Facebook, Tiktok, YouTube ve Pinterest gibi yaygın kullanılan sosyal medya platformları ise içeriklerin milyonlarca kullanıcıya ulaşmasına imkân tanıyarak, sosyal medyanın ana akım düşünce ve eğilimlerin yayılmasında merkezi bir rol üstlenmesini sağlamaktadır (Younis, 2024).

Böylece geçmişte popüler kültür büyük ölçüde televizyon, radyo, kitaplar, filmler ve müzik gibi geleneksel medya ile yayılırken, bugün ise popüler kültür esas olarak sosyal medya gibi geleneksel olmayan mecralar ile üretilmekte ve yayılmaktadır.

3. SOSYAL MEDYA ÜNLÜLERİ

Geleneksel medya (televizyon, gazete, radyo vb.) internet ve diğer dijital teknolojilerin aracılığı ile yeni medya ortaya çıkmıştır. Dijital içeriklerin oluşturulması, paylaşılması, dağıtılması ve depolanması için gerekli olan birçok teknoloji yeni medya içerisinde bulunmaktadır. Yeni medya temel alt yapısını internet, sosyal medya, mobil iletişim cihaz (akıllı telefon, tablet vb.) teknolojileri kurmaktadır. Yeni medyanın alt yapısını oluşturan teknolojiler dijital içeriklerin üretilmesini ve bu içeriklerin geniş kitlelere sunulmasını kolaylaştırmaktadır. Yeni medya, içerik oluşturan kullanıcılar ile içeriği deneyimleyen kullanıcılar arasında etkileşim kurulmasını sağlar. Web siteleri, bloglar, podcastler, videolar ve canlı yayınlar aracılığı ile tüketiciler birçok konuda bilgi edinebilirken, içerik üreticileri ve diğer tüketicilerle etkileşim kurabilmektedir (www.pazarlamailetisimi.com). Yeni bir şöhret türü olan sosyal medya şöhretleri de yeni iletişim teknolojilerinin artan gelişimiyle birlikte kişilerin internet ve sosyal medya üzerinde yaptıkları paylaşımlarla ortaya çıkmıştır. Yeni medya çağıyla ortaya çıkan teknolojik imkânlar ve etkileşim özelliği ile tanınması mümkün olmayan bazı meslek grupları ve insanlar şöhret kazanırken kendi hayran kitlelerini de yaratma imkânı bulmuştur (Biricik, 2022: 23).

İnternet ve sosyal medya platformlarında yer alan her uygulama kendi amacı ve algoritması içerisinde kendi medya ünlülerinin ortaya çıkmasına imkân sağlamaktadır. Sosyal medyada uygulamalarında geniş kitlelere görünür olabilmek için uygulamanın amacı ve algoritmasına göre içerikler oluşturmak gerekmektedir. Youtube, Instagram, X (Twitter), Tiktok, Snapchat vb. uygulamalar ilk ortaya çıktıklarında tamamen kendilerine özgü içerik politikasına sahipti. Zamanla bir uygulamada ortaya çıkan popülerlik kazanan özellikler diğer uygulamaları da etkilemeye başlamıştır. Tiktok uygulamasında ortaya çıkan dikey tam ekran kısa videolar serisini ekran kaydırarak geçme özelliği daha sonra Instagram uygulamasında Reels, Youtube uygulamasında ise Shorts adı altında eklenmiştir Her ne kadar birbirlerine benzer özellikler sunmaya başlayan sosyal medya uygulamaları olsa da her uygulama kendi algoritmasına göre içerikleri görünür kılmaktadır. Bu nedenle uygulamanın içerik politikasının algoritmasına uygun içerikler üretilmesi geniş kitlelere ulaşabilmek için avantaj sağlamaktadır. Sosyal medya uygulamalarının içerik politikasının algoritmasına göre başarılı içerikler oluşturan kişi ve kurumlar zamanla ünlü hale gelebilmektedir. Bir uygulamada izlenen, okunan ve etkileşime girilen kişi ve kurumların gönderileri zamanla daha ön plana çıkmaktadır. Son yıllarda sıradan insanların bile sosyal medya içerisinde içerik üretmesi büyük bir içerik havuzunun oluşmasını sağlamıştır. Bu nedenle eskiye oranla sosyal medyada görünür olmak giderek zorlaşmaktadır. Sosyal medya uygulamalarında görünür olmak isteyenler popüler kültürün dayattığı şekilde üretmeli ve tüketmelidir. Bu durum yeni medya ünlülerinin üretimleri

ve tüketimlerinin birbirlerine benzemesine, eskiye göre özgün içeriklerin daha zor ortaya çıkmasına neden olmuştur.

4. INFLUENCER'LAR VE POPÜLER KÜLTÜR

"Influencer" kavramı sosyal medya platformundaki uygulamalarda profili bulunan geniş takipçi kitlesine ulaşan kişilerin, takipçileri tarafından belirli konularda otorite ya da bilirkişi olarak görülmesiyle ortaya çıkmıştır. Influencer'lar sosyal medyada belirli sayıda takipçi kazanmış olan, takipçileri tarafından kanaat önderi olarak kabul edilen, takipçilerini düşünce ve önerileriyle yönlendirerek etkileyen kişilerdir (Kıran vd., 2019: 101). Dijital platformlarda kendi içeriğini oluşturan ve bu içerikleri çeşitli dijital ortam araçları vasıtasıyla diğer kullanıcılarla paylaşan kişi Influencer olarak tanımlanmaktadır. Influencer'ların oluşturmuş oldukları içeriklerin paylaşımı, Influencer'lar ve tüketiciler arasında etkileşim oluşturmuştur. Tüketiciler etkileşim kurduğu Influencer'ları zaman içerisinde diğer tüketicilere önermeleriyle Influencer'lara güven duyulmaya başlanmıştır. Influencer'lara artan güveni fark eden kurum ve işletmeler, bu güven ortamından yararlanarak tüketicilere ulaşmak için aracı yüzler olarak Influencer'ları kullanmaya başlamıştır. Çünkü postmodernizmle birlikte artık kurum ve işletmeler geleneksel mecradansa dijital mecra kanallarını tercih etmektedir. Influencer'lar, tüketim ekonomisinin popülerliğinin artışa geçmesinde aracı kale haline gelmiştir. Aracı kale haline gelen Influencer'lar tüketim için tüketicileri teşvik etmektedir (Özkahveci ve Civek, 2022: 12).

Son yıllarda bilgisayarların ve özellikle mobil iletişim cihazlarının artan teknolojileriyle sunduğu olanaklar sayesinde Influencer'lar takipçilerinin daha yakınına girebilecek birçok ortam bulabilmektedir. Mobil iletişim cihaz kullanıcıları işlerinde, evlerinde, sosyal aktivelerinde ve diledikleri ortamda kendi vücutlarına en mahrem yakınlıkta olan bir ekrandan sosyal medyayı deneyimleyerek Influencer'lara yaklaşmıştır. Influencer'lar bu yakınlık ile popülerliklerini ve etki gücünü giderek arttırmaktadır. Sosyal medyanın ve mobil cihazların gelişimi ile popülerlikleri artan Influencer'lar, popüler kültürün oluşumunda ve yaygınlaşmasında yeni bir aktör haline gelmiştir. Influencer'ların popülerliği ve etki gücünün farkına varan markalar, pazarlama alanında Influencer ile iş birliği yürütmektedir. Markalar, influencer'lar ile iş birliği yürüterek hedef kitlelerine ulaşmayı ve Influencer'ların imajıyla algılanan kültürel anlamı kendi markalarına yöneltmeye çalışmaktadır. Burada İnfluencer ile işbirliği kuran markanın imajının uyumlu olmasına önem gösterilmelidir (Eyel ve Şen, 2020: 10).

Influencer'lar, markaların ürün ve hizmetlerinin tüketici zihnindeki anlamsal konumunu daha değerli hale getirerek popülerleştirmektedir. Influencer'lar ile etkileşim kurma süreleri zamanla artan takipçiler onlarla yakın bir arkadaşlık kurduğu algısına kapılarak giderek bağımlı hale gelebilmektedir. Böylece Influencer'ın bir ürün, hizmetle ilgili önerilerine kattığı anlamın takipçileri tarafından kabul görülme olasılığı artmaktadır. Influencer'lara hayranlıkla bakan takipçileri, Influencer'ın sahip olduğu güzellik, yakışıklılık, statü ve rollerini deneyimleyebilmek için onların sahip olduğu ürün ve hizmetleri alarak bu hazlardan bazılarını anlık olarak yaşayabilmektedir. Influencer'ın sahip olduğu veya önerdiği ürün, hizmetleri edinen takipçilerin sayısı arttıkça popüler hale gelen bu ürün ve hizmetleri edinme hareketi takipçi olmayan diğer tüketicilerin ilgisini de çekerek giderek büyüyebilmektedir. Markaların ürün ve hizmetleri için bir veya birkaç Influencer ile başlattığı iş birliği markaların beklentisinin ötesine geçerek kendi sektörünü etkileyen hatta global hale gelen bir popülerliği ortaya çıkarabilmektedir.

Kişiler, pazarlamanın dijital boyutu ile tüketme ve pazarlama rollerini üstlenmiştir. Pazarlamanın dijital dönüşümü ile pazarlamacıların yerini Influencer'lar almıştır. Sosyal medyada üretici, ürün ve tüketici arasında köprü olan Influencer'lar, üreticiler açısından pazarlama maliyetini düşürmektedir. Bir ürün ve hizmetin Influencer'lar üzerinden

pazarlanması birçok açıdan gelir kazanılmasının bir yolu olmuştur (Uğur Balcı ve Yurdakul, 2023: 181).

Markalar ile iş birliği kuran Influencer'lar tüketicileri etkileyerek onları tüketime teşvik etme görevini üstlenmektedir. Kanaat önderi olarak kabul edilen Influencer'lar, takipçileri tarafından örnek alınmaktadır. Takipçiler, Influencer'ların sahip oldukları yaşam standartları ve edindikleri nesnelere özenerek onlar gibi yaşamak için bu nesneleri satın almaktadır. Böylece tüketici haline gelen takipçiler kendi yaşamlarına ve beğenilerine yabancılaşmaktadır. Influencer'lar birçok marka ile olan iş birliği neticesinde birçok yeni ürünü tanıtabilme şansı yakalar. Bu iş birliklerinin Influencer'lara sağladığı olanakların farkına varamayan tüketiciler birçok ürüne sahip olmanın daha mutlu edeceği ve bir statü sağlayacağı algısına kapılmaktadır. Ayrıca Influencer'ların yeni ürünlere sürekli sahip olup tanıtması var olan diğer ürünlerin kısa zamanda daha eski olduğu yanılgısını takipçiler üzerinde oluşturmaktadır. Eski değer atfedilen ürünler yerine Influencer'ların yeni tanıttığı ürünler kabul görmektedir. Influencer'ları takip eden sosyal medya kullanıcıları olumlu deneyimler yaşasa da bazen olumsuz olarak da etkilenebilmektedir. Influencer'ların sosyal medyada, olumsuz yaşam an ve deneyimlerini eleyerek sadece kusursuz kurgusal bir yaşam yansıtmaları, tüketiciler gözünde belirli bir ideal yaşam standardı oluşturmaktadır (Yardımcı, 2024: 127).

Sosyal medyada Infuencer'lar, gündelik yaşam pratiklerini, tüketim kalıplarını ve kimlik inşasını görünür kılmaktadırlar. Sosyal medya platformları üzerinden ürettikleri içerikler, yalnızca ürün veya hizmet tanıtımıyla sınırlı kalmayıp; moda, dil kullanımı, beden algısı, yaşam tarzı ve değerler sistemi gibi popüler kültürün temel bileşenlerini dolaşıma sokmaktadırlar. Böylece Influencer'lar popüler kültürün hem üreticisi hem de taşıyıcısı olarak işlev görmektedirler. Takipçiler Influencer'ların deneyimlerini referans alarak tüketim kararlarını vermektedirler. Influencer'lar popüler kültür içinde yalnızca başkalarını etkileyen bireyler değil, aynı zamanda normların, beğeni kararlarının ve tüketim kültürünün oluşumunda belirleyici olan yeni nesil kanaat önderleri olarak değerlendirilmektedir.

5. SOSYAL MEDYADA TRENDLERİN OLUŞUMU VE YAYILIMI

Sosyal medya akımları, sosyal medya uygulamalarında popülerlik kazanan belirli bir konu veya trenddir. Örneğin, Instagram, X (Twitter) ve Facebook ve farklı sosyal medya uygulamalarında #ThrowbackThursday gibi bir hashtag popüler hale gelebilmektedir. Bu trendler, sosyal medyayı deneyimleyen insanlar arasında etkileşimi ve markalar için potansiyel pazarlama olanaklarını arttırabilmektedir (https://tr.linkedin.com). Sosyal medya uygulamaları kendilerini daha çekici kılacak ve daha çok tercih edilmelerini sağlayacak olan çözümleri, sürekli bir yenileşme amacından kaynaklı olarak aramaktadırlar. İnternet ve sosyal medyanın giderek büyüyen dünyasının farkında olan sosyal medya uygulamaları kendilerini ön plana çıkarmaya yönelik çözümler üretmektedir. Bu nedenle sosyal medya uygulamaları kullanıcılarını harekete geçirecek olan yöntemlere ağırlık vermektedirler. Sosyal medya uygulamalarının bu amaçla uyguladığı yöntemlerin başında da sosyal medya akımları bulunmaktadır. Sosyal medya uygulamaları günümüzde popüler kültür öğesi haline gelmiştir. Bu nedenle sosyal medya uygulamaları var olan popülerliklerini devam ettirmek için kullanıcılarına bir yenilik sunarak onların merak ve ilgilerini kendi üzerlerine çekmektir (Akpınar, 2021: 364-365).

Popüler kültür ve popüler eğlence anlayışına yönelik sosyal medyada öne çıkan içeriklerin başında akımlar yer almaktadır. Akımlar genellikle bir mantık barındırmamakla birlikte kişilerin eğlence amaçlı sürekli paylaşımları sonucunda yeniden üretilmesiyle akım içerisinde yapılanlar popüler hale gelmektedir. Dolayısıyla bu durum akımların yayılarak birçok sosyal medya kullanıcısının kusur kalmamak adına birbirlerini kopyalamalarına neden olmaktadır (Bahçecioğlu, 2023: 436). Sosyal medya uygulamaları dönem dönem çıkardıkları yeni akımlarla kullanıcıların ilgi ve meraklarını hep kendi üzerlerinde toplamak için

kullanıcıların bu akımlara katılmasını teşvik etmektedir. Bunun için sosyal medya uygulamaları kendi içerisindeki içerik üreticilerine belli öneriler ve teşvikler sunmaktadır. Örneğin, Youtube, Tiktok ve Instagram uygulamaları içerik üreticilerine özel günler ve belirli konulara yönelik olarak içerik paylaşmaları halinde daha çok erişim yakalayabileceklerini, belli bir izlenme sayısına ulaşabilirlerse para veya diğer uygulama içi ödüller kazanabileceklerini bildirmektedir. Aynı zamanda içerik üretmeyen ama etkileşimde bulunan kullanıcılar içinde belirli konularda ilgili içeriklere yorum ve beğeni yapması durumunda özel teşvikler verilebilmektedirler. Her sosyal medya uygulamasının içerik üretici ve etkileşim kuran kullanıcılarını teşvik eden kendilerine göre bir sistemleri bulunmaktadır. Böylece istenilen konuda artan içeriklerle birlikte o konu akım haline gelebilmektedir.

6. HASHTAG KÜLTÜRÜ

Başında # simgesi olan anahtar kelimeler hashtag olarak tanımlanmaktadır. Popüler konularla ilgili içeriklerin bulunmasını bu anahtar kelimeler kolaylaşmaktadır (https://www.support.google.com) Son zamanlarda popüler bir yaklaşım olarak hashtag aktivizmi ilgi çekmektedir. Sosyal medyayı belirli bir amaçla kullanarak kamuoyunun desteğini oluşturma, mücadele sergileme veya düşüncelerini duyurma amaçlarıyla hashtag aktivizmi tercih edilmektedir. Hashtag ile oluşturulmuş anahtar kelimeler ilk kez 2007 yılında Chris Messina tarafından Twitter'da benzer konulara ilgi duyan kullanıcıların aradıkları içerikleri kolaylıkla bulabilmeleri için kullanılmıştır. 2011 yılındaki Arap Baharı protestoları ile birlikte hashtag kullanımı protesto etme, destek olma, kampanya düzenleme, gündem ve farkındalık oluşturmak için daha yoğun bir şekilde kullanılmaya başlanmıştır (İli ve Büyükbaykal 2023: 903).

Hashtag, çok kısa bir süre içerisinde basit bir sosyal iletişim aracından popüler bir kültürel olguya dönüşmüştür. Hashtag'i modern toplumda izleyiciyle iletişimin vazgeçilmez bir parçası haline getiren unsurlar arasında hasthtag sayısı, sosyal ağ kullanıcı sayısı, tüm dünyanın erişebileceği içerik oluşturmanın kolaylığı, mobil iletişim, televizyon programları ve reklam kampanyaları yer almaktadır. Bu da, eğlence olarak başlayan bir şeyin modern toplumun popüler kültürünün bir parçası haline geldiğini kanıtlamaktadır. Hashtag'ler sosyal medyada fikirlerin yayılmasıyla bağlantılı olsa da, trendlerin yayılması için de geçerlidir. Trendler genellikle kitle iletişim araçlarında ortaya çıkar, ancak bir ünlü veya insanların örnek aldığı biri onları takip etmeye başladığında toplum içerisinde popüler hale gelirler. Böylece hashtagler tarafından yayılan trendler popüler hale gelmektedir (Tatomirovic, 2019).

Hashtag kullanımı diğer sosyal medya uygulamalarında da bazı farkları içinde barındırarak giderek yaygınlaşmıştır. Sosyal medya uygulamalarında birçoğunda belli bir konudaki içeriklerin ilgili geniş kitlelere ulaşabilmesi için hashtag kullanılmaktadır. Sosyal medyada popüler kültürün oluşumu ve yayılımında bir enstrüman haline gelen akımlarda yer alan içerikler genellikle hashtag aracılığıyla bir araya gelmektedir. Sosyal medya uygulamalarının algoritmaları sayesinde hashtag ile uyuşmayan içeriklerin erişimi kısıtlanabilmektedir. Böylece popüler kültürün önermediği içerikler daha geride bırakılarak, tüketimi arttıracak öne çıkması uygun görülen içerikler kullanıcılara sunulabilmektedir.

7. MEMES/CAPS

Dijital kültürde "meme", çoğunlukla çevrimiçi ortamlarda hızla dolaşıma giren, tekrar üretilen ve bağlama göre dönüştürülen kültürel birimlere işaret eder. **İnternet memleri**, sayısız katılımcı tarafından yeniden karma edilen çok kipli (multimodal) kültürel ürünlerdir ve kamusal yorum üretiminde popüler kültür unsurlarından yararlanmaktadırlar Meme, bir ifade biçimi olarak çeşitli sosyal tutum ve duyguları yansıtmaktadır (Barlas Bozkuş, 2016). Shifman'da (2013) benzer bir şekilde memleri, bireysel internet kullanıcıları tarafından dolaşıma sokulan, taklit edilen ve dönüştürülen, bu süreçte ortak bir kültürel deneyim yaratan popüler kültür birimleri olarak tanımlamaktadır.

Meme, altyazılı resimler veya videolar şeklinde, çevrim içi olarak hızla yayılan bir eğlence ürünüdür. Sosyal medyada çeşitli konularda sayısız meme bulunmaktadır. Siyaset, futbol takımları, sporcular, yıldızlar, antika resimler, ünlü filozoflar, dünya tarihine damgasını vuran kişiler, popüler kültür içerikleri ve günlük yaşamdan kesitler bunlardan bazılarıdır (Dağtaş ve Yıldırım, 2017: 15). Türkçe popüler literatürde "caps" olarak tanımlanan üretim biçiminin İngilizce karşılığı "memes"tir. Memes sözcüğünün tanımına bakıldığında ise; bir kültürün içinde kişiden kişiye yayılan bir fikir, davranış, stil ya da kullanım olarak tanımlanmaktır. Türkiye'de gündelik kullanımda bu "meme" olgusu yaygın biçimde **"caps"** adıyla karşılanmaktadır. Bu adlandırma, yalnızca bir çeviri tercihinden ibaret değildir; çünkü "caps" terimi Türkiye'de sıklıkla **dondurulmuş bir görüntü üzerine metin bindirme** pratiğini merkez almaktadır. Capsler, sanal ortamda özellikle sosyal medyada paylaşılan, yaşananları alaycı ve mizahi bir biçimde yorumlama biçimi olarak tanımlanmaktadır. Caps İngilizce "capture" kelimesinden türetilmiştir (Aktaş, 2016).

Memler, popüler kültür içerisinde üretilir ve sosyal medyada dolaşıma girer. Bu içerikler genellikle genç sanatçılar ve grafik tasarımcılar başta olmak üzere dijital üretici kuşaklar tarafından yeniden yorumlanmakta, dönüştürülmekte ve çoğaltılmaktadır (Barlas Bozkuş, 2016). Öte yandan popüler kültürün gündelik hayata odaklanan, geçici ve elektik yapısı, memeslerin, dolayısıyla da capslerin yapısıyla da örtüşmektedir. Caps üretimleri, meme pratiklerine benzer biçimde, büyük ölçüde popüler kültürden beslenmektedir. Bu üretimlerde; futbolcular, televizyon dizileri ve sinema filmleri gibi tanınmış popüler figürler, çizgi film karakterleri ve gündelik yaşama ilişkin temalar (futbol, siyaset, vize ve final dönemleri gibi) sıklıkla kullanılmaktadır. Bunun yanı sıra kedi köpek gibi popüler hayvan imgeleri de capslerin mizahi anlatımını güçlendiren sembolik unsurlar olarak öne çıkmaktadır (Aktaş, 2016). Bu yönüyle capsler, popüler kültürün ortak özelliklerini yeniden bağlamlandırarak sosyal medya ortamlarında dolaşıma sokan görsel-metinsel anlatılar olarak değerlendirilebilir.

SONUÇ VE DEĞERLENDİRME

Bu çalışma, sosyal medyayı popüler kültürün üretimi ve yayılımını sağlayan önemli araçlardan biri olarak ele almıştır. Kültür, popüler kültür ve sosyal medya arasındaki ilişkiyi kavramsal bir çerçevede değerlendirmiştir. İnceleme kapsamında, geleneksel kitle iletişim araçlarının popüler kültür üretimi ve dolaşımındaki belirleyici rolünün, dijitalleşme süreciyle birlikte sosyal medya araçlarına kaydığı görülmektedir. Sosyal medyanın kullanıcı ile etkileşim temelli yapısı, kullanıcıları yalnızca tüketici konumunda bırakmamakta; aynı zamanda onları kültürel içeriğin üreticisi ve taşıyıcı haline getirmektedir. Bu durum, popüler kültürün daha hızlı, geçici ve yeniden üretilebilir bir yapıya bürünmesine olanak kılmaktadır. Kültürel anlamların dolaşımı sosyal medya algoritmaları, kullanıcı pratikleri ve dijital görünürlük üzerinden şekillenmektedir.

Çalışmada ele alınan sosyal medya ünlüleri ve Influencer'lar, popüler kültürün oluşumu ve yayılımında yeni nesil kanaat önderleri olarak değerlendirilmektedir. Influencer'ların takipçileri ile kurdukları yakın ve sürekli etkileşim, onları yalnızca içerik üreticisi değil; aynı zamanda kanaat önderi, rol modeli ve tüketim davranışlarını yönlendiren bir aracı figür haline getirmektedir. Böylece Influencer'lar popüler kültürün önemli bir öğesi olan tüketim kültürünü yaygınlaştırmakta, bireylerin kimlik inşası ve yaşam tarzı tercihleri üzerinde belirleyici olmaktadır.

Öte yandan sosyal medyada trendlerin, hashtag kültürünün ve memes/caps üretimlerinin popüler kültürünü dolaşımını hızlandıran önemli araçlar olduğu bu çalışmada görülmektedir. Trendler ve hashtag'ler, belirli içeriklerin görünürlüğünü artırarak popüler olanın yeniden üretilmesini sağlarken; memes ve capsler mizah, ironi ve eleştiri yoluyla gündelik yaşamın kültürel kodlarını dolaşıma sokmaktadır. Bu üretimler, popüler kültürün geçici, eğlence temelli

ve hızla tüketilen doğasıyla örtüşmekte; aynı zamanda sosyal medyanın katılımcı kültür yapısını görünür kılmaktadır. Sonuç olarak sosyal medya, popüler kültürü aktaran bir mecra olmanın ötesinde, onu yeniden üreten, dolaşıma sokan ve yönlendiren dinamik ve akışkan bir alan olarak değerlendirilmektedir.

OSMANLI SİYASİ VE İDARİ YAPISINDA TERCÜME ODASININ YERİ

Muhammet Fatih BOZAN
Tokat Gazi Osman Paşa Üniversitesi
mfatihbozan@gmail.com - 0000-0002-0104-8896

ÖZET
Osmanlı Devleti'nin son dönem kurumsal yapılarından birisi de Bâb-ı Âli Tercüme Odası'dır. Kısaca Tercüme Odası olarak da bilinen bu müessese üzerine birçok akademik çalışma yapılmış olmakla birlikte, Osmanlı Devleti'nin siyasi ve idari yapısındaki dönüşüme olan etkileri üzerine yapılan çalışmalar sınırlı kalmıştır. Oysa Tanzimat'la birlikte devlet idaresinde padişahın belirleyici rolü tedrici olarak sınırlandırılmış, 2. Meşrutiyetle de sembolik hale getirilmiştir. Bu dönemde Saray ve Padişah'ın yerini Bâb-ı Âli alırken, mülkiye ve seyfiyenin yerini de kalemiye sınıfı, yani bürokrasi almaya başlamıştır. İşte güç dengelerindeki bu değişimde devlet idaresinde etkili olan bürokratların çok önemli bir kısmının Tercüme Odası'nda yetiştiği dikkate alındığında, değişimde etkili olan unsurun önemli bir kaynağı ortaya çıkmış olacaktır. Avrupa ile yakın temas kuran ve Devlet'in selametini Avrupaî reformlarda gören bürokratların yetiştiği Tercüme Odası bu kritik rolü sebebiyle detaylı bir incelemeyi hak etmektedir. Bu çalışma Osmanlı Devlet yapısında yaşanan köklü değişimlerde Bâb-ı Âli Tercüme Odası'nın yerini ve önemini ortaya koymayı amaçlamaktadır.
Anahtar Kelimeler: Bâb-ı Âli Tercüme Odası, Tanzimat, Bürokrasi, Batılılaşma.

The Position Of The Translation Office in The Ottoman Political and Administrative Structure

ABSTRACT
One of the institutional structures of the Ottoman Empire in the last period was the Sublime Porte Translation Room. Although many academic studies have been conducted on this institution, also known as the Translation Room, studies on its effects on the transformation of the political and administrative structure of the Ottoman Empire have been limited. However, with the Tanzimat, the determining role of the sultan in state administration was gradually limited and with the 2nd Constitutional Monarchy, it was made symbolic. During this period, while the Palace and the Sultan were replaced by the Sublime Porte, the civil service and the seyfiye began to be replaced by the clerical class, that is, the bureaucracy. When it is taken into account that a significant number of bureaucrats who were effective in state administration in this change in the balance of power were trained in the Translation Room, an important source of the effective element in the change will emerge. The Translation Room, where bureaucrats who had close contact with Europe and saw the salvation of the state in European reforms were trained, deserves a detailed examination due to this critical role. This study aims to reveal the place and importance of the Sublime Porte Translation Office in the radical changes experienced in the Ottoman State structure.
Keywords: Bâb-ı Âli Translation Office, Tanzimat, Bureaucracy, Westernization.

GİRİŞ

Anadolu Selçuklu Devleti'nin bir devamı şeklinde ortaya çıkan Osmanlı Devleti kadim Türk geleneğine uygun olarak teşekkül etmiş, gaza ruhuyla yönünü Bizans'a çevirerek genişlemiş, önce Balkanlarda daha sonra da Büyük Selçuklu Devleti'nin hâkimiyet sahasında güç terakümü yapmıştır. Siyasi gücüne hilâfeti de ekledikten sonra bir cihan devleti hüviyeti kazanmış ve üç kıtanın kesiştiği Afro-Avrasya'da hükümranlık tesis etmiştir. Adaletli yönetimi sayesinde gücünü de koruyarak uzunca sayılabilecek bir ömür süren Osmanlı Devleti nihayet yaşlanmış, teknolojik gelişmelerin iktisadi ve askeri sahada yaptığı değişmeleri takipte ve ortaya çıkan yeni güç odaklarıyla rekabette zorlanmaya başlamıştır.

Değişimi fark eden Osmanlı padişahları bu duruma karşı tedbir almaya çalışmışlar, özellikle askeri sahada ıslahatı zaruri görerek önceliği bu alana vermek istemişlerdir. Ancak en büyük mukavemet de seyfiye cenahından gelmiş, Yeniçeriler 2. Osman'ı (Genç Osman) daha niyet safhasında öldürmüş, 3. Selim de ıslahata teşebbüs safhasında aynı akıbete uğramaktan kurtulamamıştır. Bu tabloya yerelde güçlenen âyanlar[1] da başka bir şekilde eklemlenerek Sened-i İttifak'la 2. Mahmud'un karşısına taraf olarak oturmayı başarmışlar, Pay-ı Tahtın zafiyetini aleni etmişlerdir.

Padişah idari yapıyı merkezileştirmek ve bürokratik mekanizmayı güçlendirmek için öncelikle ayanları etkisiz kılmanın yollarını aramış, 1814 yılından itibaren kademeli bir şekilde devletin buyruklarını yerine getirmeyen ayanları ortadan kaldırmıştır. Bunu yaparken de önce âyanların bazı görev ve yetkilerini *Sandık Eminliği'ne* aktarmış, 1833 yılında mahalle ve köylerde kurulan muhtarlıklarla âyanların fonksiyonları tamamen bitirilmiştir (Eryılmaz, 2006: 56-57).

Eyaletlerde ortaya çıkan merkezkaç kuvvetlerin merkezi zayıflatmasını ayanları ortadan kaldırarak engelleyen Padişah 2. Mahmud, daha sonra en can alıcı mesele olan Yeniçeri Ocağı'na yönelecek ve Devlet-i Âliye'nin bünyesini kanser gibi saran bu illeti kesip atacaktır. Planladığı reformların önünde en büyük engel olarak duran âyan ve Yeniçeri Ocağı'nı bertaraf eden 2. Mahmud artık bütün güçleri elinde toplamayı başarmıştır. Bundan sonra merkezi gücü tahkim için Divan-ı Hümayuna el atacak olan Sultan 2. Mahmud Batı tipi bir hükümet teşkili için köklü değişikliklere gidecektir. İşte bu safhada bu makalenin de ana teması olan mülkiye ve seyfiyenin yerini alacak hatta ilerleyen zaman içerisinde Saltanatı bile geriye itecek olan kalemiye sınıfının yani bürokrasinin yükselişi başlayacaktır. Bürokrasinin kuluçka merkezi ise Fenerli Rumların ihanetlerinden sonra kurulan ve Batı bilgi ve düşüncesinin giriş kapısı olan Tercüme Odası olacaktır.

1. SENED-İ İTTİFAK'TAN TANZİMAT'A REFORM ARAYIŞLARI

Batılı devletlerin teknolojik gelişmeleri kullanarak askeri yapılarını güçlendirmeleri, okyanuslara açılmaları, sömürgeler üzerinden iktisadi olarak zenginleşmeleri, milliyetçilik akımlarını kullanarak azınlıkları kışkırtmaları ve Osmanlı Devleti'ni sürekli bir savaş ekonomisi üzerinden yıpratmaları Padişahları ve devlet ricalini yeni arayışlara itmiştir. Âciliyeti sebebiyle ilk ıslahat hareketleri ordu üzerinden yapılmak istenmiş ve bilindiği üzere bu niyet Padişah 3. Selim'in yeniçeriler tarafından katledilmesi ile sonuçlanmıştır. 2. Mahmut yeniliklerin önünde en büyük engel olarak gördüğü Yeniçeri Ocağı'nı kaldırıp, ulemayı maaşlı memurlara dönüştürerek Tanzimat reformlarının önünü açmayı başarmış, Yeniçeri Ocağı'nın

[1] Osmanlı Devleti'nde şehir ve kasabalarda devletle halk arasındaki münasebetlere aracılık eden o mahallin itibarlı şahıslarına verilen ad olan Âyanlarla ilgili daha detaylı bilgi için bkz. Mert, Özcan (1991). Âyan, *TDV İslâm Ansiklopedisi, 4. Cilt, s. 195-198.*

kaldırılması padişahın eski gücüne tekrar kavuşabilmesini ve otoritenin merkezde temerküzünü sağlamıştır (Koçak, 2010: 37).

1.1. Sened-i İttifak

Osmanlı Devleti'nde hükümranlık ve saltanat padişahın şahsında temerküz eder ve şer'i esaslara göre usulü dairesinde padişahlar tarafından kullanılırdı. Devletin zaman içerisinde yaşlanması ve yıpranması ile durum değişmeye başlamış, merkezi gücün zaafa düşmesine paralel olarak birtakım mahalli otoriteler ortaya çıkmıştır. Bidayette iyi niyetli olarak halkın taleplerini devlete ulaştırmada ve halkla devlet arasında iletişim sağlamada aracılık vazifesi üstlenen mahalli eşraftan kişiler zaman içinde devletin zaaflarından da istifade ederek nüfuz alanlarını genişleterek birer mahallerinde bir güç odağı haline gelmişlerdir. Taşrada otoritesi zayıflayan devlet Anadolu ve Rumeli'de ortaya çıkan güçlü aile ve hanedanların varlığını kabul etmek mecburiyetinde kalmış, hatta otoritesini bu mahalli âyan ve eşraf üzerinden yürütmeye başlamıştır. Nüfuz alanını genişletme gayretine düşen ayanların kendi aralarında ve zaman zaman da devletle olan mücadeleleri sosyal yapıyı sarsmıştır.

Merkezi gücü yeniden tesis etmek amacıyla 3. Selim'in askeri sahada yapmayı planladığı ıslahat hareketi Yeniçerilerin isyanı ile sonuçlanmış, bu duruma müdahale etmek üzere Rusçuk Âyanı Alemdar Mustafa Paşa Pay-i Tahta doğru harekete geçmiştir. 3. Selim'in öldürülmesine engel olamasa da 2. Mahmud'un tahta geçmesini sağlamış ve kendisi de sadrazam olmuştur. Sadaret mührünü alan Alemdar Mustafa Paşa ilk iş olarak âyanları Pay-i Tahta istişareye davet etmiş, nüfuzu ve gücü sayesinde ayanların önemli bir kısmı davete icabet etmiştir. Yapılan müzakereler sonucu "Sened-i İttifak" olarak isimlendirilen metin ortaya çıkmış (7 Ekim 1808), tarafların imzalanması ve mühürlenmesi ile meşverete son verilmiştir (Akyıldız, 2009: 512-514). Sultan Mahmud evvelemirde bunu imzada tereddüt ettiği ve Enderun ricalinden bazılarıyla keyfiyeti müzakere ettikten sonra "bilahare bunun fesih ve ilgasının daha isabetli olacağı" fikri ile bir dibace, yedi şart ve bir zeyilden ibaret olan Sened-i İttifak'ı Hattı Hümâyûn ile tasdik etmiştir[2].

Nitekim 2. Mahmud gücü merkezde toplama düşüncesini uygulamaya geçirmiş, 1814 yılından itibaren kademeli bir şekilde devletin buyruklarını yerine getirmeyen âyanları ortadan kaldırmayı başarmış, selefleri zamanında kötüye kullanılan yetki genişliğine son vererek merkeziyetçiliği kuvvetlendirmiştir (Eryılmaz, 2006: 64).

1.2. Vaka-i Hayriye ve Yunan Bağımsızlığı

2. Mahmud devrinin en önemli icraatlarından olan Yeniçeri Ocağı'nın kaldırılması, Osmanlı tarihinin önde gelen dönüm noktalarından birisini teşkil eder ve kaynaklarda genelde Vaka-i Hayriye tanımlamasıyla anılır. 2. Mahmud devletin idarî sisteminin Avrupa devletleri gibi merkeziyetçi bir seviyeye getirilmesini ve bütün devlet kurumlarının zamanın şartlarına uygun biçimde yeniden inşasını hayatta kalmanın bir zarureti olarak görüyordu. Bunun için her şeyden önce seleflerini ölüme götüren askeri sahada ıslahat yapmaktan başka yol yoktu ve böyle bir ıslahat için de Yeniçeri Ocağı'nın ilgası kaçınılmazdı.

1825 yılında Mora'da çıkan Yunan isyanını bastırmada başarısı görünen modern Mısır ordusunun gücü Padişahın Yeniçeri Ocağı'nı lağvetme iradesini güçlendirmiş (Ortaylı, 2014: 58), uygun fırsatı yakalayınca da keskin bir darbe ile 16 Haziran 1826 tarihinde Yeniçeri

[2] Daha detaylı bilgi için bkz. Özçelik, A. Selçuk (1959). Sened-î İttifak, *İstanbul Hukuk Mecmuası*, Cilt: 24 Sayı: 1-4. s.1-12. https://atif.sobiad.com/index.jsp?modul=pdf&ID=vZwt238Bjl36bKoOBCeX.

Ocağını bir daha dirilmemek üzere yok etmiştir. Bu hâdise tarihlere Vaka-i Hayriye (Hayırlı Olay) olarak geçmiştir[3]. Bu hayırlı olayın askeriyede meydana getirdiği zaaf, Asakir-i Mansure-i Muhammediye ile telafi edilmeye çalışılsa da bu dönemde Mora'da ortaya çıkan isyanın Yunan bağımsızlığına yol açması engellenememiştir.

Ordunun diğer kanadı olan eyalet askerleri ise varlığını bir süre daha devam ettirmiştir. Zira tımar sistemi hem askerî-idarî teşkilâtın ana unsuru hem de mîrî arazi sisteminin işleyişinin temel faktörüdür. Vaka-i Hayriye'yi müteakip Anadolu ve Rumeli'de bulunan 53 sancaktaki tımarlı sipahiler Asâkir-i Mansûreyi Muhammediyenin süvarisi haline getirilmiştir. Ancak Tanzimat döneminin getirdiği yeni malî uygulamalar, inzibat görevlisi haline gelen tımar sahiplerinin kendi bölgeleriyle alâkalarını zayıflatmış, bir kısım sipahinin vefatıyla tımarlar tasfiye olmuş, bir kısmı da yeni teşkil olunan jandarma birliklerine aktarılmış, yaşları müsait olanlar merkezde zâbit olarak yetiştirilmiştir. Bu şekilde tımar rejimi de tarihe karışmış, tımar topraklarıyla ilgili mahallî problemler ise Cumhuriyet dönemine miras olarak kalmıştır (İnalcık, 2012: 168-173).

1821 Yunan İsyanı, dâhili ve hârici sebeplerle ortaya çıkan, etkileri bakımından daha sonra yaşanacak isyan ve ayrılık hareketlerine öncülük eden bir hadisedir. İdari yapının işleyişinde yaşanan sıkıntılar, rüşvetin artması, vergilerin ağırlığı ve uzun süren harplerin ortaya çıkardığı zaaf, Rum İsyanı için elverişli bir ortam sağlamıştır. Ayrıca Rum ticaret burjuvazisinin gittikçe zenginleşmesi, 1789 Fransız İhtilâli'nin uyandırdığı milliyetçilik Avrupa'da olduğu kadar etnik çeşitliliğe sahip olan Osmanlı Devleti'nde ve bilhassa garı Müslim tebaa arasında da yayılmış ve 1804 yılında çıkan Sırp ayaklanması da bu isyanın çıkışına ortam hazırlamıştır. İsyan her ne kadar Eflak ve Buğdan'da başlamışsa da asıl Mora yarımadasında başarıya ulaşmıştır. Aslında, Osmanlıların geçmişteki başka ayaklanmada yaptığı gibi Yunan isyanını kolayca bastıramamasının sebebi büyük ölçüde isyancılara verilen uluslararası destekti.[4] Osmanlı Devleti bu dönemde isyanı bastırmada Mısır Valisi Mehmet Ali Paşadan destek almış, ancak Fransa, İngiltere ve Rusya isyana müdahalede bulunmuş, nihayet süreç Osmanlı-Rus Harbi (1828-1829) ile sonuçlanmış ve mağlup olan Osmanlı Devleti imzaladığı Edirne Antlaşması ile Yunanistan Devletinin kuruluşunu kabul etmek zorunda kalmıştır.

2. BÂB-I ÂLİ TERCÜME ODASI

Osmanlı Devleti ile Batılı devletler arasındaki ilişkilerde ihtiyaç duyulan tercüme hizmetlerini Divan-ı Hümayun Tercümanları sağlardı. Döneminde küresel bir güç olan ve 17. yüzyılın sonlarına kadar yaptığı tüm savaşlarda muzaffer olan Osmanlı Devleti bu sebepledir ki batılı ülkelerde mukim sefaretler açmaya gerek görmemiş, diplomatik münasebetleri ihtiyaç hâsıl oldukça yerine getirilecek bir vazife olarak görmüştür. Hatta l836'ya kadar harici işlerle görevli Amedi ve Beylikçi Odaları'nın bağlı olduğu Reis-ül Küttaplar divan üyesi bile olamamış ve erkân-ı devlet yerine rical-i devlet kategorisinden sayılmıştır (Bilim, 1990: 30).

Reis-ül Küttap riyasetinde yürütülen beynelmilel münasebetlerde tercüme hizmetleri için ilk başlarda Hıristiyan tebaa görevlendirilmiştir. Ancak 16. yüzyıl başlarından sonra Divan-ı

[3] Yeniçeri Ocağı'nın kaldırılmasını Rusların Strelitz Ordusu'nun ilgasından daha zor ve riskli gören Cevdet Paşa Strelitzleri Rusya'nın omuzunda kolayca kazınacak bir ura benzetirken, Yeniçeri Ocağını Devlet-i Aliye'nin kalbinde bir seretân (kanser) illetine benzetmiş ve ameliyatı cerrahiyenin zorluğuna dikkati çekmiştir. Bkz. Cevdet Paşa (1967). *Tezâkir*, Hazırlayan C. Baysun, 1-40-Tetimme, Ankara: Türk Tarih Kurumu.

[4] Bkz. Hanioğlu, M. Şükrü (2008). A Brief History of the Late Ottoman Empire. Princeton: *Princeton University Press,* pp. 69.

Hümayun Tercümanlığı mühtedilere verilmiş ve kendilerine maaş olarak tımar bağlanmıştır. Bu durum 16. yüzyıl ortalarına kadar sürmüş ve bu tarihten başlayarak Divan-ı Hümayuna yabancı dil bilen, Osmanlı Rumları alınmaya başlanmıştır (Bilim, 1990: 30). Bu durum Divan-ı Hümayun Tercümanlığına 17. yüzyıl ortalarından itibaren ileri gelen Fenerli Rum ailelerinden kimselerin atanması ile devam etmiştir. Ticaret, gemi taşımacılığı ve bankerlik gibi işlerle uğraşan bu aileler bir hayli zenginleşmiş ve Batılı devletlerle sürekli münasebet içinde bulunmuşlar, bu esnada dil becerisi kazanmışlardır (Bilim, 1990: 31; Balcı, 2006: 65).

Tercüman ihtiyacını karşılamada diğer devletlerin uygulamalarına bakıldığında Osmanlı Devletinden farklı bir yol izledikleri hemen dikkati çeker. Zira Batılı Devletlerin Osmanlılardan yaklaşık 300 yıl önce Tercüme Odasına benzer bir tercüman yetiştirme politikasını İstanbul'da hayata geçirdikleri görülmektedir. Mesela Venedik Cumhuriyeti kendi uyruğundan olan Türkçe tercümanlarını yetiştirmek için 1551'de İstanbul'daki elçiliğinin bünyesinde ilk *Dil Oğlanları* adıyla bir okul açmıştır. Bu örneği 1669 yılında Fransa, 1754 yılında Avusturya, 1766 yılında Polonya ve son olarak 1814 yılında İngiltere takip edecektir. Dil Oğlanları okullarının kurulmasının amacı, Osmanlı Devletinde görev yapacak tercüman ve diğer memurların Türkçe öğrenimini küçük yaşlardan itibaren devlet eliyle sağlamaktı. Böylece başka milletlerin tercümanlarına ihtiyaç duymadan ve tercüman ihanetlerini asgariye indirerek kendi tercümanlarını yetiştirmiş oluyorlardı (Ağıldere, 2010: 695).

Batılı ülkeler hayli erken dönemlerde Pay-i Tahtta sefaretler açmaya başlarken Osmanlı Devleti ise Avrupa'nın büyük başkentleriyle sınırlı olarak önce Londra'da (1793), daha sonra Paris, Berlin ve Viyana'da (1797) sefaretler yani büyükelçilikler açmıştır. Haliyle tercümanlık hizmetleri de önem kazanmaya başlamıştır. Özellikle Avrupa başkentlerine gönderilen Osmanlı elçilerinin o ülke dillerini bilmemesi sebebiyle yanlarında mutlaka Divan Tercümanlarından bir mütercim görevlendirilmeye başlanmıştır.

İlk zamanlar Osmanlı Devleti'nin diğer devletlere faikıyeti ve üstünlüğü sebebiyle Avrupalı devletlerin siyasetini ve düşünceleri öğrenmek hususunda fazla bir hassasiyeti olmamıştır. Dini birtakım gerekçelerle de desteklenen bu anlayış yanlış olarak Osmanlı bürokrasisindeki Müslümanların yabancı dil öğrenmemelerinin sebepleri içerisinde sayılmıştır.[5] Ancak üstünlük duygusunun kısmen de olsa İslâm dünyasının dışında olup bitenleri küçümsemek gibi bir zaafa yol açtığı da doğrudur. Yabancı dil bilen bürokrat azlığı sebebiyle tercümanlıklarda Osmanlı Devleti'nin Müslüman olmayan tebaası ve daha sonra da Hıristiyan Rumlar kullanılmıştır (Balcı, 2008: 79; Bilim, 1990: 42).

Divan-ı Hümayun'da gayrı Müslim tebaanın tercüman olarak kullanılması özellikle Fenerli Rumlar arasında büyük bir rekabet yaşanmasına yol açmıştır. Buna karşılık Devlet de seçici davranmış; özellikle devlete sadakat şartı yanında tahrirat ve yazışma hususunda maharet, Fransızca lisanına ve tercümesine vukufiyet gibi hususlara ilave olarak tercümanların sicili temiz ve ihanetten ari olmaları, memuriyetini ifada ihtimam ve dikkat ile hareket etmeleri, sadakat-ı fıtriye ve istikametleri de dikkate alınmıştır (Balcı, 2006: 67).

Ancak Devletin tercümanlarda aradığı şartların herhangi bir garantisi de bulunmamaktadır. Bu sebeple Osmanlı dış politikasının odak noktaları olan elçiliklerde Rum tercümanların önünde

[5] İslâm'ın ilk dönemlerinde Habeşistan, İran, Bizans, Mısır ve diğer devletlere yazılacak mektuplar için bizzat Hz. Muhammed'in (asm) emri üzerine kâtibi Zeyd b. Sabit İbranice ve Süryanice öğrenmişti. Hatta Zeyd'in Farsça, Yunanca, Kobtça ve Habeş dilini de bildiği kaydedilmektedir. Konuyla ilgili daha detaylı bilgi için bkz. Hamidullah, Muhammad (1980). *İslâm Peygamberi* 2.Cilt, Çev. Salih Tuğ, İrfan Yayınevi, 4. Baskı, s. 840.

fırsat pencereleri açılmış, nitekim Fenerli Rumlardan bazıları tercümanlık hizmetlerini yerine getirirken Devletin gizlilik gerektiren mahrem yazışmalarını diğer devletlere bildirerek casusluk yaptığı gibi, devletin parçalanması için çalışanlar bile çıkmıştır[6]. Günümüzde istihbaratın önemi ve ülkelerin istihbarata yaptıkları yatırımlar dikkate alındığında bu kadar hassas ve devletin bekası ile yakından ilgili bir diplomatik görevlerin ihanet ihtimali son derece yüksek olan gayrı Müslimlere verilebilmesi oldukça şaşırtıcıdır.

Osmanlı Devleti bidayette hükümranlığı altındaki gayrı Müslim unsurların siyasi, sosyal ve dini yapılarını muhafaza etmelerine izin vermekte bu beyliklerin başındaki voyvoda unvanlı yöneticileri, yerli aristokrat aileler arasından seçmekteydi. Ancak 18. yüzyılın başlarında yaşanan siyasi gelişmelere paralel olarak, Eflak ve Buğdan voyvodalarının Avrupalı devletlerle gizli işbirliği kurmaları sebebiyle, Eflak ve Buğdan'ın yönetimi için yerli voyvodalar yerine, İstanbul'un Fener semtinde oturan Rumlar arasından seçtikleri kişileri bu göreve getirmeye başlamıştır. Görevlendirilen Fenerli Rumlar aynı zamanda Avrupa Devletleri ile ilgili haberleri takip ve istihbarat toplama görevlerini de üstlenmişler, tercüme faaliyetleri yanında devletlerarası ilişkilerde önemli rolleri yerine getirmişlerdir (Çiftçi, 2010: 28).

Divan-ı Hümayun Tercümanları Batılı devletlerden gelen yazılarla resm-i kabul törenlerinde Padişah veya Sadrazama gönderilen mektupları tercüme eder, Reis-ül Küttab'ın yabancı elçilerle görüşmesinde tercümanlık yapar, yabancı ülkelere gönderilen Osmanlı sefaret heyetlerine katılarak toplantıların yazılı raporlarını tutar, anlaşmalarda tercümanlık eder, hâsılı Avrupalı Devletlere verilecek her türlü yazıyı kaleme alır, Osmanlı Devleti'nin uluslararası ilişkilerini takip gibi önemli görevler yapar ve bu esnada Devletin bütün sırlarına sahip olurlardı (Balcı, 2006: 72).

Osmanlı Devlet adamlarının güvenini kazanan bir çok Fenerli aile birkaç nesil boyunca Divan tercümanlığını tekeline almayı başarmıştı. Aldıkları eğitim neticesinde Türkçe ve Arapça 'nın yanı sıra birçok Avrupa lisanını öğrenen Fenerli Rumlar Osmanlı diplomasisi için vazgeçilmez unsurlar haline gelmiş ve yaklaşık 152 yıl boyunca Divan-ı Hümayun tercümanlığı görevini üstlenmişlerdi. Devletin dış ilişkilerinin düzenlenmesinde söz sahibi olan Sadrazam ve Reis-ül Küttaplara danışmanlık yapan Fenerli tercümanlar, giderek artan nüfuzları sayesinde etki alanlarını da genişletmişler ve Avrupa'da Osmanlı daimi elçiliklerinin kurulmasıyla birlikte sefaretlerde tercüman olarak da vazife üstlenmişlerdi (Aydın, 2007: 58).

Divan-ı Hümayun tercümanlığında istihdam edilen Fenerli Rum aileleri (İskerletzade, Yanakizade, Drakozade, Kalmakizade, İpsilantizade, Mihalzade ve Sarıbeyzade) imtiyazları, nüfuzları ve haliyle müreffeh hayatları ile dikkat çekmişlerdir (Özkul, 2009: 76). 18. Yüzyılın sonunda ve 19. Yüzyılın başlarında Osmanlı hâriciyesi tam anlamıyla Fenerli Rumların kuşatmasına maruz kalmış ve divan ve sefaret tercümanlıklarından, Eflak ve Bağdan voyvodalıklarına kadar Osmanlı dış siyasetinin belirleyici vasıtaları Rumların tekeline geçmişti. Rum Divan tercümanlarının merkezde belli ölçüde kontrol edilebilir olmalarına karşın sefaret tercümanlarının sahip oldukları hareket serbestisi, Osmanlı Devleti'ne telafisi imkansız

[6] Mesela Paris Büyükelçisi Moralı Seyit Ali Efendi'nin elçilik tercümanı Fenerli Rumlardan Godrica elçiliğe gelen tüm yazışmaları Fransa Başbakanına bildirdiği gibi, Napoleon Bonaparte'a Osmanlı Devleti'nin parçalanmasıyla ilgili bir proje dahi sunabilmiştir. Daha detaylı bilgi için bkz. Bilim, Cahit (1990). Tercüme Odası, *OTAM*, Sayı 1, s. 29-44. Ankara.

siyasi bedeller ödetmiştir[7]. Yunan isyanının yaşandığı 1821 yılına gelindiğinde, Rum tercüman ve voyvodaların Bâb-ı Âlî'ye yanlış bilgiler aktarmaları ve bazılarının bu ayaklanmayı desteklemeleri, Rum tercüman istihdamının arzettiği mahzurlu durumu çok acı bir şekilde ortaya koymuş, isyandaki rolü ve ihaneti sebebiyle tercüman Constantine Mourouzi'nin 16 Nisan 1821'de idam edilmesiyle Fener'li Rum tercümanlar dönemi sona ermiştir (Bilim, 1990: 34). Aynı yıl Bâb-ı Âli'de Tercüme Odası kurulmuş ve başına da Yahya Naci Efendi ile oğlu Ruhiddin Efendi getirilmiştir (Çiftçi, 2010: 43).

2. Mahmud'un devlet idaresinde yaptığı düzenlemeler arasında Reis-ül Küttaplığın Hâriciye Nazırlığına dönüştürülmesi önemli bir yer tutar. Bu dönemde Avrupa devletleriyle ilişkilerin önemi dolayısıyle Paris ve Londra'ya yeni hüyükelçiler atanması dil bilen eleman talebini arttırmış ve Tercüme Odası Hariciye Nezaretinin çok önemli bir şubesi haline gelmiştir (Bilim, 1990: 39). Bâb-ı Âli Tercüme Odası, Fatih Sultan Mehmed zamanında kurulan Divanı Hümayun Tercüme Odası'nın devamı niteliğinde olup artan uluslararası ilişkilere paralel olarak bir gelişme seyri izlemiş, Kırım Harbi münasebetiyle Fransızca yanında müfredata İngilizce de dâhil edilmiştir (Balcı, 2006: 99).

Tercüme Odası yaptığı faaliyetlerle adeta bir dil okulu halini almış, yabancı dil bilen Müslüman tebaa, uluslararası ilişkilerde ihtiyaç duyulan uzman bürokratlara dönüşmüştür. Ancak bu bürokratlar Avrupa'daki gelişmeleri takiple zaman içinde reformcu düşüncelerin giriş kapısı mahiyetini de almıştır. Nitekim daha sonra yapılacak reform hareketlerinde hep Tercüme Odasında yetişen bürokratların etkisi hissedilecektir. Bu güç sivrilmesi Tercüme Odasını bir kişinin kariyerine başlayabileceği "en iyi yer" haline getirecektir (Balcı, 2006: 106). Nitekim Avrupa'ya gönderilenler Tercüme Dairesi'nde yetişen bürokratlar arasından seçilecek, yurda döndüklerinde de kendilerini idari sistemde ayrıcalıklı konumlarda bulacaklardır (Kamay, 2012: 43-44).

Artan uluslararası ilişkiler evrak işlerini de arttırmış, buna bağlı olarak da Tercüme Odası'na bağlı Tahrîrât-ı Ecnebiyye Odası kurulmuştur (25 Mart 1856). Bâb-ı Âli paşaları dâhili ve harici siyasette Tercüme Odası bürokratlarının gücü üzerinden bazı tasarruflarda bulunmaya başlamışlardır. Nitekim Âlî Paşa'nın ileride kendisine rakip çıkma endişesi ile Tahrîrât-ı Ecnebiyye Odası'na Müslümanlar yerine Ermenileri doldurduğu iddia edilmiştir (Akyıldız, 2011: 505).

3. BÂB-I ÂLİ VE DEVLET İDARESİNİN YENİ ORTAKLARI

2. Mahmud, devletin idari yapısında esaslı değişikliklere imza atmıştır. Bunların içinde belki de en önemlisi Divan-ı Hümayun'un yerini Bâb-ı Âli'nin almasıdır. Sultan Mahmud mülkiye ve seyfiye sınıflarını ayırarak vali ve mutasarrıfları merkezden atanan maaşlı memurlara dönüştürürken ilmiye sınıfını da zayıflatmıştır. Keza yeniçeri ocağını kaldırdıktan sonra Bektaşi tekkelerini de kapatmış, idarede tarikatların gücünü kırmıştır. Divan-ı Hümayun'un yerini alan Bâb-ı Âli'de nezaretler teşkil etmiş, Kethüda Dâhiliye Nâzırı olurken, Reis-ül Küttaplık da Hariciye Nezaretine dönüştürülmüştür. Böylece merkez teşkilatında nezaretler veya bugünkü mânada bakanlıklar ortaya çıkmış, Divan-ı Hümayun yerini Bâb-ı Âli'ye terk etmiştir. Yeniçeri

[7] Avusturya ve Rusya'ya Osmanlı Devleti hakkında gizli bilgi sızdırdığı tespit edilen bazı voyvodalar idamdan kurtulmak için bilgi sızdırdıkları devletlere sığınmaktaydırlar Bkz. Çiftçi, Cafer (2010). Bâb-ı Âlî'nin Avrupa'ya Çevrilmiş İki Gözü: Eflak ve Buğdan'da Fenerli Voyvodalar (1711-1821), *Uluslararası İlişkiler*, Cilt 7, Sayı 26 s. 27-48.

Ocağı'nın kaldırılmasından sonra Devlet idaresi iki büyük aktörün rekabet alanına dönecektir (Hanioğlu, 2008: 59). Bu mücadele güçlü olan Padişah ve güçlenmeye başlayan Bâb-ı Âli bürokrasisi arasında geçecek ama zamanla güçler yer değiştirecektir.

Bâb-ı Âli bürokrasisini besleyen temel kaynak Tercüme Odası'dır. 2. Mahmut döneminde kurulan Tercüme Odası, Hâriciye Nâzırlığının yirmi kadar bölümünden en dikkat çekenidir. Zira Devlet-i Âliye'nin Batı ile olan münasebetleri bu kanaldan yürütülmektedir. Bu münasebetlerin diplomatik ciheti kadar sosyokültürel tarafları da bulunmaktadır. Adeta bir dil akademisi gibi çalışan Tercüme Odası, Osmanlı Devleti'nin Avrupa bilgisine açılan bir penceresi olmuş; burada çalışan gençler yaptıkları çeviriler aracılığıyla Avrupa bilgi ve düşüncesini benimsemiş ve 19. yüzyılın ikinci yarısından itibaren Osmanlı Devleti'nin kaderine hükmetmişlerdir. Bürokratik sisteme dâhil olanlara dil öğretmek işinin yanı sıra, yeni bir dünya görüşünün ve yeni bir siyasi idealin geliştiği çok ileri bir yere dönüşen Tercüme Odası, yenilik fikirlerinin ve iştiyakının kuvvetle hâkim olduğu, büyük memleket meselelerinin daima canlı şekilde var olduğu ve yaşandığı bir mekâna dönüşmüştür. Bu sebeple reformcu bürokrasinin okulu haline gelen Tercüme Odası, aynı zamanda memur adayları için önemli bir kariyer basamadığıdır (Koçak, 2010: 42).

Temellerini 2. Mahmud'un attığı fakat ilanına ömrü vefa etmediği Tanzimat Fermanı ile Devletin önünde yeni bir dönem açılmaktadır. Tanzimat geniş anlamda bir kültürel değişme olayıdır. Bir medeniyetin başka bir medeniyete, bir kültürden başka bir kültüre geçme isteğinin bir ifadesidir. Bu kültürel değişimin ideolojisi Avrupalılaşma, araçları ise bürokrasi ve ekonomidir (Eryılmaz, 2006: 129). Ancak bürokrasinin öne çıkmasını araçlıktan öte bir tarihi kırılma olarak kabul etme mecburiyeti vardır. Zira Devlet-i Âliye'nin kuruluşundan bu yana idarenin başında olan Enderun'dan yetişen mülkiye ve seyfiye sınıfının yerini ilk defa olarak kalemiye yani bürokratlar devralmaktadır. 3 Kasım 1839'da Hattı Hümayunu okuyan bürokrat grubun hükümet dönemi o gün başlayacak ve artık bürokratların sözü geçerli olacaktır. Osmanlı Devleti'nin modernleşme tarihinin bu çarpıcı döneminde Bâb-ı Âli bürokratları yönetime hâkimdir. Bâb-ı Âli egemenliği bürokrasinin modernleştiği, güçlendiği, dolayısıyla modern merkeziyetçiliğin kurulduğu bir dönemdir (Ortaylı, 2014: 101-103). Bu dönemde Saray yavaş yavaş geriye çekilecek, Bâb-ı Âli ise icra gücü olarak ileriye çıkacaktır.

Tanzimat devrinin devlet adamları veya devlet idaresinin bu yeni ortakları Tercüme Odası'nda yetişen, Avrupa başkentlerinde sefirlik yapan ve oradan da Bâb-ı Âli'ye yerleşen sivil bürokratlardan meydana gelmektedir. Vakıa, içlerinde Cevdet Paşa gibi ilmiye sınıfından geçiş yapanlar olsa da bunlar mahduttur. Klasik Osmanlı dönemindeki idareciler yerlerini sivil bürokratlara bırakmışlar, kalemiye sınıfından gelen yöneticiler yüksek makamları ele geçirmeye başlamışlardır. Vilayet idaresi de bu gelişmelere paralel olarak Bâb-ı Âli bürokrasisinden gelen valilere bırakılmıştır (Ortaylı, 2014: 124).

Fransız İhtilâlinin Avrupa'da ortaya çıkardığı yeni akım imparatorlukları sarstığı gibi milliyetleri de uyandırmıştı. Çok milletli ve çok dinli bir toplum yapısına sahip olan Osmanlı Devleti de Batı'dan esen bu rüzgârlardan etkilenmiş, öncelikle Avrupa devletleri ile yakın ticari münasebetlere girişen Hristiyan tebaa bu durumu fırsata çevirmiştir. Tanzimat Fermanı ile gayrı

Müslim ahaliye tanınan haklar bir ayrıcalığa dönüşmeye, Avrupalı devletler bu haklar üzerinden Osmanlı Devleti'ne baskı yapmaya ve müdahale etmeye başlamışlardır.[8]

Daha önce siyasi eğitim merkezinin Saray olduğu dönemlerde devlet adamları Enderun'da özel eğitimle yetiştirilirken 2. Mahmud'un Enderun'u kapatması bu geleneğe ağır bir darbe vurmuş, bu durum Tercüme Odası'nın yıldızını daha da parlatmıştır. Zira artık Tercüme Odası sadece tercüman yetiştiren bir okul olmanın ötesinde Osmanlı Devletinde modernleşme ve Batılılaşma hareketlerinin de giriş kapısı olacaktır. Reis-ül Küttap'lık 1836 yılında lağvedildikten sonra yerine kurulan Umuru Hariciye Nezareti'nin en parlak şubesi Tercüme Odası olacaktır. Bab-ı Ali'de kariyer elde etmek isteyen Müslümanlar arasında bir Avrupa dilini bilmek ayrıcalıklı bir konum elde etmenin en kestirme yolu olarak görüldüğü için bu dillerin öğrenildiği Tercüme Odası'na girmek bir ideal olmuştur (Balcı, 2008: 79).

Tanzimat döneminde genç insanları idari mesleklere hazırlayan en önemli mekân haline gelen bu odanın neredeyse tüm Yeni Osmanlıların kâtip olarak çalışıp devlet görevine ilk adımlarını attıkları yer olması, Osmanlı aydınının zihni şekillenmesini anlamamız açısından büyük bir öneme sahiptir. Osmanlı aydını Tercüme Odası'nda doğmuştur (Altınkaş, 2011: 40).

Tercüme Odası sadece dil değil, düşünce yapıları üzerinde de etkili olmuştur. Tanzimat sonrası gelişen fikir hayatında bu odanın etkileri görülmektedir. "Bâb-ı Âli'nin muhalefet fırkası" olarak nitelenen Tercüme Odası, artık Tanzimat Devri'nde Avrupalı bir düzen isteyen Jön Türkler veya yeni Osmanlıların yetiştiği, batılı fikirlerin alınmasına ve devrin elit grubunun yüksek mevkilere ve ikballere erişmesine imkân sağlayan bir tılsım kaynağı (Bilim, 1990: 42-43) ve Hâriciyenin, hatta bütün devlet teşkilatının en önemli ofislerinden biri ve geleceği parlak memurlar yetiştiren okuludur (Ortaylı, 2014: 272). Tanzimat aydını ise Tercüme Odası'nın yetiştirdiği alafranga bir tiptir. Batılılaşma Reformu'nda önemli rolü oynayan paşalardan birçoğu, başta Mustafa Reşit Paşa, Ali Paşa ve Fuat Paşa olmak üzere kalemiyeden yetişen paşalar idiler (Suzuki, 2013: 221).

Tercüme Odası gerçek değerine ve gücüne Tanzimat Devri'nde kavuştu. Yabancı dilin önem kazanmasıyla Tercüme Odası da cazibe merkezi olmaya başladı. Tanzimat elit grubunun pek çoğu buradan geçerek üst düzey makamlara eriştiler. Nitekim "Tercüme Odası'ndan geçmek fakir bir bakkalın oğlunu sadrazam yapar" sözü o dönemde kayıtlara geçmiştir. Çünkü meşhur Sadrazam Ali Paşa Mısır çarşısında baharatçılık yapan birinin oğludur. Tanzimat ileri gelenlerinden bir kısmı buradan yetişmiş, bir kısmı burada yabancı dil bilgilerini ilerletmiş bir kısmı burada çalışmış, hatta bazıları Tercüme Odası'nda öğretmenlik yapmışlardır[9].

---

[8] Tanzimat Fermanı'nın Osmanlı Devletinin siyasi, idari, iktisadi ve sosyal hayatına etkileri ile ilgili bkz. Eryılmaz, Bilal (2006). *Tanzimat ve Yönetimde Modernleşme*, İşaret Yayınları, İstanbul. Karasu, Cezmi (1993). Tanzimat Dönemi Osmanlı Diplomasisine Genel Bir Bakış. *OTAM* Ankara Üniversitesi Osmanlı Tarihi Araştırma Ve Uygulama Merkezi Dergisi, 4(4). https://doi.org/10.1501/OTAM_0000000333.

[9] Tercüme Odasında yetişen ricali Devlet arasında Sadrazamlıktan büyükelçiliğe kadar önemli vazifeler ifa eden Mehmed Emin Âlî Paşa (sadrazam), Keçecizâde Fuat Paşa (sadrazam), Safvet Paşa (sadrazam), Sârim Paşa (sadrazam), A. Vefik Paşa (sadrazam), M. Sadık Rıfat Paşa (hariciye nazırı), M. Namık Paşa (sefir), Mehmet Şekib (sefir), Sadullah Paşa (sefir) kişiler yanında Haydar Efendi, Agâh Efendi, Ziya Paşa, Namık Kemal, Mehmet Bey, Münif Mehmed Paşa, Fevzi Bey, Ethem Pertev Paşa ve Musâhibzâde Celâl gibi sanat, edebiyat ve üst bürokraside çalışmış kişiler de bulunmaktadır (Bilim, 1990: 40). Daha detaylı bilgi için bkz. Karaarslan, Uğurhan (1999).

Tercüme odasından yetişen sadrazam, hariciye nazırı, sefir gibi pek çok yönetici nazarı itibara alınacak olursa Odanın adeta bir diplomat okulu gibi çalıştığı, Avrupa ile Osmanlı Devleti arasında modern diplomasi uygulamalarını aktaran bir rolünün olduğu görülür (Karaarslan, 1999: 33). Tercüme Odası zaman içersinde üst bürokrasinin ana kulvarına dönüşecek, yabancı dil bilme, özelikle Fransızca Babı alide terfi etmenin temel şartına dönüşecektir. Terfi kulvarında yükselen bürokratların Tercüme Odasından geçmesi bu sebeple şaşırtıcı olmayacaktır.

Tanzimat Fermanının fikir babası sayılan Mustafa Reşid Paşa ile onun yetiştirdiği Mehmed Emin Ali Paşa ve Keçecizade Mehmed Fuad Paşa gibi bürokratlar Tanzimat Dönemi boyunca Saray karşısında Babıali'nin müessir güç olmasını sağlamışlardır (Karasu,1993: 207). Bu hususta özellikle İngiltere ve Fransa gibi devletlerin İstanbul'daki elçiliklerinden destek alan Bâb-ı Âli bürokratları neredeyse devlet idaresine bu ülkeleri ortak etmeyi bir zaruret gibi görmeye başlamışlardır. Devlet idaresinde Keçecizade Mehmed Fuad Paşa'nın "Bir devlette biri yukarıdan, diğeri aşağıdan gelen iki kuvvet olur. Bizde, yukarıdan gelen kuvvet cümlemizi ezerken, aşağıdan ise bir kuvvet gelmiyor. Bunun için biz de pabuççu muştası gibi yandan gelen sefaret güçlerini kullanıyoruz" demesi bu ilişkinin bir mecburiyet gibi algılandığını göstermektedir.[10]

Mustafa Reşid Paşa ve takipçileri ile ortaya çıkan yeni aydın tipin batılılaşma çabalarına karşı ilk ikaz da yine hariçten gelmiş, Avusturya Başbakanı Prens Metternich bu yeni Bâb-ı Âli'nin bürokratlarına Avrupaî usullerin devleti zayıf düşüreceğini, reformların milli örf ve adetlere ters düşmemesi gerektiğini tavsiye etmiştir (Eryılmaz, 2006: 133-137). Tercüme Odasını Osmanlı bünyesinde "intelijansiyanın döl yatağı" olarak gören Meriç (2002: 247), Tanzimat hareketini de "Bâb-ı Âli'nin Avrupalılaşması" olarak tavsif edecektir (Meriç, 1985: 106).

Devlet-i Âli'nin idaresinde söz sahibi olan ve Bâb-ı Âli'ye yerleşen bu yeni ortaklar, devletin varlığını devam ettirmesi için Batı kurum ve kanunlarını almanın zaruri olduğuna inanıyorlar, bu hususta ecnebi sefirlerden destek ve teşvik de görüyorlardı. Topluma dayanmayan ve padişaha da güvenmeyen Tanzimat mimarları, iktidarlarının güçlü dayanağı olarak İstanbul'daki yabancı elçilere dayanıyor, adeta bürokrasinin icraat programlarını yabancı ülke sefaretleri belirliyordu. Yabancı ülkelerin elçilerine dayanarak yönetimde yükselme ya da kariyer yapma usulü devletin itibarını da zedeliyordu. Bu gelişmelerin tabii bir neticesi olarak ülkenin en itibarlı topluluğu yabancılarla, gayrı Müslim tebaa olmuştu (Eryılmaz, 2006: 170-173).

4. BÂB-I ÂLİ'NİN İKTİDARI

Tanzimat ve Islahat fermanları ile Batı'ya verilen tavizler gayr-ı Müslim unsurları ayrıcalıklı bir konuma getirmiş ancak kamu otoritesi de büyük ölçüde merkezde toplanmıştı. Böylece Batılı devletlerin güttüğü tavaif-i mülûk siyaseti[11] dengelenmeye çalışılmıştı. Payitahtta

[11] Endülüs Emevî Devleti'nin parçalanması ile ortaya çıkan beylikler için kullanılan Tavaif-i Mülûk tabiri, Anadolu Selçuklu Devleti'nin yıkılmasından sonra kurulan beylikler için de kullanılmıştır. Konuyla ilgili daha detaylı bilgi için bkz. Tevhid, Ahmed (1326). Rum Selçûkî Devletinin İnkırazıyla Teşekkül Eden Tavâif-i Mülûk, *Türk Tarih Encümeni*

kurulan meclisler, daireler ve kurullar bu merkeziyetin karar organları idi. Bilumum dâhili ve hârici siyasetle birlikte mahalli işlerin ve meselelerin halli de merkezi idarenin kararlarına bağlıydı. Bu aşırı merkezileşmenin sonucu olarak işlerin gecikmesini netice veren bir bürokratik mekanizma ve bürokrasi ortaya çıkmış, merkezi idare karar yükü altında ezilmeye başlamıştır. Diğer yandan mahalli idareciler yerel kaynakları kullanarak problemleri çözmede başarılı olamamışlar, bunun sonucunda da vatandaş her şeyi devletten bekler hale gelmiştir (Eryılmaz, 2006: 179).

Merkezi idarede ise başka bir mücadele yaşanmaya başlamış, Tanzimat bürokratları Padişahı karar mercii olmaktan çıkararak tüm gücü Bâb-ı Âli'de toplamanın yollarını aramaya başlamışlardır. Askerin siyasete müdahalesinin verdiği zararlar ve Vaka-i Hayriye üzerinden çok zaman geçmeden Saraya karşı darbe plânları gündeme gelmeye başlamıştır. Bunun ilk işareti de tarihe Kuleli Vak'ası[12] olarak geçen hâdise olmuştur. Sultan Abdülmecid'in tahttan indirilmesi amacıyla plânlanan ve daha uygulanmaya konulamadan bastırılan bu suikast (Yılmaz, 2017: 523), daha sonraki tarihlerde ortaya çıkan Yeni Osmanlılar ve Jön Türkler hareketine ilham kaynağı olacaktır.

İkinci bir darbe girişimi İttifak-ı Hamiyyet grubundan gelmiş,[13] Osmanlı toplumu siyasal gruplaşmalar dönemine girmiştir. 19. yüzyıl başından itibaren Osmanlı Devleti'nde reform asrı diyebileceğimiz dönem yerini artık inkılap asrına devretmeye başlamıştır (Ortaylı, 2014: 300-303).

Sultan Abdülaziz'e karşı yürütülen ihtilâl hareketinin başını Erkân-ı Hal, Erkân-ı Erbaa veya Erkân-ı Müttefika gibi isimlerle tesmiye edilen sadrazam Mütercim Rüştü, Serasker Hüseyin Avni, Şûrayı Devlet reisi Mithat Paşa ve Şeyh-ül İslâm Hasan Hayrullah Efendi çekmektedir. Bunlar içerisinde meşruti idareye inanan ve daha sonra Abdülhamid'le saltanat karşılığı Kanun-u Esasi pazarlığı yapan Mithat Paşa öne çıkacaktır (Uzunçarşılı 2000: 123). Sultan Abdülaziz ise üst düzey memuriyetlere atamak zorunda kaldığı bu dörtlüden kurtulmanın yollarını aramaktadır. Fakat güç dengeleri Saray aleyhine geliştiği için çok fazla şansı ve imkânı yoktur. Sultan Abdülaziz'in tahtan indirilmesi ile sonuçlanan vükela darbesi Devlet-i Âliye'de ciddi sarsıntıların yaşanmasına yol açmış, darbenin ardından çok mühim hadiseler yaşanmıştır. Sultan Abdülaziz tahtan indirilişinin üzerinden bir hafta geçmeden bir su-i kasta kurban gitmiş, padişahın tahtan indirilmesinde başrolü oynayan Serasker Hüseyin Avni Paşa, Çerkez Hasan tarafından vurularak öldürülmüş, Sultan Abdülaziz'in yerine tahta çıkarılan Sultan 5. Murad'ın ruh sağlığı bozulmuş ve o gerekçeyle de tahtan indirilmiştir. 5. Murat'ın yaklaşık üç ay süren saltanatının ardından Mithat Paşa'nın yaptığı teklifleri kabul eden veliaht Abdülhamid Efendi

padişah olmuştur (Yaşaroğlu, 2016: 197-216). Dikkat edilirse saltanat değişimi Saray'ın kendi şart ve gelenekleri ile değil, Bâb-ı Âli bürokratlarının tensibi veya darbesi ile olmaktadır.

2. Abdülhamid'in ilk dönemlerinde Bâb-ı Âli'nin Saray'a üstünlüğü devam etmiştir. Nitekim 1876 yılında Kanun-u Esasi kabul edilmiş, meşruti idareye geçilmiş, ülkede ilk defa seçimler yapılarak Meclis açılmıştır. Ancak Padişah gücünü toplayınca Meclis-i Meb'usan'ı feshederek ülkeyi Yıldız sarayından idare etmeye başlamıştır. Bu dönemde Bâb-ı Âli tekrar Saray'ın kontrolü altına girmiş, muhalifler ise yurtdışına kaçarak orada örgütlenmişler ve muhalefetlerini orada sürdürmüşlerdir. Bu durum 1908'de 2. Meşrutiyetin ilanına kadar sürecektir. Meş'um 311 Mart Vak'ası ile 2. Abdülhamid hal edilecek, saltanatın gücü sembolik hale getirilecek ve Bâb-ı Âli bu sefer kesin olarak iktidarı ele alacak ve Osmanlı Devleti'nin tarihe karışması da Bâb-ı Âli'deki İttihatçı paşalarının eliyle olacaktır. 31 Mart darbesi ile İttihatçılar daha sonraki darbelere ilham kaynağı olacak "irtica" ithamıyla hem muhalefetten hem de 2. Abdülhamid'den kurtulmuşlardır.[14]

Tercüme Odası ile başlayan asrileşme veya muasırlaşma hareketi 2. Meşrutiyet döneminde hız kazanmış, hatta kendilerine Garpçılar adını veren bir grup ortaya çıkmıştır ki bu grup materyalizm ve pozitivizm gibi Batı'daki akımları savunmuş, toplumun dini, ahlaki değerlerini yererek topyekûn Batılılaşma dışında bir kurtuluş çaresinin bulunmadığını iddia etmişlerdir.[15] Cumhuriyet'in resmî ideolojisinde kendini gösteren "çağdaş uygarlık" hedefi bu anlayışın devamı olarak sayılabilir.

SONUÇ

Türk devlet töre ve geleneği içinde şekillenen Osmanlı Devleti uzunca sayılacak bir ömür ve tabii sınırlarına ulaşıncaya kadar olan genişleme ve büyümenin ardından dünyada yaşanan değişimler ve yeni güçlerin rekabeti karşısında önce duraklama, daha sonra da gerileme dönemine girmiştir. Fransız İhtilali'nin uyandırdığı milliyetçilik akımı, çok milletli ve çok dinli bir yapıya sahip olan Osmanlı Devleti'nde ciddi sarsıntılar doğurmuş, bunun ilk emareleri de hâriciyede istihdam edilen Fenerli Rumların ecnebilere casusluk yapmasıyla ortaya çıkmıştır. Yunan bağımsızlığına yol açan bu harekete karşı Devlet, Rumları hariciye bürokrasisinden çıkarmış, bunun yerine uluslararası ilişkilerde ortaya çıkan ihtiyacı karşılamak üzere Bâb-ı Âli Tercüme Odası'nı kurmuştur.

Tercüme Odası, sadece uluslararası ilişkilerde yabancı dille yazılan belgelerin Türkçe'ye tercüme edildiği bir büro değildir. Bâb-ı Âli Tercüme Odası, uluslararası ilişkilerin arttığı, çeşitlendiği ve hızlandığı bir dönemde milli menfaatleri savunacak güçlü bir Hâriciye bürokrasisinin tesis edildiği kurumsal yapının adıdır. Bu yapı Tanzimat sonrası yaşanan köklü değişimlere öncülük edecek, kamu kurumlarının modernleştirilmesinde öncü rol oynayacak, Devlet idaresinde o günlere kadar birinci derecede sorumluluk üstlenen mülkiye ve seyfiye sınıfının yerini alacak ve nihayet Meşrutiyetle birlikte Bâb-ı Âli'yi Saray idaresinin ve Padişahın önüne geçirecektir.

Tercüme Odası'nda yetişen ve sefaretle Batılı devletlerin başkentlerinde sefir olarak görev yapan bürokratlar Batıdaki siyasi ve sosyo-kültürel akımların etkisiyle Osmanlı Devleti'ni

[14] Rûmî takvimle 31 Mart 1325'te (13 Nisan 1909) vuku bulduğu için bu adla anılan ve 2. Abdülhamid'in tahttan indirilmesiyle sonuçlanan askerî isyana verilen ad. Konuyla ilgili daha detaylı bilgi için bkz. Özcan, A. (2007). *Otuzbir Mart Vak'ası*, TDV İslâm Ansiklopedisi, 34. Cilt, s. 9-11.

ayakta tutmanın yolunun Batı kurum ve kanunlarını almaktan geçtiği kanaatine varacaklar ve Devleti dönüştürmenin yolunu da zor olan iktisadi ve teknolojik dönüşüm yerine daha kolay olan darbecilikte arayacaklardır.

Osmanlı Devleti'nin son dönemlerinde ortaya çıkan siyasi akımlar o dönemle sınırlı kalmayacak Türkiye Cumhuriyeti'nin kuruluş felsefesinde de etkisini devam ettirecektir. Bu arada yabancı dil ayrıcalığı ile öne çıkan Tercüme Odası da tenasühle Cumhuriyet içinde bazı üniversitelerin eğitim dili olarak imtiyazlarını ve varlığını devam ettirecektir.

PELOPONNESOS SAVAŞI ESNASINDA PERİKLES'İN STRATEJİSİNİN ASKERİ AÇIDAN ANALİZİ

Doç. Dr. Olcay Turan

Kırklareli Üniversitesi Fen-Edebiyat Fak. Tarih Böl,

olcayturan@yahoo.com - ORCID ID: 0000-0002-8093-9143

ÖZET

Hellas'ın en önemli iki siyasi yapısı olan Atina ve Sparta arasındaki ilişkiler zaman içerisinde bozulmuş ve nihayetinde MÖ 431 tarihine gelindiğinde adı geçen polisler ve müttefikleri arasında Peloponnesos Savaşı başlamıştır. Peloponnesos Savaşı hakkındaki en önemli kaynak olan Thukydides, savaş arifesinde Atina'daki en önemli siyasi figür olan Perikles'in uygulanmasını salık verdiği strateji konusunda bilgiler aktarmıştır. Perikles'in uygulanmasını arzu ettiği strateji hakkında görüş beyan eden antik ve modern dönem araştırmacılarının ezici bir çoğunluğu söz konusu planı başarının anahtarı olarak görmüşlerdir. Genel manada strateji, askeri vasıtaların politik hedefler doğrultusunda dağıtılması ve tatbik edilmesi sanatıdır. Strateji oluşturulurken koşulların devamlı olarak değiştiği dikkate alınmalı ve bu bağlamda dogmatik olmak yerine devamlı olarak revize edilebilecek esneklikte olması gerekir. Perikles'in uygulanmasını arzu ettiği strateji ise ifade edilen kriterler dikkate alındığında başarılı bir plan olmadığı görülmektedir. Zira Perikles, Atina'nın savaş öncesinde elde ettiği başarılardan ötürü haddinden fazla özgüvene sahipken, düşmanın gücünü ise küçümsemiştir. Perikles'in öngörüsünün tersine Sparta zaman içerisinde özellikle de Pers yardımı bağlamında donanmasını Atina ile rekabet edebilecek bir konuma getirirken, Atina donanması ise kendine yüklenen ödevleri yerine getirememiştir. Zira dönem gemilerinin sahip olduğu imkân ve kabiliyetlere ek olarak donanmanın getirmiş olduğu maddi külfet Perikles'in amaçladığı ablukayı gerçekleştirebilecek yeterlilikten yoksun oldukları görülmektedir. Perikles, Attika-Delos Deniz Birliğine dâhil olan polislere iyi muamele edilmesi gerektiğini belirtmişse de bu politika çok da başarılı olmamış ve sonuç olarak Birliğe dâhil olan siyasi yapılar arasında mücadeleye devam edecek hedef birlikteliği sağlanamamıştır. Son olarak Perikles, saldırıdan ziyade savunmaya ağırlık vermiştir ki bu da beraberinde başarısızlığı getirmiştir.

Anahtar Kelimeler: Perikles, Atina, Sparta, Peloponnesos Savaşı.

AN ANALYSIS OF PERICLES' STRATEGY DURING THE PELOPONNESIAN WAR FROM A MILITARY PERSPECTIVE

ABSTRACT

Relations between Athens and Sparta, the two most important political structures in Hellas, deteriorated over time, and finally, in 431 BC, the Peloponnesian War broke out between these city-states and their allies. Thucydides, the most important source on the Peloponnesian War, provided information on the strategy recommended by Pericles, the most important political figüre in Athens on the eve of the war. The overwhelming majority of ancient and modern researchers who expressed their views on the strategy Pericles wished to implement saw this plan as the key to success. In general terms, strategy is the art of deploying and applying military means to achieve political objectives. When formulating strategy, it is important to consider that conditions are constantly changing and, in this context, strategy should be flexible enough to be continuously revised rather than dogmatic. Considering the criteria mentioned, the strategy Pericles wished to implement does not appear to have been a successful plan. This is because Pericles was overly confident due to Athens' successes prior to the war, while underestimating the strength of the enemy. Contrary to Pericles' foresight, Sparta, particularly with Persian assistance, built up its navy to a position where it could compete with Athens, while the Athenian navy failded to fulfill the task assigned to it. This was because, in addition to the capabilities and limitation of the ships of the period, the financial burden of the fleet meant that they lacked the capacity to carry out the blockade Pericles had intended. Although Pericles stated that the polis included in the Delian League should be treated well, this policy was not very successful, and as a result, the desired unity among the political structures included in the Delian League could not be achieved, and the struggle continued. Finally, Pericles focused more on defense than attack, which also led to failure.

Keywords: Pericles, Athens, Sparta, Peloponnesian War.

1. GİRİŞ

Genel anlamıyla strateji siyasi hedeflere ulaşmak gayesiyle her tür askeri vasıtanın etkili bir şekilde kullanılmasıdır (Freedman, 2013: 30). Tarihteki en önemli askeri taktisyenlerinden biri olan Clausewitz ise stratejiyi "*muharebelerin savaşın amacı için kullanılması*" şeklinde tanımlamıştır (Von Clausewitz, 1999: 177). Basil Liddell Hart ise stratejinin "*askeri vasıtaların siyasetin hedefleri doğrultusunda dağıtılması ve uygulaması sanatı*" olarak tanımlamıştır (Hart, 1967: 335). Grimsley ve Murray'ye göre ise strateji, "şans ve belirsizliğin egemen olduğu dünyadaki sürekli değişim halinde olan koşullara devamlı olarak uyum içeren bir süreç" olduğunu ifade etmişlerdir (Murray- Grimsley, 1994: 1).

MÖ 431-404 yılları arasında meydana gelen Peloponnesos Savaşı Hellen tarihinin en önemli savaşlarından biri olması yanında etkileri Hellen dünyasının sınırlarını aşmış

olmasından ötürü savaşın sebepleri, gelişim seyri ve etkileri araştırmacılar tarafından defaaetle ele alınmıştır. Klasik Dönem Hellen Tarihinin en önemli iki *polis*i olan Sparta ve Atina Pers tehlikesine karşı bir araya gelmişlerse de özellikle MÖ V. yüzyılın ortalarına doğru ilişkileri gerilmeye başlamıştır. MÖ 445 yılında Atina ve Sparta barış anlaşması yapılmışlarsa da MÖ 430'larda meydana gelen hadiselerle ilintili olarak varlığını uzun süre devam ettirememiştir (Thuk. I. 115; Plut. *Perik*. 21-23; Paus. V. 23. 4). Peloponnesos Savaşı arifesinde Atina ve Sparta liderliğinde iki rakip hizbe ayrılmış olan Hellas'da savaş kaçınılmaz bir hal almıştır. Tarih boyunca pek çok savaşta olduğu gibi Peloponnesos Savaşı'nın da nedenleri oldukça girift bir yapı arz etmekteyse de Thukydides, savaşın temel nedeninin bahsi mevzu olan iki rakip gücün birbirlerinin müttefikleri ile ilişkiye girme yetkileri hakkındaki anlaşmazlıktan kaynaklandığını ileri sürmüştür (Thuk. I. 49-50, 67-71, 73-75; Kagan, 2004: 45; Buckley, 1996: 319-322). Bununla beraber tarihteki tüm savaşlarda olduğu gibi mücadele emperyalist tutkular ve rakiplerin birbirlerine karşı güvensizliklerinden ötürü başlamıştır (Thuk. I. 88).

2. PELOPONNESOS SAVAŞI'NDA PERİKLES'İN STRATEJİSİ

Peloponnesos Savaşı öncesinde Thukydides, Perikles'in Atina'ya dikte ettiği strateji konusunda önemli bilgiler aktarmıştır (Thuk. I. 141-144, II. 65). Perikles, stratejisini temellendirirken ilk olarak düşmanının sahip olduğu imkân ve olanaklarından bahsetmiştir. Onun iddiasına göre Sparta'nın liderliğindeki Peloponnesos Birliği, Atina'nın sahip olduğu güçle boy ölçüşebilecek düzeyde değildir. Perikles, söz konusu iddiasını temellendirirken Sparta'nın primitif bir ekonomik yapıda olduğunu dolayısıyla da uzun soluklu bir mücadeleyi sürdürecek mali kaynaklara sahip olmadığını iddia etmiştir. Bu duruma ek olarak Sparta'nın donanma geleneğine sahip olmadığını ayrıca savaşın başlamasıyla birlikte de Atina'ya rakip olabilecek bir deniz gücü oluşturması ve bu kuvveti istihdam etmesinin mümkün olmadığını ileri sürmüştür. Perikles, bahis edilen önermelerine ek olarak Peloponnesos Birliği'nin Attika-Delos ile karşılaştırıldığında daha ilkel bir organizasyon yapısına sahne olduğuna ve bu bağlamda da karar alma süreçlerinin yavaş ve etkisiz olduğunu ifade etmiştir. Perikles, Sparta ve müttefiklerinin güçleri hakkında bilgi vermesi sonrasında Atina ve bağlaşıklarının kuvvetinden bahsetmiştir. Ona göre Atina özellikle Perslere karşı yürütülen mücadele esnasında Hellas'ın en önemli deniz gücü haline gelmiştir ve bu nedenle Atina'nın donanma temelli bir savaş strateji uygulaması gerektiğini salık vermiştir. Perikles, özellikle tezini haklı çıkarmak için denizle iştigal olan toplulukların sahip olduğu üstünlükleri fazlaca abartmıştır. Perikles, Hellas'ın en güçlü ordusuna sahip olan Sparta ile doğrudan çatışmaya girmek yerine dönemin şartlarıyla bağlantılı olarak ele geçirilmesi imkânsız olan tahkim edilmiş Atina surlarının gerisinde savunmada kalınması gerektiğini ifade etmiştir. Perikles olası Sparta saldırısı karşısında savunulmada kalınması gerektiğini ileri sürerken, aynı zamanda donanma gücünü kullanmak suretiyle Peloponnesos'un ablukaya alınması gerektiğini ifade etmiştir. Tüm bunlara ek olarak Perikles, Atina^nın yeni bölgeler ele geçirmek suretiyle gücünü yaymaması gerektiğini, ek olarak Attika-Delos'a dâhil olan *polis*lere karşı müsamahalı davranılması gerektiğini belirtmiştir (Thuk. I. 141-144; II. 13, 65).

Peloponnesos Savaşı hakkındaki en önemli kaynak olan Thukydides, Atina'nın Perikles'in uygulanmasını arzu ettiği stratejiyi terk etmesi sonrasında savaşı kaybettiğini belirtmiştir (Thuk. II. 65). Thuydides'e ek olarak konu hakkında görüş beyan eden pek çok

modern dönem araştırmacısı da Perikles'in stratejisinin başarılı bir plan olduğunu ileri sürmüşlerdir (Bury, 1956: 400-401; Hammond, 1986: 348; Bettalli, 2017: 131; Mansel, 2004: 320-321; Martin, 2014: 257-260; Cawkwell, 2006: 40-55; Kagan, 1996: 7-42). Thuydides ve günümüz araştırmacılarını ezici bir çoğunluğu Perikles'in başarıyı beraberinde getirmesi olası bir plan geliştirdiğini iddia etmişlerse de özellikle askeri açıdan başarılı bir plan olmadığı kanısındayız. Peloponnesos Svaşı'nın ilk evresinde Atina bir takım başarılar elde etmişse de taktik alanda elde edilen başarılar büyük resmi değiştirmemiş ve netice olarak Atina savaşı kaybetmiştir. Söz konusu çalışmada Perikles'in stratejisi askeri açıdan tenkit edilecektir.

3. PERİKLES'İN STRATEJİSİNİN ASKERİ AÇIDAN DEĞERLENDİRİLMESİ

Perikles'in stratejisi hakkında en önemli kaynak olan Thukydides'in eseri incelendiğinde yazarın Perikles'e olan hayranlığını gizlemediği açıkça görülmektedir. Zira Thukydides, Peloponnesos Savaşı öncesinde gerçekleşen hadiseler hakkında bilgi verirken Perikles'in askeri alanda elde ettiği başarıları abartılı bir şekilde aktarmıştır. Örneğin Perikles'in Sikyonlar (Thuk. I. 111), Euboia (Thuk. I. 114; Plut. *Perik*. 22. 2-4, 23. 4; Azoulay, 2010: 57-58) ve Samos'a (Thuk. I. 115-117; Foster, 2010: 124-125) karşı gerçekleştirdiği seferlerde elde ettiği başarıları dahi bir komutanın başarıları olarak göstermiştir. Bahsi geçen hadiselere ek olarak Perikles'in Halk Meclisinde yaptığı konuşma öncesinde okuyucuya Salamis Savaşı ve bu savaş esnasında Atina'nın lideri olan Themistokles'i hatırlatmak suretiyle Perikles'i mükemmel bir lider olarak lanse etmeye çalışmıştır (Thuk. I. 135-138).

Perikles'in uygulanmasını salık vermiş olduğu stratejinin en kırılgan noktalarından biri Sparta ve müttefiklerine karşı girilecek mücadeleye Perslerin dâhil olmayacağı yönündeki yanılgıdır. Devrin en büyük siyasi yapısı olan Persler, MÖ 450 yılından itibaren kısa süre içerisinde Doğu Akdeniz sahil şeridine ek olarak Batı Anadolu kıyılarını ele geçirmişlerdir (Hdt. I. 80-91, III. 10-16, V. 1-22; Briant, 2006: 35-37). Persler, MÖ 547-545 yılları arasında Batı Anadolu'da bulunan *polis*leri ele geçirmişler ve I. Darius'un İskit Seferine kadar geçen zamanda Hellenler ve Persler arasında ciddi bir çatışma meydana gelmemiştir (Hdt. IV. 87-89; Fol-Hammond, 2008: 238). Bununla beraber MÖ 499 tarihinde patlak veren Ion İsyanı (Hdt. V. 35, 97, 99; Murray, 2008: 480-490; Martin, 2014: 99-100) ile birlikte çatışmazlık durumu son bulmuş ve Hellas'da yer alan *polis*lerden bir kısmının da isyana destek vermesi sonrasında Persler ve Hellenler arasında ortaya çıkan çatışmanın sahası daha da genişlemiştir (Hdt. VI. 94-95; Souza, 2012: 25-27). Kserkses, yenilginin öcünü almak ve Hellas'ı Pers egemenliğine sokmak amacıyla MÖ 480 tarihinde Hellas'a karşı geniş ölçekli bir askeri operasyon gerçekleştirmişse de MÖ 480 tarihinde Salamis ve MÖ 479 yılında Mykale ve Plataia'da yaşanan yenilgiler sonrasında savaş Hellas özelinde nihayete ermiş olmasına karşın mücadele bir süre daha devam etmiştir. MÖ 449 yılında imzalanan Kallias Barışı ile birlikte Persler ve Hellenler arasında cereyan eden çatışmalar nihayete ermiştir (Hdt. IX. 106; Thuk. I. 94, 100; Diod. IX. 10; Mattingly, 1965: 273-281). Bununla beraber MÖ 424 tarihinde II. Darius'un iktidara gelmesiyle birlikte Persler tekrardan Hellas'da meydana gelen hadiselere müdahale etmeye başlamışlardır. II. Darius, Sicilya Seferinin başarısızlıkla nihayete ermesi sonrasında Atina'nın zayıflamasının fırsat görerek, Kallias Anlaşması'nı görmezden gelmek suretiyle MÖ 413'de Daskyleion Satrabı Pharnabazos ve Ionia-Sardeis Satrabı Tissaphernes'e Batı

Anadolu'da yer alan Hellen *polis*lerinden vergi alınmasını emretmiştir. Atina'nın bu durumu protesto etmesi ve Alkibiades'in faaliyetleriyle bağlantılı olarak II. Darius, Genç Kyros vasıtasıyla Sparta ile ilişki kurmak suretiyle mali yardımda bulunmaya başlamıştır (Thuk. II. 65; VIII.58; Andrewes, 2008: 464-470). Sonuç olarak Sparta ve müttefikleri Perslerden gelen ekonomik yardım vasıtasıyla Atina'nın deniz egemenliğine son verebilecek güçte bir deniz gücü yaratmaya muvaffak olabilmişler ve bu bağlamda MÖ 405 yılında meydana gelen Aigospotamoi deniz savaşı sonrasında Peloponnesos savaşının kaderi belli olmuştur (Ksen. *Ellen*. II. 1. 23-32; Diod. XIII. 106. 1). Bahsi geçen gelişmelerden de anlaşılacağı üzere Perikles iki konuda hatalı bir bakış açısı ortaya koymuştur. İlk olarak dönemin en önemli siyasi yapısı olan Perslerin Hellas'daki yaşanan gelişmelere müdahil olmayacağını zannına kapılmıştır. İkincisi ise Sparta ve bağlaşıklarının Atina donanmasına denk bir güç oluşturamayacağına kanaat getirmiştir. Gerçekte ise bu iki durumun tersi gelişmeler yaşanmış ve Persler mücadeleye dâhil olmuş ve sağladıkları destek vasıtasıyla Peloponnesos Birliği Atina'ya denk hatta onu yenilgiye uğratacak güçte bir deniz gücü oluşturmuşlardır (Thuk. I. 142).

Perikles'in bir diğer yanılgısı ise Attika-Delos'a dâhil olan *polis*lerin müdaleye azami destek sağlayacağına olan inancından kaynaklanmaktadır. Perslerin Hellas'a karşı düzenlediği sefer sırasında Sparta ve Atina liderliğindeki Hellen dünyası gönülsüzde olsa istila tehlikesine karşı bir araya gelmek zorunda kalmışlardır. Hellas'da elde edilen galibiyetler sonrasında Perslere karşı yürütülen mücadelede bir süre için Sparta liderliği üstlenmiş fakat başarısız bir sınav vermiş ve takip eden sürede Atina Hellenlerin lideri haline gelmiştir (Thuk. I. 95). Atinalı Aristides'in gayretleri neticesinde Hellen Dünyasına dâhil olan *polis*leri Pers boyunduruğunda kurtarmak gayesiyle MÖ 478/477 yıllarında Attika-Delos Deniz Birliği kurulmuştur (Aristot. *Ath. Pol.* 23. 5; Thuk. V. 18; Plut. *Arist.* 24; Rostovtzeff, 1989: 296). Söz konusu oluşum kuruluşunu takiben Perslere karşı bir takım başarılar kazanmışsa da MÖ 454'de Mısır'da meydana gelen mağlubiyet sonrası Delos'daki hazinenin Atina'ya taşınması bir dönüm noktası olmuş ve Attika-Delos zamanla Atina'nın siyasi emellerine hizmet eden bir yapıya dönüşmüştür (Plut. *Perik.* 12; Thuk. I. 104, 109; Rhodes, 2008: 51). Perikles, Perslere karşı yürütülen mücadelenin Atina'nın siyasi, askeri ve ekonomik yapısına zarar verdiğini, kazançların kayıpları karşılamadığını fark etmiş ve bu durumun bir yansıması olarak MÖ 449'da Kallias Barışı imzalanmıştır (Hdt. VII. 151; Diod. XII. 4; Plut. *Kim*. 13; Lewis, 2008: 121-127). Kuruluşunu takiben Atina'nın uyguladığı politikalar bağlamında zaman içerisinde Attika-Delos'a dâhil olan *polis*ler Atina'nın uyrukları haline gelmiştir (Thuk. I. 99; Martin, 2016: 135-136; Azoulay, 2010: 7. Mansel, 2004: 309). Atina'nın uyguladığı despotik yönetim tarzının yansıması olarak zaman içerisinde Birliğe dâhil olan *polis*lerden itirazlar yükselmeye başlamışsa da zaman zaman meydana gelen isyanlar şiddet kullanılarak bastırılmıştır (Thuk. I. 100-101; Kagan, 1989: 47, 77-78; Thuk. I. 115-117; Plut. *Perik*. 25-26; Kagan, 1989: 170-177). Bahsi geçen durumlara ek olarak Peloponnesos Savaşı öncesinde ve esnasında da Atina yönetimine karşı isyanlar devam etmiştir (Thuk. I. 56-68, 139-145, II. 65, III. 2-49, VIII. 95; Kagan, 1989: 283; Kagan, 2004: 100-105. Kagan, 1996: 124-146.). Bahsi geçen durumlara ek olarak Attika-Delos'a bağlı olan kentler mücadele esnasında Atina'ya beklenen desteği vermemesine ek olarak Sparta'nın gerçekleştirdiği saldırılar esnasında kolayca taraf değiştirmişlerdir (Thuk. IV. 73, 106, 103; V. 10. Kagan, 1996: 320-324). Her ne kadar Perikles, Atinalılara uyruklarına karşı iyi muamelede bulunmalarını öğütlemişse de bizzat onun

eylemlerinin bir yansıması olarak Attika-Delos'a üye olan *polis*ler içerisinde Atina yönetimine karşı günden güne artan bir hoşnutsuzluk ortaya çıkmıştır. Bu durumun sonucu olarak Birliğe dâhil olan *polis*ler asla Atina'nın beklediği oranda destek sağlamışlardır. Bu duruma tezat olarak Sparta ve müttefikleri ise tam bir eşgüdüm içerisinde savaşı sürdürmüşlerdir (Thuk. II. 75; Ksen. *Ellen*. III. 5. 7, IV. 2. 19, V. 7, V. 1. 33, VII. 2. 3; Larsen, 1933: 257-276). Bahsi geçen durumlara ek olarak Atina, Attika-Delos'u ayakta tutabilmek isyanları ve ortaya çıkması olası kalkışmaları bastırmak için kuvvet ayırmak zorunda kalmıştır ki bu durum kuvvetlerini bir araya getirerek sıklet merkezi oluşturmasını da engellemiştir. Konu bu açıdan ele alındığında Birlik Atina açısında faydadan çok zarara sebebiyet vermiştir (Thuk. II. 13).

Perikles'in stratejisinin temelinde düşmanı yenilgiye uğratmak için deniz gücünden istifade etmek olduğu görülmektedir. Atina, Themistokles'in gayretleri neticesinde Pers savaşları öncesinde Hellas'ın en güçlü donanmasını oluşturmuş ve bu gücü kullanmak vasıtasıyla Hellas'ın Pers egemenliğine girmesini önlemiştir. Takip eden süreçte öz kaynaklarına ek olarak Attika-Delos'un sağladığı iktisadi kaynakları da kullanmak suretiyle donanmasını finanse edebilmiş ve söz konusu gücü kullanarak Persleri Ege'den çıkarması yanında uyruklarını kontrol altında tutabilmiştir (Thuk. II. 13). Deniz gücünü kullanmak suretiyle Atina'nın elde ettiği başarılar Perikles'in stratejisinin geliştirirken donanmaya gereğinden fazla anlam yüklemesine sebebiyet vermiş ve donanmanın Sparta ve müttefiklerini yenilgiye uğratabileceği yanılgısına yol açmıştır. Bununla beraber dönem gemilerinin sahip olduğu imkân ve kabiliyetlere ek olarak, devrin denizcilik bilgisi dikkate alındığında deniz gücünün üzerine yüklenen ödevi yerine getiremeyeceği açıkça anlaşılmaktadır. Zira Atina donanmasının bel kemiğini oluşturan *trieres* türü gemiler her tür deniz durumunda harekât icra edebilmesi imkân dâhilinde değildi. Bu duruma ek olarak düşmanı uzak mesafelerden tespit edebilecek olanakları olmaması yanında iletişim imkânları da son derece kısıtlıydı (Figuera, 1985: 64). İfade edilen sebeplerden ötürü eskiçağ boyunca deniz gücü bazı kritik durumlarda ehemmiyetli roller üstlenmesine karşın sürdürülebilirliği olmayan bir kuvvettir (Meiggs, 1982: 117).

Daha önce de zikredildiği üzere Peloponnesos Savaşı esnasında Atina donanmasının bel kemiğini *trieres* tarzı gemiler oluşturmaktaydı. Bununla beraber adı geçen gemiler teknik özellikleri bağlamında Perikles'in stratejisini hayata geçirebilecek olanaklardan yoksundu. *Trieres* tarzı savaş gemileri tarihte ilk kez Korinthoslular tarafından inşa edilmiştir (Thuk. I. 13; Diod. XIV. 42. 3; Hdt. III. 44, VI. 15,VII. 184; Vitr. I. 2. 4; Plut. *Themis*. 14). *Trieres*ler her ne kadar ilk olarak MÖ VII. yüzyıl ortalarından itibaren operasyon el olmuşsa da pahalı bir platform olmasına ek olarak bakım ve idame masraflarının yüksekliği yanında denenmemiş bir silah sistemi olmasından Pers Savaşlarına kadar geçen zamanda geniş ölçekli olarak kullanılmamıştır. Bununla beraber Hellenler ve Persler arasında yaşanan deniz savaşlarında rüştünü ispat etmiştir (Casson, 2002: 62). Arkeolojik buluntular ve antik kaynakların aktardığı bilgiler vasıtasıyla *trieres*ler hakkında önemli bilgilere ulaşılmıştır. *Trieres*ler hakkında elde edilen veriler vasıtasıyla Olympias inşa edilmiş ve gemi üzerinde yapılan testler sonucunda geminin imkân ve kabiliyetleri ortaya çıkartılmıştır. Olympias gemisi 36 m uzunluğunda ve 5.5 m genişliğindedir. Su hattı ölçüleri ise 32x3.6 m olup, boyunun enine olan oranı 9:1'dir. Olympias'da 170 kürekçiye ek olarak 30 güverte personeli bulunmaktaydı (Casson, 2002: 67).

Gemide görev yapan 170 kürekçi aşağıdan yukarıya doğru *thalamioi*, *zygioi* ve *thranitai* olarak adlandırılan üç katta görev icra etmekteydiler (Morrison-Coates-Rankov, 2000: 236-248). En alt katta görev yapan kürekçilerin lombar açıklığı ile deniz seviyesi arasındaki mesafe ise 49 cm kadardı (Morrison-Coates-Rankov, 2000: 245-246). Bu durum bir takım sıkıntıların ortaya çıkmasına mahal vermekteydi. Zira yarım metreyi aşan dalgalarda bile geminin görev icra etmesi oldukça müşkülatlıydı. Peloponnesos Savaşı esnasında yaşanan olayların da gösterdiği üzere pek çok gemi özellikle fırtınalar sebebiyle kaybedilmiştir. Denize elverişliliği oldukça sınırlı olan bu geminin Perikles'in arzuladığı ablukayı gerçekleştirmesi neredeyse imkânsızdı. *Trieres*lerin yapısından kaynaklanan bir diğer problem ise yaşam alanının kısıtlı olmasıydı. Çok sayıda personel dar bir alanda yaşamak zorundaydı ve insanların ihtiyaçları için sınırlı miktarda erzak depolanabilmekteydi. Bu durumun yansıması olarak gemilerin harekât yarıçapı ve denizde görev icra etme süresi de kısıtlanmaktaydı (Casson, 2002: 73-75). Atina donanması egemenliği altında bulunan sularda harekât icra ederken ikmal konusunda herhangi bir sıkıntı yaşamamaktaydı. Bununla beraber hâkimiyetinin görece olarak sıkıntılı olduğu alanlarda ya da düşman karasularında bir takım problemler yaşamıştır. MÖ 411 yılında Atina'nın zayıflamasından istifade etmek isteyen Eretrialılar, Sparta'nın da desteğini almak suretiyle yiyecek temini için gemilerini terk eden Atinalı denizcileri enterne ederek 36 gemi ve 7000 denizciyi zapturapt altına almışlardır (Thuk. VIII. 95). Peloponnesos Savaşı'nın son muharebesi olan Aigospotamoi'nin kaderini de lojistik zorunluluklar belirlemiştir (Ksen. *Ellen*. II. 1. 21-32; Diod. XIII. 106. 1). Donanma kullanılarak limanlar gibi belirli alanların abluka altına alınması imkân dâhilinde olmasına karşın bu tarz bir girişiminde sürdürülebilirliği yoktu (Archer-Ferris-Herwing, 2008: 91). Gemilerin kısıtlı yaşam alanına sahip olmasının en önemli sakıncalarından bir diğeri ise salgın hastalıkların hızlı bir şekilde yayılması için uygun şartlar sağlamasıydı. Bu bağlamda Atina'da yaşanan salgın özellikle denizciler arasında etkili olmuş bu da donanmada görev alan personeli olumsuz yönde etkileyerek deniz gücünün etkisinin azalmasına vesile olmuştur (Thuk. II. 48, 52). Bahsi geçen durumlara ek olarak dönemin denizcilik bilgisinin yetersizliği yanında gemilerin tespit ve haberleşme olanaklarının sınırlı olması da donanmanın üstüne yüklenen görevi tam olarak yerine getirememesine vesile olmuştur.

Perikles'in deniz gücünü merkeze alan stratejisinin bir başka önemli handikabı ise dönemin savaş gemilerinde çok sayıda personelin görev yapmasından kaynaklanmaktaydı. Daha önce de belirtildiği üzere *trieres*ler sayısı 200'ü bulan bir mevcutla görev yapabilmekteydi. Peloponnesos Savaşı sırasında Atina donanmasında 300-400 gemi bulunmaktaydı ki bu kuvvetin faaliyetlerini başarıyla devam edebilmesi için 80.000 denizci gerekliydi. Bu denli fazla sayıdaki personelin temini ve istihdamı mali açıdan devlet hazinesine büyük bir külfet yüklemekteydi. Aynı zamanda olası yenilgiler ya da kazalar karşısında çok miktarda hayat kaybedilmekteydi. Örneğin Sicilya (Thuk. VII. 85-86, VIII. 1; Andrewes, 2008: 460-463) ve Arginusai (Ksen. *Ellen*. I. 6. 28-38, I. 7. 1-35. Aristot. *Ath. Pol*. 34; Kagan, 1969: 461-468) felaketlerinde Atina yerine koyması imkânsız pek çok hayatı kaybetmiştir.

Görüleceği üzere Perikles'in stratejisinin temel hatası deniz gücünü merkeze almasından kaynaklanmaktadır. Bununla beraber tarihteki en önemli deniz güçlerinden biri olan İngiltere'nin başarılarını analiz eden araştırmacılar donanmanın etkisini fazlaca abartmışlardır.

Bu bağlamda denizci ulusların karasal güçler karşısında her daim üstünlük sağlayacaklarını iddia etmişlerdir. Gerçekte ise İngiltere'nin İspanya, Fransa ve Almanya karşısındaki başarıları analiz edildiğinde İngiltere'nin ismi zikredilen ülkelere komşu bir siyasi yapıyla daima ittifak kurduğu görülmektedir (Kennedy, 1990: 193-214). İfade edilen duruma tezat olarak Atina, Sparta ve müttefiklerine karşı giriştiği mücadelede Peloponnesos'da bulunan herhangi bir *polis* ile uzun soluklu bir ittifak ilişkisi kurmamıştır. Her ne kadar kısa süreliğine Sparta'nın kadim düşmanı Argos ile müttefik olunmuşsa da bu ilişki devam ettirilmemiştir (Thuk. V. 46-47; Romilly, 2019: 42; Benson, 2019: 95). Dolayısıyla Atina, Peloponnesos'u daimi olarak abluka altına almasını olanaklı kılacak stratejik üslerden mahrum kalmış ve bu durum abluka planının tam manasıyla uygulanmasını önlemiştir.

Clausewitz, savaşın amacını "*düşmanı irademizi kabule zorlamak için bir kuvvet kullanma eylemi*" olarak tanımlamaktadır (Von Clausewitz, 1999: 20). Sparta'nın temelde bir kara gücü olmasından ötürü Perikles'in arzu ettiği gibi deniz kuvvetinden istifade ederek Atina'nın galip olarak savaşı neticelendirmesi kanımızca beyhude bir çabadır. Askeri analistler tarafından sıklıkla dillendirildiği üzere zafer piyadenin süngüsünün ucundadır. Burada anlatılmak istenen şey ise ancak kara gücünü kullanarak düşman yenilgiye uğratılabilir. Perikles ise Sparta ile doğrudan bir muharebeye girmekten kaçınılması gerektiğini belirtmiştir. Perikles sonrasında Atina'daki siyasi gücü ele geçiren liderler ise Perikles'in savunma temelli stratejisini terk etmişler ve bu sebeple hem Thukydides hem de günümüz araştırmacılarının çoğunluğu tarafından tenkit edilmişlerdir.

Perikles, Atina'nın sahip olduğu savunma yapılarından ötürü zapt edilemez olduğuna inanmaktaydı ve kent kuşatılsa bile ticaret filosu vasıtasıyla tüm ihtiyaçları kente getirilebileceğini düşünmekteydi. Bununla beraber Atina'nın ihtiyaç duyduğu kaynakların önemli bir kısmı Pontos Eukseinos kıyılarından yola çıkarak Bosporos ve Hellespontos yoluyla Atina'ya ulaşmaktaydı. Atina'nın ihtiyaçlarının kesintisiz olarak sağlanabilmesinin yolu ismi geçen önemli suyollarının kontrol altında tutulmasına bağlıydı. Bununla beraber Bosporos ve Hellespontos'un emniyeti hem kara hem de deniz unsurlarının müşterek kullanımıyla sağlanabilirdi. Bununla beraber Brasidas'ın gerçekleştirdiği Khalidike seferi bölgedeki Atina hâkimiyetinin ne kadar kırılgan olduğunu ortaya çıkarmıştır. Nihayetinde Hellespontos'un düşman eline geçmesi neticesinde Atina mağlubiyeti kabul etmek zorunda kalmıştır (Thuk. IV. 108; Lewis, 2008: 464-470).

4. SONUÇ VE DEĞERLENDİRME

Strateji, bir siyasi yapının sahip olduğu politik, askeri ve iktisadi kuvvet unsurlarını düşmanın zayıflıklarını da dikkate alarak etkili bir şekilde kullanabilme becerisidir. Tarih boyunca ifade edilen parametreler dikkate alınarak hazırlanan bir strateji başarının anahtarı olmuştur. Bununla beraber strateji dogmatik olmamalıdır ve zaman içerisinde değişen şartlarla bağlantılı olarak revize edilebilecek esneklikte olması gerekir.

Peloponnesos Savaşı hakkındaki en önemli kaynak olan Thukydides ve onun fikirlerini benimseyen günümüz araştırmacılarının büyük bir kısmı Perikles tarafından uygulanmak

istenen stratejiyi başarılı bir plan olduğunu ileri sürmüşlerdir. Bununla beraber askeri açıdan ele alındığında Perikles'in stratejisinin başarısız bir plan olduğu görülmektedir. Perikles'in stratejisi savaşın kısa süreli olacağı inancı üzerine bina edilmiş olmasına karşın mücadele 27 yıl boyunca devam etmiştir. Bu zaman dilimi içerisinde dönemin en güçlü siyasi yapan Persler, Perikles'in öngörüsünün aksine çatışmanın gidişatına etki edecek şekilde Sparta ve müttefiklerine mali ve askeri destek sağlamışlardır. Perikles'in yaptığı bir diğer hata ise savunmada kalmak suretiyle savaşı kazanabileceğini ileri sürmesidir ki bu önerme tarih boyunca cereyan eden pek çok hadisede de görüleceği üzere savaşların kalkan yerine kılıçla kazanıldığını göstermektedir. Tüm bunlara ek olarak Perikles, donanmayı merkeze alan bir stratejiyi kullanmak süratiyle mücadeleyi kazanacağını iddia etmiştir. Bununla beraber Perikles'in yaşadığı çağda donanmaların bel kemiğini oluşturan *trieres* tarzı gemilerin imkân ve kabiliyetleri üzerlerine yüklenen ödevi başaracak yeterlilikte değildi. Perikles her ne kadar Attika-Delos Deniz Birliğine dâhil olan *polis*lere karşı iyi muamele edilmesini salık vermişse de adı geçen organizasyona dâhil olan *polis*ler savaş sırasında Atina'ya yeterli destek sağlamamasına ek olarak Atina'nın askeri kaynaklarını dağıtmasına sebebiyet vermiştir. Konu bu açıdan ele alındığında adı geçen organizasyon faydadan çok zarara sebebiyet vermiştir.

TÜRKLERDE ASKERÎ EĞİTİM VE AV KÜLTÜRÜ

Dr. Umut YOLSEVER
Bağımsız Araştırmacı,
Umutyolsever44@gmail.com - ORCID ID: 0000-0002-7035-4328

ÖZET

Türk toplulukları tarih boyunca askerî kabiliyetleri, savaş stratejileri ve disiplinli ordularıyla dikkat çekmişlerdir. Bu başarının temelinde ise erken yaşta başlayan askerî eğitim ve avcılık kültürünün önemli bir rolü vardır. Çalışmada Hun, Göktürk, Kıpçak ve Moğol dönemlerinden itibaren avın hem askerî hem toplumsal işlevi ele alınmıştır. Hunlarda Mete Han devrinde kurumsallaşan onluk sistem, Türk ordusunun disiplinli yapısının ilk örneğini teşkil etmiş; Mete Han'ın tümenini av sırasında eğitmesi, bu onluk sistem geleneğinin kökenine ışık tutmuştur. Göktürkler döneminde de düzenlenen "devlet avları" binlerce süvarinin katıldığı geniş çaplı askerî tatbikat niteliği taşımış, bu uygulama sonraki Türk-İslâm devletlerinde de devam etmiştir. Çin kaynakları, Hun ve Göktürklerin av bahanesiyle gerçekleştirdikleri askerî seferlerden ayrıntılı biçimde söz ederken; Priskos'un Attila hakkında verdiği bilgiler, avın aynı zamanda diplomatik bir araç olarak da kullanıldığını göstermektedir. Avcılığın askerî yönünün yanı sıra dinî ve törensel bir anlamı da vardır. Şamanist inanç sisteminde av, doğa ve ruhlar arasındaki dengenin bir tezahürüdür. Altay ve Hakas topluluklarında ava çıkmadan hemen önce şamanın çağrılması, kurban verilmesi ve ateşle arınma törenleri bu inanışın izlerini taşıdığını açıkça göstermektedir. Bu bağlamda av, yalnızca fiziksel hazırlık değil, ruhsal bir arınma süreci olarak da değerlendirilmiştir. Yazıtlar ve destanlar da bu geleneğin sürekliliğini teyit etmektedir. Köli Çor Yazıtı'nda çocuk yaşta gerçekleştirilen av kahramanlıkları; Dede Korkut Hikâyeleri, Başkurt ve Kırgız destanlarında avın yiğitlik, olgunluk ve liderlik göstergesi olarak yansıtılması, bu kültürün hem askerî hem toplumsal hayatın ayrılmaz bir parçası olduğunu göstermektedir. Bu çalışmada, Türklerde askerî eğitimle av arasındaki ilişki kronolojik bir perspektifle incelenmiş, yazıtlar, destanlar ve seyahatnameler gibi birincil kaynaklardan hareketle savaşçı kültürün temelleri değerlendirilmiştir.

Anahtar Kelimeler : Türkler, Askerî Eğitim, Av Kültürü, Atlı Okçuluk, Savaş Geleneği

GİRİŞ

Türk toplulukları tarih boyunca askerî kabiliyetleri, savaşçılıktaki hünerleri ve disiplinli ordu teşkilatları ile dikkat çekmiştir. Bu meziyetlerin kökeni, yalnızca doğuştan gelen bir savaşçı içgüdüye değil, çocukluktan itibaren sistemli biçimde uygulanan askerî eğitim ve avcılık geleneğine dayanmaktadır. Ayrıca, Türk topluluklarının erken dönemlerden itibaren yaşadıkları geniş bozkır coğrafyasının özellikleri ile konargöçer yaşam tarzının, toplumsal ve

kültürel pratikler üzerinde belirleyici bir etkiye sahip olduğunu belirtmek gerekir.[1]Türk ordularının tamamına yakını, erken dönemlerden itibaren atlı okçulardan oluşmuştur. Bu durum, Türklerin hem savaşta hem de barışta atla kurduğu ilişkiyi ortaya koyar. Yeni doğan çocuklar, yürümeye başladıktan hemen sonra koyun sırtında denge eğitimi almış, sincap, gelincik ve kuş gibi küçük hayvanları hedef alarak okçuluk yeteneğini geliştirmiştir. Zamanla bu uygulama, koyun yerine gerçek atın, küçük hayvanların yerini ise canlı hedeflerin aldığı bir askerî talime dönüşmüştür.[2] Böylece Türk savaşçısı, daha çocuk yaşta hem atın ritmine hem de ok ve yayı kullanma kabiliyetine alışmıştır. Toplumsal yapının askeri beklentileri doğrultusunda, çocuk ve gençlerin fiziksel kapasitelerini güçlendirmek ve savaşçılık becerilerini pekiştirmek amacıyla çeşitli etkinliklerin planlı biçimde yürütüldüğü anlaşılmaktadır. Nitekim Wilhelm Radloff'un gözlemleri, bu erken dönemdeki eğitimin izlerini yüzyıllar sonrasına taşır. Radloff, küçük yaştaki Kazak çocuklarının daha yürümeyi öğrenmeden eyere bağlanarak biniciliğe alıştırıldıklarını aktarır. Aynı şekilde Altaylıların sürekli at üzerinde yaşamaları nedeniyle yürürken bile dengeyi at hareketiyle kurmaya alışık olduklarını, bu sebeple ayaklarını sürüyerek veya sallanarak ağır adımlarla yürüdüklerini ifade eder. Bu gözlemler, Türk topluluklarının binicilik kültürünü ne denli erken yaşta içselleştirdiklerinin somut kanıtlarıdır. Türk toplulukların askeri kabiliyete yönelik eğilimleri, onların savaş hazırlıklarının niteliğini ve sahada uyguladıkları stratejik manevraları doğrudan şekillendirmiştir. Özellikle atlı savaş geleneği ile ok ve yay kullanımındaki üstünlükleri, Türklerin çağlarının en gelişmiş ve etkin silah sistemlerine sahip güçler arasında yer almasını mümkün kılmıştır.

ASKERÎ EĞİTİM VE AV GELENEĞİ

Hunlar döneminde askerî disiplin, toplumsal hayatın temel unsurlarından biri hâline gelmiştir. Disiplin, Türk tarihinde ordunun oluşumunda belirleyici rol oynamış ve toplumsal örgütlenmeden askeri yapılanmaya kadar birçok alanda temel bir işlev görmüştür. Ailelerin ya da aile birliklerinin zaman içinde askeri bir yapılanma niteliği kazanması, Türklerin ordu-millet anlayışının özünü oluşturmuştur. Buna ek olarak, savaş dönemlerinde halkın orduyla uyumlu biçimde hareket etmesi, toplum ile askeri yapı arasındaki bütünleşmeyi pekiştiren ve kurumsallaştıran önemli bir etken olarak karşımıza çıkmaktadır.[3] Bu şekilde bir toplumsal-askeri bütünleşme olgusunun Türkler dışında başka toplumlarda aynı derecede görülmediği, söz konusu yapının Türklerin tarihsel ve kültürel kimliğinin en belirgin unsurlarından biri olarak değerlendirilmesine imkân tanımaktadır.[4]

Çin kaynaklarında, Hun ordusunun tamamına yakınının atlı okçulardan oluştuğu belirtilir. Bu durum, konargöçer yaşamın doğrudan savaş kabiliyetiyle bütünleştiğini gösterir. Hun toplumunda avcılık, yalnızca geçim faaliyeti değil, savaşın prova edildiği bir askerî talimdir. M.Ö. II. yüzyılda Hunlar arasında uygulanan bazı töreler, savaşla av arasındaki bağı

da yansıtır. Örneğin, zaferle sonuçlanan bir seferin ardından ele geçirilen düşmanlardan biri Tanrı'ya şükran amacıyla kurban edilirdi. Yine bir Hun savaşçısı düşmanını öldürdüğünde bir kupa içkiyle ödüllendirilir, ölen düşmanın tüm eşyaları ve silahları onun tasarrufuna bırakılırdı.[5] Bu uygulama, bireysel kahramanlığın teşvik edildiğini ve savaşın kutsal bir nitelik taşıdığını ortaya koymaktadır. Bahsi geçen bilgilerden hareketle, Hun Türklerinin "at üstünde doğup, at üstünde yaşayan" bir toplum olduğu sonucuna varabiliriz. Düşüncemizce Türk'ün savaşçı ruhu, doğa ile iç içe yaşadığı ve sürekli hareket hâlinde bulunduğu çevresel koşullar kadar, erken yaşta kazandığı bu askerî alışkanlıkların da sonucudur.

Hun hükümdarı Mete Han, Türk askerî sisteminin kurumsal temellerini atan kişi olarak kabul edilir. Onun oluşturduğu onluk teşkilat (onluk, yüzlük, binlik, on binlik/tümen) sistemi, günümüz modern ordularının hiyerarşik yapısına öncülük etmiştir. Bu sistem, komutanlar arasındaki emir-komuta zincirini kolaylaştırmış, ordunun savaşta senkronize hareket etmesini sağlamıştır. Mete Han'ın babası Teoman Han'a karşı gerçekleştirdiği ünlü suikast hikâyesi, yalnızca taht mücadelesi değil, aynı zamanda askerî disiplinin ne derece ileri boyutta olduğunu gösteren bir örnektir. Mete, babasının Çinli eşinden olan oğlunu veliaht yapmak istemesi üzerine töreye aykırı davranışını cezalandırmak amacıyla harekete geçmiştir. Önce Yüeçilere rehin olarak gönderilmiş, ardından buradan kaçarak babasının ordusunda yeniden yer almıştır. Kaçışının ardından babası tarafından kendisine verilen on bin kişilik tümeni eğitirken, "ıslık çalan ok" adlı bir komuta sistemi geliştirmiştir. Bu ok, hedefe giderken çıkardığı sesle yön gösterir; askerler, ok nereye atılırsa o yöne ok atmak zorundadır. Emre uymayanlar idam edilmiştir. Mete, önce kendi atını, ardından eşini hedef alarak askerlerinin itaatini sınamış, son olarak babasına aynı şekilde ıslık çalan okunu atarak suikastı gerçekleştirmiştir. Bu olay, Türk askerî disiplininin sadece savaş meydanında değil, av sahasında da öğrenildiğini kanıtlar. Çünkü Mete'nin askerî eğitimleri hep av sırasında gerçekleşmiştir. Düşüncemizce bahsi geçen olay, Türk kültüründe avın askerî eğitimin doğrudan parçası olduğunun erken bir göstergesidir.[6]

Türklerin savaşta uyguladığı en yaygın taktikler arasında turan taktiği (sahte ricat) ve yıpratma amacıyla yapılan baskınlar yer alır. Çin kaynaklarında Göktürkler için geçen "*ipini koparmış barbarların gücü, bırakılmış oklar gibi gelir ve kırılmış saz telleri gibi kaybolur*" ifadesi, bu taktiğin özünü açıklar.[7] Bu tanım, Türk ordularının savaş alanındaki hızını, çevikliğini ve disiplini bir arada göstermektedir. Bu tür manevralar, sürekli fiziksel hazırlık ve dayanıklılık gerektirdiği için av, doğal bir talim alanı işlevi görmüştür. Devletin önderliğinde düzenlenen "sürek avları", yalnızca avcılık faaliyeti değil, aynı zamanda geniş çaplı askerî tatbikatlardı. Bu avlarda binlerce süvari yer alır, savaş düzeni içinde hareket edilirdi.[8]

1889 yılında, bugünkü Tuva Özerk Cumhuriyeti sınırları içerisinde bulunan Hemçik-Çırgakı Yazıtı'nda "Aşnukı atlarım eşintim, awga ben er altı yüz tamka at" ("Önceki atlarımı

koşturdum, ava (giderken) bindiğim altı yüz damgalı atım") ifadesi geçer.[9] Bu satır, ava katılan birliklerin büyüklüğünü gösterdiği kadar, avın kolektif bir devlet organizasyonu olduğunu da ortaya koyar. Çin kaynaklarına göre M.Ö. 62 yılında Hunlar döneminde düzenlenen bir avda yüz bin süvari görev almıştır.[10] Yine bir başka kayıtta 615 yılında Şipi Han döneminde, Çin kaynaklarında "Han'ın av bahanesiyle sınır hattına gideceği" söylentisi yayılmış ve bu söylenti Çin sarayında panik yaratmıştır.[11] Aynı şekilde, Bizans elçisi Priskos, Attila'nın Romalıların topraklarına "av bahanesiyle" gireceğini bildirir.[12] Bunun haricinde 630 civarında Batı Göktürk Hanı Tung Yabgu ile karşılaşan Çinli seyyah Hsüan-Tsang, Han'ı ava çıkarken görmüş ve askerî teçhizatını ayrıntılı biçimde betimlemiştir.[13] Kaynaklardan elde edilen bilgiler neticesinde, avın hem askerî hem diplomatik işlev taşıdığı ve bunun haricinde törensel bir niteliğe sahip olduğu açık biçimde görülmektedir.

Türklerde av, yalnızca fiziksel bir etkinlik değil, aynı zamanda dinsel bir ritüeldir. Gök Tanrı inancında av, doğayla ve ruhlarla kurulan kutsal bir iletişim biçimidir. Altaylılar ava çıkmadan önce şaman çağırır, avın bereketli geçmesi için ak koyun ya da renkli at kurban ederdi.[14] Hakas topluluklarında da benzer biçimde, ava çıkmadan önce şaman ayini yapılır, himayesindeki ruhların ormandaki hayvanları avcılara doğru yönlendirmesi istenirdi.[15] Bu ritüellerin bir başka amacı da arınmadır. Sibirya'nın birçok bölgesinde avcılar ava çıkmadan önce ateş üzerinden atlayarak kendilerini kötü ruhlardan temizler, dumanla silahlarını ve köpeklerini arındırırlardı.[16] Düşüncemizce bu pratik, yalnızca dini bir inanç değil, aynı zamanda psikolojik hazırlığın da bir parçasıydı.

Kıpçak toplumlarında avcılık, hem askerî idman hem de sosyal prestij göstergesiydi. Av ve ok yarışlarına "kirş" adı verilirdi.[17] Mevzu bahis yarışlara örnek verilecek olursak, 1878'de Hakasya'da E. F. Korçakov tarafından bulunan Altın Köl I Yazıtı'nda şu satırlar yer alır:

"Atsar alp artınızın, utsar küç artınızın alıg bor topa bars adırılım ajıtu"

("[Avda] keskin okçu ve [güreşte] güçlü (bahadır) idiniz. Elig Bört opa Bars, ayrılık ne acı!")[18]

Bu ifadeler, avdaki başarının yalnızca bireysel bir meziyet değil, ölümsüz bir hatıra olarak taşındığını göstermektedir. Okçuluk ve güreş, Türklerde hem askerî hem kültürel kahramanlığın iki temel ölçütü olmuştur. Benzer biçimde, Başkurtların Koblan Batır Destanı'nda kahraman Koblan'ın evlenebilmesi için direğe asılı altın küpeyi okla vurması şart

koşulur.[19] Bu motif, avcılığın toplumsal statü belirleyici yönünü ve bireysel kahramanlıkla özdeşleştiğini ortaya koymaktadır. Göktürk dönemine ait Köli Çor Yazıtı'nda ise "Köli Çor yedi yaşında bir antilop, dokuz yaşında azılı bir domuz öldürdü" ifadesi geçer.[20] Bu cümle, avcılığın erken yaşta kahramanlıkla özdeşleştiğinin bir göstergesidir.

Türk destan geleneğinde av, kahramanlık sınavlarının değişmez unsurudur. Dede Korkut Hikâyeleri'nde Bamsı Beyrek, Banu Çiçek ile evlenmeden önce gücünü kanıtlamak için ava çıkar.[21] Bu sahne, Türk toplumunda evlilik öncesi kahramanlık göstergesi olarak avın rolünü vurgular. Başkurt destanlarında da av, dostluk ve rekabetin bir sembolüdür. Konur Boğa Destanı'nda Yanbay adlı ünlü bir avcı, dağlarda tanıştığı yiğitle dost olur ve birlikte ava çıkarak hünerlerini sınar.[22] Kuzıy-Kürpes Destanı'nda ise Karabay ile Sarıbay kahramanları, misafirlik sonrası eğlencede güreş ve ok yarışları düzenler, ardından topluca ava çıkarlar.[23]

Hakas destanı Han Orba'da av, toplu bir askerî faaliyete dönüşür:

"Bugün cengaver yiğitlerimiz / Büyük yurttan çıkıp geliyorlar / At yarışına hazırlanın." Bu dizeler, avın doğrudan savaş hazırlığı olarak görüldüğünü açıkça ortaya koyar.[24]

Türklerde savaşın ve avın ruhsal boyutu, atalar kültü ile yakından ilişkilidir. Kazakların Parpariya Destanı'nda kahraman, düşman üzerine yürürken şu dizeleri söyler:

"Aruvak koldap jar bolsa / Javga oryan salamın."

("Ata ruhları yardım ederse düşmanı darmadağın edeceğim.")[25]

Bu dizelerde görüldüğü üzere, savaşta zafer kazanmanın yalnızca fiziksel güçle değil, ataların ruhlarının desteğiyle mümkün olduğuna inanılmıştır. Yine aynı destanda, Baba Tükti pirlerinin ejderha kılığında belirmesi, savaşın doğaüstü bir destekle özdeşleştirildiğini gösterir.[26]

Türklerde yırtıcı kuşlar, hem av hem de sembolik anlam taşımıştır. Başkurtların Kuzıykürpes ile Mayahılıv destanında iki hanın, dostluklarının nişanesi olarak birlikte avcı kuşlarla ava çıkmaları anlatılır.[27] Bu sahne, avın yalnızca askerî değil, diplomatik bir anlam taşıdığını da göstermektedir. Kırgızların Seyitbek Destanı'nda yer alan şu dizeler, yırtıcı kuşların avdaki önemini ortaya koyar:

---

[27] *Başkurt Destanları II,* s. 55.

"Keçke cürüp şumkarın / İlbeesinge salgan cok"

("Akşama kadar şahinini av için bırakmadı.")[28]

Yine aynı destanda,

"İtelgi şumkar salışıp / Avını kovalayıp / Kumarları kanışıp"

("Kartal ve şahin salarak avlarını kovaladılar, av zevkini çıkardılar.")[29] Bu dizeler, kuşlarla avcılığın Türkler arasında hem teknik bir beceri hem de kültürel bir zevk unsuru hâline geldiğini göstermektedir.

SONUÇ

Türklerde askerî eğitimin merkezinde av geleneği yer almaktadır. Av, yalnızca beslenme veya eğlence amacıyla değil, savaş hazırlığının bir parçası olarak icra edilmiştir. Hunlardan Göktürklere, Kıpçaklardan Moğollara kadar süregelen bu gelenek, hem fiziksel dayanıklılık hem de taktiksel beceri kazandırmıştır. Av, Türk insanının doğa ile kurduğu ilişkinin simgesidir. Bu bağlamda düşüncemizce, Türklerin askerî başarısının arkasında yalnızca teknik maharet değil, aynı zamanda doğaya, hayvana ve kutsal olana duyulan derin saygı da yatmaktadır. Sürek avları, birer savaş provası, bireysel avlar ise kahramanlık sınavı olmuştur. Sonuç olarak, Türk savaşçısı için ok, yay ve at yalnızca birer araç değil, kültürel kimliğin ve tarihsel sürekliliğin sembolleridir. Bu yönüyle Türklerde askerî eğitim ve av kültürü, tarih boyunca şekillenen askerî zihniyetin hem maddî hem manevî temelini oluşturmaktadır.

Umutyolsever44@gmail.com - ORCID ID: 0000-0002-7035-4328

ÖZET

Eski Türk topluluklarının inanç sisteminde doğa, yalnızca yaşamsal bir çevre unsuru değil, Tanrı'nın düzeniyle iç içe geçmiş kutsal bir varlıklar alanı olarak görülmüştür. Türklerin doğaya duyduğu derin saygı, onların konar-göçer yaşam biçiminden ve doğa koşullarıyla kurdukları sürekli temastan kaynaklanmaktadır. Bu saygının merkezinde "yer-su" olarak adlandırılan kutsal tabiat ruhları bulunmaktadır. Türk kozmogonisine göre Tanrı, Türk milletinin yeri ve suyunun sahipsiz kalmaması için hanları göndermiştir. Dolayısıyla doğa, yalnızca kutsal bir alan değil, aynı zamanda siyasal meşruiyetin kaynağıdır. Çalışma, İslam öncesi dönemde Türklerin doğa ve özellikle su unsuruna atfettikleri kutsallığı tarihî, mitolojik ve etnografik açıdan incelemektedir. Yer-su kültü, su kaynaklarına yönelik ritüeller, kurban törenleri, destanlarda suyun sembolik işlevi ve halk inançlarında suya yüklenen anlamlar karşılaştırmalı olarak değerlendirilmiştir. Bulgular, suyun hem fiziksel yaşam kaynağı hem de ruhsal arınmanın ve yeniden doğuşun sembolü olarak algılandığını ortaya koymaktadır. Örnekler üzerinden yürütülen analiz, Türklerin doğayı canlı bir bütün olarak kabul ettiklerini ve suyu "yaşamın sürekliliğinin teminatı" şeklinde kutsallaştırdıklarını göstermektedir. Destanlar ve halk anlatıları, bu inanç sisteminin zengin mitolojik temellerini yansıtır. Çeşitli destanlarda su, ölümle diriliş arasında bir geçiş alanı, insanla Tanrı arasında aracı bir unsur olarak işlev görür. Kırgız, Hakas ve Tuva topluluklarında suyla arınma, şifalanma ve kurban verme ritüellerinin günümüze dek uzandığı gözlemlenmektedir. Bu ritüeller, İslam'ın kabulünden sonra dahi yer yer yeni dinî motiflerle birleşerek varlığını sürdürmüştür. Sonuç olarak, eski Türklerde su kültü yalnızca dinî bir inanç sistemi değil, toplumsal, siyasî ve ekolojik düzenin de temelini oluşturmuştur. Düşüncemizce bu kadim su inancı, Türklerin Tanrı, doğa ve insan arasındaki denge anlayışını yansıtan en özgün dünya görüşü tezahürlerinden biridir.

Anahtar Kelimeler : Su Kültü, Yer-Su İnancı, Eski Türkler, Türk Mitolojisi, Şamanizm

GİRİŞ

Hayatın temel kaynağı olarak kabul edilen su, bilinen tüm yaşam biçimlerinin vazgeçilmez bileşeni olup hem yerkürenin fiziksel yapısı hem de canlıların varlığını devam ettirebilmesi açısından kritik bir öneme sahiptir.[1] Suya atfedilen önem toplumların yaşadıkları sahaları belirlemesinde de etkili olmuştur. Eski Türk toplulukları, yaşamlarını büyük ölçüde doğanın sunduğu imkânlara bağlı olarak sürdürmüş, bu sebeple doğaya karşı derin bir saygı geliştirmişlerdir. Bu saygının temelinde yalnızca çevresel koşullar değil, doğa unsurlarına tanrısal nitelik yükleyen inanç sistemi bulunmaktadır. Bozkır hayatında su, hem insanlar hem hayvanlar için en temel unsurlardan biri olmuş; nehirler, göller ve kaynaklar Türklerin

[1] Hacı Mehmet Günay, "Su", *İslam Ansiklopedisi*, DİA, 2009, C. 37, s. 432.

ekonomik, sosyal ve kültürel yaşamında merkezi bir rol oynamıştır. Çin kaynakları Hunlara dair şu gözlemlere yer verirler; ""*Hsien-yün"ler ve Hun-yü"ler kuzey sınırında otururlar, otlakları takip ederek hayvan yetiştirir ve yer değiştirirlerdi. Yetiştirdikleri hayvanların çoğu at, sığır ve koyundu. Su ve otlakları izleyerek hareket ederlerdi*."[2] Yine Çin kaynaklarında Wu-sun boylarının tarıma elverişsiz coğrafyalar nedeniyle hayvanlarıyla birlikte su kaynaklarını takip ederek yaşadıkları belirtilir.[3] Nitekim Peçeneklerin Tuna, Turla (Dinyester) ve Özi (Dinyeper) nehirlerinin ağızlarını kışlak olarak seçmeleri, su kenarlarının hayvancılık için elverişli oluşuyla doğrudan ilişkilidir.[4] Bu durum, suyun yalnız ekonomik değil, aynı zamanda kozmolojik bir temsile dönüştüğünü göstermektedir. Türk inanç sisteminde su, yaşayan bir varlık olarak kabul edilmiş, buradan hareketle "yer-su" kültü doğmuştur. Tanrı'nın, Türk yurdunun yerini ve suyunu koruması için hanları görevlendirdiğine dair anlayış da bu kozmolojik çerçevenin bir yansımasıdır.

SU KÜLTÜ VE DOĞA İNANCI

Eski Türk topluluklarının doğaya bakışında su, hem maddi hem de manevi düzeyde merkezi bir konuma sahiptir. Çaylar, ırmaklar ve göller, yalnızca coğrafi unsurlar değil, ruh sahibi canlılar olarak tasavvur edilmiştir. "Yer-su" inanışı, bu tasavvurun en berrak ifadesidir: Yurt, dağ, ırmak ve göller, Tanrı'nın koruması altında, kendilerine özgü ruhları ve "iyeleri" olan varlıklar olarak düşünülmüştür. Tanrı'nın, "Türk'ün yeri ve suyu sahipsiz kalmasın" diye hanları Türk milletinin başına göndermesi fikri de aslında siyasi meşruiyet ile kozmik düzenin birleştiği bir inanç zeminini göstermektedir.[5]

Suya tanrısal değer verilmesi, çoğu zaman yaşam mücadelesiyle doğrudan ilişkilidir. Kimek Türkleri buna çarpıcı bir örnektir. Arap kaynakları Kimeklerin İrtiş Nehrine tanrısal bir değer atfettiklerini, nehri adeta bir Tanrı gibi görüp ona tapındıklarını kaydeder. İrtiş kıyılarında binlerce at sürüsünün dolaştığı, Kimeklerin en büyük geçim kaynağının at yetiştiriciliği olduğu ifade edilir.[6] Suyun yokluğunda hayvancılığın sürdürülemeyeceği düşünüldüğünde, nehirle kurulan bu kutsal bağ yalnızca mitolojik değil, doğrudan hayatta kalma mücadelesiyle de ilgilidir. Dolayısıyla suya tanrısal nitelik kazandırılması, hem çevresel şartların hem de ekonomik yapının dini kavrayışla birleştiği bir nokta olarak okunabilir.

Altay, Hakas, Kırgız ve Tuva gibi Sibirya kökenli ve dağlık bölgelerde yaşayan Türk topluluklarının destanlarında su motifinin yoğunluğu, su kültünün ne kadar köklü olduğunu gösterir. *Maaday-Kara* destanında Kögüdey-Mergen'in davranışı bu açıdan dikkat çekicidir:

"Mını körgön Kögüdey-Mergen Kumdus börkig usta tartıp Kök talayga mürgüp saldı"

("Bunu gören Kögüdey-Mergen Kunduz şapkasını çıkarıp Mavi nehre baş eğip dua etti")[7]

Burada su, yalnızca bir akarsu değil, önünde baş eğilen, niyazda bulunulan, duaya muhatap bir varlık olarak karşımıza çıkar. Altay Türklerinin *Alıp-Manaş* destanında geçen şu dizeler de aynı dünya tasavvurunu destekler:

[7] Salahaddin Bekki, *Maaday-Kara Destanı*, Manas Yay., Elazığ 2007, s. 422-423.

("Ak dalgası gümüş gibi / Kutsal kaynağa geldi.")[8]; ("Oy benim can babam! / Ak dalgalı kutsal suda / Ak kuş yüzüyor.")[9]; ("Ak-Boz at / Ortadaki kutsal göle / At kılı gibi gelip indi.")[10]

Bu örnekler suyun "kutsal kaynak" olarak algılanışını açıkça ortaya koyar. Kutsal göl ve kaynakların, atlar, kuşlar ve kahramanlarla birlikte anılması, suyun mitolojik ve ritüel boyutunu güçlendirir.

Kafkasya Hunları, inanç sistemlerinde suyu da kutsal kabul etmiş ve diğer kutsal unsurlar gibi ona da kurban sunmuşlardır.[11] Göktürk dönemi hakkında malumat edinilen Çin kaynağı Zhou Shu'da ise Kağan'ın, her yıl ileri gelenleriyle birlikte atalar mağarasında kurban töreni gerçekleştirdiği, bunun haricinde beşinci ayın ortalarına gelindiğinde, halkını bir araya getirerek nehir kıyısında Gök Tanrı'ya sunulmak üzere bir başka kurban merasimi düzenlediği yazılıdır.[12] Yine Kırgızların da sulara ve ağaçlara kurban kestiği bilinmektedir. Su ile kurulan bu ilişkinin yalnız sembolik değil, fiilî bir ritüel düzeyine çıktığı görülmektedir. "Cer suu tayı / cer suu tayu" olarak adlandırılan törende yağmur yağmadığı, kar yağmadığı veya kuraklığın uzadığı dönemlerde her evden ekmek ve kurbanlık hayvan toplanarak su başına gidilir; kıbleye dönülerek şu dua edilir:

"Kuday calgay kör!, Kuday bere kör! Aylanayın camgırındı ber"
("Kuday yardım et! Kuday ver! Kurban olayım yağmurunu ver")[13]

Bu dua, Tanrı'ya hitapla birlikte "yer" ve "su"ya yönelen bir yakarışın parçası olarak okunabilir. Devamında kurban kesilmesi, kanın suya akıtılması ve etin yenmesi, hem Tanrı'ya hem de su ruhlarına adanmış bir şükür ve medet umma ritüeli niteliğindedir. 1950'de Tanrı Dağları'ndaki Koçkor köyünde meydana gelen selin ardından köylülerin selin başladığı yere kurban götürmeleri ve kanı suya akıtmaları da suyun, kızdığında felaket getiren, yatıştırıldığında ise bereket sağlayan bir güç olarak görüldüğünü düşündürmektedir.[14]

Kırgız şamanlarının su ile tedavi uygulamaları da bu çerçevede anlam kazanır. Bardağa konulan suyun hastanın etrafında dolaştırılması, ardından hastanın suya tükürerek suyun dışarı dökülmesi, hastalığın suya transfer edildiği ve suyla birlikte uzaklaştırıldığı inancına dayanır.[15] Burada su, hem taşıyıcı hem de temizleyici bir unsur olarak karşımıza çıkar.

Yakutlara göre güneyden gelip Kuzey Buz Denizi'ne dökülen ırmakların kaynaklarını cennetten alması, suya atfedilen kutsallığın kozmik boyutunu gösterir.[16] Kırgızların soğuk algınlığı gibi durumlarda "Oo Kuday amin, cer amin, su amin" şeklinde dua etmeleri,[17] Tanrı, yer ve su arasında kurulan üçlü bir kutsal hiyerarşiyi akla getirir. Hakas destanı *Altın Taycı*'da yaşam suyunun ölüyü diriltmesi, su kültünün en ileri ifadesidir: Altın Taycı'nın oğlu Tolay Arığ'ın zorlu bir yolculuk sonunda "yaşam suyu"nu bulup getirmesi, ölünün su ile yıkanması

ve suyun ağızdan içirilmesi neticesinde dirilişin gerçekleşmesi, suyu doğrudan "hayat verici öz" ile özdeşleştirmektedir.[18]

Hakaslar, Tanrıça Umay'ın oturduğu dağda bir süt gölü bulunduğuna ve Umay'ın bu gölden dünyaya geldiğine inanmışlardır. Süt gölü, hem bereket hem analık hem de kutsallığın yoğunlaşmış bir sembolü olarak su-gıda-tanrıça ilişkisinin düğümlendiği bir noktayı temsil eder. Benzer biçimde Altaylarda bulunan Kidis-Bazar Nehri'nin suyunun göz hastalıklarına şifa verdiğine inanılması, orada yıkananların minnet ifadesi olarak nehri çevreleyen çalılara bezler asması, suya teşekkür ve adak kültünü yansıtır.[19]

Tuna Bulgar hükümdarı Kurum Han, 813 yılında İstanbul'u kuşatmadan önce çeşitli kurbanlar sunmuş ve akabinde kendini ve askerlerini kötülüklerden arındırmak amacıyla denizde yüzünü ve ayaklarını yıkamış, askerlerinin üzerine de su atmıştır.[20] Yine Tuva Türklerinde de su ile ilgili inançlarda koruyucu özellik görülmektedir. Su kaynağına rastlayan bir kişinin sudan üç avuç içip üç defa dua etmesi hâlinde yolunun açık olacağına inanılması, yolculuk, kader ve su arasında kurulan bağı gösterir. Eklem ağrıları ve benzeri rahatsızlıklarda şaman çağrılması, şamanın "su ruhları" aracılığıyla hastayı iyileştirmeye çalışması da aynı inanç sisteminin devamıdır.[21] Janyl Myrza Bapaeva'nın Kök-Ool Viktor Şagjapoviç isimli Tuvalı bir şamandan öğrenip derlediği dua metni su ruhlarına doğrudan hitabı içerir:
"İnci boncuk taşlı nehirlerin iyeleri! Kaybettiklerini arayalım, soralım. Altın gümüş taşlı ırmakların iyeleri! Hastayı tedavi edelim, buraya gelin!"[22]

Burada nehirler "inci, boncuk, altın, gümüş taşlı" olarak betimlenmekte; suyun zenginlik ve ihtişamla ilişkisi, ruhsal hiyerarşi ile birleşmektedir.

Başkurtların *Kübelek Tilev Batırları* destanında, İslami unsurlar eklenmiş olmasına rağmen suyun şifalı niteliği korunmuştur. Yeni doğmuş bebeğin "Evliye kuyusundan" alınan su ile yıkanması, "şifalı su"yun bebeğin canını esirgemesi ve ömrünü uzatması, İslamî söylem ile eski su kültünün iç içe geçtiği bir örnektir.[23] *Ural Batır* destanında Ural Batır'ın kılıcını yere saplayarak su kaynağı yaratması, ardından oğulları İdil, Yayık ve Hakmar'a bu kaynaktan hareketle gitmelerini söylemesi,[24] Türk tarihinin önemli nehirleriyle mitolojik bir bağ kurulmasına imkân vermiştir. Böylece büyük nehirler yalnız coğrafi birer gerçeklik değil, kahramanın eylemiyle yeryüzüne kazandırılmış kutsal hatlar olarak düşünülmüştür.

Başkurtlara ait *Kuzıykürpes ile Mayanhılıv* destanında Küsmes Han'ın oğlu Kuzıykürpes'in yol üzerindeki iki göl arasındaki suyu birinden alıp diğerine dökmesi, göllerin "yedi yıldır birbirlerine kavuşamamış" varlıklar olarak seslenmesi, göl ve su kütlelerine canlılık, irade ve duygusallık atfedildiğini göstermektedir.[25] Hakasların Tumat boyuna ait efsanede kadınların fazla sütü göle dökmeleri ve bu gölün "Ayranköl" adıyla kutsal kabul

edilmesi; gölde yüzmenin, hatta yüz yıkamanın günah sayılması, suyun hem doyurulan bir ruh hem de dokunulmaz bir kutsal alan olarak algılandığına işaret eder.[26]

Bütün bu anlatılar, suyun yalnız "yukarıdan aşağıya akan" bir madde değil, aynı zamanda "aşağıda bir âlem" yarattığına dair inançla birleştiğinde daha da derinleşir. Çin kaynaklarından *Youyang Zazu* ile onun derlemelerinden biri olan *Taiping Guangji*'de yer alan bir Göktürk anlatısı, Türklerin atası kabul edilen Yama ile bir göl ruhu arasındaki ilişkiden söz eder. Rivayete göre Göktürklerin *Şarı* adlı boyuna adını veren göl, *Aşıtag* boyunun adıyla anılan mağaranın batısında bulunur ve bu gölün koruyucu bir ruhu vardır. Göl ruhu her gün alaca karanlık çökerken ak bir geyiğe binerek Yama'yı karşılar, onunla birlikte suya girer ve ertesi gün yine onu sudan çıkarıp uğurlardı. Bu buluşma uzun yıllar sürer. Bir gün göl ruhu Yama'ya yaklaşmakta olan büyük av töreni sırasında atalarının doğduğu mağaradan altın boynuzlu ak bir geyiğin çıkacağını bildirir; Yama eğer bu geyiği okla vurmayı başarırsa ilişkilerinin sürekli hâle geleceğini, vuramazsa birbirlerinden kopacaklarını söyler. Ertesi gün av başladığında kehanet gerçekleşir: geyik mağaranın ağzında görünür. Yama hayvanın kaçmaması için askerlerine kuşatmayı sıklaştırmalarını emreder; fakat bir asker düşüncesizce davranıp geyiği öldürür. Bu olay Yama'yı derinden öfkelendirir. Suçlu gördüğü A'er bölüğünün beyini hemen oracıkta öldürür ve o günden itibaren Tanrı'ya insan kurban etme geleneğini başlatacağını ilan eder. Bu kurbanlar çoğu kez A'er boyundan seçilir; zamanla onların çocukları ve torunları da aynı yazgıyı paylaşır. Yama akşam olduğunda göl ruhunun yanına döner; ancak ruh, Yama'nın kan dökmesi nedeniyle artık birlikte olamayacaklarını söyler. Yama'nın "kan koktuğunu", artık kaderlerinin birleşemeyeceğini ifade ederek ilişkilerini sonlandırır.[27]

Göktürk efsanesine benzer bir hikaye Başkurtların *Zayatülek ile Hıvhılıv* destanında da görülmektedir. Zayatülek, ağabeylerinden kaçıp Asılıkül'e geldiğinde göl kenarında bir ışık huzmesi görür ve bu ışığı takip ederek güzelliğiyle kendisini büyüleyen su kızı Hıvhılıv'a ulaşır. Zayatülek'in Hıvhılıv ile evlenmeyi kabul etmesi üzerine su altı dünyasına götürülmesi, orada otlayan yılkılar, ırmaklar, göller ve türlü kuşlar görmesi, su altının da yeryüzüne benzer ama insan gözünden gizlenmiş bir yaşam alanı olarak tasavvur edildiğini gösterir. Su böylece iki âlem arasında bir eşik, bir geçit hâline gelir.[28]

Dede Korkut Hikayeleri'nde suyun bereket ve doğurganlıkla ilişkilendirilen niteliği açık biçimde görülür. Dirse Han oğlu Boğaç Han hikâyesinde, çocuk sahibi olabilmek için yapılan hayır işlerinden biri olarak kurumuş çaylara su salınması zikredilir.[29] Bu uygulama, suyun hem hayat verme hem de bereket gücüne duyulan inancın bir yansımasıdır. Basat'ın Tepegöz'ü Öldürmesi hikâyesinde ise tek gözlü mitolojik yaratık Tepegöz'ün dünyaya gelişi, pınar başında kanatlı bir peri kızı ile Konur Koca oğlu Sarı Çoban'ın birleşmesine bağlanır.[30] Su burada ne yalnızca arınma, ne de yalnızca bereket kaynağıdır. Aynı zamanda insan-peri, insan-öte âlem ilişkisini mümkün kılan bir temas alanıdır

Bu tür inanç ve tasavvurların günümüz Anadolu halk anlatılarında yaşamaya devam ettiği de görülmektedir. Aydın'ın Nazilli ilçesinde anlatılan "su kızı" efsanesinde, beyaz elbiseli bir varlığın geceleri ortaya çıkıp elindeki kaba su doldurduğu, ardından kuyunun etrafında

[30] s. 365.

kaybolduğu rivayet edilmektedir.[31] İsmet Zeki Eyuboğlu'nun derlediği Anadolu Efsanelerine göre; gece vaktinde peri kızları göllerde yıkanır kimi zaman da düğün yaparlarmış.[32] Bahsi geçen modern anlatılar, tarihsel su kültünün izlerinin tamamen silinmediğini, İslamî söylem, günlük hayat ve yerel folklor ile iç içe geçmiş hâlde varlığını sürdürdüğünü düşündürmektedir. Bütün bu örnekler birlikte değerlendirildiğinde, suyun Eski Türk dünyasında hem ekonomik zorunluluklar hem de kozmolojik tasavvurlar ekseninde şekillenmiş, geniş çerçevede bir kutsallık taşıdığı anlaşılmaktadır. Irmaklar, göller ve kaynaklar, hem sürüleri besleyen, hayata imkân veren unsurlar, hem de ruhlara, tanrıçalara ve görünmeyen varlıklara ev sahipliği yapan mekânlar olarak düşünülmüştür.

SONUÇ

Eski Türk topluluklarında suya atfedilen kutsallık, yalnızca bozkırın dayattığı bir yaşamsal zorunluluk olarak değil, aynı zamanda toplumun kozmolojik tasavvurunu belirleyen kurucu bir ilke olarak ortaya çıkar. Çeşitli verilerin birlikte değerlendirilmesi, su kültünün ekonomik faaliyetler, ritüel uygulamaları ve mitolojik anlatılar arasında bir ilişkiye sahip olduğunu göstermektedir. Peçeneklerin kışlak seçiminden Wu-sunların mevsimsel hareketliliğine, Kimeklerin İrtiş Nehri'ni tanrılaştırmasına kadar uzanan örnekler, suyun Türk topluluklarında hem hayatı mümkün kılan doğa unsuru hem de kutsal bir varlık olarak iki yönlü bir anlam taşıdığını kanıtlar. Hun, Göktürk ve diğer Türk devlet ve siyasal teşekküllerinde suyun ritüelleşmiş kullanımının izlenebilmesi, su kültünün yalnızca folklorik düzeyde değil, devlet ideolojisinin yapısına kadar sirayet ettiğini düşündürür. Zhou Shu'da kaydedilen yıllık mağara töreni ve beşinci ay kurbanı, kağanın kozmik düzen ile temasını pekiştiren ritüellerdir. Bu çerçeve, hükümdarın yalnızca siyasi bir otorite değil, aynı zamanda "yer ve su"yu temsil eden ve koruyan bir sembol olarak konumlandığını gösterir. Dolayısıyla su kültünün, Türk hakimiyet anlayışının sembolik ağırlık merkezlerinden biri hâline geldiği anlaşılmaktadır.

Sibirya coğrafyasında yaşayan Altay, Hakas, Tuva ve Kırgız topluluklarına ait destan ve ritüellerde suyun hem arındırıcı hem de aracılık eden bir güç olarak öne çıkması, inanç sisteminin tarihsel sürekliliğini güçlendiren önemli bir göstergedir. Altay destanlarında suya yönelen yakarış, Hakas yaşam suyu anlatısı, Tuva şamanlarının hastalığı suya aktarma uygulaması ve Kırgızların suyla ilişkilendirilmiş yağmur ritüelleri, suyun yalnızca doğal bir varlık değil, toplumsal düzeni, sağlığı ve bereketi düzenleyen bir unsur olarak kavrandığını açık biçimde ortaya koyar. Bu ritüel yapıların benzer işlevler taşıması, Türk kültür çevresinde suyla ilgili inançların coğrafyalar üstü bir ortak mantığa sahip olduğunu düşündürür. Mitolojik veriler, su kültünün toplumsal hafızadaki yansımasını daha da belirginleştirir. Göktürklerden Başkurtlara, Hakaslardan Oğuz anlatılarına kadar geniş bir sahada karşılaşılan "su ruhu", "su kızı", "su altı dünyası" ve "bereket kaynağı olarak su" temaları, suyun hem dünyalar arasında bir eşik hem de kaderin tecelli ettiği bir mekân olarak konumlandırıldığını gösterir. Bu anlatılarda su, hem sınır hem geçit, hem tehlike hem lütuf, hem yokluk tehdidi hem yeniden doğuş imkânı olarak çok yönlü bir karakter kazanır.

Tüm bu örnekler birlikte ele alındığında, su kültünün Eski Türk inanç dünyasında sıra dışı bir unsur olmadığı, aksine kozmolojik düşüncenin, siyasi meşruiyetin, toplumsal ritüellerin ve mitolojik hafızanın kesişim noktasında yer aldığı anlaşılmaktadır. Su, eski Türk toplumları

için yalnızca hayatı devam ettirmek için bir zorunluluk değil; düzeni sağlayan, sınırları belirleyen, bereketi ve felaketi yöneten, insan ile görünmeyen varlıklar arasında etkileşim sağlayan kutsal bir unsurdur. Bu nedenle su kültü, Eski Türk dini ve mitolojisinin okunmasında merkezî bir anahtar işlevi görmektedir. Farklı dönemlere ve coğrafyalara yayılan Türk topluluklarında inanç sürekliliğinin en istikrarlı göstergelerinden biri olarak karşımıza çıkmaktadır.

ÖZET

Papa VI. Paul'un Türkiye ziyareti, 1967 yılında gerçekleşmiş ve hem dinî hem de diplomatik açıdan önemli yankılar uyandırmıştır. Bu ziyaret, Katolik Kilisesi ile Doğu Ortodoks Kilisesi arasındaki ilişkilerin yumuşamasına yönelik atılan en somut adımlardan biri olarak değerlendirilmiştir. Papa VI. Paul, İstanbul'da Fener Rum Patriği I. Athenagoras ile bir araya gelmiş; bu görüşme, yüzyıllar süren ayrılığın ardından Hristiyan dünyasında uzlaşma arayışının güçlü bir sembolü olmuştur. Papa, İstanbul'daki programının sonunda Ankara'ya gitmek üzere uçakla hareket etmiştir. Ziyaret kapsamında Papa, Ankara'da Cumhurbaşkanı Cevdet Sunay ve Başbakan Süleyman Demirel gibi Türkiye Cumhuriyeti yetkilileriyle de görüşmüş ve Türkiye'nin mevcut yapısına duyulan saygı vurgulanmıştır. Papa VI. Paul, ziyaret boyunca barış ve karşılıklı anlayış mesajları vermiştir. Bu söylemler, Türkiye kamuoyunda genel olarak temkinli fakat dikkatli bir ilgiyle karşılanmıştır. Ziyaretin yankıları yalnızca Türkiye ile sınırlı kalmamış, uluslararası kamuoyunda da geniş yer bulmuştur. Özellikle Vatikan ile Ortodoks dünyası arasındaki ilişkilerin gelişmesi açısından tarihî bir dönüm noktası olarak görülmüştür. Sonuç olarak Papa VI. Paul'un Türkiye ziyareti, Soğuk Savaş ortamında önemli bir adım olarak tarihe geçmiştir.

ABSTRACT

Pope Paul VI's visit to Türkiye took place in 1967 and generated significant repercussions both religiously and diplomatically. The visit was regarded as one of the most concrete steps toward easing relations between the Catholic Church and the Eastern Orthodox Church. During his stay in Istanbul, Pope Paul VI met with Ecumenical Patriarch Athenagoras I of Constantinople; this meeting became a powerful symbol of the search for reconciliation within the Christian world after centuries of division. At the end of his program in Istanbul, the Pope departed by plane for Ankara. As part of the visit, Pope Paul VI also met with officials of the Republic of Türkiye, including President Cevdet Sunay and Prime Minister Süleyman Demirel, emphasizing respect for Türkiye's existing political structure. Throughout the visit, the Pope delivered messages of peace and mutual understanding. These statements were received by the Turkish public with cautious yet attentive interest. The impact of the visit was not limited to Türkiye; it also attracted wide attention in international public opinion. It was especially seen as a historic turning point in the development of relations between the Vatican and the Orthodox world. In conclusion, Pope Paul VI's visit to Türkiye went down in history as an important step taken during the Cold War era.

Keywords: Pope, Turkey, visit

1. GİRİŞ

Türkiye-Vatikan ilişkileri, dinî, diplomatik ve kültürel boyutlarıyla Türkiye'nin dış politikasında kendine özgü bir yere sahiptir. Resmî olarak iki farklı yapıyı temsil eden Türkiye Cumhuriyeti ile Vatikan arasındaki ilişkiler, büyük ölçüde azınlık hakları ve uluslararası barış konuları etrafında şekillenmiştir.

Türkiye Cumhuriyeti'nin laik bir devlet yapısına sahip olması, Vatikan ile ilişkilerin temel çerçevesini belirleyen unsurlardan biridir. Vatikan, Katolik dünyasının ruhani merkezi olmasının yanı sıra uluslararası hukukta bağımsız bir devlet statüsüne sahiptir. Türkiye ile Vatikan arasındaki diplomatik ilişkiler 1960 yılında resmen kurulmuş, Türkiye Vatikan nezdinde büyükelçilik açmış, Vatikan da Ankara'da diplomatik temsilcilik bulundurmuştur. Bu adım, Türkiye'nin Batı dünyasıyla ilişkilerini geliştirme politikasının bir parçası olarak değerlendirilmiştir.

İlişkilerin gelişiminde karşılıklı üst düzey ziyaretler önemli rol oynamıştır. Papa VI. Paul'ün 1967 yılında Türkiye'yi ziyareti, Türkiye-Vatikan ilişkilerinde bir dönüm noktası olmuştur. Bu ziyaret, yalnızca iki taraf arasındaki diplomatik bağları güçlendirmekle kalmamış, aynı zamanda Katolik ve Ortodoks kiliseleri arasında iletişim sürecini hızlandırmıştır. İstanbul'da Fener Rum Patriği Athenagoras ile yapılan görüşme, Hristiyan dünyasında tarihsel bir uzlaşma adımı olarak değerlendirilmiştir.

1967 yılında Cumhurbaşkanı Cevdet Sunay ve Başbakan Süleyman Demirel döneminde batıya açılmak için Vatikan ile aralıklı olarak görüşmeler yapılmış ve bu görüşmeler ülkede belirli kesimler arasında hoş görülmemekle beraber, gurur kırıcı olarak atfedilmiştir. Bu yakınlaşmalar sırasında Fener Rum Patriği Athenagoras'da bizzat dâhil olmuştur. Bu dönemde Vatikan, Türkiye'ye büyükelçiliğini getirmiştir. Türkiye Dışişleri Bakanı Çağlayangil ile Papa arasında bir takım hediyeleşmeler yaşayan bir takım görüşmeler gerçekleşmiştir. Katolik ve Ortodoks Mezheplerinin önderleri bu görüşmeler esnasında yakınlaşmaya başlamışlardır (Cumhuriyet, 25 Temmuz 1967; Milliyet, 25 Temmuz 1967).

Türkiye-Vatikan siyasi ilişkilerinin yanı sıra Papa VI. Paul, Patrikhane üzerinde dururken, aslında bu ziyaretlerin bu temasların bir diğer nedeni Türklerin Patrikhane'yi "yabancı ve yersiz bir varlık" olarak görmeleri neticesinde Ortodoks kilisesine mensup halkı dışlamaları, bunun sonucunda Katoliklerde dâhil 80.000 civarı Hristiyan ahalinin sayısının 30.000'e kadar düşmesidir. Bunun için Papa öncelikle Çağlayangil, ardından Cevdet Sunay ve Demirel ile görüşmüş, Ayasofya'da dua etmiş ve Türk devlet erkânı ile işbirliği içinde gibi görünmüştür. Bu gelişmelerin temelinde ise dönemin sancılı konularından biri olan Kıbrıs meselesi yatmaktadır. Kıbrıs meselesi, ikili temaslar esnasında birçok kez Papa'ya devlet erkânı tarafından dile getirilmiş ve desteğini istemişlerdir. Papa bütün Hristiyan tebaası üzerinde otorite sahibi olmaya başlamış ve bunun akabinde Patrikhane'de bunu kabul etmiştir. Patrik Athenagoras, yurt dışına çıkamadığı için, Papa VI. Paul bu konunun bir boyun eğme gibi gözükmemesi için bir jest mahiyetinde Türkiye'ye bizzat kendisi gelmeyi uygun görmüştür (Cumhuriyet, 25 Temmuz 1967; Milliyet, 25 Temmuz 1967).

2. PAPA VI. PAUL İSTANBUL'DA

Papa Paul VI, 25 Temmuz 1967'de yabancı bir uçak firması tarafından kendisine tahsis edilen ve "Paul VI." ismini taşıyan özel bir uçakla iki günlük bir ziyarette bulunmak üzere, sabah saat 10.30'da Yeşilköy havaalanına gelmiştir. Papa Paul, aralarında 3 Kardinal, 3 Başpiskopos ve 5 Piskopos'un bulunduğu 39 kişilik bir heyet ile gelmiştir. Papa burada, Cumhurbaşkanı Cevdet Sunay, Başbakan Süleyman Demirel ile diğer ilgililer tarafından karşılanmıştır. Papa'ya alanda

resmi ziyaretlerde olduğu gibi askeri tören yapılmıştır. Papa diğer karşılayıcılarla tanıştırıldıktan sonra hristiyan ruhani liderine doğru yürümüş ve sıra başındaki Patrik Athenagoras ile kucaklaşmıştır. Papa ayrıca İstanbul'daki Musevilerin liderli Hahambaşı ile de konuşmuştur. Burada bir konuşma yapan Patriğin ardından bir konuşma da Ortodoks Sinod'unun üyeleri huzurunda Papa Paul tarafından yapılmıştır (Cumhuriyet, 26 Temmuz 1967; Milliyet, 26 Temmuz 1967).[1]

[1] Metin Toker, 25 Temmuz 1967 tarihli "Suya Sabuna Dokunarak" isimli köşe yazısında Papa'nın ziyareti öncesi şu satırları kaleme almıştı: "Papa VI. Paul bugün İstanbul'da oluyor. Önce bir hatıramı anlatayım. 1961'de Papalığın Türkiye'deki Monsenyör Roncalli temsil ediyordu. Monsenyör Roncalli'nininki yarı resmî bir temsilcilikti. Vatikan devletinin değil, Katolik kilisesinin temsilcisiydi. O İstanbul'da otururdu ve bizim Vatikan'la bir ilişkimiz yoktu. Papalık temsilciliğinin yeri Pangaltı'da Notre Dame de Sion mektebinin arkasındaki dar sokaktaydı. Bugün, Papa VI. Paul'ün ikamet edeceği bina. Monsenyör Roncalli beni, o sıralarda çalıştığım gazetenin muhabiri olarak bir iki defa kabul etti. Papaların temsilcilerinin gazeteci kabul etmek adetleri yoktur ama kendilerine özgü bir hâdiseydi: O gün İkinci Dünya Savaşı sona ermişti ve ben İstanbul'daki bazı şahsiyetlerin intibalarını soruyordum. Monsenyör Roncalli ile Pangaltı'daki binada yaptığımız görüşme, tabir bir dostlukla geçti ama bir tanışıklığın başlangıcı olmuştu. Monsenyör Roncalli sonradan Vatikan'ın Paris'teki temsilcisi oldu, kardinalliğe yükseldi. Vatikan'ın efendisi ve XXIII. Cıovanı, yahut Jean, yahut John adıyla Papalık tahtına çıktı. 1963'lerin Monsenyör Roncalli'si beni Papa XXIII. Cıovanı olarak da ve Akis'in sahibi sıfatiyle Vatikan'a kabul etti. O gün ile birkaç ay sonra karşılaştıklarımız arasında bir yarım saatlikti. Fakat Papa hoşnuddu. İki defa gelip bakıştılar, bu arada bir kardinalin beklediğini hatırladılar. Papa beni, benimle konuşmaya devam etti. Türkiye'den, İstanbul'dan, Pangaltı'dan. Büyük adada bahsediyordu. Memleketimizden o yıl yaşamıştı ve bu, hayatının en güzel yılları olmuştu. Bir kaç kelime Türkçeyi hatırlıyordu. "Aferim, Teşekkür'üm, İndirim, Karagöz'üm…" Monsenyörlüğünü, ismini geri aldı. İsmet Paşa'nın kızını evlat edinmiş öğretmenliği ilgisi daha çok arttı. Boğaz ne kadar çok söyleniyordu. Papalığın Büyükada'da bir evi vardı. Tercümanlık, Büyükelçilik statüsü alıp da Ankara'ya gittiğinde o konuta sahip olmamış ve bu fazla bir masrafmış. Büyükada'daki evi ev sahibine iade edip kendisine getirmişlerdi. Fakat Ada'yı, o evi, oradaki günlerini hatırlamıştı ve kıyamamıştı…VI. Paul, Vatikan'dan dışarıya çıkan ender Papalardandır. Papa'nın ziyaret ettiği yerler şu veya bu memleket olmamış, Hristiyan dininin mukaddes mahalleri olmuştur. Papa İsrail'e, Ürdün'e ziyaret etmiş, Kudüs'e gitmiştir. Portekiz'i ziyaret etmemiş, Fâtima'yı görmüştür. Amerikalıya ziyaret etmemiş, New-York'taki insanlığın yeni forumu, Birleşmiş Milletler binasına gitmiştir. Türkiye'de de İstanbul'da, Efes'teki Meryemana evi ile ilgilendi. Ayasofya'yı ziyaret edecektir. Çünkü bundan yüzyıllar önce Papalık İstanbul'daki temsilcisi Ortodoks Kilisesinin Vatikan tarafında arzu edildiği buyurdu. Ortodoks Kilisesinin başına teklif edilmişti. Papa VI. Paul bu asırlık kalktığının bir nişanesi olarak ve bu mevki üzerinde dileme mahiyetinde Ortodoks Kilisesinin başına bulunduğu şehre gelmektedir. Bu bakımdan Fener Kilisesi, Papa'nın ziyaret edeceği yerlerin belki de en önemlisidir. Hristiyan kiliseleri arasındaki düşünümdeki iki kutbun iç bir karara varmış girişimleri ve Vatikan Kilisesinin başı bizzat burada Patrik Athenagoras ile görüşecek, hatta onunla birlikte ayin idare edilecek. Papa'nın gelişinin bütün dünyayı bu derece ilgilendirmesinin ve milletlerarası büyük basın heyetine harekete getirmesinin sebebi budur. Türk turizmine ve Türkiye'nin propagandasına yapacağı esnafî yardım. Papa'nın ev sahibi millete karşı emsalsiz ve masum bir hediyesi olacaktır. Papa, Türkiye'yi ziyaret etmediğine göre gönül isterdi ki, o İstanbul'da bulunan Türkiye Cumhurbaşkanının Şale Köşkünde, önce bir nezaket ziyareti yapsın, sonra Türkiye Cumhurbaşkanı kendisi, İstanbul'dan ayrılırken ziyaret hesaba alınan uçakla uğurlasın…."

Papa Paul VI ve Cumhurbaşkanı Cevdet Sunay daha sonra meydanda hazırlanmış paltform da her iki devletin milli marşlarını dinlemişlerdir. Kırmızı bir pelerin altında, göğsünde haç bulunan beyaz bir elbise giymiş olan Papa'nın, kepi milli marşlar çalınırken rüzgarın etkisiyle düşmüştür. Bir ilgili hemen, harekete etmeden marşları dinlemeye devam eden Papanın başına kepi yerleştirmiştir. Milli marşlar dinlenirken bir yandan da 21 pare top atımı yapılmıştır. Daha sonra Papa, tören birliğini denetlemiştir. Türk sancağının önüne geldiği an, iki elini göğe kaldırıp başını eğerek bir süre hareketsiz kalmış ve dua etmiştir (Cumhuriyet, 26 Temmuz 1967; Milliyet, 26 Temmuz 1967).

Ziyaret sırasında, türlü kargaşalıklar da meydana gelmiştir. Yeşilköy'de bir ara izdiham yüzünden protokol düzeni bozulmuş, Merkez Komutanlığı yetkililerinin müdahalesi gerekmiştir. Ayrıca bazı kimseler polisi aşarak Papa'nın olduğu bölgeye doğru ilerlemeye çalışmış, polis güçlükle engellemiştir. Ancak herhangi bir olay çıkmamış, ziyaret huzur içinde devam etmiştir (Cumhuriyet, 26 Temmuz 1967; Milliyet, 26 Temmuz 1967).

Sabahın ilk saatlerinden itibaren son yıllarda görülmemiş bir sıkılıkta olan emniyet tedbirleri merasim sonuna doğru yerli ve yabancı basın mensupları tarafından yarılmıştır. O ana kadar Papa'nın ancak çok uzaktan resminin çekilmesine izin verilmiş olan foto muhabirleri bu sayede Papanın yakından resmini alabilmiştir. Gazetecilerin alanda polislerin eşit aralıklarla tuttukları bir halatın ardında bırakılarak çalışmalarının kısıtlanması bilhassa yabancı basın mensupları arasında hayretle karşılanmıştır. Bu arada Avrupa televizyonları töreni aynı anda ülkelerine canlı yayın şeklinde aktarmışlar ve bütün Avrupa Merasimi anında izleyebilmiştir (Cumhuriyet, 26 Temmuz 1967; Milliyet, 26 Temmuz 1967).

Devlet Başkanı ve Papa daha sonra Şeref salonunun önünde hazırlanmış olan mikrofonların önüne gelerek karşılıklı birer konuşma yapmışlardır. Görüşmelerin başında Sunay Papaya hitaben yaptığı konuşmada eski papa 23. Jean'ın Türkiye-Vatikan dostluğu için yaptığı çalışmaları belirtmiş ve özetle şunları söylemiştir: "Zatıâlileri Türkiye'de barış ve hürriyet ideallerine bağlı bir memleket bulacaklardır. Biz, Birleşmiş Milletler yasasına sıkı sıkıya bağlıyız ve bütün imkânlarımızla dünyada ahenk ve işbirliğini gerçekleştirmek için devamlı surette gayret sarf etmekteyiz. Bu itibarla zatıâlilerinin bizim için de kıymetli olan ideal ve prensipleri yaymak maksadına matuf devamlı çabalarını büyük bir takdirle takip ettik. Yine bu sebepledir ki, siz dünya barışının, milletler ve insanlar arasında iyi ahengin büyük habercisi olarak karşılıyoruz." (Cumhuriyet, 26 Temmuz 1967; Milliyet, 26 Temmuz 1967).

Papa'da konuşmasına selefi 23. Jean'ı överek başlamış ve ziyareti hakkında şunları söylemiştir. "Türkiye insanlığın ortaklaşa memaliki diyebileceğimiz san'at ve kültür hizanelerine sahiptir.

Bunları tanımak ve kıymetlendirmekte Hristiyanlar sonunca kalmak istememektedirler. Sayın Cumhurbaşkanı, bunları söylemekten maksadım bu hatıraları ve mahalleri değerlendirmek, bütün milletlerin ziyaretine ve turistlerin istifadesine açmak için Türk hükümetince sarf edilen gayretlerin ne kadar yerinde olduğunu belirtmek içindir." (Cumhuriyet, 26 Temmuz 1967; Milliyet, 26 Temmuz 1967).

Türkiyeye gelişimiz Türkiye-Vatikan dostluğunun ve Katolik kilisesinin Türk Milleti hakkında beslediği takdir hislerinin bir ifadesidir. Bu ziyaret aynı zamanda, zatıalimizin işaret Buyurdukları, barış, hürriyet ve adalet ideallerinin Gerçekleşmesi için imkanlarımız nisbetinde yardımcı olmamıza ümit veren ve bütün seyehatlerimizde bize rehber olan barış ve kardeşlik ruhununda bir ifadesidir. Ekselanslarına, Türk hükümetine ve bütün Türk milletine en halisane temennillerimizi takdim ederiz." (Cumhuriyet, 26 Temmuz 1967; Milliyet, 26 Temmuz 1967).

Görüşmeler bittikten sonra Cevdet Sunay Papa'ya gayet büyük boyda, Venedik meydanındaki Kule işlemelerini ihtiva eden bir saati hediye etmiştir. Papa da Sunay'a, 23 Jeana ait Vatikan'da bulunan minyatür bir heykelle, bu ziyaret için Vatikan'da çıkartılan kıymetli alaşımlardan basılmış para ve madalyonlardan düzenlenmiş bir koleksiyonu hatıra olarak vermiştir (Cumhuriyet, 26 Temmuz 1967; Milliyet, 26 Temmuz 1967).

Konuşmalar tamamlandıktan sonra Papa beraberinde Vali Vefa Poyraz olduğu halde geceyi geçireceği Vatikan temsilciğine gitmiş ve kısa bir dinlenmeden sonra temsilciliğin karşısındaki Saint Esprit Kilisesine geçerek bir dini ayin yönetmiştir. Papa klisenin bulunduğu sokağa gelince büyük bir çan devamlı çalınmaya başlamıştır. Papa'ya bütün yol boyunca üç özel muhafız, özel doktoru ve 11 kişilik maiyeti refakat etmiştir. Gezisinden duyduğu memnuniyeti belirten Papa, üç dilde kendisine gösterilen yakınlıktan dolayı teşekkür etmiştir.

Papa daha sonra Şale Köşküne giderek giderek Devlet Başkanı Cevdet Sunay ve Başbakan Süeyman Demirel ile bir buçuk saatlik bir görüşme yapmıştır. Papa Paul havaalanında olduğu gibi burada yaptığı konuşmasında, Türkiye'de kendisine gösterilen yakınlıktan dolayı duyduğu memnuniyeti belirtmiş ve özetle, "Türkiye'ye gelişimiz, Katolik Kilisesinin Türkiye'ye ve Türk milletine karşı duyduğu takdir hislerinin bir ifadesidir." demiştir. Cumhurbaşkanı Sunay da konuşmasında şunları söylemiştir: "Derin bir basiret ve dünyada barış ve bütün insanlar arasında kardeşlik davasına sarsılmaz bir bağlılıkla dolu görüşlerinize büyük önem veriyoruz. Zatıâlileri Türkiye'de barış ve hürriyet ideallerine bağlı bir memleket bulacaklardır Türk milleti tarihi boyunca daima derin humanizminin tesanüd zihniyetinin iman hürriyetlerine karşı olan büyük saygısının delillerini verdiği gibi din ve ırk tefrikçiliği gibi mefhumları reddettiğini de göstermiştir." (Cumhuriyet, 26 Temmuz 1967; Milliyet, 26 Temmuz 1967).

Bu görüşmede, üzerinde en çok durulan konu Orta Doğu buhranı ve Kudüs meselesi olmuştur. Dünya barışını tehdit eden diğer dünya sorunları yanı sıra Kudüs meselesi hakkında iki devlet lideri görüşlerini belirtmişlerdir. Daha sonra Başbakan Demirel tarafından Papa'ya Türkiyenin Kıbrıs politikası anlatılmıştır. Görüşmelere yakın bazı çevreler, Papa'nın Kıbrıs meslesini dikkatle dinlediğini fakat herhangi bir cevap vermediğini söylemişlerdir. Papa bu arada Sakarya depreminde zarar görenlere 10 bin dolarlık bir bağışta bulunmuştur (Cumhuriyet, 26 Temmuz 1967; Milliyet, 26 Temmuz 1967).

Papa Şelale Köşkü'ndeki bu görüşmeden sonra Vatikan delegasyonunda tek başına yemek yemiş, saat 15.40'ta ikinci görüşmesini yapmak üzere Dolmabahçe Sarayı'na gitmiştir Cumhurbaşkanı Başbakan ve Dışişleri Bakanı Çağlayangil'in katıldığı ve 20 dakika süren bu ikinci görüşmeden sonra Boğazda kısa bir motor gezintisi yapmıştır. Gezide Ppa ile birlikte Cumhurbaşkanı Sunay ve Dışişleri Bakanı Çağlayangil bulunmuştur. Daha önceden Papayı deniz tutuğu bildirildiğinden "Halas" motoruyla yapılan gezi süresi kısaltılmıştır. Papa bu gezi sonrası Cevdet Sunay'a veda etmiş ve Dışişleri Bakanı ile birlikte Topkapı Sarayına giderek bazı bölümlerini dolaşmış ve kitaplıktaki bazı Kuranları incelemiştir. Topkapı'dan sonra Ayasofya'ya gidilmiştir. Camilerdeki mihrap yerini tutan "Apisi"in önüne gelindiğinde Papa yanındaki Dışişleri Bakanı Çağlayangil'e dönerek "Kısa bir süre dua edebilir miyim?" demiştir. Çağlayangil'in şaşırarak sustuğunu gören Papa hemen diz çökmüş ve "Ave Maria- Meryem ana" duasını etmiştir. Böylece Papa İstanbul'un fethinden beri Ayasofya'da dua edebilen ilk Hristiyan dini lideri olmuştur. İlgililer Papa'nın dua etmek için eğildiğini görünce şaşırmışlar, koruma memurları yere oturup, elele tutuşarak herhangi bir olay olmasını önlemişlerdir. Kısa bir duraklamadan sonra kortej Ayasofya'nın Müdürü Feridun Dirimtekin'in verdiği bilgiler sonrası yoluna devam etmiştir. Papa Paul müze müdürüne, "Böylesine önemli bir anıtın sorumluluğunu taşımak ağır bir görevdir." Demiştir (Cumhuriyet, 26 Temmuz 1967; Milliyet, 26 Temmuz 1967).

Papa Dışişleri Bakanı Çağlayangil ile de vedalaştıktan sonra kıyafetlerini değiştirmiş ve Fener Patrikhanesine bir ziyaret yapmıştır. Papa Paul VI. ile Patrik Athenagoras hıncahınç dolu Patrikhanenin dış avlusunun ortasında kucaklaşmışlardır. Bu arada Ayayorgi Kilisesinin çanları çalınmıştır. İki Hristiyan lideri sonra kiliseye girmişler ve koronun okuduğu duaları dinlemişlerdir. Sonra papa bir konuşma yaparak Hristiyan kilisesinin dünya barışında daha etken olması için mezhepler arasında bir dayanışma kurulmasını istemiştir. Patrik Athenagoras'ta cevaben Doğu Kilisesinin de bunu arzuladığını söylemiştir. Daha sonra iki ruhani lider iki saate yakın özel bir görüşme yapmışlardır. Papa Paul, Patrikhaneyi ziyaretinden

sonra Vatikan delegasyonuna dönmüş ve diplomatik misyon şefleri ve bazı özel ziyaretçileri kabul etmiştir. Ziyaretini iade etmek üzere gelen Athenagoras ile birlikte St. Esprit Kilisesinde bir ayin gerçekleştirmiştir (Cumhuriyet, 26 Temmuz 1967; Milliyet, 26 Temmuz 1967).[2]

Bu arada Türkiye Milli Talebe Federasyonu Yedd-i Adil'i olan İstanbul Üniversitesi Talebe Birliği Başkanı Ufuk Şehri yayınladığı bir bildiri ile devlet ve hükümet başkanlarının Papa'yı karşılamalarını kınamıştır (Cumhuriyet, 26 Temmuz 1967; Milliyet, 26 Temmuz 1967).

MTTB'de basın toplantısı yapan bir grup öğrenci Papa'ya Ayasofya'da dua etmesi için izin verilmesini protesto etmiştir. Öğrenciler basın toplantısından sonra ellerinde Papa'yı göndereceksi Fatih portresi olduğu halde de topluca Müze'ye girmiş, bekçilerin müdahalesine rağmen parmaklıkları aşarak saf halinde namaz kılmışlardır (Cumhuriyet, 26 Temmuz 1967; Milliyet, 26 Temmuz 1967).

Birlik Başkanı İsmail Kahraman şu açıklamayı yapmıştır: "Papa Altıncı Paul'un bazı ifadeleri dost ve müspet görüşlere sahip bir din liderinin fikirleri olarak nitelendirilemez. Birçok Papa'nın Türkiye'de bir Hristiyan üniversitesi açma teklifini bir hezeyan olarak değerlendiriyoruz…Biz Türkiye'de 'fetih'in bir küllî hâline getirilmesini istemiyoruz. Papa'nın Athenagoras ile yaptığı görüşme herhalde Türkiye'nin hayrına bir temas değildir. Altıncı Papa'nın misafir edildiği memleketin ruhani liderleriyle neden temas etmediği sorusu gelmektedir. Kiliselerin birleştirilmesi ve misyoner faaliyetleri İslâm dünyasının gelişmesine mani olmayacaktır." (Cumhuriyet, 26 Temmuz 1967; Milliyet, 26 Temmuz 1967).

---

[2] "Dış basının Papa Paul VI'nın Türkiye ziyaretine gösterdiği ilgi devam ediyor. İngilizlerin ünlü Pazar gazatesi. "Observer" "Papa İstanbul'a niçin gidiyor?" diye sormakta ve şu cevapları vermektedir: "Papa Patrikhaneye yardım amacını gütmektedir. Ankara'daki hükümet, daha çok Kıbrıs meselesinin yarattığı gerginlik yüzünden, Türkiye'deki Ortodoks Hristiyanlığına sırt çevirmiştir. Birkaç yıl içinde İstanbul'daki Hristiyanlığına sırt çevirmiştir. Birkaç yıl içinde İstanbul'daki Hristiyan sayısı 80.000 den, 30.000 e düşürülmüştür. Türklerin "Yabancı ve yersiz bir varlık" olduğu gerekçesiyle Patrikhaneyi ülkelerinden uzaklaştırmak istediklerine inanılmaktadır. Papanın ayağına kadar giderek bir dayanışma gösterisinde bulunması Patrik Athenagoras'ın durumunu kuvvetlendirebilir. Papa'nın Hristiyan Dünyasındaki üstünlüğünü Ortodoksların bile kabul etmelerine rağmen Athenagoras'ı daha önce ziyaret etmekle, Paul VI samimiyet ve iyi niyetini ispatlamış ve iyi niyetini ispatlamış olacaktır. Böylece ilk ziyaretin Athenagoras tarafından yapılmasının bazı çevrelerle bir boyun eğme jesti biçimde yorumlanması önlenmiş olacaktır. Üstelik Patrik, Türk sınırları dışına çıkarsa, geri dönmesinin yasaklanması tehlikesi vardır."

"Osservatore Romano" gazetesi, dünkü başyazısında Ortadoğu'daki gerginliğin giderilmesinde Türkiye'nin önemli rolü olduğuna değinilmekte ve Papa'nın ziyaretinin dini olmakla beraber siyasal bakımdan da önem taşıdığını ifade etmektedir. Gazete, Papa- Sunay görüşmesinin, Katolik kilisesinin "iyi niyetli insanlarla" doğrudan doğruya teması cümlesinden olduğunu kaydetmektedir (Cumhuriyet, 25 Temmuz 1967; Milliyet, 25 Temmuz 1967).

Dışişleri Bakanı İhsan Sabri Çağlayangil ise Papa Paul'un Ayasofya'ya giden yoldaki dua ile ilgili olarak konuşurken şunları ifade etmiştir: "300 bin vatandaşımızın kiliselerini açıyorlar. Papa'nın Ayasofya'da dua etmesi çok mu önemlidir? Papa Ayasofya'yı ziyaret ederken en mukaddes bildiği yerde, içinden gelen bir dua olarak yaptı. Bunun üzerinde durulmamalıdır. Bizim için Türkiye o günkü Türkiye değildir." (Cumhuriyet, 26 Temmuz 1967; Milliyet, 26 Temmuz 1967).

3. PAPA VI. PAUL İZMİR'DE

Papa, İstanbul'daki programını tamamladıktan sonra 26 Temmuz günü Dışişleri Bakanı İhsan Sabri Çağlayangil ile birlikte İzmir'e gitmiştir. Papa Paul İzmir'e gitmek için sabah Yeşilköy'den ayrılırken başta İstanbul müftüsü olduğu halde bütün dini liderlerin elini sıkmış sadece Athenagoras ile kucaklaşmış ve Vatikan'a yaptığı daveti tekrarlamıştır. Patrik Athenagoras bunun üzerine papayı tekrar öpmüştür. Papa Paul İstanbul'dan ayrılmadan önce İstanbul valisine iki çek daha vermiş ve bunlardan 100.000 liranın yoksullara dağıtılmasını istemiş, diğer 400 bin liralık kısmını da Adapazarı felaket dediler için bıraktığını söylemiştir. Papa böylece Türkiye'deki muhtaçlara daha önce verdiği 10 bin dolarlık yardımıyla birlikte 60 bin dolar yaklaşık olarak 600 bin lira yardım bırakmıştır (Cumhuriyet, 27 Temmuz 1967; Milliyet, 27 Temmuz 1967).

Papa'nın uçağı saat 12.35'te Çiğli Havaalanına inmiş ve İzmir Valisi Nihat Kitapçı, İzmir Sıkıyönetim Kumandanı Kurmay Başkanı Kıber, İzmir Milli Eğitim Müdürü Samim Kara ve diğer ileri gelenler tarafından törende karşılanmıştır. Papa daha sonra arabası ile doğruca Efes'e hareket etmiştir. Arabasından iner inmez etrafında toplanan büyük kalabalık Papaya doğru koşmuş ve kalabalığın büyük bir kısmı Papa'nın önünde diş çökmüştür. Halkı eliyle takdis eden Papa çifte kiliseler Meryem Ana kilisesinin kapısına doğru ağır adımlarla ilerlemiş ve tahta haçın önünde diz çökerek dua etmiştir. Papa çifte kiliselerde yaptığı kısa bir konuşmada Efes'in Hristiyanlarca kutsal bir yer olduğunu Meryem Ana'nın buraya Sen Jan tarafından getirildiğini Meryem Ana'nın bu bölgede yaşadığını ifade etmiş ve hepimiz birlik ve kardeşlik havası içinde yaşayalım insanlar birleşip barış içinde yaşamalıdır. Bu şarttır buraya kadar bu iş için gelip dua ediyoruz. Dünkü görüşmelerde kiliselerin birleşmesi için ileri bir adım atılmıştır. Türk hükümetine bize böyle bir fırsat verdiği için teşekkür ederiz." demiştir. Güneş altında ısının 55 dereceyi bulması sebebiyle Efes Harabeleri gezilmeden Meryem Ana evine hareket edilmiştir Papa Paul saat tam 15.55'te Meryem Ana'nın Bülbül Dağı'ndaki ikametgahına gelmiş ve burada toplanan 3000 kişi tarafından "Viva il Papa" diye tezahüratla karşılanmıştır Papa 6. Paul, Meryem Ana'nın evinde yüzlerce kamera filmi makinesi ve mikrofon karşısında üzeri kırmızı

kadife ile örtülmüş kürsü Pridyo üzerinde diz çöküp dua etmiş ve hacı olmuştur Papa'nın Meryem Ana evindeki duası 5 dakika sürmüş Papa'nın yaptığı ve hoparlörle verilen duayı evin çevresinde bulunan binlerce Hristiyan Katolik hep bir ağızdan tekrarlamıştır. Meryem Ana evinden çıkan Papa, doğruca ağır adımlarla Meryem Ana evi papazının bulunduğu lojmana gitmiş ve burada 45 dakika dinlenmiştir. Bir gümüş tastan Meryem Ana'nın evi altından akan şifalı sudan isteten ve iki bardak içen papa daha sonra Selçuk ve İzmir'e hareket etmiştir. Papa 6. Paul Meryem anaya girişinde bir ara fenalık geçirmiştir. Sıcaklığın fazla olması ve kalabalıktan halsiz düşen papaya Vatikan temsilcisi ve kardinaller kollarından tutarak yardımcı olmuşlardır Papa'nın çok sıcaktı yürümek zorunda kalması yüzünden Meryem Ana evine 300 metre mesafede kapalı tutulan yol ilk defa açılmış ve Papa'nın arabası Meryem Ana evine 50 metreye kadar yaklaştırılmıştır (Cumhuriyet, 27 Temmuz 1967; Milliyet, 27 Temmuz 1967).

İzmir'de de Dom kilisesini ziyaret eden Papa saat 19.00'da Roma'ya hareket etmeden önce İstanbul'da temas ettiği dini liderlerin, çok büyük ruh temizliğiyle, birlik ve bütünlüğüne sahip olduklarını, bu durumun gelecek için büyük ümitler doğurduğunu ve kendisinin de bu birliğin gerçekleşmesi için dua ettiğini söylemiştir. Papa, hizmetçinin önüne gelip kendisini karşılayan ve hasretle kucaklayan halkın gösterişlerinden çok duygulanmış ve «Sizin sevginiz, benim için büyük bir kuvvet ve teselli kaynağıdır» demiştir. Genç sivil memur, askeri ve evrensel otoritesini kullanan Papa, havaalanında halkın coşkun tezahüratları arasında uçağa binmiş ve Roma'ya dönmüştür (Cumhuriyet, 28 Temmuz 1967; Milliyet, 28 Temmuz 1967).

Türkiye'de yaptığı iki günlük ziyaretten sonra İtalya'ya dönen Papa Katolik ve Ortodoks kiliseleri arasındaki yakınlaşma ve birleşmenin sağlanması için ileriye doğru adımlar atılabileceğini söylemiştir. Roma'nın 30 kilometre güneyinde bulunan Castel Gandolfo'daki yazlık ikametgâhına gelen Papa, gerek sivil makamlarla gerekse Ortodoks Kilisesi yetkilileri ile olan temaslarından duyduğu memnuniyeti dile getirmiştir (Cumhuriyet, 28 Temmuz 1967; Milliyet, 28 Temmuz 1967).

CKMP'li Kastamonu milletvekili Hakkı Yılan oğlu Papa Paul'un karşılaması hakkında başbakana bir soru önergeyi Meclis Başkanlığına sunmuştur. Önergede özetle şöyle denilmektedir (Cumhuriyet, 28 Temmuz 1967; Milliyet, 28 Temmuz 1967):

1. Papa Paul'u Cumhurbaşkanımın karşılaması protokol kaidelerine uygun mudur?
2. İslam dininin en büyük reisini kadastro memurundan farksız gören hükümet erkânı, Athenagoras'ın misafirini İstanbul'da karşılaması lüzumunu kendi laiklik anlayışı ile nasıl bağdaştırmaktadır?
3. Ayasofya'da Papa'nın duasına müsaadesi laiklik anlayışıyla kabili telif midir?

4. Ortodoks ve Katolik Kiliselerinin barışmalarıyla laik Türkiye'nin hükümet adamları niye ilgilenmektedir?

4. SONUÇLAR VE DEĞERLENDİRME

Papa VI. Paul, 25 ve 26 Temmuz 1967 tarihlerinde Türk topraklarına ayak bastı; bu ziyaret, İstanbul'un "Konstantinopolis" olarak anılmamasından itibaren İstanbul'a yapılan ilk papalık seyahati olması nedeniyle pek çok açıdan tarihi bir önem taşımaktaydı.

İstanbul'daki Kutsal Ruh Katedrali'nde bir kutlamaya katıldıktan sonra, Ortodoks Başepiskoposu Ekümenik Patrik I. Athenagoras ile birlikte Aziz George Ortodoks Patriklik Kilisesi'ni ziyaret etti. Bu buluşma, 1054 yılında Kilise'nin bölünmesinden 910 yıl sonra Doğu ve Batı Kiliselerinin liderlerinin dünyada buluşabildiği tek yer olan Kudüs'teki Kutsal Topraklara yaptığı hac ve barış yolculuğu sırasında I. Athenagoras ile barış alışverişinde bulunduktan 3 yıl sonra gerçekleşti.

VI. Paul ayrıca Ermeni Patriği, Müslüman ve Yahudi cemaatlerinin liderleri ve ziyaretini sıcak ve samimi bir şekilde karşılayan Türk yetkililerle de bir araya geldi. Dönemin Cumhurbaşkanı Sayın Cevdet Sunay ile de bir araya gelerek Orta Doğu ve Kıbrıs'taki sorunları ele aldı. Sunay, Papa'nın barış lehindeki çabalarının altını çizdi.

Ertesi gün İstanbul'daki Aziz Antuan Bazilikası'nda ayin yaptıktan sonra yolculuğu İzmir'e devam etmiş, burada önce yetkililer, yerel halk ve imanlılarla görüşmüş, ardından Efes'e geçerek Meryem Ana'nın evini ziyaret etmiş, böylece Meryem kültünü teyit etmiş ve Efes'teki imanlıların yanı sıra Doğu Ortodoks Kiliselerinin temsilcilerine de hitap etmiştir. Meryem'den Kuran'da yaklaşık elli kez bahsedilir ve Müslümanlar tarafından da saygı görür. İzmir'deki Aziz Yuhanna Katedrali'nde düzenlenen bir kutlama bu resmi geziyi sona erdirdi, ancak ziyaretin tek gölgesi VI. Paul'un Ayasofya Müzesi'nde dua etmesiydi ki bu açıkça 1453'ten bu yana bir Hristiyan tarafından yapılan ilk resmi dua idi!

Bu ziyaret Katolik dünyası ile Ortodoks Patrikhanesi arasındaki ekümenik ilişkilerin yenilenmesine ve bu iki Kilisenin birliğine yönelik temel bir adıma işaret etmekteydi. Temel bir ekümenik belge olan *"Doğu ve Batı Kiliselerinin Birliği Şartı"* 25 Temmuz'da İstanbul'daki Kutsal Ruh Katedrali'nde Papa ve Patrik Athenagoras'ın huzurunda okundu.

O zamandan bu yana Papa Franciscus ve Patrik I. Bartholomeos, 2013'ten bu yana yaptıkları sayısız görüşmenin (Kudüs, Roma, vs.) ve Patriğin 2014'te İstanbul'daki Aziz Andreas Yortusu'na katılması için Papa Franciscus'u davet etmesinin de gösterdiği gibi, bu yönde çalışmaya devam etmişlerdir. Ayrıca, 2025 yılında kutlanacak olan İznik Ekümenik Konsili'nin

1700. yıldönümü vesilesiyle Patrik, Haziran sonunda *"Bu, tüm kalbimle yapmak istediğim bir seyahat"* diyen Papa'yı bir kez daha davet etti.

ÖZET

Papa II. John Paul'un Türkiye ziyareti, 28-30 Kasım 1979 tarihleri arasında gerçekleştirilmiş ve hem dinî hem de diplomatik açıdan önemli sonuçlar doğurmuştur. Ziyaret, Vatikan ile Türkiye arasındaki ilişkilerin yanı sıra Katolik Kilisesi ile Ortodoks dünyası arasındaki diyaloğun güçlendirilmesi bakımından da özel bir anlam taşımıştır. Papa'nın Türkiye'ye gelişi, Soğuk Savaş döneminde dinler arası ve mezhepler arası yakınlaşma arayışlarının hız kazandığı bir süreçte gerçekleşmiştir. Papa II. John Paul, ziyaret kapsamında Ankara'da dönemin Cumhurbaşkanı Fahri Korutürk ve devlet yetkilileriyle görüşmüş, Türkiye'nin mevcut yapısına ve din özgürlüğüne verdiği önemi vurgulamıştır. İstanbul'da ise Fener Rum Patrikhanesi'ni ziyaret ederek Ekümenik Patrik I. Dimitrios ile bir araya gelmiş, bu görüşme Katolik ve Ortodoks kiliseleri arasındaki ilişkilerin geliştirilmesi açısından sembolik bir adım olarak değerlendirilmiştir. Papa, karşılıklı anlayış, hoşgörü ve barış mesajları vererek dinlerin çatışma değil uzlaşma aracı olması gerektiğini dile getirmiştir. Ziyaret süresince Ayasofya ve Sultanahmet Camii gibi tarihî ve dinî mekânları da gezen Papa II. John Paul'un Türkiye ziyareti, uluslararası kamuoyunda geniş yankı uyandırmıştır. Bu ziyaret, Vatikan-Türkiye ilişkilerinin gelişmesine katkı sağlamıştır.

ABSTRACT

Pope John Paul II's visit to Turkey took place between 28 and 30 November 1979 and produced significant outcomes in both religious and diplomatic terms. The visit carried special importance not only for relations between the Vatican and Turkey, but also for strengthening dialogue between the Catholic Church and the Orthodox world. The Pope's arrival in Turkey occurred during the Cold War era, at a time when efforts toward interfaith and interdenominational rapprochement were gaining momentum. As part of the visit, Pope John Paul II met in Ankara with President Fahri Korutürk and senior state officials, emphasizing Turkey's existing political structure and the importance it attached to freedom of religion. In Istanbul, he visited the Ecumenical Patriarchate of Constantinople and met with Ecumenical Patriarch Dimitrios I; this meeting was regarded as a symbolic step toward improving relations between the Catholic and Orthodox Churches. The Pope conveyed messages of mutual understanding, tolerance, and peace, stressing that religions should serve as instruments of reconciliation rather than conflict. During his stay, Pope John Paul II also visited historical and religious sites such as Hagia Sophia and the Blue Mosque. His visit to Turkey attracted wide international attention and contributed to the development of relations between Turkey and the Vatican.

Keywords: Pope, Turkey, visit

1. GİRİŞ

1979 yılında Papa II. John Paul'ün Türkiye ziyareti, Soğuk Savaş döneminin hassas dengeleri içinde gerçekleşmiş ve geniş yankı uyandırmıştır. Bu ziyaret sırasında Papa, hoşgörü ve barış mesajları vermiş, Türkiye'nin farklı din ve kültürleri bir arada barındıran tarihsel mirasına vurgu yapmıştır. Ayrıca Vatikan'ın Türkiye'nin laik yapısına ve din özgürlüğü anlayışına duyduğu saygı bu temaslarda açıkça ifade edilmiştir.

2006 yılında Papa XVI. Benedict'in Türkiye ziyareti ise hem dinî hem de siyasi açıdan dikkat çekmiştir. Ziyaret, Papa'nın Regensburg konuşması sonrasında oluşan tartışmalı atmosferde gerçekleşmiş; buna rağmen Türkiye'de verdiği ılımlı mesajlar olumlu bir etki oluşturmuştur.

Bu ziyaret sırasında Türkiye'nin Avrupa Birliği sürecine verilen destek de uluslararası basında geniş yer bulmuştur.

Vatikan, Türkiye'yi Doğu ile Batı arasında bir köprü olarak görmekte; özellikle Müslüman çoğunluklu bir ülkede Hristiyan azınlıkların durumu ve din özgürlüğü konularını yakından takip etmektedir. Türkiye ise bu ilişkileri, farklı inançlar arasında hoşgörü ve karşılıklı anlayışı geliştiren bir diplomasi alanı olarak değerlendirmektedir.

2. PAPA'NIN ZİYARETİ ÖNCESİ YORUMLAR

Papa II. Jean Paul'ün Türkiye'ye yapacağı ziyaretin hazırlıkları çok yönlü ve yoğun şekilde sürdürülürken, yerli ve yabancı kaynaklar, Katolik dünyasının ruhani lideri olan Papa'nın "Vatikan Devlet Başkanı" sıfatıyla ilk defa halkı Müslüman olan bir ülkeyi resmen ziyaret için seçmesinin siyasal değerlendirmesini yapmıştır. Bu yorumlarda ortak nokta, "Papa'nın bu ziyareti gerçekleştirmek Türk devletini görmek, Türk yöneticileriyle tanışıp görüşmek" amacıyla yaptığı, Meryem Ana'nın kabrini ziyaret etmek ve Rum Ortodoks Patriği ile görüşmek sorunlarının da bu vesileyle gerçekleştirileceği hususudur. Jean Paul, Türkiye'ye gelmek istediğini daha önce kendisi Türk hükümetine duyurmuş, o günlerde istifa etmiş ve geçici olarak işbaşında bulunan Ecevit hükümeti de "Bundan büyük memnunluk duyulacağını, aynı arzunun Türk tarafında da bulunduğunu" derhal Vatikan'a iletmiştir. Böylece, Türk tarihinde ilk defa bir Papanın Vatikan Devlet Başkanı sıfatıyla Türkiye'ye gelmesi mümkün olmuştur (Milliyet, 28 Kasım 1979).

Polonya asıllı Papa Jean Paul'ün, bu yılki "barış" gezilerinin beşinci ülkesi olarak Türkiye'yi seçmesinin anlamı konusunda şu görüşler ileri sürülmüştür: "Papa, Türkiye'nin Avrupa-Asya-Afrika arasındaki jeopolitik konumunun önemini iyi bilmekte, ayrıca Türkiye'nin Orta Doğu bölgesindeki ağırlığını değerlendirmektedir. Bu bölgede İsrail-Arap anlaşmazlığı nedeniyle sürüp gitmekte olan çatışmalar ve huzursuzluk, giderek din ve ırk ayırımı temeline oturtulmakta, siyasal anlaşmazlıklar, halklara mal edilme eğilimi göstermektedir. Böyle bir ortamda halkının yüzde 99'u Müslüman olduğu halde, laik devlet anlayışıyla ve Atatürk'ün devrimleri doğrultusunda, başka ülkelerle ilişkilerini din temeline dayandırmayan Türkiye, Papa'nın "Dünyada barış ve uzlaşmayı sağlama" çabaları açısından ilginç bir ülkedir. Papa, Türkiye'nin bu konuda küçümsenemeyecek rol oynayabileceğini düşünüyor olabilir ve buraya Vatikan Devlet Başkanı olarak gelmekle, Hıristiyan âleminin dikkatini de Türkiye'ye yöneltmektedir. Papa'nın Polonya asıllı olması da bu ziyaretin gerekçelerinden biri sayılmaktadır. Tarih boyunca, özellikle Osmanlılar döneminde, Türklerle Polonyalılar arasındaki ilişkilerin son derece olumlu, dostça cereyan etmesi, Osmanlıların Polonya'yı

Cermen baskı ve esaretinden kurtarma çabaları, Polonya işgal altında kaldığı 150 yıl içinde Osmanlı Sarayı'nda bir temsilci tutulması, Papa'nın bu tarihi dostluğu değerlendirme fırsatı aramasına neden olmuştur. Papa'nın kendisinden önce 1967'de papa olan 6. Paul'un Ortodoks ve Katolik kiliseleri arasındaki anlaşmazlıkları gidermek için İstanbul'a gelmesiyle başlatılan süreci devam ettirmek ve mutlaka bir sonuca ulaştırmak amacındadır. Ayrıca, 1961 yılında Efes'te Meryem Ana'nın kabrinin bulunduğu Bülbüldağı'nı ziyaret ederek burasını Hıristiyanların "hac yeri" olarak ilan etmiş olan ve ilk ziyareti gerçekleştiren papa gibi, II. Jean Paul da aynı haccı gerçekleştirecek, böylece Efes'te Meryem Ana kabrinin tüm Hıristiyanlar için kutsallığı bir kere daha doğrulanmış olacaktır. Bugüne kadar Türkiye'ye gelmiş olan papaların Vatikan Devlet Başkanı sıfatını taşıdıkları halde Ankara'ya gelmemiş olmaları karşısında, Jean Paul'un Türkiye Cumhurbaşkanı'nın konuğu olarak Ankara'da bir gece kalması ve resmi görüşmeler yapması da ayrı bir anlam taşımaktadır.” (Milliyet, 28 Kasım 1979).

2.1. Program ve Protokol Detayları

Öğle vakti, Esenboğa'ya gelecek olan Papa II. Jean Paul'ü alanda Cumhurbaşkanı askeri törenle karşılayacak. Papa ile Korutürk arasında öğleden sonra resmi bir görüşme yapılacak. Görüşmede "barışçı ve insancıl konular" ele alınacak. Papa 28 Kasım günü saat 13.00'de özel uçağıyla Esenboğa'ya geldiğinde Cumhurbaşkanı tarafından devlet başkanlarına yapılan askeri törenle karşılanacak. Alandan helikopterle Çankaya Muhafız Alayı Komutanlığı Havaalanı'na indirilecektir. Saat 15.00'de Cumhurbaşkanı'na yarım saatlik bir nezaket ziyaretinde bulunduktan sonra, saat 16.00'da Anıtkabir'e giderek Atatürk'ün huzurunda saygı duruşu yapacak ve çelenk koyacaktır. Saat 16.30'da Yabancı Konuklar Köşkü'nde, Ankara'daki yabancı misyon şeflerini kabul edecek olan Papa'ya bu resmi kabulde Dışişleri Bakanı Erkmen ile Protokol Genel Müdürü eşlik edecektir. İki devlet başkanı arasındaki resmi görüşme, saat 18-19 arasında Çankaya'da yapılacaktır. Burada Başbakan Demirel, Dışişleri Bakanı Erkmen, Cumhurbaşkanlığı ve Dışişleri Bakanlığı genel sekreterleri ile siyasi şube yetkilileri, Vatikan büyükelçileri ve Vatikan dışişlerinden sorumlu görevlileri hazır bulunacaktır. Cumhurbaşkanı Korutürk, saat 19.00'da konuk devlet başkanı onuruna Çankaya Köşkü'nde "sınırlı bir resmikabul" düzenleyecektir. Burada, Demirel hükümeti üyeleri ile yüksek düzeydeki Türk yetkilileri hazır bulunacaklardır. Kabul resminin 50 kişi dolayında bir konuk topluluğundan oluşacağı, Vatikan kurallarına göre düzenlemeler yapılacağı öğrenilmiştir (Milliyet, 28 Kasım 1979).

2.2. Vatikan'ın Özel Durumu

Resmi görüşmelerin de "Vatikan'ın özel durumu" nedeniyle "Dünya barışı ve anlayışın gerçekleştirilmesi, silahsızlanma olanakları, tedhişçiliğin önlenmesi, uluslararası ihtilafların barış yoluyla çözümlenmesi gibi insancıl ve barışçı konular" üzerinde cereyan edeceği anlaşılmaktadır. Türkiye'de tedhişin büyük boyutlara tırmanmakta oluşu, bu konuda Papa heyetiyle yapılacak görüşmelere özel bir önem kazandırmaktadır. Müzakere heyetlerinin, genel dünya sorunlarını incelerken, belirli vakalar ve örnekler üzerinde derinliğine durmaları beklenmemekte, ancak son günlerde dünya barışını tehdit eden İran, Arap-İsrail anlaşmazlığı ve Kıbrıs gibi müzmin anlaşmazlık alanlarında görüş teatisinde bulunacağı sanılmaktadır. Bu ziyaretten sonra resmi bir açıklama ya da ortak bildiri beklenmemektedir. Papa II. Jean Paul, yarın sabah saat 10.00'da Çankaya Köşkü'nden ayrılarak özel uçağıyla İstanbul'a hareket edecektir. Vatikan heyetini 30 kadar görevliden oluşacağı bildirilmiştir. Papa II. Jean Paul'un Ankara'da 100 polisin koruyacağı, 250 gazetecinin de izleyeceği bildirilmiştir. Ankara emniyet yetkilileri, Papa'yı korumakla görevlendirilen polislerin özel olarak yetiştirilmiş, keskin nişancı ve dil bilen polisler olduklarını söylemişlerdir. Papa'yı izleyecek muhabirlerden 50'sinin çeşitli yabancı ajansların muhabirleri oldukları ve Papa ile birlikte Ankara'ya gelecekleri bildirilmiştir (Milliyet, 28 Kasım 1979).

2.3. Papa ve Türkiye

Bir zamanlar, bütün yolların Roma'ya çıktığı söylenirdi. Bu sözün gerçek anlamı, o çağların tüm uluslararası ilişkilerinin tam ortasında, "Roma" adlı kutsal kentin durduğuydu. Sonra, Batı ve Doğu, iki ayrı "dünya" halinde, birbirinden bölündü. Yeryüzünde, artık çift Roma vardı: Bilinen, eski Roma ile ona bir ikiz olarak yaratılan Bizans ya da İstanbul... Olay, sadece yeryüzünün en geniş imparatorluklarından birinin iki parçaya ayrılmasından ibaret kalmamıştır. Bu, aynı zamanda, dünya sorunlarına bakış açısından tâ devlet yapısına ve kilisesine değin, iki ana "yol ayrımı"nın da gittikçe derinleştiği büyük bir dönüm noktasıdır. Dokuz yüzyılı aşkın bir süre vardır ki, o açık hâlâ kapanmış değildir. Batı dünyasının, en tarihsel kurumlarından birisinin başkanı olarak Papa Jean Paul II'nin başlayacağı Türkiye gezisi, bir bakıma, Batı'nın yeniden Doğu'ya doğru gelişi biçiminde de değerlendirilebilir. Üstelik bu geliş ne geçmişin unutulmaz haçlı seferlerinivene de ideolojik düşmanlıklarını çağrıştırmaktadır. Papa, elinde, barış ve uluslararası dayanışma denilen zeytin dalları olduğu halde Türkiye'ye gelmektedir. Demokratik ve laik bir düzene sahip bulunan Türk toplumu, hiç kuşkusuz, olaya dinsel açıdan eğilmediği gibi; bütün dış çevrelerin de bu gelişimi, "uluslararası dostluk" ilişkilerinin ötesindeki bir anlama büründürmemesinden, büyük mutluluk duyacaktır. Bugün ne Roma kalmıştır ve ne de Bizans... Dünyanın tümü, artık modern çağların gerçek Roma'sıdır. Eğer

yollar kolay biçimde özlenen anlayış ve iyi niyet kapılarına hâlâ açılmıyorsa, bunun baş nedeni ise, bütün bir geçmişin acı deneylerinin ekmiş bulunduğu geçmişin kuşku ve nefret tohumlarıdır (Milliyet, 28 Kasım 1979).

2.4. Ankara'da tüm askerî birlikler ve emniyet örgütü alarma geçirildi

Başbakan, "Ne diyeyim, nasıl yorumlayayım. Mantığını bulamıyorum. Gayet tabii bizim bu mektuptan haberimiz var, daha evvelden haberimiz var" dedi. Başbakan Süleyman Demirel, Papa Jean Paul'ün Türkiye'ye gelişi ve Abdi İpekçi'nin katil sanığı Mehmet Ali Ağca'nın askerî cezaevinden kaçırıldıktan sonra gönderdiği mektupla ilgili olarak, "Gerekli tedbirler alınmıştır" demiştir. Demirel, Başbakanlığa girerken, gazetecilerin konuyla ilgili sorularına şu yanıtı vermiştir: "Ne diyeyim, nasıl yorumlayayım. Mantığını bulamıyorum. Gayet tabii bu mektuptan bizim haberimiz var, daha evvelden haberimiz var. O çeşit haberleri biliyoruz. Gerekli tedbirler alınmıştır." (Milliyet, 28 Kasım 1979).

Abdi İpekçi'nin katil sanığı Mehmet Ali Ağca'nın cezaevinden kaçarak Papa'yı öldüreceği tehdidinde bulunmasından sonra Ankara Sıkıyönetim Komutanlığı'nın emriyle kentteki askerî birlikler ve emniyet örgütü alarma geçirilmiştir. Bir emniyet yetkilisi, "Ağca, değil Papa'nın kılına dokunmak, alınan önlemlerden sonra Ankara'ya bile giremez" demiştir (Milliyet, 28 Kasım 1979).

Vatikan Devlet Başkanı Papa II. Jean Paul'un ülkemize ziyareti nedeniyle yazılı bir açıklama yapan Milli Türk Talebe Birliği (MTTB) Genel Başkanı Haşmet Oğuzalp, "MTTB gençliği olarak bu memlekete papaların ayak basmasını istemiyoruz. Artık Türkiye'de çıbanbaşı Patrikhane kapatılmalıdır" demiştir (Milliyet, 28 Kasım 1979).

3. PAPA TÜRKİYE'DE

3.1. Yorumlar

Papa Jean Paul II'nin Türkiye'ye gelişi, soğuk karşılanması değil, her açıdan iyi değerlendirilmesi gereken bir olaydır. Zaten İran'da Mekke ve Pakistan'daki olaylardan ötürü tüm dünyanın gözleri İslam toplumlarının üstüne dikilmiştir. L'Express dergisi son sayısında: "İslam'da savaş" başlığıyla yayımladığı kocaman yazıda, Şiilerle Sünniler arasında savaşın başladığını ilan etmekte ve başlıca savaş alanının da Batı'nın akciğerlerini oluşturan, dirlik düzenlikten yoksun Basra Körfezi olduğunu söylemektedir. Tam bu dönemde Papa'nın Türkiye'ye gelmesiyle, Türkiye'nin de adı dünya televizyonlarıyla radyo antenlerinde ve basında dalgalanmaya başlayacaktır... Hakkımızda yapılacak yorumların ille de olumsuz olmasını sağlamak için inat ve ısrarla tepinip durmakta yarar yoktur. Türkiye artık Türkiye'nin

de dışında çok değişik ölçüler kullanan koskoca bir dünya olduğunu her an anımsamak zorundadır. Biz ise, tıpkı Tanzimat'tan önceki padişahlar gibi, Türkiye'nin dışındaki dünyayı, dünyadan bile saymamaya nedense pek özlemli duruyoruz. Deli İbrahim, Avcı Mehmet, İkinci Süleyman, İkinci Ahmet, İkinci Mustafa da, kendi imparatorluklarının dışında ayrı bir dünya bulunup bulunmadığına fazla kulak asmazlardı... Bugün, Jean Paul II gibi işçilikten gelme, ozan ve yazar, sporcu ve müziksever, papalık tarihinde yepyeni bir dönem oluşturan renkli bir dilin liderinin Türkiye'ye gelmesi, sadece Türk-İslam ilişkilerini ırgalar mı, ırgalamaz mı açısından ele alınacak bir olay değildir... Türk-İslam ilişkilerinin her zaman geliştirilmesi üzerinde durulmuş, bu konuda uygulamaya bir türlü geçmeyen iri laflar edilmiş ve Türkiye'nin İsrail ile olan girift ilişkileri unutulmuş görünülmüştür... İsrail-Arap dünyası çatışmasında Türkiye bir yandan ürküttüğü kurbağaya değmeyecek laf akrobasileri yaparken, bir yandan da hangi yanla, hangi ölçülerde bütünleşmiş olduğunu anımsamak istememiş ve ters bir satrancın içine düşmüştür. Hiç kimse kuşkuya düşmesin, İslam dünyası, Papa'nın Türkiye'ye gelmesiyle Türkiye'yi Müslümanlığın dışına çıkmış saymaz... rumlayacak kadar ne çiğ, ne acemi, ne de yeryüzünden habersizdirler (Milliyet, 29 Kasım 1979).

Papa Jean Paul II'nin Türkiye'ye gelmesi gerçekten Türkiye açısından olumlu olarak değerlendirilmesi gereken bir olaydır. Kaldı ki, aynı zamanda devlet niteliğinde olan Vatikan'la Türkiye arasında büyükelçilik düzeyinde diplomatik ilişkiler de vardır. Ve Papalık Efes'teki Meryem Ana'nın mezarını ziyaretin, kutsal bir hac olduğunu onaylamıştır. Türkiye, İslam dünyasında birden baş gösteren çalkantıların hem dışında kalmak, hem Arap dünyası ile olan dostluklarını pekiştirmek, hem de bölgedeki en örgütlü devletlerden biri olan İsrail ile ilişkilerini çağdaş diplomasinin gerekleri içinde tutmak istiyorsa, önce bir türlü uygulamaya geçmeyen duygusal şark abartmacılığıyla, yerine getiremediği vaatlerde bulunmaktan vazgeçmeli ve bölgedeki denge tırmanmasında, nerelere sürüklenip nerelere sürüklenmeyeceğini iyi saptamalıdır. Bu tutumların ise, Papa Jean Paul II'nin Türkiye'yi ziyaretiyle fazla bir ilgisi yoktur. Jean Paul II, gerçekten devrimci bir papa olarak çıkmaktadır yeryüzünün karşısına... Kimsenin kolay göremediği bir Tanrı gölgesi değil, kutsal bir lider ama aynı zamanda da bir insan olduğunu kanıtlamak istemektedir. Gençlerle söylediği şarkıların uzunçalarları dünya piyasasında satış rekorları kırmaktadır. Sabahları uzun yürüyüşler ve koşu antrenmanları yapmakta, sarayının bahçelerinde kendisine armağan edilmiş yarış bisikletleriyle dolaşmaktadır. Asık suratlı, kolay kolay görünmez, kimsenin dokunamadığı bir din korkutucusu olmaktan çıkıp mutluluğu ve huzuru iyiniyetli dostluklarda bulmayı öneren çağdaş bir düşünür olmayı yeğlemektedir... Böyle bir bakışı değişik dinlerde olmanın verdiği

koşullandırmalarla ele almak ve gereksiz eleştirilerle saldırılarda bulunmak, uygar ve laik Türkiye Cumhuriyeti devletinin daha İkinci Mahmut dönemlerinde sıyrılmaya çalıştığı eğilimlerdir. Papalığa seçildiğinden bu yana gerek davranışları gerekse ortaya koyduğu görüşleriyle alışılmışın dışında bir "Papa" imajı çizen Papa Jean Paul II, bir de plağının çıkmasına izin vererek, Vatikan tarihinde yeni bir çığır açtı. Papa Jean Paul II, geçtiğimiz yaz kendi ülkesi Polonya'ya gitmişti. Papa'nın başbaşa bir olay niteliği taşıyan bu ziyareti sırasında bir de festival düzenlendi. Dünyanın çeşitli ülkelerinden 3 milyon kişinin katıldığı "Sacrosong Festivali", dini şarkıların toplu olarak sunulduğu ilk festivaldi. Papa Jean Paul II'de söylediği 6 şarkı ile festivalin en popüler şarkıcısı oldu. Papa, ekim ayı ortalarında Amerika Birleşik Devletleri'ne gidecekti. Amerikan plak şirketi Infinity Records bu olayı değerlendirmek istiyordu. Sacrosong Festivali sırasında yapılan ses ve video kayıtları gayet iyiydi. Plak şirketi, Papalığın bu konuyla yetkili kuruluşu "Pontifical Mission Society"ye başvurdu. Yanıt kısa zamanda geldi. Papa plağının çıkmasına izin vermişti. Plak Amerika'da "Pope Jean Paul II Sings At The Festival Of Sacrosong" adıyla piyasaya çıkarıldı. Normal olarak iş yapacağına inanılan plakların ilk baskısı 100 bin adet üzerinden yapılırken Papa'nın plağı 1 milyon basıldı. Amerika'nın müzik alanında otorite dergisi Billboard rekor düzeyde satışları bildiriyor. Plak 4 hafta gibi kısa bir zamanda aynı derginin 200 LP'lik listesinde, Barry Manilow, Kinks, Supertramp, The Who gibi topluluk ve sanatçıları geride bırakarak 126'ncı sıraya yükseldi (Milliyet, 29 Kasım 1979).

Papa Jean Paul II'nin LP'sinin büyük iş yapması üzerine, Papa'nın Sacrosong Festivali'nde söylediği şarkıları ve Amerika-İrlanda gezisi sırasında düzenlenen açık hava toplantılarını içeren videokasetleri de büyük bir hızla piyasaya sürüldü. Papa'nın plaklarının İrlanda haklarını satın alan Polydor Plak Şirketi, Papa'nın İrlanda gezisi ile ilgili de bir LP yapıp piyasaya çıkarıyor. Plağın adı, "Souvenirs Of The Historic Visit Of His Holiness Jean Paul II, To Ireland". Polydor'un yetkilisi John Woods, "Elimizde başka malzemeler de var. Papa plaklarının piyasada nasıl tutulacağını bekliyoruz. Sonuç olumlu olursa onları da piyasaya süreceğiz" diyor (Milliyet, 29 Kasım 1979).

Papa'nın plağının yapılmasına iki nedenden dolayı izin verdiği bildiriliyor. Tabiî en önemli neden Vatikan'a gelir sağlamak. Bu amaca şimdiden yeterinden ve düşünülenden fazla bir düzeyde ulaşıldığı tahmin ediliyor. Papa'nın ikinci amacı ise, "Hristiyan müziğiyle çağdaş müzik sanatı arasında bir köprü kurmak" olarak açıklanıyor (Milliyet, 29 Kasım 1979).

3.2. Ziyaret Süreci

Çok sıkı güvenlik önlemleri ile Topkapı Sarayı'nı, Ayasofya'yı gezen ve Fener Patrikhanesine giden konuk dini lider helikopter yerine otomobille dolaşmayı tercih etti. Papa, Fener Rum Patrikhanesi'nde yaptığı konuşmada, "Modern Türkiye'yi ziyaretimden kıvanç duyuyorum. Havarilerden Aziz Paul, Anadolu'yu gezerek Allah'ın tek olduğunu anlatma uğraşı vermiştir. Onun için Türkiye çok büyük önemi olan bir ülkedir" dedi (Milliyet, 30 Kasım 1979).

Papa II. Jean Paul Ankara'dan THY'ye ait özel bir uçakla İstanbul'a gelmiş ve kendisini havaalanında karşılayan Ortodoks Patriği I. Dimitrios ile kucaklaşıp öpüşmüştür. Katolik lideri Ayasofya ile Topkapı müzesini de gezdikten sonra, Patrikhaneye giderek Aya Yorgi Kilisesi'nde yapılan bir dini törene katılmıştır. Papa tekrar Patrikhaneye gidecek, aynı kilisede kutlanacak olan Ortodoks yortusuna katıldıktan sonra, Patrik ile "dinsel diyaloğun başlangıcı" sayılan görüşmesini yapacaktır. Papa'nın İstanbul içindeki gezintilerinin bir bölümünü helikopterle yapması planlanmışken konuk dini liderin isteği üzerine gezinin tümü otomobille yapılmıştır. Hava limanından Londra asfaltı ve çevre yolu üzerinden Yıldız'da Şale'ye giden II. Jean Paul burada büyük salonda bir süre oturmuş ve köşk ile ilgili olarak Dışişleri Bakanı Hayrettin Erkmen'den bilgi almıştır. Bu arada Erkmen ve İstanbul Valisi Orhan Erbuğ ile birlikte çay içen dini lider daha sonra kendisine ayrılan odaya çekilerek 17 dakika dinlenmiştir. Papa odasında iken saat 13'te Şale'nin elektrikleri kesinti nedeniyle kesilmiş, ortalık karanlığa gömülünce görevlileri telaş almıştır. Ancak elektrik kesilmesinin kesinti ile ilgili olduğu anlaşılınca görevliler rahatlamışlardır. Papa odasından çıktıktan sonra karanlıkta merdivenleri inmiş, kendisini bekleyen otomobil ile Beşiktaş, Karaköy, Sirkeci, Sahil yolu ve Gülhane Parkı'ndan geçerek Topkapı müzesinin avlusuna ulaşmıştır. Ayasofya'da asılı levha ve mozaiklere özel bir dikkat gösteren Papa, çıkarken yeniden dönüp bakmış ve Müze yetkililerine Fransızca "Buraya tekrar gelmek ve rahatça bu önemli eseri incelemek gerek" demiştir. Papa'nın Topkapı ve Ayasofya'yı ziyareti sırasında, Sultanahmet Meydanı ve çevresi, panzerler ve jandarma birlikleri tarafından kordon altına alınmış, trafik durdurulmuştur. Meydana gazeteciler ve diğer görevliler dışında kimse sokulmamıştır (Milliyet, 30 Kasım 1979).

Konuk dini lider, Ayasofya'dan sonra İstanbul'daki Papalık temsilciliğinde bir süre dinlenmiş, saat 15.35'te Fener Rum Patrikhanesi'ne gelmiştir. Papa kendisini karşılamak üzere önceden Patrikhanenin bahçesinde beklemekte olan Ortodoks metropolit ve papazlarının arasından geçerek Aya Yorgi Kilisesi'nin girişinde Patrik Dimitrius ile buluşmuştur. Ortodoks Patriği, Katolik dünyasının dini lideri Papa'yı karşılayarak, "Hoşgeldiniz" demiş ve iki dini lider öpüşmüşlerdir. Koro'nun, Hz. Davud'un şiirlerinden okuduğu ilahilerden sonra Papa ile Patrik Dimitrius birlikte dua etmişlerdir. Daha sonra Ortodoks Patriği Dimitrius, Papa Jean Paul II'ye

bir konuşma yapmıştır. Patrik konuşmasında, “En kutsal kardeşim, hoşgeldiniz” demiş, şöyle devam etmiştir: “Sizin bizi ziyaretiniz iki din adamının buluşmasından daha büyük bir önem taşımaktadır. Biz bu buluşmayı Batı ile Doğu kiliselerinin biraraya gelmesi olarak niteliyoruz. Bu nedenledir ki, sizin tarihi ziyaretiniz sadece bu kiliseye yapılmış sayılmaz. Bizim buluşmamız dinsel anlamda tüm Doğu ile Batı’nın bir araya gelmesidir. Sizin bizi ziyaret etmenizi ve buluşmamızı Tanrı’nın bir isteği olarak sayıyor ve bizim buluşmamızı sağlayan Tanrı’ya şükrediyoruz.” Daha sonra Patrik Dimitrius’un konuşmasına karşılık bir konuşma yapan Papa, “Tanrı’nın adı kutsal olsun, büyük bir şükran ve kardeş şefkati ile aranızda bulunuyorum” demiş, uygar Türkiye’yi ziyaretinden kıvanç duyduğunu belirttiği sözlerini özetle şöyle sürdürmüştür: “Müşterek duamızda özellikle gönüllerimizde büyük bir sevinç hissettik. Modern Türkiye’yi ziyaretimden kıvanç duyuyorum. Burası tarihi bir ülkedir. Hz. İsa’nın havarilerinden Aziz Paul Anadolu’yu gezerek ‘Allah’ın tek olduğunu’ anlatma uğraşı vermiştir. Türkiye onun için çok büyük önemi olan bir ülkedir.” Konuşmalardan sonra Papa ve Patrik kilisedeki ayine katılanları takdis etmişler ve birlikte, “Yarabbi sen bütün dünyayı takdis eyle, insanlara barış ve birlik ver” diye dua okumuşlardır. Daha sonra Saint Esprit Kilisesi’nde Katolikler için düzenlenen törene Rum Ortodoks papaz ve rahipleri ile Ermeni din adamları da katılmışlardır. Törende okunan ilahilerden sonra Papa dua etmiş, Katolik Kilisesi ile Ortodoks Kilisesi’nin birleşmesi için bir konuşma yapmıştır. Bu konuşmadan sonra birleşmenin en kısa sürede gerçekleşmesi için dualar tekrarlanmış, ayrıca Türkiye’de ve tüm dünyada barış ve dostluk kurulması için 9 ayrı dilde dualar yapılmıştır (Milliyet, 30 Kasım 1979).

Papa küçük Amerika’dan önce büyük Amerika’ya uğradılar geçen ay. Orada Katolikler en önemli azınlıklardan birini oluşturdukları için yer yerinden oynadı. Ajanslar Tanrı’nın vekili unvanlı kişinin her söz ve davranışını saptayıp dünyaya yaydılar. Erbakan Hoca söz konusu benzerlikten hoşlanmayacaktır ama Papa’nın başlıca sloganı onunkinin aynı idi: "Manevî değerler." Amerika’da konuştuğu her yerde o değerlerin korunup yüceltilmesi gereğinden söz etti. Birçok güzel şeyler de söyledi o arada. Örneğin: — Silahlanma yarışını çocuklara miras bırakmamız şart mı? — Gençler, sorumlu davranışlardan kaçınıp şiddet yoluna sapmak kaytarıcılıktır. Başkalarını sevmeyi deneyiniz. O yol disiplin ve özveri ister, ama mutluluğa çıkar. — Zengin ülkelerin tüm insanlığın malı olan kaynakları oburca sömürmeleri ayıptır. — Son yüzyıl boyunca insanlık zenginleşirken kabalaştı. Çünkü dikkatler sırf üretim-tüketim ilişkileri üstünde yoğunlaşıyor ve o işlerin gitgide büyüyen bir bürokrasi ile düzenlenmesine çalışılıyor. Bir yerde gazetecilere öğüt veren Papa şöyle dedi: — Yazdıklarınıza kulak verilmiyorsa, hemen sonuç alamıyorsanız, hayal kırıklığına uğramayın. Usanmayın, gerçekleri

dile getirmekten. Onun sözünü dinleyerek ben bir gerçeği dile getirivereyim: — Bizim dinimizde Tanrı ile kul arasına kimse giremez. Kimse Allah'ın yeryüzündeki vekili, şube şefi, müdürü, genel müdürü falan diye tanınmaz. İslâmda dinsel bürokrasi yoktur yani. Katolik kilisesi ise köy papazından kardinaline kadar çeşitli barem katları ile o tür bir dev bürokrasidir.

Ankara'da sabah kalabalık bir Katolik topluluğuna hitap eden Jean Paul II, "Kimseyi başka inanca zorlamayan modern bir ülkede yaşıyorsunuz" dedi. Papa Jean Paul II, sabah İstanbul'a hareketinden önce Ankara'daki Vatikan Büyükelçiliği'ndeki kiliseyi hınca hınç dolduran Ankara'daki Katoliklere vaaz vermiş ve "Tüm dünyaya ve insanlığa seslendiğini" söyleyerek, "Barış ve kardeşlik için dua ediyorum" demiştir. Papa, vaazında, "İslâmiyetin ve Hristiyanlığın tek tanrılı dinler olduğunu belirtirken bütün insanların birlik içinde olmaları gerektiğini" hatırlatmış ve şunları eklemiştir: "Bugün artık sosyal adalet, özgürlük, doğruluk ve manevi değerler çevresinde ne olursa olsun birleşmek zamanıdır." 59 yaşındaki konuk dini lider büyük ilgi ile dinlenen konuşmasında Müslümanların Hazreti İsa'yı peygamber kabul ettiklerini ve Meryem Ana'ya saygı duyduklarını söylemiş, "Kilise'nin tek tanrıya imanlı Müslümanları ve İslâmiyeti takdir ve saygı ile karşıladığını" belirterek sözlerini şöyle sürdürmüştür: "İki büyük dinin paylaştığı bu büyük manevi miras ve değerlerin, kişi ve toplum açısından, özellikle materyalizmin gençlerde yarattığı manevi boşluğu doldurmak, toplum ve hukuk düzenine güvenilir bir temel kazandırmak amacıyla kullanılabileceği" inancını belirtmiş "Kendi kendime soruyorum: Müslüman ve Hristiyanların, yeni bir tarih dönemine girdikleri şu günlerde, birbirimizi birleştiren manevi bağları kabul edip bunları geliştirerek, sosyal adaleti, manevi değerleri, barışı ve özgürlüğü..." inançlarının aynı olduğunu belirttikten sonra, iki dine mensup olanların kardeşlik ilkeleriyle işbirliği yapmalarının, dini bir vecibe olduğu inancını açıklamış "Sizleri bu yola davet ediyorum, Müslüman vatandaşlarınızın Allah'a imanlarındaki derinliğe dikkatinizi çekerim" demiştir. Papa konuşmasının bir yerinde de kendisini dinleyenlere hitap ederek, "Bugün bu ülkede yaşayan Hristiyanlar! Herkesi dini inançlarında tamamen özgür kılan, kimseyi başka inanca zorlamayan modern bir devlette yaşıyorsunuz." demiştir. Bir saat kadar süren ayinden sonra Çankaya Köşkü'ne dönen Papa II. Jean Paul, Cumhurbaşkanı Korutürk'e veda etmiş, kendisine "Türk devletini temsilen" refakat eden Dışişleri Bakanı Erkmen ve Vatikan heyetiyle birlikte saat 11'de Esenboğa Havaalanı'ndan İstanbul'a hareket etmiştir (Milliyet, 30 Kasım 1979).

Papa Jean Paul II ile Cumhurbaşkanı Fahri Korutürk arasında yapılan resmi görüşmelerde Katolik âleminin lideri, "Kişi ve toplum haklarının kilise tarafından ortak ön planda tutulduğunu, bu nedenle aynı sorunların kiliseyi de kaygılandırdığını, tedhişçiliği kınadıklarını"

söylemiştir. Türk ve Vatikan devlet başkanları arasındaki resmi görüşmelerde, Papa, "Atatürk'ün kurduğu cumhuriyetin başkentini ziyaret eden, Anıtkabir'de Türkiye'nin kurtarıcısı ve demokratik cumhuriyetinin kurucusu önünde saygıyla eğilen ilk papa" olduğuna dikkati çekmiş, "Modern ve laik Türk devletinin, sınırları içinde yaşayan ayrı din ve uluslara mensup cemaatlere tanıdığı özgürlükleri, vatandaşlık ve kişi hakları açısından, fırsat eşitliği açısından olsun, hiçbir ayrımcılık tanımayan uygulamaları derin bir takdir ve şükran hisleriyle karşılamaktayım. Dünyada insanlar arasında barışın temeli, bu hoşgörüde, bu anlayış ve uygar davranışta yatmaktadır. Atatürk'e ve Türk devletine hayranlığımın temelinde bu gerçekler yatmaktadır" demiştir. Papa, Ankara'ya resmi ziyarete geliş arzusunda, "Polonya asıllı olmasının" da rolü olduğunu söylemiş, geçmişte Osmanlılarla Polonyalılar arasındaki dostluk bağlarının bugün aynı kuvvetle sürdüğüne inandığını bildirmiştir. Resmî görüşmelerde, ilk konuşmayı yapan Cumhurbaşkanı Korutürk, Atatürk cumhuriyetinin insan ve toplum hakları, özgürlükleri ve dış politika ilkelerini anlattıktan sonra, son yıllarda Türk diplomatlarının da bu tedhişin kurbanları arasında bulunduğunu, bunlardan birinin Vatikan Büyükelçimiz olduğunu belirtmiş, bu huzursuzluk kaynağı gelişmeler karşısında, bütün ülkelerin ve kurumların birleşmesi zorunluğuna değinmiştir. Papa da, "Çağdaş yaşamın etkileriyle kilisenin artık kişi ve toplum haklarını ön planda tuttuğunu, bu nedenle aynı sorunların kiliseyi de kaygılandırdığını, tedhişçiliği telin ettiklerini söylemiş, dünya barışının, din ve manevi inançları ayrı olan toplumlar arasında hoşgörü ve anlayış sağlanarak gerçekleştirileceğine inandığını" söylemiştir. Papa, "Bu açıdan modern Türk cumhuriyetinin din ve ırk farkı gözetmeden vatandaşlarına eşit haklar tanıyan demokratik rejimini takdirle karşıladığını" bildirmiş, "Katolik toplumun ruhani lideri olarak burada sizlere teşekkür ederim ve Hristiyanlıkla İslamiyetin birbirine yakınlaşması çabalarımı sürdüreceğimi bildiririm" demiştir (Milliyet, 30 Kasım 1979).

3.3. Yunanistan, Papa'nın Uçağına Ege Hava Sahasını Açtı

Yunanistan Dışişleri Bakanı Yorgo Rallis, Türkiye'yi resmen ziyaret etmekte olan Papa II. Jean Paul'u taşıyan uçağın İzmir'den Roma'ya dönüşte Ege hava sahasını kullanması için yetkinin verildiğini açıklamıştır. Yunanistan Dışişleri Bakanı kararı, Papa II. Jean Paul'un Roma'ya dönüş yolculuğunun rahat geçmesi için aldıklarını bildirmiştir. Yunanistan Dışişleri Bakanı Rallis, "Ege hava sahasının Papa'nın uçağına açılması kararının, Türkiye ile ülkesi arasındaki uyuşmazlığa çözüm bulunmasında ilerleme sağlanması açısından bir anlam taşıyıp taşımadığı" yolundaki soruya karşılık, "Söylediğim gibi karar, Papa'nın dönüş yolculuğunun rahat. Papa ile yapılan görüşmelerde Korutürk, "Huzursuzluk kaynağı gelişmeler karşısında tüm ülkeler ve kurumlar birleşmeli" dedi (Milliyet, 30 Kasım 1979).

3.4. Papa'nın Türkiye'yi Ziyareti ve Dünya

Papa Jean Paul II'nin Türkiye'yi ziyaretine görülmemiş bir ilgi gösteren Alman TV'si, geziye ilişkin olarak yayınladığı bir filmde, Türkiye'nin güneydoğusunda yaşayan Hıristiyanlara, Müslümanlar tarafından çeşitli baskılar yapıldığını ileri sürmüştür. Frankfurt "Milliyet" Bürosu'nun bildirdiğine göre Alman ikinci TV'sinde yayınlanan haber-yorum filminde, ayrıca Türkiye'den kaçtıklarını iddia edip, Almanya'dan "sığınma hakkı" isteyen Hıristiyan Türkler de gösterilmiştir. Avrupa basını Papa'nın ziyaretine geniş yer verirken, çoğunluk Papa'nın Türkiye'de soğuk karşılandığı kanısına vardı. Ancak bazı yorumcular Müslüman olan bir ülkede bu tür karşılamanın olağan olduğu fikrinde birleşti (Milliyet, 30 Kasım 1979).

Belçika basını Papa'nın Türkiye'yi ziyaretine geniş yer vermiştir. "Le Soir" gazetesi, Papa'nın Ankara'da "Temkinli" karşılandığını yazarken, Hıristiyan L.a Libre Belgique gazetesi, ziyareti "Muhteşem bir görüntü içinde yüzü heyecanlı Papa'yı seyretmek gerçekten rastlanmayan bir manzaraydı" sözleriyle anlatmıştır. Belçika radyo ve televizyonları da Papa'nın ziyaretini ilk haber olarak vermiştir (Milliyet, 30 Kasım 1979). Hollanda basını da Papa'nın ziyaretine geniş yer vermiştir. Yunan basını, Papa'nın ziyaretine geniş yer vermiş, bu arada Mehmet Ali Ağca'nın Papa'yı öldürme tehdidine özel önem göstermiştir. Bu arada iki kilise arasındaki yakınlaşmayı olumlu karşıladığını belirten fikirlere de rastlanmıştır. Fransız basını Papa'nın Ankara'da soğuk karşılandığını yazarken bazı yorumcular, Vatikan'ın ziyaretin zamanlanmasında hataya düştüğünü belirtmektedir (Milliyet, 30 Kasım 1979).

Rum Ortodoks Patriği I. Dimitrios, Papa II. Jean Paul'ün de katıldığı bir dini törende yaptığı konuşmada, Hıristiyanlar arasındaki işbirliğinin başka herhangi bir dine mensup insanlara yönelik olmadığını söylemiştir. Patrik konuşmasında şöyle demiştir: "Hıristiyan birliğinin, Hıristiyan olmayanlara karşı bir koalisyon veya ortak bir cephe olup olmadığını soranlara yanıt olarak demek isteriz ki, bu birlik kimseye karşı değildir, aksine, ırkları, dinleri ve sosyal sınıfları ne olursa olsun, bütün insanlar için olumlu bir hizmettir." Patrikhanedeki Aya Yorgi Kilisesi'nde sabah "Aziz Andrea" yortusu münasebetiyle düzenlenen geleneksel dini törene, Papa ve Türkiye'ye kendisiyle birlikte gelen kardinaller katılmıştır (Milliyet, 1 Aralık 1979).

Katolikler ile Ortodokslar arasında 11'inci yüzyılda başgösteren anlaşmazlıktan bu yana bir papa ilk kez bir Ortodoks kilisesinde, bir yortunun kutlanışında hazır bulunmuştur. Papa, kendisine verilen dini kitaptan duaları okurken, Katoliklerin yaptığı gibi soldan sağa değil, fakat Ortodokslar gibi sağdan sola haç çıkartmıştır. Papa ayrıca, İncil'in "Birbirimizi sevelim, kardeş olalım" bölümünü Lâtince ve yüksek sesle ilâhi biçiminde okumuştur. Kilisede bulunan topluluk da Papa'ya eşlik etmiştir. Papa ilâhi okurken kepini çıkarıp eline almış, dua bittikten

sonra tekrar başına koymuştur. Papa II. Jean Paul, kilisede yaptığı konuşmada ise kilise arasındaki işbirliğinin bir zorunluluk olduğunu hatırlatmış ve "Burada bugünkü buluşmamız bu hususta ki irademizin ifadesidir" demiştir. Papa, daha önce başlamış olan temaslardan sonra, şimdi somut bir dinsel diyalogun başlamakta olduğunu da belirtmiştir. 59 yaşındaki Katolik lideri, bu alanda mevcut anlaşmazlıkların ve güçlüklerin giderileceği umudunu da ifade etmiştir. Sırmalı bir cüppe ve taç giymiş olan 65 yaşındaki Patrik Dimitrios I de yaptığı konuşmada, iki kilise arasındaki işbirliği ve yakınlaşma çabalarını hatırlattıktan sonra, "Bugün Katolik ve Ortodoks kiliseler olarak, resmen iki teolojik (dinsel) komisyonu atadığımızı ve bunların ortak bir teolojik komisyon olarak yakında diyaloğa başlayacaklarını ilân etmekten memnunluk duyuyoruz" demiştir. Öğrenildiğine göre bu ortak komisyon, her iki kiliseden toplam 60 üyeden oluşacak ve iki kilise arasında yüzyıllardan beri süregelen anlaşmazlıkları çözümlemeye çalışacaktır. Bu anlaşmazlıklar arasında Papa'nın "üstünlüğü", bekârlık ve boşanma gibi konular bulunmaktadır. Papa ile Patrik, 2 saatten fazla süren törenin sonunda karşılıklı olarak armağan değiş tokuşu yapmışlardır. Papa Patriğe Meryem Ana'nın büyük ikonunu, Patrik de Papa'ya, üzerinde azizlerin resimleri bulunan ipek bir atkı vermiştir. İki dini lider bundan sonra öpüşmüşler ve alkışlar arasında kiliseden çıkmışlardır. Papa ve Patrik, Patrikhanede çekilecek "Dinsel diyalog"un ilk resmi toplantısını yapmışlardır. Papa'nın Patrikhaneye gelişi sırasında son derece sıkı güvenlik önlemleri alınmıştır. Papa'yı Patrikhaneye kurşungeçirmez bir Mercedes getirmiş, yüzlerce güvenlik görevlisi Patrikhaneyi ve kilisenin çevresini kordon altına almıştır. Papa, sabah saat 08.10'da Vatikan İstanbul Temsilciliği'nde Polonezköylüleri kabul etmiştir. Sabahın erken saatlerinde konsolosluğun önüne biriken Polonezköylüler, büyük güvenlik önlemleri içinde konuklar salonuna alınmışlar, burada Polonya asıllı Papa kendi lisanında bir konuşma yapmıştır. Sayıları yüzü bulan Polonezköylüler, Papa salona girdiği an bir Polonya şarkısı söylemişler ve hep birden "Hospodyin" demişlerdir. Papa da şarkıya katılmış, daha sonra çocukları severek onları takdis etmiştir. Polonezköylü Polonyalılar, "İstanbul gibi güzel bir kentin banliyösünde oturdukları için mutlu olmaları gerektiğini" belirtmiş ve "Lâikliğin önderliğini yapan Türkiye'yi ziyaret ettiğim için ben de sevinçliyim" demiştir (Milliyet, 1 Aralık 1979).

İstanbul'da önceki gece 9 banka şubesine, Vatan Partisi'nin Aksaray'daki il merkezi binasına ve bir otomobile patlayıcı maddeler atılmıştır. Patlamaların "Türk İslam Birliği" adlı bir örgüt gazetelere telefon ederek üstlenmiş ve "Papa'nın Türkiye'ye gelişini, Ayasofya'yı ziyaret edişini protesto amacıyla 29'dan fazla yere patlayıcı madde atıldığını" bildirmişlerdir. Önceki gece, 29 sıralarında başlayan patlamalar kısa aralıklarla sabaha dek sürmüştür. Papa'nın

İstanbul'a geldiği gün Yeşilköy Havalimanı yakınlarında toplanarak gösteri yapmak isteyen, ancak polis tarafından dağıtılan Yüksek İslam Enstitüsü öğrencileri Papa'nın Türkiye'ye gelişini protesto için derslere girmemişlerdir. Enstitü müdürlüğü "Dün derslere çok az sayıda öğrencinin geldiğini, ancak derslerin yapıldığını" belirtmiştir. Öte yandan Papa'ya ait Bazı Trakya Türkleri Dayanışma Derneği Başkanı Selahattin Yıldız tarafından Papa II. Jean Paul'e ulaştırılan mesajda, "Batı Trakya Türklerinin yıllardan beri Ortodokslar tarafından mahzur edildikleri, din ve ırk ayırımı karşısında bırakıldıkları ve gayri insani edilip dinlerine gerekenlerin yerine getiremedikleri" belirtilmiştir. MSP Grup Başkanvekili Şener Battal, "Papa'nın gelişinin yeni hükümetin kurulmasına rastlanmasının derece dikkat çekicidir" demiştir. Battal, "Ayasofya Camii'nin ibadete açılması, Papa'nın gidişinden sonra AP'nin başlıca vazifesi olmalıdır" şeklinde konuşmuştur. Battal, İslâm din görevlilerine ve Türkiye'deki Diyanet İşleri Başkanlığı makamına da Papa'ya gösterilen saygının gösterilmesini istemiştir (Milliyet, 1 Aralık 1979).

Papa, daha sonra saat 14.00 sıralarında THY'nin özel bir uçağı ile İzmir'e gelmiş ve Çiğli Havaalanı'ndaki karşılamada Vali ve Belediye Başkanı İhsan Alyanak, tarafından kendisine kentin "Altın Anahtarı" verilmiştir. Papa daha sonra 3 ayrı helikopterlik bir grupla Selçuk'a giderek Selçuk Müzesi'ni gezmiş, Hz. İbrahim'in Hz. İsmail'i kurban etmek istemesini sembolize eden levhaları, Bizans takılarını ve mezar taşlarını, Artemis tapınağını inceleyerek yetkililerden bilgi almıştır. Papa, bu arada Meryem Ana Evi'nde yapılan bir ayine katılarak "Hacı" olmuştur. Meryem Ana'nın Evi önündeki ayin sırasında duyulan bir silah sesi kısa süreli bir paniğe neden olmuş ve Papa güvenlik çemberi içine alınmıştır. Daha sonra bir askerin tüfeğinin elinden yere düşerek ateş almasıyla bir jandarma erinin elinden yaralandığı anlaşılmıştır. Selçuk'tan da "Altın Anahtar" alan Papa, daha sonra uçakla Roma'ya dönmüştür (Milliyet, 1 Aralık 1979).

SON DÖNEM OSMANLI İKTİSADİ HAYATINDA ALMAN MODELİ: AVANZÂDE MEHMED SÜLEYMAN'IN "ALMAN USULÜ TİCARET VE SERVET USULLERİ" ESERİ ÜZERİNE BİR İNCELEME

Prof. Dr. Ahmet Sait ÖZKUL
Süleyman Demirel Üniversitesi

ÖZET

Bu çalışmada, Osmanlı'nın son döneminde çok sayıda telif ve tercüme eser kaleme almış olan Avanzâde Mehmed Süleyman'ın (1871-1922), iktisadi meselelere odaklanan *Alman Usulü Ticaret ve Servet Usulleri* (1919/1335) adlı eseri temelinde, Alman iktisadi tecrübesi ve çalışma disiplininin Osmanlı kamuoyuna sunulma biçimi incelenmektedir. Eserin yayımlandığı dönem, I. Dünya Savaşı'nın son safhasına tekabül etmekte olup, Osmanlı-Alman ittifakı çerçevesinde Almanya'nın disiplin ve teşkilatlanmaya dayalı yapısının iktisadi bir referans olarak öne çıktığı bir süreç olarak değerlendirilebilir. Bu noktada söz konusu eser, iktisadi kalkınmanın yalnızca okullarla sınırlı kalmayıp, bireysel alışkanlıklar ve pratik yöntemler aracılığıyla halk nezdinde yaygınlaştırılmasına yönelik önemli bir rehber niteliği taşımaktadır.

İncelenen eser; banka kullanımı ve kooperatifçilikten ev idaresine, kaynakların verimli değerlendirilmesinden pazar stratejilerine kadar oldukça geniş ve uygulama odaklı bir içerik sunmaktadır. Avanzâde, Alman toplumunda gözlemlediği düzen ve disiplin anlayışını küçük ölçekli sermaye birikimi, atık yönetimi ve gündelik hayat pratikleri üzerinden Osmanlı okuyucusuna tatbik edilebilir bir tecrübe olarak aktarmaktadır. Eser, müellifin aynı dönemde yayımladığı diğer Alman temalı çalışmalarıyla birlikte değerlendirildiğinde, iktisadi kalkınmanın yalnızca piyasa ilişkileriyle değil; disiplin, planlama ve vatansever bir sorumluluk anlayışıyla ilişkilendirildiği bütüncül bir zihniyet dünyasını yansıtmaktadır.

Bu bağlamda çalışmada, Avanzâde Mehmed Süleyman'ın eseri aracılığıyla Alman iktisadi tecrübesinin Osmanlı sosyo-ekonomik yapısına hangi ölçütler doğrultusunda uyarlandığı ele alınmaktadır. Bireysel tasarruf alışkanlıklarından teşkilatlanma modellerine kadar eserde sunulan yöntem ve örneklerin, milli bir zenginleşme idealini tesis etmeye yönelik olarak kurgulandığı ifade edilebilir. Bu açıdan çalışma, incelenen eserin iktisadi gelişimi yalnızca maddi birikim olarak değil, planlı bir yaşam tarzı ve toplumsal refahı artırmayı amaçlayan bir zihniyet dönüşümü çerçevesinde ele aldığını ortaya koymaktadır.

THE GERMAN MODEL IN LATE OTTOMAN ECONOMIC LIFE: AN EXAMINATION OF AVANZÂDE MEHMED SÜLEYMAN'S "ALMAN USULÜ TİCARET VE SERVET USULLERİ"

ABSTRACT

This study examines the manner in which the German economic experience and work discipline were presented to the Ottoman public, utilizing Avanzâde Mehmed Süleyman's (1871-1922) work titled *Alman Usulü Ticaret ve Servet Usulleri* (1919/1335) as a primary source. Avanzâde was a prolific author and translator of the Late Ottoman Period. The publication period of the work corresponds to the final phase of World War I, a process characterized by the prominence of Germany's structure -based on discipline and organization- as an economic reference point within the framework of the Ottoman-German alliance. In this regard, the work in question serves as a significant guide aimed at disseminating economic development among the general public through individual habits and practical methods, rather than confining it solely to formal schooling.

The examined work presents a broad and practice-oriented content ranging from banking usage and cooperativism to household management, and from the efficient utilization of resources to market strategies. Avanzâde conveys the sense of order and discipline he observed in German society to the Ottoman reader as an applicable experience through small-scale capital accumulation, waste management, and daily life practices. When evaluated in conjunction with the author's other German-themed works published in the same period, the text reflects a holistic mental world in which economic development is associated not only with market relations but also with discipline, planning, and a sense of patriotic responsibility.

In this context, the study addresses the criteria through which the German economic experience was adapted to the Ottoman socio-economic structure via Avanzâde Mehmed Süleyman's work. It can be asserted that the methods and examples presented in the work, ranging from individual saving habits to organizational models, were designed to establish an ideal of national enrichment. In this respect, the study reveals that the examined work treats economic development not merely as material accumulation, but within the framework of a mentality transformation aimed at fostering a planned lifestyle and enhancing social welfare.

1. GİRİŞ

Osmanlı Devleti'nin son dönemi, özellikle II. Abdülhamid devrinden itibaren belirginleşen ve İttihat ve Terakki iktidarında daha sistematik bir nitelik kazanan Osmanlı-Alman yakınlaşmasına sahne olmuştur. Askerî iş birlikleriyle başlayan bu süreç, zamanla ekonomik, kültürel ve toplumsal alanlara da sirayet etmiş; Almanya, Osmanlı kamuoyunda yalnızca bir müttefik değil, aynı zamanda bir "model ülke" olarak algılanmaya başlanmıştır. Bu dönemde Alman disiplin anlayışı, teşkilatlanma yapısı ve çalışma ahlakına yönelik ilgi artmış; söz konusu ilgi, gazete ve dergilerde yayımlanan haberler ile Almanya'yı tanıtmayı amaçlayan

çeşitli kitap ve risalelerin neşriyle kamusal bir görünürlük kazanmıştır (Pehlivan, 2021, s. 241-242).

Bu bağlamda kaleme alınan eserlerden biri de Osmanlı'nın son döneminde çok sayıda telif ve tercüme çalışmaya imza atan Avanzâde Mehmed Süleyman'ın (1871-1922) *Alman Usulü Ticaret ve Servet Usulleri* adlı eseridir. İlk kez 1919 (1335) yılında yayımlanan eser, Birinci Dünya Savaşı'nın son safhası ile Mütareke döneminin başlarına denk gelen kritik bir tarihsel kesitte Osmanlı okuyucusuyla buluşmuştur. Eserin yayımlandığı tarihsel bağlam dikkate alındığında, Almanya'nın disiplinli ve planlı yapısının, savaş koşulları altında iktisadi ve toplumsal bir çıkış yolu olarak sunulmaya çalışıldığı görülmektedir. Bu yönüyle eser, Osmanlı-Alman ittifakının yalnızca askerî değil, aynı zamanda zihniyet düzeyinde de meşrulaştırılmasına hizmet eden bir nitelik taşımaktadır (Pehlivan, 2021, s. 243).

Avanzâde Mehmed Süleyman, söz konusu eserinde iktisadi kalkınmayı yalnızca teorik bir çerçevede ele almamış; bireylerin gündelik yaşam pratiklerinden tasarruf alışkanlıklarına, girişimcilik anlayışından şirketleşme ve kooperatifçilik modellerine kadar uzanan geniş bir yelpazede "*Alman usulü*"nü uygulanabilir bir rehber olarak sunmuştur. Banka kullanımı, ev idaresi, küçük ölçekli sermaye birikimi, atıkların değerlendirilmesi ve pazar stratejileri gibi konular aracılığıyla Alman toplumunda gözlemlediği düzen ve disiplin anlayışını Osmanlı okuyucusunun gündelik hayatına uyarlamaya çalışmıştır. Bu yönüyle eser, iktisadi kalkınmanın yalnızca okullarla ve resmî kurumlarla sınırlı kalmayıp, bireysel alışkanlıklar ve pratik yöntemler yoluyla toplumun geneline yayılabileceği fikrini merkeze almaktadır.

Avanzâde'nin aynı dönemde yayımladığı diğer Alman temalı eserlerle birlikte değerlendirildiğinde, *Alman Usulü Ticaret ve Servet Usulleri*'nin iktisadi gelişim düşüncesini; disiplin, planlama ve vatansever bir sorumluluk anlayışı çerçevesinde ele aldığı söylenebilir. Bu çerçevede Alman modeli, bireysel tasarruf alışkanlıklarından teşkilatlanma biçimlerine kadar uzanan bir dizi yöntem aracılığıyla "millî bir zenginleşme" idealinin taşıyıcısı olarak kurgulanmıştır.

Bu çalışma, Avanzâde Mehmed Süleyman'ın söz konusu eseri üzerinden, Alman iktisadi tecrübesinin Osmanlı sosyo-ekonomik yapısına hangi ölçütler doğrultusunda uyarlandığını ve Osmanlı kamuoyuna nasıl sunulduğunu incelemeyi amaçlamaktadır. Böylece iktisadi kalkınmanın yalnızca maddi sermaye birikimi olarak değil, planlı bir yaşam tarzı ve toplumsal refahı artırmayı hedefleyen bir zihniyet dönüşümü olarak ele alındığı ortaya konulmaya çalışılmaktadır.

2. AVANZÂDE MEHMED SÜLEYMAN: HAYATI VE ESERLERİ

Avanzâde Mehmed Süleyman (1871-1922), Meşrutiyet dönemi yayıncılığının en üretken ve "çok kimlikli" figürlerinden biridir. Beşiktaş Askeri Rüştiyesi ve Darülfünun Tıp Fakültesi Eczacı Mektebi'nde eğitim gören Avanzâde, esas mesleği eczacılık olmasına rağmen; tarihçi, edebiyatçı, gazeteci ve mütercim kimlikleriyle de tanınmaktadır. Avanzâde'nin hayatı, dönemin siyasi çalkantılarıyla şekillenmiştir. 1902 yılında yönettiği Musavver Terakki Dergisi'ndeki bir yayın nedeniyle Kudüs'e sürülmüş, ardından Kahire'ye kaçmış ve ancak II. Meşrutiyet'in ilanıyla İstanbul'a dönebilmiştir. Avanzâde, telif ve tercüme olmak üzere yüzden fazla eser kaleme almıştır. Eserleri tıptan tarihe, yemek tariflerinden fal kitaplarına, romandan sözlüğe kadar çok geniş bir yelpazeye yayılır (Bozkurt, 2013, s. 52-54). Avanzâde'nin "Almanya Serisi" olarak adlandırılabilecek çalışmaları, onun külliyatında önemli bir yer tutar.

Alman Askeri ve Almanya'da Hayat-ı Askeriye, Alman Kadınları, Alman Terbiyesi, Alman Usulü Çocuk Yetiştirmek ve incelememize konu olan *Alman Usulü Ticaret ve Servet Usulleri* bu serinin parçalarıdır (Pehlivan, 2021, s. 242). Çeviribilim kuramcısı Hans Vermeer'in "skopos" (amaç) kuramı bağlamında değerlendirildiğinde, Avanzâde'nin eserlerini rastgele değil, belirli bir "iş, amaç ve hedef kitle" gözeterek ürettiği görülür. Yazar, eserlerinin önsözlerinde sıklıkla vatanın gençlerine, ebeveynlerine ve meslektaşlarına hizmet etmeyi amaçladığını belirtmiştir (Bozkurt, 2013, s. 62). Bu yaklaşım, Avanzâde'nin ticaret ve servet konulu eserinde de Alman disiplinini Osmanlı toplumuna bir model olarak sunma çabasında kendini göstermektedir.

3. ALMAN USULÜ TİCARET VE SERVET USULLERİ (1919)

Avanzâde Mehmed Süleyman, *Alman Usulü Ticaret ve Servet Usulleri* eserinde, zenginliği ve ticareti Alman perspektifinden ele alarak Osmanlı okuruna pratik tavsiyeler sunmaktadır. Eser, Avanzâde'nin ifadesiyle *"iş bulmak ve para kazanmak isteyenler için küçük ve kıymettar bir rehberdir."*

İktisadi Zihniyet-Vasıta Olarak Para ve Çalışma Disiplini: Avanzâde, eserine paranın hayattaki yerini tanımlayarak başlar. Avanzâde'ye göre hayatta birinci derecede hava, ikinci derecede gıda (su dahil) lazımdır; üçüncü derecede ise "vâsıta-i hayat" olan paraya ihtiyaç vardır. Zengin olma arzusunun her fertte bulunan doğal bir istek olduğunu belirten müellif, parasız yaşamanın mümkün olmadığını vurgular. Avanzâde, Almanların ticaretteki başarısını onların çalışma karakterine bağlar. Avanzâde'ye göre Amerikalılar ticarette didinip durmakta ve "hava oyunlarına" girişmektedir. Buna karşın Almanlar, "sakinane, saburane ve metinane" (sakin, sabırlı ve dayanıklı) çalışmaktadır. Almanların diğer milletleri geride bırakmasının temel sebebi bu "sa'y-i mütemâdi"dir. Avanzâde, tembelliği "hayatı aşındıran bir pas" olarak nitelendirir ve tesadüflerin bile ancak çalışan, azimli ve müteşebbis kişilere yardım edeceğini savunur.

Tasarruf ve Geri Dönüşüm Ekonomisi: Avanzâde'nin eserin en dikkat çekici bölümlerinden biri, bugünün "geri dönüşüm" anlayışını çağrıştıran tasarruf önerileridir. Avanzâde, zenginleşmenin yolunun israfı önlemekten ve en küçük maddeleri bile değerlendirmekten geçtiğini savunur. Alman usulü zenginlikte "çöp" diye bir kavram neredeyse yoktur:

- Yemek kırıntıları ve süprüntüler bahçe için gübre yapılmalıdır.
- Kurumuş ekmekler atılmamalı, bunlardan çorba yapılmalıdır.
- Bez parçalarından yastık, tahta parçalarından yakacak, hatta karpuz ve kavun çekirdeklerinden kuruyemiş veya "sübye" yapılmalıdır.

Avanzâde, Almanların organizasyon yeteneğini ve tasarruf bilincini göstermek için çarpıcı bir örnek verir: Almanya'da "Cemiyet-i Hayriye" tarafından kahvehanelere konulan kutularda sigara izmaritlerinin uçları toplanmaktadır. Bu atıklar işlenip satılarak elde edilen gelirle, bir yıl içinde 1726 fakir çocuğa elbise alınmıştır. Avanzâde bu örneği, *"Sokağa atılan ve süprüntüye karışan sigara uçlarından sa'y ve gayret ve sebat ile neler yapıldığı anlaşılıyor mu?"* sorusuyla sunarak okuyucuyu Alman disiplinini örnek almaya davet eder.

Osmanlı Müteşebbislerine Tavsiyeler: Avanzâde, Osmanlı toplumunun ticaret sahasında henüz "bâkir" olduğunu ve fırsatlarla dolu olduğunu belirtir. Ancak bu alanda başarılı olmak için "önce ahırı tedarik etmeli, sonra beygiri almalı" diyerek pazar araştırmasının önemine dikkat çeker. Avanzâde'ye göre, bir memlekette ticaret yapacak kişi; oranın coğrafyasını, ihtiyaçlarını ve halkın zevkini bilmelidir. Avanzâde'nin *Alman Usulü Ticaret ve Servet Usulleri* eserinde

öne çıkan bir diğer tavsiye ise sermaye birliğidir. Avanzâde, "Bir elin nesi var, iki elin sesi var" mantığıyla, bireysel sermayelerin yetersiz kaldığı durumlarda anonim şirketler veya "Milli Mahsulat Şirketi" gibi ortaklıklar kurulmasını önerir. Ayrıca esnafın sabit kalmaması gerektiğini, müşterinin olduğu yere (vapur iskeleleri, tren garları) gidilmesi gerektiğini örnekleyerek anlatır.

4. DEĞERLENDİRME

Avanzâde Mehmed Süleyman'ın *Alman Usulü Ticaret ve Servet Usulleri* adlı eseri, I. Dünya Savaşı yıllarında Osmanlı-Alman ittifakının sosyal ve iktisadi hayata yansımasının somut bir örneğidir. Avanzâde, çok yönlü kimliği ve üretken yayıncılık anlayışıyla, savaştan yorgun çıkmış ve ekonomik darboğazdaki Osmanlı toplumuna Almanya'yı bir "kalkınma modeli" olarak sunmuştur. Eserdeki öneriler, basit ticaret tüyolarının ötesinde, bir zihniyet dönüşümünü hedefler. Bu dönüşüm; israfın önlenmesi, "sa'y-i mütemâdi" (sürekli çalışma) ilkesinin benimsenmesi ve bireysel çabaların kurumsal yapılara (şirketlere) evrilmesi üzerine kuruludur. Avanzâde, Almanların sadece askeri alanda değil (Pehlivan, 2021, s. 243), iktisadi ve sosyal hayatta da (tasarruf, disiplin, organizasyon) Osmanlılar için bir "numune-i imtisal" (örnek alınacak model) olduğunu vurgulayarak, dönemin "Alman Modeli" arayışına tercüman olmuştur.

ERKEN CUMHURİYET DÖNEMİ'NDE TİCARET KURSLARI: 1927 TARİHLİ "KIZ VE ERKEKLERE MAHSUS TİCARET KURSLARI MÜFREDAT PROGRAMI" ÜZERİNE BİR İNCELEME

Prof. Dr. Ahmet Sait ÖZKUL
Süleyman Demirel Üniversitesi
saitozkul@sdu.edu.tr - 0000-0001-8858-4685

ÖZET

Bu çalışmada, Türkiye Cumhuriyeti Maarif Vekâleti Talim ve Terbiye Dairesi tarafından 1927 yılında yayımlanan *Kız ve Erkeklere Mahsus Ticaret Kursları Müfredat Programı* belgesi temel alınarak, Erken Cumhuriyet Dönemi'nde ticaret kursları kapsamında kızlar ve erkeklere yönelik ticaret eğitiminin içeriği incelenmektedir. Belgenin yayımlandığı dönem, mesleki eğitim kurumlarının idaresinin merkezileştirilerek Maarif Vekâleti bünyesinde toplandığı ve eğitimde standartlaşma arayışlarının hız kazandığı bir sürece tekabül etmektedir. Bu çerçevede söz konusu müfredat programı, ticaret eğitiminin yalnızca okullarla sınırlı kalmayıp kısa süreli kurslar aracılığıyla halk nezdinde yaygınlaştırılmasına yönelik kurumsal bir adımın somut örneği olarak değerlendirilebilir.

İncelenen müfredat programı; daktilografiden uluslararası hesap yöntemlerine, ticari muhaberattan coğrafyaya kadar uzanan geniş ve uygulama odaklı bir ders çeşitliliği sunmaktadır. Programın kız ve erkeklere yönelik olarak hazırlanmış olması, her iki kesimin de modern iktisadi bilgiyle donatılmasını hedefleyen bir yaklaşımı yansıtmaktadır. Müfredat kapsamında kız öğrenciler için "İktisâd-ı Beytî" (ev ekonomisi) gibi özel alanlara yer verilirken; her iki grup için ortak olan daktilo derslerinde on parmak usulü, hesap derslerinde ise dönemin kabul görmüş yöntemleri öğretim içeriğine dâhil edilmiştir. Ayrıca ticari coğrafya derslerinde Türkiye'nin yerel ekonomik kaynaklarının yanı sıra büyük limanlar ve küresel ticaret yollarına ilişkin ayrıntılı bilgiler sunulmaktadır.

Çalışmanın odağını oluşturan müfredat programı ekseninde, Erken Cumhuriyet Dönemi ticaret kurslarının içeriği, ders dağılımları ve kazandırılması hedeflenen mesleki beceriler ortaya konulmaktadır. Bu bağlamda çalışma, ticaret eğitiminde teknik yeterlilik kazandırmayı ve dönemin ticari uygulamalarına hâkim bir iş gücü yetiştirmeyi amaçlayan öğretim içeriğini, söz konusu müfredat programı çerçevesinde göstermeye çalışması bakımından önem taşımaktadır.

COMMERCIAL COURSES IN THE EARLY REPUBLICAN PERIOD: AN EXAMINATION OF THE 1927 "KIZ VE ERKEKLERE MAHSUS TİCARET KURSLARI MÜFREDAT PROGRAMI"

ABSTRACT

This study examines the content of commercial education provided to girls and boys within the scope of commercial courses during the Early Republican Period, utilizing the *1927 Kız ve Erkeklere Mahsus Ticaret Kursları Müfredat Programı*, published by the *Türkiye Cumhuriyeti Maarif Vekâleti Talim ve Terbiye Dairesi*, as the primary source. The publication period of the document corresponds to an era characterized by the centralization of vocational education institutions under the Ministry of Education and the acceleration of efforts towards standardization in education. In this context, the curriculum in question can be evaluated as a concrete example of an institutional initiative aimed at disseminating commercial education to the general public through short-term courses, rather than confining it solely to formal schooling.

The examined curriculum presents a broad and practice-oriented variety of courses, ranging from typewriting to international calculation methods, and from business correspondence to geography. The fact that the program was designed for both genders reflects an approach aimed at equipping both groups with modern economic knowledge. Within the scope of the curriculum, while specific fields such as "Home Economics" were included for female students, the touch-typing (ten-finger) method in typewriting classes and the generally accepted methods of the period in arithmetic classes formed part of the instructional content common to both groups. Furthermore, the commercial geography courses provided detailed information on major ports and global trade routes, in addition to Türkiye's local economic resources.

Through the lens of the curriculum that forms the focus of this study, the content, course distribution, and targeted vocational skills of the Commercial Courses in the Early Republican Period are revealed. In this regard, the study bears significance as it attempts to demonstrate, within the framework of the said curriculum, an instructional content aimed at imparting technical competence in commercial education and cultivating a workforce proficient in the commercial practices of the era.

Keywords: Education of Commerce, Commercial Courses, Ministry of Education, Türkiye, Early Republican Period

1. GİRİŞ

Birinci Dünya Savaşı ve akabinde yürütülen İstiklal Savaşı, Türkiye'de toplumsal ve iktisadi bir yeniden inşa sürecini zorunlu kılmıştır. Savaş yıllarının oluşturduğu demografik tahribat neticesinde nitelikli meslek gruplarının sayısında ciddi bir azalma meydana gelmiş, bazı meslek dalları yok olma tehlikesiyle karşı karşıya kalmıştır (Aydın, 2025, s. 40). Bu bağlamda erken Cumhuriyet döneminde mesleki ve teknik eğitim, dönemin kalkınma aracı olarak görülmüştür. Nitekim 1923 yılında toplanan İzmir İktisat Kongresi'nde tüccar grubu tarafından

dile getirilen "önemli ticaret merkezlerinde ticaret mekteplerinin, olmadığı yerlerde ise çırak mekteplerinin açılması" talebi, bu ihtiyacın en somut göstergesidir (Aydın, 2025, s. 41; Soydan, 2002, s. 271). Bu çalışma, arşivde tespit edilen 1927 tarihli *"Kız ve Erkeklere Mahsus Ticaret Kursları Müfredat Programı"* başlıklı belgeyi incelemeyi amaçlamaktadır. İncelenen belgenin tarihi olan 1927 yılı, Türk mesleki eğitim tarihinde idari ve hukuki bir dönüm noktasını temsil etmektedir. Bu tarihe kadar meslek okullarının açılması ve idaresi büyük oranda yerel yönetimlere ve özel idarelere bırakılmış, bu durum okullar arasında program ve yönetim birliğinin sağlanamamasına neden olmuştur (Aydın, 2025, s. 42). Ancak 9 Haziran 1927 tarihinde kabul edilen 1052 sayılı "Meslek Mektepleri Kanunu" ile mesleki eğitimin sevk ve idaresi, müfredat programlarının belirlenmesi ve öğretmen istihdamı doğrudan Maarif Vekâleti'ne devredilmiştir (Aydın, 2025, s. 42; Soydan, 2002, s. 273). Dolayısıyla bu çalışmada ele alınan müfredat programı, yerel inisiyatiflerden merkezi bir sisteme geçişin ve standartlaşma çabasının ilk bürokratik ürünlerinden biri olarak değerlendirilebilir. 1927 yılı sadece yerel bir düzenleme yılı değil, aynı zamanda Batı eğitim sistemlerinin ve özellikle Amerikan pragmatizminin Türk eğitim sistemi üzerindeki etkilerinin yoğunlaştığı bir evredir. 1924'te John Dewey'in raporuyla başlayan süreçte, "hayata hazırlık" ve "iş için eğitim" ilkeleri benimsenmiş; uzun süreli akademik eğitimlerin yanı sıra kısa süreli ve pratik "kurslar" bir çözüm modeli olarak tartışılmıştır (Demir, 2022, s. 51; Aydın, 2025, s. 51).

2. "KIZ VE ERKEKLERE MAHSUS TİCARET KURSLARI MÜFREDAT PROGRAMI" (1927)

Maarif Vekâleti Talim ve Terbiye Dairesi tarafından 1927 yılında İstanbul Devlet Matbaası'nda basılan *"Kız ve Erkeklere Mahsus Ticaret Kursları Müfredat Programı"*, Erken Cumhuriyet döneminin pratik hayata dönük mesleki eğitim anlayışını yansıtan bir belgedir. Belge; daktilografi (yazı makineleri), Türkçe, ticari muhaberat, defter tutma (muhasebe), hesap, iktisad-ı beytî (ev ekonomisi) ve coğrafya ana başlıklarından oluşmaktadır.

2.1. Mesleki ve Teknik Becerilerin Önceliği: Daktilografi ve Ticari Muhaberat

Müfredatın giriş kısmında yer alan daktilografi eğitimi, dönemin teknolojik adaptasyon çabasını göstermesi açısından dikkat çekicidir. Programda "kız ve erkekler" için makine aksamı, on parmak usulü ve kâğıt takma gibi teknik detayların öğretilmesi hedeflenmiş; özellikle "Continental" marka makineler üzerinden bir standart oluşturulmaya çalışılmıştır. Daktilo eğitiminin hem Türkçe hem de Fransızca klavye düzenine göre verilmesi, Cumhuriyet'in ilk yıllarında ticari hayatta Batı dillerinin ve uluslararası ticaretin hala etkin olduğunu göstermektedir. Ticari muhaberat (yazışma) derslerinde ise öğrencilere; mektup, fatura, sirküler, menşe şahadetnamesi ve ihbarname gibi belgelerin düzenlenmesi öğretilmektedir. Özellikle mektupların "yatay, dikey, alfabetik, onlu ve coğrafi" olarak tasnif edilmesi konusunun müfredatta yer almasının; kurumsallaşmaya başlayan bürokrasinin ve özel sektörün "düzen ve intizam" ihtiyacını karşılamaya yönelik bir yaklaşımın göstergesi olarak değerlendirilebilir.

2.2. Dil Politikaları ve Sadeleşme Hareketi

Müfredatın Türkçe dersi içeriği, dilde sadeleşme eğilimlerini göstermesi açısından önemlidir. Programda, Arapça ve Farsça tamlamaların kullanımının azaltılması gerektiği ve bu azaltmanın faydalarına dair açıklamalar yapılması vurgulanmıştır. Ayrıca "Türkçede milli sarfın hakimiyeti, sadelik cereyanı" ifadesinin, dilde sadeleşme politikasının mesleki eğitim müfredatına da yansıdığını gösterdiği ifade edilebilir. Bu yaklaşım, dönemin eğitimcilerinin "millî terbiye" ve dilin sadeleştirilmesi yönündeki görüşleriyle (Karagöz ve Duman, 2014, s. 587) uyumludur.

2.3. İktisadi Zihniyet ve Ticari Hesap

Hesap dersleri müfredatı, soyut matematiksel işlemlerden ziyade tamamen ticari hayatın ihtiyaçlarına odaklanmıştır. "Kızlar" ve "Erkekler" için ayrı saatlerde planlanan ancak içerik olarak benzerlik gösteren bu derslerde; faiz hesapları, iskonto, kambiyo (döviz), borsa işlemleri, çek ve poliçe gibi konular yer almaktadır. "İngiliz, Amerikan ve Rus ölçüleri" ile "çeşitli hükümetlerin meskûkâtı (paraları)" konularının işlenmesi, kursiyerlerin dış ticarete ve küresel ekonomiye entegre olacak şekilde yetiştirilmek istendiğini göstermektedir.

2.4. İktisad-ı Beytî Dersi

Müfredatta "Kızlar İçin İktisad-ı Beytî (Ev Ekonomisi)" dersi dikkat çekicidir. Bu derste gıda maddelerinin besin değerleri, evde sabun yapımı, çocuk bakımı, hasta bakımı ve temizlik gibi konular detaylandırılmıştır. Soydan'ın (2002) belirttiği gibi, dönemin eğitim politikalarında kadınlara yönelik meslek edindirme etkinlikleri, onların ev içi rollerini de kapsayacak şekilde sunulmuştur.

2.5. Coğrafya ve İktisadi Kaynaklar

Coğrafya müfredatı, siyasi sınırlardan ziyade "iktisadi coğrafya" üzerine kurgulanmıştır. Türkiye'nin ziraat, sanayi ve ticaret potansiyeli detaylıca ele alınırken; Amerika, Afrika ve Asya gibi kıtaların da "menâbi-i tabiiye (doğal kaynaklar)" ve ticaret yolları açısından incelenmesi konularına yer verilmiştir.

3. DEĞERLENDİRME

Bu çalışma kapsamında incelenen 1927 tarihli *"Kız ve Erkeklere Mahsus Ticaret Kursları Müfredat Programı"*, Erken Cumhuriyet Dönemi mesleki eğitim politikalarının pedagojik tercihlerden ibaret olmadığını; iktisadi kalkınma hedefleri, merkezîleşme süreci ve toplumsal düzenlemelerle birlikte ele alındığını göstermektedir. Belge, 1052 sayılı Meslek Mektepleri Kanunu (Aydın, 2025, s. 42) sonrasında mesleki eğitimin merkezden planlanmasına yönelik erken ve somut uygulamalardan biri olarak değerlendirilebilir. Müfredatta daktilografi, ticari muhaberat, muhasebe ve ticari hesap gibi uygulamaya dönük derslerin ağırlıkta olması, dönemin acil nitelikli insan kaynağı ihtiyacına yönelik pragmatik bir eğitim anlayışının benimsendiğine işaret etmektedir. Bu yönüyle program, kısa süreli ve meslek edindirmeye odaklanan kurs modelinin öne çıktığını; Demir'in (2022, s. 51) vurguladığı "iş için eğitim" yaklaşımıyla uyumlu bir çerçeve sunduğunu göstermektedir. Müfredat aynı zamanda merkezîleşme politikalarının mesleki eğitime yansımasını da ortaya koymaktadır. Ders içerikleri ve öğretim hedefleri bakımından sağlanmaya çalışılan birlik, Cumhuriyet yönetiminin eğitim alanında yerel uygulamalar yerine merkezden belirlenen normları esas alma yönelimini yansıtmaktadır. Bu durum, devletin insan kaynağını planlama ve yönlendirme kapasitesini

güçlendirme çabasıyla ilişkilendirilebilir. Dil ve iktisadi içerikler bakımından müfredat, millîleşme ile dışa açıklık arasında kurulan dengeyi yansıtmaktadır. Yabancı dil, ölçü sistemleri ve uluslararası ticaret konularının programa dahil edilmesi, dış ticarete açık bir ekonomik perspektifin sürdürüldüğünü göstermektedir.

ÖZET

1848 İhtilali'nin Polonya ve Macaristan'da milli isyanlara dönüşmüştü. Sonrasında yaşananlar ise Osmanlı Devleti'ni doğrudan etkiledi. Avusturya ve Rusya'nın isyancılara askerî müdahalesi sonrasında birçok Leh ve Macar mülteci Osmanlı Devleti'ne sığındı. Osmanlı Devleti, Rusya ve Avusturya'nın tüm baskılarına rağmen İngiltere ve Fransa'nın da desteğine arkasına alarak mültecileri iade etmedi. Bu durum yeni bir Osmanlı-Rusya savaşı ihtimalini gündeme getirdi. Buna karşın İngiltere, Akdeniz donanmasını Çanakkale açıklarına göndererek olası savaş ihtimaline karşı Bâbıâlî'ye güvence verdi. Yaşananlar iki ülke arasında bir yakınlaşmaya neden oldu. Çanakkale önlerine gelen donanmaya yapılan ziyaret sonucunda İngiltere'ye de bir ziyaret yapılmasına ve bu sayede iki ülke arasındaki dostluğun kuvvetlendirilmesine karar verildi. Ayrıca gönderilecek personel topçuluk ve gemicilik alanlarındaki yeni teknik gelişmeleri de görme imkanı yakalayacaktı.

Nihayetinde Mir'ât-ı Zafer Fırkateyni ile Serah-ı Bahrî Biriğinin İngiltere'ye Şehâb-ı Bahrî Fırkateyni'nin ise Fransa'nın Toulon Limanı'na gönderilmesine karar verilmişti. 1850'nin ortalarında İstanbul'dan başlayan yolculuk yaklaşık bir yıl sürmüştür. Seyahatte Mir'ât-ı Zafer Fırkateyni komutanı Mehmed Bey, bir seyahatname kaleme almıştır. Hem gördüğü yerleri hem de yapılan karşılama törenlerini anlatmıştır. Ayrıca görme imkanı yakaladığı limanlar, top teknolojisi gibi denizcilikle ilgili konularda da bilgiler vermiştir. İngiltere'nin en önemli limanlarından olan Malta, Cebelitarık ve Portsmouth limanlarını gören Mehmed Bey hem bu limanlar hakkında bilgiler vermiş hem de krokilerini çizmiştir. Ayrıca Londra'yı da ziyaret etmiş ve şehir hakkında gözlemlerini de aktarmıştır. Söz konusu eser, İstanbul Üniversitesi Kütüphanesi, Yazma Eserler Koleksiyonu'nda "*İngiltere seyahatnamesi-1266*" ismi ve "*05083*" numarası ile kayıtlıdır. Sunumumuzda Mehmed Bey'in bu seyahate çıkmasını sağlayan nedenler ve seyahatnamesi incelenecektir.

Anahtar Kelimeler: İngiltere, Seyahatname, donanma, 1850-1851

AN OTTOMAN–BRITISH ENCOUNTER IN THE MID-NINETEENTH CENTURY: THE TRAVELOGUE OF AN OTTOMAN COMMANDER IN ENGLAND

The 1848 Revolution evolved into national uprisings in Poland and Hungary. Following the military interventions of Austria and Russia against the rebels, many Polish and Hungarian refugees fled to the Ottoman Empire. Despite sustained pressure from Russia and Austria, the Ottoman Empire, with the support of Britain and France, refused to return the refugees. These developments raised the possibility of a new Ottoman–Russian war. In response, Britain dispatched its Mediterranean fleet to the waters off Çanakkale, thereby assuring the Ottoman government of its support in the event of war. This situation led to a rapprochement between the two countries. Following the visit to the fleet stationed off Çanakkale, it was decided that a reciprocal visit would be made to England to strengthen bilateral relations. In addition, the personnel to be sent would have the opportunity to observe new technical developments in the fields of artillery and seamanship.

Ultimately, it was decided that the frigate Mir'ât-ı Zafer and the Serah-ı Bahrî would be dispatched to England, while the frigate Şehâb-ı Bahrî would be sent to the port of Toulon in France. The voyage, which commenced in Istanbul in the mid-1850s, lasted approximately one year. During the journey, Mehmed Bey, the commander of the Mir'ât-ı Zafer, authored a travelogue in which he described both the places he visited and the welcoming ceremonies he attended. He also provided detailed information on maritime matters, including the ports he had the opportunity to observe and contemporary developments in artillery technology. Mehmed Bey visited major ports such as Malta, Gibraltar, and Portsmouth, one of England's most important ports. He recounted his observations of these places and drew sketches of them. Furthermore, he visited London and shared his observations of the city. The work is preserved in the Istanbul University Library, Manuscript Collection, under the title "*İngiltere seyahatnamesi-1266*" and catalog number "05083". This presentation will examine the factors that prompted Mehmed Bey to undertake this journey and analyse the content of his travelogue.

MEKÂNIN DÖNÜŞÜMÜ: SAFRANBOLU'DA CUMBADAN BALKONA GEÇİŞİN MİMARİ VE TOPLUMSAL AÇIDAN DEĞERLENDİRMESİ

Doç. Dr. Bülent ORAL
Karabük Üniversitesi,
bulentoral7@gmail.com - 0000-0003-1247-4679

ÖZET

Bu bildiri, Safranbolu konut mimarisinde geleneksel "cumba"nın modern "balkon"a dönüşüm sürecini, bu değişimin ardındaki toplumsal ve kültürel dinamikleri odağına alarak inceler. Çalışmanın temel amacı, mimari bir elemanın biçimsel evriminin, mahremiyet, kamusallık, iklimle ilişki ve sosyal etkileşim gibi kavramlarda yaşanan köklü değişimlerin bir göstergesi olarak nasıl okunabileceğini ortaya koymaktır. Araştırma, Safranbolu'daki üç konut tipolojisini karşılaştırmalı olarak ele almaktadır: Bunlardan ilki geleneksel cumbalı konaklar, ikincisi modern balkonlu konutlar ve üçüncüsü de bu iki geleneği harmanlayan hem cumba hem de balkon barındıran çağdaş yapılar. Yöntem olarak mimari analiz ile sosyolojik okuma bir arada kullanılmaktadır. İnceleme, cumbanın, içe dönük, mahremiyetçi ve iklimsel kontrole dayalı geleneksel yaşam tarzının bir ürünü olduğunu; balkonun ise dışa dönük, kamusal alanla daha güçlü bağ kuran modern/çok katlı yaşam biçiminin bir sonucu olarak yaygınlaştığını göstermektedir. Biçimsel olarak benzer kütlesel çıkıntılar yaratsalar da bu iki elemanın tasarım mantığı, yapım tekniği ve kullanıcıyla kurduğu ilişki bakımından temel farklılıklar taşıdığı tespit edilmiştir. Çalışmanın dikkat çekici bulgularından biri, günümüzde hava kirliliği ve toz gibi modern kent problemleri nedeniyle, balkonların sıklıkla kapatılarak adeta "modern bir cumba" işlevi görmeye başlamasıdır. Bu durum, mimari formların toplumsal ihtiyaçlar karşısındaki dönüşüm kapasitesini ve geleneksel ile modern arasında doğrusal olmayan, çevrimsel bir diyalog olabileceğini göstermesi açısından önem taşımaktadır.

TRANSFORMATİON OF SPACE: AN ARCHİTECTURAL AND SOCİAL EVALUATİON OF THE TRANSİTİON FROM CUMBA TO BALCONY İN SAFRANBOLU

ABSTRACT:

This paper examines the transformation process of the traditional "cumba" (projected bay window) into the modern "balcony" in Safranbolu's residential architecture, focusing on the underlying social and cultural dynamics of this change. The primary aim of the study is to reveal how the formal evolution of an architectural element can be read as an indicator of profound shifts in concepts such as privacy, publicness, climate interaction, and social engagement. The research employs a comparative analysis of three housing typologies in Safranbolu: Firstly traditional mansions with cumbas, secondly modern apartments with balconies, and last contemporary buildings that hybridize both traditions, incorporating both a cumba and a balcony. The methodology combines architectural analysis with sociological reading. The investigation demonstrates that the cumba was a product of an inward-oriented, privacy-focused, and climatically responsive traditional lifestyle, while the balcony proliferated as a result of an outward-looking, multi-story modern lifestyle seeking stronger connection with the public realm. Although both elements create similar mass projections on the façade, they are found to be fundamentally different in their design logic, construction techniques, and the relationship they establish with the user. A striking finding of the study is that in response to contemporary urban problems like air pollution and dust, balconies are now frequently enclosed, effectively beginning to function as a "modern cumba." This phenomenon is significant as it highlights the transformative capacity of architectural forms in the face of societal needs and suggests a non-linear, cyclical dialogue between the traditional and the modern.

ÖZET

Geç Osmanlı ve Cumhuriyet dönemi kamu yapıları arasında Tekel binaları önemli bir yer tutmaktadır. Bu binalar, 19. yüzyılın ikinci yarısından itibaren Osmanlı Devleti'nde başlayan tekelci uygulamaların ve Cumhuriyet dönemi devletçilik anlayışının bir uzantısı olarak görülmektedir. Tekel binaları olarak ele aldığımız yapılarda tütün, ispirto, alkol, tuz, kibrit, barut ve patlayıcı maddelerin üretim ve dağıtımı devlet tekelinde yapılmış ve ülke genelinde bu ürünlerin işlenmesi için pek çok fabrika, depo, idare, satış ve yönetim binası inşa edilmiştir. Tekel Genel Müdürlüğü, merkez ve taşra örgütünden meydana gelmekte olup, Tekel Genel Müdürlüğü ana binası, merkez teşkilatı kapsamında İstanbul'da bulunmaktadır. Taşra teşkilatında ise yönetim binası olarak Başmüdürlük, İdare Müdürlüğü ve İdare Memurluğu binalarından söz etmek mümkündür. Tekel yönetim binalarını konu alan bu çalışma kapsamında taşra teşkilatına bağlı olarak toplam 43 Başmüdürlük binasından 11 örneğe, 205 İdare Müdürlüğü binasından 4 örneğe, 418 İdare Memurluğu binasından ise 2 örneğe ulaşılmıştır.

Türkiye'de özelleştirme çalışmaları ve binaların güncel işlevini yitirmesi nedeniyle bu binalar turizm tanıtım merkezi, vakıf binası, konut, sanat galerisi, kaymakamlık, PTT, banka, konukevi, şirket binası, müze, otel, savat evi, mağaza, kent tarihi ve arşivi binası gibi farklı işlevler ile günümüz kullanımına yeniden kazandırılmıştır. Bu çalışmanın amacı etkin bir koruma yöntemi olan ve yeniden işlevlendirme yoluyla kullanıma açılan Tekel yönetim binalarının özgün ve güncel durumlarını saptayarak literatüre katkı sağlamak ve gelecekte yapılacak çalışmalara altlık oluşturmaktır.

Anahtar Kelimeler: Kamu Binası, Tekel Binası, Yeni İşlev, Sürdürülebilirlik

CITY-MEMORY-SPACE: AN EVALUATION OF THE RE-FUNCTIONALIZATION AND REOPENING OF THE TEKEL ADMINISTRATIVE BUILDINGS

ABSTRACT

Among the public buildings of the late Ottoman and Republican periods, the Tekel buildings hold a significant place. These buildings are seen as an extension of the monopolistic practices that began in the Ottoman Empire in the second half of the 19th century and the state-centric approach of the Republican period. In the structures we consider as Tekel buildings, the production and distribution of tobacco, spirits, alcohol, salt, matches, gunpowder, and explosives were carried out under state monopoly, and many factories, warehouses, administration, sales, and management buildings were constructed throughout the country for the processing of these products. The Tekel General Directorate consisted of central and regional organizations, with the main building of the Tekel General Directorate located in Istanbul as part of the central organization. In the regional organization, it is possible to mention the General Directorate, Administrative Directorate, and Administrative Officer buildings as administrative buildings. This study, focusing on the Tekel administrative buildings, included 11 examples out of 43 General Directorate buildings, 4 examples out of 205 Administrative Directorate buildings, and 2 examples out of 418 Administrative Officer buildings, all belonging to the provincial organization.

Due to privatization efforts in Turkey and the loss of the original function of these buildings, they have been repurposed for various uses, including tourism promotion centers, foundation buildings, residences, art galleries, district governor's offices, post offices, banks, guesthouses, company buildings, museums, hotels, savat houses, stores, and city history and archive buildings. The aim of this study is to contribute to the literature by identifying the original and current states of Tekel administrative buildings, which have been repurposed as an effective preservation method, and to provide a basis for future studies.

Keywords: Public Building, Tekel Building, Re-function, Sustainability

1. GİRİŞ

"Tekel" *Türk Dil Kurumu Sözlüğü*'nde bir mal yapımının sadece tek bir kuruluşun elinde bulunması, inhisâr[1] ve monopol[2] şeklinde tanımlanmaktadır.[3]

Tekeller/İnhisârlar, Osmanlı Devleti'nde devlet kontrolündeki gelirler olup Osmanlı'nın tekelini elinde bulundurduğu tek bütçe gelir kalemidir. Barut, tütün, tuz, meskûkât[4], tömbeki[5], posta ve telgraf gelir ve idareleri devletin inhisârı altında olmuştur. Büyük devletlerin petrol inhisârına izin vermemesi sebebiyle bu inhisâr kurulamamıştır (Öztel, 2007, 163). Tuz inhisârı yaklaşık %34'lük oran ile tüm inhisârlar arasında en fazla gelir getiren üründür. İnhisarların toplam gelirinin yaklaşık %30'unu tütün, yaklaşık %28,1'ini posta ve telgraf gelir ve idareleri, yaklaşık %3,1'ini barut, yaklaşık %1'ini ise tömbeki inhisârı oluşturmuştur (Demirbilek, 2011, 23, 26, 27, 30).

Tekelin ilk uygulaması 1829 yılında afyonun inhisâr altına alınmasıyla başlamış ancak İngiltere'nin baskılarıyla bu inhisâr kaldırılırmıştır. 1862 yılında bir kararname ile de tuz, barut, tütün, meskûkât, tömbeki, posta ve telgraf gelirleri inhisâr altına alınmıştır. Osmanlı'da devlet bütçesinin ortalama %13,4'ünü inhisâr gelirleri oluşturmuştur (Demirbilek, 2011, 21).

19. yüzyılda Osmanlı Devleti ekonomik bakımdan gerilemeye başlamış, iç ve dış borçların yapıldığı ülkede gelir kaynakları vergilendirilmeye başlanmıştır. Kırım Savaşı (1853-1856) sonunda Fransa ve İngiltere'den ilk dış borç alınmış, ayrıca Galata Bankerleri ve Osmanlı Bankası'ndan da iç borç alımı devam etmiştir. Osmanlı Bankası ve Galata Bankerleri borçlarına karşılık "Rüsûm-ı Sitte" olarak adlandırılan alkollü içki, tütün, ipek, tuz, pul ve balık avı olmak üzere altı gelir kaynağının kendilerine bırakılmasını istemiştir. 1879 yılında "Rüsûm-ı Sitte İdaresi" kurulmuş, 1881 yılında "Rüsûm-ı Sitte İdaresi"nin yetkileri "Düyûn-ı Umûmiyye İdaresi"ne bırakılmıştır (Çakır, 2019, 174).

1883 yılında Osmanlı Devleti ile 30 yıllığına anlaşma yapılarak "Düyûn-ı Umûmiyye İdaresi"ne bağlı olarak "Reji Şirketi" kurulmuştur. Berlin'den Banker Bleichröder, Viyana'dan Credit Ansalt ve Osmanlı Bankası şirketin ortakları arasında yer almıştır. Reji Şirketi, tütünün ülke içinde imal edilme, satın alma ve satılma hakkını elinde bulundurmuştur (Oktar ve Alan, 2018, 31). Bu kapsamda tütünleri işlemek ve depolamak amacıyla 1884 yılında Cibali bölgesinde İstanbul Cibali Tütün ve Sigara Fabrikası ile İzmir'de İzmir Tütün ve Sigara Fabrikası'nı, 1887 yılında Samsun'da Samsun Tütün ve Sigara Fabrikası'nı, 1895 yılında Adana'da Adana Tütün ve Sigara Fabrikası'nı inşa etmiştir (Yurtoğlu, 2018, 100-103). Reji Şirketi fabrikalarını dağıtımın kolay olması için tütün üretimi yapılan alanlara kurmuş ve fabrika açılan kentlerde istihdam sağlanmıştır (Derman, 2023, 46-47). Şirketin 30 yıllık imtiyaz

[1] "İnhisâr" kelimesi *Osmanlıca-Türkçe Ansiklopedik Lûgat*'ta bir işi, bir maddeyi ve bir şeyi başkası yapmamak üzere, sadece bir müessese, bir kişiye verme, tekel ve monopol şeklinde tanımlanmaktadır (Devellioğlu, 2002, 438).
[2] Fransızca kökenli monopol kelimesi tekel anlamına gelmektedir (Ertürk, 1999, 488).
[3] https://sozluk.tdk.gov.tr (Erişim tarihi: 24.11.2025)
[4] "Meskûkât" *Türk Dil Kurumu Sözlüğü*'nde sikke, metal para anlamlarına gelmektedir. https://sozluk.tdk.gov.tr (Erişim tarihi: 24.11.2025)
[5] "Tömbeki" *Türk Dil Kurumu Sözlüğü*'nde özellikle İran taraflarında yetiştirilen bir tütün türü olarak tanımlanmaktadır. https://sozluk.tdk.gov.tr (Erişim tarihi: 24.11.2025)

süresinin sonunda Balkan Savaşları (1912-1913) çıktığından, şirketten tekrar borç alınmış ve böylece şirketin imtiyaz hakkı 15 yıl daha uzatılmıştır (Oktar ve Alan, 2018, 31).

1923 yılında İzmir'de I. Türkiye İktisat Kongresi'nde ekonomik büyüme ve bağımsız ekonomi için alınacak tedbirler konuşulmuş, TBMM bu kongrede ön plana çıkan yerli ve milli sermaye düşüncesinden hareketle "Reji Şirketi"nin devletleştirilmesine karar vermiş ve şirketin bütün varlıkları devlete intikal etmiştir. 1926 yılında da tütünün faaliyetleri devlet tekeline geçirilmiştir (Yurtoğlu, 2018, 85).

Tütün üretiminin millileştirilmesiyle üretim, pazarlama, dağıtım ve yönetiminin gerçekleştirilmesi için birçok yapı inşa edilmeye başlanmıştır (Özaydın Çat, 2015, 41). 1939 yılında Malatya Sigara Fabrikası, 1940 yılında Bitlis Sigara Fabrikası, 1969 yılında İstanbul Maltepe Sigara Fabrikası, 1984 yılında Tokat Sigara Fabrikası ve 1997 yılında Samsun Ballıca Sigara Fabrikası üretime başlamıştır (Yaşar, 2004, 75).

1932 yılında "İnhisarlar Umum Müdürlüğü" kurulmuş; tütün, ispirto, tuz, alkollü içkiler, barut ve patlayıcı maddeler ile ilgili inhisâr hizmetlerini yürütme görevi verilmiştir (Karadağ, 2010, 108).

1941 yılında tuz, tütün, ispirto ve ispirtolu içkiler gibi devlet tekelinde bulunanlar ile kibrit, şarap ve bira gibi Tekel dışında bırakılan maddelerin üretimini nicelik ve nitelik bakımından denetlemek, hazineye gelir sağlamak, sosyal ve ekonomik hayata katkıda bulunmak amacıyla "Tekel Genel Müdürlüğü" kurulmuştur. Tütün, alkollü içki, tuz ve kibritin üretim ve satışı, yabancı kökenli içki ile kahvenin ithalat ve pazarlanması ile Çay-Kur'un ürettiği çayın pazarlanması Tekel tarafından yürütülmüştür (Tekel Genel Müdürlüğü, 1979, 3, 9).

Şirket, 1941'den 1983 yılına kadar "Tekel Genel Müdürlüğü" adı altında faaliyetlerini sürdürmüş, 1987 yılında "Tütün, Tütün Mamulleri, Tuz ve Alkol İşletmeleri Genel Müdürlüğü (TEKEL)" adını almıştır (Karadağ, 2010, 108-109).

"Tütün, Tütün Mamulleri, Tuz ve Alkol İşletmeleri Genel Müdürlüğü", Özelleştirme Yüksek Kurulu'nun 2001 tarihli kararı ile özelleştirme kapsamına alınarak 2002 yılında İktisadi Devlet Teşekkülü olarak yeniden yapılandırılmış ve Özelleştirme İdaresi Başkanlığı'na (ÖİB) devredilmiştir. 01.01.2003 tarihi itibari ile de ÖİB tarafından anonim şirkete dönüştürülmüştür (Yılmaz, 2019, 65-66).

2. TEKEL BİNALARI

"Tekel Genel Müdürlüğü" Merkez ve Taşra Örgütünden meydana gelir. Merkez Örgüt; genel müdür, genel müdür yardımcıları, müdürler, uzmanlar, komisyonlar, müdürlükler ve bunlara bağlı şube müdürlüklerinden oluşur. Taşra Örgütü ise Genel Müdürlüğe bağlı 17 Müskirat[6] Fabrikası, 7 Sigara Fabrikası, 1 Yedek Parça Fabrikası, 1 Ambalaj Fabrikası, 1 Kibrit Fabrikası, 3 Tuzla, 9 Yaprak Tütün İşletmeleri Merkez Müdürlüğü ve bunlara bağlı 16 Yaprak Tütün İşletme Müdürlükleri ile 43 Başmüdürlük, Başmüdürlüklere bağlı 205 İdare Müdürlüğü, 418

[6] *Türk Dil Kurumu Sözlüğü*'nde "müskirat"ın sarhoş eden şey, alkollü içkiler şeklinde tanımı yapılmıştır. https://sozluk.tdk.gov.tr (Erişim tarihi: 24.11.2025)

İdare Memurluğu, 6 Tuzla Amirliği, 41 Tuzla Memurluğu olmak üzere 768 üniteden oluşur (Tekel Genel Müdürlüğü, 1979, 3-4).

Tekel yönetim binaları yerel ve bölgesel düzeyde TEKEL'in faaliyetlerini yürüten Tekel Genel Müdürlüğü'ne bağlı idare ve yönetim yapılarıdır. Bu binaların Geç Osmanlı ve Cumhuriyet döneminde yapıldığı tespit edilmiştir. Günümüzde Tekel binaları işlevini yitirdiği için bu yapıların bazıları terkedilerek atıl bırakılmış, yıkılmış ya da restorasyon çalışmaları sonunda yapılara yeni işlevler verilmiştir.

Tekel yönetim binalarını konu alan bu çalışma kapsamında taşra teşkilatına bağlı olarak toplam 43 Başmüdürlük binasından 11 örneğe (**Çizelge 1**), 205 İdare Müdürlüğü binasından 4 örneğe (**Çizelge 2**), 418 İdare Memurluğu binasından ise 2 örneğe (**Çizelge 3**) ulaşılmış ve bu binaların özgün ile güncel durumları belirlenmiştir.

3. SONUÇ

Yapılan araştırmalar sonucunda Tekel Müdürlüğü olmak üzere 11 Başmüdürlük binası, 4 İdare Müdürlüğü binası ve 2 İdare Memurluğu binasına ulaşılmıştır.

Tekelin özelleştirilmesi ile binalar yönetim binası olarak işlevini yitirmiş ve farklı amaçlar için kullanılmak üzere yeni işlevler verilmiştir. Günümüzde bu yapılar turizm tanıtım merkezi (Manisa Tekel Binası), vakıf binası (Ankara İnhisarlar (Tekel) Başmüdürlük Binası), kent tarihi ve arşivi binası (Urla Tekel Binası (Arditi Köşkü), konut (Artvin Tekel Müdürlük Binası), sanat galerisi (Konya İnhisarlar (Tekel) İdare Binası), kaymakamlık (İznik Tekel Binası, Balıkesir Tekel İdare Binası, Diyarbakır Tekel Müdürlük Binası), PTT (Kastamonu Tekel Binası), banka (Afyonkarahisar Tekel Binası), konukevi (Seyitgazi Tekel Binası (Eski Hükümet Konağı), müze (Uzunköprü Tekel Binası), otel (İzmir Tekel Başmüdürlük Binası), savat evi ve müze (Van Tekel Binası), ticari işlev-mağaza (Antalya Tekel Başmüdürlük Binası), şirket binası (Kars Tekel Binası)'na dönüştürülmüştür. Bu işlevler binanın konumu, büyüklüğü ve mekânsal esnekliğine bağlı olarak çeşitlilik göstermiştir. Isparta Tekel Müdürlüğü Binası ise günümüze ulaşamamıştır.

Bu yapılardan İzmir Tekel Başmüdürlük Binası, Ankara İnhisarlar (Tekel) Başmüdürlük Binası, Konya İnhisarlar (Tekel) İdare Binası, Balıkesir Tekel İdare Binası, Afyonkarahisar Tekel Binası, Van Tekel Binası, Kastamonu Tekel Binası, Diyarbakır Tekel Müdürlük Binası, Antalya Tekel Başmüdürlük Binası, Isparta Tekel Müdürlüğü Binası, Tekelin yönetim binası işlevi amacıyla inşa edilmiştir (**Çizelge 4**).

Çizelge 4. Tekel Yönetim Binası İşlevi Amacıyla İnşa Edilen Yapılar ve Yeni İşlevleri (R. Teke, 2025)

	Tekel Binası	**Yeni İşlev**
Başmüdürlükler	İzmir Tekel Başmüdürlük Binası	Otel
	Ankara İnhisarlar (Tekel) Başmüdürlük Binası	Yunus Emre Enstitüsü Genel Merkezi
	Konya İnhisarlar (Tekel) İdare Binası	Sanat Galerisi (Depo No: 4)
	Balıkesir Tekel İdare Binası	Altıeylül Kaymakamlığı
	Afyonkarahisar Tekel Binası	Banka

	Van Tekel Binası	Savat Evi ve Müze
	Kastamonu Tekel Binası	PTT
	Diyarbakır Tekel Müdürlük Binası	Yenişehir Kaymakamlığı
	Antalya Tekel Başmüdürlük Binası	Mağaza
İdare Müdürlükleri	Isparta Tekel Müdürlüğü Binası	2008 yılında yıkılarak yerine İl Kültür ve Turizm Müdürlüğü Hizmet Binası inşa edilmiştir.

Tekelin yönetim binası işlevi amacıyla yapılmış olan binaların yanı sıra Seyitgazi Tekel Binası (Eski Hükümet Konağı), Uzunköprü Tekel Binası, Urla Tekel Binası (Arditi Köşkü), Artvin Tekel Müdürlük Binası, Manisa Tekel Binası ve İznik Tekel Binası gibi başka bir amaç için inşa edilmiş yapılar ile de karşılaşılmıştır. Seyitgazi Tekel Binası ve İznik Tekel Binası hükümet konağı, Uzunköprü Tekel Binası ve Urla Tekel Binası (Arditi Köşkü) konut, Artvin Tekel Müdürlük Binası kamu binası, Manisa Tekel Binası yurt amacıyla kullanılmak üzere yapılmıştır. İlerleyen yıllarda bu yapılar Tekel Genel Müdürlüğü'ne tahsis edilmiştir (**Çizelge 5**).

Çizelge 5. Tekelin Başka Bir Amaç İçin İnşa Edilen Yapıları ve Yeni İşlevleri (R. Teke, 2025)

	Özgün Bina	**Tekel Binası**	**Yeni İşlev**
Başmüdürlükler	Yurt	Manisa Tekel Binası	İl Kültür ve Turizm Müdürlüğü Hizmet Binası ve Turizm Tanıtım Merkezi
İdare Müdürlükleri	Konut	Uzunköprü Tekel Binası	Uzunköprü Kent Müzesi
	Konut	Urla Tekel Binası (Arditi Köşkü)	Urla Belediyesi Kent Tarihi ve Arşivi (UKTA) Binası
	Kamu Binası	Artvin Tekel Müdürlük Binası	Özel Mülkiyet
İdare Memurlukları	Hükümet Konağı	Seyitgazi Tekel Binası (Eski Hükümet Konağı)	Konukevi
	Hükümet Konağı	İznik Tekel Binası	İznik Kaymakamlığı

Çalışma kapsamında ulaşılan en eski tarihli yapı Osmanlı dönemi arşiv belgelerine göre 1883 yılı öncesinde inşa edilen Seyitgazi Tekel Binası (Eski Hükümet Konağı), en geç örnek 1950-1980 yılları arasında yapılan Antalya Tekel Başmüdürlük Binası'dır.

Binalara yeni işlev verilirken restorasyon çalışmaları sırasında Manisa Tekel Binası, Konya İnhisarlar (Tekel) İdare Binası, Balıkesir Tekel İdare Binası, Afyonkarahisar Tekel Binası, Van Tekel Binası, Diyarbakır Tekel Müdürlük Binası ve Kars Tekel Binası'nın PVC pencereleri ahşap doğramalar ile değiştirilmiştir.

Manisa Tekel Binası, İzmir Tekel Başmüdürlük Binası, Ankara İnhisarlar (Tekel) Başmüdürlük Binası ve Afyonkarahisar Tekel Binası köşe parsele inşa edilmiştir. Manisa Tekel Binası ve İzmir Tekel Başmüdürlük Binası'nın köşeleri pahlanmış, Ankara İnhisarlar (Tekel) Başmüdürlük Binası'nın köşesi çokgen planlıdır. Afyonkarahisar Tekel Binası'nın ise güneydoğu cephesi yuvarlatılarak köşe parsele uyarlanmıştır.

İzmir Tekel Başmüdürlük Binası, İznik Tekel Binası, Ankara İnhisarlar (Tekel) Başmüdürlük Binası ve Balıkesir Tekel İdare Binası'nın cephelerinde görülen çini süslemeciliği, kemerler ve geniş saçaklar vb. I. Ulusal Mimarlık akımı üslubundadır.

Konya İnhisarlar (Tekel) İdare Binası'nın giriş cephesinde görülen ters "T" biçimli cephe çıkma Clemens Holzmeister'in esintileri olarak düşünülebilir.

Diyarbakır Tekel Müdürlük Binası'nda bölgenin iklim şartlarına uygun avlulu ve geleneksel mimariden izler taşıyan bir üslup tercih edilmiştir.

Günümüzde bir mağaza olarak kullanılan Antalya Tekel Başmüdürlük Binası'nın cepheleri reklam panoları ve kompozit kaplama ile çevrelenmiş ve yapı kimliğini büyük ölçüde kaybetmiştir.

Kübik formu ile dikkat çeken Isparta Tekel Müdürlüğü Binası'nın yıkılması ise toplumsal bellek adına büyük bir kayıptır.

İnşa edildiği kentin mimari, sosyal ve kültürel gelişimi hakkında bilgiler veren ve bugün kent hafızasında önemli bir yer tutan Tekel yönetim binaları şehirlerin simgesel yapısı arasında yer alır. Tekel yönetim binaları Türkiye'nin birçok il ve ilçesine inşa edilen denetleyici ve idari yapılardır. Bu yapılar sadece idari ve denetleyici yapılar değil aynı zamanda dönemin ekonomik ve sosyal politikalarının, mimari ve devletçilik anlayışının somut birer göstergeleri olmuştur. Bu nedenle Tekel binalarının korunması ve yeniden işlevlendirilmesi kentsel hafıza ve mimari kimlik bağlamında çok katmanlı bir değere sahiptir.

Uygun koruma yöntemleri ile ele alındığında Tekel binaları, yalnızca fiziksel bir yapı olarak değil aynı zamanda toplumsal hafızanın geleceğe taşınmasına yardımcı olan kamusal mekanlar olarak da işlev görebilir. Bu sebeple Tekel mirasının korunması ve sürdürülebilirliğinin sağlanması kültürel miras alanına da önemli katkı sunar.

ÖZET

Cumhuriyet'in ilanıyla birlikte Ankara'nın yeni başkent olarak planlanması ve yapılandırılması gündeme gelmiştir. Bu kapsamda kurumsal kimliğin inşası olarak da ele alabileceğimiz çok sayıda kamu binasının inşası gerçekleşmiştir. Bunlar arasında Cumhuriyet başkenti Ankara için eğitim yapıları hiç kuşkusuz büyük önem taşımaktadır. Ortaokul ve lise binalarının yanında mesleki eğitim veren okullar ve üniversitelerin kendi binalarında eğitim faaliyetlerini sürdürmeleri için binalar inşa edilmiştir. Diğer yandan basılı bir belge olarak tarihsel sürece

kaynaklık eden pullar, başkent kimliğinin oluşumunda belirleyici rol oynayan binaların inşasında önemli bir belge niteliği de taşımaktadır. Ülke ve başkent Ankara için övünç kaynağı olan pek çok yapı pullar üzerine basılarak ulusal kimlik söylemini taşıyan güçlü görsel belgeler olmuştur.

Ankara PTT Pul Müzesi tematik olarak çok geniş koleksiyona sahip olmakla birlikte çalışma kapsamında, Ankara'daki eğitim yapıları içinde Gazi Eğitim Enstitüsü, Ankara Üniversitesi Ziraat Fakültesi, Ankara Üniversitesi Siyasal Bilgiler Fakültesi, Ankara Üniversitesi Dil ve Tarih-Coğrafya Fakültesi ve Orta Doğu Teknik Üniversitesi Mimarlık Fakültesi binalarının basılı olduğu pullar farklı yıllarda basılarak çeşitli koleksiyonlar içinde yer almıştır. Pul ve posta tarihi ile ilgilenen çalışma alanı olarak tanımlanan filateli; mimarlık tarihi, kültürel bellek ve ulus inşası kavramlarını bir araya getirmekte ve bu çalışmayla filateli ile mimarlık tarihi arasında disiplinler arası bağ kurularak literatüre özgün bir katkı sağlamak amaçlanmaktadır.

Anahtar Kelimeler: Ankara, Eğitim Yapıları, Posta Pulu, Filateli

REPRESENTATION OF ANKARA EDUCATIONAL BUILDINGS DURING THE REPUBLICAN PERIOD ON STAMPS: THE PTT STAMP MUSEUM COLLECTION

ABSTRACT:

With the proclamation of the Republic, the planning and structuring of Ankara as the new capital came to the forefront. In this context, the construction of numerous public buildings, which can also be considered as the building of institutional identity, took place. Among these, educational buildings undoubtedly hold great importance for Ankara, the capital of the Republic. In addition to middle and high school buildings, vocational schools and universities were built to enable them to conduct their educational activities in their own buildings. On the other hand, stamps, which serve as a source of historical information as printed documents, also constitute an important document in the construction of buildings that played a decisive role in the formation of the capital's identity. Many structures that are a source of pride for the country and the capital Ankara have been printed on stamps, becoming powerful visual documents carrying the discourse of national identity.

While the Ankara PTT Stamp Museum has a very extensive thematic collection, within the scope of this study, stamps featuring the buildings of Gazi Education Institute, Ankara University Faculty of Agriculture, Ankara University Faculty of Political Science, Ankara University Faculty of Language, History, and Geography and Middle East Technical University Faculty of Architecture, printed in different years and included in various collections, are examined. Philately, defined as the field of study concerned with stamp and postal history; This study brings together the concepts of architectural history, cultural memory, and nation-building, and aims to make a unique contribution to the literature by establishing an interdisciplinary link between philately and architectural history.

Keywords: Ankara, Educational Buildings, Postage Stamp, Philately

1. GİRİŞ

Cumhuriyet'in ilanıyla Ankara, ulusal kimliğin yeniden inşa edildiği bir başkent olmuş ve mimarlık aracılığıyla Cumhuriyet düşüncesini ideolojik olarak da ortaya koymuştur. Bu süreçte inşa edilen meclis ve bakanlık binaları gibi yönetim yapıları, kültür, sağlık ve eğitim yapıları vb. gibi kamu yapıları devletin siyasi ve toplumsal hedeflerinin gerçekleştirilmesinde önemli olmuştur. Bu yapılanma içinde eğitim yapılarının önemi, yeni başkentin yeni rejiminde ayrıca bir önem taşımaktadır. Her kademede planlanan ve inşa edilen eğitim yapılarıyla ülkenin gençlerinin eğitim alması, okuma yazma oranının arttırılması, mesleki eğitimin yaygın hale getirilmesi için çalışmalar yapılmıştır. Bu süreçte ortaokul ve lise binaları ve üniversite binalarının yanında meslek liseleri ile halkın çeşitli konularda bilgi ve yeterlilik sahibi olmasını amaçlayan akşam sanat okulları ve halkevlerinin inşası ve yapılandırılmasından söz edilebilir. Bu eserlerin büyük çoğunluğunun Ankara PTT Pul Müzesi'nde çeşitli koleksiyonlar içerisinde anı ya da yıldönümü pulu olarak basıldığı tespit edilmiştir. Bu şekilde binaların önemi vurgulanmıştır.

"Pul" mektup üzerindeki, göndericiden peşin alınan ücret karşılığında verilen makbuz, alındı[1] ya da faturadır (Düzenli ve Kavuran, 2004, 189). Ön yüzüne çeşitli şekil, motif ya da resim basılmış, arkasına zamk sürülmüş, dikdörtgen, kare, üçgen, asimetrik ve simetrik vb. şekillerde hazırlanmış değerli kağıttır. Pulların ön tarafında ait olduğu ülkenin adı ve değeri yazılıdır (Güven Bezaz, 2006, 293). *Türk Dil Kurumu Sözlüğü*'nde ise posta parası karşılığı kartpostal, damga resmi ve mektup zarfına karşılık kağıtlara yapıştırılan, basılı kâğıt parçası olarak tanımlanmaktadır.[2] Pul, posta işlemlerinde bir hizmet bedeli olarak ortaya çıkmış ve daha sonra farklı temalarla zenginleşen görsel bir iletişim aracı haline gelmiştir (Tarlakazan, 2018, 712).

Pul sadece mektubun gönderilmesi amacıyla yapılan bir ödeme değil aynı zamanda basıldığı ülkenin de bir sembolü olmuştur. Yapıldığı ülkenin kültürünü, sosyal yaşamını ve sanat anlayışını yansıtan grafik tasarım ürünüdür (Düzenli ve Kavuran, 2004, 189). İlk başlarda sadece yazı unsurları ve simgesel görsellerin yer aldığı pul tasarımları zaman içinde mimari yapıların da bulunduğu tasarımlarla çeşitlilik kazanmıştır (Pektaş, 2023, 13). Tarihsel süreç içinde pullar; bir ülkenin müzik, edebiyat ve spor gibi çeşitli kültürel ögelerinin sergilendiği genel tanıtım amaçlı, posta ücretlerinin ödenmesi amaçlı, hobi amaçlı ve propaganda amaçlı kullanılmıştır (Yazıcı, 2010, 324-325).

Dünyada bilinen ilk posta pulu İngiltere'de kullanılmıştır. Dönemin İngiltere posta bakanı Rowland Hill, İngiltere'nin kasabalarının birinde postacının bir kıza mektup getirdiğini görmüş, kız ücretin bir shilling olduğunu öğrenince parası olmadığını söyleyerek mektubu postacıya geri iade etmiştir. Bu olaya şahit olan Hill, kızın haline üzülerek bir shilling ücreti ödemiş ve mektubu alıp kıza vermiştir. Bu olay üzerine mektup ücretini gönderici ödemesi düşüncesiyle pul fikri ortaya çıkmış ve gönderme ücretinin faturası olarak posta hizmetinde yerini almıştır (Düzenli ve Kavuran, 2004, 191).

İlk posta pulu 6 Mayıs 1840 tarihinde çıkartılmıştır. 1 penilik değere denk gelmesi ve siyah renkli olmasından dolayı "The Penny Black" olarak adlandırılan pulun üzerinde Kraliçe

[1] *Türk Dil Kurumu Sözlüğü*'nde "alındı" para vb. şeylerin teslim alındığını gösteren bir belge, makbuz anlamlarına gelmektedir. https://sozluk.tdk.gov.tr (Erişim tarihi: 09.12.2025)
[2] https://sozluk.tdk.gov.tr (Erişim tarihi: 09.12.2025)

Victoria'nın portresi yer almaktadır (**Görsel 1**). Bu puldan kısa bir süre sonra "Two Pence Blue" olarak adlandırılan 2 peni değerinde ikinci pul ortaya çıkmıştır. Rengi mavi olup yine aynı şekilde Kraliçe Victoria'nın profilden portresini içermektedir (Güven Bezaz, 2006, 291; (Tarlakazan, 2018, 713). (**Görsel 2**)

Görsel 1. The Penny Black, **Görsel 2.** Two Pence Blue
(https://harringtonstamps.co.uk/search/penny-black-two-pence-blue-pair, Erişim tarihi: 08.12.2025)

İlk pulların tasarımında genellikle hükümdar ve devlet büyüklerinin portreleri, pulun değeri gösteren rakam ve ülkeleri temsil eden figürler yer almıştır. Genellikle tek rengin tonları kullanılmış, arkası zamklı olmayan bu ilk pullar makasla kesilerek birbirlerinden ayrılmıştır (Düzenli ve Kavuran, 2004, 191).

Osmanlı Devleti döneminde ilk posta pulu ise 19. yüzyılda ortaya çıkmıştır. 13 Ocak 1863 tarihinde Darphane-i Âmire'de beyaz kâğıt üzerine siyah taş baskı yöntemiyle basılan bu pulun üzerine Sultan Abdülaziz'in tuğrası işlenmiştir. Tuğranın altında yer alan hilalin içinde "Devlet-i Aliye-i Osmaniye" yazmaktadır (Ayaydın, 2020, 55). (**Görsel 3**)

Görsel 3. Osmanlı Devleti'ne ait ilk posta pulu
(https://medium.com/t%C3%BCrkiye/d%C3%BCnyan%C4%B1n-i%CC%87lk-posta-pulu-the-penny-black-23d958d27094, Erişim tarihi: 08.12.2025)

1863-1920 yılları arasındaki Osmanlı pulları İstanbul (Darphane-i Âmire, Düyûn-ı Umûmiye, Maliye Nezâreti, Sanâyi-i Nefîse Matbaası vb.), Paris, Londra, Cenova ve Viyana'da basılmıştır. Basılan pullarda Osmanlıca, bazen de İngilizce ve Osmanlıca birlikte kullanılmıştır. 1863-1913 yılları arasında basılan pullarda genellikle hilal, yıldız, tuğra, silah ve Arap alfabesine yer verilmiştir. Bu yıllarda savaşların yaşanması ve ülke ekonomisinin kötü olmasından dolayı "sürşarj[3]"lı pullar kullanılmıştır. 1913 yılı itibariyle pullarda resimler yer almaya başlamıştır. 1914 yılında Osmanlı Devleti'nin yıkılmasına sebep olan I. Dünya Savaşı'nın başlaması ile pullara hükümdar portreleri basılmış (**Görsel 4)**, 1917 yılında Çanakkale Savaşı'na atıfta bulunulmuş (**Görsel 5)**, 1918 yılında ise Osmanlı askerleri pullarda

[3] Pul gibi kağıtların değerini değiştirerek ya da değiştirmeden farklı bir olayı anmak ya da pulun basılma amacını değiştirmek için üzerine yeni rakam, yazı ve motiflerin basılma işlemine sürşarj denir (Ayaydın, 2020, 57).

yerini almıştır (**Görsel 6)**. İttihat ve Terakki Partisi'nin iktidarda olduğu 1918 yılında, Enver Paşa da pullarda resmedilmiştir (Yazıcı, 2014, 181-182). **(Görsel 7)**

TBMM hükümeti tarafından 1920-1922 yılları arasında çıkarılan sürşarjlı pulların üzerinde "Osmanlı Postaları" yazarken, 1922 yılından itibaren "Türkiye Postaları" ibaresi pulların üzerinde yerini almıştır. Bu dönemin pulları Ankara, Konya, Adana ve Cenova'da basılmıştır (Yazıcı, 2014, 185).

2. POSTA PULLARINDA BAŞKENT ANKARA'DA EĞİTİM YAPILARI

Cumhuriyet'in ilanıyla birlikte pullarda işlenen konular Osmanlı dönemine göre belirgin bir biçimde değişmiş ve yeni devletin ideolojisini, kimliğini ve modernleşme amacını yansıtan temalar ön plana çıkmıştır. Modernleşme, sanayileşme, kalkınma ve ulusal kimlik temaları pullarda yerini almış ve bu kapsamda başkent kimliğinin oluşumunda belirleyici rol oynayan yapıların pullar üzerinde temsili, yeni rejimin mekânsal programının görselleştirilmesinde önemli bir işlev üstlenmiştir.

Başkent Ankara, Türkiye'de posta pullarına konu alınan şehirlerin başında gelmektedir. Ankara çeşitli özellikleriyle emisyona çıkarılan pullarda çok fazla konu olmuş; tarihi, sosyal ve kültürel hayatı, mimari yapıları ve doğal varlıkları pullar üzerinde yerini almıştır. Ankara'nın pullar üzerinde bulunması, yeni dönemin başlangıcını ifade etmesi açısından önemli bir yer tutmaktadır (Anameriç ve Rukancı, 2010, 21).

Özgünde Emlâk ve Eytam Bankası olarak inşa edilen yapı, 2013 yılında Ankara PTT Pul Müzesi olarak yeni işlevi ile düzenlenmiştir. Tematik sergilemenin yapıldığı çok geniş bir koleksiyona sahip müzede Ankara'da bulunan eğitim yapıları farklı yıllardaki koleksiyonlar içerisinde yer almaktadır. Gazi Eğitim Enstitüsü, Ankara Üniversitesi Siyasal Bilgiler Fakültesi ile Dil ve Tarih-Coğrafya Fakültesi ve Orta Doğu Teknik Üniversitesi Mimarlık Fakültesi binaları pullar üzerine basılmıştır. Ayrıca Ankara Üniversitesi Ziraat Fakültesi ile Siyasal Bilgiler Fakültesi ve Orta Doğu Teknik Üniversitesi'ne ait logoların üzerinde bulunduğu pullar da dolaşıma çıkarılmıştır.

2.1. Gazi Eğitim Enstitüsü

Mimar Kemalettin Bey (1870-1927)'in vefatından bir müddet önce tasarladığı ve I. Ulusal Mimarlık akımının son örneklerinden olan Gazi Eğitim Enstitüsü'nün yapımına 1927 yılında başlanmış ve 1930 yılında bitirilerek aynı yıl içinde eğitime geçilmiştir (Yavuz, 1981, 72).

Osmanlı döneminde farklı yerlere dağılan öğretmen okulları Cumhuriyet'in ilanından sonra belirli yerlere toplanarak yeni binalar inşa edilmiştir. Bu okullardan biri olan Gazi Terbiye Enstitüsü 1926 yılında Konya'da "Orta Muallim Mektebi" adıyla açılmış, 1927 yılında inşaatına başlanan merkez tamamlandıktan sonra 1930 yılında Ankara'da "Gazi İlk ve Orta Muallim Mektebi" adıyla yeni yerleşkesinde eğitimine devam etmiştir. 1940'lı yıllarda okulun ismi "Gazi Eğitim Enstitüsü" olarak değiştirilmiş, günümüzde ise Gazi Üniversitesi Rektörlük Binası olarak kullanılmaktadır.[4]

Bodrum üzerine üç katlı inşa edilen yapının orta bölümü beş katlı olup, girişin üzerine gelen ve gözlemevi olarak kullanılması düşünülen kubbeyle örtülü altıncı katı vardır. Simetrik kurgulanan zemin kat planında derslikler ve yemekhane, yan bloklarda laboratuvarlar, ikinci katın ön tarafında öğretmen odaları, arka tarafında atölyeler, diğer iki katta ise yatakhaneler yer almaktadır. Giriş cephesi simetrik düzenlemeye sahip yapının orta bölümü dışarı taşırılmıştır. Beş açıklıklı giriş revakının iki yanında kule şeklinde dışa taşkın bölümler yer almaktadır. Birinci katta sivri kemerli, diğer katlarda dikdörtgen pencere düzeni kullanılmıştır (Cengizkan, 2009, 251). (**Görsel 8**)

Görsel 8. Gazi Eğitim Enstitüsü

[4] https://gazi.edu.tr/view/page/219/binamizin-tarihi (Erişim tarihi: 18.12.2025)

PTT Pul Müzesi'nde 1963 yılında *Konulu Sürekli Posta Pulları-Ankara* başlığı ile oluşturulan seriye ait dokuz posta pulundan oluşan grubun (Julyanus Sütunu, Etnoğrafya Müzesi, Ankara Kalesi, Gazi Eğitim Enstitüsü, Cumhurbaşkanlığı Köşkü, Çankaya Atatürk Köşkü, Anıtkabir, I. TBMM Binası) beşinci pulunda Gazi Eğitim Enstitüsü yer almaktadır. Siyah beyaz hazırlanan pul 30 kuruş değerinde basılmıştır. Pulun dış çerçevesi beyaz renkle yapılmış, kenar kısmı ise dantel detayı ile sonlandırılmıştır (**Görsel 9**).

Görsel 9. Gazi Eğitim Enstitüsü pulu (https://www.pulhane.com/PulSayfalari/p196312.html, Erişim tarihi: 08.12.2025)

2.2. Ankara Üniversitesi Ziraat Fakültesi

1933 yılında Ankara Üniversitesi Ziraat Fakültesi, Yüksek Ziraat Enstitüsü adıyla Ankara'da kurulmuştur. Köklü bir geçmişe sahip Fakültenin tarihi, 1891 yılında faaliyete başlayan Halkalı Yüksek Ziraat Okulu'na dayanmaktadır. 1930 yılında Yüksek Ziraat Okulu kurulmuş, 1933 yılında ise Yüksek Ziraat Enstitüsü'ne dönüştürülmüştür. 1948 yılında Yüksek Ziraat Enstitüsü, Ankara Üniversitesi bünyesine dahil edilmiştir. Fakülte kuruluşundan itibaren ülkede tarımın gelişmesine önemli katkılarda bulunmuş, ziraat mühendislerinin ve bilim adamlarının yetiştirilmesinde öncü bir rol üstlenmiştir.[5]

ANKARA ÜNİVERSİTESİ ZİRAAT FAKÜLTESİ
"Tarım, Çevre ve Yaşam Bilimlerinde Öncü"

Görsel 10. Ankara Üniversitesi Ziraat Fakültesi logosu (https://www.agri.ankara.edu.tr/, Erişim tarihi: 21.12.2025)

1959 yılında *Ankara Üniversitesi Ziraat Fakültesi'nin 25. Tedris (Öğrenim) Yılı* anısına emisyona çıkarılan tek puldan oluşan bu seride Ankara Üniversitesi Ziraat Fakültesi'nin logosu bulunmaktadır. Logonun üstünde "Türkiye", altında "Ankara Üniversitesi Ziraat Fakültesi" yazısı yer almaktadır. Dikey olarak tasarlanan lacivert renkli pulun dış çerçevesi beyaz renkle yapılmış ve kenarları ise dantellidir (**Görsel 11**).

[5] https://www.agri.ankara.edu.tr/wp-content/uploads/sites/10/2020/05/ZiraatFakultesi.pdf (Erişim tarihi: 18.12.2025)

Logoda altın renkli başak figürü, Anadolu'nun birçok uygarlığın merkezi olmasında rol oynayan toprakların tahıl zenginliğini, buğday ve tarımı simgelemektedir. Güneş ürünlerin yetiştirilmesi için gerekli kaynağı, lacivert zemin ise tarım için gerekli hava ve suyu temsil etmektedir (Anameriç ve Rukancı, 2010, 50).

(https://www.pulhane.com/PulSayfalari/p195901.html, Erişim tarihi: 08.12.2025)

2.3. Ankara Üniversitesi Siyasal Bilgiler Fakültesi (Mülkiye)

"Mekteb-i Mülkiye", Osmanlı ve Cumhuriyet döneminde çeşitli kademelerde görev alacak personelleri yetiştirmek amacıyla eğitim veren bir okuldur. 1858 yılında açılan okul, 1915 yılında kapatılmıştır. 1918 yılında ise Dahiliye Nezâreti himayesinde tekrar açılmış, 1920 yılında Maârif Nezâreti'ne bağlanmıştır. 1935 yılında dönemin Milli Eğitim Bakanı'nın İstanbul'da yaptığı görüşmeler sonucunda okulun Ankara'ya taşınmasına karar verilmiştir. Ernst Arnold Egli tarafından tasarlanan yeni Mülkiye Mektebi binasının inşaatına 1935 yılında başlanmış ve aynı yıl ismi "Siyasal Bilgiler Okulu" olarak değiştirilmiştir. 1936 yılında tamamlanan bina eğitim ve öğretimine başlamıştır (Yabacı vd., 2019, 75-76). 1950 yılında da "Ankara Üniversitesi Siyasal Bilgiler Fakültesi" ismiyle Ankara Üniversitesi'ne katılmıştır.[6]

Betonarme inşa edilen Mülkiye Mektebi binası caddeye paralel bir blok ve ona dik konumlanan dört paralel bloktan oluşur. Caddeye paralel blok üç katlı, dik bloklar iki katlıdır. Paralel blokta ofisler ve sınıflar, dik bloklarda ise konferans salonu, yemekhane ve yatakhane yer alır (Yabacı vd., 2019, 78). (**Görsel 12**)

1959 yılında *Siyasal Bilgiler Fakültesi'nin 100. Yılı* anısına emisyona çıkarılan üç puldan oluşan bu seride Ankara Üniversitesi Siyasal Bilgiler Fakültesi (Mülkiye) bulunmaktadır. Kırmızı (**Görsel 13**) ve yeşil (**Görsel 14**) renkte 40 kuruş değerinde basılan pullarda binanın görseli sağ tarafa yerleştirilmiştir. Sol kısımda dikey bant üzerinde 40 kuruş ibaresi ve altında Siyasal Bilgiler Fakültesi'nin kısaltılması olan "SBF" ile bir Türkiye haritasının bulunduğu logo basılmıştır. Ayrıca bu seride altında Siyasal Bilgiler Fakültesi'nin logosunun yer aldığı üçüncü bir pul dikey olarak tasarlanmış ve 1 Türk lirası değerinde basılmıştır (**Görsel 15**). Pullarda en dış çerçeve beyaz renkle yapılmış ve kenarları ise dantellidir.

Görsel 13-14-15. Ankara Üniversitesi Siyasal Bilgiler Fakültesi pulu (https://www.pulhane.com/PulSayfalari/p195920.html, Erişim tarihi: 08.12.2025)

2009 yılında *Siyasal Bilgiler Fakültesi'nin 150. Yılı* anısına emisyona çıkarılan iki puldan oluşan bu seride Ankara Üniversitesi Siyasal Bilgiler Fakültesi (Mülkiye) bulunmaktadır.

75 kuruş değerinde mavi tonlarda basılan birinci pulda binanın görseli sol tarafa yerleştirilmiş, üstte "Türkiye Cumhuriyeti" yazısı yer almaktadır. Sağ alt köşede ise fakültenin logosu ve "150. Yıl" yazısı bir kompozisyon içinde bulunmaktadır. Pulun kenarları ise dantellidir (**Görsel 16**).

Lacivert tonlarda basılan ikinci pulda ise fakültenin logosu ve "150. Yıl" yazısı bir kompozisyon içinde ortada bulunmaktadır. Yine aynı şekilde üstte "Türkiye Cumhuriyeti" yazısı yer almakta olup, pulun kenarları dantellidir (**Görsel 17**).

Görsel 16-17. Ankara Üniversitesi Siyasal Bilgiler Fakültesi pulu (https://www.pulhane.com/KatalogSayfalari/k200923.html, Erişim tarihi: 08.12.2025)

2.4. Ankara Üniversitesi Dil ve Tarih-Coğrafya Fakültesi

Dil ve Tarih- Coğrafya Fakültesi, Türk kültürünün zenginliğini görünür kılmak ve ulusal tarihin bütün gerçekliğiyle araştırılmasını sağlamak için kurulmuştur (Erdoğan vd., 2007, 132).

1935 yılında Ankara Üniversitesi'ne bağlı olarak kurulan Dil ve Tarih- Coğrafya Fakültesi, Mimar Kemalettin Bey tarafından yapılan Evkaf Apartmanı'nda eğitim ve öğretime başlamıştır (Aslanoğlu, 2001, 184). Günümüzde kullanılan fakülte binası ise 1938-1940 yılları arasında Bruno Taut'un başında olduğu Güzel Sanatlar Akademisi Mimarlık Bölümü tarafından tasarlanmıştır. Bodrum üzerine yüksek bir zemin kat ve dört katlı kütlelerin birleşmesinden oluşur (Erdoğan vd., 2007, 132). Ön cephede zemin ve bodrum kat rustik taş, orta bölüm kesme taş, yan kanatlar taş-tuğla örgü ile kaplanmıştır, yan ve arka cepheler sıvalıdır (Hasol, 2017, 81). Yapının giriş cephesinin orta kısmı dışa taşkın olarak tasarlanmış ve bu üstteki alınlık kısmında "Hayatta En Hakiki Mürşit İlimdir" yazısı yazılmıştır (**Görsel 18**).

Görsel 18. Ankara Üniversitesi Dil ve Tarih-Coğrafya Fakültesi (https://upload.wikimedia.org/wikipedia/commons/3/37/Dil_ve_Tarih_Co%C4%9Frafya_Fak%C3%BCltesi_Binas%C4%B1%2C_Ankara.jpg, Erişim tarihi: 08.12.2025)

1943 yılında *Cumhuriyet'in 20. Yıldönümü* anısına basılan altı anı pulundan oluşan seriye ait dördüncü pul üzerinde Ankara Üniversitesi Dil ve Tarih-Coğrafya Fakültesi yer almaktadır. Kuzeybatı cephesinden fakülte ve çevresi, 10 kuruş değerinde siyah beyaz basılmıştır. Pulun

üstünde "Türkiye Postaları" altında "Cumhuriyetin 20. Yıldönümü Hatırası" yazısı bulunmaktadır. Pulun en dış çerçevesi beyaz renkle yapılmış ve kenarı dantellidir (**Görsel 19**).

Görsel 19. Ankara Üniversitesi Dil ve Tarih-Coğrafya Fakültesi pulu (https://www.pulhane.com/PulSayfalari/p194304.html, Erişim tarihi: 08.12.2025)

1952 yılında ise *Birleşmiş Milletler Akdeniz Yetiştirme Merkezi (FAO)* anısına emisyona çıkarılan dört puldan oluşan seride, dördüncü pul üzerinde Dil ve Tarih-Coğrafya Fakültesi binası güneybatı yönünden 60 kuruş değerinde kırmızı renkli basılmıştır. Pulun en dış çerçevesi beyaz renkle yapılmış ve kenarı dantellidir (**Görsel 20**).

Görsel 20. Ankara Üniversitesi Dil ve Tarih-Coğrafya Fakültesi pulu (https://www.pulhane.com/PulSayfalari/p195201.html, Erişim tarihi: 08.12.2025)

1953 yılında ise iki puldan oluşan *Milletlerarası Halk Kredisi 5. Kongresi* anısına emisyona çıkarılan serideki ikinci pul üzerinde Dil ve Tarih-Coğrafya Fakültesi yer almaktadır. Siyah beyaz basılan pulun üzerinde sol üst köşede madalyon içerisinde Türkiye Cumhuriyeti'nin üçüncü Cumhurbaşkanı Celal Bayar'ın portresi, sağ alt köşede ise madalyon içerisinde Mithat Paşa portresi yer almaktadır. Ziraat Bankasının kurucusu da olan Mithat Paşa'nın kooperatifçilik ile ilgili yaptığı çalışmalar nedeniyle pul üzerine portresinin konulduğu düşünülmektedir. Siyah beyaz basılan pulun en dış çerçevesi beyaz renkle yapılmış ve kenarı dantellidir (**Görsel 21**).

Görsel 21. Ankara Üniversitesi Dil ve Tarih-Coğrafya Fakültesi pulu (https://www.pulhane.com/PulSayfalari/p195307.html, Erişim tarihi: 08.12.2025)

1961 yılında *Ankara Üniversitesi Dil ve Tarih-Coğrafya Fakültesi'nin Kuruluşunun 25. Yılı* anısına, üç puldan oluşan seri emisyona çıkarılmıştır. 30 kuruşluk ilk pulda fakülte binası, 40 kuruşluk ikinci pulda Türkiye haritası, güneş kursu ve çivi yazılı kompozisyon, 60 kuruşluk üçüncü pulda ise Atatürk heykeli yer almaktadır.

30 kuruş değerinde siyah beyaz basılan birinci pul Dil ve Tarih-Coğrafya Fakülte binasını cepheden göstermektedir. En üst kısmında 25. yıl Romen rakamları "XXV" şeklinde yazılmış, tarih aralığı ise "1936-1961" şeklinde verilmiştir. Sağ tarafta siyah renk üzerine fakültenin ismi yazılmıştır. Dış çerçevesi beyaz çerçevelenmiş ve dantellidir (**Görsel 22**).

İkinci pulun ortasında Hitit Uygarlığı'nın sembolü olan güneş kursu, arkasında Türkiye haritası ve üzerinde *E-GAL A-NI-TA RU-BA-IM* (Kral Anita'nın Sarayı) yazısı bulunur.[7] Hatti Uygarlığı'na ait olan güneş kursu sembolü, Hititler tarafından da benimsenmiş ve bir kült eşyası olarak törenlerin bir parçası olmuştur (**Görsel 23**).

Fakültenin de tıpkı Hitit Güneşi gibi Türkiye'yi aydınlattığına ve başkent Ankara'nın sadece siyasi değil, kültür ve bilim alanlarında da bir merkeze dönüştüğüne işaret etmektedir (Anameriç ve Rukancı, 2010, 52-53).

60 kuruş değerinde siyah beyaz basılan üçüncü pul üzerinde ise Atatürk'ün heykel olarak portresi yer almaktadır. Üst kısımda 25. yıl Romen rakamları ile "XXV" şeklinde tekrarlanmış, tarih aralığı ise yine "1936-1961" şeklinde yazılmıştır. Atatürk portresinin altında Dil ve Tarih-Coğrafya Fakülte binasının cephesinde bulunan "Hayatta En Hakiki Mürşit İlimdir" yazısı yer almaktadır. Fakülte ismi sağ tarafta dikey olarak bulunmaktadır. Dış çerçevesi beyaz çerçevelenmiş ve dantellidir (**Görsel 24**).

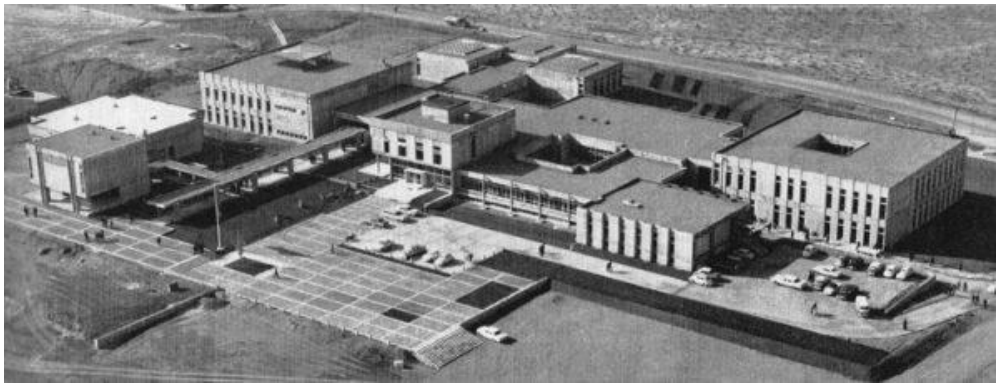
Görsel 22-23-24. Ankara Üniversitesi Dil ve Tarih-Coğrafya Fakültesi pulu (https://www.pulhane.com/PulSayfalari/p196101.html, Erişim tarihi: 08.12.2025)

2.5. Orta Doğu Teknik Üniversitesi Mimarlık Fakültesi

Orta Doğu Teknik Üniversitesi, Türkiye ile Orta Doğu ülkelerinin kalkınmasına katkıda bulunmak, fen ve sosyal bilimler alanında eleman yetiştirmek amacıyla 1956 yılında "Orta Doğu Yüksek Teknoloji Enstitüsü" adıyla eğitime başlamıştır. Üniversitenin yerleşkesinin planı 1961 yılında uluslararası proje yarışmasıyla elde edilmiştir. Yarışmayı kazanan Behruz Çinici ve Altuğ Çinici'nin projeleri doğrultusunda, 1961 yılında Mimarlık Fakültesi binası ile yerleşkenin inşasına başlanmış ve yerleşkenin inşası 1970'lerin sonuna kadar devam etmiştir (ODTÜ, 2016, 3). (**Görsel 25**)



Görsel 25. Orta Doğu Teknik Üniversitesi Mimarlık Fakültesi (https://www.arkitektuel.com/odtu-mimarlik-fakultesi/, Erişim tarihi: 08.12.2025)

1966 yılında *Orta Doğu Teknik Üniversitesi'nin 10. Yılı* anısına üç puldan oluşan seri emisyona çıkarılmıştır. 50 kuruşluk ilk pulda fakülte binası, 100 kuruşluk ikinci ve 130 kuruşluk üçüncü pulda ise üniversitenin logosunun yer aldığı kompozisyon yer almaktadır.

Birinci pulda fakülte binası 50 kuruş değerinde ve renkli basılmıştır. En üste "Orta Doğu Teknik Üniversitesi 10. Yılı" yazısı ve altında sol köşede üniversitenin logosu bulunmaktadır. En dış kısmı beyazla çerçevelenmiş olup dantellidir (**Görsel 26**).

100 kuruş değerindeki ikinci pul ise yine renkli basılmış, en üst kısımda "Orta Doğu Teknik Üniversitesi 10. Yılı" yazısı ve altında bilimi temsil eden "element simgesi" merkezinde üniversite logosuyla resmedilmiştir. Kenarı beyaz çerçeveli ve dantellidir (**Görsel 27**).

130 kuruş değerinde kahverengi tonlarının baskın olduğu renkli basılan diğer pulda ise yine aynı "10. Yıl" yazısı ile üniversitenin mühendislik alanlarını sembolize eden dişli ve çarkların soyutlandığı bir kompozisyon yer almaktadır. Sağ kısımda ise üniversitenin logosu bulunmaktadır (**Görsel 28**).

3. SONUÇ

Erken Cumhuriyet döneminden başlayarak ülkedeki yeni mimari yapılanmanın görünürlüğü açısından posta pulları bir araç olarak kullanılmıştır. Üzerinde çeşitli yapılar, devletin çeşitli kurumlarına ait binalar ile tematik olarak pek çok konu işlenmiştir. Pullar aynı zamanda mimari olarak bu yapıların geniş kitlelere aktarıldığı güçlü görsel bir araçtır. Küçük boyutlarına rağmen ulusal kimlik ve devlet ideolojisinin görsel aktarımında stratejik rol üstlenmişlerdir.

Basılı bir belge olarak tarihsel sürece kaynaklık eden pullar, başkent kimliğinin oluşumunda belirleyici rol oynayan binaların inşasına ilişkin önemli bir belge niteliği taşımaktadır. PTT Pul Müzesi koleksiyonunda yer alan Cumhuriyet dönemi Ankara eğitim yapılarının yer aldığı pullar aynı zamanda Cumhuriyet ideolojisinin mimarlık ve görsel kültür üzerinden nasıl kurgulandığını göstermektedir. Diğer yandan pulların dolaşımda olması başkent Ankara'nın kurumsal kimliği ile Ankara yapılarının mimari özelliklerinin Türkiye'de ve dünyada tanıtılmasını sağlamıştır.

Başkentte inşa edilen yapılar ulus-devlet ideolojisinin göstergeleri olmuş ve pullar aracılığıyla simgesel yapılara dönüşmüştür. Pullar kent hafızasını güçlendirilmesinde önemli bir yer tutmakla beraber kuşaklar arası bilgi aktarımına da katkıda bulunan önemli ve kalıcı bir tanıtım aracıdır.

Pullar üzerine basılı olan fakülteler genç Türkiye Cumhuriyeti'nin çeşitli kademelerinde çalışacak bilim insanlarını yetiştirmek için öncülük etmiş eğitim kurumlarıdır. Bu okullardan mezun olan öğrenciler ülke kalkınmasında önemli rol oynamış ayrıca sosyal ve kültürel alanda da önemli araştırmalarda bulunmuştur. Pullar üzerinde eğitim yapılarının basılı olması Türkiye Cumhuriyeti'nin eğitime verdiği önemi de göstermektedir.

Özet

Bu bildiri, antik dünyada metal üretimi ve metalurjik bilginin, antik yazılı kaynaklarda nasıl tanımlandığını ve kavramsallaştırıldığını incelemektedir. Çalışmanın amacı, metal üretimine ilişkin teknik bilgilerin antik yazarlar tarafından hangi kavramsal çerçeveler, betimlemeler ve gözlemler aracılığıyla aktarıldığını ortaya koymaktır.

Metalurjinin kuramsal ve kavramsal arka planı öncelikle Theophrastos, Lucretius ve Vitruvius'un aktarımları üzerinden ele alınmaktadır. Theophrastos, maddeleri toprak ve su kökenli olarak ayırarak madenlerin doğasına ilişkin teorik bir çerçeve sunmakta; aynı zamanda özellikle pigment içeren madenlerde karşılaşılan ölümcül çalışma koşullarına dair gözleme dayalı bilgiler vermektedir. Lucretius, metalin keşfini doğa olayları, ateş ve insan deneyimiyle ilişkilendirerek metalurjik bilginin kökenini felsefi bir anlatı içinde ele alır. Vitruvius ise demirin ısıtma ve ani soğutma yoluyla şekillendirilmesi ve sertleştirilmesini aktararak erken dönem metalurjik bilgiye dair teknik bir bakış sunar. Cevher çıkarımı ve madencilik mühendisliği bağlamında Plinius ve Strabon temel kaynakları oluşturmaktadır. Plinius, ateş ve sirke kullanılarak kayaçların parçalanması, derin galeri madenciliği ve yeraltı destek kemerlerinin kesilmesiyle gerçekleştirilen kontrollü çökertme yöntemlerini ayrıntılı biçimde betimler; suyun rolünü ise bu çökertmeler sonucunda ortaya çıkan molozların taşınması ve yıkanmasıyla sınırlar. Strabon, maden bölgelerinin coğrafi dağılımı, hidrolik altyapı ve işletmelerin ölçeğine dair bilgiler sunmakta; ayrıca yeraltı sularının tahliyesinde kullanılan Mısır vidasına (*Arşimet burgusu)* dikkat çekmektedir. Metalurjik dönüşüm süreçleri kaynaklarda açık biçimde ayrışmaktadır. Strabon, Polybios'a dayanarak gümüş üretiminde çok aşamalı yıkama, ezme ve eritme süreçlerini aktarırken, Plinius cıvanın (*hydrargyrum*) altın saflaştırmasındaki rolünü, amalgamasyon ve yaldızlama teknikleri bağlamında ele alır. Plinius'un mihenk taşına dair anlatımı, açıkça Theophrastos'a atıfla, metal saflığının tespitine yönelik uzmanlık bilgisini göstermektedir. Son olarak Vitruvius ve Theophrastos, metal üretiminin yan ürünleri olan pigmentler ve kimyasal maddelere ilişkin aktarımlarıyla metalurjinin çok yönlü bir faaliyet olduğunu ortaya koyar.

Bildiri, Plinius'un ahlaki eleştirileri temel alınarak, metal üretiminin doğa, insan sağlığı ve emek üzerindeki yıkıcı etkilerine dikkat çekerek sonlandırılmaktadır. Bu çalışma, antik yazarların aktarımlarının kendi terminolojisi ve anlatı sınırları içinde okunmasının, metalurjik bilginin teknik olduğu kadar düşünsel ve etik boyutlarını görünür kılabildiğini ortaya koymaktadır.

Anahtar Kelimeler: Antik metalürji, Madencilik teknolojileri, Antik yazılı kaynaklar, Metal üretimi

METAL PRODUCTION AND THE SCOPE OF METALLURGICAL KNOWLEDGE IN ANCIENT LITERARY SOURCES

Abstract

This paper examines how metal production and metallurgical knowledge in the ancient world were defined and conceptualised in ancient written sources. Its primary aim is to elucidate the conceptual frameworks, descriptive strategies, and observational modes through which ancient authors conveyed technical knowledge related to metal production.

The theoretical and conceptual background of metallurgy is first addressed through the writings of Theophrastus, Lucretius, and Vitruvius. Theophrastus offers a theoretical framework for understanding the nature of minerals by distinguishing substances of terrestrial and aqueous origin, while also providing observation-based accounts of the often lethal working conditions encountered in pigment-bearing mines. Lucretius situates the discovery of metals within a philosophical narrative that links natural phenomena, fire, and human experience, thereby addressing the origins of metallurgical knowledge. Vitruvius, by contrast, presents a technical perspective on early metallurgy through his detailed discussion of the shaping and hardening of iron by heating and sudden cooling. In the context of ore extraction and mining engineering, Pliny the Elder and Strabo constitute the principal sources. Pliny offers detailed descriptions of methods such as rock fragmentation using fire and vinegar, deep gallery mining, and controlled collapses achieved by cutting subterranean support arches; he confines the role of water to the transport and washing of the debris produced by these collapses. Strabo complements this account with information on the geographical distribution of mining regions, hydraulic infrastructure, and the scale of mining operations, while also drawing attention to the use of the Egyptian screw (*Archimedean screw*) for the drainage of underground water. Metallurgical transformation processes are clearly differentiated in the sources. Drawing on Polybius, Strabo describes the multi-stage washing, crushing, separation, and smelting processes involved in silver production, culminating in the removal of lead. Pliny, in turn, focuses on the role of mercury (*hydrargyrum*) in gold refining, discussing amalgamation and gilding techniques. His account of the touchstone, explicitly attributed to Theophrastus, attests to the existence of specialised expertise in assessing metal purity. Finally, the writings of Vitruvius and Theophrastus demonstrate that metallurgy was a multifaceted activity extending beyond metal production, through their discussions of pigments and chemical by-products such as ochres, white lead, sandarac, and verdigris.

The paper concludes by foregrounding Pliny's moral critique of mining, drawing attention to the destructive effects of metal production on nature, human health, and labour. It thus demonstrates that ancient authors approached metallurgy not merely as a technical practice, but as a human activity with profound intellectual and ethical implications.

Stil: Kültürel Varlıkların Doğal Afetlerden Korunması ve Yerel Yönetimler

Yüksek Lisans Öğrencisi Arkeolog Ali KARAKAYA *

Özet:

Türkiye'de yaşanan doğal afetler, kültürel mirasın bu afetler karşısındaki kırılganlığını göstermiştir. Dolayısıyla afet öncesi, afet anı ve afet sonrası süreçlerde yürütülen koruma, müdahale ve iyileştirme yaklaşımlarını bütüncül bir çerçevede değerlendirmek gerekliliği doğmuştur. Türkiye'nin jeolojik ve iklimsel özellikleri nedeniyle başta deprem olmak üzere çeşitli afet risklerine açık olması, kültürel varlıkların korunmasında risk yönetimini zorunlu kılmaktadır. Çalışmada, 2863 sayılı Kültür ve Tabiat Varlıklarını Koruma Kanunu, Afet ve Acil Durum Yönetimi Başkanlığı (AFAD) mevzuatı ve Türkiye Afet Müdahale Planı (TAMP) kapsamında şekillenen yasal ve kurumsal yapı ele alınmakta; Kültür ve Turizm Bakanlığı, Kültür Varlıkları ve Müzeler Genel Müdürlüğü, Koruma Bölge Kurulları, yerel yönetimler ve Koruma Uygulama ve Denetim Bürolarının (KUDEB) rol ve sorumlulukları analiz edilmektedir. Ayrıca envanterleme, risk analizi, dijital belgeleme, acil müdahale planları ve bilimsel restorasyon uygulamalarının kültürel mirasın sürdürülebilir korunmasındaki önemi vurgulanmıştır. Kültürel mirasın afetlerde korunması ve müdahale süreçlerinde, yerel yönetimlerin saha deneyimi, hızlı müdahale kapasitesi ve toplumsal katılımı sağlamadaki işlevleri ile, önemli bir unsur olduğunu ortaya konulmaktadır.

Anahtar sözcükler: Kültürel Miras, Kültürel Yapılar, Koruma, Kültür Büroları

Abbtract:

Preserving cultural heritage in disaster-prone regions requires both strategic foresight and coordinated implementation. The need for national legal mechanisms and institutional actors to adopt proactive measures has become increasingly evident, particularly in terms of preparing heritage assets for future generations. To enable cultural heritage to continue serving its social function and contributing to collective memory, a set of foundational actions—such as planning, site assessments, and targeted interventions—must be prioritized. These efforts offer a structured framework for evaluating the disaster preparedness of cultural assets, the effectiveness of emergency responses, and post-disaster recovery strategies. Importantly, cultural heritage protection must be approached holistically, taking into account not only technical aspects but also the administrative, social, and cultural contexts in which interventions occur. This process necessitates the integration of engineering solutions, structural reinforcement, stakeholder engagement, and the adoption of sustainable conservation policies. For high-risk countries such as Turkey, the formulation and execution of robust cultural heritage protection strategies is vital for transmitting cultural values to future generations.

Giriş

Kültürel miras, doğal afetlere karşı yüksek derecede kırılgan bir yapıya sahiptir. Depremler, sel, yangın ve heyelan gibi afetler, hem taşınmaz kültür varlıklarında hem de taşınabilir eserlerde geri dönüşü olmayan tahribatlara yol açmaktadır. Bu durum, yalnızca fiziksel yapıların zarar görmesiyle sınırlı değildir; aynı zamanda yapıların taşıdığı estetik, tarihsel ve kültürel değerler de büyük ölçüde yok olabilmektedir. Bu nedenle afet risk yönetimi, kültürel mirasın korunması açısından temel bir zorunluluktur.[1]

Güncel koruma yaklaşımlarının temelini oluşturan döngü; koruma – risk azaltma – hazırlık – müdahale – iyileştirme aşamalarından oluşur. Bu bütüncül döngü, kültürel varlıkların afetlere karşı daha dayanıklı hale getirilmesi için gerekli olan stratejik müdahaleleri içermektedir. Özellikle kültürel peyzaj yönetiminde toplumsal katılımının önemi ve afet öncesi–sonrası koruma sürecinde yerel paydaşların aktif rol üstlenmesi gerektiği ortaya çıkmaktadır.[2]

Kültürel mirasın afetlerden korunması, teknik uzmanlık, multidisipliner işbirliği ve kurumsal kapasite gerektiren çok yönlü bir süreçtir. UNESCO, ICOMOS ve ICCROM gibi uluslararası kuruluşlar, kültürel mirasın korunmasına yönelik kapsamlı ilkeler, rehberler ve standartlar geliştirmiştir. Bu kuruluşlar, afetlere hazırlık, risk azaltma ve acil müdahale süreçlerine ilişkin eğitim programları düzenlemekte; saha uygulamalarına destek sağlamaktadır.[3]

Türkiye'de kültürel mirasın afetlerde korunmasına ilişkin yaklaşım, hem yasal düzenlemeler hem de kurumsal yapıların koordinasyonu üzerine kuruludur. Mevzuat; risk analizi, koruma uygulamaları ve afet sonrası iyileştirme süreçlerinde belirli sorumluluklar ortaya koymaktadır[4]. Bu bağlamda, Türkiye'de kültürel mirasın korunmasına yönelik kurumsal yapılanma, uluslararası koruma prensipleriyle uyumlu bir gelişim göstermektedir. Bu durum, ülkemizde yapılacak koruma, risk azaltma, hazırlık, müdahale ve iyileştirme gibi alanlarda bilimsel ve hukuksal zeminde sürecin iyi yönetildiği anlamına gelmektedir.

Türkiye'deki Kültürel Mirasların Afetlerdeki Yönetimi

Türkiye, jeolojik yapısı ve iklimsel özellikleri nedeniyle deprem kuşağında yer aldığı bilinmekte olup, bu durum ülkenin kültürel mirasını ciddi afet riskleriyle karşı karşıya bıraktığı gerçekliği mevcuttur. Ülkenin, geçmişten bugüne sıklıkla şiddetli depremler yaşaması, kültürel varlıklarının korunması alanında uzun yıllar süregelen çok katmanlı bir afet yönetim yapısı geliştirmesine neden olmuştur. Deprem gibi doğal afetlerin, kültürel miras üzerindeki etkileri, sadece fiziksel hasarlarla sınırlı kalmayıp, bu mirasın sosyo-kültürel ve ekonomik değerleri üzerinde de ciddi tehditler oluşturabilmektedir[5] .

Afet yönetimi sürecinde Türkiye'de, çeşitli ulusal ve yerel düzeylerde entegre bir yaklaşım benimsenmiştir. 2011 Van Depremi sonrasında, Türkiye Afet Müdahale Planı (TAMP) gibi yerel bir düzeyde etkili ve kapsamlı bir afet yönetim politikası geliştirilmiştir. Bu plan, her türlü doğal olayda afet müdahale süreçlerini ve kurumların görevlerini detaylandırarak, doğal ve kültürel mirasın korunmasını amaçlamaktadır[6]. Afet risk yönetimi, yalnızca fiziksel koruma tedbirleriyle değil, aynı zamanda toplum bilinci ve katılıma dayalı yaklaşımlar ile

desteklenmelidir[7]. Örneğin, iletişim olanaklarının gelişmiş olduğu sosyal medya platformları afet öncesi eğitim, afet sonrası iletişim ve koordinasyonun da etkinlik ve iletişim planlamasına katkı sağlandığı bilinmelidir[8].

Türkiye'nin farklı kültürlere ev sahipliği yapması ve sahip olduğu zengin kültürel miraslar, afet risklerinin yönetilmesinde ek sorumluluklar getirmektedir. Ülke genelinde yürütülen çalışmalar, afetlerin kültürel miras üzerindeki etkilerini azaltmayı hedeflemekte; bu doğrultuda, afet hazırlık eğitimleri ve kamu bilinçlendirme kampanyaları gibi önlemler geliştirilmektedir[9]. Ayrıca, Türkiye'nin afet yönetimi politikaları, 1999 Marmara Depremi ve 2023 Kahramanmaraş Depremi gibi önemli tarihsel olaylardan edinilen deneyimlere dayanmaktadır; bu etkileşimler, kültürel mirasın afetlere karşı korunmasına dair stratejilerin evrimini sağlamaktadır[10].

Türkiye'deki Kültürel Varlıkların Afet Yönetiminde Yasal ve Kurumsal Çerceveleri

Türkiye'de kültürel mirasın afetlerde korunmasına ilişkin temel yaklaşım, iki ana mevzuata dayanmaktadır. Bunların ilki, 2863 Sayılı Kültür ve Tabiat Varlıklarını Koruma Kanunu'dur. Bu yasa, kültürel varlıkların korunmasını kamu görevi olarak tanımlar ve risk altındaki varlıkların tespiti, acil müdahale ile restorasyon süreçlerinin genel çerçevesini ortaya koyar[11]. Türkiye'nin deprem, sel ve heyelan gibi doğal afetlere sıkça maruz kalan bir coğrafyada yer alması, bu tür yasal düzenlemelerin gerekliliğini açıkça göstermektedir. Özellikle büyük depremler sonrası yaşanan yıkımlar, kültürel varlıkların korunması için kapsamlı yapısal ve hukuki önlemler alınmasının zorunlu olduğunu ortaya koymuştur[12].

İkinci temel düzenleme, Afet Kanunu ve Afet ve Acil Durum Yönetimi Başkanlığı (AFAD) mevzuatıdır. Bu düzenlemeler, afet risk azaltma politikalarını belirlerken aynı zamanda acil müdahale süreçlerinde kültürel mirasın korunmasına yönelik genel sorumlulukları tanımlar. AFAD, ulusal afet yönetim sisteminin koordinasyonundan sorumlu temel kurumdur ve özellikle 2011 Van Depremi gibi büyük olaylar, kurumun afet sonrası müdahale kapasitesinin güçlenmesine katkı sağlamıştır[13].

Kurumsal anlamda ise Kültür ve Turizm Bakanlığı, kültürel mirasın korunmasına arşivlenmesine ve ileriye dönük hareket ve eylemine yönelik politikaların ana yürütücüsüdür. Bakanlık, yasal düzenlemelerin uygulanmasını sağlarken aynı zamanda afet sonrası süreçlerde de yönetici ve yönlendirici bir rol üstlenir.

Öte Yandan T.C. Kültür ve Turizm Bakanlığının karar ve uygunluk denetimlerini 2863 sayılı kanun kapsamında bilimsel esaslar ile Kültür ve Tabiat Varlıklarının Korunmasına ilişkin Koruma Bölge Kurulları yapılacak iş ve işlemlerin yönünü belirler. Böylece kültür varlıklarının şekilsel ve hukuksal temel ile birlikte bilimsel veriler ile korunması, tescil edilmesi, imar planlarının incelenmesi ve işlemlerin tesis edilmesi, koruma alanlarının belirlenmesi gibi konularda fayda sağlamaktadır. Bu durum eserlerin hukuk ve teknik açıdan güvencesini sağlamaktadır.

Diğer yandan Koruma Bölge Kurullarının sahada gözlem ve uygulayıcıları olan Yerel yönetimler ve bünyelerindeki Koruma Uygulama ve Denetim Büroları (KUDEB) koruma uygulamalarının teknik boyutunda, özellikle saha denetimi ve yapısal müdahalelerde önemli

[12] Şahin Ş., Üçgül İ.,2019,
[13] Köse Z.,Soyluk A.,2024.

görevler üstlenir[14]. Türkiye'nin afet olasılığı değerlendirildiğinde, afet ile ilgili denetimlerin eşgüdüm içinde çalışması, ulusal ve yerel düzeyde geliştirilen politikaların etkinliğini artırmaktadır.

Böylece, Türkiye'de kültürel mirasın afetlerden korunmasına ilişkin mevzuat ve kurumsal yapılanma kısmı Kültür ve Turizm Bakanlığına, 2863 sayılı Kültür ve Tabiat Varlıkları Kanunu ile bilimsel olarak çerçeve çizen Koruma Bölge Kurullarına ve Yerelde Koruma faaliyetlerini en iyi şekilde yürütülmesi ve takip edilmesi için ise Yerel Yönetimlerin yetki ve sorumlulukları belirlenmiştir. Bu durum doğal afetlerin can ve mal kayıplarının etkilerini azaltmayı ve kültürel varlıkların sürdürülebilir biçimde korunmasını hedeflemektedir. Etkili iş birliği ve koordinasyon hem afetlere hazırlık aşamasında hem de afet sonrası süreçlerde kültürel mirasın korunması için kritik önem taşımaktadır[15].

Kültürel Varlıkların; Afet öncesi, Afet Anında, Afette Müdahalesi ve İyileştirmesi

Türkiye'de kültürel miras alanlarının ve yapılarının afet risk analizi, öncelikle deprem tehlikesi nedeniyle koruma çalışmalarının merkezinde yer almaktadır. Risk analizine yönelik süreç; envanterleme, yapısal sağlamlık değerlendirmesi, tehlike ve hassasiyet haritalarının hazırlanması ile önleyici koruma uygulamalarını içeren çok yönlü bir yapı ile oluşturulur.

Bu sürecin ilk aşamasını oluşturan envanter çalışmaları, kültürel miras varlıklarının güncel, detaylı ve ölçülebilir biçimde kayıt altına alınmasını sağlar. Envanter verileri, risk azaltma stratejilerinin temel dayanak noktalarından biridir. Ioannidis ve çalışma arkadaşları kültürel mirasın belgelenmesi için UAV fotogrametrisi yöntemlerinin sağladığı yüksek çözünürlüklü modellerin, özellikle risk analizlerinde büyük avantaj sunduğunu vurgulamaktadır[16]. Bu teknolojiler, sahadaki fiziksel değişimleri izlemeyi kolaylaştırmakta ve afet öncesi hazırlık çalışmalarına katkı sunmaktadır.

Yapısal sağlamlık değerlendirmesi ise tarihi yapıların taşıyıcı sistemlerinin incelenmesiyle yürütülmektedir. Bu değerlendirmeler, yapıdaki zayıf noktaları belirleyerek ileride ortaya çıkabilecek hasarların öngörülmesine yardımcı olur. Masciotta ve ekibi, dijital belgeleme ve önleyici koruma yöntemlerinin, kültürel miras yapılarının uzun vadeli güvenliği açısından kritik öneme sahip olduğunu belirtmektedir[17]. Bu yaklaşımları destekleyen çalışmalar, koruma politikalarının risk odaklı biçimde geliştirilmesi gerektiğini ortaya koymaktadır[18].

Afet risk analizinde bir diğer önemli unsur, tehlike ve hassasiyet haritalarının hazırlanmasıdır. Bu haritalar, deprem, sel, heyelan ve yangın gibi afetlerin kültürel miras üzerindeki potansiyel etkilerini değerlendirmek için gerekli olan mekânsal veriyi sunar. Safizadeh ve çalışma arkadaşları, doğal afetlerin yönetiminde kültürel mirasın özel bir konuma sahip olduğunu ve risk haritalarının afet azaltım stratejilerinin geliştirilmesinde temel bir araç olduğunu ifade etmektedir[19]. Bu görüş, risk haritalarının karar alma süreçlerinde etkin şekilde kullanılmasına yönelik literatürle de uyumludur[20].

Önleyici koruma uygulamaları ise bu sürecin tamamlayıcı bileşenidir. Bu aşamada yapısal güçlendirme, drenaj sistemlerinin iyileştirilmesi, yangın önleme mekanizmalarının kurulması ve güvenlik sensörleriyle izleme gibi teknik müdahaleler gerçekleştirilmektedir. Zheng ve ekibi, özellikle ahşap tarihi yapıların korunmasında sürekli izleme ve değerlendirme teknolojilerinin öneminin arttığını belirtmektedir. Bu uygulamalar, kültürel mirasın fiziksel

[20] Safizadeh M., Marzbali H. M., Aldrin A., Maliki Z., 2024.

bütünlüğünü koruduğu gibi, gelecek nesillere güvenli ve sağlıklı bir biçimde aktarılmasını da hedeflemektedir.

Tüm bu çalışmalar, afet meydana gelmeden önce gerçekleştirilen koruma faaliyetlerinin, kültürel mirasın sürdürülebilirliği açısından en etkili aşama olduğunu göstermektedir. Literatür, çok yönlü bir risk yönetimi yaklaşımının hem kültürel hem de yapısal bütünlüğün korunması için gerekli olduğunu vurgulamaktadır[21].

Afet anında kültürel varlıkların korunması, daha önceden hazırlanmış acil eylem planlarının tatbik edilmesi ve etkinliğine bağlıdır. Bu planlar, öncelikle can güvenliğini esas alır; kültürel varlıklara erişimi düzenler, eserlerin tahliyesi ve ilk yardım uygulamalarını tanımlar ve kurumlar arası haberleşme mekanizmalarını belirler. Bu tür planların, kriz anında karar alma süreçlerini hızlandırdığı ve müdahale aktörleri arasında etkili bir koordinasyon sağladığı bilinmelidir.

Müdahale süreci genellikle iki temel aşamada gerçekleşir. İlk aşama, acil yapısal güvenlik kontrolüdür. Bu aşama, yıkılma veya çökme riski taşıyan kültürel miras yapılarına yönelik hızlı değerlendirmeleri ve çevrede güvenli bir alan oluşturulmasını içerir. Afet sonrası ortaya çıkabilecek ikincil zararların önlenmesi, bu hızlı yapısal değerlendirmeye doğrudan bağlıdır. İkinci aşama ise kültürel eserler için "ilk yardım" müdahalesini kapsamaktadır. Bu süreçte ICCROM ve ICOMOS tarafından hazırlanan "Kültürel Miras İçin İlk Yardım" rehberleri yol gösterici niteliktedir ve eserlerin stabilizasyonu, belgelenmesi ile acil koruma müdahalelerinin nasıl yapılacağına ilişkin yöntemleri ayrıntılı biçimde sunmaktadır[22].

Başka bir bakışla, Türkiye'de kültürel mirasın afet öncesi ve afet sonrasında, çok katmanlı planlama, hukuki düzenlemeler ve kurumsal koordinasyon ile şekillenmektedir. Etkin ve yönetilebilir acil durum planları, can güvenliğinden başlayarak müdahalenin tüm aşamalarını kapsar. Bu durum, kültürel mirasın korunmasına gözle görülür şekilde katkılar sunar. Bu kapsamlı yaklaşım, afetlere karşı hazırlıklı olmanın kültürel varlıkların ileri kuşaklara korunarak aktarmasında önemli olduğunu göstermektedir.

Türkiye'de afet sonrasında kültürel miraslara ilişkin restorasyon aşamaları, bürokratik ve sabırlı olunması gereken bir süreci ifade eder. Bu süreç, kültürel mirasın hasar tespitiyle başlar sırasıyla afet sonrası kültürel miras alanlarında meydana gelen fiziksel zararların belirlenmesi, müdahale planlarının oluşturulması atılacak ilk adımdır. Öte yandan hasar tespit çalışmaları, eserlerin korunacağı alanın seçilmesi, hangilerinin acil müdahaleye ihtiyaç duyduğu gibi kritik kararların alınması koruma uygulamalarında kolaylık sağlar. Bu aşamayı, koruma kurullarından gerekli izinlerin alınması izler. Restorasyon süreçlerinin kanun ve yönetmelikler dahilinde yürütülmesi, kültürel varlıkların özgün niteliğinin korunması açısından kamu kurum ve kuruluşlarını bağlayıcı bir nitelik kazandırır.

Restorasyon projelerinin hazırlanması ise sürecin en belirleyici aşamalarından biridir. Bu projelerin hukuksal düzlemde, bilimsel yöntemlerle ve koruma ilkeleri doğrultusunda geliştirilmesi, yapıların özgün değerlerini kaybetmeden iyileştirilmesini mümkün kılar[23]. Restorasyon sürecinde uzman ekiplerin çalışmasının zorunlu olduğunu ve sürecin dikkatli planlamaya dayandığını vurgular. Kayıt sistemleri, fotogrametri ve üç boyutlu modelleme gibi teknikler, restorasyon projelerinin doğruluğunu artırarak müdahale kararlarının bilimsel temellere dayanmasını sağlar.

Bu durum afet öncesi alınacak tedbirler, afet sonrası kültürel mirasın korunmasına yol gösterecektir. Kültür mirası eserlerinin, detaylı hasar tespiti, yasal izinlerin alınması, bilimsel temelli projelerin hazırlanması ve uygun tekniklerin uygulanmasını gerektiren kapsamlı bir

[21] Bonanza, Sardella, 2023.
[22] Ferrari., 2024.
[23] Çatalbaş F., Kılıç Ecemiş S., 2023.

süreçtir. Bunun yanında eserlerin resmi kaynaklar yada bilinirliği göz önünde bulundurularak, Ulusal ve uluslararası iş birliği, bilimden faydalanma ile eserlerin ayağa kaldırılmasında ve toplum katılımı ile sürecin başarıyla yürütülmesinde temel unsurlardır.

Yerel Yönetimlerin Önemi ve Kültürel Varlıkların Sürdürülebilirliliği

Kültür ve Turizm Bakanlığı, Kültür varlıkları ve Müzeler Genel Müdürlüğü, Koruma Bölge Müdürlükleri ve Yerel yönetimler (Belediyeler ve İl Özel İdareleri), kararları ve kanunların doğrultusunda afetlerde kültürel mirasın korunmasında hem ekip ve ekipman anlamında hemde teknik personelinin olması açısından son derecede önemli bir rol üstlenmektedir. Yerel yönetimler, afet öncesinden başlayıp afet sonrası süreçlerde risk analizi, yapı denetimi, geçici güçlendirme ve acil müdahale gibi kritik faaliyetleri yürüterek birikmiş bilgi ve birikimlerini sahaya yansıtmaktadır. Özellikle deprem gibi geniş çaplı afetlerde, kültürel mirasın korunması yerel yönetimler anlamında hızlı ve uygun kararlar almak gerektirdiğinden, belediye ve özel idarelerin müdahale kapasitesi büyük önem taşır.

2023 depremleri, yerel yönetimlerin bu süreçteki etkisini açık biçimde ortaya koymuştur. Büyükşehir belediyesi, belediyeler ve il özel idareleri afet sonrasında kültürel varlıkların ivedilikle güçlendirilmesi ve aslına uygunluğu ile ilgili çalışmalar yapmıştır. Bu uygulamalar hem hızlı müdahale gereksinimini karşılamış hem de uzun vadeli koruma stratejilerinin şekillenmesine yol göstermiştir[24]. Aynı zamanda belediye ve il özel idarelerin bu süreçlerde yerel halk ile etkili iletişim ve iş birliği içinde çalışması, kültürel mirasın fiziksel bütünlüğü kadar toplumsal hafızanın korunması açısından da büyük önem taşımaktadır.

Yerel yönetimlere bağlı Koruma Uygulama ve Denetim Büroları (KUDEB) birimleri, kültürel miras alanlarında yapı stoklarını kontrol ederek ve denetimlerini yaparak mevcut riskleri belirlemekte ve gerekli durumlarda acil güçlendirme için yol haritası oluşturmaktadır. Ayrıca bazı belediyeler, afet sonrasında taşınabilir eserlerin güvenliğini sağlamak amacıyla geçici depolama alanları kurmuş; böylece eserlerin korunmasına yönelik ek bir önlem almıştır[25].

Yerel yönetimlerin kültürel mirasın afetlerde korunmasına yönelik rolleri, yalnızca risk analizi ve denetim süreçleriyle sınırlı değildir. Aynı zamanda acil müdahale, geçici güçlendirme, belgeleme çalışmaları ve uzun vadeli koruma stratejilerinin uygulanması, bu kurumların çok boyutlu bir sorumluluk üstlendiğini göstermektedir. Bu kapsamlı yaklaşım hem fiziksel hem de kültürel değerlerin sürdürülebilirliğine katkı sağlamaktadır.

Kültür varlıklarının korunması için, afetin türüne, yapıların fiziksel ve malzeme özelliklerine ve çevresel koşullara bağlı olarak büyük farklılıklar göstermektedir. Deprem, sel ve taşkınlar, yangın, toprak kaymaları ve iklim değişikliğine bağlı afetler kültürel miras üzerinde tahribatın olduğu bilinmelidir. Bu durum kültür varlıkları için özgün risk değerlendirmesi yapılması gerekli kılmaktadır.

Özellikle depremler, tarihi yapıların taşıyıcı sistemlerini doğrudan etkileyerek en yüksek riskleri oluşturan afet türlerinden biridir. Geleneksel inşaat malzemeleri olan taş ve kerpiç, deprem sırasında kırılgan davranarak ciddi yapısal hasara yol açabilmektedir. Dolayısıyla, deprem kültür mirasın etkilenmesini en aza indirmek için güçlendirme yada yapıyı destekleme çalışmaları yapıların ayakta kalmasını kolaylaştıracaktır.

Taşkınlar, heyelan ve sel kültürel miras için tehlikeli sonuçlar oluşturmaktadır. Suyun ve toprağın kütlesel hacmi ve sonrasında çekilmesi yada hafriyat aşması hangi yapı da olursa olsun

[24] Oktay, F., 2015.
[25] Üye B., 2020.,

yapıda korumasızlık mevcutsa yapılarda büyük hasarlar oluşturmaktadır. Bu nedenle taşınamayan kültürel mirasların biyolojik, kimyasal bozulmalarının önüne geçebilmek için, yerel yönetimler tarafından taşkın ve heyelan sahalarını belirlemek oluşabilecek zararları en aza indirmek için istinat duvarları, zemin doldurma / güçlendirme işlemleri ve dere/nehir ıslah çalışmaları yapmak gerekmektedir.

Yangınlar, kültürel miras yapılarının başka bir korkulan durumudur. Olası bir yangın halinde hem can hemde mal güvenliği doğrudan tehlikededir. Özellikle ahşap yapıların yangın ve duman tehlikesi ile karşı karşıya kalması ciddi şekilde yapılara etki etmektedir. Kültürel miras yapılarında yangın olması durumunda yapıların tamamen yanması ve kullanılamayacak hale alması kaçınılmazdır. Bundandır ki yangın öncesi duman dedektörlerinin, yapıların içinde hassas hale getirilmesi, yangın tüplerinin yeterli miktarda ve müdahale edilebilecek yerlere konumlanması, yapıların mutfak bölümlerinde davlumbaz söndürme sisteminin bulunması, yapı içerisinde muhtelif yerlerde yangın söndürme battaniyesinin bulunması, ayrıca yapı içinde ve dışında yangın dolabının aktif ve çalışabilir konumda olması, bunun yanında duman dedektörlerinin hazır bulundurulması halinde yangın söndürme sisteminin devreye girmesi gibi teknik ve zorunlu bir durum olması gerekmektedir.

Başka bir korunması gereken durum ise iklim değişikliğinin olumsuz sonuçları mevcuttur. Dengesiz hale gelen iklimler kültür miras yapılarını açıkça tehdit etmektedir. Bu durum yapılarda fiziksel kimyasal bozulmaları hızlandırmaktadır. Taş, ahşap, tekstil, metal gibi yapı ve eşyaların deforme sürecini yavaşlatmak ve en aza indirmek için gerekli tedbirin alınması gerekmektedir.

Sonuçta, her afet türü kültür varlıklarında bir iz bıraktığı görülmelidir. Bu deformasyon izlerinin doğru biçimde değerlendirilmesi, koruma stratejilerinin bilimsel temellere dayandırılması açısından kritik öneme sahiptir. Güncel literatür, afet türlerine özgü risk analizlerinin yapılmasını ve bu risklere uygun koruma uygulamalarının geliştirilmesini zorunlu kılmaktadır.

Dijital belgeleme ve yapay zekâ tabanlı analizler, kültürel mirasın afetlere karşı korunmasında son yıllarda önemli bir dönüşüm sağlamaktadır. Bu kapsamda kullanılan dijital belgeleme teknikleri; fotogrametri, lazer tarama (LiDAR), üç boyutlu modelleme ve Coğrafi Bilgi Sistemleri (CBS) tabanlı analizleri içermektedir. Bu yöntemler, kültürel varlıkların dijital arşivlenmesini ve mevcut durumunu yüksek doğrulukla kaydedebilmekte ve afet sonrası hasar tespit süreçlerini önemli ölçüde kolaylaştırmaktadır.

Lazer taramalar, özellikle deprem ve heyelan gibi doğa olayları sonrasında oluşan hasarların belirlenmesinde bilgileri doğru ve kesin olarak vermektedir. Bu durum bizlere yapının kaybolan bölümlerinde elimizdeki dijital veri ile karşılaştırmamızı ve doğru yenilemenin yada tadilatın yapılmasına olanak sağlar.

CBS tabanlı sistemler, kültürel miras alanlarının kırılganlığını mekânsal düzeyde analiz etmek için etkili çözümler sunmaktadır. Riskli haritaları, zemin verileri ve yapı özelliklerinin bir araya getirilmesiyle oluşturulan bu analizler, daha doğru afet riski değerlendirmelerine olanak sağlar.

Son yıllarda yapay zekâ ve makine öğrenmesi tekniklerinin kültürel mirasın risk analiz süreçlerine entegrasyonu giderek artmaktadır. Bununla birlikte dijital arşivleme teknikleri, afet öncesi ve afet sonrasında müdahale sürecinde kritik bir rol üstlenmektedir. Yapay zekâ destekli yazılımlar kültürel mirasın dijital arşivden kayıtlarının çekilmesi ile birlikte eski haline geri dönüşümü hakkında fikir sahibi yapmaktadır.

Eserlerin dönem koşullarına ve aslına uygun dönüşümünde, dijital arşivleme yöntemleri ve yapay zekâ destekli yazılımlar, kültürel mirasın afetlerden önce ve sonra hazırlanmasına karşı güçlü teknolojik araçlar olarak öne çıkmaktadır. Bu teknolojilerin bilimsel verilere dayalı karar

süreçlerine katkısı, kültürel mirasın sürdürülebilir korunmasında artık zorunlu bir yaklaşım olarak değerlendirilmektedir. Güncel dijital çalışmalar, bu entegrasyonun koruma politikalarının geleceğinin kritik öneme sahip olduğunu ortaya koymaktadır.

Depremlerden sonra yürütülen acil müdahale çalışmaları, kurumlar arası koordinasyonun kültürel mirasın korunmasındaki belirleyici rolünü açıkça ortaya koymuştur. Kültür ve Turizm Bakanlığı, Afet ve Acil Durum Yönetim Başkanlığı, Belediyeler ve İl Özel İdareler arasında hızlı bir iletişim kurulması müdahalelerde gecikmeleri engelleyen en önemli faktörlerden biridir. Ayrıca gönüllü uzman ekiplerin ve akademik çevrelerin sürece katkısı, restorasyon planlamalarının daha sağlıklı yürütülmesine önemli bir destek sağlayacaktır.

Sonuç

Asya ve Avrupa kıta levhalarının mücadelesi sonucu Türkiye gibi ülkeler de birtakım jeolojik ve coğrafi sonuçlar karşımıza çıkmaktadır. Bu jeolojik hareketlilik ülke genelindeki demografik yapıya ve kültürel mirasa olumsuz etkileri olmaktadır. Jeolojik hareketlilik başta deprem hareketliliğini tetiklemesi ile kültürel mimari yapılarımızın hukuksal ve teknik açıdan korunması gereken bir durum oluşturur. 2011 yılı Van depremi sonrası Türkiye Afet Müdahale Planının (TAMP) kamu kurum ve kuruluşlar ile sivil toplum örgütlerini birleştirerek birlikte afet merkezinden hareket etmesinin sağlanması amaçlanmıştır. Bununun yanında afet durumunda genel koordinasyon sağlanıp kaynak yönetimi, ekonomik ve sosyal kayıplar, sosyal ve kültürel farkındalıklar ile yaşamın devamlılığı ve afet sonrası normale dönmesi amaçlanmıştır. Ülkemizde afet sonrası kültürel mirasımızın korunması ek sorumlulukları getirdiği gibi eserlerin korunması konusunu ortaya çıkarmaktadır.

Kültür ve Turizm Bakanlığı, miras ögelerinin arşivlenmesi, korunması, ileriye dönük hareket ve eylemlerini 2863 sayılı Kültür ve Tabiat Varlıklarını Koruma Kanunu kapsamında değerlendirip günümüze kadar çeşitli düzenlemeler sonucu kanun son halini almıştır. Çeşitli doğal olayların meydana gelebileceği doğrultusunda bu kanun ve yürütücülerine kamu görevi olarak birtakım sorumluluklar yüklenmiştir. Böylece kültürel mirasın afetlerden korunması mevzuat kapsamında güvence altına alınmış hem de bilimsel olarak bakanlıktan, koruma bölge kurullarına ve yerel yönetimlere kadar iş birliği ve koordinasyon sağlanmıştır.

Bu koordinasyon sağlanması için birinci öncelik envanter çalışmaları yani saha ile teknolojinin birleştirilmesi işlemidir. Bu en önemli husustur. Eserlerin bilimsel temelli ve teknolojik araç ve gereçler kullanarak envanter çalışması yapılarak, projeler bilimsel temel üzerinden inşa edilmelidir. Afet öncesi kültürel yapılarda risk analizinin yapılması, teknolojik alt yapılar ve mühendislik hizmetleri çok önemlidir. Afet sonrası ise Kültürel Miras İçin "İlk Yardım" rehberi oluşturulmalı, eserlerin önce can güvenliği tehdit etmemesi, eserlerin parçalarının korunması ve daha sonra restorasyonu için çalışma planı oluşturulmalıdır. Bu plan bilimsel ve hukuksal düzlemde yapılmalı, elimizdeki envanter çalışması ile teknolojik cihazların yardımı sonucu son görünümü tasarlanarak revizyon edilmelidir. Teknolojik yardımlar ile fotoğraf, üç boyutlu tarama, parselasyon, koordinat alma, tapu ve kadastro kayıtları ve bölge halkının kültür mirası ile ilgili bilgileri gibi durumlar eser revizyonunda göz önünde bulundurulmalıdır.

Kültür varlıklarının korunması için bakanlık ve koruma bölge kurulları altyapı olarak destek vermektedir. Bunun yanında, bölge ve bölge halkının sosyal – kültürel yapısı, coğrafik etmenleri ve folklorik koşullarını en iyi bilen ve sahada tatbik eden yerel yönetimlerdir. Belediyeler ve İl Özel İdareleri gibi yerel yönetimler, kültürel varlıklara hem ekonomik hemde bölge halkının katkıları ile korumaya çok değerli katkılar sağlayabilmektedir.

Yerel yönetimler ve yerel yönetimlere bağlı Koruma Uygulama ve Denetim Büroları

KUDEP'ler yerel yönetimlerde kurulmalı, paydaş kurumlarla köprü görevini görmeli, envanter ve teknolojik altyapıları ile olası afet senaryolarında kültürel yapılara müdahalenin planlaması ve protokollerin hazırlamasında önemli katkılar sunacaktır.

AUXILIARY SCIENCES IN ARCHAEOLOGY: INTERDISCIPLINARY APPROACHES AND ANALYTICAL METHODS

Prof. Dr. Erkan FİDAN

Bilecik Seyh Edebali University, Faculty of Humanities and Social Sciences, Bilecik

erkanfidan@gmail.com - https://orcid.org/0000-0002-6777-927X

ABSTACT

Archaeology relies not only on excavation and survey but also on a network of auxiliary sciences that provide analytical perspectives on past societies. This interdisciplinary framework spans a broad range from archaeometry and geoarchaeology to paleogenetics and geophysics. Archaeometry applies physical, chemical, and mathematical techniques to determine the age, raw material, and production technology of artifacts through methods such as radiocarbon dating (C-14), thermoluminescence (TL), and dendrochronology. Geoarchaeology employs geomorphological and sedimentological analyses to reconstruct environmental and cultural transformations within archaeological landscapes. Bioarchaeology and ancient DNA studies reveal genetic, demographic, and health-related information, enabling reconstructions of kinship and social structure. Meanwhile, geophysical prospection and remote sensing provide non-invasive means to detect subsurface features and guide excavation strategies. Together, these disciplines have transformed archaeology into a quantitative, data-driven field—linking material evidence with environmental and biological processes to produce a more comprehensive understanding of the human past.

Keywords: Archaeometry, geoarchaeology, ancient DNA, geophysics, interdisciplinary archaeology

ARKEOLOJİYE YARDIMCI BİLİM DALLARI: DİSİPLİNLERARASI YAKLAŞIMLAR VE ANALİTİK YÖNTEMLER

ÖZET

Arkeoloji, geçmiş kültürleri anlamada yalnızca kazı ve yüzey araştırmalarına değil, çok sayıda yardımcı bilim dalının sunduğu analitik verilere de dayanır. Bu disiplinler arası yapı, arkeometriden jeoarkeolojiye, paleogenetikten jeofiziğe uzanan geniş bir yelpazeyi kapsar. Arkeometri, fiziksel, kimyasal ve matematiksel yöntemlerle arkeolojik buluntuların yaşını, hammaddesini ve üretim teknolojisini inceler; radyokarbon (C-14), termolüminesans (TL), dendrokronoloji gibi yöntemlerle kesin tarihlendirme sağlar. Jeoarkeoloji, jeomorfoloji, sedimentoloji ve çevresel analizlerle yerleşim alanlarının doğal ve kültürel süreçler içindeki değişimini yorumlar. Biyoarkeoloji ve antik DNA analizleri, insan ve hayvan kalıntılarından genetik, demografik ve sağlık verileri sunarak sosyal yapıları yeniden kurmamıza olanak tanır. Jeofizik ve uzaktan algılama teknikleri ise yer altı kalıntılarını tahribatsız biçimde saptayarak kazı planlamasında rehberlik eder. Bu yardımcı bilim dalları, arkeolojiyi nicel verilere dayalı, çok katmanlı bir araştırma alanına dönüştürmüş; geçmişin materyal kültürünü yalnızca betimleyen değil, neden–sonuç ilişkileri kurabilen bir bilim haline getirmiştir.

Anahtar Kelimeler: Arkeometri, jeoarkeoloji, antik DNA, jeofizik, disiplinlerarası arkeoloji

1. Introduction

Archaeology originated as a descriptive practice organized around typological classification and stylistic analysis. While these remain valuable, contemporary scholarship emphasizes that archaeological materials are scientific data containing measurable information about technological choices, cultural identities, subsistence strategies, mobility, trade, and belief systems (Renfrew & Bahn, 2020). This transition reflects the incorporation of laboratory sciences, computational modeling, and digital imaging, which have strengthened archaeological interpretation through quantification and reproducibility.

The increasing threat of site destruction from agriculture, construction, mining, and climate-driven erosion has further accelerated the adoption of non-invasive technologies as first-line diagnostic tools (Conyers, 2013).

Thus, archaeology today operates at the intersection of:

- Natural sciences, which provide analytical accuracy
- Engineering and computer sciences, which develop remote sensing and GIS tools
- Social sciences and humanities, which ensure culturally informed interpretation

The result is an archaeological discipline that is holistic, data-driven, and ethically responsible.

---

2. Archaeometry: Analytical Foundations of Archaeological Science

Archaeometry applies physics, chemistry, and materials science to archaeological materials. Its three main domains include:

2.1 Chronometric Dating

Accurate timelines are foundational.
Major methods include:

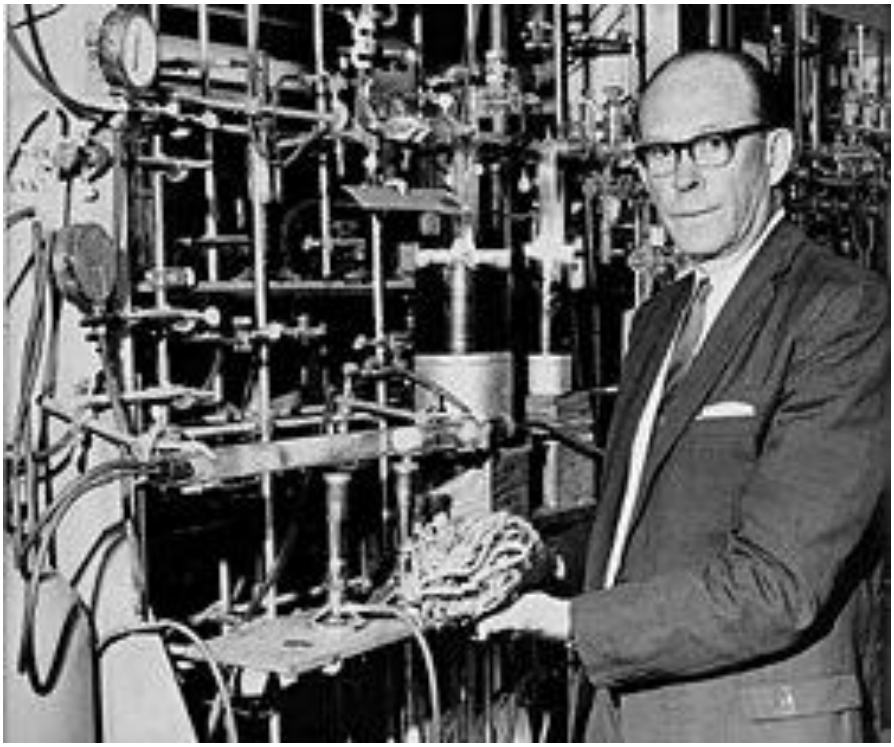
- Radiocarbon dating (AMS-C14): Organic remains, high precision
- Thermoluminescence and OSL: Fired ceramics and sediments
- Dendrochronology: Absolute annual resolution

Aitken (1990) emphasizes that the shift from relative to absolute dating was the first scientific revolution in archaeology.

The most preferred method is the c 14 method. So how does it work?

Three types of carbon isotopes occur naturally in the environment: **Carbon-12 (C-12)**, a stable isotope comprising approximately **98.9%** of natural carbon; **Carbon-13 (C-13)**, another stable isotope representing about **1.1%**; and **Carbon-14 (C-14)**, a **radioactive isotope** present in trace amounts. C-14 is continuously produced in the atmosphere through the interaction of **cosmic rays** with **nitrogen-14 (N-14)** atoms. This radioactive carbon becomes incorporated into **carbon dioxide (CO_2)**, which is absorbed by plants during **photosynthesis**. Animals, in turn, acquire C-14 by consuming these plants. Consequently, the **C-14/C-12 ratio** in all living organisms remains in

equilibrium with that of the atmosphere. When an organism dies, the exchange of carbon with the atmosphere ceases. From that moment, the **radioactive C-14 isotopes** within its tissues begin to **decay** over time, while the stable isotopes **C-12** and **C-13** remain constant. Therefore, by measuring the **C-14/C-12 ratio** in an organic sample and applying the known **half-life of C-14 (approximately 5,730 years)**, scientists can determine the **elapsed time since the organism's death**. This principle forms the basis of **radiocarbon dating**, a key method used in archaeology and related disciplines to estimate the age of once-living materials.



Visual 1: Founder of C 14 in 1949: W. Libby

2.2 Compositional Analysis

Material sourcing expands interpretations from local to regional networks:

- XRF and ICP-MS: Identify elemental composition of metals, ceramics, obsidian
- SEM-EDS: Reveals manufacturing technologies through microstructure
- Lead isotopes: Trace metal ore origins (Pollard & Heron, 2008)

2.3 Biomolecular Archaeometry

Residue studies detect:

- Oils, resins, fermented beverages
- Ancient dyes, adhesives
- Food preparation techniques

3. Geoarchaeology: Cultural Landscapes and Site Formation

According to its classical definition, geoarchaeology is a scientific discipline that applies the methods and perspectives of the Earth sciences to address archaeological research questions, relying largely on field-based investigations. In recent years, the use of mechanical coring devices powered by compressors has become widespread, allowing researchers to extract undisturbed sediment cores approximately 1 meter in length, providing more precise and reliable samples than those obtained through manual labor.

By means of these machines, semi-closed coring tubes with a diameter of 5–6 cm and a length of about 100 cm are used to obtain sediment samples from archaeological mounds. Following initial field descriptions, the collected cores are subjected to sedimentological and palaeontological analyses under controlled laboratory conditions.

Through such coring and subsurface sampling, it becomes possible to reconstruct the palaeoenvironmental conditions and natural depositional processes that have changed over time within the accumulation areas. These analyses provide essential data for understanding the interaction between human activity and environmental dynamics in archaeological contexts.

Geoarchaeology bridges geology and archaeology by:

- Reconstructing ancient environments
- Distinguishing cultural vs. natural processes
- Assessing site formation and preservation conditions

Tools include:

- Micromorphology: Human activity visible in thin section
- Sediment geochemistry: Organic residues, burning episodes
- Stratigraphic modeling: Human occupation sequences (Butzer, 1982)

Visual 2: Geoarchaeological drill from Tavşanlı Höyük, Kütahya (Fidan et al. 2021)

4. Bioarchaeology and Paleogenetics

Bioarchaeology analyzes human and faunal remains to reconstruct:

- Health and disease
- Subsistence and lifestyles
- Mobility and migration

Stable isotopes ($\delta^{13}C$, $\delta^{15}N$, $^{87}Sr/^{86}Sr$) provide:

- Diet profiles
- Childhood residence patterns
- Pastoralist vs. agricultural transitions (Larsen, 2015)

Paleogenetics—powered by high-throughput sequencing—revealed:

5. Geophysical Prospection and Remote Sensing

Physical measurement techniques are employed to detect subsurface structures, typically **prior to excavation**. These **non-invasive geophysical methods** allow researchers to identify and map buried archaeological features based on variations in the physical properties of the soil and underlying materials.

a. Magnetometry:

This method measures **changes in the magnetic properties** of the soil. It is particularly effective in detecting features such as **kilns, hearths, walls**, and other structures that have altered the magnetic field due to heating or construction processes.

b. Ground Penetrating Radar (GPR):

GPR transmits **radar waves into the ground** to record reflections from subsurface structures, providing detailed information about their **depth and shape**. This technique yields highly **high-resolution data** and is useful for identifying **mosaics, graves, foundations**, and similar architectural elements.

Visual 3: **Ground Penetrating Radar from Tavşanlı Höyük Kütahya (Fidan 2021)**

c. Electrical Resistivity:

This method measures the **resistance of subsurface materials to electrical current**. Variations in resistivity can indicate different types of buried features such as **water channels, ditches, or walls**. It is especially valuable for mapping contrasts in soil moisture and material composition.

Non-invasive geophysics enables mapping before any excavation:

Method	Best for	Output
GPR	Walls, floors, tombs	Vertical slices, depth profiles
Magnetometry	Kilns, metalworking areas	Plan-view anomaly maps
Electrical Resistivity (ERT)	Voids, ditches	Subsurface resistivity models

Table 1: Geophysical Prospection, methods and outputs

Remote sensing tools include:

- Drone photogrammetry → 3D terrain models
- LiDAR → Tree-covered archaeological landscapes uncovered
- Multispectral imaging → Cropmarks revealing buried structures
- Satellite imagery → Regional settlement networks

6. Digital Archaeology, GIS, and Data Science

GIS revolutionized spatial analysis by:

- Mapping artifact distributions
- Reconstructing ancient route networks
- Predicting settlement potentials (least-cost paths)

Today’s archaeoinformatics integrates:

- Machine learning for pattern detection

- 3D semantic databases for architectural reconstruction
- Virtual Heritage applications (VR/AR)
-

7. Linguistic Sciences (Philology, Epigraphy, Numismatics)

These disciplines investigate written sources, languages, inscriptions, and coinage.

Contributions:

- **Philology:** Interpretation and critical analysis of ancient texts.
- **Epigraphy:** Study and decipherment of inscriptions on stone, clay, metal, and other durable materials.
- **Numismatics:** Examination of ancient coins, providing insights into economic systems, political authority, and chronological frameworks.

8. Conclusion

Although archaeology long developed as a descriptive discipline grounded in typological classifications, it has today evolved into a more comprehensive scientific field capable of generating measurable, testable, and reproducible knowledge through the integrated use of natural sciences, engineering, and information technologies. This transformation not only enhances the understanding of cultural materials, but also enables the reconstruction of the complex relationships past human communities maintained with their environments.

Archaeometry provides objective insights into chronology, technology, provenance, and production processes, thereby allowing cultural chronologies to be established with greater confidence. High-resolution dating techniques and material-scientific analyses make it possible to scientifically demonstrate production traditions, trade networks, and intercommunity interactions.

Likewise, geoarchaeology demonstrates that cultural developments cannot be studied independently of environmental dynamics. By employing sedimentological, micromorphological, and stratigraphic modeling methods, geoarchaeology reconstructs

paleoenvironmental conditions while also defining the natural and cultural processes that influence the formation and preservation of archaeological sites.

Bioarchaeology and paleogenetics have brought unprecedented access to information concerning human origins, health, dietary strategies, and patterns of mobility. This allows for the interaction between biological, behavioral, and cultural evolution to be explored through robust empirical data rather than speculative reasoning.

Geophysics, remote sensing, and digital archaeology, in turn, have become essential tools for ethically informed research and cultural heritage stewardship. These non-invasive technologies make possible the identification of subsurface settlement organization, concealed architectural features, and large-scale cultural landscapes prior to excavation—an increasingly critical need in regions where heritage is rapidly threatened.

This multidisciplinary structure provides three key advantages for archaeology:

1. Data-driven interpretation: Analytical conclusions derive from measurable evidence rather than solely cultural assumptions.
2. Predictive modeling: Social, economic, and environmental processes can be mathematically examined and simulated.
3. Conservation-oriented scientific practice: Research is planned to ensure sustainable protection of cultural heritage resources.

Thus, contemporary archaeology is not merely tasked with documenting the past, but with scientifically explaining the dynamics that shaped human history.

Through the technological and analytical capabilities introduced by supporting sciences, archaeology has been transformed in both its interpretive strength and its social responsibility—ensuring that the knowledge embedded within the material remnants of human history is revealed in a more holistic, reliable, and impactful manner.

ABSTACT

Located 1.5 km south of the Tavşanlı district in Kütahya, Tavşanlı Höyük is among the largest archaeological settlements in Western Anatolia, covering approximately 45 hectares with a cultural deposit over 21 meters thick. Radiocarbon analyses indicate that the site was first inhabited around 8100 years ago. Excavations of Bronze Age layers have revealed significant artifacts demonstrating strong cultural and economic connections with both the Aegean and Central Anatolian worlds. Systematic excavations initiated in 2021 have uncovered remarkable finds such as the “Tavşanlı Seal” and a Mycenaean-style bronze dagger, evidencing direct or indirect interaction with Aegean cultures during the Late Bronze Age. These discoveries highlight Tavşanlı Höyük as a major local center of production, trade, and political organization within Inland Western Anatolia. This study synthesizes archaeological and geoarchaeological data from recent excavations and previous research to reassess the site’s strategic role in Bronze Age Anatolia. The findings suggest that Tavşanlı Höyük functioned not merely as a regional settlement but as a key node in a broader network of interregional exchange, linking the Aegean world and central Anatolian polities through commerce, technology, and shared symbolic traditions.

Keywords: Tavşanlı Höyük, Bronze Age, Aegean World, Inland Western Anatolia, cultural interaction, archaeology, seal, trade.

TAVŞANLI HÖYÜK: TUNÇ ÇAĞI'NDA İÇ BATI ANADOLU İLE EGE DÜNYASI ARASINDAKİ ETKİLEŞİMLER

ÖZET

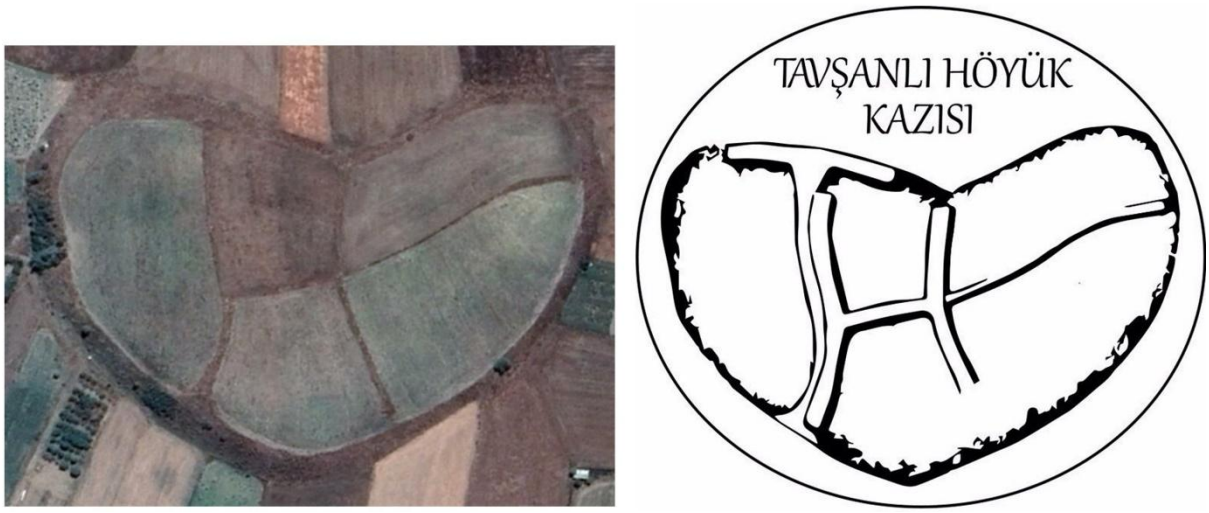
Kütahya il sınırları içinde, Tavşanlı ilçesinin 1,5 km güneyinde yer alan Tavşanlı Höyük, Batı Anadolu'nun en büyük arkeolojik yerleşmelerinden biridir. Yaklaşık 45 hektarlık alanı ve 21 metreyi aşan kültürel dolgusu ile höyük, günümüzden yaklaşık 8100 yıl önce kurulmuştur. Tunç Çağı'na ait tabakalarda elde edilen arkeolojik buluntular, bölgenin hem Ege hem de Orta Anadolu dünyasıyla güçlü kültürel ve ekonomik ilişkiler içinde olduğunu göstermektedir. 2021 yılından bu yana yürütülen sistematik kazılar, "Tavşanlı Mührü" ve Miken tipi tunç hançer gibi buluntularla yerleşmenin Hitit İmparatorluğu'nun son dönemlerinde Ege kültürleriyle etkileşimde bulunduğunu kanıtlamaktadır. Tavşanlı Höyük, bu yönüyle İç Batı Anadolu'da yerel üretim, ticaret ve politik organizasyonun merkezlerinden biri olmuştur. Bu çalışma, kazı sonuçları ve önceki araştırmalar ışığında, höyüğün Tunç Çağı Anadolu'sundaki stratejik rolünü değerlendirmekte ve Ege-Anadolu ilişkilerinde üstlendiği köprü işlevini tartışmaktadır. Bulgular, bölgenin yalnızca yerel bir yerleşim olmadığını, aynı zamanda geniş ölçekli bir ticaret ve kültürel etkileşim ağı içinde yer aldığını ortaya koymaktadır.

Anahtar Kelimeler: Anahtar Kelimeler: Tavşanlı Höyük, Tunç Çağı, Ege Dünyası, İç Batı Anadolu, kültürel etkileşim, arkeoloji, mühür, ticaret.

1. Introduction

The Bronze Age landscape of Anatolia represents one of the most dynamic and interconnected cultural zones of the ancient Near East. Situated in the heart of Western Anatolia, Tavşanlı Höyük provides a unique opportunity to explore interregional interactions between the Aegean and Central Anatolia during the 3rd and 2nd millennia BCE. Excavations led by Prof. Dr. Erkan Fidan since 2021 have revealed substantial architectural, ceramic, and metallurgical evidence reflecting the site's central role in regional exchange systems (Fidan, 2021; Fidan et al., 2021).

The present paper examines the archaeological significance of Tavşanlı Höyük as a large-scale settlement that bridged cultural and economic networks across Western Anatolia.



Visual 1: Heart of Kütahya

2. Archaeological Context and Research History

Tavşanlı Höyük is located approximately 1.5 km south of Tavşanlı town center in Kütahya province. Aerial imagery shows its distinctive heart-shaped topography, inspiring the epithet "The Heart of Kütahya." The settlement spans roughly 45 hectares—nearly thirty-seven times larger than Seyitömer Höyük—and features a cultural deposit rising over 21 meters (Fidan, 2021a). Radiocarbon analyses supported by TÜBİTAK laboratories indicate initial occupation around 6100 BCE, making it the oldest known settlement in Kütahya.

In 2021, authorized excavations began under the auspices of the Turkish Ministry of Culture and Tourism and the Tavşanlı Municipality. Since 2022, Tavşanlı Höyük has operated as a 12-month excavation project supported by the Turkish Historical Society and later included in the Ministry's "Heritage for the Future" program.

Visual 2: Arial view of Tavşanlı Höyük

3. Methodology and Research Framework

This study integrates field excavation results, surface survey data, and comparative analysis of material culture. Primary sources include the works of Fidan (2021), Fidan et al. (2021), and Baykara et al. (2025), which offer archaeometric, geophysical, and zooarchaeological perspectives. Artifacts such as the Tavşanlı Seal and bronze dagger were examined typologically and contextually, with emphasis on interregional parallels from Mycenaean Greece and Hittite Anatolia (Fidan, Seçer Fidan, & Fidan, 2024).

4. Results

4.1 Settlement Structure and Stratigraphy

Excavations have primarily focused on the uppermost Late Bronze Age layers, dated between ca. 1600–1200 BCE. These layers yielded storage pits and silos—indicative of centralized economic activities—and a distinctive seal (the “Tavşanlı Seal”) found at the base of one silo.

The stratigraphic record reveals successive occupation phases suggesting continuous habitation and localized administrative organization.

4.2 The Tavşanlı Seal

The seal represents one of the most remarkable finds from the site. It bears iconography combining Hittite motifs with a paddle-propelled ship known from Aegean contexts. Radiocarbon dating places it between 1400–1300 BCE, contemporaneous with the Late Hittite Imperial period. This synthesis of artistic traditions supports the hypothesis that Tavşanlı functioned as a regional hub mediating contacts between Anatolia's inland cultures and the maritime networks of the Aegean (Seçer Fidan & Fidan 2024).

Visual 3: The Tavşanlı Seal (Seçer Fidan & Fidan 2024)

4.3 The Bronze Dagger and Aegean Connections

Equally significant is the discovery of a bronze dagger featuring rivet placement characteristic of Mycenaean weaponry, along with a marble pommel cap closely comparable to specimens from Crete. These artifacts provide tangible evidence for Western Anatolia's participation in the Aegean exchange system, possibly involving metallurgical expertise and elite gift exchange (Fidan et al., 2024).

4.4 Subsistence Economy

Zooarchaeological analysis indicates a diversified subsistence economy based on cattle, sheep, goats, and pig husbandry, complemented by hunting and cereal cultivation. Stable isotope data and faunal remains suggest a degree of specialization and possible surplus production aimed at regional trade (Baykara, Agras, & Fidan, 2025).

5. Discussion

The evidence from Tavşanlı Höyük challenges conventional models that view inland Western Anatolia as a peripheral or isolated region during the Bronze Age. Instead, the site's material assemblage and monumental scale imply its participation in long-distance exchange networks. The seal imagery and weapon typologies suggest cultural syncretism, while economic indicators reflect surplus-driven production supporting broader trade relations.

Interdisciplinary studies (Fidan, 2021; Fidan et al., 2021; Baykara et al., 2025) collectively reinforce the interpretation of Tavşanlı Höyük as a regional capital or market center linking the Hittite inland polities with Aegean maritime states. This role may have been sustained through metallurgical production, agricultural exchange, and administrative oversight evident in sealing practices.

6. Conclusion

Tavşanlı Höyük stands as a pivotal site illuminating the sociopolitical and economic landscape of Bronze Age Anatolia. The convergence of Aegean and Anatolian material traits within a

single context underscores the multidirectional nature of cultural transmission in the Late Bronze Age. As ongoing excavations expand, Tavşanlı Höyük promises to reshape our understanding of Western Anatolia's role in the prehistoric Mediterranean world — not as a frontier, but as an active crossroads of innovation, commerce, and power.

TÜRKİYE YÜZYILI MAARİF MODELİ ÖĞRETİM PROGRAMLARINDA HATA KÜLTÜRÜNÜN ÖRTÜK YANSIMALARI: BİR DOKÜMAN ANALİZİ

THE IMPLICIT REFLECTIONS OF CULTURE OF ERROR IN THE CURRICULA OF THE CENTURY OF TÜRKİYE EDUCATION MODEL: A DOCUMENT ANALYSIS

Prof.Dr. Sevda KOÇ AKRAN
Siirt Üniversitesi/Eğitim Fakültesi,
sevdakc@siirt.edu.tr- ORCID: https://orcid.org/https://0000-0003-4205-0148

Özet

Eğitimde hata kültürü, yeni öğrenenlere olanak tanıyan ve öğrenciye hatanın bir başarısızlık göstergesi olmadığını açıklayan bir süreçtir. Bu süreçte hatanın öğrenme için önemli bir adım olduğu bilinmekte ve hatanın öğretim ortamında kaçınılmaz bir yol olduğunu göstermektir. Hata kültürüne bu bakış açısı, özellikle öğrenci merkezli öğretim programlarının öncelikli konuları arasında yer almaktadır. Buradan hareketle araştırmanın temel amacı, Türkiye Yüzyılı Maarif Modeli Öğretim Programlarında hata kültürünün örtük yansımalarını doküman analizi açısından incelemektir. Araştırmada iç içe geçmiş çoklu durum deseni kullanılmıştır. Araştırmanın kapsamına öğretim programları alınmış, programlardan hata kültürüne ilişkin kavramsal kelimeler ve açıklamalar belirlenmiştir. Bu kavramların belirlenmesinde nitel analiz programı kullanılmış ve veriler içerik analizine tabi tutulmuştur. Araştırma sonucunda Öğretim Programlarında hata kültürüne yönelik örtük ifadelerin yer aldığı görülmüştür.

Anahtar Kelimeler: Türkiye Yüzyılı Maarif Modeli, Program, Öğretim Programı, Program Dışı Etkinlikler.

Abstract

The culture of error in education is a process that empowers new learners and explains to the student that error is not an indicator of failure. In this process, it is understood that error is an important step in learning, and it is shown that error is an inevitable path in the teaching environment. This perspective on the culture of error is among the priority issues of student-centered curricula. Based on this, the main objective of this research is to examine the implicit reflections of the culture of error in the Century of Türkiye Education Model Curriculum from the perspective of document analysis. An embedded multiple-case design was used in the study. The scope of the research included curricula, and conceptual terms and explanations related to the culture of error were identified from these curricula. A qualitative analysis program was used to identify these concepts, and the data were subjected to content analysis. As a result of the research, it was observed that implicit expressions regarding the culture of error are present in the curricula.

Keywords: The Century of Türkiye Education Model, Program, Curriculum, Extracurricular Activities.

GİRİŞ

Eğitim, yaşam boyu öğrenme sürecinde formal ve informal boyutlarıyla toplumun ortak hedeflerini gerçekleştirmeye yönelik planlı ve sistemli bir yapıdır. Tarihsel süreç içinde bu yapıya birçok faktör etki etmiştir. Bu etkilerden biri kültürdür. Çünkü kültür ve eğitim birbirini tamamlayan önemli iki kavramdır. Karşılıklı etkileşim sonucunda kültürel yapı çeşitlenmiş topluma, bireye ve eğitimin formal anlamda uygulandığı okula yansımaları olmuştur. Okul çatısı altında kültürel çeşitlilik bireylerin bilişsel, sosyal ve ahlaki gelişimini temel alarak sadece akademik başarılarını değil, toplumsal sorumluluk bilincini de geliştirmeyi amaçlamıştır. Başka bir deyişle eğitimin içerisine entegre edilen kültür, bireyin kendini gerçekleştirmesinin yanı sıra, yaşadığı topluma üretken, amaca odaklı, problem çözen, deneme-yanılma yoluyla öğrenmelerini pekiştiren bir birey profilini ortaya çıkarmaktadır. Ortaya çıkan öğrenci profilinde birey, maddi ve manevi değerlere sahip çıkmakta, gelenek-göreneklerini davranışa dönüştürmekte ve birlik duygusuyla yaşadığı topluma uyum sağlamaktadır. Birey uyum sürecinde bulunurken her zaman doğruya, güzele, başarıya odaklanmayabilmektedir. Bu bakış açısının temelinde bireyin hata yapma korkusu, kaygısı ve hata yaptıktan sonra çevresinin ona yaklaşımı bulunmaktadır (Uçkun, Demirer, Yazıcı ve Kâhya 2024). Oysaki insan genel yapısı gereği hata yapmakta ve bu hatalardan ders çıkarmaya çalışmaktadır. Çıkarılan her dersin temelinde düşünce, davranış ve eylemler olmaktadır. Bu bağlamda hata, ulaşılmak istenen amaçlardan uzaklaşma davranışı olarak tanımlanmaktadır (Tiryakioglu Kurum, 2022). Önemli olan bireyin böyle hatalardan bir sonuç çıkarması ve hatayı doğru bir şekilde yönetmesidir. Hataların farkına varılması ve buna yönelik önlemlerin alınması bireyin gelecek hedeflerine daha kolay ulaşmasını sağlamaktadır (Kara ve Bozkurt, 2025).

Bireyin amaçlarına ulaşmasında birtakım eğitim değişkenleri sürece dahil edilmektedir. Bu süreçlerin başında öğretim programları gelmektedir. Öğretim programlarıyla öğrencilerin üst düzey becerilere sahip olması beklenmekte, öğrenme-öğretme süreçlerinde farklı yöntem-teknik-uygulamalarla öğrencinin aktif katılımı desteklenmekte, süreç ve sonuç değerlendirmelerle öğrenci bir bütün olarak analiz edilmektedir. Yapılan analizlerde öğrenciye geribildirimler sağlanarak öğrenmesi desteklenmektedir. Öğretim programlarının öğrenci merkezli bir anlayışı benimsemesinin altında yatan nedenlerden biri öğrencinin ilgi ve isteklerini belirlemek, onu öğrenme konusunda motive etmek, öğretmen rehberliğinde bilgiyi yapılandırmasına yardımcı olmaktır. 2005 yılından bu yana benimsenen bu anlayış 2024 yılındaki Türkiye Yüzyılı Maarif Modelinde (TYMM) devam etmiştir.

2024 yılında eğitim ve öğretim programlarına farklı bir anlayış getiren TYMM, öğretim programlarını, programların uygulandığı çevreyi, öğretmen-öğrenci profillerini, öğretim materyallerini belirli çerçevede toplayan bütüncül bir projedir (Akpınar ve Köksalan, 2024). Özellikle TYMM Öğretim Programları beceri temelli uygulamalarla öğrencinin teorik ve ezbere dayalı bilgisi arasında bir denge görevi üstlenmektedir (Akpınar, Özer, Oral ve Köksalan, 2024). Değerler, kültür, okuryazarlık, sosyal-duygusal beceriler, programlar arası ilişki bu dengenin kurulmasında önemli bir işlevi bulunmaktadır. Bilgiye ulaşma ve bilgiyi üretme konusunda yenilikçi bir perspektifle TYMM, bilinçli, olaylara duyarlı ve farkındalığı

yüksek bireyler yetiştirmektedir (Arslankara ve Arslankara, 2024). Bireylerin yetiştirilmesi süreci olumlu olduğu kadar olumsuz öğrenme çıktılarını beraberinde getirmektedir. Bu olumsuz durumlar bireyin hata yapmasına neden olmaktadır. Yani dışardan gelen uyarıcılar bireyin hata yapmasını ve birbirini takip eden hata döngüsünü pekiştirmektedir. Olumsuz bir bakış açısıymış gibi görünse de aslında bir öğrenci hata yapmaktan korkmamalıdır. Başka bir deyişle hatanın benimsendiği kültür anlayışında bireyler esnek bir öğrenme ortamında risk almakta, problem çözmektedir. Aksi yapıldığında hata yapmaktan korkan birey ceza almamak için bir çaba içine girmektedir. Sonuçların beklenenin dışında gerçekleşmesi bireyin öz güven, öz düzenleme ve öğrenme sorumluluğunu düşürmektedir. Öğrenci hata yapmamak için pasif kalmayı tercih ederek, derse kapalı katılım sergilemektedir. Bu sebeple başta öğretim programları ve içerikleri, öğrenme-öğretme süreçleri, ölçme ve değerlendirme boyutları öğrencinin hata yapabileceği gerçeğini göz önünde tutmalıdır. Hatanın bir başarısızlık algısı olmadığını öğrenciye kavratmalıdır. Yani öğretmen öğrenciye dönütlerle, süreç değerlendirmelerle, deneme-yanılma yoluyla hatalara cevap arayacağını göz önünde bulundurmalıdır.

Araştırmanın Amacı

Türkiye Yüzyılı Maarif Modeli Öğretim Programlarında hata kültürünün örtük yansımalarını doküman analizi açısından incelendiği araştırmada aşağıdaki alt problemlere yanıt aranmıştır:

- ☑ Öğretim Programlarının öğrenme-öğretme uygulamalarına hata kültürünün yansımaları nasıldır?
- ☑ Öğretim Programlarının ölçme ve değerlendirme süreçlerine hata kültürünün yansımaları nasıldır?

YÖNTEM

Araştırmada durum deseni kullanılmıştır. Durum çalışması (case study), daha çok nitel çalışmalarda kullanılmakta, belirli bir olayı ve durumu derinlemesine analiz etmektedir. Durumun ve olayın farklı yönlerinin keşfedilmesini sağlamakta ve çeşitli veri kaynaklarından (gözlem, görüşme, anket, doküman incelemesi vs.) yararlanılmaktadır. Yararlanılan kaynaklarla araştırmacı çözüm arayışı içine girmektedir (Merriam ve Tisdell, 2016). Çözümler üretilirken durum deseninde çeşitli türlerden yararlanılmaktadır. Durum deseni türleri seçilirken araştırmacı araştırma probleminin amacını, örneklemini, analizini dikkate almaktadır. Bu araştırmada da iç içe geçmiş çoklu durum deseni kullanılmıştır. Araştırmada durum Türkiye Yüzyılı Maarif Modeli, birimler Öğretim Programıdır.

Araştırma kapsamına alınan programlar doküman olarak belirlenmiştir. Doküman analizinin yapılırken araştırmada belirli aşamalar dikkate alınmıştır.

Görsel 1. Araştırmanın Doküman Analiz Aşamaları*

*Yapay zeka programı kullanılarak araştırmacı tarafından Görsel 1 oluşturulmuştur.

Araştırma kapsamına 5.sınıf Öğretim Programı alınmıştır. Programda; Matematik, Türkçe, İngilizce, Sosyal Bilimler, Fen Bilimleri, Din Kültürü ve Ahlak Bilgisi, Görsel Sanatlar, Beden Eğitimi ve Spor, Bilişim Teknolojileri ve Yazılım, Müzik Dersleri incelenmiştir. Ölçüt örneklemin kullanıldığı araştırmada ölçüt olarak; 5.sınıf Öğretim Programları ve Programların zorunlu dersleri şeklinde belirlenmiş ve buradan veriler elde edilmeye çalışılmıştır.

Araştırmada veriler MAXQDA programı ile analiz edilmiştir. Analizler yapılırken Çizelge 1'deki aşamalar dikkate alınmıştır.

Çizelge 1. Araştırmanın Veri Analiz Aşamaları

Aşama	İşlem Basamakları	MAXQDA Araçları / Fonksiyonları
1. Hazırlık ve Veri Aktarımı	Öğretim programı dokümanlarının (PDF/Word) sisteme yüklenmesi ve belge gruplarının oluşturulması.	Belge Sistemi, Belge Grupları (Derslere/öğretim programlarına göre gruplandırılması)
2. Veri Tanıma ve Ön Tarama	Metinlerin okunması, hata kültürüne dair anahtar kavramların (yanlış, deneyim, dönüt, risk alma vb.) taranması.	Kelime Bulutu, Sözcük Gezgini, Metin Arama (Lexical Search)
3. Birinci Düzey Kodlama (Açık Kodlama)	Hata kültürüyle ilgili örtük anlamlar içeren birimlerin anlamlı kodlara dönüştürülmesi.	Yaratıcı kodlamanın yapılması
4. İkinci Düzey Kodlama (Eksenel Kodlama)	Kodların benzerliklerine göre gruplandırılması ve hiyerarşik bir yapıya kavuşturulması.	Kod-Teori modelinin kullanılması
5. Temalaştırma ve İlişkilendirme	İçerik analizinde kullanılan tümdengelim ve tümevarımsal yaklaşımın tercih edilmesi	Kod-Teori modelinde temaların gösterilmesi
6. Görselleştirme ve Raporlama	Kodların frekans dağılımlarının gösterilmesi	MAXQDA programında oluşturulan şekillerden alıntıların yapılması

Çizelge 1'de görüldüğü üzere araştırmada içerik analiz tekniği kullanılmıştır. Analizler yapılırken Öğretim Programlarındaki hata kültürü ifadelerini yansıtan kelime ve açıklamalara dikkat edilmiş ve buna yönelik kodlamalar yapılmıştır. Kodlamalar Word ortamına aktarılarak MAXQDA programında analiz edilmiş ve temalara oluşturulmuştur. Temalar oluşturulurken tümdengelim ve tümevarımsal yaklaşımın tercih edilmiştir. Daha sonra temalar, kodlar arasındaki ilişki Kod-Teori Modelinde gösterilmiş ve buradan elde edilen görseller bulgular bölümüne aktarılmıştır.

Araştırmada analizler yapılırken çeşitli güvenirlik ve geçerlik işlemleri yapılmıştır (Bakınız: Görsel 2).

Görsel 2. Araştırmanın Güvenirlik ve Geçerlik Aşamaları*

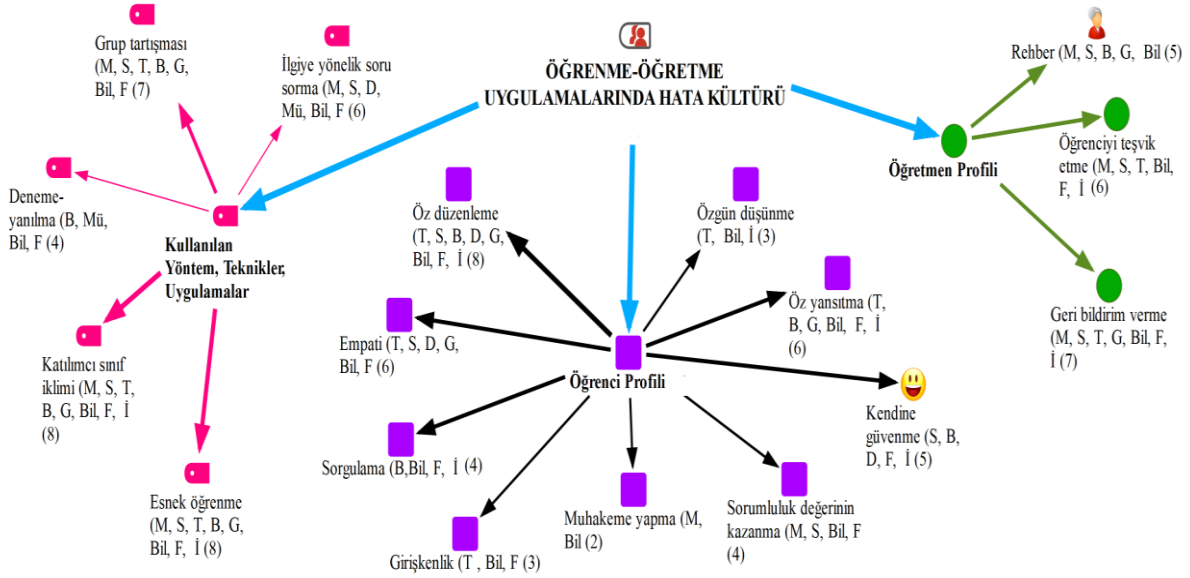
*Yapay zeka programı kullanılarak araştırmacı tarafından Görsel 2 oluşturulmuştur.

Araştırmada Öğretim Programlarından doğrudan alıntılar yapılırken her dersin yer aldığı öğretim programının baş harfi kullanılarak alıntılama yapılmıştır. Örneğin Matematik "M", Türkçe " T", İngilizce "İ", Sosyal Bilimler "S", Fen Bilimleri "F", Din Kültürü ve Ahlak Bilgisi "D", , Görsel Sanatlar "G", Beden Eğitimi ve Spor dersleri "B", Bilişim Teknolojileri ve Yazılım "Bi", Müzik Mü…..şeklinde gösterilmiştir.

3. BULGULAR

Öğretim Programlarının Öğrenme-Öğretme Uygulamalarına Hata Kültürünün Yansımaları

Araştırmada Öğretim Programlarının öğrenme-öğretme uygulamalarına hata kültürünün örtük yansımalarına ilişkin bulgular Görsel 3'de yer almaktadır.



Görsel 3. Öğretim Programlarının öğrenme-öğretme uygulamalarına hata kültürünün örtük yansımaları-Kod Teori Modeli

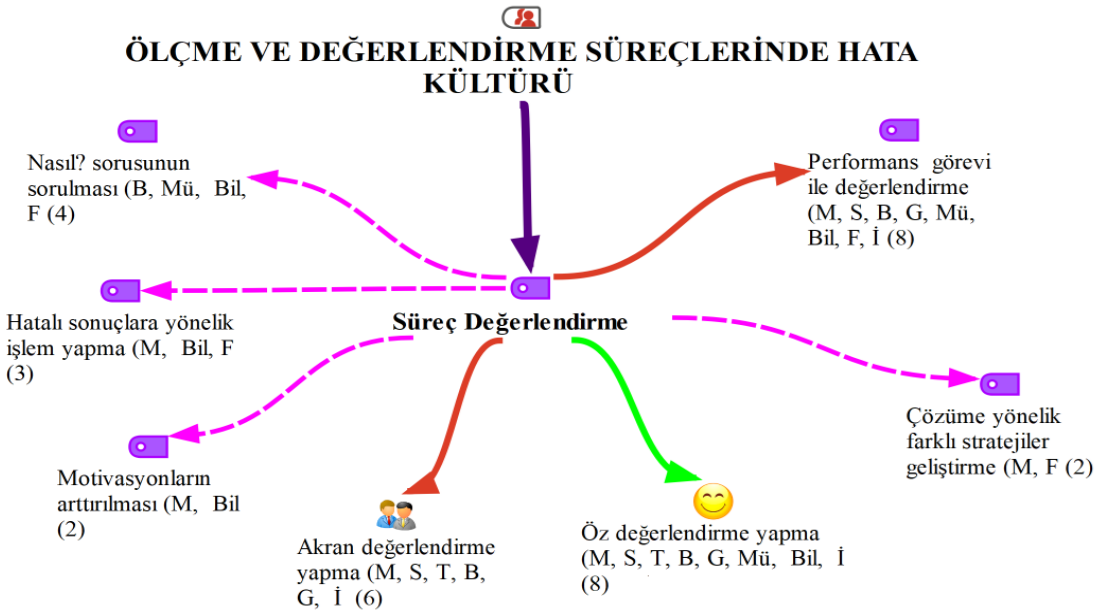
Görsel 3'de görüldüğü üzere, Öğretim Programlarının öğrenme-öğretme uygulamalarında hata kültürünün örtük yansımalarına ilişkin bulgularında bir tema üç alt temaya ulaşılmıştır. İlk alt tema kullanılan yöntem, teknikler ve uygulamalardır. Bu alt temada en çok vurgulanan kod katılımcı sınıf iklimi (f=8) ve esnek öğrenme (f=8)'dir. İkinci alt tema öğrenci profili, üçüncüsü öğretmen profilidir. Öğrenci alt temasında en çok öz düzenleme (f=8); öğretmen profili alt temasında ise geri bildirim verme (f=7) koduna daha fazla dikkat çekilmiştir. Bu kodlara ilişkin doğrudan alıntılardan birkaçı aşağıda yer almaktadır.

M: *Problem çözümlerinin ardından öğrenciler çözüm yollarını kontrol etmeleri için teşvik edilir. Grup üyelerinin problem çözümlerindeki işlemlere yönelik tahmin ve stratejilerini gözden geçirmeleri, kısa yollara ilişkin çıkarımlar ve değerlendirmeler yapmaları beklenir* (MEB, 2024:24).
S:*.... grup üyeleri tarafından alternatif çözümler geliştirilir (MEB, 2024:39).*
T: *Öğrencilerin düşüncelerini açık fikirlilikle paylaşmalarını sağlayacak (E3.5) etkinlikler düzenlenir (MEB, 2024:90).*
B: *Gruptaki arkadaşlarınıza nasıl yardımcı oldunuz?", "Bu oyunda önemli olan neydi?" gibi sorular sorularak iş birliği, iletişim, dayanışma ve grup dinamiği kavramlarına ilişkin farkındalık kazandırılır (MEB, 2025:22).*

G: *Grup çalışmaları sırasında çalışma kâğıtları aracılığıyla her öğrencinin kendi fikirlerini paylaşmaları, iki dönem arasındaki biçimsel benzerlik ve farklılıkları belirleyip ortak bir liste oluşturmaları istenir (MEB, 2025:117).*
Bi: *Öğrenciler, grup çalışması becerilerini ortaya koymaları açısından küçük gruplara ayrılır. Her gruba yapay zekâ ile ilgili bir görsel veya senaryo verilerek yapay zekâ hakkında "Neden?", "Nasıl?" ve "Ne zaman?" ile başlayan sorular sormaları İstenir (MEB, 2025:21).*
F: *Verilen performans görevleri çerçevesinde öğrenciler gruplara ayrılır ve öğrencilerden ifadelerinde özgür seçimler yaparak grup içinde yardımlaşmaları istenir (MEB, 2024:88).*
D: *Konuya başlamadan öğrencilerin önceki bilgileriyle ilişki kurmaları ve öğrenme stratejisi geliştirmeleri (SDB1.1) amacıyla çevrelerindeki düzen hakkında merak ettikleri soruları sormaları…(MEB, 2024:41).*
İ: *Then the students read the written version of the digital story again silently, (or the reading text in the reading section), to check whether they know any of the target vocabulary items about the theme (MEB, 2025:423).*
S: *Bu fikirler ile ilgili öğretmen ve öğrenci dönütleri alınır. Geri bildirimler doğrultusunda son şekli verilen ürün fikirleri, performans görevi kapsamında estetik unsurlarla zenginleştirilmiş ürünlere (kısa film, kamu spotu, afiş, karikatür, hikâye, şiir, şarkı veya kullanım kılavuzu) dönüştürülür (MEB, 2024:62).*
F: *Karşılaştırma sonucunda tespit edilen hata ve eksiklikleri gelişim fırsatı olarak değerlendirerek modellerini geliştirmeleri teşvik edilir (MEB, 2024:89).*
İ: *Controlled writing of words and sentences turns to short paragraphs in a process writing manner with the support of the teacher's feedback in the theme (MEB, 2025:425).*

Öğretim Programlarının Ölçme ve Değerlendirme Süreçlerine Hata Kültürünün Yansımaları

Araştırmada Öğretim Programlarının ölçme ve değerlendirme süreçlerine hata kültürünün örtük yansımalarına ilişkin bulgular Görsel 4'de yer almaktadır



Görsel 4. Öğretim Programlarının ölçme ve değerlendirme süreçlerine ilişkin hata kültürünün örtük yansımaları-Kod Teori Modeli

Görsel 4'de görüldüğü üzere, Öğretim Programlarının ölçme ve değerlendirme süreçlerinde hata kültürünün örtük yansımalarına ilişkin bulgularında bir tema bir alt temaya ulaşılmıştır. Süreç alt temasında öz değerlendirme yapma (f=8), performans görevi ile değerlendirme (f=8) ve akran değerlendirme yapma (f=6) kodlarına daha fazla vurgu yapılmıştır. Bu kodlara ilişkin doğrudan alıntılardan birkaçı aşağıda yer almaktadır.

M: *Öğrenme-öğretme uygulamalarında yapılan grup çalışmalarında, öğrenciler tarafından öz değerlendirme ve akran değerlendirme formları…… (MEB, 2024:21)….. görevi ve poster kullanılarak değerlendirilebilir (MEB, 2024:33).*
S: *…….öz değerlendirme formu (MEB, 2024:57)….. performans görevi kullanılarak değerlendirilebilir (MEB, 2024:47).*
T:*…. ilişkilendirme, öz değerlendirme görevleri kullanılır (MEB, 2024:89).*
B:*… öz değerlendirme formu ile değerlendirilebilir. Öğrencilere günlük hayatta yaptıkları … fiziksel hareketsizliğin olumsuz etkilerini önlemek için bireylerin ve toplumun neler yapabileceğini içeren afişler, ….hazırlamaları ile ilgili performans görevi verilebilir. Bu performans görevi süreç bileşenlerini içine alan ölçütlerden oluşan ……ile değerlendirilebilir (MEB, 2025:15).*
G: *…..öz değerlendirme formları ve grup değerlendirme formları kullanılarak değerlendirilebilir. Sınıf içi performans görevi olarak öğrencilerden doğa temalı edebî metinlerinden yola çıkarak çevre duyarlılığını yansıtan resimlemeler oluşturmaları istenir (MEB, 2025:112).*
Mü: *…öz değerlendirme formu kullanılarak değerlendirilebilir. İstiklâl Marşı'nı ezgisine dikkat ederek söyleyebilmelerine, müzik yazısını çözümleyebilmelerine yönelik performans görevi verilebilir. (MEB, 2025:59).*
Bil: *….öz değerlendirme ile kendi başarılarını puanlayabilir ve akran değerlendirme ile sınıf arkadaşlarının çalışmalarını değerlendirerek yapıcı geri bildirim sağlayabilirler (MEB, 2025:30)…. hazırlamaları performans görevi olarak istenebilir (MEB, 2025:41).*
F: …çalışma kâğıtları ve performans görevi kullanılabilir (MEB, 2024:97).
İ: Students will create a project titled "Classroom Life and Learning: Tradition Meets Innovation" exploring different aspects of learning activities, styles, and educational approaches. First, students will compare various ..... The assignment will be evaluated by using a rubric scheme, a rating scale, and/or a marking scheme. (MEB, 2025:446).

4. SONUÇLAR VE GENEL DEĞERLENDİRME

5.sınıf öğretim programlarına genel olarak bakıldığında örtük bir şekilde hata kültüründen bahsedildiği görülmektedir. Hata kültürünün örtük yansımaları araştırmada öğrenme-öğretme uygulamaları ile ölçme ve değerlendirme boyutları şeklinde ele alınmıştır. Öğrenme-öğretme uygulamaları boyutunda programların katılımcı sınıf iklimi oluşturarak esnek bir öğrenme ortamını öğrenciye sunduğu görülmektedir. Bu programlar arasında daha çok Matematik, Türkçe, İngilizce, Sosyal Bilimler, Fen Bilimleri, Görsel Sanatlar, Beden Eğitimi ve Spor, Bilişim Teknolojileri ve Yazılım Dersleri yer almaktadır.

Araştırmada öğrenci ve öğretmen profilleri alt temalarında sırasıyla öz düzenleme ve geri bildirim verme noktalarına dikkat çekilmiştir. Dikkat çekilen noktalara vurgu yapan ortak programlar Türkçe, Sosyal, Görsel Sanatlar, Fen Bilimleri ve İngilizce dersidir. Hata kültürünün ana çerçevesine bakıldığında öğrencinin hata yapmaktan çekinmemesi beklenmektedir. Öğrenci yanlışlarını açıklar ve savunur, hatalarını düzeltmeye isteklidir,

sürekli soru sormaktadır, deneme-yanılmayla doğruya ulaşmaya çalışır, öğrenme-öğretme uygulamalarda sorumluluk almaktadır. Bütün bu yönleriyle ele alındığında programlarda örtük olarak hata kültüründen bahsedilmektedir. Buna karşın Türkçe Dersi Öğretiminde "İfadelerinde gereksiz kelime kullanmaktan kaçınmaya dikkat etmeleri konusunda uyarılır. (MEB, 2024:106)" şeklindeki ifadeler hata kültürü ile uyumlu olan açıklamalar değildir. Çünkü açıklamada uyarı niteliğindedir, öğrencinin öz değerlendirme yapmasını ve akıl yürütüme yollarını kullanmasını engellemektedir. Bu cümlenin hata kültürü olabilmesi için "farkındalık" içermelidir, öğrencinin öğrenme ortamında aktif katılımını sağlamalıdır. Öğretmen böyle bir anlayışta rehber olmalıdır. Nitekim hata kültüründe öğretmen hataları cezalandırmayan kişidir. "Nerede yanlış yaptın?" yerine "Nasıl düşündün?" sorusunu sorarak öğrenciye geri bildirim vermelidir.

Matematik Öğretim Programında öz ve akran değerlendirmeye, Türkçe Öğretim Programında öz değerlendirmeye, Beden Eğitimi ve Spor öz ve performans değerlendirmeye, Fen Bilimleri Öğretim Programında performansa dayalı değerlendirmeye, Bilişim Teknolojileri ve Yazılım ile Görsel Sanatlar Öğretim Programlarında öz, akran ve performansa dayalı değerlendirmeye dikkat çekilmiştir. Müzik ve Sosyal Bilgiler Öğretim Programında akran değerlendirmeye yönelik açık bir vurgunun yapılmadığı buna karşın öz değerlendirme ve performansa yönelik değerlendirmelerin programda yer aldığı sonucuna ulaşılmıştır. İngilizce Öğretim Programına genel olarak bakıldığında öz ve akran değerlendirmeden çok performansa dayalı ölçme sürecinin daha fazla ön planda tutulduğu görülmektedir. Bu değerlendirme ölçütünde ise esneklik ilkesi dikkate alınmamıştır. Aynı zamanda hata kültüründe geri bildirimlerin puanlayıcı değil geliştirici olması gerekmektedir. İngilizce programında ise puanlayıcı merkezli bir anlayış benimsenmiştir.

Bütün bu açıklamalardan yola çıkılarak öğretmen, öğrenci görüşlerine yönelik karma, nitel, nicel çalışmalar yapılabilir.

EĞİTİM YÖNETİMİ VE YAPISAL EŞİTSİZLİK PERSPEKTİFİNDEN TÜRKİYE'DE EĞİTİMDE VE İSTİHDAMDA OLMAYAN GENÇLER (NEETs)

Dr. Kübra YENEL
Manisa Celal Bayar Üniversitesi
kubra.yenel@cbu.edu.tr - 0000-0002-4237-9763

ÖZET

Bu kavramsal çalışma, Türkiye'de eğitimde ve istihdamda olmayan gençler (NEET) olgusunu eğitim yönetimi ve yapısal eşitsizlik perspektifinden incelemektedir. NEET kategorisi, genellikle 15–29 yaş aralığında yer alan ve ne örgün eğitime ne de iş gücü piyasasına kayıtlı olan ya da herhangi bir eğitim veya mesleki eğitim programına katılmayan gençleri ifade etmektedir. OECD'nin en güncel raporundan elde edilen veriler, Türkiye'de 15–29 yaş grubundaki gençlerin yaklaşık %26,4'ünün NEET statüsünde olduğunu ve bu oranın OECD ülkeleri arasında en yüksek düzeyde yer aldığını göstermektedir. Türkiye'nin yüksek NEET oranı hem eğitim sistemi içinde hem de eğitim ile iş gücü piyasası arasındaki bağlantılarda bulunan yapısal sorunları yansıtmaktadır. Türkiye bağlamında NEET statüsündeki yapısal eşitsizlikler, en belirgin biçimde toplumsal cinsiyete dayalı farklılıklar ve belirgin bölgesel eşitsizlikler üzerinden ortaya çıkmaktadır. NEET nüfusunun yaklaşık üçte ikisi kadınlardan oluşmakta; kadınların NEET oranları, tüm eğitim düzeylerinde erkeklerden sürekli olarak daha yüksek seyretmektedir. Bu örüntüler, erken okul terkinin, toplumsal cinsiyet eşitsizliklerinin ve bölgesel farklılıkların gençlerin eğitimsel ve ekonomik fırsatlardan uzaklaşmasına etkisinin olduğunu göstermektedir. Eğitim yönetimi perspektifinden bakıldığında, okul yöneticileri erken okul terkinin önlenmesi, öğrenci katılımının artırılması ve aileler, yerel işverenler ve diğer paydaşlarla iş birliğine dayalı ağların geliştirilmesi süreçlerinde önemli aktörlerdir. Önleyici okul liderliği, örgütsel kapasite geliştirme ve mesleki rehberlik hizmetlerinin koordinasyonu gibi liderlik uygulamaları, buna yatkın gençler arasında NEET statüsüne geçişin azaltılmasına katkı sağlayabilir. NEET sorunlarının eğitim liderliği çerçeveleri içine kavramsal olarak entegre edilmesi, gençlerin eğitim ve çalışma yaşamına sürdürülebilir katılımını güçlendiren kurumsal, sosyo-ekonomik ve politika temelli boyutları görünür kılmaktadır. Bu çalışma, Türkiye'de NEET oranlarının ele alınmasında eğitim yöneticilerinin rolüne odaklanan gelecekteki ampirik araştırmalar için temel bir kavramsal zemin sunmaktadır.

Anahtar Kelimeler: NEET, eğitim yönetimi, okul liderliği, yapısal eşitsizlik.

NEETS IN TÜRKİYE FROM THE PERSPECTIVE OF EDUCATIONAL ADMINISTRATION AND STRUCTURAL INEQUALITY

Dr. Kübra YENEL
Manisa Celal Bayar University
kubra.yenel@cbu.edu.tr - 0000-0002-4237-9763

ABSTRACT

This conceptual study examines the phenomenon of youth who are Not in Education, Employment, or Training (NEET) in Türkiye through the lens of educational administration and structural inequality. The NEET category typically refers to young people aged 15–29 who are neither enrolled in formal education nor participating in the labor market or training programs. Recent data from the latest OECD report indicate that approximately 26.4% of 15–29-year-olds in Türkiye are NEETs, a proportion significantly the highest within the OECD countries. Türkiye's elevated NEET rate reflects structural challenges within both the education system and labor market linkages. In Türkiye, structural inequality in NEET status is manifested most prominently through gender-based disparities and pronounced regional differences. Nearly two-thirds of the NEET population consists of women, with female NEET rates consistently higher than those of men across all educational attainment levels. These patterns suggest that educational disengagement, gender inequalities, and regional disparities contribute to the detachment of youth from educational and economic opportunities. From an educational administration perspective, school leaders are important actors in preventing early school leaving, improving student engagement, and fostering collaborative networks with families, local employers, and other stakeholders. Leadership practices such as preventive school leadership, organizational capacity building, and coordination of vocational guidance services could help mitigate the transition to NEET status among vulnerable youth. Conceptually integrating NEET issues into educational leadership frameworks highlights the institutional, socio-economic, and policy-related dimensions that reinforce young people's sustained participation in education and work. This study offers a foundational conceptual basis for future empirical research on the role of educational administrators in addressing NEET rates in Türkiye.

Keywords: NEETs, educational administration, school leadership, structural inequality.

1. GİRİŞ

Eğitimde ve İstihdamda Olmayan Gençler (Not in Education, Employment, or Training) (NEET), son yıllarda hem eğitim politikaları hem de iş gücü piyasaları açısından giderek daha fazla önem kazanan bir toplumsal olgu olarak öne çıkmaktadır (OECD, 2023a). NEET kavramı, gençlerin eğitim sistemi ile iş gücü piyasası arasında kurmaları beklenen geçişin kesintiye uğradığı bir durumu ifade etmekte ve bu yönüyle yalnızca bireysel tercihlerle değil, yapısal koşullar ve kurumsal düzenlemelerle de yakından ilişkilendirilmektedir (Eurofound, 2016; OECD, 2022). NEET olgusunun yalnızca bireysel değil, aynı zamanda kamu harcamaları, üretkenlik kayıpları ve sosyal uyum açısından önemli toplumsal maliyetler doğurduğu; bu nedenle politika yapıcılar açısından yapısal ve önleyici müdahaleler gerektiren bir alan olduğu vurgulanmaktadır (Eurofound, 2012).

Genç işsizliği ve NEET statüsünün uzun süreli hâle gelmesinin, gençlerin gelecekteki istihdam edilebilirliğini, gelir düzeylerini ve toplumsal bütünleşmelerini olumsuz etkileyen kalıcı sonuçlar doğurduğu uluslararası raporlarda vurgulanmaktadır (ILO, 2020). Gençlerin eğitimden istihdama geçiş süreçlerinde yaşanan bu kopuşun, uzun vadede işsizlik, düşük gelir, sosyal dışlanma ve refah kayıplarıyla ilişkili olduğu çok sayıda çalışma tarafından ortaya konmuştur (Bäckman & Nilsson, 2016; Furlong, 2006).

OECD tarafından geliştirilen NEET göstergesi, gençlerin eğitimden istihdama geçiş süreçlerinin etkinliğini değerlendirmede temel politika araçlarından biri olarak kabul edilmektedir (OECD, 2023a). Bu gösterge, eğitim sistemlerinin kapsayıcılığı, okuldan erken ayrılma oranları, mesleki yönlendirme ve rehberlik hizmetlerinin etkinliği ile iş gücü piyasasıyla kurulan bağların gücü hakkında önemli ipuçları sunmaktadır (OECD, 2022). OECD verileri, Türkiye'nin 15–29 yaş grubunda NEET oranı bakımından üye ülkeler arasında en yüksek düzeyde yer aldığını ve bu durumun yapısal bir süreklilik gösterdiğini ortaya koymaktadır (OECD, 2025a). Avrupa ülkeleriyle karşılaştırmalı çalışmalar, yüksek NEET oranlarının genellikle eğitim sistemindeki tabakalaşma ve iş gücü piyasasındaki güvencesizlikle birlikte ortaya çıktığını göstermektedir (Scarpetta vd., 2010).

Türkiye'de NEET olgusunun en belirgin özelliklerinden biri, yapısal eşitsizliklerle olan güçlü ilişkisidir. Özellikle toplumsal cinsiyete dayalı farklılıklar ve bölgesel eşitsizlikler, NEET statüsünün dağılımında belirleyici olmaktadır (OECD, 2023b). Yapılan çalışmalar, NEET olgusunun kadınlar açısından daha kalıcı ve çok boyutlu riskler barındırdığını ve bu durumun bakım emeği, toplumsal cinsiyet normları ve iş gücü piyasasına erişimdeki eşitsizliklerle yakından ilişkili olduğunu ortaya koymaktadır (Serracant, 2014; Yates & Payne, 2006). OECD'nin eğitim düzeyi, yaş grubu ve cinsiyete göre işsizlik oranlarını içeren veri setleri, Türkiye'de kadınların NEET oranlarının tüm eğitim düzeylerinde erkeklerden daha yüksek olduğunu göstermektedir (OECD, 2025a). Bu bulgu, eğitim düzeyinin yükselmesinin tek başına NEET riskini ortadan kaldırmadığını, yapısal toplumsal cinsiyet eşitsizliklerinin belirleyiciliğini sürdürdüğünü göstermektedir (Bynner & Parsons, 2002).

Bölgesel eşitsizlikler de Türkiye'de NEET oranlarının yüksek seyretmesinde önemli bir rol oynamaktadır. Eğitim altyapısına erişim, okul terk oranları ve yerel iş gücü piyasalarının sınırlılığı, bazı bölgelerde gençlerin eğitim ve istihdamdan kopuşunu yapısal olarak pekiştirmektedir (OECD, 2021). Karşılaştırmalı Avrupa çalışmaları, bölgesel iş gücü

piyasalarının zayıf olduğu bağlamlarda NEET statüsünün daha kalıcı hâle geldiğini ve gençlerin yeniden eğitim ya da istihdama dönme olasılığının azaldığını göstermektedir (Mascherini vd., 2012).

NEET olgusunun eğitim yönetimi açısından taşıdığı önem, bu noktada daha belirgin hâle gelmektedir. Eğitim yönetimi, yalnızca okulların idari işleyişini düzenleyen bir alan değil, öğrencilerin eğitim sistemine katılımını sürdüren, okul terkinin önlenmesine yönelik erken müdahale mekanizmaları geliştiren ve eğitim-istihdam geçişlerini destekleyen çok düzeyli bir yönetişim alanıdır (Bush, 2016; Hallinger, 2018). Okul liderliğinin öğrenci katılımı, akademik süreklilik ve okul terkinin azaltılması üzerindeki etkisi, çok sayıda ampirik çalışma tarafından doğrulanmıştır (Leithwood vd., 2020; Robinson vd., 2008).

Eğitim yönetimi literatüründe önleyici okul liderliği, özellikle dezavantajlı öğrenci grupları açısından kritik bir işleve sahiptir. Okul liderliğinin, öğrenci katılımını güçlendirme ve okul terki riskini azaltma yönündeki dönüştürücü rolü, değişimi yöneten liderlik yaklaşımlarıyla birlikte ele alınmaktadır (Fullan, 2020). Okul ikliminin güçlendirilmesi, öğrencilerin okula aidiyet duygularının artırılması ve rehberlik hizmetlerinin sistematik biçimde yapılandırılması, gençlerin eğitimden erken kopuşunu azaltan temel faktörler arasında yer almaktadır (Rumberger, 2011; Wang & Degol, 2016). Bu bağlamda okul yöneticilerinin aileler, yerel istihdam aktörleri ve sosyal hizmet kurumlarıyla kurduğu iş birlikleri, NEET riskini azaltmada stratejik bir rol üstlenmektedir (European Commission, 2020).

Bu kavramsal çalışma, Türkiye'de NEET olgusunu eğitim yönetimi ve yapısal eşitsizlik perspektifinden ele alarak, okul liderliği ve yönetişim süreçlerinin bu olgudaki rolünü tartışmayı amaçlamaktadır. Çalışma, OECD tarafından sunulan karşılaştırmalı göstergeler ve politika raporları ile NEET ve eğitim liderliği alanında üretilmiş akademik literatürü bütünleştirerek, NEET olgusunun toplumsal cinsiyet, eğitim düzeyi ve iş gücü piyasası yapılarıyla olan ilişkisini kavramsal düzeyde analiz etmektedir (Leithwood vd., 2020; OECD, 2022; Serracant, 2014). Bu çerçevede çalışma, eğitim yöneticilerinin NEET riskini azaltmaya yönelik potansiyel katkılarını önleyici liderlik, örgütsel kapasite ve paydaş iş birliği eksenlerinde tartışmakta ve Türkiye bağlamında yapılacak ampirik araştırmalar için kuramsal bir zemin sunmayı hedeflemektedir.

2. YÖNTEM

Bu çalışma, nitel araştırma yaklaşımı çerçevesinde tasarlanmış kavramsal bir çalışma niteliğindedir. Kavramsal çalışmalar, belirli bir olgunun kuramsal temellerini ortaya koymayı, mevcut literatürü eleştirel ve bütüncül bir bakış açısıyla tartışmayı ve ileride gerçekleştirilecek ampirik araştırmalar için analitik bir çerçeve sunmayı amaçlamaktadır (Creswell, 2013; Merriam & Tisdell, 2016). Bu bağlamda çalışmada, Türkiye'de eğitimde ve istihdamda olmayan gençler (NEET) olgusu, eğitim yönetimi ve yapısal eşitsizlik perspektifinden ele alınmış, konuya ilişkin kuramsal yaklaşımlar ile politika temelli göstergeler birlikte değerlendirilmiştir.

Çalışmada birincil veri toplama süreci yürütülmemiş, bunun yerine ikincil veri kaynaklarına dayalı doküman incelemesi yöntemi benimsenmiştir. Doküman incelemesi, belirli bir araştırma problemine ilişkin olarak resmî raporların, politika belgelerinin ve akademik yayınların sistematik biçimde analiz edilmesini sağlayan nitel bir araştırma tekniğidir (Bowen, 2009).

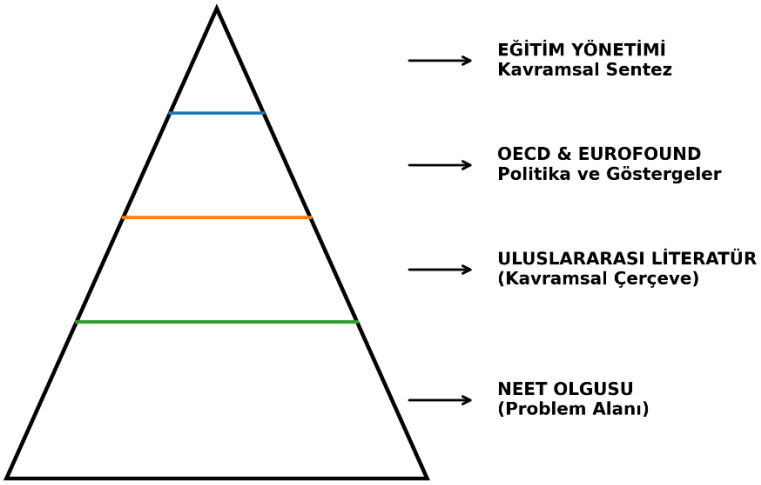
Özellikle NEET gibi politika göstergeleriyle tanımlanan çok boyutlu toplumsal olguların analizinde, doküman incelemesi yöntemi yaygın biçimde kullanılmaktadır.

Araştırma kapsamında başlıca veri kaynaklarını, OECD ve Eurofound tarafından yayımlanan karşılaştırmalı NEET göstergeleri, tematik raporlar ve politika belgeleri oluşturmaktadır. Özellikle OECD'nin "Youth not in employment, education or training (NEET)" göstergesi ile eğitim düzeyi, yaş grubu ve toplumsal cinsiyete göre işsizlik oranlarını içeren veri setleri, NEET olgusunun yapısal boyutlarını ortaya koymak amacıyla kullanılmıştır (OECD, 2023a; OECD, 2023c). Eurofound tarafından yayımlanan raporlar ise NEET'lerin özellikleri, toplumsal maliyetleri ve politika yanıtlarını kavramsal düzeyde tartışmak için referans alınmıştır (Eurofound, 2012; 2016).

Araştırma süreci dört temel aşamada yürütülmüştür. İlk aşamada, NEET olgusuna ilişkin uluslararası literatür taranmış, eğitim yönetimi, okul liderliği, yapısal eşitsizlikler ve eğitim–istihdam geçişleriyle ilişkili temel kavramlar belirlenmiştir (Bynner & Parsons, 2002; Furlong, 2006). İkinci aşamada, OECD ve Eurofound tarafından sunulan göstergeler ve politika raporları incelenerek, NEET olgusunun uluslararası düzeyde nasıl tanımlandığı ve ele alındığı analiz edilmiştir. Üçüncü aşamada, elde edilen kuramsal ve politika temelli bulgular eğitim yönetimi perspektifiyle ilişkilendirilmiş, okul yöneticilerinin erken okul terkinin önlenmesi, öğrenci katılımının artırılması ve eğitim–istihdam geçişlerinin desteklenmesindeki rolleri tartışılmıştır (Hallinger, 2018; Leithwood vd., 2020). Son aşamada ise bu tartışmalar Türkiye bağlamında yorumlanarak çalışmanın kavramsal bütünlüğü oluşturulmuştur.

Çalışmanın temel amacı, NEET olgusunu eğitim yönetimi ve yapısal eşitsizlik perspektifinden kavramsal olarak tartışmak ve politika-yönetişim ilişkileri çerçevesinde yeniden konumlandırmaktır (Arksey & O'Malley, 2005). Bu yönüyle çalışma, analitik ve yorumlayıcı bir nitelik taşımaktadır.

Araştırma sürecinin aşamaları ve kullanılan temel veri kaynakları Görsel 1'de özetlenmiştir.



Şekil 1. NEET Olgusunun Eğitim Yönetimi Perspektifinden Kavramsal Analizi

Sonuç olarak benimsenen bu yöntemsel yaklaşım, Türkiye'de NEET olgusunun eğitim yönetimi literatürü içerisinde daha görünür hâle gelmesine katkı sağlamayı ve okul

yöneticilerinin bu yapısal sorunla ilişkili rollerine dair kuramsal bir zemin sunmayı amaçlamaktadır.

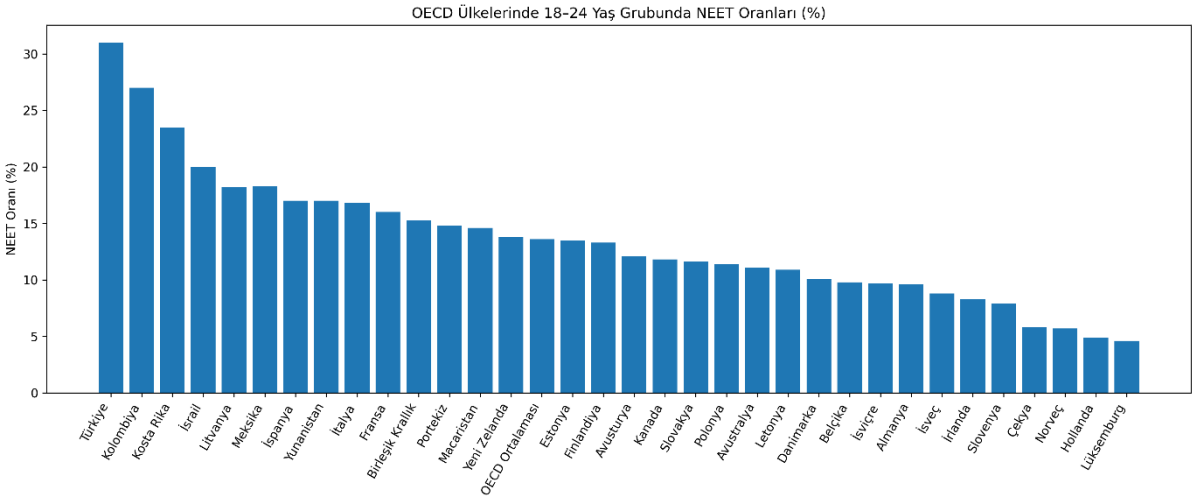
3. BULGULAR

Bu bölümde, Türkiye'de NEET (Not in Education, Employment or Training) olgusuna ilişkin güncel (2024–2025) istatistikî göstergeler ulusal ve uluslararası veri kaynakları kullanılarak sunulmuştur. Veriler, eğitim sisteminden iş gücü piyasasına geçiş süreçlerindeki kırılganlıkları, toplumsal eşitsizlik eğilimlerini ve genç nüfusun ekonomik ve sosyal katılım düzeylerini ortaya koymaktadır. İnceleme, OECD, Eurostat, ve bağımsız araştırma raporlarından elde edilen bulgular çerçevesinde yürütülmüştür.

3.1. Türkiye'de NEET Oranlarının Genel Görünümü

OECD'nin en güncel raporundan elde edilen veriler, Türkiye'de 15–29 yaş grubundaki gençlerin yaklaşık %26,4'ünün NEET statüsünde olduğunu ve bu oranın OECD ülkeleri arasında en yüksek düzeyde yer aldığını göstermektedir (OECD, 2025a). Eurostat'ın 2024 yılı 15–29 yaş grubu verilerine göre, Türkiye'de NEET oranı yaklaşık %25,9 düzeyindedir ve bu oran Avrupa ülkeleri arasında en yüksek seviyelerden biri olarak kaydedilmiştir. Bu değer, gençlerin dörtte birinin ne eğitimde ne de istihdamda olduğunu göstermektedir (Eurostat, 2024).

Benzer şekilde, uluslararası raporlarda Türkiye'de gençlik NEET oranının OECD ortalamasının çok üzerinde olduğu ve bazı yaş gruplarında %30'un üzerine çıktığı belirtilmiştir. Örneğin 18–24 yaş aralığında NEET oranı yaklaşık %31,3 olarak rapor edilmiştir, bu oran OECD ülkeleri ortalamasının (%14.2) yaklaşık iki katıdır (OECD, 2025a).



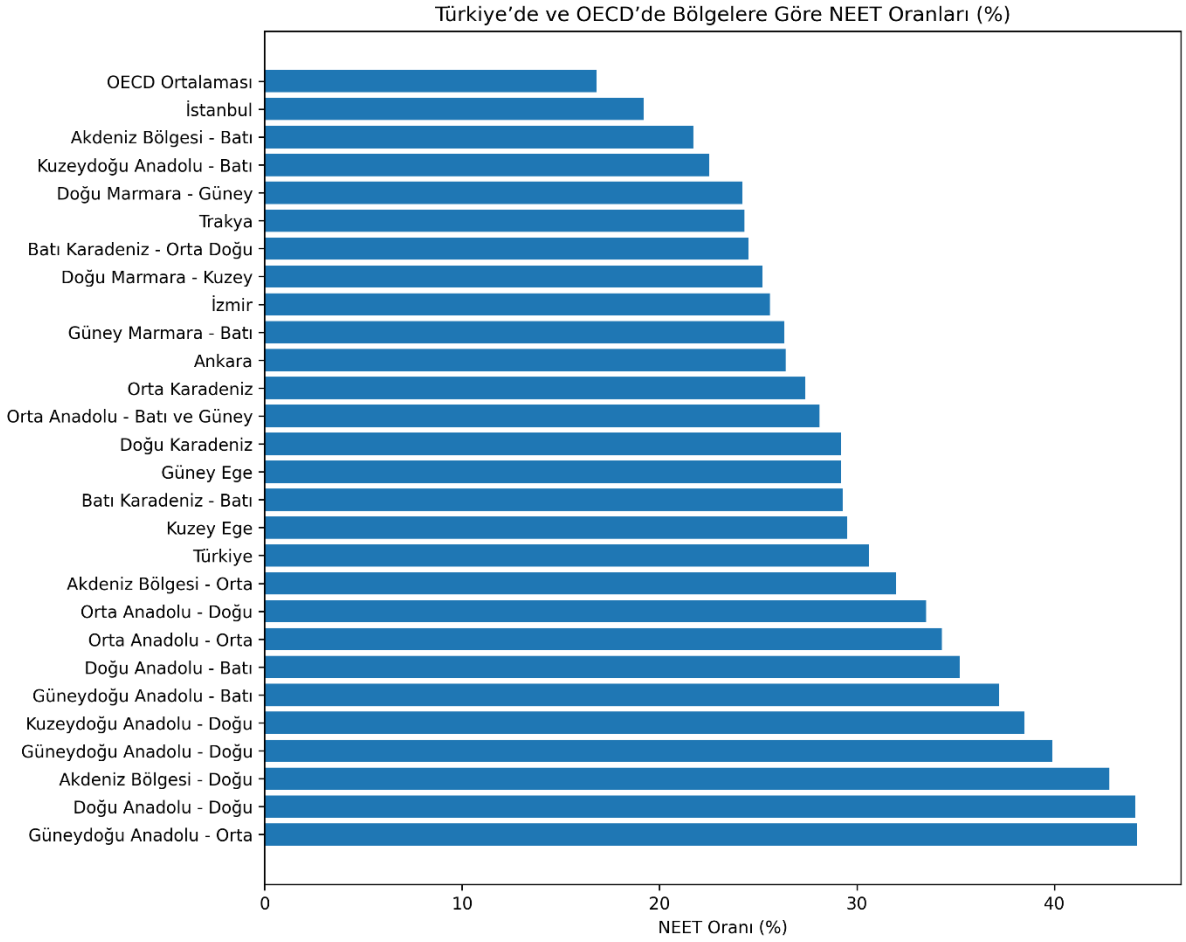
Şekil 2. OECD Ülkelerinde 18-24 Yaş Grubunda NEET Oranları (%) (2024 yılı)

3.2. Toplumsal Cinsiyet ve Yaş Gruplarında NEET Oranları

NEET göstergelerinde önemli bir toplumsal cinsiyet farkı bulunmaktadır. Kadınlar, erkeklerden belirgin şekilde daha yüksek oranlarda NEET statüsünde yer almaktadır. OECD'nin 2025 raporunda, 18–24 yaş grubunda kadınların yaklaşık %41,6'sı NEET olarak sınıflandırılırken, erkeklerde bu oran %22,1 civarındadır. Bu cinsiyet farkı, genç kadınların eğitim ve istihdam süreçlerindeki katılımda ciddi engellerle karşılaştığını göstermektedir.

3.3. Bölgesel Eğilimler ve Fırsat Eşitsizliği

OECD'nin bölgesel göstergelerine göre, Türkiye'de gençlerin NEET oranlarındaki eşitsizlikler coğrafi olarak da belirgindir. Türkiye'de 26 bölgeden hiçbirinde NEET oranı OECD referansının (%16,8) altında değildir, bölgesel ortalama NEET oranı yaklaşık %31 olarak ölçülmüştür. En yüksek NEET oranları Güneydoğu Anadolu – Orta bölgesinde %44,2 ile kaydedilirken, İstanbul'da bu oran %19,2 civarındadır (OECD, 2024). Bu veriler, bölgesel eğitim ve istihdam olanaklarındaki eşitsizliklerin gençlik katılımını etkilediğini göstermektedir.



Şekil 3. Türkiye'de Bölgesel NEET Oranları (%) (2023)

3.4. İşgücü Piyasası Katılımı

Bağımsız araştırma raporlarının bulgularına göre, Türkiye'de gençlerin işgücü piyasasına katılım düzeyi oldukça düşük seyretmektedir. 15–24 yaş grubunda yalnızca yaklaşık %39,5 oranında genç işgücü piyasasına aktif olarak dâhil olurken, geriye kalanların büyük bir bölümü ne çalışmakta ne de iş aramaktadır. Bu durum, gençlerde sadece NEET statüsünün yükseldiğini değil, aynı zamanda ekonomik katılımın ciddi şekilde zayıfladığını göstermektedir.

3.5. Eğitim Düzeyi ile İşsizlik Arasındaki İlişki

OECD'nin "Education at a Glance 2025" raporuna göre eğitim düzeyi ile işsizlik arasındaki ilişki Türkiye'de tipik OECD örüntüsünden farklılaşmaktadır. Türkiye'de lise altı, lise ve

yükseköğretim mezunları arasındaki işsizlik oranları birbirine daha yakındır, bu da eğitim yükseldikçe işsizlik riskinin azaldığı genel küresel eğilimden sapma göstermektedir. Örneğin işsizlik oranı lise altı eğitimde %11,2 iken, lise ve yükseköğretim mezunlarında sırasıyla %10,2 ve %10,6 olarak rapor edilmiştir (OECD, 2025b). Bu bulgu, eğitim–istihdam uyumsuzluğunun Türkiye'de özellikle gençler için önemli bir sorun olduğunu göstermektedir.

Tablo 1. Türkiye'de NEET Oranları (2024–2025)

Gösterge	Değer	Kaynak
15–29 yaş NEET oranı	%25,9	Eurostat, 2024
18–24 yaş NEET oranı	%31,3	OECD, 2025a
Bölgesel ortalama NEET	%31	OECD, 2024
15–24 yaş İşsizlik Oranı	%15	TÜİK, 2025

4. TARTIŞMA

Bulgular, Türkiye'de gençlerin eğitim, istihdam ve işgücü piyasasına katılım süreçlerindeki yüksek riskler, toplumsal eşitsizlikler ve yapısal sorunlar hakkında istatistikî bir görünüm sunmaktadır. Özellikle yüksek NEET oranları, toplumsal cinsiyet farklılıkları ve bölgesel eşitsizlikler, genç nüfus için acilen müdahale gerektiren politika alanlarını işaret etmektedir. Bulgular, Türkiye'de NEET oranlarının yüksekliği, toplumsal cinsiyete dayalı eşitsizlikler ve bölgesel farklılıkların yalnızca makro düzeyde politika sorunları olmadığını, aynı zamanda eğitim kurumlarının yönetim ve liderlik pratikleriyle doğrudan ilişkili yapısal meseleler olduğunu göstermektedir. Özellikle erken okul terki, eğitimden kopuş ve eğitim–istihdam geçişindeki kırılmalar, eğitim yönetimi perspektifinden ele alınması gereken kritik alanlar olarak öne çıkmaktadır.

Eğitim yönetimi literatürü, okul liderliğinin öğrencilerin okula bağlılığı, akademik devamlılığı ve uzun vadeli eğitim çıktıları üzerinde belirleyici bir role sahip olduğunu ortaya koymaktadır. Hallinger (2018), okul liderliğinin bağlamsal faktörlerden bağımsız değerlendirilemeyeceğini vurgulayarak, sosyo-ekonomik dezavantajların yoğun olduğu bağlamlarda liderliğin daha çok önleyici, kapsayıcı ve destekleyici işlevler üstlenmesi gerektiğini belirtmektedir. Türkiye'de yüksek NEET oranlarının özellikle belirli bölgelerde ve kadınlar arasında yoğunlaşması, okul yöneticilerinin yerel bağlamı dikkate alan stratejik liderlik uygulamalarının önemini artırmaktadır.

Benzer şekilde, Leithwood, Harris ve Hopkins (2020) başarılı okul liderliğinin öğrencilerin öğrenme çıktıları üzerinde dolaylı fakat güçlü etkiler yarattığını, bu etkinin büyük ölçüde okul iklimi, öğretmen iş birliği ve öğrenci katılımını destekleyen örgütsel yapılar aracılığıyla gerçekleştiğini ortaya koymaktadır. Bu bağlamda, NEET statüsüne geçiş riski taşıyan öğrenciler için okul yöneticilerinin rehberlik hizmetlerini güçlendirmesi, öğretmenler arası

koordinasyonu artırması ve öğrencilerin okulla duygusal bağ kurmasını desteklemesi kritik önemdedir.

Uluslararası ampirik çalışmalar, okul temelli önleyici liderlik uygulamalarının erken okul terkini azaltmada etkili olduğunu göstermektedir. Özellikle dezavantajlı gruplar için geliştirilen çok paydaşlı okul modellerinin, eğitimden kopuşu ve sonrasında NEET statüsüne geçişi sınırlayabildiği belirtilmektedir (Day vd., 2016). Türkiye bağlamında bu bulgu, okul yöneticilerinin yalnızca pedagojik liderler değil, aynı zamanda yerel ağları koordine eden kurumsal aktörler olarak konumlandırılması gerektiğine işaret etmektedir.

Eğitim yönetimi açısından bir diğer önemli boyut, eğitim ile iş gücü piyasası arasındaki yapısal kopukluktur. OECD ve TÜİK verilerinin birlikte değerlendirilmesi, eğitim düzeyi yükseldikçe işsizlik riskinin belirgin biçimde azalmadığı bir yapıya işaret etmektedir. Bu durum, okul yöneticilerinin kariyer rehberliği, mesleki yönlendirme ve yaşam boyu öğrenme becerilerinin kazandırılmasına yönelik stratejik planlamalarını daha da önemli hâle getirmektedir. Robinson (2011), okul liderliğinin öğretimsel odağının öğrencilerin uzun vadeli yaşam ve çalışma becerilerini kapsayacak şekilde genişletilmesi gerektiğini savunmaktadır.

5. SONUÇ VE ÖNERİLER

Bu kavramsal çalışmada sunulan bulgular, Türkiye'de NEET olgusunun yalnızca bireysel tercihler ya da geçici ekonomik dalgalanmalarla açıklanamayacağını, aksine eğitim sisteminin yapısal özellikleri, okuldan işe geçiş mekanizmaları ve yönetişim kapasitesiyle yakından ilişkili olduğunu ortaya koymaktadır. OECD, Eurostat, Eurofound ve TÜİK verilerinin birlikte değerlendirilmesi, Türkiye'de gençlerin önemli bir bölümünün eğitim ve istihdam sistemlerinin dışında kalmasının süreklilik arz eden bir yapısal sorun hâline geldiğini göstermektedir (Eurofound, 2016; Eurostat, 2024; OECD, 2025a).

Türkiye'de özellikle yüksek NEET oranlarının kadınlar ve belirli bölgelerde yoğunlaşması, eğitimde fırsat eşitsizliklerinin ve toplumsal cinsiyete dayalı ayrışmaların okul düzeyinde yeterince telafi edilemediğine işaret etmektedir. Uluslararası literatür, okul liderliğinin dezavantajlı bağlamlarda öğrencilerin okula bağlılığı ve eğitimde kalma olasılığı üzerinde kritik bir rol oynadığını vurgulamaktadır (Day vd., 2016; Hallinger, 2018). Bu bulgu, Türkiye bağlamında okul yöneticilerinin yalnızca idari değil, aynı zamanda önleyici ve kapsayıcı bir liderlik rolü üstlenmesi gerektiğini desteklemektedir.

Bulgular, ayrıca eğitim düzeyi yükseldikçe işsizlik riskinin belirgin biçimde azalmadığı bir yapıya işaret etmektedir. Bu durum, eğitim–istihdam uyumsuzluğunun ve okul temelli kariyer rehberliği mekanizmalarının yetersizliğinin NEET olgusunu beslediğini düşündürmektedir. Eğitim yönetimi literatürü, okul liderlerinin kariyer rehberliği, mesleki yönlendirme ve dış paydaşlarla iş birliği süreçlerini stratejik olarak koordine etmesinin, öğrencilerin eğitimden kopuş riskini azalttığını ortaya koymaktadır (Leithwood vd., 2020; Robinson, 2011).

Sonuç olarak, bu çalışma NEET olgusunun eğitim yönetimi perspektifinden ele alınmasının, sorunun yalnızca sonuçlarını değil, oluşum süreçlerini görünür kıldığını göstermektedir. Okul yöneticilerinin bağlamsal liderlik, örgütsel kapasite geliştirme ve çok paydaşlı iş birliklerine dayalı uygulamaları, Türkiye'de NEET oranlarının azaltılmasına yönelik politika ve uygulamalar için önemli bir müdahale alanı sunmaktadır. Gelecek araştırmaların, okul liderliği

uygulamaları ile NEET riski arasındaki ilişkileri ampirik olarak incelemesi, eğitim yönetimi literatürüne ve politika yapım süreçlerine önemli katkılar sağlayacaktır.

Sonuç olarak, bu çalışmada sunulan istatistikî bulgular, NEET olgusunun eğitim yönetimi açısından yalnızca bir "çıktı" değil, okul düzeyinde erken müdahale ile dönüştürülebilecek bir süreç olduğunu göstermektedir. Okul yöneticilerinin bağlamsal liderlik, önleyici stratejiler ve paydaşlarla iş birliği temelinde geliştirecekleri uygulamalar, Türkiye'de NEET oranlarının azaltılmasına yönelik politika ve uygulamalar için kritik bir dönüştürücü etki yaratabilir.

ARŞİMET'İN ÇOKGEN YÖNTEMİNE DAYALI BİR ÖĞRENME ETKİNLİĞİNİN ÖĞRETMEN ADAYLARININ II SAYISINA İLİŞKİN KAVRAMSAL ANLAYIŞLARI ÜZERİNDEKİ ETKİSİ

Doç. Dr. Seval Deniz KILIÇ

Muğla Sıtkı Koçman Üniversitesi Eğitim Fakültesi

sdenizkilic@mu.edu.tr - 0000-0001-8855-4179

Özet

Bu çalışmanın amacı; Arşimet'in bir çemberin içine ve dışına çizilen çokgenler yardımıyla π sayısını bulma yöntemini içeren bir öğrenme etkinliğinin, öğretmen adaylarının π sayısına ilişkin kavramsal anlayışları üzerindeki etkisini incelemektir. Araştırma, nitel araştırma deseniyle yürütülmüş olup çalışma grubunu bir devlet üniversitesinin öğretmen yetiştirme programında öğrenim gören 20 gönüllü matematik öğretmen adayı oluşturmaktadır. Uygulama sürecinde, Arşimet'in çokgenler yardımıyla pi sayısını belirleme yöntemi temel alınarak hazırlanan bir etkinlik sınıf ortamında uygulanmıştır. Veri toplama aracı, öğretmen adaylarına etkinlik öncesinde ve sonrasında yöneltilen yarı yapılandırılmış bir görüşme formudur. Elde edilen veriler içerik analizi yöntemiyle çözümlenmiş, öğretmen adaylarının π sayısına ilişkin açıklamaları kavramsal düzeyde karşılaştırmalı olarak incelenmiştir. Bulgular, etkinlik öncesinde öğretmen adaylarının π'yi çoğunlukla sabit bir sayı (3,14) veya ölçme sonucu elde edilen bir değer olarak ifade ettiklerini; etkinlik sonrasında ise π'nin alt ve üst sınırlar arasında kalan, çokgen sayısı arttıkça daha iyi yaklaşılan bir oran olarak gördüklerini göstermektedir. Sonuçlar; Arşimet'in çokgen yöntemine dayalı bu öğrenme etkinliğinin, öğretmen adaylarının π sayısına ilişkin kavramsal anlayışlarını derinleştirdiğini ve matematiksel düşünmelerini desteklediğini ortaya koymaktadır.

Anahtar Kelimeler: π sayısı, Arşimet yöntemi, öğretmen adayları, kavramsal öğrenme, matematik tarihi

Giriş

Problem çözme becerisi, matematik öğretiminin en temel bileşenlerinden birisidir. Bu becerinin gelişebilmesi için, matematikte karşılaşılan kavramların ezberlenmeden kökenine inilerek anlaşılması ve daha sonra gerekli formüllere ulaşılması gereklidir. Çünkü öğrenenler ancak formülleri kendileri geliştirdiklerinde var olan matematiksel ilişkileri farkeder ve matematiksel sürece dahil olarak öğrenmeyi gerçekleştirirler (Crouch&Haines, 2004; Dreyfus, 2002). Özellikle okul matematiğinin vazgeçilmez bir bileşeni olan geometri alanında, öğrencilerin kitaplarda yer alan hazır formülleri ezberlemek yerine, bu formülleri ve kavramları kendilerinin oluşturması durumunda, öğrencilerde matematiğin anlamlı olduğu algısı oluşacaktır. Bu süreç matematiği aksiyomatik yapısı gereği sıralı olarak ilerlemelidir. (Austing, vd. 1979;

Bush&Karp, 2023). Ancak bu sayede öğrenciler formüllerin ya da kavramların son haline nasıl geldiğini anlamlandırır ve sembolün gerçek anlamını kavrar (Roza vd., 2027).

Geometri alanında pek çok formül ve kavram kullanılmaktadır. Bu kavramlardan bazıları (irrasyonel sayılar), içinde π (pi) adı verilen özel sabitleri barındırmaktadır. Matematik tarihinin en köklü kavramlarından birisi olan π sayısı, adını Yunanca "çevre" anlamına gelen *perímetron* sözcüğünün ilk harfinden almakta ve matematiksel olarak π, bir çember ya da dairede çevre uzunluğunun çap uzunluğuna oranı olarak tanımlanmaktadır (Berggren, vd., 2000). Bu sayı tarih boyunca pek çok uygarlık ve bilim insanının ilgisini çekmiş; farklı dönemlerde çeşitli yaklaşımlarla pi'nin değeri hesaplanmaya çalışılmıştır. Yaklaşık 3500 yıl önce Babillilerin π'yi 3 olarak kabul ettikleri bilinmektedir. Antik Mısır'a ait Rhind Papirüsü'nde ise π için 3,1605 değerinin kullanıldığı görülmektedir (Hosch, 2010). Ancak, π sayısının doğru değerine ilişkin ilk sistematik yaklaşımı ortaya koyan bilim insanı Arşimet olmuştur. Arşimet, bir çemberin içine ve dışına çizilen düzgün çokgenlerden yararlanarak π değerini sınırlandırmayı hedeflemiş ve bu süreçte başlangıç olarak düzgün altıgeni kullanmıştır. Daha sonra, çokgenlerin kenar sayılarını her adımda iki katına çıkararak (12-gen, 24-gen, 48-gen 96-gen) hesaplamalarına devam etmiştir. Bu yöntemle, çemberin içine çizilen çokgenin çevresinin çember çevresinden daha küçük, dışına çizilen çokgenin çevresinin ise daha büyük olduğunu gözlemlemiştir. Böylece, π değerinin içteki ve dıştaki çokgenlerin çevreleri arasında kaldığını belirleyerek π sayısı için 3,14084 ile 3,14285 arasında bir değer elde etmiştir. (Posamentier ve Lehmann, 2004). Her ne kadar deneysel bir yaklaşım olarak görülse de (Abramovich, 2025), pi sayısının Arşimed tarafından bulunmuş değeri, yüzyıllarca matematik dünyası tarafından en doğru pi değeri olarak kabul görmüş ve kullanılmıştır.

Pi sayısı, eğitim hayatları boyunca öğrenciler tarafından oldukça fazla karşılaşılan ve kullanılan bir sayıdır. Bu sayı genellikle 3,14 ya da 22/7 olarak ifade edilmektedir. Öğretmen adayları ile yapılan bir çalışmada buna paralel olarak, katılımcı öğretmenlerin π sayısını genellikle 22/7 kesri, çevre/çap oranı ve 3,14 sabiti olarak düşündükleri görülmüştür. Ancak π sayısına ilişkin kavramsal bir tanım yapamadıkları belirtilmiştir (Erdem& Man, 2018; Tavşan, & Pusmaz, 2020). Arşimet'in π sayısını belirlemeye yönelik yaklaşımı ise, π'yi sabit bir sayı olarak sunmaktan ziyade, içten ve çevrel çokgenler aracılığıyla sınırlandırılan ve çokgenlerin kenar sayısı arttıkça çemberin çevresine yaklaşan bir büyüklük olarak ele alma biçimindedir. Bu yönüyle Arşimet'in yöntemi, π kavramının süreç temelli ve temsile dayalı biçimde anlaşılmasına olanak tanıyan tarihsel bir yaklaşım sunmaktadır. Ancak pi sayısına yönelik bu yaklaşım hemen hemen eğitimin hiçbir aşamasında ele alınmamaktadır. Bunu doğrular nitelikte bir başka çalışmada, öğretmen adaylarının irrasyonel sayılar özelinde pi konusundaki eksikliklerini, öğrenim hayatları boyunca bu kavramların yeterince tartışılmamasına ve öğretim için ayrılan sürenin yetersizliğine bağlamaları vurgulanmıştır (Çevikbaş, & Argün, 2017). Bu verilere dayanarak, öğretmen adaylarının pi sayısına yönelik kavramsal bilgilerini belirlemek ve geliştirmek anlamlı bir öğrenme faaliyeti olabilir.

Araştırmanın amacı

Bu çalışmanın amacı, Arşimet'in π sayısını çokgenler aracılığıyla yaklaşık olarak belirleme yöntemine dayalı bir etkinliğin (King, 2013), öğretmen adaylarının π sayısına ilişkin kavramsal anlayışları üzerindeki etkisini incelemektir. Buna göre araştırmanın problemi aşağıdaki gibi ifade edilebilir:

Öğretmen adaylarının π sayısına ilişkin açıklamaları, Arşimet'in çokgen yöntemine dayalı öğrenme etkinliği öncesinde ve sonrasında nasıl değişmektedir?

Yöntem

Bu çalışmada öğretmen adaylarının yazılı yanıtları, π sayısına ilişkin kavramsal anlayıştaki değişimi ortaya koymak amacıyla içerik analizi yoluyla çözümlenmiştir. Kodlama süreci, önceden belirlenmiş temalar altında yürütülmüş; her bir tema, öğretmen adaylarının kullandıkları dil ve gerekçelendirme biçimleri dikkate alınarak alt kodlara ayrılmıştır.

Belirlenen temalar ve bu temalara ait kodlar tablo 1'de ifade edilmiştir:

Temalar		**Kodlar**			
	1- Π Sayısının Tanımlanma Biçimi	Sabit sayı olarak π	Oran olarak π	Yaklaşık değer olarak π	Süreç sonucu elde edilen değer olarak π
	2- Matematiksel Gerekçelendirme Biçimi	Tanımsal gerekçelendirme	Ölçmeye dayalı gerekçelendirme	Görsel/temsile dayalı gerekçelendirme	İlişkisel gerekçelendirme

Tablo 1: Kodlar ve Temalar

Öğretmen adaylarının etkinlik öncesi ve sonrası yazılı yanıtları, önceden belirlenen temalar doğrultusunda içerik analizi yöntemiyle kodlanmıştır. Kodlama sürecinde her bir yanıt, π sayısının tanımlanma biçimi, matematiksel gerekçelendirme biçimi ve alt–üst sınır yaklaşma farkındalığı açısından incelenmiştir. Öncesi ve sonrası yanıtlar karşılaştırmalı olarak analiz edilerek kavramsal değişim ortaya konulmuştur. Bulgular doğrudan alıntılarla desteklenmiştir.

Katılımcılar

Bu araştırmanın katılımcılarını, bir devlet üniversitesinde öğrenim gören toplam 20 öğretmen adayı oluşturmaktadır. Katılımcılar, gönüllülük esasına dayalı olarak belirlenmiş ve çalışmaya katılmayı kabul eden öğretmen adayları araştırmaya dâhil edilmiştir.

Etkinlik ve Veri Toplama Araçları

Araştırmada veri toplama aracı olarak, Arşimet'in çokgen yöntemine dayalı π yaklaşımını içeren bir öğrenme etkinliği kullanılmıştır. Öğretmen adaylarının π sayısına ilişkin kavramsal anlayışlarını ve gerekçelendirme biçimlerini ortaya koymak amacıyla, etkinlik öncesinde, etkinlik sürecinde ve etkinlik sonrasında açık uçlu sorulardan oluşan bir veri toplama aracı uygulanmıştır.

Bulgular

Bulgular her bir tema için ayrı ayrı tablo ile ifade edilmiştir.

Π (Pi) Sayısının Tanımlanma Biçimi Temasına İlişkin Bulgular:

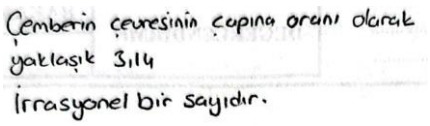
	Etkinlik öncesi	Etkinlik sonrası

	Frekans	Yüzde	Frekans	Yüzde
Sabit sayı olarak π	19	58	0	-
Oran olarak π	12	36	1	4
Yaklaşık değer olarak π	2	6	13	52
Süreç sonucu elde edilen değer olarak π	0	-	11	44

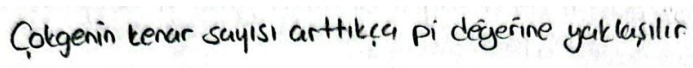
Tablo 2: Tema 1'e ilişkin bulgular

Tabloda yer alan değerler her bir öğretmen adayını değil, toplamda yapılan açıklamalardan elde edilen verileri temsil etmektedir. Yani bir öğretmen adayı açıklamasında hem sabit değer hem de oran dediyse, bu ifade her iki sütuna da yansıtılmıştır. O nedenle tabloda frekanslar öğretmen adayı sayısından fazla çıkabilmektedir. Buna göre, öğretmen adaylarının etkinlik öncesi yanıtları incelendiğinde, π sayısının çoğunlukla sabit bir sayı ya da çevrenin çapa oranı olarak ele alındığı görülmektedir. Etkinlik öncesinde hiçbir öğretmen adayının π'yi bir süreç sonucu elde edilen değer olarak ifade etmediği belirlenmiştir. Buna karşın etkinlik sonrasında, öğretmen adaylarının π'ya ilişkin açıklamalarında belirgin bir dönüşüm yaşandığı görülmektedir. Özellikle π'nin çokgenlere dayalı bir yaklaşım süreciyle elde edilen bir değer olarak ifade edilme oranı %44'e yükselmiştir. Aynı zamanda π'yi yalnızca sabit bir sayı olarak tanımlayan aday kalmaması da dikkat çekicidir. Bu bulgular, Arşimet'in çokgen yöntemine dayalı etkinliğin öğretmen adaylarının π sayısına ilişkin kavramsal anlayışlarını yaklaşık değer ve süreç temelli bir bakış açısına doğru dönüştürdüğünü göstermektedir. Aşağıda bir öğretmen adayının dönüşümü gözükmektedir:

Ektinlik öncesi



Etkinlik sonrası



Matematiksel Gerekçelendirme Biçimi Temasına İlişkin Bulgular:

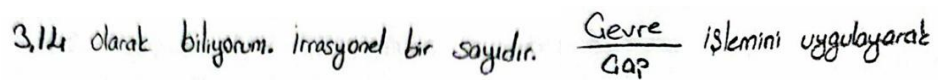
	Etkinlik öncesi		Etkinlik sonrası	
	Frekans	Yüzde	Frekans	Yüzde
Tanımsal gerekçelendirme	23	58	0	-
Ölçmeye dayalı gerekçelendirme	17	43	1	4
Görsel/temsile dayalı gerekçelendirme	0	-	11	40
İlişkisel gerekçelendirme	0	-	15	56

Tablo 3: Tema 2'ye ilişkin bulgular

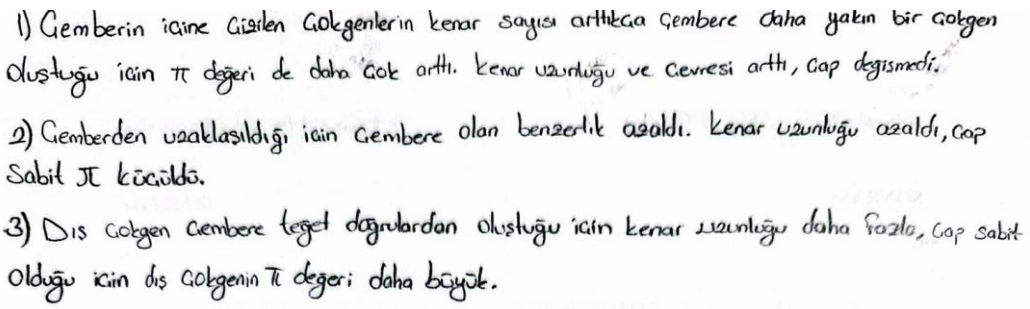
Öğretmen adaylarının etkinlik öncesi açıklamaları incelendiğinde, matematiksel gerekçelendirmelerin ağırlıklı olarak tanımsal ve ölçmeye dayalı açıklamalarla sınırlı kaldığı görülmektedir. Etkinlik öncesinde hiçbir öğretmen adayının ilişkisel ve görsel gerekçelendirme

kullanımına rastlanmamıştır. Etkinlik sonrasında ise öğretmen adaylarının gerekçelendirme biçimlerinde belirgin bir dönüşüm yaşandığı dikkat çekmektedir. Görsel gerekçelendirmenin %40'a, ilişkisel gerekçelendirme oranının ise %56'ya yükselmesi, adayların matematiksel ilişkileri kullanarak açıklama yapmaya başladıklarını göstermektedir. Bununla birlikte, görsel ve temsile dayalı gerekçelendirmelerin de etkinlik sonrasında arttığı görülmüştür. Bu bulgular, Arşimet'in çokgen yöntemine dayalı etkinliğin öğretmen adaylarının matematiksel düşünme ve gerekçelendirme becerilerini desteklediğine işaret etmektedir. Aşağıda bir öğretmen adayının çalışma öncesi ve sonrası açıklamaları yer almaktadır:

Çalışma öncesi



Çalışma sonrası



Sonuç

Bu çalışmadan elde edilen bulgular, alanyazında öğretmen adaylarının π sayısına ve irrasyonel sayı kavramına ilişkin yaşadığı güçlükleri ortaya koyan önceki araştırmalarla önemli ölçüde örtüşmektedir. Tavşan ve Pusmaz (2020) tarafından gerçekleştirilen çalışmada, ilköğretim matematik öğretmen adaylarının π sayısını çoğunlukla "çemberin çevresinin çapına oranı" şeklinde formal olarak tanımlayabildikleri; ancak bu bilginin büyük ölçüde ezber düzeyinde kaldığı ve kavramsal bir bütünlük oluşturmadığı vurgulanmaktadır. Benzer biçimde, bu çalışmada da etkinlik öncesinde öğretmen adaylarının π'yi ağırlıklı olarak sabit bir sayı, oran ya da yaklaşık bir değer olarak ele aldıkları; süreç, sınır ve yaklaşma boyutlarını yeterince dikkate almadıkları görülmüştür.

Öte yandan, Çevikbaş ve Argün (2017)'nin rasyonel ve irrasyonel sayı kavramlarına yönelik bulguları da öğretmen adaylarının teorik bilgileri içselleştirmekte zorlandıklarını göstermektedir. Bu durum, π sayısının irrasyonel doğasının öğretmen adayları tarafından çoğu zaman yalnızca sayısal yaklaşımlarla ilişkilendirilmesine yol açmaktadır. Ancak mevcut çalışmada uygulanan Arşimet'in çokgen yöntemine dayalı etkinlik sonrasında, öğretmen adaylarının π sayısına ilişkin açıklamalarında belirgin bir kavramsal dönüşüm yaşandığı, π'nin süreç temelli, alt–üst sınırlar arasında yaklaşma yoluyla elde edilen bir matematiksel büyüklük olarak ele alınmaya başlandığı görülmüştür. Bu sonuç, matematik tarihine ve temsile dayalı öğrenme etkinliklerinin, öğretmen adaylarının parçalı ve ezbere dayalı bilgi yapılarını daha bütüncül bir kavramsal anlayışa dönüştürme potansiyeline sahip olduğunu göstermektedir.

Öneriler

Çalışmadan elde edilen bulgular doğrultusunda, öğretmen eğitimi programlarında π sayısı ve irrasyonel sayılar gibi kavramsal açıdan zorlayıcı konuların öğretiminde, yalnızca kitabî tanımlara ve sayısal yaklaşımlara dayalı anlatımlardan kaçınılması önerilebilir. Bunun yerine, Arşimet'in çokgen yöntemi gibi matematik tarihi temelli, süreç odaklı ve çoklu temsillerin kullanıldığı etkinliklere daha fazla yer verilmesi, öğretmen adaylarının kavramsal farkındalıklarını geliştirebilir. Ayrıca, öğretmen adaylarının matematiksel gerekçelendirme becerilerini desteklemek amacıyla, ölçmeye dayalı açıklamalardan ilişkisel ve temsile dayalı açıklamalara geçişi teşvik eden öğrenme ortamlarının tasarlanması önemlidir. Gelecek çalışmalarda, bu tür tarihsel yaklaşımların farklı matematik konularındaki etkileri farklı tasarımlarla incelenebilir; öğretmen adaylarının edindikleri bu kavramsal kazanımların sınıf içi öğretim uygulamalarına nasıl yansıdığı araştırılabilir.

MATEMATİK TARİHİ TEMELLİ BİR ETKİNLİK OLARAK ARŞİMET'İN II YÖNTEMİNİN MATEMATİK ÖĞRETMEN ADAYLARI TARAFINDAN DEĞERLENDİRİLMESİ

Doç. Dr. Seval Deniz KILIÇ

Muğla Sıtkı Koçman Üniversitesi Eğitim Fakültesi,

sdenizkilic@mu.edu.tr - 0000-0001-8855-4179

Özet

Bu çalışmanın amacı, öğretmen adaylarının matematik tarihi temelli bir öğrenme etkinliği olarak Arşimet'in çokgen yöntemine dayalı π yaklaşımını nasıl değerlendirdiklerini incelemektir. Matematik öğretiminde tarihsel yaklaşımların, kavramsal anlamayı derinleştirme ve matematiği bir süreç olarak kavratma potansiyeline sahip olduğu vurgulanmakta; ancak bu tür etkinliklerin öğretmen adayları tarafından nasıl algılandığına ilişkin çalışmalar sınırlı kalmaktadır. Bu bağlamda, araştırmada Arşimet'in içten ve çevrel çokgenlerin çizimine dayalı π yaklaşımını içeren bir etkinlik, bir devlet üniversitesinin ilköğretim matematik öğretmenliği programında öğrenim gören 20 öğretmen adayına uygulanmıştır.

Çalışma nitel araştırma yaklaşımıyla yürütülmüş; veri toplama aracı olarak etkinlik sonrasında öğretmen adaylarına yöneltilen açık uçlu sorular kullanılmıştır. Elde edilen veriler içerik analizi yöntemiyle çözümlenmiş; adayların etkinliği *matematiğe bakış açısı*, *matematik tarihi* ve *işlevsellik* açısından nasıl değerlendirdikleri incelenmiştir. Bulgular, öğretmen adaylarının büyük bir kısmının Arşimet'in π yöntemini, matematiğin yalnızca sonuç odaklı değil, aynı zamanda tarihsel ve süreç odaklı bir yapı olduğunu gösteren anlamlı bir öğrenme deneyimi olarak değerlendirdiğini ortaya koymuştur. Ayrıca, adaylar etkinliğin π sayısına dair kavramsal anlayışı desteklediğini ve çeşitli revizyonlarla matematik öğretiminde kullanılabilir olduğunu vurgulamışlardır.

Sonuç olarak bu çalışma, matematik tarihi temelli etkinliklerin öğretmen adayları tarafından değerli bulunduğuna ve öğretmen eğitiminde bu tür etkinliklere daha fazla yer verilmesi gerektiğine işaret etmektedir.

Anahtar Kelimeler: π sayısı, Arşimet yöntemi, matematik tarihi, matematik öğretmen adayları, matematik öğretimi

Giriş

Matematik, bir anda ortaya çıkan hazır bir bilgi bütünü olmayıp, tarihsel süreç içerisinde gelişerek bugünkü sistematik yapısına ulaşmış bir bilim dalıdır. Matematiğin insan ürünü olma niteliğini vurgulayan bu tarihsel gelişim süreci, matematik eğitiminin felsefi temelleri ve doğasıyla da örtüşmektedir. Bu nedenle matematik eğitiminde matematik tarihinin kullanımına uzun yıllardır önem verilmektedir (Arcavi, 1991; Fried, 2001; Jankvist, 2009). Matematik derslerinde matematik tarihine yer verilmesi; öğrencilerin matematiksel kavramları daha iyi anlamalarına katkı sağlamakta, matematiksel etkinliklerin doğasına ilişkin bakış açılarını

geliştirmekte, öğretmenlerin alan bilgisi derinliğini ve geniş perspektif kazanmalarını desteklemekte, matematiğe yönelik olumlu tutumların oluşmasına yardımcı olmakta ve matematiğin kültürel, toplumsal ve insani bir ürün olarak değerlendirilmesini mümkün kılmaktadır (Tzanakis & Arcavi, 2000). Bununla birlikte, matematik tarihinin derslerde nasıl kullanıldığı da en az kullanılması kadar önem taşımaktadır.

Jankvist'e (2009) göre matematik tarihi, öğrenme ortamlarında amaç ya da araç olmak üzere iki farklı biçimde ele alınabilir. Matematik tarihinin, öğrencilerin başarısını ve motivasyonunu artırmaya yönelik bir destek unsuru olarak kullanılması, tarihsel bilginin araç olarak kullanımına örnek teşkil etmektedir. Buna karşılık, matematiğin zaman içerisindeki gelişimi, farklı kültürlerin matematiğe katkıları ve matematiksel düşüncenin evrimi üzerinde durulması ise matematik tarihinin amaç olarak kullanımı kapsamında değerlendirilmektedir. Fried (2001) ise matematik tarihinin öğretim sürecine dâhil edilmesinde iki temel stratejiden söz etmektedir. *Ekleme stratejisi* olarak adlandırılan ilk yaklaşımda, derslerde kısa tarihsel hikâyeler, anekdotlar ya da videolar aracılığıyla matematik tarihine yer verilmekte ve bu strateji daha çok öğrencilerin motivasyonunu artırmayı hedeflemektedir. *Uyarlama stratejisi* olarak adlandırılan ikinci yaklaşımda ise, tarihsel bir problem ya da durum özgün bağlamına yakın bir biçimde ele alınarak sınıf ortamında tartışılmakta ve uygulamalı çalışmalarla derinleştirilmektedir. Uyarlama stratejisinin, matematiğin tarihsel gelişimini ve kültürel boyutunu anlamada daha etkili olduğu belirtilmektedir.

Baki ve Bütüner'in (2018) matematik tarihi temelli çalışmaları inceleyen kapsamlı meta-sentez araştırması, alan yazında matematik tarihinin çoğunlukla araç anlamıyla kullanıldığını ortaya koymaktadır. Ayrıca bu çalışmalarda katılımcı gruplarının ortaokuldan lisans düzeyine kadar geniş bir yelpazede dağıldığı görülmektedir. Öğretmen adaylarıyla gerçekleştirilen ve bu çalışmayla benzer bir odak taşıyan araştırmalar da ulusal alan yazında yer almakta olup, öğretmen adaylarının matematik tarihi derslerine ilişkin görüş ve tutumlarını inceleyen çalışmalar bulunmaktadır (Yenilmez, 2011).

Arşimet'in Π Yöntemi ve Öğretim Potansiyeli

Önceki çalışmalar değerlendirildiğinde, matematik tarihine dayalı etkinliklerin özellikle uyarlama stratejisi ile yapılandırılmasının, öğrencilerin matematiksel kavramları anlamlandırma süreçlerine önemli katkılar sunduğu görülmektedir. Bu noktada π sayısının tarihsel gelişimi ve Arşimet'in çokgenlere dayalı yaklaşımı, matematik tarihinin öğretim sürecine anlamlı biçimde entegre edilebileceği güçlü bir örnek oluşturmaktadır. Arşimet'in içten ve dıştan düzgün çokgenler kullanarak π sayısını alt ve üst sınırlar arasında sıkıştırmaya dayalı yöntemi, π'nin sabit bir sayıdan ziyade bir yaklaşım süreci olarak ele alınmasına imkân tanımakta; aynı zamanda ölçme, oran, sınır ve yakınsama gibi temel matematiksel fikirlerin sezgisel olarak yapılandırılmasını desteklemektedir. Bu yönüyle Arşimet'in π etkinliği, öğrencilerin yalnızca sonuca odaklanmak yerine matematiksel düşünme süreçlerini deneyimlemelerine olanak sağlayan, tarihsel bağlamı korunmuş bir öğrenme ortamı sunmaktadır. Dolayısıyla bu tür bir etkinlik, matematik tarihinin araç olmanın ötesine geçerek kavramsal anlamayı derinleştiren ve matematiğin insan ürünü doğasını görünür kılan bir öğretim yaklaşımı olarak değerlendirilebilir. Bu yaklaşımın öğretmen aayları üzerindeki yansımasını araştırmak, öğretim ve uygulama sürecine yönelik önemli ipuçları sağlayacaktır. Bu nedenle bu çalışmanın amacı, matematik tarihine dayalı bir etkinlik olan Arşimet'in π

değerini hesaplama yönteminin öğretmen adayları tarafından nasıl değerlendirildiğini ve öğrenme sürecine katkılarının nasıl algılandığını incelemektir.

Yöntem

Araştırma Deseni

Bu çalışma, öğretmen adaylarının matematik tarihi temelli bir öğrenme etkinliği olarak Arşimet'in çokgen yöntemine dayalı π yaklaşımını nasıl değerlendirdiklerini incelemeyi amaçlayan nitel bir araştırma olarak tasarlanmıştır. Araştırmada, katılımcıların bir öğrenme etkinliğine ilişkin algılarını, yorumlarını ve anlamlandırma biçimlerini ortaya koymak hedeflendiğinden, nitel araştırma yaklaşımlarından durum çalışması deseni benimsenmiştir. Bu desen, belirli bir öğretim sürecinin katılımcılar üzerindeki yansımalarını bütüncül biçimde ele almaya olanak tanımaktadır.

Katılımcılar

Araştırmanın katılımcılarını, bir devlet üniversitesinin ilköğretim matematik öğretmenliği programında öğrenim gören 20 öğretmen adayı oluşturmaktadır. Katılımcıların belirlenmesinde gönüllülük esas alınmış, araştırmaya katılım tamamen isteğe bağlı olarak gerçekleştirilmiştir. Öğretmen adaylarının tamamı, lisans eğitimleri sürecinde çember ve daire konularını kapsayan temel matematik derslerini almıştır; bu nedenle π sayısına ilişkin formal tanımlarla karşılaşmış ve bu tanımlara yönelik temel bir farkındalık geliştirmiş oldukları varsayılmıştır.

Etkinliğin Tanımı ve Uygulama Süreci

Araştırma kapsamında, matematik tarihine dayalı uyarlama stratejisi esas alınarak geliştirilen Arşimet'in π yöntemini içeren bir öğrenme etkinliği (King, 2013) uygulanmıştır. Etkinlikte, Arşimet'in bir çemberin içine ve dışına çizdiği düzgün çokgenler aracılığıyla π sayısını alt ve üst sınırlar arasında sıkıştırmaya dayalı yaklaşımı temel alınmıştır. Öğretmen adaylarından, çokgen kenar sayısının artmasıyla elde edilen çevre uzunluklarının çember çevresine nasıl yaklaştığını incelemeleri, bu süreci matematiksel olarak yorumlamaları ve π sayısını bir yaklaşım süreci olarak değerlendirmeleri istenmiştir.

Etkinlik, sınıf ortamında araştırmacı rehberliğinde yürütülmüş; adaylara hazır formüller sunulmamış, bunun yerine Arşimet'in tarihsel yöntemi bağlamında düşünmeleri teşvik edilmiştir. Etkinlik sürecinde adayların bireysel çalışmaları desteklenmiş, gerekli görülen noktalarda yönlendirici sorularla tartışma ortamı oluşturulmuştur.

Veri Toplama Araçları

Araştırmada veri toplama aracı olarak, Arşimet'in çokgen yöntemine dayalı π yaklaşımını içeren ve etkinlik sonrasında öğretmen adaylarına uygulanan açık uçlu sorulardan oluşan bir form kullanılmıştır. Bu form, öğretmen adaylarının etkinliği nasıl anlamlandırdıklarını ve değerlendirdiklerini ortaya koymayı amaçlayacak şekilde hazırlanmıştır. Açık uçlu sorular aracılığıyla adayların; etkinliğin matematiğe bakış açılarını nasıl etkilediği, π sayısına ilişkin matematiksel anlamlarını nasıl yapılandırdıkları ve etkinliğin uygulanabilirlik potansiyeline ilişkin görüşleri incelenmiştir. Böylece öğretmen adaylarının, matematiği yalnızca sonuç odaklı bir alan olarak mı yoksa tarihsel süreçler ve kavramsal ilişkiler üzerinden yapılandırılan bir düşünme alanı olarak mı değerlendirdikleri belirlenmeye çalışılmıştır.

Veri Analizi

Bu kapsamda elde edilen yazılı verilerin çözümlenmesinde, öğretmen adaylarının Arşimet'in çokgen yöntemine dayalı π yaklaşımını nasıl anlamlandırdıklarını ve etkinliği hangi boyutlarda değerlendirdiklerini ortaya koymak amacıyla nitel veri analiz yöntemlerinden içerik analizi kullanılmıştır. İçerik analizi, nitel verilerde tekrar eden anlam birimlerini, temaları ve örüntüleri belirlemeye olanak tanıyan sistematik bir çözümleme yaklaşımıdır ve katılımcı görüşleri arasındaki benzerlik ve farklılıkların ortaya konulmasında etkili bir yöntem olarak kullanılmaktadır (Miles, Huberman, & Saldaña, 2014). Analiz sürecinde, öğretmen adaylarının yanıtları matematiğe bakış açısı, matematiksel anlam ve etkinliğin işlevselliği boyutları çerçevesinde incelenmiş; bu boyutlar doğrultusunda ortaya çıkan temalar aracılığıyla etkinliğin öğretmen adayları üzerindeki yansımaları bütüncül bir biçimde yorumlanmıştır.

Tema ve kodlar, öğretmen adaylarının Arşimet'in çokgen yöntemine dayalı π etkinliğine ilişkin yazılı yanıtlarının tekrarlı ve ayrıntılı okunması yoluyla tümevarımsal bir yaklaşımla oluşturulmuştur. Öncelikle veriler açık kodlama sürecinden geçirilmiş; öğretmen adaylarının ifadelerinde öne çıkan kavramlar, vurgular ve anlam birimleri belirlenmiştir. Bu aşamada adayların matematiğe bakış açılarında, π sayısına ilişkin kavramsal anlamlandırmalarında ve etkinliğin öğretimsel işlevine yönelik değerlendirmelerinde ortaya çıkan benzerlikler ve farklılıklar dikkate alınmıştır. Ardından, benzer özellikler gösteren kodlar bir araya getirilerek daha üst düzey kavramsal yapılar olan temalar altında toplanmıştır. Tema oluşturma sürecinde alan yazında matematik tarihi kullanımı, kavramsal öğrenme ve matematiği süreç olarak ele alma yaklaşımlarına ilişkin kuramsal çerçeveden yararlanılmış; böylece elde edilen temaların hem veriye dayalı hem de kuramsal olarak temellendirilmiş olmasına özen gösterilmiştir. Bu süreç sonunda öğretmen adaylarının etkinliği matematiğe bakış açısı, matematiksel anlam ve işlevsellik boyutlarında değerlendirdikleri üç ana tema belirlenmiştir.

Tablo 1: Kodlama şeması

Bulgular

Nitel analizden elde edilen bulgular frekans ve yüzde tablosu ile sunulmuştur.

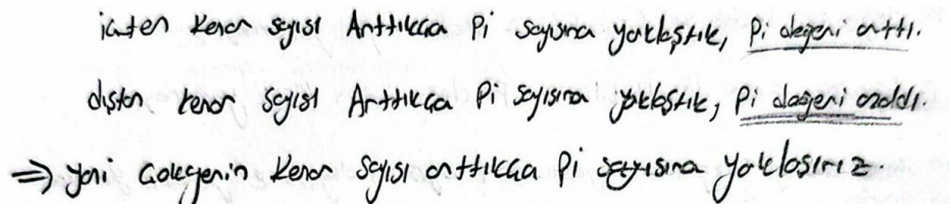
Matematiğe Bakış Açısı											
Adım adım		Yaklaşma		Süreç		Deneme		Keşfetme		Mantığını görme	
f	%	f	%	f	%	f	%	f	%	f	%
2	9	9	40	1	5	3	14	3	14	4	18

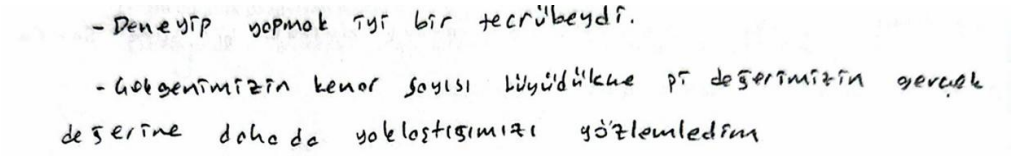
Matematiğin insan ürünü ve tarihsel gelişimi							
Tarihte böyle yapılmış		Archimedes'in bulması		Matematik gelişir		İnsanlar üretiyor	
f	%	f	%	f	%	f	%
5	25	2	10	9	18	4	20

İşlevsellik					
Uygulanabilir		Revizyon gerekli		Uygulanamaz	
f	%	f	%	f	%
		20	100		

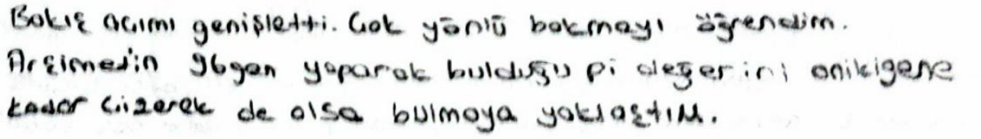
Tablo 2: Frekans ve yüzdeler

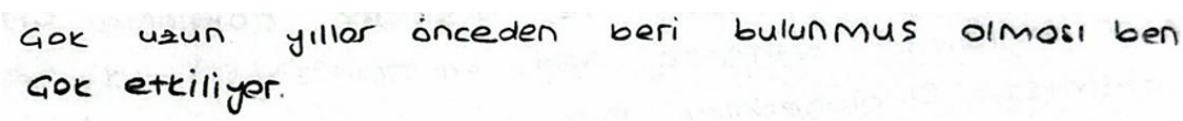
Matematiğe bakış açısı temasına ilişkin öğretmen adayı görüşleri aşağıdaki gibidir:



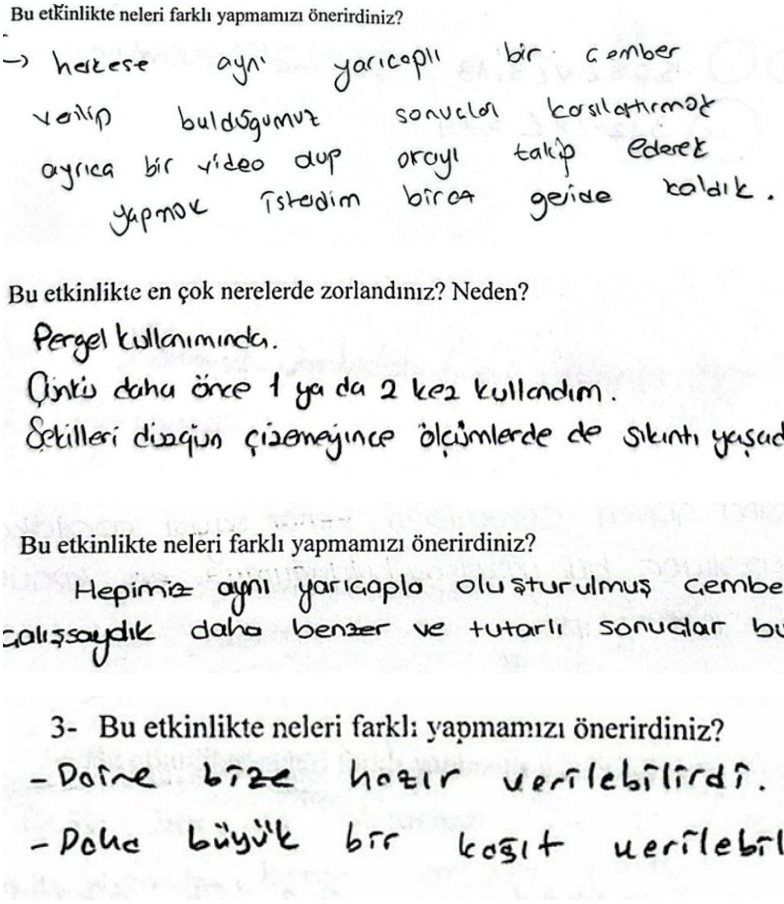


Matematiğin insan ürünü ve tarihsel gelişimi temasına ilişkin öğretmen adayı görüşleri aşağıdaki gibidir:





İşlevsellik temasına ilişkin öğretmen adayı görüşleri aşağıdaki gibidir.



Tablo 2 incelendiğinde, öğretmen adaylarının Arşimet'in çokgen yöntemine dayalı π etkinliğini değerlendirirken matematiğe bakış açılarında sonuç odaklılıktan ziyade süreç ve yaklaşım vurgusunun öne çıktığı görülmektedir. Adayların en yüksek oranda (%40, f=9) matematiği bir yaklaşma süreci olarak ifade etmeleri, etkinliğin π sayısını sabit ve değişmez bir değer olmaktan çok, alt–üst sınırlar arasında sıkışan ve giderek hassaslaşan bir süreç olarak kavratma potansiyeline sahip olduğunu düşündürmektedir. Buna karşın matematiği doğrudan "süreç" kavramıyla ifade eden aday sayısının (%5, f=1) görece düşük olması, adayların süreç fikrini daha çok dolaylı kavramlar (yaklaşma, deneme, keşfetme) üzerinden dile getirdiklerini göstermektedir. Deneme (%14, f=3), keşfetme (%14, f=3) ve "mantığını görme" (%18, f=4) gibi göstergeler ise etkinliğin öğretmen adaylarında matematiksel düşünmeye ilişkin sezgisel ve anlamaya dayalı bir farkındalık oluşturduğunu ortaya koymaktadır. Matematiğin insan ürünü ve tarihsel gelişimine ilişkin bulgular, adayların önemli bir bölümünün matematiği zamansal ve kültürel bir bağlam içinde değerlendirdiğini göstermektedir. Adayların %25'inin (f=5) "tarihte böyle yapılmış" ifadesini kullanması ve %18'inin (f=9) matematiğin gelişen bir alan olduğunu vurgulaması, Arşimet'in yönteminin matematiğin durağan değil, tarihsel süreçte inşa edilen bir bilgi alanı olarak algılanmasına katkı sağladığını düşündürmektedir. Bununla birlikte Arşimet'in adının doğrudan anılması (%10, f=2) görece sınırlı kalmış; bu durum, adayların tarihsel kişilikten ziyade yöntemin ortaya koyduğu düşünme biçimine odaklandıklarını göstermektedir. "İnsanlar üretiyor" ifadesinin (%20, f=4) kullanılması da matematiğin insan ürünü olma niteliğinin adaylar tarafından fark edildiğini desteklemektedir.

Etkinliğin işlevselliğine ilişkin bulgular ise dikkat çekici bir biçimde tek yönlü bir eğilim sergilemektedir. Öğretmen adaylarının tamamı (%100, f=20) etkinliği "revizyon gerekli" olarak değerlendirmiştir. Hiçbir aday etkinliği doğrudan uygulanabilir ya da tamamen uygulanamaz olarak nitelendirmemiştir. Bu sonuç, Arşimet'in π yöntemine dayalı etkinliğin kavramsal açıdan

değerli ve öğretim potansiyeli yüksek bulunduğunu; ancak sınıf düzeyi, süre, öğrenci hazırbulunuşluğu ve öğretim ortamına uyarlama açısından yeniden düzenlenmesi gerektiğinin düşünüldüğünü göstermektedir. Bu yönüyle tablo, öğretmen adaylarının matematik tarihi temelli etkinliklere eleştirel fakat yapıcı bir bakış açısıyla yaklaştıklarını ortaya koymaktadır.

Sonuç

Bu çalışmada, matematik tarihi temelli bir öğrenme etkinliği olarak Arşimet'in çokgen yöntemine dayalı π yaklaşımının öğretmen adayları tarafından nasıl değerlendirildiği incelenmiştir. Elde edilen bulgular, söz konusu etkinliğin öğretmen adaylarının matematiğe bakış açılarında, matematiksel bilginin doğasına ilişkin algılarında ve öğretimsel işlevselliğine yönelik değerlendirmelerinde anlamlı yansımalar oluşturduğunu göstermektedir.
Öğretmen adaylarının büyük bir kısmı, etkinliği matematiği sabit ve yalnızca sonuç odaklı bir bilgi alanı olarak görmekten ziyade, yaklaşma, deneme, keşfetme ve gerekçelendirme süreçleri içeren bir yapı olarak değerlendirmiştir. Özellikle matematiğin bir "yaklaşma süreci" olarak ifade edilmesi, Arşimet'in yönteminin π sayısını değişmez bir sayıdan çok, alt ve üst sınırlar arasında giderek hassaslaşan bir değer olarak kavratma potansiyeline sahip olduğunu ortaya koymaktadır. Bu durum, etkinliğin matematiksel düşünmenin süreç boyutunu görünür kıldığına işaret etmektedir.

Bulgular ayrıca, öğretmen adaylarının matematiği önemli ölçüde insan ürünü ve tarihsel olarak gelişen bir bilgi alanı şeklinde algıladıklarını göstermektedir. Adayların matematiğin zaman içerisinde geliştiğini ve insanlar tarafından üretildiğini vurgulamaları, matematik tarihine dayalı etkinliklerin matematiğin kültürel ve insani boyutunu fark ettirme açısından etkili olabileceğini düşündürmektedir. Bu yönüyle Arşimet'in π yaklaşımı, matematik tarihinin yalnızca motivasyon artırıcı bir unsur değil, kavramsal anlamayı destekleyen bir öğrenme aracı olarak kullanılabileceğini ortaya koymaktadır. Etkinliğin işlevselliğine ilişkin değerlendirmeler incelendiğinde, tüm öğretmen adaylarının etkinliği doğrudan uygulanabilir bulmamakla birlikte, revizyon gerektiren ancak öğretim açısından değerli bir etkinlik olarak nitelendirdikleri görülmüştür. Bu bulgu, öğretmen adaylarının matematik tarihi temelli etkinliklere eleştirel fakat yapıcı bir bakış açısıyla yaklaştıklarını; etkinliğin sınıf düzeyine, süreye ve öğrenci özelliklerine göre yeniden yapılandırılması gerektiğini düşündüklerini göstermektedir. Bu bulgu önceki çalışmalarla uyumludur (Galante, 2014; Yenilmez, 2011; Oflaz, 2022).

Sonuç olarak, Arşimet'in çokgen yöntemine dayalı π etkinliği, öğretmen adaylarının matematiği süreç, tarih ve insan ürünü bağlamında yeniden düşünmelerine olanak tanımış; matematik tarihinin öğretim sürecine uyarlama stratejisiyle entegre edilmesinin güçlü bir öğretim potansiyeli taşıdığını ortaya koymuştur. Bu bulgular, öğretmen eğitimi programlarında matematik tarihi temelli etkinliklere daha sistematik ve bilinçli biçimde yer verilmesi gerektiğine işaret etmektedir.

ORCID ID: 0000-0002-1135-0327

ÖZET

Bu çalışmanın amacı, okullarda çevik liderlik yaklaşımının eğitim yönetimine olan katkılarını incelemek ve okul yöneticilerinin çevik liderlik davranışlarını bu bağlamda incelemektir. Günümüzde eğitim kurumları; hızlı değişen müfredatlar, teknolojik dönüşüm ve farklılaşan öğrenci ve veli beklentileriyle baş etmeye çalışmaktadır. Bu durum, okul yöneticilerinin esnek, uyum sağlayabilen ve katılımcı liderlik yaklaşımlarını benimsemelerini gerekli kılmaktadır. Çevik liderlik bu ihtiyaçlara cevap arayan çağdaş bir liderlik yaklaşımı olarak dikkat çekmektedir. Araştırmada, nitel araştırma yaklaşımı çerçevesinde literatür taraması yöntemi kullanılmıştır. Eğitimde liderlik, çevik liderlik ve okul yönetimi alanlarında yayımlanmış güncel çalışmalar incelenmiş ve elde edilen veriler betimsel analiz yöntemiyle değerlendirilmiştir. İncelenen kaynaklar, çevik liderlik özelliklerine sahip okul yöneticilerinin öğretmenlerle daha etkili iletişim kurduğunu, iş birliğine dayalı bir çalışma ortamı oluşturduğunu ve yenilikçi uygulamaların desteklenmesine katkı sağladığını göstermektedir. Ayrıca bu liderlik yaklaşımının öğretmen motivasyonu ve mesleki gelişim üzerinde olumlu etkiler yarattığı belirlenmiştir. Araştırma sonuçları, okullarda çevik liderlik anlayışının benimsenmesinin değişime uyum sağlama kapasitesini artırdığını ve okulun örgütsel etkililiğine katkı sunduğunu ortaya koymaktadır. Bu bağlamda çevik liderlik, eğitim yönetiminde etkili ve sürdürülebilir bir yaklaşım olarak değerlendirilmektedir.

Anahtar Kelimeler: Liderlik, okul, çevik liderlik.

1. GİRİŞ

Günümüz eğitim kurumları, dijitalleşme, çeşitlenen öğrenci profilleri ve beklenmedik krizlerle hızla değişen bir çevrede faaliyet göstermektedir. Bu durum, geleneksel, hiyerarşik ve merkeziyetçi yönetim anlayışlarının yetersiz kalmasına yol açmakta ve okul liderlerini esnek, uyarlanabilir ve iş birliğine dayalı liderlik yaklaşımlarını benimsemeye zorlamaktadır (Harris ve Jones, 2020; Bush, 2008). Özellikle COVID-19 sonrası dönemde, hızlı karar alma, kriz yönetimi ve paydaşlarla etkin iletişim kurma becerileri kritik hale gelmiştir (Netolicky, 2020).

Çevik liderlik (agile leadership), yazılım sektöründeki Agile Manifestosu ilkelerinden esinlenerek okul yönetimine uyarlanmıştır. Bu yaklaşım, sürekli öğrenme, kısa döngülerle geri bildirim alma, şeffaf iletişim ve dijital araçların etkin kullanımını temel alır (Beck vd., 2001; Denning, 2018). Eğitim bağlamında çevik liderler, belirsizlik koşullarında hızlı ve esnek kararlar alırken öğretmenlerle iş birliği yaparak okulda yenilikçi ve uyarlanabilir bir kültür oluştururlar (Çakır ve Bilgivar, 2024; Rakhmadi vd., 2025).

2. ÇEVİK LİDERLİĞİN TEMEL İLKELERİ

Çevik liderliğin temel ilkelerinden biri esneklik ve hızlı uyarlanmadır. Liderler, müfredat değişiklikleri, dijitalleşme ve beklenmedik krizler karşısında hızlı tepki vererek planlama süreçlerini yeniden düzenleyebilir ve kısa döngüler halinde hareket edebilir (Kotter, 1995; Weick, 1995). İkinci ilke, yetki paylaşımı ve katılımcı yönetimdir. Karar alma süreçleri tek bir merkezde toplanmak yerine, öğretmenler, öğrenciler ve veliler sürece dâhil edilerek okula yönelik aidiyet ve kararların uygulanabilirliği artırılır (Woods, 2005; Harris, 2008). Sürekli geri bildirim çevik liderliğin bir diğer temel ilkesidir. Kısa aralıklarla yapılan değerlendirmeler, uygulamaların etkililiğini izleme ve iyileştirme fırsatı sunar; öğretmen, öğrenci ve veli görüşleri önemli veri kaynaklarıdır (Hattie ve Timperley, 2007). Ayrıca çevik liderler öğrenmeye açık bir yaklaşım benimser. Değişimi fırsat olarak görerek okulda güven temelli iletişim ve sürekli gelişim kültürü oluştururlar (Fullan, 2001; Senge, 2006).

Son olarak, çevik liderlik insan odaklıdır. Öğretmenlerin motivasyonu, iş yükü dengesi ve psikolojik güven ortamı önceliklidir. Psikolojik olarak güvenli ve destekleyici bir okul iklimi, yenilikçilik ve öğrenme süreçlerini güçlendirir (Schein, 2010; Edmondson, 1999). Bu temel ilkeler, çevik liderliğin eğitim kurumlarında değişime uyum sağlama, iş birliğini güçlendirme ve sürdürülebilir gelişimi destekleme kapasitesini ortaya koymaktadır.

3. ÇEVİK LİDERLERDE OLMASI GEREKEN YETKİNLİKLER

Çevik liderlerin sahip olması gereken temel yetkinliklerden ilki iletişim becerisidir; liderler paydaşlarla açık, sürekli ve şeffaf iletişim kurarak güven ve iş birliğini inşa eder (Denning, 2018; Çakır ve Bilgivar, 2024). İkinci yetkinlik hızlı karar almadır; çevik liderler kısa döngülerle esnek ve etkin kararlar alarak stratejik ve operasyonel süreçlerde etkinliği artırır (Kotter, 1995). Üçüncü yetkinlik güven oluşturmadır; psikolojik güven ortamı, yenilikçi fikirlerin gelişmesini ve okul topluluğunun birlikte hareket etme kapasitesini güçlendirir (Edmondson, 1999; Schein, 2010). Dördüncü yetkinlik yetki devretmedir; görev ve sorumlulukların paylaşımı hem motivasyonu artırır hem de okulun değişen koşullara hızlı uyum sağlamasına katkıda bulunur (Aslan ve Aytaç, 2025). Beşinci yetkinlik empatidir; paydaşların ihtiyaç ve duygularını anlamak, öğretmen memnuniyetini ve bağlılığı güçlendirir (Fullan, 2014; Çakır ve Bilgivar, 2024). Altıncı yetkinlik veri temelli düşünmedir; çevik liderler planlama ve değerlendirmede veriyi kullanarak sürekli iyileştirme döngülerini işler hale getirir (Aslan ve Aytaç, 2025; Senge, 2006). Yedinci yetkinlik problem çözmedir; lider, karmaşık durumlarda hızlı ve etkili çözümler üretir (Weick, 1995). Sekizinci ve son yetkinlik yeniliklere açıklıktır;

çevik liderler okulda öğrenmeye, dijital dönüşüme ve yeni yaklaşımlara açık bir kültür teşvik eder (Senge, 2006; Denning, 2018). Bu yetkinlikler, çevik liderliği yalnızca bir yönetim yaklaşımı değil, okulun stratejik ve operasyonel başarısını destekleyen kapsamlı bir beceri seti hâline getirmektedir.

4. OKULLARDA ÇEVİK LİDERLİK YAKLAŞIMININ UYGULANMASI

Çevik liderlik uygulamaları arasında esnek ve uyarlanabilir karar alma, kararların kısa döngülerle gözden geçirilmesi ve bağlama duyarlı biçimde uygulanması; katılımcı yönetim, öğretmen, öğrenci ve velilerin karar süreçlerine dâhil edilmesi ve sürekli geri bildirim, kısa değerlendirme toplantıları ve plan güncellemeleri yer almaktadır (Weick, 1995; Woods, 2005). Dijital ve yenilik odaklı yaklaşım, teknolojinin ve veri kullanımının süreçlere entegre edilmesini destekler; çevik liderler dijital araçları yönetim ve katılım süreçlerini hızlandırmak için kullanır (Castells, 2010; Fullan, 2014; Raptis vd., 2024; Taşdemir vd., 2024). Kısa döngülü planlama (sprint mantığı), iki- dört haftalık hedeflerle sürecin izlenmesini sağlar ve geri bildirim döngülerini güçlendirir (Neumann ve Baumann, 2021). Bunun yanında çevik toplantılar, kısa ve odaklı toplantılarla sorunların hızlı tespiti ve çözüm üretimini kolaylaştırır; mini proje takımları, öğretmen ve öğrencilerin küçük ekiplerde inisiyatif almasını ve hızlı uyum göstermesini sağlar (Rakhmadi vd., 2025; Fernandes, Dinis Carvalho ve Ferreira Oliveira, 2021). Görsel yönetim araçları ise süreçlerin şeffaf ve izlenebilir olmasına katkıda bulunur (Rakhmadi vd., 2025). Sonuç olarak, postmodern ve çevik liderlik ilkeleri, okullarda esnek, katılımcı, veri temelli ve yenilikçi bir yönetim kültürü oluşturarak hem stratejik hedeflere ulaşmayı hem de sürekli iyileşme ve öğrenme kültürünü destekler.

5. ÇEVİK LİDERLİĞİN OKULDA SAĞLADIĞI FAYDALAR VE ARAŞTIRMALAR

Çevik liderlik, okul yöneticilerini yalnızca karar verici konumundan çıkararak, öğretmen, öğrenci ve diğer paydaşları sürece dahil eden bir liderlik yaklaşımı sunar (Çakır ve Bilgivar, 2024). Araştırmalar, çevik liderlik özelliklerinin okul kültüründe “destek kültürü”, “başarı kültürü” ve “görev kültürü” boyutlarını güçlendirdiğini, bürokratik kültür üzerinde ise anlamlı etkisinin bulunmadığını göstermektedir (Çakır ve Bilgivar, 2024). Aslan ve Aytaç (2025) çevik liderliği değerlerle liderlikte çeviklik, duygusal çeviklik, dijital çeviklik ve proaktiflik olmak üzere dört faktörle tanımlamış ve bu faktörler üzerinden ölçme araçları geliştirmiştir.

Araştırmalar, çevik liderliğin okul performansı, öğretmen davranışları ve okul kültürü üzerinde olumlu etkiler yarattığını ortaya koymaktadır. Örneğin, Baydar (2023) çevik liderliğin öğretmenlerin yenilikçi davranışlarını artırdığını, Gezer ve Gönülalan (2025) ise ilkokul müdürlerinin çevik liderlik özelliklerinin kriz yönetim becerilerini güçlendirdiğini tespit etmiştir. Delioğlu ve Uysal (2022) çevik liderliğin dijital dönüşüm süreçlerinde kritik rol oynadığını, Witthöft, Aydin ve Pietsch (2024) ise liderlerin dijital yenilikleri stratejik biçimde yönetmelerinin okul gelişimini desteklediğini göstermiştir. Son olarak, çevik liderlik okul etkililiğini artırmaktadır. Yılmaz ve Özgenel (2023) çevik liderlik ile okul etkililiği ve öğretmenlerin yenilik yönetimi yetkinlikleri arasında pozitif ilişkiler olduğunu; Porkodi (2024) ise meta-analizinde çevik liderliğin örgütsel performans ve etkinlik göstergeleriyle güçlü pozitif ilişkiler taşıdığını ortaya koymuştur.

6. ÇEVİK LİDERLİĞİN OKULDA UYGULAMADA KARŞILAŞILAN ZORLUKLAR

Çevik liderlik, okulda birçok fayda sağlasa da çeşitli zorluklar da beraberinde gelir. Geleneksel, hiyerarşik yönetim anlayışına alışmış yöneticiler için esnek süreçler sıklıkla kontrol kaybı olarak algılanabilir; bu durum kararsızlık, sürecin yavaşlaması veya örgüt içi çatışmalara yol açabilir (Argyris ve Schön, 1996; Kotter, 1995). Yetki paylaşımı ve katılımcı karar alma

süreçlerine uyum sağlamak, liderin rolünü ve öğretmenlerin inisiyatif kullanımını yeniden tanımlamasını gerektirir.

Öğretmenlerin değişime direnci, çevik uygulamalarda sık rastlanan bir sorundur. Yeni iş akışları, kısa döngülü planlamalar ve mini proje takımlarına uyum zaman alabilir; alışılmış yöntemlerin terk edilmesi zor olabilir (Rakhmadi vd., 2025). Bu direnci aşmak için sürekli geri bildirim, güven oluşturan iletişim ve eğitim destekleri kritik öneme sahiptir. Kısa döngülü çevik süreçler, zaman yönetimi açısından da zorluklar yaratabilir. Planlama, uygulama ve değerlendirme mekanizmalarının yoğunluğu, öğretmenler ve yöneticiler için ek iş yükü oluşturabilir; etkili yürütülmesi dikkatli planlama ve rol dağılımı gerektirir (Delioğlu ve Uysal, 2022; Fernandes vd., 2021).

Teknoloji ve dijital araçların etkin kullanılmaması, çevik liderliğin uygulanmasını engelleyebilir. Trello, Kanban panoları ve görev takip yazılımları gibi araçların yetersizliği veya yanlış kullanımı, süreçlerin şeffaflığını, izlenebilirliğini ve hızlı geri bildirim mekanizmalarını olumsuz etkiler (Castells, 2010; Aslan ve Aytaç, 2025). Bu bağlamda, çevik liderlik uygulamalarında başlıca zorluklar; geleneksel yönetim alışkanlıkları, öğretmen direnci, kısa döngülü süreçlerin iş yükü yaratması ve dijital araçların etkin kullanılmaması olarak özetlenebilir.

7. SONUÇ

Çevik liderlik, modern okul yönetiminde hızla değişen koşullar, belirsizlik ve katılımcı yönetim ihtiyacına yanıt veren etkili bir yaklaşımdır. Esneklik, yetki paylaşımı, sürekli geri bildirim, öğrenmeye açıklık ve şeffaflık gibi temel değerler üzerine inşa edilen çevik liderlik, okulların akademik ve örgütsel açıdan daha yenilikçi, dayanıklı ve öğrenmeye açık bir yapıya kavuşmasını sağlar (Rakhmadi vd., 2025). Bu yaklaşım, öğretmenlerin motivasyonunu artırır, öğrencilerin öğrenme sürecine katılımını güçlendirir ve okul kültürünü sürekli gelişime açık hale getirir (Çakır ve Bilgivar, 2024).

Çevik liderler, stratejik planlamayı kısa döngüler halinde uygular, yenilikçi projeleri destekler ve mini proje takımları ile çevik toplantılar aracılığıyla öğretmenlerin inisiyatif almasını teşvik eder (Fullan, 2014). Kısa döngülü planlama ve düzenli geri bildirim mekanizmaları, okulun değişen koşullara hızlı uyum göstermesini ve eğitim süreçlerinin esnek, ölçülebilir ve yönetilebilir olmasını sağlar. Buna karşın, çevik liderliğin uygulanması bazı zorluklar da içerir. Geleneksel yönetim kültürüne alışmış yöneticiler esnek süreçleri kontrol kaybı olarak algılayabilir; öğretmenlerin değişime direnci, teknoloji kullanımındaki eksiklikler ve zaman yönetimi sorunları uygulamaların etkinliğini sınırlayabilir (Argyris ve Schön, 1996; Aslan ve Aytaç, 2025). Bu nedenle çevik liderliğin başarılı uygulanması, bireysel liderlik becerilerinin yanı sıra örgüt kültüründe dönüşüm, sistematik liderlik gelişimi ve paydaşlarla sürekli iş birliğini gerektirir.

Sonuç olarak, çevik liderlik modern okul yönetimi için yalnızca bir yöntem güncellemesi değil; okul kültürünü kapsayıcı, yenilikçi ve öğrenmeye açık bir yapıya dönüştüren stratejik bir modeldir. Esnek, uyum sağlayabilen, katılımcı ve veriye dayalı karar alma süreçlerini güçlendirerek okulun iç gelişimini ve dış çevreyle uyumunu artırır, öğretmen ve öğrenci performansını yükseltir (Fullan, 2014; Senge, 2006).

OKUL YÖNETİMİNDE SÜRDÜRÜLEBİLİR LİDERLİK

Prof. Dr. Semiha ŞAHİN

Dokuz Eylül Üniversitesi

semiha.sahin@deu.edu.tr

ORCID ID: 0000-0002-1135-0327

ÖZET

Bu bildirinin amacı, okul müdürlerinin sürdürülebilir liderliği kavramının çevre ve iklim değişikliği bağlamında nasıl ele alındığını ortaya koymaktır. Günümüzde sürdürülebilir liderlik, çoğunlukla çevresel sürdürülebilirlik, doğal kaynakların korunması ve iklim değişikliğiyle mücadele temalarıyla ilişkilendirilmektedir. Bu çerçevede okul müdürlerinin, eğitim kurumlarını çevreye duyarlı, iklim bilinci yüksek ve sürdürülebilir yaşam alışkanlıklarını destekleyen yapılar hâline getirmedeki liderlik rolleri vurgulanmaktadır. Sürdürülebilir liderlik, okulun yalnızca bugünkü başarısına değil, gelecekteki gelişimine de odaklanan bütüncül bir yönetim yaklaşımı olarak değerlendirilmektedir. Bu bağlamda okul yöneticilerinin vizyoner, etik ve katılımcı liderlik rollerinin önemi vurgulanmaktadır. Araştırmada, nitel araştırma yaklaşımı doğrultusunda alan yazın incelemesine dayalı olarak hazırlanmıştır. Çevresel sürdürülebilirlik, iklim değişikliği eğitimi ve okul liderliği konularında yapılmış ulusal ve uluslararası çalışmalar incelenmiş; okul müdürlerinin bu süreçte üstlendikleri sorumluluklar analiz edilmiştir. Alan yazın incelemesi sonucunda, okul müdürlerinin sürdürülebilir liderliği çevre dostu okul politikaları geliştirme, enerji ve kaynak kullanımında tasarrufu teşvik etme, geri dönüşüm uygulamalarını yaygınlaştırma ve iklim değişikliği farkındalığını artıran eğitim faaliyetlerini destekleme ile ilişkilendirilmektedir. Ayrıca çevre temelli projelerde öğretmen, öğrenci ve velilerin sürece dâhil edilmesinin okul kültürünü güçlendirdiği ve çevresel sorumluluk bilincini artırdığı görülmüştür. Ayrıca okul yönetiminde sürdürülebilir liderlik, değişen eğitim ihtiyaçlarına uyum sağlayabilen, öğrenen ve gelişen okul yapılarının oluşturulmasında kritik bir role sahiptir. Bu liderlik yaklaşımı, okulun kurumsal sürekliliğini sağlarken eğitimde kalite ve kalıcılığın artırılmasına önemli katkılar sunmaktadır.

Anahtar Kelimeler: Liderlik, okul, sürdürülebilir liderlik

1. GİRİŞ

Küreselleşme, hızlı nüfus artışı, sanayileşme ve doğal kaynakların aşırı tüketimi, çevresel sorunları ve iklim değişikliğini günümüzün en önemli küresel gündem maddeleri hâline getirmiştir (UNESCO, 2017; IPCC, 2023). İklim değişikliği yalnızca çevresel değil; ekonomik, sosyal ve eğitsel boyutları olan çok yönlü bir sorun olarak değerlendirilmektedir (OECD, 2021). Bu bağlamda sürdürülebilirlik kavramı, bugünün ihtiyaçlarını karşılarken gelecek nesillerin ihtiyaçlarını tehlikeye atmama anlayışını temel alan bir yaklaşım olarak öne çıkmaktadır (World Commission on Environment and Development-WCED, 1987). Sürdürülebilirlik anlayışı, çevresel koruma ile birlikte sosyal eşitlik ve ekonomik kalkınmayı da kapsayan bütüncül bir yaklaşımı ifade etmektedir.

Eğitim kurumları, sürdürülebilir kalkınma hedeflerinin gerçekleştirilmesinde kilit bir rol üstlenmektedir. Okullar, bireylerin çevreye duyarlı tutum ve davranışlar geliştirmesinde etkili sosyal yapılardır (Keleş, Ö. (2021). Bu nedenle okul yönetiminde sürdürülebilirlik temelli liderlik anlayışının benimsenmesi giderek daha fazla önem kazanmaktadır (Hargreaves ve Fink, 2005; OECD, 2020). Okul müdürleri, yalnızca akademik başarıdan sorumlu yöneticiler değil; aynı zamanda çevresel sorumluluk bilincini geliştiren, etik değerlere dayalı ve vizyoner liderler olarak değerlendirilmektedir. Eğitim liderlerinin sürdürülebilirlik odaklı yaklaşımları, okul kültürünün çevreye duyarlı bir yapıya dönüşmesinde belirleyici olmaktadır.

Bu çalışmayla, okul müdürlerinin sürdürülebilir liderlik rollerini çevre ve iklim değişikliği bağlamında ele almak ve alanyazına ile uygulamaya katkı sunmak amaçlanmaktadır. Araştırma, nitel araştırma yaklaşımı doğrultusunda alan yazın incelemesine dayalı olarak gerçekleştirilmiştir. Çevresel sürdürülebilirlik, iklim değişikliği eğitimi ve okul liderliği konularında yapılmış ulusal ve uluslararası akademik çalışmalar incelenmiştir. İncelenen kaynaklar tematik analiz yöntemiyle değerlendirilmiş ve okul müdürlerinin sürdürülebilir liderlik rollerine ilişkin bulgular analiz edilmiştir (Creswell ve Poth, 2016).

2. SÜRDÜRÜLEBİLİR LİDERLİK

Sürdürülebilir liderlik, liderliğin yalnızca kısa vadeli başarılar yerine uzun vadeli kurumsal gelişimi ve toplumsal faydayı hedeflemesini ifade etmektedir (Fullan, 2004). Hargreaves ve Fink'e (2005) göre sürdürülebilir liderlik; derinlik, süreklilik, adalet, çeşitlilik ve çevresel duyarlılık ilkelerine dayanmaktadır. Eğitim bağlamında sürdürülebilir liderlik, okulun yalnızca bugünkü performansını değil, gelecekteki öğrenme kapasitesini de geliştirmeyi amaçlamaktadır. Bu yaklaşım, değişime uyum sağlayabilen ve öğrenen okul yapılarının oluşturulmasını desteklemektedir (Day, Sammons ve Gorgen, 2016).

Sürdürülebilir liderlik anlayışı, etik değerlere dayalı, katılımcı ve paydaşları sürece dâhil eden bir yönetim yaklaşımını gerekli kılmaktadır. Bu liderlik modeli, kısa vadeli başarı ve performans göstergelerine odaklanmak yerine kurumun uzun vadeli gelişimini, toplumsal sorumluluğunu ve çevresel duyarlılığını esas alan bütüncül bir anlayışı ifade etmektedir (Fullan, 2014). Bu bağlamda sürdürülebilir liderlik, sürdürülebilirlik ilkeleriyle doğrudan ilişkilidir ve çevresel kaynakların korunmasını da yönetim süreçlerinin merkezine almaktadır (WCED, 1987).

Alan yazında sürdürülebilir liderlik kavramı özellikle Hargreaves ve Fink (2005) tarafından eğitim örgütleri bağlamında sistematik biçimde ele alınmıştır. Yazarlara göre sürdürülebilir liderlik; liderliğin kurum içinde derinleşmesini, zaman içinde devamlılık göstermesini ve bireyler ile çevre üzerinde olumsuz etkiler yaratmamasını hedeflemektedir. Bu yaklaşım,

liderliğin tek bir kişiye bağımlı olmadan kurumsallaşmasını ve paydaşlar arasında paylaşılmasını gerekli kılmaktadır (Leithwood ve Louis, 2012).

Sürdürülebilir liderliğin temel özellikleri arasında uzun vadeli vizyon, etik değerlere bağlılık, katılımcı karar alma, sosyal adalet ve çevresel sorumluluk yer almaktadır (Fullan, 2004; Bush, 2007). Bu bağlamda sürdürülebilir lider, yalnızca örgütsel başarıyı artırmayı değil, aynı zamanda toplumsal fayda üretmeyi ve gelecek kuşaklara yaşanabilir bir çevre bırakmayı da gözetmektedir. Bu yönüyle sürdürülebilir liderlik, klasik liderlik yaklaşımlarından farklı olarak ekonomik, sosyal ve çevresel boyutları birlikte ele almaktadır.

Eğitim örgütlerinde sürdürülebilir liderlik, okulun mevcut başarısını korumanın ötesinde, değişen koşullara uyum sağlayabilen, öğrenen ve gelişen okul yapılarının oluşturulmasını amaçlamaktadır (Day, Sammons ve Gorgen, 2016). Okullar, toplumsal değerlerin üretildiği ve aktarıldığı kurumlar olması nedeniyle sürdürülebilir liderlik uygulamalarının hayata geçirilmesinde stratejik bir konuma sahiptir. Bu süreçte okul müdürleri, sürdürülebilir liderliğin en önemli uygulayıcıları olarak öne çıkmaktadır. Sürdürülebilir liderlik anlayışı, okul yönetiminde kısa süreli projeler yerine kalıcı politikaların geliştirilmesini, öğretmenlerin mesleki gelişiminin desteklenmesini ve okul kültürünün güçlendirilmesini öngörmektedir (Leithwood ve Louis, 2012). Aynı zamanda çevresel sürdürülebilirlik ve iklim değişikliği gibi küresel sorunlara duyarlı bir yönetim anlayışını da kapsamaktadır. Bu durum, sürdürülebilir liderliğin yalnızca yönetsel bir tercih değil, aynı zamanda etik bir sorumluluk olduğunu ortaya koymaktadır.

3. OKUL MÜDÜRLERİNİN SÜRDÜRÜLEBİLİR LİDERLİK ROLLERİ

Alan yazın incelendiğinde okul müdürlerinin sürdürülebilir liderlik rollerinin çeşitli boyutlarda ele alındığı görülmektedir. Bu roller şu şekilde özetlenebilir:

3.1 Çevre Dostu Okul Politikaları Geliştirme: Okul müdürleri, çevreye duyarlı okul politikalarının oluşturulması ve uygulanmasında öncü bir rol üstlenmektedir. Sürdürülebilir liderlik anlayışı doğrultusunda geliştirilen bu politikalar; enerji tasarrufu, su kaynaklarının verimli kullanımı, atık yönetimi ve geri dönüşüm uygulamalarını kapsamaktadır. Okullarda çevre dostu politikaların benimsenmesi yalnızca çevresel etkileri azaltmakla kalmayıp öğrencilerin çevre bilinci ve sürdürülebilir yaşam becerileri kazanmalarına da katkı sağlamaktadır (Mulà ve Tilbury, 2025; Eurydice, 2024). Okul liderlerinin bu politikaları okulun stratejik planlamasında konumlandırması, eğitim yönetiminin sürdürülebilirlikle bütünleşmesini kolaylaştırmaktadır. Ayrıca Okul binalarının yönetiminde enerji ve su tasarrufu gibi önlemlerin benimsenmesi öğrencilerin davranışlarındaki çevreci yaklaşımları da güçlendirmektedir (Müller, Lude ve Hancock, 2020). Bu bağlamda okul müdürleri, çevresel hedefleri okulun vizyon ve misyonuna entegre ederek sürdürülebilir bir okul kültürü oluşturulmasına liderlik etmektedir.

3.2. İklim Değişikliği Eğitimi: İklim değişikliği eğitimi, bireylerin iklim krizine ilişkin bilgi, tutum ve davranış geliştirmelerini hedeflemektedir. UNESCO'nun sürdürülebilir kalkınma için eğitim yaklaşımı, iklim değişikliği, afet riskini azaltma ve sürdürülebilir tüketim gibi konuların müfredata entegre edilmesini vurgulamaktadır ((UNICEF-MEB, 2023). Bu eğitim okul ortamında hem resmi müfredat yoluyla hem de okul kültürü ve projeleri aracılığıyla gerçekleştirilmektedir. Okul müdürlerinin çevre temelli eğitim politikalarını desteklemesi, iklim bilincine sahip bireylerin yetiştirilmesinde belirleyici bir rol oynamaktadır. Okullar, çevre temelli etkinlikler, disiplinler arası projeler ve iklim odaklı ders içi/dışı öğrenme fırsatları sunarak öğrenci katılımını artırmaktadır. Ayrıca sürdürülebilir eğitim planlamaları ulusal ve uluslararası eğitim politikalarıyla uyumlu hale getirilmektedir (UNICEF-MEB, 2023).

3.3. Kaynak Kullanımında Tasarrufu Teşvik Etme: Sürdürülebilir liderlik, okul ortamında mevcut kaynakların verimli ve bilinçli kullanılmasını teşvik eden bir yönetim anlayışını içermektedir. Enerji ve su tüketiminin azaltılması, çevre dostu teknolojilerin kullanımı ve sürdürülebilir altyapı uygulamaları bu kapsamda değerlendirilmektedir. Okul liderlerinin kaynak kullanımına yönelik tutumları, tüm okul topluluğunun sürdürülebilir davranışları benimsemesinde belirleyici olmaktadır (Leithwood, Harris ve Hopkins, 2020). Okul müdürlerinin yönlendirmesiyle hayata geçirilen enerji tasarrufu uygulamaları hem ekonomiye katkı sağlamakta hem de çevresel etkileri azaltmaktadır. Bu durum sürdürülebilir liderliğin okul yönetiminde stratejik bir unsur olduğunu ortaya koymaktadır (Sterling, 2001).

3.4. İklim Değişikliği Farkındalığını Artırma: Okul müdürleri, iklim değişikliği konusunda farkındalık oluşturan eğitim faaliyetlerini destekleyerek öğretmen ve öğrencilerin bu sürece aktif katılımını sağlamaktadır. Proje tabanlı öğrenme, çevre temelli etkinlikler, uygulamalı öğrenme yaklaşımları ve disiplinler arası çalışmalar, iklim değişikliği eğitiminin etkili biçimde yürütülmesinde öne çıkan uygulamalar arasında yer almaktadır (Eurydice, 2024). Bu tür uygulamalar öğrencilerin sadece bilişsel değil, aynı zamanda duyuşsal ve davranışsal düzeyde de çevre bilinci geliştirmelerine katkı sağlamaktadır (UNESCO, 2020). Okul müdürlerinin bu faaliyetleri teşvik etmesi, sürdürülebilir liderliğin eğitsel boyutunu güçlendirmekte ve okulun çevreye duyarlı bir öğrenme ortamı hâline gelmesini desteklemektedir.

3.5. Paydaş Katılımını Güçlendirme: Sürdürülebilir liderliğin önemli bileşenlerinden biri de paydaş katılımının güçlendirilmesidir. Öğretmen, öğrenci ve velilerin çevre temelli projelere aktif olarak dâhil edilmesi, okul kültürünü güçlendirmekte ve çevresel sorumluluk bilincini artırmaktadır. Paydaş katılımını esas alan okul yönetimi uygulamaları, sürdürülebilir uygulamaların kalıcılığını sağlamada önemli bir etkiye sahiptir (Polat, 2022).). Bu kapsamda okul müdürleri, katılımcı liderlik anlayışıyla çevre temelli projelerde iş birliğini teşvik etmekte ve okul-toplum bütünleşmesini güçlendirmektedir. Bu yaklaşım, sürdürülebilir liderliğin yalnızca okul sınırları içinde değil toplum genelinde de olumlu etkiler yaratmasına olanak tanımaktadır.

4. TÜRKİYE'DE SÜRDÜRÜLEBİLİR LİDERLİK ARAŞTIRMA BULGULARI

Türkiye'de eğitim kurumları bağlamında sürdürülebilir liderlik üzerine yapılan araştırmalar, okul müdürlerinin bu liderlik yaklaşımını benimsemelerinin okulun örgütsel yapısı, öğretmen tutumları ve öğrenme kültürü üzerinde önemli etkiler yarattığını ortaya koymaktadır. Son yıllarda yapılan çalışmalar, sürdürülebilir liderliğin okul yönetiminde giderek daha fazla önem kazandığını göstermektedir.

Yozgat ilinde gerçekleştirilen karma yöntemli bir araştırmada, okul müdürlerinin sürdürülebilir liderlik davranışları ile okulların öğrenen örgüt özellikleri arasındaki ilişki incelenmiştir. Araştırma sonuçları, öğretmenlerin okul müdürlerinin sürdürülebilir liderlik davranışlarını yüksek düzeyde algıladıklarını ortaya koymuştur. Ayrıca sürdürülebilir liderlik ile öğrenen örgüt özellikleri arasında pozitif ve anlamlı bir ilişki saptanmıştır. Nitel bulgular, sürdürülebilir liderlik sergileyen okul müdürlerinin okulda ortak vizyon oluşturma, iş birliğini teşvik etme ve sürekli öğrenmeyi destekleme konusunda etkili olduklarını göstermektedir (Dağdeviren Ertaş ve Özdemir, 2023). Bu bulgu, sürdürülebilir liderliğin okulun kurumsal öğrenme kapasitesini artırdığını göstermesi açısından önemlidir.

İstanbul'da gerçekleştirilen nicel bir araştırmada ise okul müdürlerinin sürdürülebilir liderlik davranışlarının öğretmenlerin örgütsel bağlılıkları ve iş doyumları üzerindeki etkileri incelenmiştir. Araştırma sonucunda öğretmenlerin sürdürülebilir liderlik algılarının genel olarak yüksek olduğu belirlenmiştir. Ayrıca sürdürülebilir liderliğin yönetsel, sosyal ve

ekonomik boyutlarının öğretmenlerin iş doyumu ve örgütsel bağlılık düzeylerini anlamlı biçimde yordadığı tespit edilmiştir. Özellikle yönetsel ve sosyal sürdürülebilirlik boyutlarının öğretmen bağlılığı üzerinde daha güçlü bir etkiye sahip olduğu görülmüştür (Çayak, 2021). Bu sonuç, sürdürülebilir liderlik uygulamalarının öğretmen motivasyonu ve okulda kalıcılık açısından önemli olduğunu ortaya koymaktadır.

Türkiye Yüzyılı Öğretim Liderliği Kursu'na katılan okul yöneticileriyle gerçekleştirilen nitel bir çalışmada, sürdürülebilir liderliğin kurumsal sürdürülebilirlik üzerindeki etkileri ele alınmıştır. Araştırma bulguları, okul yöneticilerinin çevresel ve sosyal sürdürülebilirlik uygulamalarına yönelik farkındalıklarının arttığını, ancak sürdürülebilirlik kavramını bütüncül biçimde tanımlamakta zorlandıklarını göstermektedir. Ayrıca bütçe yetersizlikleri ve fiziksel altyapı sorunlarının sürdürülebilir uygulamaların yaygınlaştırılmasında önemli engeller oluşturduğu belirtilmiştir (Kemerkaya ve Altun, 2025). Bu durum, sürdürülebilir liderliğin etkili biçimde uygulanabilmesi için yöneticilerin mesleki gelişimlerinin ve kurumsal desteklerin güçlendirilmesi gerektiğini ortaya koymaktadır.

Türkiye'de sürdürülebilir liderlik alanında yapılan lisansüstü tezlere yönelik gerçekleştirilen içerik analizi çalışması, bu alandaki akademik ilginin son yıllarda arttığını göstermektedir. Battal ve Yılmaz (2025), sürdürülebilir liderlik ve yeşil yönetim temalı tezlerin özellikle eğitim ve işletme alanlarında yoğunlaştığını ve çalışmaların büyük çoğunluğunun okul yöneticileri ve örgütsel sürdürülebilirlik üzerine odaklandığını belirtmektedir. Bu sonuç, sürdürülebilir liderliğin Türkiye'de gelişmekte olan ancak giderek önem kazanan bir araştırma alanı olduğunu göstermektedir.

Örgütsel boyutları ele alan bir diğer çalışmada, okul müdürlerinin sürdürülebilir liderlik davranışları ile örgütsel adalet ve örgütsel özdeşleşme arasındaki ilişki incelenmiştir. Araştırma sonuçları, sürdürülebilir liderlik davranışlarının öğretmenlerin örgütsel adalet algıları ve örgütle özdeşleşme düzeyleriyle pozitif yönde ilişkili olduğunu ortaya koymuştur (Polat, Oğuz Canol ve Kaya, 2023). Bu bulgu, sürdürülebilir liderliğin yalnızca çevresel ya da yönetsel değil, aynı zamanda psikososyal bir etkiye de sahip olduğunu göstermektedir.

Genel olarak değerlendirildiğinde, Türkiye'de yapılan araştırmalar okul müdürlerinin sürdürülebilir liderlik davranışlarının; öğrenen örgüt yapısını güçlendirdiğini, öğretmenlerin örgütsel bağlılık ve iş doyumunu artırdığını ve okul kültürünün gelişimine katkı sağladığını ortaya koymaktadır. Bununla birlikte, sürdürülebilir liderlik uygulamalarının etkili biçimde hayata geçirilebilmesi için okul yöneticilerinin bilgi düzeylerinin artırılması, mali ve kurumsal desteklerin güçlendirilmesi gerektiği sonucuna ulaşılmaktadır.

5. SONUÇ VE TARTIŞMA

Bu araştırma, okul müdürlerinin sürdürülebilir liderlik rollerini çevresel sürdürülebilirlik ve iklim değişikliği bağlamında ele alarak alan yazına dayalı bir değerlendirme sunmuştur. İncelenen ulusal ve uluslararası araştırmalar, sürdürülebilir liderliğin okul yönetiminde uzun vadeli düşünmeyi, etik değerlere dayalı karar alma süreçlerini ve paydaş katılımını merkeze alan bütüncül bir liderlik yaklaşımı olduğunu göstermektedir (Hargreaves ve Fink, 2005; Fullan, 2004).

Araştırma bulguları, Türkiye'de okul müdürlerinin sürdürülebilir liderlik davranışlarının öğretmenlerin örgütsel bağlılıkları ve iş doyumları üzerinde olumlu etkiler yarattığını ortaya koymaktadır. Özellikle yönetsel ve sosyal sürdürülebilirlik boyutlarının, öğretmenlerin okula yönelik tutumlarını anlamlı biçimde etkilediği görülmektedir (Çayak, 2021). Benzer şekilde, sürdürülebilir liderlik ile öğrenen örgüt yapısı arasında pozitif bir ilişki bulunması, bu liderlik

anlayışının okulun kurumsal öğrenme kapasitesini güçlendirdiğini göstermektedir (Dağdeviren Ertaş ve Özdemir, 2023).

Çevresel sürdürülebilirlik bağlamında değerlendirildiğinde, okul müdürlerinin enerji tasarrufu, geri dönüşüm ve çevre temelli projeleri desteklemelerinin öğrencilerde çevresel farkındalık ve sorumluluk bilincini artırdığı sonucuna ulaşılmıştır. Bu bulgu, sürdürülebilir kalkınma için eğitimin iklim değişikliğiyle mücadelede temel bir araç olduğunu vurgulayan UNESCO (2020) raporlarıyla örtüşmektedir. Ancak bazı araştırmalar, okul yöneticilerinin sürdürülebilirlik kavramını bütüncül biçimde ele almakta zorlandıklarını ve mali kaynak yetersizliklerinin uygulamaları sınırladığını ortaya koymaktadır (Kemerkaya ve Altun, 2025).

Tartışma açısından bakıldığında, elde edilen bulgular uluslararası alan yazınla büyük ölçüde paralellik göstermektedir. Hargreaves ve Fink (2005), sürdürülebilir liderliğin kurumsal sürekliliği sağladığını vurgularken; Türkiye'de yapılan çalışmalar da bu liderlik anlayışının okul kültürünü ve örgütsel adalet algısını güçlendirdiğini ortaya koymaktadır (Polat, Oğuz Canol ve Kaya, 2023). Bu bağlamda sürdürülebilir liderliğin Türkiye'de daha etkili biçimde uygulanabilmesi için okul müdürlerinin mesleki gelişimlerinin desteklenmesi ve çevresel sürdürülebilirliğe yönelik kurumsal politikaların güçlendirilmesi gerektiği söylenebilir.

ÖZET

Kültürel zekâ, insanların farklı kültürel bağlamları anlama, yorumlama ve bu bağlamlara uygun davranışlar sergileyebilme kapasitesini ifade eden çok yönlü bir beceri alanıdır (Earley & Ang, 2003; Ang & Van Dyne, 2008). Eğitim alanındaki artan kültürel çeşitlilik, öğretmenlerin kültürel zekâ düzeylerinin incelenmesini önemli kılmaktadır. Öğretmenlerin kültürel farklılıklara uyum sağlama yetileri, sınıf içindeki etkileşimlerin kalitesi ve kapsayıcı öğrenme ortamlarının oluşturulmasında önemli bir rol oynamaktadır (Gay, 2018).

Bu araştırma, öğretmenlerin kültürel zekâ seviyelerinin farklı kişisel değişkenlere göre değişip değişmediğini belirlemeyi hedeflemektedir. Çalışma, nicel araştırma yöntemlerinin genel tarama modeline göre yapılmıştır. Araştırmanın örneklemi, Millî Eğitim Bakanlığı'na bağlı okul öncesi, ilkokul, ortaokul ve lise düzeylerinde görev yapan 320 öğretmenden oluşmaktadır. Veri toplama aracı olarak, Ang ve Van Dyne (2008) tarafından geliştirilen ve Türkçeye adapte edilen Kültürel Zekâ Ölçeği kullanılmıştır. Bu ölçek, üstbilişsel, bilişsel, motivasyonel ve davranışsal olmak üzere dört alt boyuttan meydana gelmektedir (Şahin, 2011).

Toplanan veriler, betimleyici istatistikler ve fark analizleri ile incelenmiştir. Elde edilen sonuçlar, öğretmenlerin kültürel zekâ seviyelerinin genelde orta ve daha yüksek seviyelerde olduğunu göstermektedir. Kültürel zekânın bazı alt boyutlarında belirli kişisel faktörlere göre anlamlı farklılıklar saptanırken, başka bazı faktörlerde anlamlı bir farklılık bulunmamıştır. Bu araştırma sonuçlarının, öğretmen eğitim programları ve hizmet içi eğitim faaliyetlerinin kültürel duyarlılık üzerine temellendirilmesine katkı sağlayacağı düşünülmektedir (Banks, 2015).

Anahtar Kelimeler: Kültürel zekâ, öğretmenler, kişisel değişkenler, kültürel çeşitlilik, eğitim

1. GİRİŞ

Eğitim ortamlarında kültürel çeşitliliğin artmasıyla birlikte, öğretmenlerin çeşitli kültürel geçmişlere sahip kişilerle etkili bir şekilde iletişim kurabilmesi, sadece mesleki bilgi ve pedagojik yeteneklerle sınırlı değildir. Bu yönde kültürel zekâ, bireylerin kültürel farklılıkları anlayabilme, bunları yorumlayabilme ve uygun şekilde tepki verebilme yeteneklerini açıklayan önemli bir kavram olarak karşımıza çıkmaktadır (Earley & Ang, 2003).

Kültürel zekâ ile ilgili literatürde, bu yapının yalnızca bilişsel bilgi düzeyiyle ilgili olmadığı, aynı zamanda bireyin motivasyonu, farkındalığı ve davranışsal adaptasyon yetenekleri ile birlikte değerlendirilen çok yönlü bir yetkinlik olduğu gösterilmiştir (Ang, Van Dyne & Koh, 2007). Özellikle öğretmenler açısından, kültürel zekânın sınıf içindeki etkileşimlerde kültürel farkındalığı artırmada, önyargıları azaltmada ve kapsayıcı öğrenme ortamları oluşturmada önemli bir rolü bulunmaktadır.

Araştırmalar, kültürel zekânın bireysel özelliklerle ilişkili olduğunu ve cinsiyet, eğitim seviyesi, mesleki deneyim, kültürlerarası etkileşim sıklığı gibi kişisel değişkenlerden etkilendiğini ortaya koymaktadır (Ang & Van Dyne, 2008). Öğretmenlerin bu kişisel özellikleri, onların çokkültürlü sınıf ortamlarını nasıl algıladıklarını ve bu ortamlardaki davranışlarını doğrudan etkileyebilir.

Bu açıdan bakıldığında, kültürel zekâ, öğretmenlerin kültürel farklılıklara sadece uyum sağlamalarını değil, aynı zamanda bu farklılıkları eğitim sürecini zenginleştiren bir unsur olarak görmelerini sağlayan bir yetkinlik alanı olarak değerlendirilmektedir. Kültürel zekânın kişisel değişkenlerle incelenmesi, öğretmenlerin çok kültürlü eğitim ortamlarındaki rollerinin daha kapsamlı bir şekilde anlaşılmasına yardımcı olmaktadır. Alan yazında elde edilen veriler, kültürel zekânın eğitim alanında geliştirilmesi gereken temel becerilerden biri olduğunu ve öğretmen eğitimi süreçlerinde dikkate alınması gerektiğini göstermektedir (Livermore, 2011).

Kültürel zekâ ile ilgili teorik açıklamalar, bu yetenek alanının çok yönlü ve geliştirilebilir olduğunu göstermektedir. Ayrıca, kültürel zekânın bireyler arasında eşit şekilde gelişmediği ve farklı kişisel ile mesleki etkenlere bağlı olarak değişebileceği, mevcut literatürde özellikle vurgulanmaktadır. Özellikle öğretmenler açısından bakıldığında, kültürel zekâ, hem bireysel özellikler hem de eğitim ortamıyla yakından ilişkilidir.

Öğretmenlerin kültürel zekâ seviyelerinin kişisel değişkenlerle birlikte incelenmesi, çok kültürlü eğitim hakındaki tutum ve yeterliliklerin daha kapsamlı bir şekilde değerlendirilmesini mümkün kılmaktadır. Bu yaklaşım, kültürel zekânın sadece teorik bir kavram değil; aynı zamanda ölçülebilen, karşılaştırılabilen ve eğitim uygulamalarıyla bağlantı kurabilen bir yapıya sahip olmasına olanak tanımaktadır.

2. YÖNTEM

Bu bölümde araştırmanın modeli, evren ve örneklemi, verilerin toplanması ve verilerin analizi alt başlıklar hâlinde açıklanmıştır.

2.1.Araştırma Modeli

Bu araştırma, öğretmenlerin kültürel zekâ düzeylerinin çeşitli değişkenlere göre incelemeyi amaçlamaktadır. Nicel yaklaşımla yürütülen araştırmada, mevcut durumu betimlemeye yönelik

olarak genel tarama modeli kullanılmıştır. Genel tarama modeli, geniş kitlelerin belirli özelliklerini ortaya koymayı amaçlayan araştırma desenlerinden biridir (Karasar, 2012).

2.2.Evren ve Örneklem

Araştırmanın evrenini, Siirt ilindeki okul öncesi, ilkokul, ortaokul ve lise kademelerinde görev yapan öğretmenler oluşturmaktadır. Araştırmanın örneklemi ise, evrenden basit seçkisiz örnekleme yöntemi ile seçilen 320 öğretmenden oluşmaktadır.

Araştırmaya katılan öğretmenlerin cinsiyet, mesleki kıdem, öğrenim durumu, görev yapılan okul kademesi ve okulun bulunduğu yerleşim birimi değişkenlerini içeren demografik özellikleri Çizelge 1'de sunulmuştur.

Çizelge 1. Araştırmaya Katılan Öğretmenlerin Demografik Özellikleri

Değişken	Grup	n	Yüzde(%)
Cinsiyet	Kadın	179	55.9
	Erkek	141	44.1
Mesleki Kıdem	1-5 yıl	143	44.7
	6-10 yıl	89	27.8
	11 yıl ve üzeri	88	27.5
Öğrenim Durumu	Lisans	268	83.8
	Yüksek Lisans	52	16.3
Okul Kademesi	Okulöncesi	56	17.5
	İlkokul	90	28.1
	Ortaokul	100	31.3
	Lise	74	23.1
Okulun Bulunduğu Yerleşim Birimi	İl Merkezi	141	44.1
	İlçeler	140	43.7
	Köy	39	12.2
Toplam		320	100

Çizelge 1 incelendiğinde, araştırmaya katılan öğretmenlerin %55,9'unun kadın, %44,1'inin erkek olduğu görülmektedir. Mesleki kıdem açısından öğretmenlerin büyük bir bölümünün 1–5 yıl aralığında görev yaptığı, bunu 6–10 yıl ve 11 yıl üzeri kıdeme sahip öğretmenlerin izlediği

anlaşılmaktadır. Öğrenim durumuna göre katılımcıların çoğunluğunu lisans mezunu öğretmenler oluşturmakta, lisansüstü eğitim almış öğretmenlerin oranı ise daha sınırlı kalmaktadır.

Öğretmenlerin görev yaptıkları okul kademelerine göre dağılımı genel olarak dengeli olup, en yüksek katılım ortaokul ve ilkokul kademelerinde görev yapan öğretmenlerden sağlanmıştır. Okulun bulunduğu yerleşim birimi açısından bakıldığında ise öğretmenlerin önemli bir kısmının il merkezinde görev yaptığı; bunun yanında ilçe ve köylerde görev yapan öğretmenlerin de araştırmada yer aldığı görülmektedir.

2.3.Verilerin Toplanması

Araştırmada veriler, Ang ve arkadaşları (2008) tarafından oluşturulan Kültürel Zekâ Ölçeği aracılığıyla toplanmıştır. Ölçek, daha önce Arastaman (2018) tarafından Türkiye örnekleminde geçerlik ve güvenirlik çalışmaları yapılarak Türkçeye uyarlanmış olup, eğitim alanında yürütülen çok sayıda araştırmada kullanılmaktadır. Ölçek, bireylerin kültürel farklılık içeren durumlarda farkındalık geliştirme, kültürel bilgiye sahip olma, bu ortamlarda etkileşim kurmaya yönelik istek ve motivasyon gösterme ile uygun davranışlar sergileyebilme düzeylerini ölçmeyi amaçlamaktadır. Bu kapsamda kültürel zekâ, ölçülebilir ve karşılaştırılabilir bir yapı olarak ele alınmıştır. Bu ölçek, üstbilişsel, bilişsel, motivasyonel ve davranışsal olmak üzere dört boyut içermektedir.

Üstbilişsel kültürel zekâ, bireyin farklı kültürel ortamlarda düşünme süreçlerini planlama, izleme ve değerlendirme düzeyini ifade etmektedir.

Bilişsel kültürel zekâ, bireyin farklı kültürlere ilişkin sahip olduğu bilgi düzeyini ve bu bilgiyi kullanabilme kapasitesini kapsamaktadır.

Motivasyonel kültürel zekâ, bireyin farklı kültürel gruplarla etkileşim kurmaya yönelik isteğini, ilgisini ve bu etkileşimi sürdürme motivasyonunu yansıtmaktadır.

Davranışsal kültürel zekâ ise bireyin kültürlerarası etkileşimlerde sözel ve sözel olmayan davranışlarını duruma uygun biçimde düzenleyebilme becerisini ifade etmektedir (Ang & Van Dyne, 2008).

Ölçek maddeleri beşli Likert tipinde derecelendirilmiştir. Öğretmenlerin kültürel zekâ seviyeleri, cinsiyet, eğitim durumu, çalıştıkları okul türü (okul öncesi, ilkokul, ortaokul, lise), mesleki deneyim ve görev yeri gibi kişisel etkenler açısından değerlendirilmiştir. Bu değişkenlerin seçiminde, kültürel zekânın eğitim ortamlarında bireysel farklılıklara dayalı olarak şekillendiğini ortaya koyan önceki çalışmalar referans alınmıştır.

Veri toplama sürecinde gerekli izinler alınmış, öğretmenlere araştırmanın amacı açıklanmış ve katılım gönüllülük esasına dayalı olarak sağlanmıştır.

2.4.Verilerin Analizi

Araştırmada elde edilen veriler SPSS 27.0 paket programı kullanılarak analiz edilmiştir. Analiz sürecinde öğretmenlerin kültürel zekâ düzeylerini ölçen maddelere ilişkin betimsel istatistikler (ortalama ve standart sapma) hesaplanmış; kültürel zekânın kişisel değişkenlere g öre farklılaşıp farklılaşmadığı parametrik testler aracılığıyla incelenmiştir. Analizler öncesinde uç değerler, normallik ve çoklu bağlantısallık varsayımları test edilmiş; çarpıklık ve basıklık değerlerinin

kabul edilebilir sınırlar içinde olduğu, VIF ve tolerans değerlerinin ise çoklu doğrusal bağlantı sorunu göstermediği belirlenmiştir. Örneklem büyüklüğünün yeterli olması (n = 320) nedeniyle analizlerde parametrik istatistikler kullanılmış ve anlamlılık düzeyi $p < .05$ olarak kabul edilmiştir.

3. BULGULAR

Bu bölümde, toplanan verilere dayanarak öğretmenlerin kültürel zekâ düzeylerinin değişkenlere göre değişimine ilişkin bulgular sunulmuştur. Bu bağlamda, öğretmenlerin en fazla ve en az yanıt verdikleri maddelere yönelik ortalama ve standart sapma değerleri Çizelge 2'de gösterilmiştir.

Çizelge 1. Kültürel Zekâ Ölçeğine İlişkin Betimleyici Analiz Bulguları

En Yüksek Puanlı 3 Madde		$\bar{X}$	sd
Madde 11	Farklı kültürlerden insanlarla etkileşim içinde olmaktan hoşlanırım.	4.32	0.77
Madde 1	Farklı kültürel geçmişe sahip insanlarla etkileşim kurarken kullandığım kültürel bilgilerin farkındayım.	4.22	0.65
Madde 3	Farklı kültürler arası etkileşimler için kullandığım kültürel bilginin farkındayım.	4.18	0.59
En Düşük Puanlı 3 Madde			
Madde 6	Diğer dillerin kurallarını (örneğin; sözcük, dil bilgisi) bilirim.	2.82	1.01
Madde 10	Diğer kültürlerin sözel olmayan davranışların ifade ediliş kurallarını bilirim.	2.99	0.96
Madde 8	Diğer kültürlerin evlilik sistemlerini bilirim.	3.03	0.94

Öğretmenlerin kültürel zekâ düzeylerine ilişkin maddelere verdikleri yanıtların dağılımı incelendiğinde, en yüksek ortalamaya sahip ifadelerin ağırlıklı olarak motivasyonel ve üstbilişsel kültürel zekâ boyutlarıyla ilişkili olduğu görülmektedir. Özellikle "Farklı kültürlerden insanlarla etkileşim içinde olmaktan hoşlanırım" ifadesinin en yüksek ortalamaya sahip olması ($\bar{X}$ = 4,32), öğretmenlerin kültürlerarası etkileşime yönelik istek ve ilgilerinin yüksek olduğunu göstermektedir. Benzer şekilde, farklı kültürel geçmişe sahip bireylerle etkileşim sırasında kullanılan kültürel bilginin farkında olunduğunu ifade eden maddelerin de yüksek ortalamalara sahip olması, öğretmenlerin kültürlerarası süreçlerde bilişsel farkındalık geliştirdiklerine işaret etmektedir.

Buna karşılık, en düşük ortalamaya sahip maddelerin bilişsel kültürel zekâ boyutunda yoğunlaştığı dikkat çekmektedir. Özellikle diğer dillerin kurallarına hâkim olma, farklı kültürlerin sözel olmayan iletişim biçimlerini bilme ve kültüre özgü toplumsal yapılar (örneğin

evlilik sistemleri) hakkında bilgi sahibi olma gibi maddelerde ortalamaların görece düşük olduğu görülmektedir. Bu bulgu, öğretmenlerin kültürlerarası etkileşime yönelik motivasyon ve farkındalık düzeylerinin yüksek olmasına karşın, farklı kültürlere ilişkin bilgi temelli içeriklerde daha sınırlı bir yeterliğe sahip olabileceklerini düşündürmektedir.

Genel olarak değerlendirildiğinde, öğretmenlerin kültürel zekâ profillerinin daha çok istek, farkındalık ve etkileşime açıklık boyutlarında güçlü; kültüre özgü bilgi alanlarında ise geliştirmeye açık bir yapı sergilediği söylenebilir. Bu durum, kültürel zekânın bilişsel boyutunu destekleyici eğitim ve deneyimlerin önemini ortaya koymaktadır.

3.1.Öğretmenlerin Cinsiyet Değişkenine Göre Kültürel Zekâ Düzeylerine İlişkin Bulgular

Bu bölümde, öğretmenlerin kültürel zekâ düzeylerinin cinsiyet değişkenine göre farklılaşıp farklılaşmadığı incelenmiştir. Bu amaçla, Kültürel Zekâ Ölçeği'nin toplam puanı ve alt boyutlarına ilişkin veriler bağımsız örneklem t-testi ile analiz edilmiş; elde edilen bulgular Çizelge 3'te sunulmuştur.

Çizelge 3. Kültürel Zekâ Düzeyinin Cinsiyete Göre Farklılaşma Durumuna İlişkin T-Testi Sonuçları

Faktörler	Cinsiyet	n	$(\bar{X})$	SS	Df	t	p
Üstbilişsel	Kadın	179	4.09	0.53	318	-0.118	0.906
	Erkek	141	4.10	0.55			
Bilişsel	Kadın	179	3.02	0.66	318	-1.719	0.087
	Erkek	141	3.16	0.71			
Motivasyonel	Kadın	179	3.82	0.68	318	-3.029	0.003*
	Erkek	141	4.05	0.64			
Davranışsal	Kadın	179	3.65	0.76	318	1.660	0.098
	Erkek	141	3.51	0.72			
Toplam	Kadın	179	3.59	0.49	318	-1.133	0.258
	Erkek	141	3.66	0.49			

*p < .05 düzeyinde anlamlıdır.

Öğretmenlerin kültürel zekâ düzeylerinin cinsiyete göre farklılaşıp farklılaşmadığını belirlemek amacıyla bağımsız örneklem t-testi uygulanmıştır. Analiz sonuçları, kültürel zekânın genel düzeyi ile üstbilişsel, bilişsel ve davranışsal alt boyutlarında kadın ve erkek öğretmenler arasında istatistiksel olarak anlamlı bir farklılık bulunmadığını göstermektedir. Buna karşın, motivasyonel kültürel zekâ boyutunda cinsiyete bağlı anlamlı bir farklılık tespit edilmiştir.

Motivasyonel boyutta erkek öğretmenlerin ortalama puanlarının kadın öğretmenlere göre daha yüksek olduğu ve bu farkın istatistiksel olarak anlamlı olduğu görülmektedir ($p < .05$). Bu bulgu, erkek öğretmenlerin farklı kültürlerle etkileşim kurmaya yönelik ilgi, istek ve motivasyon düzeylerinin kadın öğretmenlere kıyasla daha yüksek olabileceğine işaret etmektedir. Diğer alt boyutlarda ve kültürel zekâ toplam puanında ise cinsiyet değişkeninin belirleyici bir etkiye sahip olmadığı anlaşılmaktadır.

Elde edilen sonuçlar, kültürel zekânın genel yapısının büyük ölçüde cinsiyetten bağımsız bir özellik sergilediğini; ancak kültürlerarası etkileşime yönelik motivasyon boyutunda cinsiyetin sınırlı düzeyde etkili olabileceğini göstermektedir. Bu durum, kültürel zekânın özellikle motivasyonel bileşeninin bireysel eğilimler ve deneyimlerle daha yakından ilişkili olabileceğini düşündürmektedir.

3.2.Öğretmenlerin Öğrenim Düzeyi Değişkenine Göre Kültürel Zekâ Düzeylerine İlişkin Bulgular

Bu bölümde, öğretmenlerin kültürel zekâ düzeylerinin öğrenim durumu değişkenine göre farklılık gösterip göstermediği ele alınmıştır. Kültürel zekânın toplamı ve alt boyutlarına ilişkin analiz sonuçları tablo halinde sunularak yorumlanmıştır.

Çizelge 4. Kültürel Zekâ Düzeyinin Öğrenim Düzeyine Göre Farklılaşma Durumuna İlişkin T-Testi Sonuçları

Faktörler	Öğrenim Düzeyi	N	($\bar{X}$)	SS	df	t	p
Üstbilişsel	Lisans	268	4.07	0.54	318	2.014	0.045*
	Lisansüstü	52	4.24	0.52			
Bilişsel	Lisans	268	3.08	0.68	318	-0.514	0.608
	Lisansüstü	52	3.13	0.76			
Motivasyonel	Lisans	268	3.90	0.68	318	-1.204	0.230
	Lisansüstü	52	4.03	0.64			
Davranışsal	Lisans	268	3.58	0.75	318	-0.939	0.349
	Lisansüstü	52	3.68	0.72			
Kültürel Zekâ Toplam	Lisans	268	3.61	0.50	318	-1.415	0.158
	Lisansüstü	52	3.72	0.50			

*$p < .05$ düzeyinde anlamlıdır.

Öğretmenlerin kültürel zekâ seviyelerinin eğitim düzeylerine göre değişip değişmediğini belirlemek için yapılan çalışmalarda, kültürel zekânın alt bölümleri ile toplam puanları

bağımsız örneklem t-testi yöntemiyle incelenmiştir. Elde edilen sonuçlar Çizelge 4'te yer almaktadır.

Analizlerin sonuçları, yalnızca üstbilişsel kültürel zekâ değerinde eğitim düzeyine bağlı olarak önemli bir farklılık bulunduğunu ortaya koymaktadır. Lisansüstü eğitim alan öğretmenlerin üstbilişsel kültürel zekâ puanlarının, sadece lisans derecesine sahip olanlara göre daha yüksek olduğu görülmektedir ($p < .05$). Bu sonuç, ileri düzey akademik eğitimin öğretmenlerin kültürel etkileşimlerde düşünme süreçlerini düzenleme, değerlendirme ve bilinçli bir şekilde planlama yeteneklerini desteklediğini göstermektedir.

Bununla birlikte, bilişsel, motivasyonel ve davranışsal kültürel zekâ alt boyutları ile toplam kültürel zekâ puanı açısından eğitim düzeyiyle istatistiksel olarak anlamlı bir farklılık gözlemlenmemiştir ($p > .05$). Bu durum, kültürel zekânın bazı unsurlarının akademik eğitim yerine bireysel deneyimler, mesleki etkileşimler ve günlük sosyal aktivitelerle gelişebileceğini göstermektedir.

Genel bir değerlendirmeyle, eğitim seviyesinin kültürel zekânın özellikle üstbilişsel yönü üzerinde etkili olduğu, fakat diğer yönler açısından belirleyici bir faktör olmadığı söylenebilir. Bu durum, akademik eğitimin öğretmenlerin kültürel farkındalık ve bilişsel esnekliklerini geliştirmede tamamlayıcı bir işlevi olduğunu göstermektedir.

3.3.Öğretmenlerin Görev Yaptıkları Yer Değişkenine Göre Kültürel Zekâ Düzeylerine İlişkin Bulgular

Bu bölümde, öğretmenlerin görev yaptıkları okulun bulunduğu yerleşim birimi değişkenine göre kültürel zekâ düzeylerinin farklılaşıp farklılaşmadığı analiz edilmiştir. Elde edilen bulgular tablo halinde sunulmuştur.

Çizelge 5. Kültürel Zekâ Düzeyinin Görev Yerine Göre Farklılaşma Durumuna İlişkin ANOVA Bulguları

Faktör	Görev Yeri	n	$(\bar{X})$	SS	F	p
Üstbilişsel	İl Merkezi	141	4.12	0.54	0.552	0.576
	İlçe	140	4.07	0.56		
	Köy	39	4.15	0.51		
Bilişsel	İl Merkezi	141	3.16	0.67	1.962	0.142
	İlçe	140	3.05	0.69		
	Köy	39	2.94	0.74		
Motivasyonel	İl Merkezi	141	3.99	0.58	1.316	0.270
	İlçe	140	3.88	0.74		

	Köy	39	3.84	0.72		
Davranışsal	İl Merkezi	141	3.65	0.77	1.337	0.264
	İlçe	140	3.52	0.71		
	Köy	39	3.64	0.78		
Kültürel Zekâ Toplam	İl Merkezi	141	3.69	0.46	1.842	0.160
	İlçe	140	3.58	0.52		
	Köy	39	3.58	0.55		

Öğretmenlerin çalıştıkları bölgelerin kültürel zekâ düzeyleri üzerindeki etkisini belirlemek için tek yönlü varyans analizi (ANOVA) kullanılmıştır. İnceleme için üç grup oluşturulmuştur: il merkezi, ilçeler ve köyler.

Sonuçlar, öğretmenlerin kültürel zekâ toplam puanları ile üstbilişsel, bilişsel, motivasyonel ve davranışsal alt boyutların, çalıştıkları yerleşim bölgesine göre istatistiksel olarak anlamlı bir fark göstermediğini belirtmektedir ($p > .05$). Bu bulgular, öğretmenlerin görev yaptıkları yerlerin kültürel zekâ düzeyleri üzerinde belirleyici bir etkiye sahip olmadığını göstermektedir.

Diğer yandan, ortalama puanlara bakıldığında, köyde çalışan öğretmenlerin üstbilişsel kültürel zekâ seviyelerinin daha yüksek olduğu; bilişsel boyutta ise il merkezindeki öğretmenlerin ortalama puanlarının diğer gruplardan daha yukarıda olduğu görülmektedir. Motivasyonel ve davranışsal kültürel zekâ alt boyutları için ise gruplar arasındaki ortalamaların oldukça benzer olduğu dikkat çekmekte, ancak bu farklılıklar istatistiksel olarak anlamlı bulunmamıştır.

Bu bulgular, kültürel zekânın çalışılan çevreden bağımsız olarak bireysel özellikler, mesleki deneyimler ve kişisel farkındalık ile daha yakın bir ilişkiye sahip olduğunu düşündürmektedir.

3.4.Öğretmenlerin Mesleki Kıdem Yılı Değişkenine Göre Kültürel Zekâ Düzeylerine İlişkin Bulgular

Bu bölümde, öğretmenlerin kültürel zekâ düzeylerinin mesleki kıdem değişkenine göre farklılaşıp farklılaşmadığı incelenmiştir. Bu doğrultuda, kültürel zekânın toplam puanı ve alt boyutlarına ilişkin veriler uygun istatistiksel analizler kullanılarak değerlendirilmiş ve sonuçlar ilgili tabloda sunulmuştur.

Çizelge 6. Kültürel Zekâ Düzeyinin Mesleki Kıdem Yıllarına Göre Farklılaşma Durumuna İlişkin ANOVA Bulguları

Faktör	Kıdem Yılı	n	($\bar{X}$)	SS	F	p	Farklar**
Üstbilişsel	1-5 yıl	143	4.04	0.53	2.229	0.109	
	6-10 yıl	89	4.19	0.49			

	11 yıl ve üstü	88	4.11	0.59			
Bilişsel	1-5 yıl	143	3.03	0.66	0.861	0.424	
	6-10 yıl	89	3.11	0.70			
	11 yıl ve üstü	88	3.15	0.72			
Motivasyonel	1-5 yıl	143	3.86	0.70	1.723	0.180	
	6-10 yıl	89	4.03	0.67			
	11 yıl ve üstü	88	3.90	0.63			
Davranışsal	1-5 yıl	143	3.59	0.70	3.230	0.041*	
	6-10 yıl	89	3.74	0.79			A<C<B
	11 yıl ve üstü	88	3.46	0.76			
Kültürel Zekâ Toplam	1-5 yıl	143	3.58	0.48	2.119	0.122	
	6-10 yıl	89	3.72	0.52			
	11 yıl ve üstü	88	3.61	0.49			

*p < .05 düzeyinde anlamlıdır.

**1-5 yıl (A), 6-10 yıl (B), 11 yıl ve üstü (C)

Öğretmenlerin mesleki kıdemlerine göre kültürel zekâ düzeylerinde farklılık olup olmadığını incelemek amacıyla yapılan analizler, kültürel zekânın büyük ölçüde deneyim süresine bağlı olmaksızın bir yapı gösterdiğini ortaya koymuştur. Üstbilişsel, bilişsel ve motivasyonel kültürel zekâ boyutları ile toplam kültürel zekâ puanları açısından öğretmenlerin mesleki deneyimlerinde anlamlı bir fark tespit edilmemiştir (p > . 05).

Ancak, kültürel zekânın davranışsal yönünde mesleki kıdemle bağlantılı anlamlı bir farklılık gözlemlenmiştir. Özellikle 6–10 yıl arası deneyime sahip öğretmenlerin davranışsal kültürel zekâ düzeyinin, 11 yıl ve daha fazla kıdeme sahip olanlardan daha yüksek olduğu anlaşılmaktadır. Bu sonuç, orta düzey deneyime sahip öğretmenlerin kültürlerarası ortamlarda sözlü ve sözsüz davranışlarını daha esnek ve uyumlu bir şekilde sergileyebildiğini göstermektedir.

Genel bir değerlendirme yapıldığında, öğretmenlerin kültürel zekâlarının bilişsel ve farkındalık temelli yönlerinin mesleki deneyimden bağımsız olduğu söylenebilir; buna karşın kültürlerarası davranışların, mesleki süreçlerin belirli aşamalarında daha belirgin bir şekilde geliştiği ifade edilebilir. Bu durum, kültürel zekânın bazı yönlerinin zamanla otomatikleşirken, davranışsal uyumun mesleki dinamizm ve etkileşim yoğunluğu ile daha sıkı bir ilişki içinde olabileceğini düşündürmektedir.

3.5.Öğretmenlerin Çalıştıkları Eğitim Kademesi Değişkenine Göre Kültürel Zekâ Düzeylerine İlişkin Bulgular

Bu bölümde, öğretmenlerin görev yaptıkları okul kademesine göre kültürel zekâ düzeylerinde anlamlı bir farklılık olup olmadığı incelenmiştir. Bu amaçla yapılan analizlerin sonuçları ilgili tabloda verilmiştir.

Çizelge 7. Kültürel Zekâ Düzeyinin Çalıştıkları Eğitim Kademesine Göre Farklılaşma Durumuna İlişkin ANOVA Bulguları

Faktör	Eğitim Kademesi	n	($\bar{X}$)	SS	F	p
Üstbilişsel	Okulöncesi	56	4.16	0.45	1.320	0.268
	İlkokul	90	4.16	0.59		
	Ortaokul	100	4.08	0.53		
	Lise	74	4.01	0.55		
Bilişsel	Okulöncesi	56	2.89	0.65	2.183	0.090
	İlkokul	90	3.13	0.71		
	Ortaokul	100	3.17	0.67		
	Lise	74	3.07	0.70		
Motivasyonel	Okulöncesi	56	3.79	0.63	0.965	0.410
	İlkokul	90	3.93	0.74		
	Ortaokul	100	3.95	0.64		
	Lise	74	3.98	0.66		
Davranışsal	Okulöncesi	56	3.64	0.62	1.137	0.334
	İlkokul	90	3.55	0.81		
	Ortaokul	100	3.68	0.79		
	Lise	74	3.49	0.68		
Kültürel Zekâ Toplam	Okulöncesi	56	3.56	0.45	0.833	0.477
	İlkokul	90	3.64	0.56		
	Ortaokul	100	3.68	0.47		

	Lise	74	3.59	0.48		

Öğretmenlerin çalıştıkları eğitim düzeyleri (okul öncesi, ilkokul, ortaokul ve lise) açısından kültürel zekâ seviyelerinde anlamlı bir farklılık olup olmadığı tek yönlü varyans analizi (ANOVA) ile araştırılmıştır. Analiz bulguları, öğretmenlerin eğitim kademelerine göre kültürel zekânın üstbilişsel, bilişsel, motivasyonel ve davranışsal alt boyutları ile toplam kültürel zekâ puanlarının istatistiksel olarak anlamlı bir farklılık göstermediğini ortaya koymaktadır ($p > .05$).

Ortalama puanlar değerlendirildiğinde, okul öncesi ve ilkokul öğretmenlerinin üstbilişsel kültürel zekâ düzeylerinin diğer gruplara göre daha yüksek olduğu; ortaokul öğretmenlerinin ise bilişsel alanda daha yüksek ortalamalara sahip olduğu görülmektedir. Motivasyonel ve davranışsal boyutlarda ise tüm eğitim kademelerinde benzer seviyelerin gözlemlendiği dikkat çekmektedir. Ancak, bu farklılıklar istatistiksel olarak anlamlı kabul edilmemektedir.

Bu sonuçlar, öğretmenlerin bulunduğu eğitim kademesine bakılmaksızın kültürel zekâ düzeylerinin benzer bir dağılım gösterdiğini ortaya koymaktadır. Kültürel zekânın, öğretmenlerin çalıştıkları kademeden ziyade bireysel nitelikler ve mesleki deneyimler gibi değişkenlerle daha fazla ilişkili olabileceği düşünülmektedir.

4. TARTIŞMA

Bu çalışmanın sonuçları, öğretmenlerin kültürel zekâyla ilgili sorulara verdikleri cevapların belirli temalar etrafında yoğunlaştığını göstermektedir. Çizelge 2'deki tanımlayıcı analiz verilerini incelediğimizde, en yüksek ortalama değerlerine sahip maddelerin genellikle kültürlerarası etkileşim arzusu, farkındalık ve etkileşim sürecini bilinçli bir şekilde yönetme ile bağlantılı olduğu görülmektedir. Özellikle "Farklı kültürlerden insanlarla etkileşimde bulunmaktan keyif alırım" ifadesinin en yüksek ortalamaya sahip olması ($\bar{X}$ = 4,32), öğretmenlerin farklı kültürlerle olan etkileşimlerine ilişkin motivasyon ve ilgilerinin oldukça yüksek olduğunu göstermektedir.

Benzer şekilde, farklı kültürel kökenlere sahip kişilerle etkileşimde kültürel bilgi kullanımına dair farkındalığın ifade edildiği maddelerin de yüksek ortalamalara ulaşması, öğretmenlerin kültürlerarası süreçlerde farkındalık kazandıklarını ve bu süreçleri bilinçli olarak değerlendirebildiklerini göstermektedir. Bu durum, kültürel zekâyı bireyin kültürlerarası etkileşimlerde farkındalık geliştirme ve etkileşimi takip etme yetisi olarak ele alan kuramsal çerçevelerle uyum içerisindedir (Earley ve Ang, 2003; Ang ve Van Dyne, 2008; Van Dyne ve ark., 2010).

Buna karşılık, en düşük ortalamalara sahip olan maddelerin çoğunlukla kültüre özgü bilgi gerektiren alanlarda yoğunlaştığı gözlemlenmektedir. Özellikle başka dillerin yapısal özelliklerini anlama, sözel olmayan iletişim şekillerinin kültürler arası farklılıklarını bilme ve kültüre özgü toplumsal yapılara dair bilgi sahibi olma ile ilgili maddelerde ortalamaların daha düşük olduğu görülmektedir. Bu durum, öğretmenlerin kültürler arası etkileşim konusundaki istek ve farkındalıklarının yüksek olmasına rağmen, farklı kültürlerle ilgili bilgi ağırlıklı içeriğe dair daha sınırlı bir yeterlilikte olabileceklerini göstermektedir.

Genel olarak değerlendirildiğinde, öğretmenlerin kültürel zekâ profillerinin etkileşim açılığı, ilgi ve farkındalık unsurlarında güçlü bir yapıya sahip olduğu; buna karşılık kültüre özgü bilgi alanlarında gelişime ihtiyaç duyduğu söylenebilir. Bu durum, kültürel zekânın özellikle bilgiye dayalı yönlerinin planlı eğitim süreçleri ve yapılandırılmış öğrenme deneyimleri aracılığıyla desteklenmesi gerektiğini göstermektedir.

4.1. Cinsiyet Değişkeni

Araştırma bulguları, öğretmenlerin kültürel zekâ seviyelerinin cinsiyete göre belirgin bir farklılık göstermediğini göstermektedir. Bu durum, kültürel zekânın cinsiyetle bağlantılı olmadan gelişebilen bir yetenek olduğunu ortaya koymaktadır. Ancak alt boyutlar incelendiğinde, erkek öğretmenlerin motivasyonel kültürel zekâ konusunda kadın öğretmenlere kıyasla kayda değer bir şekilde daha yüksek puanlar elde ettiği saptanmıştır. Motivasyonel kültürel zekâ, bir bireyin çeşitli kültürlerle etkileşim kurma isteğini ve bu etkileşimde aktif olma eğilimini tanımlamaktadır (Earley & Ang, 2003).

Bu tespit, Mahasneh, Gazo ve Al-Adamat (2019) tarafından gerçekleştirilen araştırmayla örtüşmektedir. Türkiye'ye özgü bağlamda ise bu durumun sosyal roller, mesleki sorumlulukların dağılımı ya da kültürlerarası deneyimlerin bulunabilirliği ile ilişkili olabileceği öne sürülmektedir. Bununla birlikte, genel kültürel zekâ seviyesinde cinsiyetle ilgili bir farklılık olmaması, kültürel zekânın daha çok iş deneyimi ve bireysel gelişim süreçleriyle bağlantılı olduğunu göstermektedir (Alemu, 2017).

4.2. Öğrenim Düzeyi Değişkeni

Öğrenim düzeyi ile ilgili yapılan incelemelerde, yalnızca üstbilişsel kültürel zekâ alanında belirgin bir farklılık gözlemlenmiştir. Lisansüstü eğitim almış öğretmenlerin üstbilişsel kültürel zekâ seviyelerinin daha yüksek olması, akademik eğitim süreçlerinin bireylerin analiz, değerlendirme ve stratejisel düşünme yeteneklerini geliştirdiğini göstermektedir. Üstbilişsel kültürel zekâ, kişilerinin kültürlerarası etkileşimlerde kendi düşünme süreçlerinin farkında olmasıyla sıkı bir şekilde bağlantılıdır (Ang & Van Dyne, 2008).

Diğer alt boyutlar ve toplam kültürel zekâ puanları açısından eğitim seviyesinde anlamlı bir farkın olmaması, kültürel zekânın sadece akademik seviyeden etkilenmediğini; aynı zamanda deneyim, mesleki etkileşim ve bireysel farkındalık ile de şekillendiğini göstermektedir. Banks (2006) ve Gay (2018), akademik eğitimin kültürel bilinci arttırdığını, ancak bunun yeterli olamayacağını ortaya koymuştur.

4.3. Görev Yeri Değişkeni

Öğretmenlerin çalıştıkları yerler (il merkezi, ilçe, köy) açısından kültürel zekâ seviyelerinde istatistiksel olarak önemli bir farklılık saptanmamıştır. Ancak, tanımlayıcı ortalamalar köyde çalışan öğretmenlerin üstbilişsel kültürel zekâ puanlarının görece daha yüksek olduğunu göstermektedir. Bu durum, kısıtlı kaynaklar olsa bile farklı sosyal ve kültürel koşullarla baş etme zorunluluğunun öğretmenlerin kültürel bilincini artırabileceğini düşündürmektedir.

Earley ve Ang (2003) ve Livermore (2011), kültürel zekânın yalnızca kültürel farklılıkların fazla olduğu yerlerde değil, aynı zamanda bireylerin karşılaştıkları durumları düşünerek değerlendirdikleri her ortamda gelişebileceğini belirtmektedir. Bu bulgu, kültürel zekânın

çevresel faktörlerle ve bireyin yorumlama ile farkındalık süreçleriyle şekillendiğini ortaya koymaktadır.

4.4. Mesleki Kıdem Değişkeni

Mesleki kıdem değişkenine bağlı yapılan incelemelerde, yalnızca davranışsal kültürel zekâ ile ilgili önemli bir farklılık gözlemlenmiştir. Özellikle 6-10 yıllık deneyime sahip öğretmenlerin davranışsal kültürel zekâ düzeylerinin daha yüksek olması, bu grubun mesleki deneyim ile pedagojik esnekliği iyi bir dengede kullandığını düşündürmektedir. Davranışsal kültürel zekâ, bireyin kültürel bağlama uygun hareket etme yeteneğini anlatmaktadır (Earley & Ang, 2003).

Uzun süreli mesleki deneyime sahip öğretmenlerdeki puanların düşüklüğü, mesleki tükenmişlik ya da rutinleşme gibi durumlarla bağlantılı olabilir. Ayrıca, kültürel zekânın diğer yönlerinde kıdemle ilgili belirgin bir farklılık olmaması, bu yeterliliğin yalnızca hizmet süresine değil, aynı zamanda sürekli mesleki gelişim fırsatlarına da bağlı olduğunu göstermektedir.

4.5. Eğitim Kademesi Değişkeni

Öğretmenlerin çalıştıkları eğitim kademesine göre kültürel zekâ seviyelerinde istatistiksel olarak anlamlı bir fark tespit edilmemiştir. Bu durum, kültürel zekânın okul türünden bağımsız olarak öğretmenlerin mesleki rollerinin ortak bir bileşeni olduğunu göstermektedir. Ancak, özellikle bilişsel kültürel zekâda okul öncesi öğretmenlerin daha düşük puanlar alması dikkat çekmektedir.

Bilişsel kültürel zekâ, kültürel bilgi birikimini temsil ettiğinden, daha soyut ve teorik içeriğe sahip üst kademelerde çalışan öğretmenlerin bu alanda daha yüksek puanlar alması beklenmektedir (Earley & Ang, 2003). Bu sonuç, özellikle okul öncesi öğretmen eğitimi programlarında kültürel içerikli derslerin güçlendirilmesi gerektiğini göstermektedir.

5. SONUÇ VE ÖNERİLER

Bu araştırma, öğretmenlerin kültürel zeka seviyelerinin kişisel etkenler çerçevesinde nasıl farklılık gösterdiğini incelemeyi hedeflemiştir. Elde edilen veriler, öğretmenlerin kültürel çeşitlilikle başa çıkma yeteneklerinin belirli bir düzeyde geliştiğini ortaya koymakla birlikte, bu yeteneklerin alt boyutlar ve bireysel özellikler bakımından değişebildiğini göstermektedir.

Kişisel değişkenler açısından elde edilen sonuçlar, kültürel zekanın bazı alanlarının bireysel niteliklerden etkilendiğini göstermektedir. Cinsiyetle ilgili olarak genel kültürel zeka seviyesinde anlamlı bir farklılık gözlemlenmezken, motivasyonel kültürel zeka boyutunda erkek öğretmenlerin puanlarının daha yüksek olduğu belirlenmiştir. Bu durum, kültürlerarası etkileşime yönelik ilgi, arzu ve gayret unsurlarının sosyal ve çevresel faktörlerden etkilenebileceğini göstermektedir.

Öğrenim düzeyi değişkeni üzerine yapılan değerlendirmelerde, lisansüstü eğitim almış öğretmenlerin üstbilişsel kültürel zeka seviyelerinin lisans mezunlarına göre daha yüksek olduğu ortaya konmuştur. Bu sonuç, akademik eğitimin bireylerin kültürel durumları analiz etme, değerlendirme ve stratejik düşünme becerilerini güçlendirdiğini göstermektedir. Diğer kültürel zeka boyutlarında ise kayda değer bir farklılık gözlemlenmemekle birlikte, lisansüstü grup için ortalamanın genel olarak daha yüksek olması dikkat çekicidir.

Mesleki kıdemle ilgili değişkenler arasında yalnızca davranışsal kültürel zeka boyutunda belirgin bir farklılık gözlemlenmiştir. Özellikle 6-10 yıl arasında mesleki deneyimi olan öğretmenlerin, daha uzun süre çalışan öğretmenlere göre davranışsal uyum ve esneklik açısından daha yetkin olduğu görülmektedir. Bu bulgu, mesleki deneyimin belirli bir aşamasında kültürel etkileşim becerilerinin daha etkin kullanıldığını, ilerleyen yıllarda ise bu becerilerin durağanlaşabileceğini düşündürmektedir.

Görev yeri ve eğitim kademesi değişkenleri açısından kültürel zeka seviyelerinde istatistiksel olarak anlamlı farklılıklar tespit edilmemiştir. Ancak, tanımlayıcı anlamda bazı küçük farklılıkların gözlemlenmesi, kültürel zekanın yalnızca yapısal şartlardan değil, kişisel tecrübeler ve farkındalık süreçlerinden de etkilendiğini göstermektedir.

Bu bulgular ışığında, öğretmenlerin kültürel zeka seviyelerinin özellikle bilişsel boyutları açısından desteklenmesi gerektiği söylenebilir. Hizmet içi eğitim programlarında kültürel bilgi içeriklerine daha fazla yer verilmesi, öğretmenlerin farklı kültürel sistemler, değerler ve iletişim tarzları hakkında bilgi düzeylerini yükseltebilir. Ayrıca, lisansüstü eğitim ve mesleki gelişim programlarının, öğretmenlerin üstbilişsel farkındalıklarını artırdığı göz önüne alındığında, bu tür programlara katılımın teşvik edilmesi büyük önem taşımaktadır.

Sonuç olarak, kültürel zeka öğretmenlik mesleği açısından geliştirilebilir ve desteklenebilir bir beceridir. Öğretmenlerin şahsi nitelikleri ve mesleki deneyimleri bu becerinin belirli alanlarını etkileyebilir, ancak planlı eğitim süreçleri ve farkındalık temelli uygulamalarla kültürel zekanın tamamen güçlendirilmesi mümkündür. Gelişmiş kültürel zekaya sahip öğretmenlerin, artan farklılıkların yaşandığı eğitim ortamlarda daha kapsayıcı, duyarlı ve etkili bir öğretim yaklaşımı sergilemesi beklenir.

ÖZET

Bu çalışmanın amacı, eğitim bilimlerinde sosyal ağ analizi ve liderlik alanında yürütülmüş yurtiçi ve yurtdışı araştırmaları bütüncül bir bakış açısıyla ele alarak, danışma ve tavsiye alma ilişkilerinin eğitim örgütlerinde liderliğin nasıl üretildiğini ortaya koymaktır. Çalışma, sosyal ağ analizi ile liderlik çalışmalarının birlikte ele alındığı araştırmalara dayalı olarak, liderliğin yalnızca biçimsel roller ya da bireysel özellikler üzerinden açıklanamayacağını savunmaktadır. Literatürde yer alan çalışmalar; öğretmenler ve yöneticiler arasındaki mesleki öğrenme, bilgi paylaşımı, arkadaşlık ve tavsiye ağlarının, bazı aktörleri örgüt içinde daha görünür ve etkili hâle getirdiğini göstermektedir. Bu süreçte sıkça danışılan bireyler, biçimsel yetkiden bağımsız olarak liderlik işlevi üstlenmektedir. İncelenen araştırmalar, danışma ilişkilerinin rastlantısal olmadığını; kıdem, branş, cinsiyet, deneyim ve benzerliğin çekim gücü gibi değişkenlerin bu ilişkilerin oluşumunda belirleyici rol oynadığını ortaya koymaktadır. Ayrıca uzmanlık, iletişim becerileri ve ilişkisel güven gibi güç kaynaklarının, danışılan aktörlerin liderleşme sürecini desteklediği görülmektedir. Sonuç olarak bu kuramsal sentez, eğitim örgütlerinde liderliğin atanmış bir pozisyondan çok, danışma ilişkileri ve sosyal ağ yapıları içinde üretilen ilişkisel bir olgu olduğunu göstermektedir. Çalışma, eğitim yönetimi alanında liderliği anlamaya yönelik birey merkezli yaklaşımların ötesine geçilmesi gerektiğine işaret etmekte ve sosyal ağ temelli araştırmaların kuramsal önemini vurgulamaktadır.

Anahtar Kelimeler: Danışma ilişkileri, eğitim yönetimi, liderlik, sosyal ağ analizi.

1. GİRİŞ

Eğitim örgütlerinde liderlik, uzun yıllar boyunca yöneticilerin bireysel özellikleri, liderlik stilleri ve biçimsel roller üzerinden ele alınmıştır. Bu yaklaşım, liderliği çoğunlukla atanmış pozisyonlara indirgerken, örgüt içindeki sosyal ilişkilerin ve etkileşim örüntülerinin liderliğin ortaya çıkışındaki rolünü sınırlı biçimde ele almıştır. Oysa eğitim örgütleri, yalnızca resmi hiyerarşik yapılardan oluşan kapalı sistemler değil; öğretmenler, yöneticiler ve diğer paydaşlar

arasında kurulan çok katmanlı, dinamik ve çoğu zaman örtük ilişkiler ağından oluşan açık sosyal sistemlerdir.

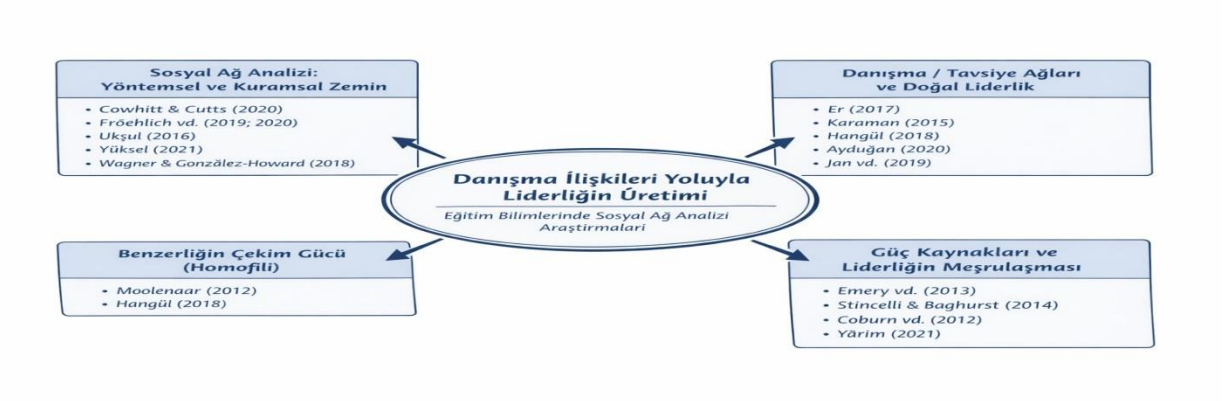
Bu ilişkiler ağı içinde bilgi, etki ve karar alma süreçleri yalnızca biçimsel yetki kanalları üzerinden değil; danışma, tavsiye alma, fikir paylaşımı ve mesleki etkileşimler yoluyla şekillenmektedir. Eğitim örgütlerinde günlük pratikler incelendiğinde, birçok kararın resmi toplantılardan ziyade, informel danışma ilişkileri içinde olgunlaştığı görülmektedir. Bu durum, liderliğin yalnızca atanmış roller üzerinden değil, ilişkisel süreçler aracılığıyla üretildiğini göstermektedir.

Eğitim bilimlerinde sosyal ağ analizi temelli araştırmaların artması, liderliğin bu ilişkisel boyutuna yönelik ilgiyi güçlendirmiştir. Sosyal ağ analizi, bireylerin örgüt içindeki konumlarını yalnızca statüleriyle değil, kurdukları ilişkilerin niteliği ve yoğunluğuyla ele alarak, liderliğin fiili dağılımını görünür kılmaktadır. Özellikle danışma ve tavsiye alma ilişkileri, eğitim örgütlerinde liderliğin üretildiği temel sosyal mekanizmalardan biri olarak öne çıkmaktadır.

Bu çalışmanın amacı, eğitim bilimlerinde sosyal ağ analizi ve liderlik alanında yürütülmüş yurtiçi ve yurtdışı araştırmaları sentezleyerek, danışma ilişkilerinin eğitim örgütlerinde liderliği nasıl ürettiğini kuramsal bir çerçevede tartışmaktır. Çalışma, yalnızca ilgili araştırmalara dayanmakta ve bu çalışmaların ortak yönleri üzerinden sosyal ağ analizi ve liderliğin ilişkisel niteliğini ortaya koymayı amaçlamaktadır.

2. İLGİLİ ARAŞTIRMALAR

Eğitim bilimlerinde sosyal ağ analizi ve liderlik alanında yürütülen araştırmalar incelendiğinde, çalışmaların belirli tematik odaklar etrafında kümelendiği görülmektedir. Bu temalar, sosyal ağ analizinin eğitim araştırmalarındaki gelişimi ve kuramsal yönelimi, danışma ve tavsiye ağları aracılığıyla liderliğin ortaya çıkışı, benzerliğin çekim gücü ve liderliğin ilişkisel güç kaynakları üzerinden derinleşmesi biçiminde özetlenebilir. Bu çalışmada, literatürde ayrı ayrı ele alınan *ancak kuramsal olarak birbiriyle yakından ilişkili olan benzerliğin çekim gücü ve güç kaynakları temaları, liderliğin ilişkisel boyutunu bütüncül biçimde tartışabilmek amacıyla aynı başlık altında* değerlendirilmiştir. Bu doğrultuda ilgili araştırmalar, *üç ana başlık* altında ele alınarak tematik bir sentez sunulmuştur.



Şekil 1. İlgili Araştırmaların Dağılımı.

Şekil 1'de, eğitim bilimlerinde sosyal ağ analizi ve liderlik alanında yürütülen ilgili araştırmalar tematik bir çerçevede sunulmuştur. İncelenen çalışmalar; sosyal ağ analizinin yöntemsel ve kuramsal katkıları, danışma ve tavsiye ağları yoluyla liderliğin ortaya çıkışı, benzerliğin çekim gücünün ilişki örüntülerindeki rolü ve liderliğin ilişkisel güç kaynakları üzerinden meşrulaşması olmak üzere dört ana tema altında toplanmaktadır. Bu tematik yapı, liderliğin eğitim örgütlerinde bireysel özelliklerden ya da biçimsel rollerden ziyade, danışma ilişkileri ve sosyal ağ yapıları içinde üretildiğini göstermektedir.

3. EĞİTİM BİLİMLERİNDE SOSYAL AĞ ANALİZİ ARAŞTIRMALARININ GELİŞİMİ VE YÖNELİMİ

Eğitim bilimlerinde sosyal ağ analizinin kullanımı, örgüt içi ilişkilerin karmaşıklığını anlama ihtiyacından doğmuştur. Bibliyometrik ve içerik analizi temelli çalışmalar, sosyal ağ analizinin özellikle son yıllarda eğitim araştırmalarında giderek daha fazla tercih edilen bir yaklaşım hâline geldiğini göstermektedir (Ukşul, 2016; Yüksel, 2021). Bu çalışmalar, sosyal ağ analizinin bilgi paylaşımı, etkileşim örüntüleri ve mesleki ilişkilerin incelenmesinde önemli bir boşluğu doldurduğunu ortaya koymaktadır.

Metodolojik incelemeler, sosyal ağ analizinin geleneksel yöntemlere kıyasla örgüt içindeki ilişkisel yapıları daha bütüncül biçimde ele alabildiğini vurgulamaktadır (Cowhitt ve Cutts, 2020). Özellikle karmaşık örgüt yapılarında, bireylerin yalnızca ne düşündüğünü değil, kiminle, ne sıklıkla ve hangi amaçla etkileşim kurduğunu anlamak, liderliğin gerçek dağılımını ortaya koymak açısından kritik öneme sahiptir. Bu bağlamda sosyal ağ analizi, liderliğin yalnızca algısal ya da pozisyonel göstergelerle açıklanamayacağını göstermektedir.

Eğitim alanında karma yöntemli sosyal ağ analizi çalışmalarını inceleyen araştırmalar, bu yaklaşımın liderlik, öğrenme ve etkileşim süreçlerinin birlikte ele alınmasına imkân tanıdığını ortaya koymaktadır (Froehlich vd., 2019; Froehlich vd., 2020). Bu çalışmalar, sosyal ağ analizinin yalnızca bir teknik değil, aynı zamanda liderliği ilişkisel bir süreç olarak kavramsallaştıran güçlü bir analitik çerçeve sunduğunu göstermektedir.

Eğitim bilimlerinde sosyal ağ analizinin kuramsal katkılarını tartışan çalışmalar, bu yaklaşımın yalnızca teknik bir analiz aracı olmadığını, aynı zamanda eğitim araştırmalarında yeni kavramsal açılımlar sunduğunu ortaya koymaktadır. Wagner ve González-Howard (2018), sosyal ağ analizinin eğitim bilimleri alanındaki kullanımının önemine dikkat çekerek, kişiler arasındaki bağlantıların ve gruplar içerisindeki ilişki kalıplarının eğitimsel süreçlerin anlaşılmasında merkezi bir rol oynadığını vurgulamıştır. Araştırmacılar, özellikle eğitimde söylem araştırmaları ile sosyal ağ analizi arasındaki teorik bağlantılara odaklanarak, sosyal ağ yaklaşımının eğitimsel etkileşimlerin ve anlam üretim süreçlerinin çözümlenmesinde etkili bir çerçeve sunduğunu savunmuştur. Bu bağlamda sosyal ağ analizi, eğitim araştırmalarında yalnızca mevcut ilişkileri betimleyen bir yöntem değil, aynı zamanda yeni araştırma sorularının geliştirilmesine katkı sağlayan kuramsal bir araç olarak değerlendirilmektedir.

4. DANIŞMA VE TAVSİYE AĞLARI ÜZERİNDEN LİDERLİĞİN ÜRETİMİ

İlgili araştırmaların önemli bir bölümü, eğitim örgütlerinde danışma ve tavsiye ağlarının liderliğin ortaya çıkışında belirleyici bir rol oynadığını göstermektedir. Öğretmenler ve yöneticiler arasındaki mesleki öğrenme, bilgi paylaşımı ve arkadaşlık ilişkileri, bazı bireylerin

örgüt içinde daha merkezi ve etkili konumlar elde etmesine yol açmaktadır (Ayduğan, 2020; Er, 2017). Bu bireyler, zamanla sıkça danışılan ve görüşlerine başvurulan aktörler hâline gelmektedir.

Danışma ilişkilerine odaklanan çalışmalar, atanmış liderlerle sosyal ağ içinde öne çıkan liderlerin her zaman örtüşmediğini ortaya koymaktadır (Hangül, 2018; Karaman, 2015). Bu durum, liderliğin biçimsel yetkiden ziyade ilişkisel etki üzerinden üretildiğini göstermektedir. Sosyal ağlar içinde doğal lider olarak tanımlanan bu aktörler, sahip oldukları uzmanlık, deneyim ve güvenilirlik sayesinde liderlik işlevi üstlenmektedir.

Çevrim içi öğrenme ve araştırma topluluklarına yönelik çalışmalar da benzer biçimde, sosyal ağ ilişkilerinin grup performansı ve etkileşim düzeyi üzerinde belirleyici olduğunu göstermektedir (Jan vd., 2019). Bu bulgular, danışma ilişkilerinin yalnızca yüz yüze örgütlerde değil, dijital ortamlarda da liderliğin üretiminde etkili olduğunu ortaya koymaktadır.

5. BENZERLİĞİN ÇEKİM GÜCÜ VE GÜÇ KAYNAKLARI BAĞLAMINDA LİDERLİĞİN DERİNLEŞMESİ

İlgili araştırmalar, danışma ilişkilerinin oluşumunda benzerliğin çekim gücünün önemli bir rol oynadığını göstermektedir. Öğretmenlerin ve yöneticilerin yaş, kıdem, branş ve deneyim gibi ortak özelliklere sahip bireylerle daha sık etkileşim kurduğu ve bu etkileşimlerin ağ içinde alt gruplar oluşturduğu görülmektedir (Hangül, 2018; Moolenaar, 2012). Bu durum, liderliğin ilişkisel olarak meşrulaşmasında benzerlik temelli bağların etkisini ortaya koymaktadır.

Öğretmenler arasındaki sosyal ağların yalnızca bireysel ilişkileri değil, aynı zamanda örgütsel değişim ve yenilik süreçlerini de etkilediği literatürde vurgulanmaktadır. Coburn ve arkadaşları (2012) tarafından yürütülen çalışmada, öğretmenlerin öğretim reformlarına ilişkin algıları ile sosyal ağ yapıları arasındaki ilişkiler incelenmiş ve güçlü sosyal ağlara sahip öğretmen gruplarının yenilikçi öğretim yaklaşımlarına daha fazla destek sunduğu ortaya konmuştur. Bu bulgu, sosyal ağların yalnızca benzerlik temelli ilişkiler üretmekle kalmadığını, aynı zamanda liderliğin meşruiyetini ve etki alanını örgütsel dönüşüm süreçleriyle ilişkilendirdiğini göstermektedir. Bu çerçevede danışma ve etkileşim ağları, liderliğin yalnızca kişiler arası güvene değil, aynı zamanda pedagojik yeniliklere yön verme kapasitesine dayalı olarak üretildiği bir zemin sunmaktadır.

Bunun yanı sıra liderliğin üretiminde bireysel yetkinlikler ve güç kaynakları da belirleyici olmaktadır. Sosyal ilişkiler içinde öne çıkan liderlerin; iletişim becerileri, uzmanlık, sorumluluk alma ve örgütsel bağlamı okuyabilme gibi özelliklere sahip olduğu belirtilmektedir (Emery vd., 2013; Stincelli ve Baghurst, 2014). Eğitim örgütlerinde yürütülen çalışmalar, sosyal ağ yoğunluğunun ve ilişkisel etkileşimin liderlerin örgütsel süreçler üzerindeki etkisini artırdığını göstermektedir (Yarım, 2021).

6. SONUÇ

Eğitim bilimlerinde sosyal ağ analizi ve liderlik alanında yürütülen araştırmalar birlikte değerlendirildiğinde, danışma ilişkilerinin liderliğin üretildiği temel sosyal mekanizmalardan biri olduğu açıkça görülmektedir. İlgili çalışmalar, liderliğin yalnızca biçimsel roller ya da bireysel özellikler üzerinden açıklanamayacağını; bunun yerine sosyal ağ yapıları, danışma

ilişkileri ve etkileşim örüntüleri içinde şekillenen ilişkisel bir olgu olduğunu ortaya koymaktadır.

Bu kuramsal sentez, eğitim örgütlerinde liderliği anlamaya yönelik birey merkezli yaklaşımların ötesine geçilmesi gerektiğine işaret etmektedir. Danışma ilişkileri aracılığıyla üretilen liderlik, eğitim örgütlerinde karar alma, bilgi paylaşımı ve örgütsel öğrenme süreçlerini doğrudan etkilemektedir. Bu bağlamda sosyal ağ analizi temelli araştırmalar, eğitim yönetimi alanında liderliği daha bütüncül, ilişkisel ve bağlamsal bir perspektifle ele almak için güçlü bir kuramsal zemin sunmaktadır.

ÖĞRETİM TASARIM MODELLERİNDE DOĞAL DİL İŞLEME TEKNOLOJİLERİ KULLANILABİLİR Mİ?

Arş. Gör. Dr. Erhan CEYLAN
Hatay Mustafa Kemal Üniversitesi,
drceylaner@gmail.com - 0000-0002-5215-2781

ÖZET

Öğretim tasarım modelleri, öğrenme süreçlerini sistematik ve ölçülebilir hâle getirmeyi amaçlayan kuramsal çerçeveler sunar. ADDIE, Dick & Carey ve Kemp gibi yaygın modeller; eğitim programlarının analiz, tasarım, geliştirme, uygulama ve değerlendirme aşamalarını yapılandırarak etkili öğrenme ortamlarının oluşturulmasına rehberlik eder. Son yıllarda yapay zekâ, özellikle doğal dil işleme (Natural Language Processing-NLP) teknolojilerindeki gelişmeler, bu modellerin eğitim ortamlarına entegrasyonunu gündeme getirmiştir. Bu çalışmanın amacı, öğretim tasarım modelleri ile NLP teknolojilerinin kesişim noktalarını incelemek ve eğitimde yenilikçi uygulamalara yönelik bir perspektif sunmaktır.

Çalışmada, nitel araştırma yaklaşımı kapsamında betimsel alanyazın taraması yöntemi kullanılmıştır. Öğretim tasarımı modelleri ve NLP alanlarında son yıllarda yayımlanmış güncel çalışmalar incelenmiştir. İncelemeler sonucunda, NLP teknolojilerinin öğretim tasarım modellerinin tüm aşamalarında işlevsel katkılar sunduğu söylenebilir. Örneğin analiz aşamasında, öğrenci ihtiyaçları ve duyuşsal durumlar metin madenciliği ve duygu analizi yoluyla belirlenebilmektedir. Tasarım aşamasında, öğrenme hedeflerinin NLP tabanlı sistemlerle uyumlu hale getirilmesi ve kişiselleştirilmiş içerik önerilerinin otomatik olarak üretilmesi öne çıkmaktadır. Geliştirme aşamasında, akıllı ders materyalleri, metin özetleme ve soru-cevap sistemleri kullanılabilmektedir. Uygulama aşamasında, sohbet robotları ve dil destekli öğrenme asistanları öğrenci etkileşimini desteklemektedir. Değerlendirme aşamasında ise açık uçlu yazılı yanıtların otomatik analizi ve öğrenci geri bildirimlerinin çözümlenmesi, ölçme ve değerlendirme süreçlerinin niteliğini artırmaktadır.

Sonuç olarak, NLP teknolojilerinin öğretim tasarım modellerine entegrasyonu, öğrenme süreçlerini daha kişiselleştirilmiş, erişilebilir ve verimli hâle getirme potansiyeline sahiptir. Bu çalışma, öğretim tasarımının her aşamasında NLP tabanlı uygulamaların nasıl konumlandırılabileceğine dair kavramsal bir çerçeve sunmakta ve özellikle öğretmen eğitimi ile dijital öğrenme ortamlarında yapılacak deneysel araştırmalar için yol gösterici nitelik taşımaktadır.

Anahtar Kelimeler: Öğretim Tasarımı Modelleri, Doğal Dil İşleme, Yapay Zekâ, Eğitim Teknolojileri.

UYARLANABİLİR ÖĞRENME ORTAMLARINDA YAPAY ZEKA ETKİSİ

Doç. Dr. Barış AYAZ

Siirt Üniversitesi

baris.mercimek@siirt.edu.tr – 0000-0002-0368-4693

ÖZET

Bireysel öğrenme farklılıkların temeli farklı değişkenlere dayanmaktadır. Öğrenme stilleri, öğrenmeye ayrılan zaman, algılama ve öğrenme performansı bunlardan bazılarıdır. Ancak her öğrenenin aynı kalıpta öğrenme sürecinin yapılandırılması oldukça sık karşılaşılan bir durum olmaktadır. Bu durum kalabalık sınıflarda, ortak öğretim hedeflerine ulaşmaya çalışan öğrenme gruplarında olağan kabul edilebilir. Ancak olanakların uygun olduğu durumlarda her öğrenen için kendisine en uygun biçimde yapılandırılmış öğrenme ortamı ideali temsil etmektedir. Uyarlama birden fazla biçimde yapılabilmektedir. İçeriği uyarlama, arayüzü uyarlama, konu akış sürecini uyarlama ve dönütleri uyarlama bu biçimlerden bazılarıdır. Algoritmaların önceden şekillendiği, sonsuz seçkisiz uyarlama olmayan sistemlerde anlık karar değişikliklerinin etkin bir şekilde uyarlaması güçleşmektedir. Benzer biçimde arayüzün öğrenci isteği veya ön izlem ve ön teste göre oluşturulduğu durumlarda öğrenme sürecinde karar değişikliklerinin uyarlaması yine zor olabilmektedir. Konu hakkında ön bilgi seviyesinin düşük olduğu konularda basitten karmaşığa, somuttan soyuta bir akış izlenebilmektedir. Bu da zaman zaman konu ilgisi yüksek olan öğrencilerde uyarlama performansının istendik seviyede olmadığını gösterebilmektedir. Tüm bunların ışığında öğrenme sürecinde yer alan tüm bilişsel ve fiziksel değişimlere uyum sağlayabilecek Bayesyen mantığını yapay zeka desteğiyle sunabilecek dinamik sistemlerin önemi açığa çıkmaktadır. Yapay zeka öğrenenin anlık dalgalanmalarını takip ederek en ideal navigasyon sürecini işe koşabilecektir. Her öğrenme hatası veya karmaşası kısa sürede anlaşılabilecek ve biçimlendirilmiş dönüt mekanizması bireye özgü oluşturulabilecektir. Farklılaştırılmış öğrenme ortamlarının statik yapısının ötesine geçerek ders sonu değerlendirme sürecine kadar etkin ve uyarlanabilir bir öğrenme yapısı oluşturulabilecektir. Bununla birlikte tesadüfi doğru yanıtlar ve sistemin karar mekanizmasında ki hatalar sınırlılık ve limitler arasında gösterilmektedir.

Anahtar Kelimeler : Yapay zeka, uyarlanabilir ortamlar, öğrenme

1. İYİLEŞTİRİLMİŞ ÖĞRENME VE DİJİTAL DÖNÜŞÜM

İnsanın nörolojik yapısı gereği öğrenme sürecinin açıklanması fizyolojik olarak sınırlı kalmaktadır (Driscoll ve Burner, 2005; Korkmaz ve Mahiroğlu, 2007). Bunun yanında öğrenmenin günümüze kadar farklı araçlar ve yöntemlerle sağlamaya çalışıldığı gözlenmektedir. Öğrenmenin etkili ve verimli olması için öğretici öğrenen içerik ve sistem yöneticileri tarafından koordineli bir çalışma gerekmektedir (Balyer, 2012; Shanks,

1995). Bugün öğrenme önce hatırlama ile başlayan sonrasında kalıcı ve transfer edilebilir yapıya dönüştükten sonra uzun süreli bellekte yer edinmiş karmaşık bir yapıyı temsil etmektedir. Öğrenme içeriklerine erişim önce dijital teknolojilerin yaygınlaşması günümüzde internet ve zeki öğrenme sistemleri ile daha mümkün hale gelmiştir. Bilgiye hızla erişim için derin öğrenme büyük veri tabanları ve makine öğrenmesi gibi kolaylaştırıcı unsurların mevcut olduğu gözlenmektedir. Yapay zeka araçları da popülaritesini korumakla beraber sınırlı ve riskli kullanım alanlarını beraberinde getirmektedir. Öğretici tarafından bakıldığında anlatılacak içeriye kolay erişim örnek sorular ve çözümleri ders materyalleri geribildirim ve öğrenci takibi açısından oldukça fazla sayıda yarar sunmaktadır. Öğrenci açısından bakıldığında bilgiye hızlı erişim konuya ilişkin farklı anlatımlar, materyaller, kaynaklar ve öğreticiler bulunabilmektedir (Owoc vd., 2019; Sangapu, 2018). Ancak öğrenme performansına katkı sağlayacak ödev ve çalışma dosyalarına ilişkin sunduğu pratik yararlar nedeniyle öğrenmenin doğasına aykırı spesifik öğrenme durumları ortaya çıkarabilmektedir. Bu durum avantaj olarak görülse de öğrenmeye zemin olabilecek alternatif öğrenme içeriklerine erişimi engellemekte içeriğe ilişkin farklılıkların ve zenginliklerin anlaşılırlığını düşürmektedir. Dijital teknolojilerin öğrenme ortamlarında kullanımı günümüzde risk ve tehditleri de beraberinde getirmektedir. Yapay zeka araçları da benzer şekilde bu risk sınırları içerisinde yer almaktadır. Burada bahsedilen yalnızca özel hayat sosyal hayat veya kişisel veriler sınırında değil öğrenmenin doğasına ilişkin de bazı riskler bulunmaktadır. Yapay zeka araçları kullanarak öğretimi tasarlayan bir öğretici Tüm öğrenenlerin bilişsel olarak ortak bir yapısını önemsemektedir. Zaman zaman farklı öğrenme grupları için farklı öğrenme araçları hazırlamayı hedeflemektedirler. Ancak kalabalık sınıflarda bireysel ve bilişsel farklılıkları olan gruplarda öğrenmenin etkili olabilmesi için uyarlanabilir sistemlere gereksinim duyulmaktadır. Uyarlama yalnızca öğrenci tercihi ile değil yapay zeka aracılığıyla mekaniksel ve algoritmik olarak oluşturulabilmektedir. Öğrenci açısından bakıldığında da öğrencinin kendi bilişsel yapısına en uygun öğrenme ortamına ulaşması, materyallere erişebilmesi ve sorularına yanıt bulabilmesi etkin bir uyarlama sistemi ile çok daha mümkün olabilmektedir. Bunun yanında herkes için ortak tek bir müfredat anlayışının ötesine geçilerek kişinin kendini özel hissetmesi duyusal olmasa da fiziksel olarak destek süreçlerinden işe koşulması öğrenmenin devamlılığı açısından kritik öneme sahiptir. Bu bağlar özelinde uyarlanabilir sistemlerin yapısının anlaşılması ve yapay zeka ile ilişkilendirilmesi değerli görülmektedir.

Tek biçimde öğrenme, herkes için aynı koşullarda aynı içerikle öğretim hedeflerine ulaşmak için oluşturulan eğitim anlayışı istendik öğrenme çıktılarına zaman zaman engel olabilmektedir (Şahin ve Kışla, 2013). İnsan fizyolojisi ve nörolojik yapısı öğrenme süreçlerinde farklı dinamiklerden etkilenebilmektedir. Bireysel farklılıkların da ötesinde aynı öğrenen için farklı zamanlarda farklı öğrenmeleri aktif olabilmektedir. Öğrenme sürecinin yapılandırılmasında bilişsel farklılıkları dikkate alan ve sürekli kendini güncelleyen sistem gereksinimi bulunmaktadır. Bu noktada kişiselleştirilebilir öğrenme ortamları öğrenme performansını olumlu katkılar sunabilmektedir. Ancak kişiselleştirilebilir öğrenme ortamlarında bireyin tercihleri ve istekleri her zaman mutlak öğrenme sürecinin zeminini temsil etmemektedir. Kişinin tercih ve taleplerinden daha çok kendisi için optimal bir sistem uyarlaması bir başka ifadeyle uyarlanabilir öğrenme ortamının tasarlanması oldukça değerli görülmektedir. Böylelikle kendi öğrenme sürecinin kapalı bir döngü içerisinde kendisi ile ilgili veri toplanması,

analiz edilmesi, yorumlanması ve geribildirim verilmesi sonrasında tekrar ihtiyaca göre verilerin değerlendirilmesi, iyileştirilmiş bir öğrenme sürecinin oluşmasına olanak sağlayacaktır. Buna olanak sağlayacak Uyarlanabilir öğrenme ortamları bireysel farklılıkları dinamik bir biçimde dikkate almaktadır (El-Sabagh, 2021; Liu vd., 2025). Ancak öğretici farklılıkları öğrenen farklılıkları öğretim programlarındaki uygulama farklılıkları dikkate alındığında akıllı öğrenme sistemlerinin bu süreç dahil edilmesi değerli görülmektedir. İşte bu noktada etkili yapay zeka araçlarının önemi tekrar açığa çıkmaktadır. Yapay zeka araçları duyusal bir yapı sunması da katılımcı davranışlarını analiz etme ve katılımcı yanıtlarına göre otomatik sistem uyarlaması yapabilmektedir. Uyarlanabilir öğrenme ortamları farkındalık durumu gözetmeksizin kişinin sistem üzerindeki hareketlerini takip etmekte ve aktif olarak güncellenmektedir.

2. YAPAY ZEKA DESTEKLİ UYARLAMA BİÇİMLERİ

Uyarlanabilir sistemler kendi içerisinde tek tip bir yapı sunmamaktadır. Uyarlama sürecini etkileyen birçok değişen bulunmaktadır. Bu değişkenler de süreç içerisinde farklılaşabilmektedir. Öğrencinin kendi istekleri dikkate alınabileceği gibi öğrencinin sistem üzerindeki hareketleri öğrenme performansına ilişkin ortaya çıkan performans ve öğrenme hedeflerine ulaşma performansının sürdürülebilirliği bu süreci etkilemektedir. Öğrencinin kendi istekleri zaman zaman kendi öğrenme sürecine ilişkin ipuçları verebilmektedir. Ancak kendi öğrenme stilini, öğrenme performansını etkileyen içerik türlerini bilmekte ve seçmekte zorlandıkları durumlar olmaktadır. Bu noktada uyarlama sürecinde bütüncül bakmak önceden belirlenmiş algoritmaların ötesine geçilerek dinamik bir sistem oluşturmak önem taşımaktadır. Böylelikle her seviyede öğrenme hedeflerine ulaşılıp ulaşılmadığı kontrol edilebilmektedir. Tüm kritik noktalarda başarı ve hatırlama durumlarına göre geribildirim seçenekleri sunulabilmektedir. Bu geribildirim türleri önceden belirlenmiş robot ize bir yanıt olabileceği gibi anlık biçimlendirmeye yönelik kompleks bir içerikte olabilir (Strielkowski vd., 2025). Bu bağlamda farklı uyarlama türlerini ve geribildirim mekanizmalarını tanımakta yarar görülmektedir.

2.1 Öğrenen Modeli

Öğrenen modelini belirleyen ilk unsur öğrencinin hazır bulunuşluk seviyesi ve konuya ilişkin farkındalık ve motivasyon düzeyleridir. Öğrencinin ön bilgi seviyesi öğrenme başarısını etkileyen önemli değişkenlerden biridir. Bu nedenle sistem uyarlaması ön bilgi seviyesinin konu ilgisinin, motivasyon durumlarının belirlenmesi ile başlayabilmektedir (Bulathwela vd., 2024). Sonrasında öğrenme hızı ve konuyu anlama performansı uyarlama sürecini belirleyen değişkenlerdir. Tüm noktalarda konu yanılgıları ve kavram hataları kontrol edilmekte iyileştirici düzenlemeler ile bu öğrenme hataları ortadan kaldırmaya çalışılmaktadır. Sistem üzerindeki hareketleri; konu ilgisinin ve motivasyonun düştüğünü, dikkatin dağıldığını ve artan hataları gösterirse biçim değişimi veya molalar ile süreç ilerletilebilmektedir.

2.2 Alan Modeli

Öğrenci üstü bir yapıyı hedefleyen modelde kavramlar, hiyerarşik durumlar ve konunun bütüncül yapısı ön planda tutulmaktadır. Önceden belirlenmiş öğrenme hedeflerine göre sistem akışı uyarlanmaktadır. Algoritmalar önceden belirlenmiş bir yapısı da sistemde yer

alabilmektedir. Tam öğrenmeyi hedefleyen bu modelde basitten karmaşığa, somuttan soyuta bir içerik akışı gözlenmektedir. Modeli ilişkin en temel noktalardan birisi her öğrenilen zor bir içeriğe tabi tutulmasından ziyade kendi öğrenme yeterliklerine uygun optimal bir uyarlamaya tabi olmasıdır (Temur, 2025). Sistem otomatik uyarlama tahminleri zaman zaman yanılabilir bu noktada alternatif öğrenme yaklaşımlarını ve yollarını belirleme görevi yine sistemin kendisine düşmektedir. Öğrenciden gelen geribildirimlere göre uygun içerik uyarlaması dinamik bir şekilde bu modelde de yerini almaktadır.

3. UYARLAMA ROBOTLARI VE DÖNÜT OLUŞTURMA YAKLAŞIMLARI

Uyarlama robotları bu sistemlerin vazgeçilmez öğesidir doğru uyarlama yaklaşımlarıyla beraber içerik uyarlaması ve düzenlemesi sağlanmaktadır. İçeriğin seçilmesi, sıralanması, zorluk seviyesinin belirlenmesinde rol almaktadır (Yıldırım, 2024). Öğrenci durumuna göre veya sistem üzerindeki yansımalarına göre öğrenme yolunu oluşturulmasında etkin görevler üstlenmektedir. Öğrenme hedefleri benzerlik gösterse de öğrenci farklılıklarına göre farklı öğrenme desenleri ve zenginleştirilmiş öğrenme içerikleri sunulabilmektedir. Tek tekrar da ve hızlı öğrenenler için pratik bir yapı sunulurken, çiiok tekrarlı ve yavaş öğrenenler için dinamik ve dönüştürülebilir bir yapı sistem üzerinde inşa edilebilmektedir. Uyarlama robotları öğrenen ve alan modelinde olduğu gibi sistemdeki tüm değişkenleri dikkate alarak uygun bir yapı sunmaktadır. Aynı öğrenen için tüm uygulamalarında ortak bir yapı oluşturmak yerine öğrenilen anlık tepkilerine göre farklı zamanlarda farklı içerik ve akış dinamiği de sunabilmektedir.

Öğretim elemanlarının ders öncesinde geri bildirimlerini hazırlaması için öğretim tasarımları oluşturması beklenir. Ancak tüm öğrencilere hitap eden ve ders anlatım performansına göre öğrencinin bilişsel hazırbulunuşluğuna göre mutlak ve sınırları belirlenmiş geri bildirimlerin önceden hazırlanması her zaman mümkün olmamaktadır. Anlık ve bireyselleştirilmiş geri bildirimlerin oluşturulması noktasında bu sistemler oldukça elverişli olmaktadır. Bireysel farkları dikkate alarak uyarlanabilir seviye ve alan testleri sunabilmektedir. Böylelikle öğrenme süreçleri analiz edilebilmekte öğrenme eksiklikleri ve hataları da en aza indirilebilmektedir.

3.1 Öğrenci ve Öğretmen Açısından Yapay Zeka Destekli Uyarlama

Yapay zeka yalnızca öğrenci performansı ile ilgilenen sınırlı tercihleri bulunan bir öğretim yardımcısı değildir. Öğrencinin performansını etkileyen tüm değişkenler göz önüne alınarak en etkili uyarlama modelini ortaya çıkarmaya çalışır. Öyle ki öğrenme dinamiklerinin kritik değişkenlerden biri de öğreticidir. Bütünüyle bu süreci değerlendirmek gerekirse öğrenci ve öğretici açısından yapay zeka destekli uyarlanabilir sistemlerin önemi açığa çıkmaktadır (Arslan, 2020).

Yapay zeka araçları için öğrenci ve öğretici etkileşimini taklit edebilmekte bu noktada önem taşımaktadır. Aslında yapay zekaya ait özelliklerden biri olan doğal dil işleminin bu noktada sürdürülebilir iletişim için kritik olduğu ifade edilebilir. Büyük veri işleme sistemlerinde mekanik, robotize yanıtlar arama motorları aracılığıyla sıklıkla karşılaştığımız manzaralardır. İşte tam bu noktada insani ifadelerin kullanılması karşılıklı iletişim simülasyonunu sağlanması yapay zeka destekli sistemler ile öğretim sürecinin iyileştirilmesi ve biçimlendirici dönütlerin verilmesi ile öğrenme performansında anlamlı değişiklikler yaşanabilmektedir. Öğrenci

tarafından bakıldığında kendisi için en uygun uyarlanmış sistemin öğrenme performansına katkı sağlaması olasıdır.

Öğrenme içeriğinin dinamik yapısı öğretim hedeflerine ulaşmayı kolaylaştırıcı bir unsurdur. Alternatif öğrenme içerikleri ile içeriye ait görseller ve metinlerle anlaşılırlığın artması mümkün olmaktadır. Bunun yanında öğrenme sürecinde kendi hatalarını fark etme ve bu hatalara ilişkin yapılandırılmış geri bildirimleri alma büyük yararlar sunmaktadır (Demartini vd., 2024). Öğretici tarafından bakıldığında ise öğretim tasarım içerisine entegre edilmiş doğru zamanda etkili oranda kullanılan yapay zeka destekleri alternatif çoklu ortam seçenekleri sunabilmektedir. Ders materyallerini hazırlama öğrenci takip sistemlerine kullanma ve bireysel farklılıkları dikkate alarak farklılaştırılmış dönüt mekanizmalarını oluşturma olanağı da sunmaktadır. Tüm bunların özelinde öğrenci, öğretici ve kurum yöneticileri tarafından yapay zeka araçlarının etkili kullanımına yönelik profesyoneller tarafından sağlanan hizmet içi eğitimler değerli görülmektedir. Bu eğitimlerde öğretim ve bilişim teknolojileri uzmanları, öğretici ve öğrenenlerin de yer alması değerli görülmektedir. Bunun ötesinde etkili, verimli yeni araçların tanıtılması farklılıkların kullanıcılara kazandırılması ve sürdürülebilir araç kullanımının standartlaştırılması değerlidir.

YAPAY ZEKA TEKNOLOJİLERİNİN BİRLEŞTİRİLMİŞ TEKNOLOJİ KABUL VE KULLANIM MODELİ BAĞLAMINDA DEĞERLENDİRİLMESİ

Doç. Dr. Barış AYAZ
Siirt Üniversitesi
baris.mercimek@siirt.edu.tr – 0000-0002-0368-4693

ÖZET

Tüm zamanlarda güncel ve yeni teknolojilerin bir kısmı eğitim ve öğretimle ilişkilendirilmiştir. Bu yararcı bir yaklaşım olmakla birlikte postmodernizme yenik düşme riski taşıyan kritik bir alandır. Öğrenme karmaşık bir süreç olmakla birlikte farklı metotlarla başarıya ulaştırılmaya çalışılan bir yapıdır. Yapay zeka teknolojileri öğrenme performansına hizmet etme potansiyeli taşıyan güçlü bir yeniliktir. Ancak teknoloji kullanımı noktasında istekli ve güncel gelişmeleri gündelik yaşam pratiğiyle harmanlayan öğreticiler için şartlar kolay olurken, teknolojik gelişmeleri kabul etmekte ve uygulamakta dirençli olan öğreticiler için birtakım zorluklar gündeme gelmektedir. Bu zorlukların ilk ve en önemlisi iyi yapılandırılmış yapay zeka teknoloji destekli sınıflarda öğrenme performansı istatistiksel olarak anlamlı ölçüde artarken, teknoloji kullanımını stresle karşılayan öğreticiler için bu deneysel süreç başlamadan sonlanmaktadır. Bu çalışmanın amacı da teknoloji kabul ve kullanım süreçleri ile yapay zeka teknolojilerini harmanlayarak beklenti ve uygun koşulları açıklayabilmektedir. Modelde öğreticinin yapay zeka teknolojisi kullanımında öğrenme performansının artacağına inanması için koşulların oluşması beklenir. Öğrenme performansı sağlanmasa bile öğretim sürecinde kolaylaştırıcı etkiler takip edilmektedir. Bunun yanında öğretici yapay zeka aracını kullanırken zorlanacağını hissederse sürecin işlevsel olması tehlikeye düşmektedir. Sosyal ve akademik çevrenin yapay zeka araçlarının kullanımı konusunda ki performansı ve söylemleri kritik öneme sahiptir. Bu sosyal etki kullanım başlama kararı ve sürdürme motivasyonunda önem taşımaktadır. Öğretmenin teknolojik araca kolay ulaşabilmesi, ücretsiz yararlanabilmesi ve tek seferlik değil, uzun süreli ve farklı araçları kullanabileceğine inanması mutlak beklentiler arasında yer almaktadır. Tüm bu psiko-sosyal değişkenler yapay zeka araçlarının etkili bir öğretim tasarımı içinde işlevsel bir yapıda yer almasına yardımcı olabilecektir. Donanımsal alt yapı, öğrenci teknoloji deneyimi ve etkileşim performansları da sınırlılıklar arasında gösterilebilir.

Anahtar Kelimeler : Yapay zeka, teknoloji kabul, öğrenme

1. GİRİŞ

Öğrenme açıklanması karmaşık, etkilendiği değişken sayısı oldukça fazla olan bir süreçtir. Etkili öğrenme ortamları ve çıktıları için uğraşlar gün geçtikçe farklı bir yapıya evrilmektedir (Cuthbert, 2005). 20. yy ortalarında radyo, televizyon ile başlayan uzaktan eğitim süreçleri günümüzde etkileşimli uyarlanabilir internet ortamlarına dönüşmüştür. Başka bir örnek olarak öğrenci-öğretici etkileşiminde jest mimikler yerini sanal etkileşim araçlarına bırakmıştır. Ancak

iletişim öğrenme süreçleri için asli unsur olma görevini korumaktadır. Ancak öğrenme performansını etkileyen değişkenler, uygulamalar ve tasarımlar gün geçtikçe değişmektedir. Bu değişimden öğrenci, öğretici ve içerik rolleri de etkilenmektedir.

Dikkat çeken ve kullanım alanları genişleyen web 2.0 araçları öğrenme ortamlarını da etkilemektedir (Hursen, 2021; Ziegler, 2022). Öğrenme yönetim sistemleri, açık ve uzaktan eğitim, tersyüz edilmiş öğrenme, metaverse kampüsler öğretim teknolojileri yolculuğunda yer edinmiş araçlardır. Bu hızlı dönüşümde son zamanlarda yapay zeka araçları da destekleyici görev ve sorumluluklar üstlenmiştir.

Öğrenme sürecini kolaylaştıran, öğrenme içeriğinin anlaşılırlığına destek olan yapay zeka araç ve uygulamaları bulunmaktadır. Öğrenci farklılıklarını dikkate alan, kişiselleştirilebilir öğretim içerikleri sunabilen mekanik ve istatistik tabanlı uygulamalardır. Duyuşsal bir tarafı olmayan, insansı rollerini sadece algoritma özelinde oluşturan yapay araçlar öğrenme ortamlarının yaygın yardımcı öğeleri haline gelmiştir.

2. YAPAY ZEKA VE ÖĞRENME

Finans, sağlık, eğlence, ulaşım, endüstri, savunma gibi birçok alanın yanında eğitim alanlarında da yapay zekadan yararlanılmaktadır. Öğrenme hedeflerine hızlı erişmeye olanak, öğrenci ödevlerine kolaylık sağlama gibi pratik yararları bulunmaktadır. Hızlı görsel oluşturma, istenilen içerikleri istenilen formata dönüştürme, istek ve konu içeriğine göre metinler, infografikler, posterler, akış diyagramları ve kavram haritaları hazırlama gibi özellikler taşımaktadır.

Yapay zeka öğrenme için yalnızca dijital bir araç değildir. Öğrenmenin tekrar tanımlanmasına, doğasına etki edebilecek güçlü bir ajandır. Bu araç ile öğrenenin önceki öğrenmeleri kaydedilebilmekte, davranışları ve talepleri analiz edilebilmekte ve sonraki öğrenmeleri için zemin hazırlanabilmektedir (Gligorea vd., 2023). Geleneksel sınıflarda tekil öğretim hedefleri dikkate alınırken yapay zeka destekli öğrenme ortamlarında her katılımcı, öğrenci için özelleştirilmiş içerikler mümkün olabilmektedir.

Öğrenci açısından çok sayıda yarar taşıyan yapay zeka araçları öğretici açısından da birtakım sorumluluklar üstlenmektedir. Akıllı öğretim araçları olarak düzenli geri bildirim ve dönüt sunabilmektedirler (Arannilewa vd., 2025; Gökçearslan vd., 2024; Özer, 2024). Bir öğretmen ve onlarca öğrencinin olduğu bir sınıfta bireysel farkların fark edilmesi, içeriğin hızlıca uyarlanması oldukça güçtür. Ancak yapay zeka ile öğrenme farklılıkları hızlıca tespit edilebilmekte ve hızlı aksiyonlar alınabilmektedir. Bu olumlulukların yanında öğrenmenin mekanikleşmesi, öğrenme isteğinin makine performansında göre biçimlenmesi, bilişsel sorumluluklardan kaçınma duygusu gibi sınırlılıklar karşımıza çıkmaktadır. Yapay zeka araçlarının bireysel isteklere, öğretici ve kurum zorunluluk anlayışına göre bırakılması olağan bir durumdur. Ancak etkili araçların kullanım yaygınlığı her zaman mümkün olmamaktadır. Bazı öğreticilerin derslerinde yapay zeka araçlarını kullanabilmesi kendi kişisel deneyimlerine ve teknoloji yeterliklerine göre şekillenebilmektedir. Kriterlerin bazıları öğreticiler tarafından karşılansa bile teknoloji kabul ve kullanım seviyeleri sürecin başlatılması, sağlıklı ilerletilmesi ve ölçme değerlendirmede bu araçların kullanımının sağlanması için kritik öneme sahiptir.

3. TEKNOLOJİ KABUL VE KULLANIM MEKANİZMASI

Zaman içinde yeni araçlar, uygulamalar ve materyaller karşımıza çıkmaktadır. Öğretici açısından bakıldığında yeni ve güncel olan teknolojileri kullanma noktasında her zaman yüksek katılım ve dijital bilgelik davranışı beklemek makul değildir. Ancak teknolojiyi kabul etme, benimseme ve kullanma niyetinde olma değerlidir. Teknoloji kullanım kararını etkileyen farklı değişkenler mevcuttur. Kullanıcı teknolojik araca ve sürece ilişkin duygularını önemsemektedir. Tedirginlik, yabancılık, endişe, umutsuzluk, utanma gibi duyguların ortaya çıkma potansiyeli bile karar verme dinamiklerini etkilemektedir. Bununla birlikte saygınlar, sosyal pozitif etki, takdir, ödüllendirilme gibi durumlar da olumlu teknoloji kabul kullanım süreçlerini beraberinde getirmektedir.

Teknoloji kabulü bilimsel alanyazında açıklamaya çalışan birtakım modeller bulunmaktadır. Bu modellerden bazıları aşağıda listelenmiştir.

- **Teknoloji Kabul Modeli (TAM- Technology Acceptance Model)**

İki temel değişken bulunur; Algılanan Fayda-Algılanan Kullanım Kolaylığı. Model kullancıının olumlu tutum içinde olmasını ve uygulama ve araçların kolay kullanıma sahip olmasını beklemektedir (Davis vd., 1989; Silva, 2015). Bu koşullarda kullanım kararı ortaya çıkabilmektedir.

- **Genişletilmiş Teknoloji Kabul Modeli**

Çevre etkisini, mesleki ve dijital deneyimi, öznel değerleri ve doyum durumunu önemseyen genişletilmiş ve teknoloji kabul modelidir (Yörük vd., 2025).

- **Birleştirilmiş Teknoloji Kabul ve Kullanım Modeli**

Bu modelde önceki teknoloji kabul ve kullanım modellerinin birleştirilmiş ve zenginleştirilmiş bir yapısı karşımıza çıkmaktadır (Venkatesh, 2015). Öncelikle öğretim elemanının iş ve öğrenme başarısı anlamındaki performans beklentisi kritik önem taşımaktadır. Öğretim elemanı teknolojik kabulüyle öğrenme performansı anlamındaki değişimi öncesinde kestirmek istemektedir. Bir sonraki değişken ise teknolojik kullanım sürecinin kolay ve pratik olma durumudur. Öğretmen düşük çaba harcayarak benzer veya üst seviye öğrenme hedeflerine ulaşabilmeyi istemektedir. Deneyimlerinde dijital araç kullanımı, etkili web 2.0 entegrasyonu yer almayan öğreticiler için belirleyici bir basamak burası olmaktadır. Sosyal etki ise teknoloji kullanımını etkileyen önemli değişkenlerden biridir. Kullanıcının çevre etkisi ve beklentisi içinde karar mekanizmalarında değişiklikler gözlenebilmektedir. Meslektaşlar, idareciler, alan öncüleri bu noktada kullanım niyetine etkileyebilmektedir. Kurumsal eğitim ortamlarında ise zaman zaman zorunluluk olarak bu beklentiler oluşabilmektedir ancak tüm bu durumlar öğreticinin sosyal çevresinin kendi teknoloji kullanımı üzerindeki etkileri olarak özetlenebilir. Modele ilişkin kritik bir diğer başlık ise kolaylaştırıcı koşullardır. Öğreticiler teknoloji kullanımında istekli olsalar dahi kullanım sırasında karşılaşabilecekleri problemlere ilişkin endişe duyabilmektedirler. İşte bu noktada teknoloji ve içerik anlamında destek olabilecek uzmanlara gereksinim bulunmaktadır. Yakın çevrede bu ihtiyaçların karşılanabilmesi öğretici açısından kolaylaştırıcı bir süreç olarak bellekte yer edinmektedir. Bir takım araç, materyal, yazılım, donanım desteklerinin bulunması veya özel programların ücretsiz olarak sunulabilmesi bu değişkene hizmet eden yardımcı unsurlardır. Tüm bu değişkenler teknoloji kullanımına niyet edilecek davranış örtüsünün ortaya çıkmasına olanak sağlamaktadır. Teknolojinin kabulü ile

birlikte risklerin azaltılması, teknolojik desteğin artırılması, akademik ve Sosyal çevrenin desteğiyle birlikte teknoloji kabul ve kullanım niyeti artık kullanım davranışına dönüşebilmektedir (Williams vd., 2015). Tüm bunların özetinde teknoloji kabul kullanımını etkileyen değişkenler tek bir çatı altında ifade edilmesi bir takım sınırlıkları beraberinde getirmektedir. Bu nedenle teknoloji kabul ve kullanım sürecini etkileyen değişkenleri basamak basamak irdelenmesi ve kritik durumlarda müdahale edilmesi ile teknoloji deneyimlerinin sınıf ortamlarında artırılması ve iyileştirilmesi beklentiler arasında yer almaktadır**.**

Öğretici yorulacağı, zorlanacağı, beklentinin ötesinde performans harcaması gereken teknoloji kullanımına direnç gösterebilir. Kolay ve pratik kullanıma sahip araçların kullanım motivasyonu daha yüksek olmaktadır (Oye vd., 2014). Sosyal çevrenin olumlu ifadeleri ve tebrikleri kullanım kararını vermeyi ve profesyonel yaklaşımları benimsemeyi desteklemektedir. Son olarak teknoloji ve uygulama içeriği, kullanımı noktasında dijital destek personeli bulunması, ücretsiz erişim gibi kolaylaştırıcı koşullar da teknoloji kabul ve kullanım motivasyonunu etkilemektedir. Modele ilişkin temel değişkenleri; Performans beklentisi, çaba beklentisi, sosyal etki ve kolaylaştırıcı koşullar olarak sıralamak mümkündür (Ursavaş, 2022).

Görsel 1. *Zengin teknolojilerle donatılmış sınıfta teknoloji kabul kullanım seviyesi yüksek olan öğretici*

**Bir yapay zeka robotu olan Gemini ile tasarlanmıştır.*

Birleştirilmiş Teknoloji Kabul ve Kullanım modeli kritik değişkenleri olan performans ve çaba beklentileri, kolaylaştırıcı etkiler yapay zeka teknolojileri ile oldukça istendik seviyelere gelebilmektedir. Öyle ki yapay zeka aracının sunduğu olanaklar düşük performans ve çaba ile pratik öğretim süreçlerine zemin hazırlamaktadır. Bu bağlamda yeni bir aracı tanımanın, kullanmanın ve örneklendirme sürecinin deneyimlemesine gerek kalmadan etkili bir öğrenme süreci yapay zeka destekleri mümkün olabilmektedir. Yapay zeka aracının kullanım

problemlerinde kendisi veya farklı bir araç yardım edebilmekte ve kullanım prosedürleri hakkında bilgi verebilmektedir. Yalnızca bu özelliği ile Birleştirilmiş Teknoloji Kabul ve Kullanım Modelinin faktörlerine büyük ölçüde karşılık gelmektedir.

4. TEKNOLOJİ KABUL VE KULLANIMINDA YAPAY ZEKA; Öğretici-Öğrenci

Öğreticinin teknoloji kabul ve kullanım durumları öğrencinin de etkili öğrenme olanaklarına kavuşmasına zemin hazırlamaktadır. Etkili öğrenme ortamları oluşturulabilen bir öğretici öğrenci başarısını ve öğrenme performansını da aynı ciddiyetle ve özenle takip edebilme potansiyeline sahiptir. Öğrencilerin öğrenme sürecinde yaşadıkları problemleri fark etmek, öğrenme sorunlarını gidermek, iyileştirilmiş ve biçimlendirilmiş geri dönütler vermek bu sürecin önemli sorumluluklarıdır. Öğrenci süreçte yaşadığı problemleri çözebilmeli ve öğrenme eksikliklerini kapatabilmelidir. Bu bazen yalnızca öğrencinin çabasıyla olabileceği gibi bazen öğreticinin de birebir olarak problemleri tespit etmesine bağlı olabilmektedir. Ancak kalabalık sınıflarda ve büyük öğrenme gruplarında bir öğreticinin onlarca, belki yüzlerce öğrenciye aynı anda ulaşabilmesi, her birinin ayrı ayrı öğrenme problemlerini belirleyebilmesi oldukça güçtür. Bu noktada güncel dijital teknoloji araçları ve başta yapay zeka teknolojileri olmak üzere bir çok yardımcı öğe bulunmaktadır. Ancak teknolojinin kendisi sorun belirleme ve çözme noktasında her zaman yeterli olmamaktadır. Bu noktada etkin güncel, işlevsel ve öğretim elemanını da sistem içerisine dahil eden uyarlama, düzenleme ve geribildirim sistemlerine gereksinim duyulmaktadır. Zaman zamanda öğrencinin yaşadığı problemleri tespit edebilen veya alternatif problem durumlarına algoritmik olarak sunabilen yapay zeka destek araçları da bulunmaktadır. Bu teknolojiler öğrencinin ilgisi ve isteği doğrultusunda başlayan süreçte gerçekleşen öğrenme problemlerine ve bu problemlerin kaynaklarına tespit etmekte sorumluluk üstlenmektedir (González-Calatayud vd., 2021; Sangapu, 2018). Bu sorumluluk duygusal olarak değil mekanik olarak ortaya çıkmaktadır. Sistem üzerindeki hareketler ve öğrenme başarısını istendik seviyeye getirmeyen unsurlar tespit edilmekte ve bu sorunların iyileştirilmesine yönelik alternatif ders izlence rotaları oluşturulmaktadır. Bu rotalar öğrenme stilleri farklılıklarına, motivasyon düşüklerine neden olan kritik durumları tespit etmekte de görev almakta ve yeni haritaların oluşturulmasında özne konumuna geçmektedir.

Öğretici açısından bakıldığında yapay zeka araçları öğrencinin etkili geri bildirimler alabilmesi ve bireysel farklılıklara dikkate alan öğrenme süreçlerinin aktif edilebilmesi açısından değerli görülmektedir. Öğrenci kendi hızında öğrenme yerine takip edebilmekte, farklı konu kaynakları ve soru tarzları ile öğrenme şemasını şekillendirebilmektedir.

5. GENEL DEĞERLENDİRME VE SONUÇLAR

Yapay zeka yorumlamaları ile karmaşık ve farklı algoritmalarla hayatımızı şekillendiren dinamik bir teknolojidir. Yaygın kullanım alanları olması sebebiyle farklı sektör kullanıcılarının dikkatini çekmektedir. Bu araştırmada eğitim ortamlarında teknoloji kabul ve kullanım kararı verecek öğreticilerin yapay zeka araçlarından alabileceği destek irdelenmektedir. Öğretici yapay zeka aracıyla içeriğe erişebilmekte, örnekler oluşturabilmekte, ölçme-değerlendirme araçları geliştirebilmektedir. Bunun yanında görsel ve infografikler oluşturabilmekte, hatırlama ve öğrenme performansında katkı sağlayacak ses-görsel birlikte içerikler üretebilmektedir. Tüm bunlar öğreticinin teknolojiyi kabul etmesinde önemli etkenler

olmaktadır (Lin vd., 2022). Birleştirilmiş Teknoloji Kabul ve Kullanım Modeli değişkenleri kapsamında yapay zeka etkileri aşağıda başlıklar halinde değinilmiştir.

5.1 Performans Beklentisi

Yapay zeka araçları öğrenme performansında önemli katkılar sunmaktadır. Ancak modelin ilgisi bu basamakta öğreticinin performans beklentisi üzerinedir. Öğretici aracı kullanırken zaman, enerji, öğrenci performansı gibi kritik durumları gözetir (Du ve Lv, 2024). Bu koşulların iyileşmesi söz konusu ise teknoloji kullanımına niyet edilebilir. Modeli yordayan en güçlü değişkenlerden biridir.

5.2 Çaba Beklentisi

Web 2.0 araçlarından bazıları kullanım açısından elverişsiz bir arayüze sahiptir. Sezgisel ilerleme açısından problemler çıkarabilen araçlar öğreticiler tarafından sıklıkla tercih edilmemektedir. Bu bağlamda kullanım kolaylığı ve rahatlığı olan yapay zeka araçları sürdürülebilir bir kullanıma sahip olmaktadır. Öğretici bu uygulamayı isteklerim doğrultusunda düşük fiziksel ve bilişsel çaba harcayarak kullanabilirim düşüncesinde olduğu sürece teknoloji kabul ve kullanım seviyesi artmaktadır.

5.3 Sosyal Etki

Kurum idari ve akademik personellerinin doğrudan veya dolaylı olarak yapay zeka araçlarının kullanımına ilişkin davranış örüntüleri diğer personelin de ihtiyaç ve kullanım alanlarını tekrar kontrol etmesini gerektirebilir. Yöneticinin öğreticiden yapay zeka araçlarını kullanmasını istemesi veya okulun saygın öğretmenlerinin bu araçları kullanarak öğrenci öğrenme performanslarına katkı sağladığının gözlenmesi teknoloji kabul ve kullanım sürecinde niyeti olumlu tarafta tutmaktadır.

5.4 Kolaylaştırıcı Koşullar

Ücretsiz veya kurum desteği olan uygulamalar, teknik destek personeli, güçlü bir altyapı teknoloji kullanımı için kolaylaştırıcı unsurlar arasında yer almaktadır. Etkileşimli yapay zeka araçları kullanırken tüm kullanıcıların tablet, telefon veya bilgisayar sahip olması da bu kolaylaştırıcı unsurlar arasında gösterilmektedir. Öğretici yapay zeka aracını kullanmak istediğinde içsel ve dışsal bir engelleyici durum yoksa sürecin pozitif ilerlemesi oldukça güçlüdür (Chen vd., 2025).

Yapay zeka araçlarının kullanım amaçları ve etkililik durumları farklılaşmaktadır. Öğretmenlerin de etkili araçları tercih etmesi ve uygun pedagojik yaklaşımlarla, etkili konu bilgisi aktarımıyla teknoloji entegrasyonunu sağlaması beklenir. Farklı araçların öğretici tarafından benimsenmesi ve sürdürülebilir kullanıma sahip olması için teknolojiyi kabul etmeleri, kullanmaya karşı olumlu tutum içinde olmaları ve kullanım kaygılarının en aza indirilmesi beklenir. Bu farklı birimlerin ve kişilerin koordineli çalışması ile mümkün olabilecek karmaşık ancak önemli çıktılar için potansiyel taşıyan bir sürecin zeminini oluşturmaktadır.

ÖZET

Dijitalleşmenin hız kazanmasıyla birlikte internet, ifade özgürlüğünün en etkili kullanım alanlarından biri hâline gelmiş; buna paralel olarak yanlış, yanıltıcı veya kasıtlı olarak manipülatif nitelik taşıyan içeriklerin yayılımı da ciddi biçimde artmıştır. Bu durum, devletleri ve uluslararası kuruluşları "dezenformasyonla mücadele" başlığı altında çeşitli hukuki ve idari önlemler almaya yöneltmiştir. Ancak söz konusu önlemler, ifade özgürlüğünün demokratik toplumdaki merkezi rolü nedeniyle, insan hakları hukuku bakımından önemli tartışmaları da beraberinde getirmektedir. Özellikle internette dolaşıma giren içeriklerin sınırlandırılması veya kaldırılması yönündeki müdahaleler, ifade özgürlüğünün özü ile kamu düzeninin korunması arasındaki hassas dengeyi yeniden gündeme taşımaktadır.Bu bağlamda, Avrupa İnsan Hakları Sözleşmesi'nin 10. maddesi uyarınca ifade özgürlüğüne getirilecek sınırlamaların kanunilik, meşru amaç ve demokratik toplumda gereklilik ölçütlerini karşılaması zorunludur. Ne var ki dezenformasyon kavramının belirsiz ve geniş bir içerikle tanımlanması, uygulamada keyfî müdahalelere zemin hazırlayabilmektedir. Özellikle sosyal medya platformlarının içerik denetimi süreçlerinde üstlendikleri rol, devlet müdahalesi ile özel aktörlerin fiilî sansür uygulamaları arasındaki ayrımı bulanıklaştırmaktadır. Bu durum, ifade özgürlüğünün dolaylı biçimde sınırlandırılması riskini artırmakta ve "soğutucu etki" doğurmaktadır.Bu çalışma kapsamında savunulan temel tez, dezenformasyonla mücadelenin meşru bir kamu yararı amacı taşıdığı kabul edilmekle birlikte, bu mücadelenin belirsiz normlara ve geniş takdir yetkisine dayandırılmasının ifade özgürlüğü açısından yapısal bir tehdit oluşturduğudur. Bu nedenle, internet ortamında alınacak önlemlerin sıkı bir orantılılık denetimine tabi tutulması, yargısal güvencelerle desteklenmesi ve ifade özgürlüğünün demokratik toplumdaki işlevini zedelemeyecek şekilde tasarlanması gerekmektedir. Aksi hâlde, dezenformasyonla mücadele söylemi, çoğulcu kamusal tartışma ortamını sınırlayan bir araca dönüşme tehlikesi taşımaktadır.

Anahtar Kelimeler: İfade özgürlüğü, Dezenformasyon, İnternet hukuku, İnsan hakları hukuku, Orantılılık ilkesi.

THE FRAGILE BALANCE BETWEEN COMBATING DISINFORMATION on the INTERNET and FREEDOM of EXPRESSION

Dr. Lecturer Betül ÇATAL

ABSTRACT

With the rapid acceleration of digitalisation, the internet has become one of the most effective platforms for the exercise of freedom of expression. At the same time, the dissemination of false, misleading, or deliberately manipulative content has increased significantly. This development has prompted states and international organisations to adopt various legal and administrative measures under the heading of "combating disinformation." However, due to the central role of freedom of expression in a democratic society, such measures have given rise to substantial debates within the framework of human rights law. In particular, interventions aimed at restricting or removing online content have brought the delicate balance between the essence of freedom of expression and the protection of public order back to the forefront.In this context, pursuant to Article 10 of the European Convention on Human Rights, any restriction on freedom of expression must satisfy the requirements of legality, legitimacy of aim, and necessity in a democratic society. Nevertheless, the vague and overly broad definition of the concept of disinformation may pave the way for arbitrary interventions in practice. The role assumed by social media platforms in content moderation processes further blurs the distinction between state interference and the de facto censorship exercised by private actors. This situation increases the risk of indirect restrictions on freedom of expression and gives rise to a chilling effect on public debate.Within the scope of this study, it is argued that although combating disinformation serves a legitimate public interest, grounding such efforts on ambiguous norms and broad discretionary powers constitutes a structural threat to freedom of expression. Accordingly, measures adopted in the online environment must be subject to strict proportionality review, supported by effective judicial safeguards, and designed in a manner that does not undermine the function of freedom of expression in a democratic society. Otherwise, the discourse of combating disinformation risks transforming into a tool that restricts pluralistic public debate rather than protecting it.

Keywords: Freedom of Expression, Disinformation, Internet Law, Human Rights Law, Principle of Proportionality

1.GİRİŞ

Dijital iletişim teknolojilerindeki hızlı gelişim, ifade özgürlüğünün kullanım alanlarını köklü biçimde dönüştürmüş; internet, bireylerin düşünce ve kanaatlerini kamusal alanda açıklayabildikleri en etkili mecralardan biri hâline gelmiştir. Özellikle sosyal medya platformları aracılığıyla bilgiye erişimin ve bilginin yayılımının büyük ölçüde hız kazanması, demokratik toplumlarda kamusal tartışmanın kapsamını genişletirken, aynı zamanda yanlış, yanıltıcı veya kasıtlı olarak manipülatif nitelik taşıyan içeriklerin dolaşımını da artırmıştır. Bu

gelişme, “dezenformasyon” olgusunu yalnızca teknik ya da toplumsal bir sorun olmaktan çıkararak, doğrudan insan hakları hukukunun ilgi alanına giren normatif bir mesele hâline getirmiştir.

Son yıllarda dezenformasyonun özellikle seçim süreçleri, kamu sağlığı, ulusal güvenlik ve toplumsal barış üzerindeki olası etkilerine ilişkin endişelerin artması, devletleri ve uluslararası kuruluşları bu olguyla mücadele etmeye yönelik hukuki ve idari düzenlemeler yapmaya sevk etmiştir. Ancak bu çabalar, ifade özgürlüğünün demokratik toplum düzenindeki kurucu rolü nedeniyle ciddi bir gerilim alanını da beraberinde getirmektedir. Zira internet ortamında paylaşılan içeriklerin sınırlandırılması, kaldırılması veya görünürlüğünün azaltılması gibi müdahaleler, çoğu zaman ifade özgürlüğünün özüne dokunabilecek nitelikte sonuçlar doğurabilmektedir. Bu noktada, dezenformasyonla mücadele amacıyla alınan önlemlerin, demokratik bir toplumda kabul edilebilir sınırları aşma riski taşıyıp taşımadığı sorusu merkezi bir önem kazanmaktadır.

İfade özgürlüğüne getirilecek sınırlamaların hukuki çerçevesi, başta Avrupa İnsan Hakları Sözleşmesi’nin 10. maddesi olmak üzere, uluslararası insan hakları belgeleri ve Avrupa İnsan Hakları Mahkemesi içtihadı tarafından belirlenmektedir. Buna göre, ifade özgürlüğüne yönelik müdahalelerin kanunla öngörülmüş olması, meşru bir amaç gütmesi ve demokratik toplumda gerekli ve orantılı olması zorunludur. Bununla birlikte, “dezenformasyon” kavramının çoğu zaman belirsiz, geniş ve muğlak biçimde tanımlanması, bu ölçütlerin uygulamada aşındırılmasına yol açabilmektedir. Özellikle dijital platformların içerik denetimi süreçlerinde artan rolü, devlet müdahalesi ile özel aktörler eliyle gerçekleştirilen fiilî sansür uygulamaları arasındaki sınırları bulanıklaştırmakta; bu durum ifade özgürlüğü üzerinde dolaylı fakat etkili sınırlamalar doğurabilmektedir.

Bu çalışma, internet ortamında dezenformasyonla mücadele ile ifade özgürlüğünün korunması arasındaki kırılgan dengeyi insan hakları hukuku perspektifinden incelemeyi amaçlamaktadır. Çalışmanın temel tezi, dezenformasyonla mücadelenin meşru bir kamu yararı hedefi taşıdığı kabul edilmekle birlikte, bu mücadelenin belirsiz normlara ve geniş takdir yetkisine dayanması hâlinde ifade özgürlüğü açısından yapısal bir tehdit oluşturduğudur. Bu çerçevede çalışma, dijital alanda alınacak önlemlerin sıkı bir orantılılık denetimine tabi tutulması, etkili yargısal güvencelerle desteklenmesi ve ifade özgürlüğünün demokratik toplumdaki işlevini zedelemeyecek şekilde tasarlanması gerektiğini savunmaktadır.

2.DEZENFORMASYON KAVRAMI VE DİJİTAL KAMUSAL ALANDAKİ DÖNÜŞÜM

Dijitalleşme süreci, bilginin üretilme ve dolaşıma girme biçimlerini köklü biçimde dönüştürmüş; internet ve özellikle sosyal medya platformları, kamusal tartışmanın temel mecraları hâline gelmiştir. Manuel Castells, ağ toplumunda iletişim süreçlerinde merkezin olmadığı ve bireylerin kamusal söyleme katılım imkânlarının tarihsel olarak benzeri görülmemiş ölçüde genişlediğini belirtmektedir (Castells, 2012, ss. 4–6). Ancak bu dönüşüm, ifade özgürlüğünün güçlenmesiyle birlikte, yanlış ve yanıltıcı bilgilerin hızla yayılması riskini de beraberinde getirmiştir (Castells, 2012, s. 12).

Dijital kamusal alanın hız, erişilebilirlik ve düşük maliyet gibi yapısal özellikleri, bilginin doğruluk denetiminden geçmeden yayılmasını kolaylaştırmaktadır. Benkler, Faris ve Roberts, özellikle sosyal medya ekosisteminde doğrulama mekanizmalarının zayıflamasının, dezenformasyonun yayılması için elverişli bir ortam yarattığını vurgulamaktadır (Benkler et al., 2018, ss. 25–27). Yazarlara göre, bu durum kamusal tartışmanın rasyonel zeminden kopmasına ve kutuplaşmanın derinleşmesine yol açmaktadır (Benkler et al., 2018, s. 34).

Bu bağlamda "dezenformasyon" kavramı, son yıllarda uluslararası belgelerde ve akademik literatürde merkezi bir yer edinmiştir. Avrupa Komisyonu, dezenformasyonu "ekonomik kazanç sağlamak veya kamuoyunu kasıtlı olarak yanıltmak amacıyla üretilen ve yayılan yanlış ya da yanıltıcı bilgiler" olarak tanımlamaktadır (European Commission, 2018, s. 3). Bu tanım, kasıt unsurunu merkeze alması bakımından dikkat çekici olmakla birlikte, kavramın sınırlarının hâlen belirsiz kaldığı yönünde eleştirilmektedir (European Commission, 2018, s. 6).

Benzer şekilde Birleşmiş Milletler İfade Özgürlüğü Özel Raportörü, dezenformasyonla mücadele politikalarının ifade özgürlüğü üzerinde ciddi riskler barındırdığını vurgulamış ve özellikle muğlak tanımlara dayalı düzenlemelerin keyfî müdahalelere yol açabileceğini belirtmiştir (UN Human Rights Council, 2018, ss. 6–7). Raporda, yanlış bilginin her türünün otomatik olarak yasaklanmasının, demokratik toplumla bağdaşmayacağı açıkça ifade edilmektedir (UN Human Rights Council, 2018, s. 9).

Akademik literatürde kavramsal belirsizliği gidermeye yönelik önemli katkılardan biri Wardle ve Derakhshan tarafından yapılmıştır. Yazarlar, bilgi bozukluğunu "misinformation", "disinformation" ve "malinformation" şeklinde üçlü bir ayrıma tabi tutarak, kasıt unsurunun hukuki değerlendirme açısından belirleyici olduğuna dikkat çekmektedir (Wardle & Derakhshan, 2017, ss. 20–22). Bu ayrım, ifade özgürlüğüne getirilecek sınırlamaların kapsamının belirlenmesi bakımından kritik öneme sahiptir (Wardle & Derakhshan, 2017, s. 27).

Dijital platformların algoritmik yapısı, dezenformasyonun etkisini daha da artırmaktadır. Pariser, algoritmik filtreleme sistemlerinin kullanıcıları kendi görüşleriyle uyumlu içeriklere maruz bırakarak "filtre balonları" yarattığını belirtmektedir (Pariser, 2011, ss. 9–11). Bu durum, yanlış bilgilerin sorgulanmadan kabul edilmesine ve kamusal tartışmanın çoğulcu niteliğinin zayıflamasına neden olmaktadır (Pariser, 2011, s. 15).

Cass Sunstein de benzer şekilde, dijital ortamda bireylerin karşıt görüşlerle temasının azalmasının demokratik müzakereyi olumsuz etkilediğini vurgulamaktadır. Sunstein'e göre yankı odaları, yalnızca yanlış bilginin yayılmasını hızlandırmakla kalmamakta, aynı zamanda demokratik toplumun temelini oluşturan hoşgörü ve çoğulculuk değerlerini de aşındırmaktadır (Sunstein, 2017, ss. 65–68).

Dezenformasyonun demokratik süreçler üzerindeki etkisi özellikle seçim dönemlerinde belirgin hâle gelmektedir. Allcott ve Gentzkow, 2016 ABD Başkanlık Seçimleri sırasında sosyal medya üzerinden yayılan sahte haberlerin milyonlarca kullanıcıya ulaştığını ve seçmen davranışı üzerinde etkili olabildiğini ortaya koymuştur (Allcott & Gentzkow, 2017, ss. 213–214). Bu bulgular, dezenformasyonu yalnızca bireysel bir yanıltma sorunu olmaktan çıkararak,

demokratik meşruiyetle doğrudan ilişkili bir mesele hâline getirmektedir (Allcott & Gentzkow, 2017, s. 227).

Bununla birlikte, dezenformasyonla mücadele amacıyla geliştirilen hukuki düzenlemelerin ifade özgürlüğü üzerinde orantısız sınırlamalar doğurabileceği yönünde güçlü eleştiriler bulunmaktadır. David Kaye, belirsiz kavramlara dayalı müdahalelerin kamu otoritelerine aşırı takdir yetkisi tanıdığını ve bunun ifade özgürlüğü üzerinde "soğutucu etki" yarattığını belirtmektedir (Kaye, 2019, ss. 42–45). Benzer biçimde Barendt, ifade özgürlüğüne yönelik dolaylı ve belirsiz sınırlamaların, bireylerin meşru eleştirel görüşlerini açıklamaktan kaçınmalarına yol açabileceğini vurgulamaktadır (Barendt, 2005, ss. 107–109).

Son olarak, dijital platformların içerik denetimi süreçlerinde üstlendikleri rol, hukuki tartışmayı daha da karmaşık hâle getirmektedir. Gillespie, özel şirketlerin kamusal söylemin sınırlarını fiilen belirler hâle gelmesinin demokratik meşruiyet açısından ciddi sorunlar doğurduğunu ifade etmektedir (Gillespie, 2018, ss. 3–5). Douek ise bu durumun, devlet müdahalesi olmaksızın ifade özgürlüğünün fiilen sınırlandırılmasına yol açtığını ve insan hakları hukukunda yeni bir denge arayışını zorunlu kıldığını savunmaktadır (Douek, 2020, ss. 781–784).

3. DEZENFORMASYONLA MÜCADELE BAĞLAMINDA İFADE ÖZGÜRLÜĞÜNÜN HUKUKİ ÇERÇEVESİ: AİHS MADDE 10 VE AVRUPA İNSAN HAKLARI MAHKEMESİ İÇTİHADI

İfade özgürlüğü, demokratik toplum düzeninin temel unsurlarından biri olup, Avrupa İnsan Hakları Sözleşmesi'nin (AİHS) 10. maddesi ile güvence altına alınmıştır. Sözleşme'nin 10. maddesi, yalnızca bireylerin düşüncelerini açıklama hakkını değil, aynı zamanda bilgi ve fikir alma ve verme özgürlüğünü de kapsamaktadır (Council of Europe, 1950, art. 10). Avrupa İnsan Hakları Mahkemesi (AİHM), ifade özgürlüğünü "demokratik toplumun asli temellerinden biri" olarak nitelendirmekte ve bu özgürlüğün yalnızca "hoş karşılanan" ya da "zararsız" görülen ifadeler için değil, aynı zamanda "rahatsız eden, sarsan veya inciten" ifadeler için de geçerli olduğunu vurgulamaktadır (Handyside v. United Kingdom, 1976, §49).

AİHM içtihadına göre ifade özgürlüğüne yönelik her türlü müdahale, üç aşamalı bir denetime tabi tutulmaktadır. Buna göre müdahalenin sırasıyla kanunla öngörülmüş olması, Sözleşme'nin 10. maddesinin ikinci fıkrasında sayılan meşru amaçlardan birini gütmesi ve demokratik bir toplumda gerekli olması gerekmektedir (Sunday Times v. United Kingdom (No. 1), 1979, §62). Mahkeme, bu ölçütlerin bir bütün olarak değerlendirilmesi gerektiğini ve özellikle "demokratik toplumda gereklilik" kriterinin dar yorumlanması gerektiğini istikrarlı biçimde belirtmektedir (Harris et al., 2018, ss. 612–615).

Dezenformasyonla mücadele kapsamında alınan önlemler genellikle "ulusal güvenliğin korunması", "kamu düzeninin sağlanması" veya "başkalarının hak ve itibarlarının korunması" gibi meşru amaçlara dayandırılmaktadır. Ancak AİHM, bir müdahalenin meşru amaç gütmesinin tek başına yeterli olmadığını, müdahalenin aynı zamanda zorlayıcı bir toplumsal ihtiyaca cevap vermesi gerektiğini ifade etmektedir (Observer and Guardian v. United Kingdom, 1991, §59). Bu bağlamda Mahkeme, devletlerin sahip olduğu takdir yetkisinin

sınırsız olmadığını ve sıkı bir orantılılık denetimine tabi tutulması gerektiğini vurgulamaktadır (Barendt, 2005, ss. 172–174).

AİHM içtihadında özellikle internet ortamındaki ifade özgürlüğüne ilişkin davalar, dezenformasyonla mücadele tartışmaları bakımından özel bir önem taşımaktadır. Mahkeme, Delfi AS v. Estonia kararında, çevrim içi haber platformlarının üçüncü kişiler tarafından yapılan yorumlardan doğan sorumluluğunu ele almış; ancak bu sorumluluğun istisnai nitelikte olduğunu ve somut olayın koşullarına bağlı olarak değerlendirilmesi gerektiğini açıkça belirtmiştir (Delfi AS v. Estonia [GC], 2015, §§131–133). Kararda Mahkeme, otomatik ve genelleştirilmiş içerik kaldırma yükümlülüklerinin ifade özgürlüğü üzerinde caydırıcı etki yaratabileceğine dikkat çekmiştir (Delfi, 2015, §140).

Benzer şekilde Mahkeme, Magyar Jeti Zrt v. Hungary kararında, bir haber sitesinin yalnızca bir bağlantı (hyperlink) paylaşması nedeniyle sorumlu tutulmasının ifade özgürlüğünü ihlal ettiğine hükmetmiştir. AİHM'e göre, internette bilgiye erişimin ve bilginin dolaşımının temel araçlarından biri olan bağlantı verme eyleminin otomatik olarak sorumluluk doğurması, kamusal tartışmayı ciddi biçimde sınırlama riski taşımaktadır (Magyar Jeti Zrt v. Hungary, 2018, §§76–84). Bu karar, dezenformasyonla mücadelede araçların niteliğinin ve kapsamının belirlenmesi bakımından yol gösterici niteliktedir.

AİHM, ifade özgürlüğü üzerinde "soğutucu etki" (chilling effect) yaratabilecek müdahalelere özel bir hassasiyet göstermektedir. Mahkeme'ye göre, belirsiz ve öngörülemez hukuki düzenlemeler, bireylerin meşru görüşlerini açıklamaktan kaçınmalarına yol açabilir ve bu durum demokratik toplumla bağdaşmaz (Cumpănă and Mazăre v. Romania [GC], 2004, §114). Dezenformasyon kavramının geniş ve muğlak biçimde tanımlandığı düzenlemeler, bu bağlamda özellikle sorunlu görülmektedir (Kaye, 2019, ss. 56–58).

Son dönemde Mahkeme'nin Sanchez v. France kararında, sosyal medya kullanıcılarının üçüncü kişilerin paylaşımlarından doğan sorumluluğu tartışılmıştır. Mahkeme, kamuoyunu ilgilendiren konularda yapılan paylaşımlara yönelik ağır yaptırımların, ifade özgürlüğü üzerinde orantısız bir baskı oluşturabileceğini belirtmiştir (Sanchez v. France [GC], 2023, §§168–171). Bu karar, dezenformasyonla mücadele kapsamında bireysel kullanıcıların sorumluluğunun sınırlandırılması gerektiğine işaret etmektedir.

Bu çerçevede AİHM içtihadı, dezenformasyonla mücadele amacıyla alınan önlemlerin ancak açık, öngörülebilir ve dar yorumlanan hukuki normlara dayanması hâlinde Sözleşme ile uyumlu olabileceğini ortaya koymaktadır. Aksi hâlde, belirsiz ve geniş müdahaleler, ifade özgürlüğünün demokratik toplumdaki kurucu işlevini zedeleme tehlikesi taşımaktadır (Harris et al., 2018, ss. 620–622).

4.TÜRKİYE'DE DEZENFORMASYONLA MÜCADELE:TCK m. 217/A'NIN İFADE ÖZGÜRLÜĞÜ STANDARTLARI AÇISINDAN DEĞERLENDİRİLMESİ

Türkiye'de dezenformasyonla mücadeleye ilişkin en kapsamlı ve tartışmalı düzenleme, 18 Ekim 2022 tarihinde yürürlüğe giren 7418 sayılı Kanun ile Türk Ceza Kanunu'na eklenen 217/A maddesi olmuştur. Söz konusu düzenleme, "halkı yanıltıcı bilgiyi alenen yayma" fiilini

suç olarak tanımlamakta ve belirli koşullar altında hürriyeti bağlayıcı ceza öngörmektedir (TCK m. 217/A). Maddenin kabul süreci ve içeriği, ifade özgürlüğü üzerindeki olası etkileri nedeniyle hem ulusal hem de uluslararası düzeyde yoğun eleştirilere konu olmuştur (Venice Commission, 2022, §§18–21).

TCK m. 217/A'ya göre suçun oluşabilmesi için bilginin "gerçeğe aykırı" olması, "kamu barışını bozmaya elverişli" nitelik taşıması ve failin bu fiili "sırf halk arasında endişe, korku veya panik yaratmak saikiyle" işlemesi gerekmektedir. Ancak doktrinde, özellikle "gerçeğe aykırı bilgi" ve "kamu barışını bozmaya elverişlilik" kavramlarının belirsizliği eleştirilmektedir. Zira bu kavramlar, ceza hukukunda öngörülebilirlik ve belirlilik ilkeleri bakımından ciddi sorunlar doğurmaktadır (Özbek et al., 2023, ss. 1043–1046).

Avrupa İnsan Hakları Mahkemesi içtihadına göre, ifade özgürlüğüne müdahale teşkil eden cezai düzenlemelerin "kanunla öngörülmüş olma" şartını karşılayabilmesi için yeterince açık ve öngörülebilir olması gerekmektedir (Sunday Times v. United Kingdom (No. 1), 1979, §49). Mahkeme, bireylerin davranışlarının hukuki sonuçlarını makul ölçüde öngörebilmelerini demokratik toplumun temel güvencelerinden biri olarak kabul etmektedir (Harris et al., 2018, s. 616). Bu bağlamda TCK m. 217/A'nın muğlak kavramlar içermesi, AİHS m. 10 bakımından ciddi bir uyumsuzluk riski doğurmaktadır.

Düzenlemenin bir diğer sorunlu yönü, öngörülen yaptırımın niteliğidir. AİHM, ifade özgürlüğüne yönelik cezai yaptırımların, özellikle hürriyeti bağlayıcı cezaların, ancak istisnai hâllerde meşru kabul edilebileceğini vurgulamaktadır (Cumpănă and Mazăre v. Romania [GC], 2004, §115). Mahkeme'ye göre, kamuoyunu ilgilendiren konularda yapılan açıklamalar nedeniyle hapis cezası tehdidi öngörülmesi, ifade özgürlüğü üzerinde güçlü bir "soğutucu etki" yaratmaktadır (Cumpănă and Mazăre, 2004, §114). TCK m. 217/A'da hapis cezasının temel yaptırım olarak benimsenmiş olması, bu içtihat ışığında özellikle sorunlu görünmektedir.

Uluslararası insan hakları mekanizmaları da söz konusu düzenlemeye ilişkin benzer eleştirilerde bulunmuştur. Venedik Komisyonu, TCK m. 217/A'nın kapsamının son derece geniş olduğunu, hangi ifadelerin suç teşkil edeceğinin öngörülemez hâle geldiğini ve bunun ifade özgürlüğü açısından ciddi riskler doğurduğunu açıkça belirtmiştir (Venice Commission, 2022, §§45–48). Komisyon ayrıca, kamu makamlarının düzenleme kapsamında sahip olduğu geniş takdir yetkisinin keyfî uygulamalara zemin hazırlayabileceğine dikkat çekmiştir (Venice Commission, 2022, §52).

Birleşmiş Milletler İfade Özgürlüğü Özel Raportörü de Türkiye'ye ilişkin değerlendirmelerinde, dezenformasyonla mücadele gerekçesiyle getirilen cezai düzenlemelerin, demokratik toplumlarda başvurulması gereken "son çare" ilkesine aykırı olabileceğini ifade etmiştir (UN Special Rapporteur, 2023, ss. 7–8). Raporda, yanlış veya tartışmalı bilgilerin cezai yaptırımlarla bastırılmasının, çoğulcu kamusal tartışma ortamını zayıflatacağı vurgulanmaktadır (UN Special Rapporteur, 2023, s. 10).

AİHM içtihadı uyarınca, ifade özgürlüğüne getirilen sınırlamaların "demokratik toplumda gerekli" sayılabilmesi için, müdahalenin zorlayıcı bir toplumsal ihtiyaca cevap vermesi ve izlenen meşru amaçla orantılı olması gerekmektedir (Observer and Guardian v.

United Kingdom, 1991, §59). TCK m. 217/A'nın uygulanma pratiği dikkate alındığında, özellikle gazeteciler ve sosyal medya kullanıcıları üzerinde caydırıcı bir etki yarattığı ve bu durumun orantılılık ilkesini zedelediği ileri sürülmektedir (Human Rights Watch, 2023, ss. 14–16).

Bu çerçevede TCK m. 217/A, dezenformasyonla mücadele amacı taşımasına rağmen, içerdiği belirsiz kavramlar, ağır cezai yaptırımlar ve geniş uygulama alanı nedeniyle AİHS m. 10 ve AİHM içtihadı ile tam uyumlu bir düzenleme olarak değerlendirilmemektedir. Düzenlemenin mevcut hâliyle uygulanması, dezenformasyonla mücadele söyleminin ifade özgürlüğünü sınırlayan yapısal bir araca dönüşmesi riskini beraberinde getirmektedir.

5. SONUÇ

Dijital iletişim ortamlarının yaygınlaşması, ifade özgürlüğünün kullanım alanlarını genişletirken, kamusal tartışmanın yapısını da köklü biçimde dönüştürmüştür. İnternetin sunduğu hız, erişilebilirlik ve etkileşim imkânları, bireylerin düşüncelerini daha görünür kılmasına olanak tanımış; ancak bu durum, yanlış ve yanıltıcı bilgilerin denetimsiz biçimde dolaşıma girmesini de beraberinde getirmiştir. Dezenformasyon olgusunun özellikle kamu düzeni, toplumsal barış ve demokratik süreçler üzerindeki potansiyel etkileri, devletlerin bu alana müdahalesini kaçınılmaz hâle getirmiştir.

Bununla birlikte, dezenformasyonla mücadele amacıyla geliştirilen hukuki ve idari araçların, ifade özgürlüğü üzerinde yaratabileceği sınırlayıcı etki göz ardı edilmemelidir. Zira dijital alanda yapılan müdahaleler, çoğu zaman yalnızca açıkça zararlı içerikleri değil, aynı zamanda meşru eleştiri ve kamusal tartışma kapsamında değerlendirilebilecek ifadeleri de etkileyebilmektedir. Bu durum, ifade özgürlüğünün yalnızca doğrudan değil, dolaylı yollarla da sınırlandırılması riskini doğurmakta ve bireylerin kamusal alanda görüş açıklama konusunda çekingen davranmalarına yol açabilmektedir.

Çalışma boyunca ortaya konulan değerlendirmeler, dezenformasyonla mücadelenin meşru bir amaç taşıdığı kabul edilse dahi, bu amacın belirsiz kavramlara ve geniş takdir yetkisine dayandırılmasının ciddi sakıncalar barındırdığını göstermektedir. Özellikle cezai yaptırımların ön plana çıkarıldığı düzenlemeler, demokratik toplum düzeniyle bağdaşmayan sonuçlar doğurabilecek ölçüde caydırıcı etki yaratabilmektedir. Bu nedenle dezenformasyonla mücadelede, baskıcı ve cezalandırıcı araçlar yerine, daha ölçülü ve hedefe odaklı yöntemlerin tercih edilmesi önem taşımaktadır.

Bu bağlamda, dijital alanda alınacak önlemlerin açık ve öngörülebilir normlara dayanması, sınırlamaların dar yorumlanması ve müdahalelerin zorunlu hâllerle sınırlı tutulması gerekmektedir. Ayrıca ifade özgürlüğüne yönelik müdahalelerin etkili yargısal denetime açık olması, keyfî uygulamaların önlenmesi bakımından temel bir güvencedir. Aksi hâlde, dezenformasyonla mücadele söylemi, demokratik toplumun vazgeçilmez unsurlarından biri olan çoğulcu kamusal tartışma ortamını zayıflatan bir araca dönüşme tehlikesi taşımaktadır.

Sonuç olarak, dezenformasyonla mücadele ile ifade özgürlüğünün korunması arasında kurulması gereken denge, statik değil, sürekli olarak yeniden değerlendirilen dinamik bir

süreçtir. Bu denge, ancak insan hakları temelli bir yaklaşım benimsenmesi, ifade özgürlüğünün demokratik toplumdaki işlevinin merkeze alınması ve dijital alana ilişkin düzenlemelerin ölçülülük ilkesine uygun biçimde tasarlanması hâlinde sağlanabilir. Aksi bir yaklaşım, dezenformasyonla mücadele amacını aşarak, demokratik değerleri zedeleyen sonuçlar doğurma riskini beraberinde getirecektir.

ÖZET

Yapay zekâ teknolojilerinin gözetim faaliyetlerine giderek daha yoğun biçimde entegre edilmesi, devletlerin bireyler üzerindeki izleme kapasitesini niteliksel olarak dönüştürmüştür. Biyometrik veri işleme, yüz tanıma sistemleri ve öngörücü analiz tekniklerine dayanan yapay zekâ temelli gözetim uygulamaları, sürekli, otomatik ve geniş ölçekli veri toplama imkânı sunmaktadır. Bu tür uygulamalar çoğu zaman kamu güvenliği, suçla mücadele ve ulusal güvenlik gibi meşru amaçlara dayandırılmakla birlikte, insan hakları hukuku bakımından özel hayatın korunması hakkı açısından ciddi sorunlar doğurmaktadır.Bu çalışma kapsamında, yapay zekâ destekli gözetim uygulamalarının, klasik hedefli izleme yöntemlerinden farklı olarak, birey ile devlet arasındaki güç dengesini köklü biçimde değiştirdiği ileri sürülmektedir. Özellikle Avrupa İnsan Hakları Sözleşmesi'nin 8. maddesi çerçevesinde geliştirilen sınırlama rejimi ve orantılılık ilkesi, yapay zekânın otomatik ve opak karar alma mekanizmaları karşısında yetersiz kalma riskiyle karşı karşıyadır. Zira algoritmik süreçlerin karmaşıklığı, bireylerin kendileri hakkında hangi verilerin hangi amaçlarla işlendiğini öngörmesini ve bu müdahalelere etkili biçimde itiraz edebilmesini güçleştirmektedir.Buna ek olarak, büyük veri kümelerinin uzun süreli saklanması ve farklı amaçlarla yeniden kullanılması, özel hayatın yalnızca sınırlandırılması değil, çekirdek alanının aşınması sonucunu doğurabilmektedir. Sürekli izlenme algısı, bireysel özerklik üzerinde caydırıcı etki yaratmakta; ifade özgürlüğü ve demokratik katılım gibi diğer temel hakları da dolaylı biçimde zedelemektedir. Çalışma, mevcut hukuki güvencelerin geleneksel gözetim anlayışına göre şekillendiğini ve yapay zekâ temelli sistemlerin yarattığı sistemik riskleri karşılamakta yetersiz kaldığını savunmaktadır. Bu nedenle, yapay zekâ destekli gözetim uygulamalarının ancak sıkı yasal çerçeveler, güçlendirilmiş şeffaflık yükümlülükleri ve etkili yargısal denetim mekanizmalarıyla insan haklarıyla uyumlu hâle getirilebileceği sonucuna varılmaktadır.

ARTIFICIAL INTELLIGENCE-BASED SURVEILLANCE SYSTEMS and THE CORE OF PRIVATE LIFE: THE EROSION of THE PRINCIPLE of PROPORTIONALITY

Dr. Lecturer Betül ÇATAL

Selcuk University

betul.catal@selcuk.edu.tr – ORCID ID: 0000-0002-7154-4975

ABSTRACT

The increasing integration of artificial intelligence into surveillance practices has fundamentally transformed the nature, scope, and intensity of state monitoring activities. AI-based surveillance systems, particularly those relying on biometric data, facial recognition technologies, and predictive analytics, enable continuous, automated, and large-scale data processing. While such systems are often justified by reference to legitimate aims such as public security, crime prevention, and national security, they raise profound concerns from the perspective of the right to respect for private life as protected under international human rights law.Within the scope of this study, it is argued that AI-driven surveillance practices pose a qualitative shift in the relationship between the individual and the state, as they extend beyond targeted monitoring towards pervasive and potentially indiscriminate forms of observation. This development challenges the traditional application of the principle of proportionality, which constitutes a cornerstone of human rights limitations regimes, particularly under Article 8 of the European Convention on Human Rights. The automated and opaque nature of algorithmic decision-making significantly complicates the assessment of necessity and proportionality, as individuals are often unable to foresee, understand, or effectively challenge surveillance measures affecting them.Moreover, the accumulation and long-term retention of personal data through AI systems risk undermining the very core of private life, leading to chilling effects on individual autonomy, freedom of expression, and democratic participation. Existing legal safeguards, largely designed for conventional surveillance methods, appear increasingly inadequate in addressing the scale, speed, and intrusiveness of AI-based monitoring technologies.This study contends that the proportionality analysis applied to AI-powered surveillance must be recalibrated to account for its systemic and cumulative effects. It concludes that without strict legal frameworks, enhanced transparency requirements, and robust judicial oversight mechanisms, AI-based surveillance systems threaten to erode the essence of the right to privacy rather than merely constitute permissible limitations upon it.

Keywords: Artificial Intelligence, Surveillance, Right to Privacy, Proportionality Principle, Human Rights Law

1. GİRİŞ

Dijital teknolojilerin gelişimiyle birlikte devletlerin gözetim kapasitesi yalnızca niceliksel olarak artmamış, aynı zamanda niteliksel bir dönüşüme de uğramıştır. Özellikle yapay zekâ temelli sistemlerin kamu otoriteleri tarafından yaygın biçimde kullanılması, klasik hedefli izleme yöntemlerinden farklı olarak sürekli, otomatik ve büyük ölçekli veri işleme pratiklerini mümkün kılmıştır. Bu durum, bireylerin özel hayatlarının korunması hakkı bakımından yeni ve karmaşık hukukî sorunları beraberinde getirmektedir. Zira yapay zekâ destekli gözetim uygulamaları, yalnızca belirli şüphelilere yönelmemekte; potansiyel olarak herkesin veri öznesi hâline geldiği kapsamlı izleme rejimleri yaratmaktadır (Lyon, 2018, s. 3–5).

Özel hayatın korunması hakkı, Avrupa İnsan Hakları Sözleşmesi'nin 8. maddesi kapsamında güvence altına alınmış olup, bu hakkın sınırlandırılması ancak kanunla öngörülme, meşru amaç ve demokratik bir toplumda gereklilik şartlarının birlikte sağlanması hâlinde mümkün kabul edilmektedir. AİHM içtihadında bu sınırlama rejiminin merkezinde yer alan orantılılık ilkesi, müdahalenin izlenen amaçla ölçülü olup olmadığının değerlendirilmesini gerektirir (Klass ve Diğerleri / Almanya, 1978, §49). Ancak yapay zekâ temelli gözetim sistemlerinin otomatik ve opak yapısı, bu değerlendirmenin geleneksel araçlarla yapılmasını güçleştirmektedir.

Bu bağlamda çalışma, yapay zekâ destekli gözetim uygulamalarının yalnızca özel hayatın sınırlandırılması meselesi olarak değil, özel hayatın çekirdek alanının aşınması riski üzerinden ele alınması gerektiğini savunmaktadır. Sürekli izlenme ihtimali, bireylerin davranışlarını önceden uyarlamasına yol açarak ifade özgürlüğü ve bireysel özerklik üzerinde caydırıcı etki yaratmaktadır (Solove, 2007, s. 142). Bu nedenle klasik orantılılık analizinin, yapay zekânın yarattığı sistemik ve kümülatif etkiler karşısında yeniden düşünülmesi gerekmektedir.

2. YAPAY ZEKÂ TEMELLİ GÖZETİM SİSTEMLERİNİN HUKUKÎ NİTELİĞİ

Yapay zekâ temelli gözetim sistemleri, büyük veri kümelerinin otomatik biçimde analiz edilmesine dayanan ve bireylerin davranışları hakkında öngörülerde bulunabilen teknolojik yapılardır. Bu sistemler özellikle yüz tanıma, biyometrik kimlik doğrulama ve öngörücü polislik uygulamaları aracılığıyla kamu gücünün görünürlüğünü artırmaktadır. Geleneksel gözetim yöntemlerinden farklı olarak, bu teknolojiler insan müdahalesi olmaksızın karar üretme kapasitesine sahiptir (Zuboff, 2019, s. 94).

AİHM, dijital gözetim bağlamında verdiği kararlarda, gözetim tedbirlerinin yalnızca fiilî müdahalelerle sınırlı olmadığını, veri toplama ve saklama süreçlerinin de başlı başına özel hayata müdahale teşkil ettiğini kabul etmektedir (S. ve Marper / Birleşik Krallık, 2008, §67). Yapay zekâ destekli sistemlerde bu müdahale, belirli bir zaman veya kişiyle sınırlı olmaktan çıkmakta; sürekli ve yaygın bir nitelik kazanmaktadır.

Bu noktada, gözetimin hukuka uygunluğu değerlendirilirken yalnızca elde edilen verilerin içeriği değil, verilerin işlenme biçimi, saklama süresi ve farklı amaçlarla yeniden kullanımı da dikkate alınmalıdır. Nitekim AİHM, Roman Zakharov kararında, gizli gözetim rejimlerinin kötüye kullanım riskine açık olması hâlinde, tek başına bu riskin dahi Sözleşme

ihlali oluşturabileceğini belirtmiştir (Roman Zakharov / Rusya, 2015, §232–234). Yapay zekâ temelli sistemler bu riski yapısal olarak artırmaktadır.

3. ORANTILILIK İLKESİNİN YAPAY ZEKÂ KARŞISINDA AŞINMASI

Orantılılık ilkesi, insan hakları hukukunda kamu gücünün sınırlandırılmasının temel araçlarından biridir. İlke, müdahalenin izlenen meşru amaçla uygun, gerekli ve ölçülü olmasını gerektirir. Ancak yapay zekâ temelli gözetim uygulamaları, bu üç aşamalı testin özellikle "gereklilik" ve "ölçülülük" boyutlarını belirsizleştirmektedir (Alexy, 2002, s. 66).

Algoritmik sistemlerin karar alma süreçlerinin şeffaf olmaması, bireylerin hangi gerekçeyle gözetim altına alındıklarını bilmelerini engellemektedir. Bu durum, AİHM'in "öngörülebilirlik" kriteriyle bağdaşmamaktadır. Mahkeme, Malone kararında, bireylerin hangi koşullarda gözetim tedbirlerine maruz kalabileceklerini makul ölçüde öngörebilmeleri gerektiğini vurgulamıştır (Malone / Birleşik Krallık, 1984, §67). Yapay zekâ sistemlerinde ise bu öngörülebilirlik fiilen ortadan kalkmaktadır.

Dahası, yapay zekâ destekli gözetim uygulamalarının etkisi tekil bir müdahaleyle sınırlı değildir. Sürekli veri toplama ve analiz süreçleri, bireyler üzerinde kümülatif bir baskı yaratmakta ve özel hayatın çekirdek alanına nüfuz etmektedir. Bu durum, orantılılık ilkesinin yalnızca araç-amaç dengesi üzerinden değil, müdahalenin toplumsal etkileri üzerinden de değerlendirilmesini zorunlu kılmaktadır (Hildebrandt, 2016, s. 18).

4. ÖZEL HAYATIN ÇEKİRDEĞİ VE SİSTEMİK HAK İHLALLERİ

Özel hayatın korunması hakkı, insan hakları hukukunda yalnızca bireyin mahrem alanına yönelik doğrudan müdahaleleri değil, aynı zamanda bireyin kişisel özerkliğini ve kimliğini serbestçe inşa edebilme imkânını da kapsayan geniş bir koruma alanı sunmaktadır. Avrupa İnsan Hakları Mahkemesi, özel hayat kavramının dar ve statik bir içerikle sınırlandırılamayacağını; bireyin fiziksel ve psikolojik bütünlüğü, kişisel verileri ve toplumsal ilişkilerinin de bu hakkın kapsamında yer aldığını istikrarlı biçimde vurgulamaktadır (Pretty v. United Kingdom, 2002, §61). Bu yaklaşım, dijital gözetim teknolojilerinin yarattığı çok katmanlı müdahalelerin değerlendirilmesi bakımından özel bir önem taşımaktadır.

Yapay zekâ temelli gözetim sistemleri, klasik izleme yöntemlerinden farklı olarak yalnızca geçmişe ilişkin veri toplamakla yetinmemekte; bireylerin gelecekteki davranışlarına dair tahminlerde bulunmayı da amaçlamaktadır. Bu öngörücü nitelik, gözetimi zamansal olarak genişletmekte ve bireyin henüz gerçekleşmemiş davranışlarının dahi denetim altına alınmasına yol açmaktadır (Hildebrandt, 2016, ss. 34). Bu durum, özel hayatın yalnızca sınırlandırılması değil, çekirdek alanına nüfuz edilmesi sonucunu doğurabilecek niteliktedir.

AİHM içtihadında, özel hayatın çekirdek alanına yönelik müdahaleler bakımından daha sıkı bir denetim standardı benimsenmektedir. Mahkeme, S. ve Marper kararında, biyometrik verilerin süresiz biçimde saklanmasının, herhangi bir somut zarar doğmasa dahi, bireyin özel hayatına ağır bir müdahale teşkil ettiğini kabul etmiştir (S. and Marper v. United Kingdom, 2008, §§67–71). Yapay zekâ temelli gözetim sistemleri bağlamında bu tür verilerin büyük veri kümeleri içinde sürekli işlenmesi, söz konusu müdahaleyi daha da derinleştirmektedir.

Bu noktada, gözetimin yarattığı sistemik ve kümülatif etki özel bir değerlendirmeyi gerekli kılmaktadır. AİHM, Roman Zakharov kararında, gizli gözetim rejimlerinin tek tek uygulanma biçimlerinden bağımsız olarak, yapısal olarak kötüye kullanıma açık olması hâlinde Sözleşme ile bağdaşmayacağını açıkça belirtmiştir (Roman Zakharov v. Russia, 2015, §§232–234). Yapay zekâ destekli gözetim uygulamaları, otomatik karar alma ve insan müdahalesinin sınırlı olması nedeniyle bu tür yapısal riskleri artırmaktadır.

Sürekli izlenme ihtimali, bireylerin davranışlarını önceden uyarlamalarına yol açmakta ve "normal" kabul edilen kalıpların dışına çıkmaktan kaçınmalarına neden olmaktadır. Bu durum, literatürde sıklıkla "soğutucu etki" (chilling effect) kavramıyla ifade edilmektedir. Solove, gözetimin en ciddi etkisinin, bireylerin özgürlüklerini fiilen kısıtlamaktan ziyade, onları özgürlüklerini kullanmaktan vazgeçmeye sevk etmesi olduğunu belirtmektedir (Solove, 2007, ss. 143). Yapay zekâ temelli sistemlerde bu etki, gözetimin sürekliliği ve görünmezliği nedeniyle daha da güçlenmektedir.

Özel hayatın çekirdek alanının aşınması, yalnızca mahremiyet hakkı ile sınırlı sonuçlar doğurmamaktadır. AİHM, bireylerin sürekli izlenme hissi altında bulunmasının, ifade özgürlüğü ve demokratik katılım üzerinde de dolaylı ancak güçlü bir baskı yarattığını kabul etmektedir (Uzun v. Germany, 2010, §52). Yapay zekâ destekli gözetim uygulamaları, bu baskıyı bireysel düzeyin ötesine taşıyarak toplumsal ölçekte bir otosansür ortamı yaratma potansiyeline sahiptir.

Bu bağlamda, yapay zekâ temelli gözetim uygulamalarının değerlendirilmesinde yalnızca münferit müdahalelerin ölçülülüğü değil, ortaya çıkan gözetim mimarisinin bütünü dikkate alınmalıdır. Raab ve Bennett'e göre, modern gözetim sistemleri tekil ihlallerden ziyade, zaman içinde biriken ve bireyin kamusal ve özel yaşamını şekillendiren bir kontrol mekanizması üretmektedir (Raab & Bennett, 2006, ss. 12–14). İnsan hakları hukukunun bu tür yapısal müdahaleleri görünür kılacak araçlarla güçlendirilmesi gerekmektedir.

Son olarak, mevcut hukuki güvencelerin büyük ölçüde geleneksel gözetim anlayışı temelinde şekillendiği ve yapay zekâ temelli sistemlerin karmaşıklığını karşılamakta yetersiz kaldığı görülmektedir. Algoritmik süreçlerin şeffaf olmaması, bireylerin kendileri hakkında hangi verilerin hangi amaçlarla işlendiğini öğrenmelerini ve bu işlemlere etkili biçimde itiraz edebilmelerini zorlaştırmaktadır (Zuboff, 2019, ss. 98). Bu durum, özel hayatın korunması hakkının yalnızca sınırlandırılması değil, özünün aşındırılması sonucunu doğurma tehlikesi taşımaktadır.Bu nedenle, yapay zekâ destekli gözetim uygulamalarının insan haklarıyla uyumlu hâle getirilebilmesi için, özel hayatın çekirdek alanını merkeze alan daha sıkı bir değerlendirme çerçevesine ihtiyaç bulunmaktadır. Aksi hâlde, her bir müdahale ayrı ayrı meşru görünse dahi, toplam etki itibarıyla bireyin mahremiyetini ve özerkliğini ortadan kaldıran bir gözetim düzeninin normalleşmesi söz konusu olacaktır.

5. SONUÇ

Yapay zekâ temelli gözetim sistemlerinin kamu otoriteleri tarafından giderek daha yaygın biçimde kullanılması, devlet ile birey arasındaki ilişkiyi yalnızca teknik düzeyde değil, hak ve özgürlüklerin korunması bakımından da köklü biçimde dönüştürmektedir. Bu çalışma,

söz konusu dönüşümün özellikle özel hayatın korunması hakkı açısından niteliksel bir kırılma yarattığını ve klasik gözetim anlayışına dayalı hukuki değerlendirme araçlarının bu yeni gerçekliği karşılamakta giderek yetersiz kaldığını ortaya koymaktadır. Yapay zekâ destekli sistemler, sürekli, otomatik ve geniş ölçekli veri işleme kapasiteleri sayesinde, bireylerin yalnızca belirli davranışlarını değil, yaşamlarının bütününü kapsayan bir izleme pratiği üretmektedir.

İnceleme boyunca vurgulandığı üzere, yapay zekâ temelli gözetim uygulamalarının yarattığı temel sorun, müdahalelerin tekil ve sınırlı olmaktan çıkarak sistemik ve kümülatif bir nitelik kazanmasıdır. Bu durum, özel hayatın yalnızca sınırlandırılması değil, çekirdek alanının aşınması riskini beraberinde getirmektedir. Sürekli izlenme ihtimali altında bulunan bireyler, davranışlarını önceden uyarlamakta; bu da bireysel özerkliği, ifade özgürlüğünü ve demokratik katılımı dolaylı ancak güçlü biçimde zedelemektedir. Dolayısıyla yapay zekâ temelli gözetim, yalnızca mahremiyet ihlali meselesi olarak değil, demokratik toplum düzeninin işleyişini etkileyen yapısal bir sorun olarak ele alınmalıdır.

Çalışma, orantılılık ilkesinin yapay zekâ destekli gözetim uygulamaları karşısında merkezi önemini korumakla birlikte, geleneksel yorumunun yetersiz kaldığını ortaya koymaktadır. Zira algoritmik karar alma süreçlerinin opaklığı, gözetimin sürekliliği ve veri işlemenin öngörülemezliği, müdahalenin gerekliliği ve ölçülülüğünün sağlıklı biçimde değerlendirilmesini güçleştirmektedir. Bu bağlamda orantılılık incelemesinin, yalnızca tekil müdahalelere odaklanan dar bir analiz olmaktan çıkarılarak, gözetim sistemlerinin toplam ve uzun vadeli etkilerini kapsayacak şekilde yeniden düşünülmesi gerekmektedir.

Sonuç olarak, yapay zekâ temelli gözetim uygulamalarının insan haklarıyla uyumlu hâle getirilebilmesi, sıkı ve açık yasal çerçevelerin oluşturulmasına, şeffaflık ve hesap verebilirlik mekanizmalarının güçlendirilmesine ve etkili yargısal denetimin sağlanmasına bağlıdır. Aksi hâlde, kamu güvenliği veya suçla mücadele gibi meşru amaçlara dayandırılan bu uygulamalar, özel hayatın özünü aşındıran ve bireyin devlete karşı korunmasız kaldığı bir gözetim düzeninin normalleşmesine yol açabilecektir. İnsan hakları hukukunun temel görevi ise, teknolojik gelişmeler karşısında geri çekilmek değil, bireyin onurunu ve özerkliğini merkeze alan koruma standartlarını bu yeni bağlama uyarlamaktır.

ANAYASAL DEMOKRASİNİN ASGARİ KOŞULLARI ÇERÇEVESİNDE İNSAN HAKLARI: İFADE ÖZGÜRLÜĞÜ VE BİLGİ EDİNME HAKKI

Ayça SERİN

Ankara Yıldırım Beyazıt Üniversitesi

Sosyal Bilimler Enstitüsü, Kamu Hukuku

aycaseriin@gmail.com - 0009-0005-1341-6886

ÖZET

Demokrasinin doğduğu Antik Yunan Şehir Devletlerinden günümüze dek geçen binlerce yılda değişen toplumlar, artan nüfuslar ve insan hakları üzerine inşa edilen devletlerin pek çoğunun yine demokrasi ile yönetildiği görülmektedir. Elbette binlerce yıl öncesinden günümüze değişen pek çok unsur bulunduğu gibi, değişmeyen ve bir bakıma demokrasinin özü olduğu iddia edilebilecek bazı unsurlar da bulunmaktadır. Örneğin kelime anlamı itibariyle "*demo*" (halk) ve "*kratos*" (iktidar, yönetim) sözcüklerinin bir araya gelmesinden oluşan demokraside, halkın kendini yönetmesinin demokrasinin özü olduğu açıktır. Ancak günümüz modern demokrasilerinde mevcut olan eşitlik ilkesi doğrultusunda değişen vatandaşlık kavramı ile halihazırda Antik Yunan demokrasisine nazaran daha kalabalık olan halkların genel oy ilkesiyle daha geniş ve kapsayıcı kriterlerle belirlenen katılımcılarının yönetime dahil olması söz konusudur. Bu nedenle doğrudan demokrasinin pratik imkansızlığına çare olarak temsil ilkesinin gelişmesiyle günümüz modern demokrasileri Antik Yunan demokrasisinden farklılaşmıştır. Temsili demokrasinin halkın yönetime katılımını kısıtlaması sorununa çözüm olarak müzakereci demokrasi ve katılımcı demokrasi kavramları öne sürülmüş, her halükârda halkın yönetime faal katılımı için kamusal alanların önemi tartışmasız hale gelmiştir. Bu doğrultuda halkın kamusal alanlarda yönetimsel konularda bilgi ve belgelere erişebilmesi, baskı altında kalmaksızın ve özgürce fikir beyan etmesi ve başkalarının fikirlerini duyması, tartışmalar yapması ve müzakere etmesinin demokrasiye etkin ve faal katılım için elzem olduğuna şüphe yoktur. Bu halde halk şeffaf yönetim ilkesi doğrultusunda ihtiyaç duyduğu bilgi ve belgelere erişebilmeli, ifade özgürlüğüne sahip olmalıdır. Bu çalışmada bilgi edinme hakkı ve ifade özgürlüğünün demokrasi için ne kadar elzem olduğu, günümüz Türk hukuku ile uluslararası hukuk metinlerinde ne şekilde yer aldığı ve bazı yargı kararları doğrultusunda nasıl uygulandığı tartışılmakta; demokratik toplumun gerekliliklerinin sağlanması için bilgi edinme hakkı ve ifade özgürlüğünün rolü hakkında tespit ve öneriler sunulması amaçlanmaktadır.

Anahtar Kelimeler: Demokrasi, temsil, kamusal alan, müzakereci demokrasi, katılımcı demokrasi, bilgi edinme hakkı, ifade özgürlüğü.

1. GİRİŞ

Demokrasi, tarih boyunca sadece bir yönetim biçimi olmanın ötesine geçerek, bireyin siyasal iktidardaki konumunu ve toplumsal karar alma süreçlerine katılımını belirleyen temel bir model haline gelmiştir. Antik Yunan'ın doğrudan demokrasi tecrübesinin günümüzün

karmaşık devletlerinde uygulanmasının pratik imkansızlığı karşısında halkın yöneten sıfatını koruyabilmesinin yegâne yolu, kamusal alanda tartışmalara etkin katılım sağlamasıdır. Ancak modern ulus devletlerin demografik ve coğrafi büyüklüğü, doğrudan katılımı imkansız kılmış; bu durum demokrasiyi sırf seçimlere indirgeme riskini doğurmuştur. Tam da bu noktada müzakereci demokrasi bir çare olarak kamusal alanlarda özgürce etkin tartışmalar yapılması gerekliliğini ön plana çıkartmaktadır. Zira bireyin bir düşünceye sahip olması, o düşünceyi ifade etmesi ve nihayetinde yönetimi denetleyebilmesi; ancak şeffaf bir bilgi akışının varlığıyla mümkündür. Bilgi edinme hakkı, bu bağlamda ifade özgürlüğünün ön koşulu olarak karşımıza çıkmaktadır. Şeffaf olmayan bir yönetimde ifade özgürlüğü, içi boşaltılmış bir hakka dönüşme riskiyle karşı karşıyadır.

Bu çalışma; ifade özgürlüğü ile bilgi edinme hakkı arasındaki yapısal bağı anayasal demokrasinin asgari koşulları çerçevesinde incelemeyi amaçlamaktadır. Bu doğrultuda, her iki hakkın tarihsel kökenlerinden başlanarak; Avrupa İnsan Hakları Mahkemesi (AİHM) ve Anayasa Mahkemesi (AYM) içtihatlarında geliştirilen "eşik kriterler" ve "sosyal bekçi" doktrini analiz edilecektir. Çalışmanın temel tezi, bilgi edinme hakkının sadece bireysel bir hak değil, aynı zamanda demokratik meşruiyetin kurucu bir unsuru olduğu ve bu hakkın kısıtlanmasının doğrudan kamuoyu denetimini engelleyeceğidir.

2. DEMOKRASİNİN TARİHSEL EVRİMİ VE KURAMSAL TEMELLERİ

Demokrasi, kelime anlamıyla “siyasal denetimin doğrudan doğruya halkın ya da düzenli aralıklarla halkın özgürce seçtiği temsilcilerin elinde bulunduğu, toplumsal ve ekonomik durumu ne olursa olsun tüm yurttaşların eşit sayıldığı yönetim biçimi” olarak tanımlanmaktadır[1]. Tarihte bilinen ilk örneği Antik Yunan Site Devletlerinde, M.Ö. 507 yılında özellikle Atina’da, Makedonya işgaline dek yaklaşık iki yüz yıl boyunca uygulanmıştır[2]. Bu uygulama biçiminde “eklessia” ismi verilen halk meclislerinde her bir vatandaşın katılımıyla yönetim hakkında kararlar alınmaktaydı[3]. Atina demokrasisini günümüz modern demokrasilerinden farklı kılan en belirgin özelliklerinden birisi de bu noktadadır. Günümüzde pek çok sistemde halk yönetime kendi adına söz hakkı sahibi olması ve karar alma süreçlerine katılması için temsilciler seçerken Atina’da böylesine bir temsil ilişkisi bulunmamakta, halk doğrudan söz alarak yönetime dahil olmaktadır.

2.1. Antik Yunan’dan Modern Devlete: Doğrudan ve Temsili Demokrasi

Günümüz modern demokrasilerinde halkın fikirlerini doğrudan açıklayarak yönetime katılamamasının birtakım nedenleri vardır. Örneğin Atina, Antik Yunan Devletleri içerisinde en kalabalık site olup genellikle ortalama 300.000 kişilik bir nüfusa sahip olduğu tahmin edilmektedir[4]. Atina’nın nüfusu hakkında kesin bir sayı belirtilememe nedeni ise halkın çeşitli sınıflara ayrılmış olması, vatandaşlık algısının günümüz modern demokrasilerinden çok daha farklı olmasıdır. Günümüz modern demokrasilerinde herkes eşit birer vatandaş kabul edilerek siyasi haklar için çeşitli kıstaslar belirlenmiş olmasına karşılık; Atina’da kölelerin yurttaş

[4] **Uygun**, s. 19.

sayılmaması, yurttaşların ise yalnızca yetişkin erkeklerden kabul edilmesi söz konusudur[5]. Hal böyle olunca Atina'da yönetimde söz hakkı sahibi olan ve doğrudan katılım sağlayan kişi sayısının yabancılar, köleler, kadınlar ve çocuklar çıkartıldıktan sonra yaklaşık 35.000 yetişkin erkekten ibaret olabileceği belirtilmektedir[6].

Bu halde Atina Demokrasisi ile günümüz modern demokrasisi arasında mevcut bulunan uygulama farklılığının en belirgin nedenlerinden birisi olarak nüfus farklılığını öne sürmekte bir sakınca yoktur. Zira 35.000 kişiye kıyasla günümüz devletlerinin milyonları aşan halk nüfusu arasında muhteşem seviyede fark vardır. Bu durumda günümüzde devlet ölçeğinin demografik ve coğrafi olarak büyümesi karşısında doğrudan demokrasinin uygulanmasında pratik imkansızlık bulunduğu izahtan varestedir[7].

Günümüz dünyasında insan hakları anlayışı gelişmiş, anayasal güvencelerle donatılmış ve uluslararası hukuk mevzuatında yer almıştır. Artık vatandaşlar haklarının varlığı ve korunmaları konusunda devletlerin sahip olduğu pozitif yükümlülükler hakkında eski dönemlere nazaran daha bilinçli haldedir. Dünyanın pek çok ülkesinde kölelik kavramı kalmamış, kadın ve erkek eşitliği kabul edilmiş, vatandaşlık kavramı Atina'da uygulandığı halinden çok daha eşitlikçi ve kapsayıcı bir hale gelmiştir. Böyle bir düzende her bir vatandaşın demokrasiye doğrudan katılması, her birinin mecliste yönetimsel konularla alakalı fikir beyan etmesi pratikte mümkün olmadığı Robert A. Dahl tarafından detaylıca hesaplanarak izah edilmiştir[8]. Bu nedenle günümüzde doğrudan demokrasinin yerini temsil ilişkisi almıştır.

Temsili demokraside halkın kendisini yönetimsel karar alma ve müzakere süreçlerinde temsil edecek temsilcileri seçmesi ve bu temsilciler aracılığıyla yönetime katılması ve iktidarı denetlemesi söz konusudur[9]. Bu sürecin temini için de siyasi partiler ve seçimler karşımıza çıkmaktadır[10]. Hatta öyle ki günümüzde seçimler demokrasi ile özdeş şekilde algılanabilmektedir[11]. Elbette bu algının haklı yanları olsa da pek çok bakımdan eksik olduğunu belirtmek gerekir. Zira her ne kadar halkın belirleyeceği temsilci, kendisini seçen ve seçmeyen kitle adına yönetimsel konularda söz hakkına sahip olacak olsa da halkın sesini duyurabilmesinin tek yolu temsilcinin sözlerinden ibaret olmayıp başkaca yollar da mevcuttur. Keza yine yaygın kanının aksine, demokrasinin sırf yönetimsel konularda söz hakkı sahibi olmaktan ibaret olmadığını, özellikle müzakereci demokrasi anlayışının bu hususta önemli çözümler getirdiğini de belirtmek gerekir.

2.2. Müzakereci Demokrasi Modeli ve Kamusal Alan

[11] **Nacak, Osman** (2014). "Temsili Demokrasinin Sorun Alanları ve Çözüm Noktasında Yeni Bir Model: Katılımcı Demokrasi", Muğla Sıtkı Koçman Üniversitesi Sosyal Bilimler Enstitüsü Dergisi, S:32, s. 195.

Yönetime dahil olabilmek için öncelikle yönetimde neler olup bittiği, hangi aşamada bulunulduğu, sorun yahut aksaklık olup olmadığı ve sorun varsa nedeninin ne olduğunun bilinebilmesi gerekir. Aynı doğrultuda, şayet var olan bir sorunun çözülmesi için girişimde bulunulacaksa yahut yeni baştan alınacak bir karar hakkında fikir beyan edilecekse öncelikle bu hususların mevcudiyetinin ve ne olduğunun bilinmesi gerekmektedir. Nitekim Robert A. Dahl'a göre demokrasi bilgi edinebilme hakkı sağlar[12]. Bu noktada öncelikle idarenin yönetimsel işleri kapalı kapılar ardında yürütmemesi, yönetimde şeffaf olması gerekmektedir. Edinilecek bilginin ardından kişinin bu bilgi hakkındaki fikirlerini ifade edebilmesi, başkalarının fikirlerini duyması ve bu fikirlerin karşılıklı olarak müzakere edilebilmesi gerekmektedir. Tüm bu tartışma ve müzakereler için ise kamusal alanın mevcut olması gerekmektedir.

Tam da bu noktada müzakereci demokrasi anlayışı, temsili demokrasinin halkın yönetim süreçlerinden kısmen de olsa yabancılaşması ve demokrasinin yalnızca seçimlerden ibaret olduğu algısına kapılmasını engelleyecek alternatif çözüm ve anlayışlar sunmaktadır. Jürgen Habermas, demokrasinin sırf seçimler ve oy çoğunluğundan ibaret olmadığını, kararların alınmasından önce gayri resmi kamusal alanlarda eşit yurttaşlık temelinde gerçekleşecek müzakere, tartışma ve akıl yürütme safhasının gerekliliğinden bahseder[13]. Buna göre sağlıklı bir demokrasinin sağlanabilmesi için vatandaş bilgiye erişebilmeli, bu bilgileri müzakere edebilmelidir[14].

Müzakereci demokrasi anlayışına göre her bireyin düşünce ve kanaatleri devlet tarafından sınırları çizilmiş müzakerelere dahil edilerek herkesçe tartışılıp kabul edilen fikirler demokratik olarak meşru kabul edilmektedir[15]. Böylece demokrasi sırf devlet toplum ilişkisinden ibaret kalmanın ötesinde, halkın bireysel ve toplumsal düzeyde önemli kararları ahlaki ve siyasi bakımdan eşit kabul edildikleri bir düzlemde tartışarak demokrasiye katılabilmesi söz konusudur. Bu sayede halk tartışılan fikri eleştirme, değerlendirme ve özümseme fırsatı bulmaktadır[16].

Habermas'a göre, modern toplumların karmaşıklığı ve kalabalıklığı karşısında doğrudan demokrasi bir ütopya olsa da temsili mekanizmaların "iletişimsel eylem" ile desteklenmesi gerekmektedir[17]. Buna göre sağlıklı bir demokrasinin temini için, vatandaşların bilgiye erişebildiği ve bu bilgiyi özgürce müzakere edebildiği ideal konuşmaların gerçekleşmesi gerekmektedir. Bu bağlamda, müzakereci demokrasi anlayışı, makalenin ilerleyen bölümlerinde ele alınacak olan ifade özgürlüğü ve bilgi edinme hakkını sadece birer bireysel hak olarak değil; bizzat demokratik meşruiyetin kurucu unsurları olarak konumlandırır.

Çünkü müzakereci modelde meşruiyet, güçlü argümanlarla sağlanması için şeffaf bir bilgi akışı ve kısıtlanmayan bir kamusal tartışma ortamı gerekmektedir.

3. BİLGİ EDİNME HAKKI VE İFADE ÖZGÜRLÜĞÜNÜN HUKUKİ REJİMİ

Demokraside halkın yönetime katılımının sağlanması için yönetimsel bilgilere erişebilmesinin, bu bilgiler doğrultusunda fikirler geliştirebilmesinin, fikirlerini özgürce ifade edebilmesinin ve başkalarının fikirlerini duyabilmesinin gerekliliğinden bahsetmiştik. Bu aşamada ise bilgi edinme hakkı ile ifade özgürlüğünün Atina demokrasisinde mevcut olup olmadığı, mevcut ise sınırları ve uygulanma biçimi; günümüz modern demokrasilerindeki konumu, güvenceleri, uygulanma biçimleri ele alınacaktır.

3.1. Atina Demokrasisinde İfade Özgürlüğü ve Bilgi Edinme Hakkı

Atina'da yönetiminde doğrudan demokrasi yönetim biçiminin uygulanmasının bir sonucu olarak genellikle özgürlükçü bir yapı bulunduğunu söylemek mümkündür. Her ne kadar Sokrates savunmasında rejimi sert bir üslupla eleştirmiş olsa da Atina'da yurttaşların görüşlerinden dolayı ölüm vb. cezalara çarptırılmasının çok istisnai bir durum olduğu; Sokrates'in yargılanmasının, demokratik rejimin oligarşik bir devrimle yıkıldıktan hemen sonra tekrar inşa edildiği ve yeniden ayaklanma tehlikesinin mevcut olduğu bir döneme denk gelmesinin etkisinden kaynaklandığı belirtilmektedir[18].

Sokrates'in yargılanması dışında, Atina demokrasinin yurttaşlara ve yerleşik yabancılara ifade özgürlüğü bakımından bir kısıtlama getirmediği, düşüncelerini serbestçe ifade edebildikleri belirtilmektedir. Bu ifadeye dayanak olarak rejim eleştirilerinin 17.000 kişi kapasiteli amfi tiyatro oyunlarında gerçekleştirilmesi, eleştirel komedilerin bir propaganda şeklinde değil, mevcut durumun olumlu ve olumsuz tüm yanlarıyla gözler önüne serildiği oyunlardan oluştuğu belirtilmektedir[19].

Atina'da ifade özgürlüğüne dayanak olacak bir diğer husus ise kamusal alanların genişliğidir. Kamusal alanlar sırf amfi tiyatrolarıyla sınırlı kalmayıp pazar, çarşı, dini mekanlar ve sokaklar da yönetim işleri hakkında konuşulan alanlar haline gelmiştir[20]. Halkın kamusal alanlardaki özgürlüğü o denli geniştir ki, halkın özel alanlarda daha sınırlandırılmış ve zorunluluklara sahip olduğu belirtilmektedir. Haneye bakış açısının sırf insanın zorunlu ihtiyaçlarının karşılanması için mecburiyetten ibaret olmasına karşılık, siyasete katılmak özgürlük olarak kabul edilmekteydi[21].

Atina'da yer alan demokratik ve özgürlükçü bu ortamın yasalarla güvence altına alınmamış olması, teoride özgürlükleri sınırlandıracak kararlar alınabilmesini mümkün kılsa da Atina'nın siyasi geleneklerine bağlılığı nedeniyle mevcut yasaların nadiren değiştirildiğini, yasa değişikliği halinde ise mahkemenin talep halinde yasayı iptal yetkisi bulunduğu belirtilmektedir[22]. Bu haliyle Atina'daki hukuk sistemini, yazılı metinleri yerine örf adet hukukunun baskınlığı bakımından Anglo Sakson Hukuk Sistemlerine benzetmek mümkündür. Günümüzde ise pek çok mevzuatın yazılı halde olduğu, demokrasinin sağlanması için gereken

[18] **Uygun**, s.62.
[19] **Uygun**, s.65.
[20] **Uygun**, s.65.
[21] **Uygun**, s.76.
[22] **Uygun**, s.73-74.

koşullar ve temel hakların yazılı anayasal güvenceler ve uluslararası hukuk metinleriyle düzenlendiği görülmektedir. Bu makalede de günümüz anayasal demokrasinin asgari koşulu olarak bilgi edinme hakkı ve ifade özgürlüğü bakımından değerlendirilme yapılmaktadır.

3.2. Modern Demokraside İfade Özgürlüğü ve Bilgi Edinme Hakkı ve Yasal Mevzuat

Günümüz modern demokrasisinde ifade özgürlüğü; bireyin varlığının ve demokrasinin etkili biçimde sağlanmasının temel yapı taşlarından birisi olup AİHS 10. madde hükmünde güvence altına alınmıştır. Düşüncenin çeşitli vasıtalar aracılığıyla başkalarına aktarılabilmesi, yayılabilmesi ve bu kişilerin bir düşünceye inandırılıp ikna edilebilmesi şeklinde veya bir düşünce, inanç ve kanaatin barışçıl yolla dışarıya aktarılabilmesi şeklinde[23] tanımlanan ifade özgürlüğü; demokratik bir toplumun olmazsa olmaz bir yönetime katılım aracıdır. Halk bu sayede kamusal alanlarda fikirlerini özgürce ifade ederek yönetime faal katılabilecek, yalnızca oy kullanmakla yetinmeyecektir.

Elbette halkın kamusal alanlarda müzakerelere katılarak etkin tartışmalar yapabilmesi için yönetimsel bilgilere erişebilmesi gerekmektedir. Zira ifade özgürlüğünün sağlanabilmesi için düşünce özgürlüğünün sağlanması gerekmekte, düşünce özgürlüğünün sağlanabilmesi için ise bilgilere erişilmesi gerekmektedir[24]. Kimi zaman halkın taleplerine karşılık cevap olarak kimi zaman ise resen birtakım bilgi ve belgelerin idarece paylaşılması gerekmektedir. Bu halde bilgi edinme hakkının temelini ifade özgürlüğünün oluşturduğuna şüphe yoktur. Günümüzde çeşitli yasal mevzuatlarda yerini alan bilgi edinme hakkı, en temel haliyle devlet tarafından kayıtları tutulan her türlü bilgi ve belgelerin serbestçe erişilebilir olması anlamına gelmektedir[25].

Uluslararası alanda bilgi edinme hakkı incelendiğinde, ilk yasal düzenleme olarak İsveç'te 1766 tarihli Basının Özgürlüğü Yasası görülmektedir[26]. Ardından 1786 Virginia Bildirgesi, 1789 Fransa İnsan ve Yurttaş Hakları Bildirgesi, Birleşmiş Milletler İnsan Hakları Evrensel Bildirgesi, Medeni ve Siyasi Haklara İlişkin Uluslararası Sözleşme ve son olarak Avrupa İnsan Hakları Sözleşmesi dolaylı yahut doğrudan şekilde bilgi edinme hakkına yer veren uluslararası hukuk metinleridir.

Birleşmiş Milletler İnsan Hakları Evrensel Bildirgesi'nin 19. maddesinde ve Medeni ve Siyasi Haklara İlişkin Uluslararası Sözleşme'nin 19. maddesinde bilgi edinme hakkından bahsedilirken bilginin "*aranması*", "*elde edilmesi*" ve "*yayılması*" hususlarından bahsedilmekte; Avrupa İnsan Hakları Sözleşmesi (AİHS) 10. madde metninde ise bilginin "*elde edilmesi*" ve "*yayılması*" yer almaktadır. Her iki uluslararası hukuk metninde fark yaratan "*aranma*" kavramı, halkın bilgiyi araması, diğer bir söyleyişle idareden bilgi talep etmesi halinde idarenin bilgiyi verme yükümlülüğü bulunup bulunmayacağı konusunda tartışmalara neden olmuştur**.**

4. AİHM İÇTİHATLARIYLA BİLGİ EDİNME HAKKI

Bilgi edinme hakkını genellikle AİHS'nin 10. maddesiyle ilişkilendiren AİHM, bu hakkın kullanımını mutlak görmemekte ve belirli demokratik amaçlarla sınırlandırılabileceğini belirtmektedir. Kamuoyunun aydınlatılması ve idarenin denetlenebilmesi için bu hakkın varlığını vazgeçilmez sayan AİHM, içtihatlarında 'bilgi edinme' ve 'bilgi alma' arasında teknik bir çizgi çekmektedir[27]. Buna göre; devletin aktif bir pozitif yükümlülük altına girdiği alan 'bilgi edinme' hakkıyken[28]; bireyin talebi karşısında idarenin tam bir mecburiyet içinde bulunmadığı durumlar 'bilgi alma' hakkı çerçevesinde ele alınmaktadır[29].

Bu hususta *Weber*[30] ve *Saure*[31] davaları idarenin tam bir mecburiyet içinde bulunmadığına örnek teşkil edebilir. Elinde hazır liste bulunmayan belediyenin veya istihbarat servisinin, dışarıdan gelen bir talep için özel bir çalışma yapması devletin bir ödevi olarak kabul edilmemiştir. *Bubon*[32] davasında ise avukatın talebi teknik bir engele takılmıştır. İdarenin elinde veri olmasının bu verinin her türlü kombinasyonla sunulacağı anlamına gelmeyeceği vurgulanmıştır. Başvurucunun istediği detaylı suç analizlerini hazırlamanın idareye yükleyeceği külfet, ifade özgürlüğünün korunması gereken sınırların dışında tutulmuştur. Keza *Haralambie*[33] davasında görüldüğü üzere, talep edilen bilginin yalnızca şahsi bir bilgi olması halinde bilgi edinme hakkı demokratik toplum gereği olan ifade özgürlüğü kapsamında değerlendirilmemektedir.

Devletin bilgi edinme hakkı kapsamında pozitif bir yükümlülük altında bulunduğuna ilişkin kararlar ise somut olaya göre toplumun çoğunu ilgilendiren, demokratik süreçlere ve dolayısıyla ifade özgürlüğüne etki edebilecek nitelikteki olaylara ilişkindir.

4.1. Devletin Pozitif Yükümlülüğü

2009 yılında görülen *Kenedi/Macaristan*[34] Tarihçi Kenedi tarafından açılan davada, kamuyu ilgilendiren tarihi gerçeklerin aydınlatılması ile devletin gizlilik hakkı arasındaki çatışmayı gözler önüne sermiştir. AİHM, komünist rejim kayıtlarına erişimin kısıtlanmasını doğrudan AİHS 10. madde (ifade özgürlüğü) çerçevesinde denetlemiştir. Mahkemeye göre, idarenin soyut bir ulusal güvenlik gerekçesi arkasına sığınarak belge paylaşımını reddetmesi, somut bir risk analizi yapılmadığı sürece demokratik toplumun gereklerine aykırıdır. Bu kısıtlamanın keyfi bir nitelik taşıdığı ve kamunun bilgi edinme hakkını zedelediği saptandığından, Macaristan'ın pozitif yükümlülüklerini yerine getirmediği sonucuna varılmıştır.

Öneryıldız/Türkiye Davası[35] Ümraniye'deki trajik patlamanın ardından yaşam hakkını sadece "öldürmeme" ödeviyle değil, aynı zamanda "bilgi verme" sorumluluğuyla da tanımladığını gösterir. Mahkeme; metan gazı tehlikesinin önceden bilinmesine rağmen idarenin

[33] **Haralambie/Romanya,** AİHM, Başvuru No: 21737/2003, Tarih 27/10/2009
[34] **Kenedi/Macaristan**, AİHM, Başvuru No: 31475/05, Tarih 26/05/2009.
[35] **Öneryıldız/Türkiye,** AİHM, Başvuru No: 48939/99, Tarih: 30/11/2004.

gerekli uyarılarda bulunmamasını ve koruyucu önlemleri almamasını AİHS'nin 2. maddesi kapsamında ağır bir ihmal olarak görmüştür. Etkin başvuru ve mülkiyet haklarının da ihlal edildiği saptanan davada, idari şeffaflığın can güvenliği üzerindeki doğrudan etkisi vurgulanmıştır. Dolayısıyla bu vaka, devletin çevresel riskleri yönetirken toplumu şeffaf bir biçimde bilgilendirmesinin, sadece bürokratik bir işlem değil; demokratik bir toplumda yaşam hakkını koruyan kurucu bir yükümlülük olduğunu kanıtlamıştır.

2006 yılında AİHM, *Sdružení Jihočeské Matky v. Çek Cumhuriyeti davasında*[36] başvuran çevre konusunda bir sivil toplum örgütü olan Güney Bohemya Anneleri Derneğidir. Dernek, nükleer santral kurulmasına ilişkin yetkili idareden bilgi ve belgeler talep etmişse de söz konusu talep ulusal güvenlik, endüstriyel sır ve kamu sağlığı gerekçeleriyle reddedilmiştir. Konuya ilişkin değerlendirmesinde AİHM, uyuşmazlığın kamu yararını ilgilendiren bir konuda ve AİHS 10. Madde kapsamında olup bilgi edinme hakkına haksız bir müdahalede bulunulduğunu tespit etmiştir. Zira çevreye ilişkin olan bu uyuşmazlıkta kamunun bilgilendirilmesinin demokratik toplumun gerekliliklerinden olduğu ve devletin bu konuda pozitif yükümlülüğünün bulunduğu belirtilmiştir.

4.2. Eşik Kritler

Eşik kriterlerin belirlenmesine öncü olan Magyar Helsinki Bizottsag/ Macaristan Davasından[37] kısaca bahsetmekte fayda vardır. Somut olayda zorunlu müdafi atamalarının denetlenmesine ilişkin olarak emniyet müdürlüklerinden avukat listelerini talep eden sivil toplum kuruluşuna yirmi sekiz teşkilattan iki tanesi olumsuz yanıt vermesi üzerine ifade özgürlüğü kapsamında bilgi edinme hakkının ihlal edildiği gerekçesiyle olay AİHM'ye taşınmış, Mahkemece eşik kriterler belirlenmiştir.

AİHM'nin geliştirdiği bu doktrinel test, dört kriterden oluşmaktadır. İlk olarak, bilgi edinme talebinin ardındaki meşru bir **amaç** hukuki bir temelinin olması aranır. İkinci sırada, **bilginin içeriği ve niteliği** gelir; belgenin fikir alışverişine olanak tanıyan bir değer taşıması şarttır. Üçüncü kriter ise **başvurucunun kimliği** üzerinedir. Burada özellikle sivil toplum kuruluşları ve gazeteciler gibi, kamuoyunun haber alma hakkını savunan "sosyal bekçi köpeği"[38] rolü belirleyicidir. Son olarak, **bilginin hazır bulunması** şartı devreye girer. Bu, talep edilen verinin hem toplumsal bir ilgi odağı olmasını hem de idare tarafından özel ve aşırı bir araştırma gerektirmeksizin sunulabilir olmasını ifade eder. AİHM dört kriteri olaya uyguladıktan sonra somut olayda açıkça ifade özgürlüğü ve bilgi edinme hakkının ihlal edildiğine hükmetmiştir.

Eşik kriterlerin ifade özgürlüğü ihlali değerlendirmesinde kullanıldığı bir diğer dava Cangı/Türkiye Davasıdır[39]. Arif Ali Cangı tarafından açılan davada, kültürel mirasın korunmasını ilgilendiren bir baraj projesine ait toplantı kayıtlarının paylaşılmaması uyuşmazlığın temelini oluşturmuştur. İdarenin ve BEDK'nin, Bilgi Edinme Kanunu'ndaki kurum içi yazışma muafiyetine (Madde 26) dayanarak verdiği ret kararı, AİHM tarafından AİHS 10. madde kapsamında denetlenmiştir. Mahkeme, başvurucunun bir hukukçu ve STK

[36] **Sdružení Jihočeské Matky v. Çek Cumhuriyeti**, AİHM, Başvuru No:19101/03, Tarih: 10/07/2006.
[37] **Magyar Helsinki Bizottsag/Macaristan**, AİHM, Başvuru No: 18030/11 Tarih: 08/01/2016
[38] **Çebi Buğdaycı,** s.85.
[39] **Cangı/Türkiye Davası,** AİHM, Başvuru No: 24973/15, Tarih: 29/01/2019.

üyesi olarak üstlendiği "sosyal bekçi" işlevini, demokratik bir toplumun vazgeçilmez bir unsuru olarak değerlendirmiştir. İstenen belgenin kamuoyunu yakından ilgilendiren çevresel bir konuya dair olması ve idarenin sunduğu gerekçelerin demokratik toplum düzeninde meşru bir sınırlama teşkil etmemesi nedeniyle mahkeme, devletin pozitif yükümlülüklerini yerine getirmediğine ve ifade özgürlüğünün ihlal edildiğine hükmetmiştir.

5. AYM İÇTİHATLARIYLA BİLGİ EDİNME HAKKI

Anayasa Mahkemesi (AYM)'nin kararlarında AİHM ilkelerini temel bir kıstas olarak baz aldığı açıkça gözlemlenmektedir. Özellikle ifade özgürlüğü ile bilgi edinme hakkı arasındaki bağlantı kuran *Yaman Akdeniz* başvurusu[40], mahkemenin bu konudaki perspektifini yansıtan emsal karar niteliğindedir. AYM bu noktada, düşünceyi yayma hakkının ancak bilgiye erişimin mümkün olduğu bir ortamda mevcut olabileceğini savunarak; devletin bu alandaki engelleyici tavırlardan kaçınmak yönünde negatif yükümlülüğü bulunduğunu[41] belirtmiştir. İdarenin sahip olduğu kamu gücüyle birey karşısında daha avantajlı ve bilginin asıl sahibi konumunda bulunması, demokratik ve şeffaf bir yönetim anlayışı için bilgi akışını gerekli kılsa dahi, idarenin bu paylaşımları gerçekleştirirken mutlak ve sınırsız bir zorunluluk altında olmadığı kabul edilmektedir[42].

Bilgi edinme taleplerinin reddedilmesini ifade özgürlüğüne yönelik bir müdahale olarak gören AYM, bu tespiti yaparken AİHM ilkelerine dayanan iki ana kriterden yararlanır. Bunlar; kesinleşmiş yargı kararlarından doğan bilgilendirme zorunluluğu ve bilgiye erişimin, kanaat oluşturma veya düşünceyi yayma hakkının kurucu bir unsuru olmasıdır[43]. Özellikle ikinci kriterin kapsamı olaydan olaya değişebildiği için, AYM bu noktada hukuki öngörülebilirliği sağlamak adına AİHM'nin doktrine kazandırdığı "eşik kriterleri"[44] uygulama yoluna gitmektedir.

AYM, önüne gelen başvurularda bilgi edinme hakkına yönelik müdahalenin anayasal sınırlarını belirlerken birtakım değerlendirmeler yapmaktadır: bilginin kamusal değeri, sınırlamanın meşruiyeti ve ölçülülüğü, devletin bilgilendirme ödevi, hukuki yolların etkinliği ve verinin niteliğidir. Bilginin toplumsal fayda sağlaması, sadece bireysel bir hak değil, aynı zamanda şeffaf bir yönetimin demokrasiye hizmet etmesi için gereğidir. Anayasa'nın 13. maddesinden doğan ölçülülük ilkesi uyarınca, sınırlama gerekçesi ile hak kullanımı arasında demokratik toplum düzenine uygun bir denge kurulmalıdır[45]. AYM'nin görüşü, halkın yaşamını doğrudan etkileyen çevre ve sağlık meselelerinde devletin bilgilendirme sorumluluğu bulunduğu yönündedir. Son aşamada ise, talep edilen belgenin gizli tutulması gereken devlet sırlarını veya üçüncü kişilerin mahremiyetini ihlal etmemesi, hakkın sınırını çizen nihai ölçüt olarak uygulanır.

5.1. Emsal Karar

[40] **Yaman Akdeniz ve Diğerleri Başvurusu,** AYM, Başvuru No: 2014/3986, Karar Tarihi: 2/4/2014.
[41] **Yaman Akdeniz**, §50
[42] **Yaman Akdeniz**, §51
[43] **Yaman Akdeniz**, §52
[44] **Çebi Buğdaycı,** s.73.
[45] **Sevim Akat Eşki,** AYM, Başvuru No: 2013/2187, Karar Tarihi:19/12/2013, §34-35.

Yaman Akdeniz Başvurusu[46] bilgi edinme hakkının ifade özgürlüğünü tamamlayan hayati işlevini ortaya koyan bir emsal karardır. Olayda, internet sitelerine yönelik sansür ve engellemeleri takip eden bir araştırmacının, Bilgi Teknolojileri ve İletişim Kurumu'nun (BTK) yayımlamayı bıraktığı istatistiklere erişim çabası yargıya taşınmıştır. İdarenin veri hazırlama yükümlülüğü bulunmadığı yönündeki savunması AYM tarafından kabul görmemiş; mahkeme, bilgi edinmenin ifade özgürlüğünün ön şartı olduğunu ve kamu yararının ağır bastığı bu tür vakalarda devletin şeffaf olması gerektiğini belirtmiştir[47]. Mahkeme kararında, demokratik toplumun bekçisi olan STK ve akademisyenlerin bilgiye ulaşmasının engellenmesinin doğrudan halkın haber alma hakkına saldırı olduğu vurgulanmıştır.

AYM'nin denetimi sırasında, meşhur *Magyar Helsinki* kriterleri[48] somut olaya tam uyum sağlamıştır. Başvurucunun "sosyal bekçi" kimliği ve istenen bilginin kamusal tartışmaya hizmet edeceği gerçeği karşısında, idarenin "iş yükü" bahanesi yetersiz kalmıştır. Özellikle verilerin geçmişte yayımlanmış olması, bilginin idarede "hazır" olduğunu kanıtlamıştır. Yargılama sonucunda AYM; BTK'nin ve ilk derece mahkemelerinin adli/idari soruşturma gizliliği gibi alakasız maddelere sığınarak verdikleri gerekçesiz kararların, Anayasa'nın 13. maddesindeki demokratik kriterleri karşılamadığını ve bireyin anayasal haklarını ölçüsüzce kısıtladığını tespit ederek ihlal kararına varmıştır.

5.2. Eşik Kriter Değerlendirmesi

Mesut Deniz Davasında[49] başvurucunun mahallesinde bulunan parkın bakım vb. hizmetlerinden kimin sorumlu olduğuna dair bilgi edinme hakkının ihlali değerlendirmesinde AYM; *"hemşerilik hukuku"* bakımından başvurucunun ehliyetini kabul etmiş ve kamusal alana ilişkin olan parkın bakım hizmetlerine ilişkin bilginin ifade özgürlüğü kapsamında olduğunu, devletin böyle bir bilgiyi paylaşmakta pozitif yükümlülüğü olduğunu değerlendirmişse de; somut olaya eşik kriterleri uyguladığında, parkın sorumlusunun kim olduğu bilgisinin kamusal alan demokrasi tartışmasında önem arz etmeyeceği, başvurunun "sosyal bekçi" sıfatında olmadığı, talep edilen bilginin kolaylıkla elde edilebilecek bir bilgi olması nedenleriyle başvuru hakkında kabul edilmezlik kararı verilmiştir. AYM bu kararıyla, bilgi edinme hakkının anayasal korumadan yararlanabilmesi için "kamusal yarar" ve "araçsallık" şartlarının somut olayda mutlaka gerçekleşmiş olması gerektiğinin altını çizmiştir.

Fatma Akkın Davasında[50] başvurucu, idareden meslekten ihraç edilmesine dayanak dosyayı talep etmiş ancak bilgi edinme talebi karşılanmamıştır. AYM somut olayda devletin bilgi verme yükümlülüğünün mevcudiyeti için gereken şartların oluşup oluşmadığını değerlendirdiğinde, talep edilen bilginin idarede halihazırda bulunmuyor olması nedeniyle talebinin reddedilmesinin hak ihlali olmadığı yönünde karar vermiştir.

C. S. Davasında[51] Hakkında yürütülen soruşturma kapsamında tutuklu olan başvurucunun, kendisinin cezaevine giriş çıkış kayıtlarını alma talebi idarece reddedilmiş ve uyuşmazlık bireysel başvuru yoluyla AYM'ye intikal etmiştir. Mahkeme, olayı Anayasa'nın 26. maddesi ışığında incelerken, talebin toplumsal bir tartışmaya zemin hazırlayıp hazırlamadığına odaklanmıştır. Yaman Akdeniz davasındaki kriterleri referans alan Mahkeme, istenen bilgilerin tamamen şahsi bir nitelik taşıdığını ve kamuoyunun genelini ilgilendiren bir yönü bulunmadığını saptamıştır. Dolayısıyla bu bilgi talebi, bir düşüncenin açıklanması veya yayılması için zorunlu bir araç olarak kabul edilmemiştir. AYM, idarenin ret gerekçelerinin yerindeliğini incelemeye lüzum görmeksizin, başvurunun konu bakımından anayasal yetki sınırlarının dışında kaldığına karar vermiştir. Bu yönüyle C.S. Davası, bilgi edinme hakkının "kişisel merak veya bireysel ihtiyaç" ile "demokratik denetim" arasındaki farkını ortaya koyan kritik bir örnektir.

SONUÇ

Demokrasinin tarihsel serüveni, doğrudan katılımın hüküm sürdüğü Antik Yunan sitelerinden, müzakere ve temsilin esas olduğu modern ulus devletlere kadar büyük bir değişim göstermiştir. Ancak bu süreçte değişmeyen yegâne unsur; halkın yönetim süreçlerini denetleyebilme ve kanaatlerini özgürce ifade edebilme gerekliliğidir. Günümüzün karmaşık toplum yapısında demokrasinin sadece temsilci seçimine indirgenmemesi, Jürgen Habermas'ın vurguladığı "müzakereci demokrasi" modelinin hayata geçirilmesiyle mümkündür. Bu modelin esas noktası ise ise kamusal alanın şeffaflığı ve bireyin bilgiye erişim gücüdür.

Çalışma kapsamında incelenen uluslararası ve ulusal içtihatlar göstermektedir ki; ifade özgürlüğü ve bilgi edinme hakkı birbirini tamamlayan, biri olmaksızın diğerinin işlevsiz kaldığı Atina demokrasisinden günümüz modern demokrasisine dek değişmeyen bir bütündür. AİHM ve AYM, bilgi edinme hakkını ifade özgürlüğünün kullanılabilmesi için vazgeçilmez bir "araç" olarak kabul etmektedir. Ancak bu hak mutlak bir nitelik taşımamakta; *Magyar Helsinki Bizottsag* davası ile belirlenen ve Türk hukukunda da benimsenen "eşik kriterler" ile sınırları çizilmektedir.

Buna göre bilgi edinme talebinin anayasal korumadan yararlanabilmesi için, talep edilen bilginin kamusal bir tartışmaya katkı sunma amacı taşıması ve bir düşüncenin açıklanması için "ön koşul" niteliğinde olması gerekmektedir. *Yaman Akdeniz* ve *C.S.* başvuruları arasındaki temel fark, bilginin kamusal tartışmaya hizmet edip etmediği noktasındadır. Bir diğer unsur ise basın mensupları, akademisyenler ve sivil toplum örgütleri gibi "sosyal bekçi" sıfatını haiz başvuruculların bilgiye erişimi ile demokratik denetimin sağlanması için yargı mercileri tarafından daha geniş bir koruma alanı bulmaktadır. Bu hususta devletin bilgi verme yükümlülüğü, idarenin elinde "hazır" bulunan ve aşırı bir mesai gerektirmeyen verilerle sınırlıdır. *Weber*, *Saure* ve *Bubon* davalarında görüldüğü üzere, idareden yeni bir belge üretmesi veya kapsamlı bir istatistiksel çalışma yapması talep etmek şu an için mümkün görünmemektedir. Aynı şekilde *Fatma Akkın* davasının da gösterdiği üzere, idarede mevcut olmayan bir bilginin sunulmaması bir hak ihlali doğurmamaktadır. Son olarak *Öneryıldız* davasında vurgulandığı üzere, yaşam hakkı ve kamu sağlığı gibi hayati meselelerde devletin

[51] **C. S.,** AYM, Başvuru No: 2019/10175, Tarih: 4/7/2024.

sadece "bilgi talep edildiğinde" değil, resen (kendiliğinden) toplumu bilgilendirme yönünde ağır bir pozitif yükümlülüğü bulunmaktadır.

Neticede; anayasal demokrasinin asgari koşullarını sağlamak, halkın sadece "yönetilen" değil, aynı zamanda "denetleyen" bir mekanizma olarak sistemde yer almasına bağlıdır. Bu ise ancak devletin sahip olduğu bilgi gücünü, ulusal güvenlik ve üçüncü kişilerin hakları gibi meşru sınırlar haricinde, şeffaf bir biçimde kamuoyu ile paylaşmasıyla mümkündür. Bilgi edinme hakkının kısıtlanması, sadece bireyin değil, toplumun tamamının haber alma ve fikir geliştirme hakkına ve dolayısıyla demokrasiye vurulmuş bir darbe olacaktır. Demokratik bir hukuk devletinde asıl olan gizlilik değil açıklıktır; zira aydınlanmış bir kamuoyu, demokrasinin en güçlü teminatıdır.

ÖZET

Milletlerarası ticari ilişkilerin ve hukuki uyuşmazlıkların giderek artması sebebiyle ortak bir hukuk ve yeknesak bir uygulama ihtiyacı doğmuştur. Milletlerarası ticari ilişkilerde en yaygın kullanılan sözleşme türleri arasında taşınır mal satım sözleşmeleri yer almaktadır. Farklı devlet vatandaşları arasında gerçekleşen taşınır mal satım sözleşmelerinde uygulanacak hukukun ve hukuki imkânların yeknesaklaştırılması amacıyla Milletlerarası Mal Satımına İlişkin Sözleşmeler Hakkında Birleşmiş Milletler Antlaşması (*Convention on Contracts for the International Sale of Goods – "CISG"*), 1 Ocak 1988 tarihinde uluslararası alanda yürürlüğe girmiştir. Türkiye'de ise Milletlerarası Mal Satımına İlişkin Sözleşmeler Hakkında Birleşmiş Milletler Antlaşması (Viyana Satım Antlaşması) 1 Ağustos 2011 tarihi itibarıyla yürürlüğe girmiştir.

Viyana Satım Antlaşması'nda taraflardan birinin sözleşmeyi ihlal etmesi hâlinde taraflara tanınan hukuki imkânlar, ihlalde bulunan tarafın alıcı veya satıcı olmasına göre farklılaşmaktadır. Sözleşmenin ihlali hâlinde alıcının sahip olduğu hukuki imkânlar Antlaşma'da 45–52. maddeler arasında düzenlenmiş olup; alıcı, aynen ifa, bedelin indirilmesi ve malın onarılmasını talep edebileceği gibi, şartların varlığı hâlinde sözleşmeden dönme hakkını da kullanabilecektir. Satıcının sözleşmenin ihlali hâlinde sahip olduğu hukuki imkânlar ise Antlaşma'nın 61–65. maddeleri arasında düzenlenmiş; bu kapsamda satıcıya aynen ifa talebi, sözleşmeden dönme ve tazminat isteme hakları tanınmıştır. Çalışmamızda öncelikle sözleşmenin ihlali hâlinde satıcının sahip olduğu hukuki imkânlar ardından ise alıcının sahip olduğu hukuki imkânlar detaylıca sistematik şekilde incelenecektir.

Anahtar Kelimeler: Viyana Satım Anlaşması (CISG), Sözleşmenin İhlali, Alıcı ve Satıcının Hukuki İmkânları.

1.GİRİŞ

Milletlerarası ticari ilişkilerin artmasıyla birlikte, farklı hukuk sistemlerine tâbi taraflar arasında akdedilen taşınır mal satım sözleşmelerinden doğan uyuşmazlıkların yeknesak kurallar çerçevesinde çözümlenmesi ihtiyacı giderek önem kazanmıştır. Bu ihtiyacın bir sonucu olarak kabul edilen Viyana Satım Antlaşması, taraflara uygulanacak maddi hukuk kurallarını belirleyerek öngörülebilirliği ve hukuki güvenliği sağlamayı amaçlamaktadır (Doğan, 2020; Ekşi, 2020; Erdem, 2020) Antlaşma, sözleşmeye aykırılık hallerinde tarafların sahip olduğu hukuki imkânları ayrıntılı biçimde düzenlemiştir.

Viyana Satım Antlaşması'nda sözleşmenin taraflarından birinin yükümlülüklerini ihlal etmesi durumunda başvurulabilecek hukuki imkânlar, ihlalin alıcı veya satıcı tarafından gerçekleştirilmesine göre farklılık göstermekle birlikte, her iki taraf bakımından ortak bazı hakları da içermektedir. Antlaşma'da, sözleşmenin ihlali hâlinde alıcıya tanınan hukuki imkânlar 45–52. maddeler arasında düzenlenmiş; alıcıya aynen ifa, bedelin indirilmesi ve malın onarılmasını talep etme ile belirli koşulların varlığı hâlinde sözleşmeden dönme hakkı tanınmıştır. Buna karşılık, satıcının sözleşmenin ihlali hâlinde sahip olduğu hukuki imkânlar 61–65. maddeler arasında düzenleme alanı bulmuş; bu çerçevede satıcıya aynen ifa talebi, sözleşmeden dönme ve tazminat isteme hakları öngörülmüştür. Bu çalışma kapsamında, öncelikle sözleşmenin ihlali hâlinde satıcının sahip olduğu hukuki imkânlar, ardından alıcının sahip olduğu hukuki imkânlar ele alınacaktır.

2. ARAŞTIRMA VE BULGULAR

2.1. Viyana Satım Antlaşması Uyarınca Sözleşmenin İhlali Halinde Satıcının Sahip Olduğu Hukuki İmkanlar

Sözleşmenin ihlal edilmesi halinde satıcının sahip olacağı hukuki imkanlar, Antlaşmanın 61-65. maddeleri arasında düzenleme alanı bulmuştur. Satıcının, sözleşmeye aykırılıktan dolayı hukuki imkanlara başvurabilmesi için alıcının, sözleşmeden veya Antlaşmadan doğan yükümlülüklerini ihlal etmesi (VSA m. 61/1) ve 79 ile 80. maddeler uyarınca kendisini sorumluluktan kurtarmamış olması gerekir. Sözleşmenin ihlali sebebiyle alıcının sorumluluğunun doğması için ise kusurun mevcutiyeti gerekmez (Sert Canpolat, 2013).

Taraflardan biri yükümlülüklerinden birini ifa etmemesinin, denetimi dışında kalan bir engelden kaynaklandığını ve bu engelden ve sonuçlarından kaçınmasının veya bunları aşmasının kendisinden makul olarak beklenemeyeceğini ispatlaması halinde ifa etmemeden dolayı sorumlu tutulmaz (VSA m. 79/1). Sorumluluktan kurtulma durumu, engelin var olduğu dönem için geçerlidir (VSA m. 79/3). İfa etmeyen taraf, engeli ve kendisinin ifa kabiliyeti üzerindeki etkilerini diğer tarafa bildirmek zorundadır. Bu bildirim, ifa etmeyen tarafın engeli bildiği veya bilmesi gerektiği andan itibaren makul bir süre içinde karşı tarafa ulaşmazsa, ulaşmama olgusundan kaynaklanan zararı ifa etmeyen taşır (VSA m. 79/4). Bu madde, tarafların bu Antlaşma uyarınca tazminat talebi dışındaki herhangi bir hakkını kullanmasını engellemez (VSA m. 79/5).

Sözleşmenin ihlal edilmesi durumunda satıcının, sahip olduğu hukuki imkanları kullanabilmesi için ifa etmeme halinin kendi eyleminden veya eylemsizliğinden kaynaklanmaması gerekir (VSA m. 80).

2.1.1. Satıcının İfa Talebi

Satıcı, semenin ödenmesini veya malın teslim alınmasını isteyebileceği gibi; diğer yan yükümlülüklerin ifa edilmesini de isteyebilir. Ancak satıcı, bu taleplerle bağdaşmayan hukuki bir imkândan yararlanırsa artık aynen ifa talep edemeyecektir (VSA m. 62). Netice itibarıyla, satıcının aynen ifa talebi; semenin ödenmesi, malın teslim alınması veya diğer yan yükümlülüklerin yerine getirilmesinden ibarettir. Bununla birlikte, satıcının aynen ifa talebinde bulunabilmesi bakımından, yükümlülüğe aykırılığın derecesi veya kusurun varlığı önem arz etmez (Taştan, 2019).

Satıcı, sözleşmeye aykırılığın giderilmesi için alıcıya makul uzunlukta bir ek süre verebilir (VSA m. 63/1). Ek sürenin sonunda yükümlülüklerin yerine getirilmemesi durumunda ise satıcı, sözleşmeden dönebilecektir (VSA m. 64/1). Ek sürenin verilmesi, sözleşmeye aykırılığın esaslı ihlal teşkil edip etmediğinden bağımsızdır. Aykırılığın asli veya yan yükümlülüklere ilişkin olması da önemli değildir (Sert Canpolat, 2013). Ek sürenin verilebilmesi herhangi bir şekil şartına da bağlı olmayıp; satıcının bunu açıkça belirtmesi ve bu yönde irade beyanında bulunması yeterlidir (Taştan, 2019). Ek sürenin bitiminde, sözleşmeye aykırılık giderilmez ise sözleşmeden dönülebilir (Schlechtriem/Butler, 2008).

2.1.2. Sözleşmeden Dönme Hakkı

Satıcının, yükümlülüklerin ihlal edilmesi halinde sözleşmeden dönebileceği Antlaşmada ifade edilmiştir. Buna göre, satıcı aşağıdaki durumlarda sözleşmenin ortadan kalktığını beyan edebilir;

a) Alıcının sözleşmeden veya bu Antlaşmadan doğan yükümlülüklerinden herhangi birini yerine getirmemesi sözleşmeye esaslı bir aykırılık oluşturuyorsa veya

b) Alıcı, satıcı tarafından 63. maddenin 1. fıkrası uyarınca verilmiş ek süre içinde semeni ödeme borcunu yerine getirmez veya malları teslim almaz veya verilmiş süre içinde bunu yapmayacağını açıklarsa (VSA m. 64/1).

Satıcının sözleşmeden dönmesi için ihlal edilen yükümlülüğün esaslı ihlal teşkil etmesi gerekir. Bu noktada, ihlal edilen yükümlülüğün asli veya yan yükümlülük niteliğinde olması önem arz etmez. Somut olayın özelliklerine göre yükümlülüğün ihlali esaslı ihlal olarak değerlendirilirse, yani satıcının sözleşmeden beklediği menfaatten yoksun kalması söz konusu olursa, sözleşmeden dönme yoluna başvurulabilir (Serozan, 2012; Schlechtriem/Butler, 2008) Dönme, herhangi bir şekil şartına bağlı olmayan bir irade beyanıyla gerçekleştirilir (Sert Canpolat, 2013).

2.1.3. Satıcının Malın Özelliklerini Belirleme Hakkı

Taraflar arasındaki sözleşmede malların şeklini, ölçüsünü veya diğer niteliklerini alıcının belirlemesi gerekiyor ise ve alıcı bu belirlemeyi kararlaştırılan tarihte veya satıcının talebinin ulaşmasından itibaren makul bir süre içinde yapmamışsa, satıcı, sahip olduğu diğer haklara halel gelmeksizin, alıcının, kendisi tarafından bilinebilecek ihtiyaçlarına göre bu belirlemeyi bizzat yapabilir (VSA m. 65/1).

Satıcı belirlemeyi bizzat yaparsa, bunun ayrıntıları hakkında alıcıyı bilgilendirmesi ve ona farklı bir belirleme yapması için makul bir süre tanıması gerekir. Alıcı, satıcının açıklamasının

ulaşmasından sonra, bu olanağı, verilmiş süre içinde kullanmazsa, satıcı tarafından yapılmış belirleme bağlayıcı olur (VSA m. 65/2).

2.1.4. Tazminat Talep Etme Hakkı

Antlaşmada 74-77. maddeler arasında düzenlenen tazminat talep etme hakkı, sözleşmeye aykırılık halinde hem satıcının hem de alıcının sahip olduğu ortak bir hukuki imkandır. Taraflardan birinin sözleşmeyi ihlâli halinde ödenecek tazminat, mahrum kalınan kâr dahil olmak üzere, ihlâlden dolayı diğer tarafın uğradığı zararın toplamına eşittir. Söz konusu tazminat, ihlâl eden tarafın sözleşmenin kurulması sırasında sözleşme ihlâlinin muhtemel sonucu olarak öngördüğü veya o tarihte bildiği veya bilmesi gerektiği veriler ışığında öngörmesi gerektiği zararı aşamaz (VSA m. 74).

Antlaşmada düzenleme alanı bulan tazminat imkânı, satıcının, sözleşmenin ihlalinden kaynaklanan tüm zararını karşılamak amacı taşır. Dolayısıyla, bu konuda, Antlaşmada kabul edilen ilke tam tazmin ilkesidir (Birinci Uzun, 2014). Tam tazmin ilkesi hem satıcının sözleşmeden beklediği menfaati hem de satıcının sahip olduğu hukuki imkanlara gelen zarardan kaçınılmasını koruma altına alma çabası güder (Birinci Uzun, 2014).

Antlaşma, tazminat imkanıyla birlikte, satıcının sözleşmeden beklediği menfaati koruyarak, sözleşmeye uygun ifa gerçekleşmiş olsaydı satıcının ekonomik açıdan içinde bulunacağı durumu sağlamayı amaçlamıştır (Sert Canpolat, 2013). Yani burada amaçlanan müspet zararın tazminidir. Antlaşmada tam tazmin ilkesi esas alınmasına karşın, m. 74 hükmü uyarınca tazminatın zararı aşamayacağı belirtilmiştir. Bununla birlikte, Antlaşmada sözleşme serbestisi ilkesi geçerli olduğundan, taraflar, sözleşmede tazminata ilişkin, uğranılan zarar miktarını aşan hükümlere yer verebilirler ve bu durumda da sözleşme hükümlerine riayet edilmesi gerekir (Sert Canpolat, 2013). Ek olarak, tazminatın para olarak ödenmesi kabul edilmektedir (Erdem, 2013).

Tazminat talep edebilmek için aranan ilk şart, sözleşmede öngörülen bir yükümlülüğün alıcı tarafından ihlal edilmesidir. Tazminat talebi için söz konusu ihlalin esaslı ihlal niteliğinde olması da gerekmez. Bununla birlikte, ihlal edilen yükümlülüğün, Antlaşmada yer alan bir yükümlülük olup olmaması önem arz etmez (Sert Canpolat, 2013). Antlaşmada sözleşme serbestisi ilkesi benimsendiği için taraflar, Antlaşmada düzenlenmeyen bir durumu, aralarında akdettikleri sözleşmede yükümlülük olarak kabul etmiş olabilirler.

Tazminat talep etmek için gereken ikinci şart, sözleşmeye aykırılık sonucunda zarar meydana gelmiş olmasıdır. Tam tazmin ilkesi gereği tazmin edilecek olan zarar; aykırılıktan kaynaklanan fiili zarar ile yoksun kalınan kârdan oluşur (VSA m. 74). Fakat Antlaşmada fiili zarar ile yoksun kalınan kâra ilişkin bir tanım mevcut değildir. Antlaşma uyarınca zarar, tarafın halihazırda sahip olduğu mal varlığı ile sözleşme ihlal edilmemiş olsaydı bulunacağı durum arasındaki farktır (Erdem, 2013).

Tazminat talebi için gerekli olan üçüncü şart, sözleşmeye aykırı davranış ile zararın meydana gelmesi arasında nedensellik bağı bulunmasıdır. Söz konusu nedensellik bağı, genel hükümlerde de kabul edilen, sözleşmenin karşı tarafının kusurlu hareketinin zarara sebebiyet vermesi halidir (Sert Canpolat, 2013).

Tazminat talebi için gereken dördüncü ve son şart ise sorumsuzluk sebeplerinin mevcut

olmaması halidir. Sorumsuzluk sebepleri Antlaşmada m. 79 ve 80'de düzenlenmiştir. Yukarıda üçüncü bölümün başlangıcında bu hususa ilişkin bilgiler verilmiştir.

2.2. Viyana Satım Antlaşması Uyarınca Sözleşmenin İhlali Halinde Alıcının Sahip Olduğu Hukuki İmkanlar

Sözleşmenin ihlal edilmesi halinde alıcının sahip olacağı hukuki imkanlar, Antlaşmada, 45-52. maddeler arasında düzenleme alanı bulmuştur. Sözleşmeye aykırı davranışın varlığı halinde alıcı; ifayı, bedelin indirilmesini ve malın tamir edilmesini talep edebileceği gibi, sözleşmeden dönme hakkını da kullanabilecektir. Bunlarla birlikte alıcı, tazminat da talep edebilecektir. Alıcının bu hakları kullanması için satıcının kusurlu olması gerekmeyecektir (Erdem, 2013).

Sözleşmeye aykırı davranışın esaslı ihlal teşkil edip etmemesine göre yapılacak değerlendirme sonucunda, alıcının hangi hukuki imkanları kullanabileceği netlik kazanır. Aykırı davranışın esaslı ihlal olması durumunda, yalnızca ikame mal talep hakkı (VSA m. 46/2) ve sözleşmeden dönme hakkı (VSA m. 49) kullanılabilecektir. İhlal esaslı nitelikte değilse bu durumda da bedelin indirilmesini talep hakkı (VSA m. 50) ve malın onarılmasını talep hakkı (VSA m. 46/3) kullanılabilir. Bunlarla birlikte, her halde tazminat talep etme hakkı (VSA m. 74-77) da mevcut olacaktır.

2.2.1. İhlali Gidermesi İçin Satıcıya Ek Süre Verilmesi

Alıcının, sözleşmenin ihlali nedeniyle kullanabileceği haklar için ek süre vermesi, kural olarak, zorunlu değildir (Sert Canpolat, 2013; Erdem, 2013). Bununla birlikte, sözleşmenin ihlal edilmesi durumunda alıcı satıcıya ek süre verebilir. Sözleşmeye aykırı davranışın esaslı ihlal teşkil etmesi durumunda alıcı, ek süre vermeden sözleşmeden dönebilir (VSA m. 49/1).

Alıcı satıcıya, yükümlülüklerini ifa etmesi için makul uzunlukta ek bir süre tanıyabilir (VSA m. 47/1). Söz konusu makul süre içinde yükümlülüklerini ifa etmeyeceği konusunda satıcıdan bir bildirim almadıkça, alıcı, bu ek süre içinde, sözleşmeye aykırılık halinde sahip olduğu hukukî imkânlardan hiçbirine başvuramaz. Ancak bu yüzden alıcı, gecikmiş ifa nedeniyle tazminat talep etme hakkını kaybetmez (VSA m. 47/2). Dolayısıyla, alıcının satıcıya ihlali gidermesi için süre vermesi durumunda, alıcı sözleşmeden dönme veya bedelin indirilmesini talep hakkını kullanamayacaktır.

Daha önceki kısımlarda da belirtildiği üzere, ek süreye ilişkin talep şekle bağlı olmayıp; bir irade beyanıyla yöneltilebilecektir.

2.2.2. İfanın Talep Edilmesi

Satıcının, sözleşmeden veya Antlaşmadan doğan yükümlülüklerini ihlal etmesi durumunda alıcı, aynen ifayı talep edebilir (VSA m. 46/1); mallar sözleşmeye uygun değilse, alıcı ancak bu uygunsuzluğun sözleşmeye esaslı bir aykırılık oluşturması ve 39. madde uyarınca yapılacak bildirimle veya bildirimden itibaren makul bir süre içinde talepte bulunması halinde ikame mal teslimini isteyebilir (VSA m. 46/2); mallar sözleşmeye uygun değilse, alıcı, 39. madde uyarınca yapılacak bildirimle veya bildirimden itibaren makul bir süre içinde satıcıdan sözleşmeye aykırılığın onarım yoluyla giderilmesini isteyebilir (VSA m. 46/3).

Alıcının m. 46/1 hükmü uyarınca ifayı talep edebilmesi için ifanın hiç gerçekleşmemiş olması

şartı aranır. Bu durumda alıcının, ifa talebinde bulunması için satıcıya ek süre vermesi gerekmez. Alıcının, m. 46/2 ve m. 46/3 hükümleri uyarınca talepte bulunması için ise malın ayıplı olması gerekir (Işıntan, 2013).

2.2.3. İkame Mal Talep Hakkı

Alıcının ikame mal talep hakkı, tali ifa taleplerinden olup (Sert Canpolat, 2013); bunun talep edilebilmesi için sözleşmeye aykırılığın esaslı ihlal teşkil etmesi gerekir (Erdem, 2013). Antlaşmadaki düzenlemeye göre, mallar sözleşmeye uygun değilse, alıcı ancak bu uygunsuzluğun sözleşmeye esaslı bir aykırılık oluşturması ve 39. madde uyarınca yapılacak bildirimle veya bildirimden itibaren makul bir süre içinde talepte bulunması halinde ikame mal teslimini isteyebilir (VSA m. 46/2). Hükümde ifade edilen makul sürenin belirlenmesi, malın niteliği dikkate alınarak yapılacaktır. Buna ilişkin yapılacak bildirim için ise herhangi bir şekil şartı öngörülmemiştir (Sert Canpolat, 2013).

Alıcının ikame mal talep etme hakkını kullanabilmesi için esaslı ihlalin mevcut olmasının yanı sıra başka bir sınırlama da Antlaşmada düzenlenmiştir. Buna göre, alıcının, teslim aldığı malları, teslim aldığı andaki duruma esaslı surette yakın bir durumda iade etmesi imkansızlaşmışsa, sözleşmeyi ortadan kaldırma veya satıcıdan ikame mal talep etme hakkı düşer (VSA m. 82/1). Ancak bu hüküm aşağıdaki hallerde uygulanmaz (VSA m. 82/2):

a) Malların iade edilmesinin veya teslim alındığı andaki duruma esaslı surette yakın bir durumda iade edilmesinin imkansızlaşması alıcının bir eyleminden veya eylemsizliğinden kaynaklanmıyorsa,

b) Mallar veya malların bir bölümü 38. maddeye dayalı olarak yapılan muayene sonucunda ziya'a veya hasara uğramışsa veya

c) Mallar veya malların bir bölümü sözleşmeye aykırılığın tespit edildiği veya tespit edilmesi gerektiği tarihten önce ticarî faaliyetin olağan seyri içinde satılmış veya olağan kullanım kapsamında alıcı tarafından tüketilmiş veya şekil değiştirmişse.

3.2.4. Malın Onarılmasını Talep Hakkı

Satıcı bakımından malın onarımı; sözleşme konusu maldaki ayıbın giderilmesine ilişkin bir iş görme borcu ve onarılan malın alıcıya teslimi borcundan oluşur (Sert Canpolat, 2013). Antlaşmada, alıcının malın onarımını isteme hakkı; malın sözleşmeye uygun olmadığı durumlarda, alıcının, 39. madde uyarınca yapacağı bir bildirimle veya bildirimden itibaren makul bir süre içinde satıcıdan sözleşmeye aykırılığın onarım yoluyla giderilmesini isteyebileceği şeklinde düzenlenmiştir (VSA m. 46/3). Alıcı, malın tamiri süresince, sahip olduğu diğer hakları kullanamayacaktır.

Tamir masraflarına satıcı katlanacaktır (VSA m. 48). Makul süre içerisinde tamir gerçekleşmezse alıcı, sözleşmeye aykırılığın esaslı bir nitelikte olması halinde malın yenisiyle değiştirilmesini veya malı bu şekliyle teslim alıp satış bedelinde indirim talep edebilecektir.

2.2.5. Satış Bedelinin İndirilmesini Talep Hakkı

Malların sözleşmeye uygun olmaması durumunda semen ödenmiş olsun veya olmasın alıcı semeni, fiilen teslim edilen malların teslim anındaki değeri ile sözleşmeye uygun malların aynı andaki değeri arasındaki farkla orantılı olarak indirebilir. Ancak satıcı 37. veya 48. maddeler

uyarınca yükümlülüklerinin ifasındaki bütün eksiklikleri giderirse veya alıcı, satıcının bu maddelere uygun olarak yaptığı ifayı reddederse, alıcı semeni indiremez (VSA m. 50).

Alıcının satış bedelinde indirim talep edebilmesi için malın kendisine teslim edilmiş olması gerekmektedir. Bununla birlikte, malın ayıplı olduğunun satıcıya ihbar edilmesi, hakkın kullanımı için şarttır (Sert Canpolat, 2013). Ancak alıcı, ihbar yükümlülüğünü yerine getirmezse bu hakkı kullanamayacak olup; alıcının, gerekli bildirimi yapmama konusunda makul bir özrü varsa, 50. madde uyarınca semende indirim yapması mümkündür (VSA m. 44).

Alıcının bu hakkı kullanması için satıcıya bir irade beyanında bulunması yeterli olacak; beyanın şekli ise önem arz etmeyecektir (Sert Canpolat, 2013).

2.2.6. Sözleşmeden Dönme Hakkı

Sözleşmeden dönme hakkı, tarafların edim yükümlülüklerini henüz ifa etmemeleri halinde söz konusu yükümlülükleri sona erdiren ve daha önce yerine getirilen edimlerin iadesini zorunlu kılan, varması gerekli, şekle bağlı olmayan ve tam iki tarafa borç yükleyen sözleşmelerde geçerli olan yenilik doğurucu bir haktır (Serozan, 2012).

Viyana Satım Antlaşmasında dönme hakkı m. 49 hükmünde düzenleme alanı bulmuştur. Anılan hükme göre alıcı, aşağıdaki durumlarda sözleşmenin ortadan kalktığını beyan edebilir (VSA m. 49/1):

a) Satıcının sözleşmeden veya bu Antlaşmadan doğan yükümlülüklerinden herhangi birini yerine getirmemesi sözleşmeye esaslı bir aykırılık oluşturuyorsa veya

b) Teslim etmeme durumunda satıcı, alıcı tarafından 47. maddenin 1. fıkrası uyarınca verilmiş ek süre içinde malları teslim etmez veya verilmiş süre içinde bunları teslim etmeyeceğini açıklarsa.

Ancak, satıcının malları teslim ettiği hallerde alıcı, sözleşmenin ortadan kalktığını beyan etme hakkını yitirir; meğerki (VSA m. 49/2):

a) Gecikmiş teslim halinde, teslimin yapıldığını öğrendiği andan itibaren makul bir süre içinde sözleşmenin ortadan kalktığını beyan etmiş olsun,

b) Gecikmiş teslimden farklı bir sözleşmeye aykırılık halinde, (i) bu aykırılığı bildiği veya bilmesi gerektiği andan itibaren; (ii) alıcı tarafından 47. maddenin 1. fıkrası uyarınca verilmiş herhangi bir ek sürenin geçmesinden sonra veya satıcının bu ek süre içinde yükümlülüklerini yerine getirmeyeceğini açıklamasından sonra; veya (iii) satıcı tarafından 48. maddenin 2. fıkrası uyarınca belirlenmiş sürenin tamamlanmasından sonra veya alıcının ifayı kabul etmeyeceğini açıklamasından sonra; sözleşmenin ortadan kalktığını makul bir süre içinde beyan etmiş olsun.

Antlaşmaya göre sözleşmeden dönme iradesi, ancak diğer tarafa bildirimle yapılması halinde hüküm ifade eder (VSA m. 26). Dolayısıyla dönme beyanına ilişkin ihbar, bu hakkın kullanılabilmesi için gereklilik koşuludur (Erdem, 2013). Söz konusu dönme beyanı, karşı tarafa vardığı tarihte hüküm doğuracaktır (VSA m. 27).

Dönmenin sözleşmeyi etkileri de Antlaşmada düzenleme alanı bulmuştur. Antlaşmaya göre, taraflar arasındaki sözleşmenin ortadan kaldırılması, tazminat yükümlülüğü saklı kalmak kaydıyla, her iki tarafı da sözleşme ile üstlendikleri yükümlülüklerden kurtarır. Sözleşmenin

ortadan kaldırılması, uyuşmazlıkların çözümüne ilişkin sözleşme hükümlerini veya sözleşmenin ortadan kaldırılması sonrasında tarafların haklarını ve borçlarını düzenleyen diğer sözleşme hükümlerini etkilemez (VSA m. 81/1). Sözleşmeyi tamamen veya kısmen ifa eden taraf, sözleşme uyarınca ifa ettiklerinin veya ödediklerinin iadesini karşı taraftan talep edebilir. Her iki taraf da iade borcu altında ise, edimlerin aynı anda ifa edilmesi gerekir (VSA m. 81/2).

2.2.7. Alıcının Seçimlik Haklarının Satıcı Tarafından Engellenmesi

Satıcının mallara ilişkin vermesi gereken belgeler varsa, bunları sözleşmede öngörülen zamanda, yerde ve şekilde vermesi gerekir. Belgelerin erken verilmesi halinde, satıcı, belgelerin verilmesi için öngörülen ana kadar, belgelerdeki tüm sözleşmeye aykırılıkları gidermek hakkına sahiptir (VSA m. 34). Yine satıcı malların teslim tarihinden önce teslim edilmesi halinde, teslim tarihine kadar, eksik bölümleri veya eksik kalan miktarı teslim edebilir veya sözleşmeye uygun olmayan malları ikame eden yeni mallar teslim edebilir veya malların diğer sözleşmeye aykırılıklarını giderebilir (VSA m. 37). Görüldüğü üzere satıcının, sözleşmeye aykırılıkları, vadeden önce giderebileceği durumlar mevcuttur. Bu aykırılıkların vadeden önce giderilmesi söz konusu olduğu için alıcı, seçimlik haklarını kullanamayacaktır.

Antlaşmada, satıcının, vadeden sonra da sözleşmeye aykırılıkları giderebileceği düzenlenmiştir. Buna göre, alıcının sözleşmeden dönme saklı kalmak üzere, satıcı, yükümlülüklerinin ifasına ilişkin her türlü eksikliği, masrafları kendisine ait olmak üzere ve makul olmayan bir gecikmeye yol açmamak kaydıyla, teslim tarihinden sonra da giderebilir (VSA m. 48/1). Anılan hüküm kapsamında alıcının tazminat talep etme hakkı da saklıdır.

Netice itibarıyla, satıcı gerek vadeden önce gerekse vadeden sonra sözleşmeye aykırılıkları gidererek, alıcının kendisine karşı seçimlik haklarını kullanmasını engelleyebilecektir.

2.2.8. Tazminat Talep Etme Hakkı

Tazminat talep etme hakkı Antlaşmada 74-77. maddeler arasında yer alan ve hem alıcının hem de satıcının başvurabileceği ortak bir hukuki imkân olarak düzenlenmiştir. Dolayısıyla bu konuda yukarıda değinilen , satıcının tazminat talebine ilişkin hususlar alıcı bakımından da aynen geçerli olacaktır.

2.2.9. Kısmi Sözleşme İhlali Durumunda Alıcının Hakları

Satıcı malların yalnızca bir kısmını teslim etmiş ise veya teslim edilmiş malların yalnızca bir kısmı sözleşmeye uygun ise, 46. ve 50. maddeler eksik veya sözleşmeye uygun olmayan kısım için uygulanır (VSA m. 51/1). Dolayısıyla, kısmi aykırılık halinde alıcı, ikame mal talebinde bulunabileceği gibi; malın onarımını da talep edebilir (VSA m. 46). Bununla birlikte alıcı, malların sözleşmeye uygun olmaması durumunda semen ödenmiş olsun veya olmasın alıcı semeni, fiilen teslim edilen malların teslim anındaki değeri ile sözleşmeye uygun malların aynı andaki değeri arasındaki farkla orantılı olarak indirebilir (VSA m. 50).

Eksik veya sözleşmeye uygun olmayan ifanın sözleşmeye esaslı aykırılık teşkil etmesi halinde ise alıcı sözleşmenin tamamının ortadan kalktığını da beyan edebilir (VSA m. 51/2).

3. SONUÇ

Viyana Satım Antlaşması, sözleşmenin ihlali halinde taraflara tanınan hukuki imkânları ayrıntılı ve sistematik bir biçimde düzenleyerek, milletlerarası mal satımında ortaya çıkabilecek uyuşmazlıkların çözümüne önemli katkı sağlamaktadır. Antlaşma'da benimsenen kusurdan bağımsız sorumluluk anlayışı ve tek sözleşme ihlali sistemi, tarafların hak ve yükümlülüklerini objektif ölçütlere bağlamakta; bu yönüyle Antlaşma, farklı hukuk sistemleri arasında ortak bir zemin oluşturmaktadır.

Satıcı ve alıcıya tanınan hukuki imkânlar incelendiğinde, Antlaşma'nın temel amacının sözleşmenin mümkün olduğu ölçüde ayakta tutulması olduğu görülmektedir. Ek süre verilmesi, onarım ve ikame mal talepleri gibi düzenlemeler, sözleşmeye uygun ifanın sürdürülmesini teşvik ederken; esaslı ihlal hallerinde sözleşmeden dönme imkânının tanınması, taraf menfaatlerinin korunmasını sağlamaktadır. Tazminat talep hakkının ise tam tazmin ilkesi çerçevesinde düzenlenmesi, ihlal nedeniyle uğranılan zararın giderilmesini hedeflemektedir.

Sonuç olarak, Viyana Satım Antlaşması, sözleşmeye aykırılık halinde taraflara tanınan hukuki imkânlar bakımından tarafların menfaatlerinin korunmasında dengeli bir hukuki çerçeve oluşturmaktadır. Antlaşma hükümlerinin doğru yorumlanması ve somut olayın özellikleri dikkate alınarak uygulanması, milletlerarası ticari ilişkilerde hukuki güvenliğin sağlanması açısından kritik önem arz etmektedir. Bu bağlamda, Antlaşma'nın satıcı ve alıcı bakımından öngördüğü düzenlemeler, uygulamada ortaya çıkabilecek uyuşmazlıkların çözümünde yol gösterici niteliktedir.

ÖZET

Yatırım yoluyla vatandaşlık kazanma günümüzde birçok ülke tarafından düzenlenen hukuki bir müessesedir. Devletlerin bu yolu tercih etmelerindeki temel amaç, ülke ekonomisine katkı sağlayacak yabancı sermaye girişini teşvik etmek, ekonomik büyümeyi desteklemek ve istihdam yaratmaktır. Türk hukukunda yatırım yoluyla vatandaşlık kazanma 2016 yılında 5901 sayılı Türk Vatandaşlığı Kanununun (TVK) 12. maddesine eklenerek istisnai telsik kapsamında düzenlenmiştir. TVK 12. madde ile bazı kişi gruplarının belli bir yatırım türü ve tutarları ile Türk vatandaşlığını istisnai yoldan kazanmasının önü açılmıştır. Yatırım yoluyla Türk vatandaşlığını kazanmada belirlenen yatırım türleri ve tutarlarına ilişkin son değişiklik, 13.05.2022 tarihli, 5554 sayılı Cumhurbaşkanı Kararına dayanan "Türk Vatandaşlığı Kanununun Uygulanmasına İlişkin Yönetmelikte Değişiklik Yapılmasına İlişkin Yönetmelik" ile gerçekleşmiştir.
